Over $90,200 but not over $102,200	$41,160, plus 64% of excess over $90,200.
Over $102,200 but not over $122,200	$48,840, plus 66% of excess over $102,200.
Over $122,200 but not over $142,200	$62,040, plus 67% of excess over $122,200.
Over $142,200 but not over $162,200	$75,440, plus 68% of excess over $142,200.
Over $162,200 but not over $182,200	$89,040, plus 69% of excess over $162,200.
Over $182,200	$102,840, plus 70% of excess over $182,200.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed from the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of the household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,200	No tax.
Over $2,200 but not over $2,700	14 percent of the excess over $2,200.
Over $2,700 but not over $3,200	$70, plus 15 percent of excess over $2,700.
Over $3,200 but not over $3,700	$145, plus 16 percent of excess over $3,200.
Over $3,700 but not over $4,200	$225, plus 17 percent of excess over $3,700.

Over $4,200 but not over $6,200	$310, plus 19 percent of excess over $4,200.
Over $6,200 but not over $8,200	$690, plus 21 percent of excess over $6,200.
Over $8,200 but not over $10,200	$1,110, plus 23 percent of excess over $8,200.
Over $10,200 but not over $12,200	$1,570, plus 24 percent of excess over $10,200.
Over $12,200 but not over $14,200	$2,050, plus 25 percent of excess over $12,200.
Over $14,200 but not over $16,200	$2,550, plus 28 percent of excess over $14,200.
Over $16,200 but not over $18,200	$3,110, plus 31 percent of excess over $16,200.
Over $18,200 but not over $20,200	$3,730, plus 34 percent of excess over $18,200.
Over $20,200 but not over $22,200	$4,410, plus 36 percent of excess over $20,200.
Over $22,200 but not over $24,000	$5,130, plus 38% of excess over $22,200.
Over $24,200 but not over $28,200	$5,890, plus 40% of excess over $24,200.
Over $28,200 but not over $34,300	$7,490, plus 45% of excess over $28,200.
Over $34,200 but not over $40,200	$10,190, plus 50% of excess over $34,200.
Over $40,200 but not over $46,200	$13,190, plus 55% of excess over $40,200.
Over $46,200 but not over $52,200	$16,490, plus 60% of excess over $46,200.
Over $52,200 but not over $62,200	$20,090, plus 62% of excess over $52,200.
Over $62,200 but not over $72,200	$26,290, plus 64% of excess over $62,200.
Over $72,200 but not over $82,200	$32,690, plus 66% of excess over $72,200.
Over $82,200 but not over $92,200	$39,290, plus 68% of excess over $82,200.
Over $92,200 but not over $102,200	$46,290, plus 69% of excess over $92,200.
Over $102,200	$52,990, plus 70% of excess over $102,200.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return with his spouse under section 6013 tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $1,600	No tax.
Over $1,600 but not over $2,100	14% of the excess over $1,600.
Over $2,100 but not over $2,600	$70, plus 15% of excess over $2,100.
Over $2,600 but not over $3,100	$145, plus 16% of excess over $2,600.
Over $3,100 but not over $3,600	$225, plus 17% of excess over $3,100.
Over $3,600 but not over $5,600	$310, plus 19% of excess over $3,600.
Over $5,600 but not over $7,600	$690, plus 22% of excess over $5,600.
Over $7,600 but not over $9,600	$1,130, plus 23% of excess over $7,600.
Over $9,600 but not over $11,600	$1,590, plus 25% of excess over $9,600.
Over $11,600 but not over $13,600	$2,090, plus 29% of excess over $11,600.
Over $13,600 but not over $15,600	$2,670, plus 33% of excess over $13,600.
Over $15,600 but not over $17,600	$3,330, plus 38% of excess over $15,600.
Over $17,600 but not over $19,600	$4,090, plus 42% of excess over $17,600.
Over $19,600 but not over $21,600	$4,930, plus 45% of excess over $19,600.
Over $21,600 but not over $23,600	$5,830, plus 48% of excess over $21,600.
Over $23,600 but not over $27,600	$6,790, plus 50% of excess over $23,600.
Over $27,600 but not over $33,600	$8,790, plus 53% of excess over $27,600.
Over $33,600 but not over $39,600	$11,970, plus 55% of excess over $33,600.
Over $39,600 but not over $45,600	$15,270, plus 58% of excess over $39,600.
Over $45,600 but not over $51,600	$18,750, plus 60% of excess over $45,600.
Over $51,600 but not over $61,600	$22,350, plus 62% of excess over $51,600.
Over $61,600 but not over $71,600	$28,550, plus 64% of excess over $61,600.
Over $71,600 but not over $81,600	$34,950, plus 66% of excess over $71,600.
Over $81,600 but not over $91,600	$41,550, plus 68% of excess over $81,600.
Over $91,600 but not over $101,600	$48,350, plus 69% of excess over $91,600.
Over $101,600	$55,250, plus 70% of excess over $101,600.

"(e) ESTATES AND TRUSTS.—There is hereby imposed on the taxable income of every estate and trust taxable under this subsection a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $500	14 percent of the taxable income.
Over $500 but not over $1,000	$70, plus 15 percent of excess over $500.
Over $1,000 but not over $1,500	$145, plus 16 percent of excess over $1,000.
Over $1,500 but not over $2,000	$225, plus 17 percent of excess over $1,500.
Over $2,000 but not over $4,000	$310, plus 19 percent of excess over $2,000.
Over $4,000 but not over $6,000	$690, plus 22 percent of excess over $4,000.
Over $6,000 but not over $8,000	$1,130, plus 23 percent of excess over $6,000.
Over $8,000 but not over $10,000	$1,590, plus 25 percent of excess over $8,000.
Over $10,000 but not over $12,000	$2,090, plus 29 percent of excess over $10,000.
Over $12,000 but not over $14,000	$2,670, plus 33 percent of excess over $12,000.
Over $14,000 but not over $16,000	$3,330, plus 38 percent of excess over $14,000.
Over $16,000 but not over $18,000	$4,090, plus 42 percent of excess over $16,000.
Over $18,000 but not over $20,000	$4,930, plus 45 percent of excess over $18,000.
Over $20,000 but not over $22,000	$5,830, plus 48 percent of excess over $20,000.
Over $22,000 but not over $26,000	$6,790, plus 50% of excess over $22,000.
Over $26,000 but not over $32,000	$8,790, plus 53% of excess over $26,000.
Over $32,000 but not over $38,000	$11,970, plus 55% of excess over $32,000.
Over $38,000 but not over $44,000	$15,270, plus 58% of excess over $38,000.
Over $44,000 but not over $50,000	$18,750, plus 60% of excess over $44,000.
Over $50,000 but not over $60,000	$22,350, plus 62% of excess over $50,000.
Over $60,000 but not over $70,000	$28,550, plus 64% of excess over $60,000.
Over $70,000 but not over $80,000	$34,950, plus 66% of excess over $70,000.
Over $80,000 but not over $90,000	$41,550, plus 68% of excess over $80,000.
Over $90,000 but not over $100,000	$48,350, plus 69% of excess over $90,000.
Over $100,000	$55,250, plus 70% of excess over $100,000."

(b) WITHHOLDING AMENDMENT.—Subsection (a) of section 3402 (relating to requirement of withholding) is amended by striking out the second and third sentences and inserting in lieu thereof the following new sentence: "With respect to wages paid after December 31, 1978, the tables so prescribed shall be the same as the tables prescribed under this subsection which were in effect on January 1, 1975, except that such tables shall be modified to the extent necessary to reflect the amendments made by sections 101 and 102 of the Tax Reduction and Simplification Act of 1977 and the amendments made by sections 101 and 102 of the Revenue Act of 1978."

(c) EFFECTIVE DATES.—

(1) The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1978.

(2) The amendment made by subsection (b) shall apply to wages paid after December 31, 1978.

Section 102 of the bill (relating to personal exemptions increased to $1,000) is deleted and a new section 102 is inserted in lieu thereof to read as follows:

SEC. 102. GENERAL TAX CREDIT.

(a) INCREASE IN AMOUNT OF CREDIT.—Paragraph (2) of section 42(a) (relating to general tax credit) is amended by striking out "$35" and inserting in lieu thereof "$100".

(b) CREDIT MADE PERMANENT.—

(1) Subsection (b) of section 3 of the Revenue Adjustment Act of 1975 (relating to effective date for general tax credit) is amended by striking out the last sentence.

(2) Subsection (e) of section 401 of the Tax Reform Act of 1976 (relating to effective date for extensions of individual income tax reductions) is amended by striking out the first sentence and inserting in lieu thereof the following: "The amendments made by subsection (a) shall apply to taxable years ending after December 31, 1975.".

(c) FILING REQUIREMENTS.—Paragraph (1) of section 6012(a) (relating to persons required to make returns of income) is amended—

(1) by striking out "$2,950" and inserting in lieu thereof "$3,650",

(2) by striking out "$3,950" and inserting in lieu thereof "$4,650",

(3) by striking out "$4,700" and inserting in lieu thereof "$6,100", and

(4) by striking out "$750" each place it appears in subparagraph (B) and inserting in lieu thereof "$1,350".

(d) EFFECTIVE DATES.—

(1) In general.—The amendments made by subsections (a) and (c) shall apply to taxable years beginning after December 31, 1978.

(2) Subsection (b).—The amendments made by subsection (b) shall take effect on the date of the enactment of this Act.

Amend section 21(f) of the Internal Revenue Code of 1954 (as proposed to be inserted by section 105 of the bill) to read as follows:

"(f) CHANGES MADE BY REVENUE ACT OF 1978.—In applying subsection (a) to a taxable year which is not a calendar year, the amendments made by sections 101(a), 102 (a), and 301 of the Revenue Act of 1978 (and no other amendments made by such Act) shall be treated as a change in a rate of tax."

Section 403 of the bill (relating to separate minimum tax on capital gains) is deleted and a new section 403 is inserted in lieu thereof to read as follows:

SEC. 403. ADJUSTMENT OF CAPITAL GAIN DEDUCTION FOR INDIVIDUALS.

(a) IN GENERAL.—Section 1202 (relating to deduction for capital gains) is amended to read as follows:

"SEC. 1202. DEDUCTION FOR CAPITAL GAINS OF INDIVIDUALS.

"(a) GENERAL RULE.—Except as otherwise provided in this section, if for any taxable year a taxpayer other than a corporation has a net capital gain, 50 percent of the amount of the net capital gain shall be a deduction from gross income.

"(b) LIMITATION WHERE DEDUCTIONS EXCEED ORDINARY INCOME.—

"(1) APPLICATION OF LIMITATION.—This subsection shall apply for the taxable year only if—

"(A) the deductions allowable by this chapter (other than the deduction allowable under subsection (a) and the charitable contribution deduction allowable by section 170) exceed

"(B) the gross income reduced by the net capital gain.

"(2) CEILING WHERE LIMITATION APPLIES.—If this subsection applies for the taxable year, the amount allowable as a deduction under subsection (a) shall not exceed ½ of the greater of—

"(A) $10,000 ($5,000 in the case of a married individual filing a separate return), or

"(B) the net capital gain reduced by the excess referred to in paragraph (1).

"(3) SPECIAL RULES FOR COMPUTATIONS.—For purposes of this subsection if the taxpayer does not itemize deductions, the zero bracket amount shall be treated as a deduction.

"(c) OTHER COMPUTATIONS NOT AFFECTED BY SUBSECTION (b).—For purposes of this subtitle, if the amount of any deduction or exclusion is determined by reference to gross income, adjusted gross income, or taxable income, such determination shall be made without regard to subsection (b). The preceding sentence shall not apply to the determination of the charitable contribution deduction under section 170.

"(d) SPECIAL RULES FOR ESTATES AND TRUSTS.—

"(1) IN GENERAL.—In the case of an estate or trust, the deduction under this section shall be computed by excluding the portion (if any) of the gains for the taxable year from sales or exchanges of capital assets which, under sections 652 and 662 (relating to inclusion of amounts in gross income of beneficiaries of trusts), is includible by the income beneficiaries as gain derived from the sale or exchange of capital assets.

"(2) SUBSECTION (b)(2)(A) DOES NOT APPLY TO TRUSTS.—In the case of a trust, subparagraph (A) of subsection (b)(2) shall not apply."

(b) CLERICAL AMENDMENT.—The table of sections for part I of subchapter P of chapter 1 is amended by striking out the item relating to section 1202 and inserting in lieu thereof the following:

"SEC. 1202. DEDUCTION FOR CAPITAL GAINS OF INDIVIDUALS."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

Mr. CORMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read. It has been printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The Chair would inquire of the gentleman from Oregon (Mr. ULLMAN) who the gentleman designates to control the time in opposition?

Mr. ULLMAN. Mr. Chairman, I designate the gentleman from Oklahoma (Mr. JONES) to handle the time in opposition.

The CHAIRMAN. Pursuant to the rule, the gentleman from California (Mr. CORMAN) will be recognized for 30 minutes, and the gentleman from Oklahoma (Mr. JONES) will be recognized for 30 minutes. The Chair recognizes the gentleman from California (Mr. CORMAN).

Mr. CORMAN. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, we discussed this amendment during the debate on the bill. I call attention of the Members that this is an amendment to the committee bill in only two respects. The balance of the committee bill remains exactly as it is.

We suggest an increase of $2 billion in the cuts. We suggest a redistribution of the individual tax cuts. We take approximately $1 billion from incomes above $50,000 and give it to those with incomes below $15,000. The individual cuts between $15,000 and $50,000 are approximately the same.

We suggest a change as to the minimum tax on capital gains. This does not affect the committee's decision to place a 35-percent maximum tax on capital gains. With that we do not argue. We suggest that if one takes a capital gain and shelters his taxable income, that he should have to pay a graduated tax up to 17½ percent if his capital gain is as much as $800,000.

There is a crucial difference in the committee bill and the amendment in that respect. The committee bill suggests a flat 5-percent minimum tax on capital gains. The amendment suggested a graduated minimum tax starting at 3⅓ percent on a $10,000 gain and rising to 17½ percent on an $800,000 gain. That is to put some equity and some credibility into the tax system.

Mr. Chairman, I reserve the balance of my time.

Mr. JONES of Oklahoma. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I want to point out very clearly what we are talking about with regard to the Corman-Fisher amendment. Basically we are talking about three things. First, the size of the tax cut.

Second, the amount of the capital gains relief; and third, the complexity of the tax code. By adding $2.3 billion to the income tax cuts, Corman-Fisher has $2.3 billion more cuts than in the committee bill.

This increases the deficit by a net $2 billion and also subtracts $300 million from the capital gains relief. That is basically the difference between the two bills.

The Kemp-Roth bill is similar in that it adds another $10 billion to the income tax relief.

The committee developed a bill with a total package of $16 billion because we felt this was the right size tax cut that would allow the economy to continue to recover without causing new pressures on inflation. All we add over that adds inflationary pressures to the economy.

Let me finally talk about the question of complexity. As I mentioned in general debate, the committee bill opted for simplification at every turn rather than complicating the tax code. The Corman-Fisher amendment complicates the tax

code in both the individual and capital gains areas. In the individual tax area the amendment retains the 2-year temporary 2-percent credit on the first $9,000 of income or $100 and it peels from the committee bill the $1,000 personal exemption back to $750.

Virtually every taxpayer to whom I have talked does not understand this 2-percent credit and would prefer to have a $1,000 personal exemption.

In the capital gains area there is considerably more complexity. Before we get into the complexities, let me make one point clear on which both the amendment and the committee bill are in agreement. That is that the committee bill, as well as the amendment, is going to insure that those few wealthy individual taxpayers who have high capital gains are going to pay taxes. They are not going to escape paying taxes.

So the question becomes this: How much tax is paid, and how complex is it to figure that tax? The difference is $300 million in the total amount of taxes paid.

As to the complexities, there is miles of difference between the committee bill and the amendment.

I have yet to find anyone from the administration, from those who are the authors of the amendment, who were able to tell me or to tell any audience before which we jointly appeared how the tax is figured. Let us say I am a taxpayer, I have a capital gain, and I itemize my deductions. How do I figure my taxes? They can give us the substantive result, but they cannot tell us how to figure the taxes. I defy them to tell us the answer in a simple, understandable way even today.

It is more complex. It takes a bite out of the capital gains relief we tried to give, and it adds $2 billion to the deficit. Mr. Chairman, I would urge the amendment be defeated.

Mr. ULLMAN. Mr. Chairman, will the gentleman yield?

Mr. JONES of Oklahoma. I am happy to yield to the chairman of the committee.

Mr. ULLMAN. Mr. Chairman, the gentleman from Oklahoma (Mr. JONES) is right. We took this allocation of deductions proposal in 1969, and no one understood it then. They do not understand it now, nor can they explain it now.

What we are doing is relating the itemized deductions to the capital gains. Believe me, once we start doing that, the taxpayers who itemize their deductions are really going to be up in revolt.

Mr. Chairman, this is a complex, difficult amendment to the code, and it should not be included in any bill.

Mr. JONES of Oklahoma. Mr. Chairman, the authors of the amendment in its first stages included charitable deductions. Later they exempted charitable deductions because they recognized in that area that this amendment is a tax on deductions. Now it is not a tax on charitable deductions, but it is a tax on casualty deductions, interest deductions, and the other remaining deductions.

Mr. CORMAN. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, perhaps I can explain to the gentleman from Oklahoma (Mr. JONES) precisely how this is done. I would like to suggest to the Members that those who are going to have to vote on this might perhaps like to read the gentleman's proposal and my proposal.

The gentleman's amendment takes just twice as much legislative language to explain as does ours. All we have to do is take the deductions away from the capital gain, then we split it to ascertain what is to be excluded. The ultimate objective is to see that there is some reasonable amount of minimum tax that is paid.

It is true that our amendment exempts charitable giving because we do not consider that sheltering. I point out that the committee amendment does consider charitable giving as sheltering, and so the 5 percent will apply to that.

There is nothing too complicated at all about how you arrive at what your minimum tax is. And the folks who are so concerned about how they get that list, they know how they get the list because they put it down to escape the tax on the ordinary income. We are talking about 160,000 taxpayers who are the wealthiest in this Nation. Anybody who pays ordinary capital gains tax is not affected at all by either of these amendments.

It takes twice as much legislative language to spell out the committee's approach. I think the reason that some taxpayers scream complexity is that they realize they are going to have to pay some realistic amount of tax. The truth of the matter is they will always have to pay ordinary income tax on at least one-fourth of their capital gains, and that is not very complicated.

Mr. JONES of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. CORMAN. I yield to the gentleman from Oklahoma.

Mr. JONES of Oklahoma. Mr. Chairman, let me ask the gentleman this one question regarding the difference in the amount of deficit between the gentleman's proposal and the committee's proposal. Would the gentleman explain what the net effect on the deficit would be if the gentleman's proposal were adopted?

Mr. CORMAN. The Corman-Fisher amendment cuts taxes by $18 billion; the committee amendment, by $16 billion.

Mr. JONES of Oklahoma. Right. Will there be, as a result of the gentleman's amendment, though, an attempt to make up that $2 billion by any means?

Mr. CORMAN. No.

Mr. JONES of Oklahoma. Will the deficit be larger?

Mr. CORMAN. The question is how much economic stimulus you get from a tax cut.

Mr. JONES of Oklahoma. That is correct.

Mr. CORMAN. It is very difficult to say, in a $2 trillion economy, what a tax cut of $2 billion is going to do to inflation or how much stimulation there is.

Mr. JONES of Oklahoma. Mr. Chairman, I yield 2 minutes to the gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. Mr. Chairman, I urge the Committee to support the committee bill. I want to mention a couple of reasons, briefly. One thing is that under the proposed amendment, if I can say it in the simplest terms I can think of, a person with a capital gain cannot use that gain to offset any casualty loss they may have.

It may be a Boston fisherman who loses his boat and he needs another boat, so he takes his lifetime accumulation of capital assets and sells them. Even though the new boat will carry an inflated price and most or all of the gain represents inflation, he cannot offset that loss against that gain. Or a family may have a major illness—and they do befall most families once or twice in a lifetime—and they take 15 or 20 years of accumulated assets that they have been able to save and, although the gain may be mostly or all inflation, they cannot offset that medical loss against the gain. It may be a farmer who must sell out and go out of business due to a bad crop and high costs, but he still cannot first offset the losses against the increases in dollar value in the assets he sells which represent inflation. He just has to swallow that and pay the taxes, in effect, on his loss. I do not think that is right. That is the reason this proposal did not fly a few years ago, and it should not pass now. The amendment also reduces the exemption for the elderly by $500 and makes a more complicated offset that for many is less valuable. Also, this bill contains several very good things for small business. There are about half a dozen of them. They were not easily acquired. This committee did a good job putting this bill together, despite the fact that we had a lot of outsiders interrupting and frustrating all the time. Now we have a bill that is a decent bill, a good bill, and I am afraid that if we amend it, as proposed here, that what we will end up with, probably, with a motion to recommit that is less acceptable, or else it will go over to the other body and they will end up writing this bill which will not be as acceptable as the committee bill but it will have a better chance to prevail. I think we should stick with the bill we have here, and I urge the defeat of this amendment.

Mr. Chairman, for the benefit of the 134 of my colleagues who have joined with me in sponsoring a bill to provide for graduation in the corporate income tax, and also for those of my colleagues who have not, I would like to express my feelings on behalf of the small business community with respect to the tax bill currently before us.

Section 301 of this bill does provide for graduation of the corporate income tax, according to the following schedule:

[In percent]

Taxable income:	*Tax rate*
$1 to $25,000	17
$25,001 to $50,000	20
$50,001 to $75,000	30
$75,001 to $100,000	40
Over $100,000	46

The graduation schedule actually preferred by the Small Business Committee involves a six-step approach which would graduate the tax up to the $150,-

000 level of income, instead of the $100,000 level in the tax bill. This I think would provide more of the relief which is needed in view of the fact that had the surtax threshold (presently $50,000) been increased merely to keep up with inflation, it would now be levied at $175,000 instead of $50,000. In addition, a "sudden death" jump in the tax rate—presently 26 percent when income exceeds $50,000—places pressure on businessmen to make uneconomic decisions in an attempt to spread income more evenly over several tax years. This is not good at any surtax level, and a graduated rate structure would eliminate the desirability of doing this.

The concept of graduation in the corporate income tax is one strongly favored by small business. Before working up the proposed graduation schedule other members of the Small Business Committee and I met with a number of different organizations representing small business. We asked them what they considered to be their top priority in this Congress with respect to legislation. Although each group had its own slightly different variations, the answer was practically unanimous—the change most needed was a graduated corporate income tax.

While the relief granted small business by the four-step graduation schedule in the tax bill is less than what we had hoped for, it nevertheless does preserve the principle of graduation that we have been seeking and thus, I believe, can be considered an acceptable minimum for a compromise. I, therefore, urge my colleagues to support the graduation schedule in the tax bill presently before us.

In addition to the graduated corporate income tax, there are numerous other proposals for changes to be made to the Internal Revenue Code which, from an overall standpoint, may be relatively minor provisions, but which can have a very major impact on small business. Some of these proposals are included in the tax bill and I would just like to address them briefly. These points have previously been made to the Ways and Means Committee when I appeared before them on behalf of the small business community.

Sections 331 through 333 would make certain changes to the subchapter S provisions of the code. The greatest use of the subchapter S election, which permits business owners to utilize the corporate form for business purposes while still being taxed as if they had not incorporated, has been by the smaller businessmen and businesswomen of our country. This is as it was intended to be. Over the years since these provisions were enacted, however, there have been numerous technical aspects which have caused a geat deal of confusion and difficulty and which therefore have posed a ban to effective use of this election. The changes made by the tax bill to correct these problems—increasing the number of permitted shareholders in the corporation, changing the eligibiltiy rules with respect to shareholders who are husband and wife and with respect to grantor trusts, and greatly simplifying the manner of making the election—are definitely needed and have wholehearted support from the small business community.

Section 335 of the bill would increase the dollar limitations with respect to the definition of a "small business corporation" which, under the Internal Revenue Code, allows an ordinary loss deduction (as distinguished from capital loss) to be taken for losses incurred on stock interests held in such corporations. More importantly, the difficult, technical election which has to be made to qualify, and which is frequently overlooked, would be eliminated, thus granting this benefit to all corporations which fit within the size standards.

Lastly, the special depreciation allowance provided in section 179 of the Internal Revenue Code would be increased and for the first time specifically limited to use by small businesses. In testifying before the Ways and Means Committee, I had stressed that depreciation for small business needs to be simplified. While this change in the tax bill may not be a step in the direction of simplification, it does increase the amount of depreciation a small business can take on newly purchased equipment and for this reason is beneficial to the small business community. However, I do think simplification is critical to small businesses being able to utilize the tax benefits available to them, and therefore hope that the tax-writing committee will be willing to explore this further with me in the future.

Mr. Chairman, in addition to those I have specifically addressed, there are other provisions in the tax bill which will have an indirect effect on small business. Obviously, for example, a reduction in the individual income tax rates will be a benefit to those businesses which are not incorporated. With respect to capital gains, any change in the tax which will have the effect of stimulating investment should prove beneficial to small business. Additionally, changes to the investment credit to make it permanent and to increase the limitation on the amount of tax liability it may offset will be helpful to those small businesses which are in capital-intensive industries.

In summary, I want to emphasize the importance attributed to taxes by the small business community. As I have just discussed, the tax bill presently before us contains changes of benefit to small business. There are, however, many more areas where changes could be made to benefit small business and which would have virtually no impact on the Federal revenues. I hope to be able to work with my colleagues on the Ways and Means Committee in developing these further. I commend the Ways and Means Committee, and the Congress, for the consideration shown to the small business community evidenced in part in this tax bill. I hope that this attitude continues in this and future Congresses so that small business has at least as equal a chance at success in its endeavors as do the larger business segments in our society.

Mr. CORMAN. Mr. Chairman, I yield 5 minutes to the gentleman from Virginia (Mr. FISHER).

Mr. FISHER. Mr. Chairman, I would like to say just a few things about this bill that my colleague, the gentleman from California (Mr. CORMAN), and I have sponsored. Do keep in mind that we address only a couple features of the committee's bill. For example, we make no change in what the committee bill has to say about business taxes.

We retain the same changes in rate schedules that benefit smaller businesses as the committee bill does; no change whatsoever. Keep in mind that we make no change in the exemptions on sale of a personal residence, up to $100,000 of gain, once in a lifetime from the capital gains tax. In fact, that idea originated with us and was borrowed and incorporated into the committee bill. That is a good thing, and we want it to stay in.

Coming to the differences, a major difference which has already been pointed out is that we provide for $2 billion more overall of tax reduction. That is not very much, as my colleague has pointed out, in a $2 trillion economy. Let us not argue about peanuts, but in view of the action we took not too long ago to set in motion a reduction of capital gains taxes principally for the big winners coming to $4 billion a year in a few years, $2 billion that would go mainly to middle and low income people in our version of this does not look so bad, does it?

That comes to this: The distribution of the tax cut here, we do specify some change. Very clearly, what we do is provide a little less tax reduction at the very high incomes above $50,000, and apply that and the $2 billion, if you like, to tax reduction in the lower ranges. But, keep this in mind, that we do better in tax reduction than the committee bill on incomes all the way up to $50,000. Not too bad for your middle-income tax revolt person in this country.

Finally, let me point out that behind the Corman-Fisher amendment we now have rallied the support of the administration, the support of the leadership and large numbers of organizations all over the country who speak for small people, ordinary people, average people, whether they are businesses, individuals, families, consumer groups or whatever. They have rallied to this amendment as a significant improvement, more in the tradition of my party and many in the other party when it comes to dealing with taxes.

Do not give it all to the very big winners who make huge capital gains of several hundred thousand dollars a year. Concentrate the reductions on the ordinary people, the lower- and the middle-income brackets. We offer advantages all the way up to $50,000, and that ought to be enough for most everybody.

Mr. Chairman, these are some of the reasons I urge that we make these two principal changes in the committee bill, all of the rest of which we think is very good. I urge my colleagues to vote for the Corman-Fisher amendment, and then vote for the bill.

Mr. JONES of Oklahoma. Mr. Chairman, I yield 3 minutes to the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Chairman, the Corman-Fisher amendment essentially

adds $2 billion to the deficit and sprinkles that $2 billion around among the taxpayers below $50,000. So, we add $2 billion to the deficit and we make people feel a little better by sprinkling it around all through all the brackets. That makes the amendment attractive.

The second part that they do is to take an idea that we tried out here in 1969 and finally discarded when the tax technicians in the Treasury and everyplace else said, "You know, it is unadministratable. We can't make it work. Don't let it happen."

Fortunately before it ever became law it got killed.

Let us not resurrect that old ghost again. It does not do that much good. It is really not that bad, but it really does not help. There is not a lot of difference between Corman-Fisher now that they have modified it.

Does the gentleman include Archer in his modification also?

Mr. CORMAN. If the gentleman will yield, the rules under which we are proceeding will make that determination. That is not a part of our amendment one way or the other.

Mr. GIBBONS. Well, the gentleman has included everything in the committee bill that was already in there except for these two things, adding $2 billion more to the deficit and resurrecting an idea that got discarded in 1969 and has been ghosting around here every since.

As the gentleman from Iowa (Mr. SMITH) pointed out, we run into all kinds of problems. We do in the innocent people who have had hard luck and have to make up for it by selling a capital asset.

If the new alternative tax is too low, then maybe we ought to increase the rate. We certainly ought not go back to an old idea we partly tried once and finally discarded.

I think we ought to stick with the committee bill. Let us get this good bill passed and let it become law.

Mr. CORMAN. Mr. Chairman, I yield 4 minutes to the gentleman from Missouri (Mr. GEPHARDT).

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. GEPHARDT. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, I commend the gentleman from Missouri for his efforts on the committee, albeit not always successful, and I rise in support of the Corman-Fisher amendment.

The Revenue Act of 1978, H.R. 13511, is the vehicle to properly adjust the national revenue format for the 1979 budget year and to address tax modifications necessary in a dynamic economy.

The pressure and the motivations to steer tax policy one direction or another, of course, are enormous. The Committee on Ways and Means worked long on this measure and against the backdrop of volatile economic changes, employment, trade deficit, and inflation.

Lost in this atmosphere were most of the tax reform goals of the new administration and the basic structure of tax cuts which President Carter proposed.

The focus of the committee ironically centered more in repealing reforms enacted in past sessions rather than enactment of simplification and improved reforms. I did not agree with all of the administration reforms, but the committee simply refused to face them.

The committee correctly turned back complete repudiation of the capital gains reforms and modified these in the current Jones compromise providing a 35-percent maximum tax, the microminimum tax, and excepting capital gains from the preference tax. The fact is that 75-percent revenue in tax preference is from the capital gains source.

The Corman-Fisher substitute will preserve much of the work accomplished on capital gains, but replaces the proposed microminimum tax with, I believe, a superior alternative minimum tax. It is progressive, fair, prevents complete shielding of capital gains income, and is an understandable computation.

Unfortunately, while the committee focused months on the capital gains modifications, the major portion of the individual tax program was almost an afterthought. As an example, the expiration of the tax credit and its replacement with a $1,000 personal exemption is far inferior for most individuals than, for instance, the $100 credit and the $750 personal exemption combination proposed by the Corman-Fisher measure. We will hopefully adopt it today. In fact, the committee personal exemption and widening of brackets actually increases taxes for 900,000 taxpayers, many single and married couples without dependents.

The Corman-Fisher comparison with the committee bill provides a better distribution of the tax cut than the committee proposal. The following table clearly illustrates this point.

[In percent]

Income class	Corman-Fisher	Committee proposal
Below $20,000	38	25
$20,000–$50,000	49	51
Above $50,000	13	24

These income groups below $20,000 taxable income really are the middle-income taxpayers who need relief from inflation and scheduled social security tax increases.

I certainly would have preferred general revenue to help offset the scheduled and necesary social security increases or the 5 percent tax credit approach, but that battle was lost in 1977 and again in today's vote on the previous question for the rule. Efforts now must manifest themselves in reframing the Ways and Means tax cut in a fashion sensitive to the needs of working people, the folks who punch a timeclock in our society and who are trying to make ends meet.

I urge my colleagues carefully to review the tables for all amendments which set out their costs and impacts.

The proposed Corman-Fisher amendment and the other provisions in this measure will provide a significant stimulus for our economy while not exacerbating the momentum inflation that the economy is now burdened with, but will address the inflation-creep phenomenon and provide a major break for capital gains.

The one-time $100,000 exclusion of gain on the sale of a home is a benefit with which I strongly agree. The amount is likely beyond the current capital gain, but the reality of future homeowner cost will temper this.

The rollover time provision for reinvesting in a home similarly reflects the needs of people that move frequently.

A targeted job credit as proposed in this measure should help better focus the job credit in circumstances where it will do the most good for Vietnam veterans, handicapped, those on public assistance, and the young.

The corporation tax cut was incorporated by various proposals worked on by the Small Business Committee. I have coauthored measures to provide a more progressive corporation income tax, this definitely will help relieve the burden on all business and, correctly, skewing it favorably toward small business.

Permanent enactment of the 10-percent investment tax credit is premature. The committee has not demonstrated the basic attainment of goals that were initially espoused to justify this increase. A bright spot in this change is the extension to rehabilitation. This obviously will help existing plant and business in declining communities.

Similarly, the special low-income housing amortization rule will help meet urban housing needs in existing communities.

The deferred compensation provision of the committee bill is helpful to public employees employed in various States. The IRS attempted to change its tax treatment of this agreement, and as a consequence various States have requested this legislative proviso. Public employees do not have the stock options and in many instances are limited by special rules not present in the private sector. Providing this deferred status will help reduce the burden for State and local governments.

Close monitoring of the "cafeteria fringe benefit plan" should occur. This obviously could cause significant tax dislocations in the future as they are available to only select or special employee groups.

Our Federal tax system is unfair. This measure certainly will not resolve all the inequities. If we had a perfect tax system we could more simply factor in the effect of inflation without the necessity of reform. In today's Federal tax system we exclude $136 billion in income for various preferences and deductions. This Congress has not done a good job of reviewing these exemptions and the beneficiaries. There will be no acceptance of our Federal tax system unless a more adequate oversight of these measures is attained.

In 1976–77 our budget deficit was in the high $60 billion range, in 1977–78 it was at the low $50 billion level. With restraint in spending and this tax cut measure it is in the low $40 billion area in 1978–79. Today our payment on the

interest of the national debt is about equal to the deficit. The total deficit can be attributed to past programs and military expenditures, national security costs, and some countercyclical programs which have successfully helped relieve unemployment dramatically.

The flexibility in spending at the national level is limited by our own priorities and what we perceive as the needs of our constituencies.

To wish for less spending, less programs will not make it a reality. Revenue measures or amendments today based on that premise simply put the cart before the horse.

How many stood up to vote against the $119 billion defense budget? Or even to cut it 0.8 percent? Not enough. Who stood to cut social security or income maintenance programs? I must admit I did not in this second instance.

I appeal to members of this committee to reject the oversimplified, strained economic logic, that these measures accept as fact, and to face the reality of what is possible, what is attainable if we are not to retreat from the national responsibilities that we embrace as Members of this body.

In summary, we face a difficult task to provide a balanced tax measure. This year especially is difficult.

We have within our reach in adoption of the Corman-Fisher amendment to significantly improve this tax bill, H.R. 13511. I strongly urge your support.

Mr. YOUNG of Missouri. Mr. Chairman, will the gentleman yield?

Mr. GEPHARDT. I yield to the gentleman from Missouri (Mr. YOUNG).

Mr. YOUNG of Missouri. Mr. Chairman, I would like to express my opposition to the motion to recommit this bill with instructions to modify it to conform with the massive Kemp-Roth tax cut proposal.

All of us sense the present mood of the Nation in favor of a reasonable tax cut and a sensible reduction in Federal spending. And I think that the House has made progress in trimming the fat off of appropriations bills and developing rational tax cut proposals this session.

But the so-called Kemp-Roth tax proposal, which would phase in an across-the-board individual and business tax cut averaging 30 percent, would be highly inflationary and could lead to a catastrophic national deficit.

The Treasury Department has estimated that the Kemp-Roth plan would cost about $66 billion in 1980, with that cost sharply increasing to $165 billion by 1983. That figure is nearly-one-third of this year's national budget. It is nearly $50 billion more than the House-passed defense appropriations bill—the largest appropriations bill in the history of this body.

This is an irresponsible proposal. It is a politically motivated proposal that would inflate the deficit to impossible levels and demolish the value of the dollar—all for a few votes at election time. I have a high regard for the good sense of the taxpayers in my district in St. Louis County and in the Nation as a whole, and I do not believe that those taxpayers will support this misguided proposal once the facts are known.

In a recent editorial, Business Week—a well-respected, industry-oriented magazine—severely criticized the Kemp-Roth proposal as "a completely irresponsible way to approach the Federal budget problem, and it would generate an inflation that would destroy the value of the currency."

Citing the "flaky arithmetic" used by backers to defend this proposal, the editorial went on to note that "Kemp-Roth would add $100 billion to a deficit that is already dangerously swollen. It would touch off an inflationary explosion that would wreck the country and impoverish everyone on a fixed income."

As I said before, Mr. Chairman, there is a need for a balanced, reasonable tax cut this year. And I think that the House can modify this legislation to provide for such a tax cut. We need to change the focus of this bill so that the middle-income taxpayer, the person who is burdened with the majority of taxes and responsibilities in this society, will benefit most.

I believe that the full House should have been given a chance to consider proposals to roll back social security taxes or at least to provide an income tax credit to those persons who are burdened by high social security taxes this year.

Now that the rule has passed, however, I plan to cast my vote for the Corman-Fisher amendment to the bill. This amendment will improve the committee bill in a number of ways; providing greater tax relief for the typical family of four with an income of under $50,000 and by lowering the capital gains tax rate for individuals in a more realistic manner.

Mr. GEPHARDT. Mr. Chairman, I thank the gentleman.

Mr. Chairman, this bill is about money: Who gets it and how much they get. I would like the Members to remember with me why the bill was presented by the President some months ago. The bill was presented to stimulate the economy, to help people fight inflation by giving them a tax cut, to achieve some amount of tax reform and to offset the effects of the tremendous social security tax increases that we passed in the latter part of 1977.

I would submit to the Members that if they are interested in economic stimulus, if they are interested in helping people who make $50,000 a year or less to offset the effect of inflation on their pocketbook, if they are interested in helping the people offset the effect of the social security tax increases that we enacted, we should vote for the Corman-Fisher proposal over the committee bill.

Members may not be able to see to my right, but perhaps they can. I wish they would focus with me for a moment on the chart, on exactly the kind of tax decrease or increase each economic group in America would get in a family of four if we take together the effect of the income tax decrease and the social security tax increase that we have enacted. What I am asking Members to focus on is how each family comes out in 1979 under each bill and how they came out in 1977.

If we have a family of four bringing in $5,000 a year, the committee bill with the combined effect of the income tax and the social security tax will have a tax increase of $14 both under the committee bill and under the Corman-Fisher proposal.

The next group is very significant. If they make $10,000 a year, under the committee bill they will have a tax decrease combined of $34, but under Corman-Fisher they will have a tax decrease of $232.

If they are making $15,000 a year, this family of four, under the committee bill they will have a tax decrease of $35 but under Corman-Fisher they will have a tax decrease of $187.

In the next three income groups under either proposal they are going to have a tax increase when we figure in Social Security. If they are making $20,000, they will have an increase with the committee bill of $115, but under Corman-Fisher there is only a $33 increase, so the increase is less under Corman-Fisher than it is under the committee bill.

If they are making $25,000 a year, they will have an increase of $207 under the committee bill but only $13 under Corman-Fisher.

If they are making $30,000 a year, the increase under the committee bill is $135 but only $16 under Corman-Fisher.

Let us go to $50,000. If you make $50,000 the committee bill decreases the tax by $215. Under Corman-Fisher, the decrease is $261.

So whether you make $50,000 a year or whether you make $10,000 a year, if you are interested in a tax cut and how that tax cut affects your constituents, after we have gone into the new social security taxes, you are compelled, I think, to vote for the Corman-Fisher proposal.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CORMAN. I yield the gentleman 1 additional minute.

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. GEPHARDT. I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Chairman, I thank the gentleman for yielding, and may I question the gentleman with respect to the figures he has given us as regards this family of four, are those figures based on a single-earner family or a double-earner family?

Mr. GEPHARDT. It is my understanding it is a single-earner family.

Mr. STEIGER. What would the effect be under both of the proposals when you add on the factor of a double-earner family at those levels?

Mr. GEPHARDT. I do not have those figures before me, but certainly the social security would be increased and aggravated.

Mr. CORMAN. Mr. Chairman, if the gentleman will yield, that would be true if you had two earners above the wage base. But the figures the gentleman has been discussing are mostly below the wage base.

Mr. STEIGER. But we are not confined to the wage base.

Mr. CORMAN. If the combined salaries are less than the maximum wage base there would be no difference.

The CHAIRMAN. The time of the gentleman has expired.

Mr. JONES of Oklahoma. Mr. Chairman, I yield 10 minutes, for the time being, to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, this may be the President's bill, but it is not the President's bill that was submitted at the beginning of this year. This bill is a latter-day attempt to undercut the work of the Committee on Ways and Means. The gentlemen who have been speaking in the well to date have been too polite to say so, but if this happened during a Republican administration, we would hear accusations of an imperial presidency in every other word spoken here, and we would worry about executive lobbying of the Congress, well, the executive lobbying of the Congress here in the halls has reached almost hysterical levels.

If you believe in the House of Representatives I hope you will support your committee on this bill because, quite frankly, the separation of powers has been shattered rather badly.

Mr. Chairman, there are several important points that ought to be made about this. If you vote for the Corman-Fisher substitute, the Blumenthal bill, what you are voting for is, among other things, an elimination of the increase in the personal exemption from $750 to $1,000. Do not forget that.

Do not forget your old people want that, they need that, that is essential to their future.

There is considerable understanding about that particular provision of the tax law and that is being junked if we go to the Corman-Fisher bill.

Do not forget, also, that there is this matter of the minimum tax provision in the Corman-Fisher proposal that nobody has tried to explain because this bill was submitted 3 days after the Committee on Ways and Means disgorged its regular bill. Nobody has had time to explain it or really analyze those figures, or to know where the $2 billion additional is put into beyond that bill, the effect is arrived at by reducing the rates. What the committee bill does is broaden the bracket. You know what it means, it means that 2 or 3 years hence you are right back in the same old soup with the Corman-Fisher bill, while with the committee bill you have some continuing benefit as a result of the broadened brackets.

The fact is that ultimately we are going to find, despite the fact that the Corman-Fisher bill has a slightly bigger cut this year, that we have lost ground.

Mr. Chairman, because of the unusual way in which this amendment is being handled, I shall remain standing and recognize some other Members on my side who have something they wish to say about this very important measure.

May I ask the Chair how much time I have used.

The CHAIRMAN. The gentleman from New York (Mr. CONABLE) has used 3 minutes.

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin (Mr. STEIGER).

Mr. STEIGER. Mr. Chairman, I thought we might carry on the tradition and go down in the well to do our Bobbsey Twins show.

Mr. Chairman, the problem with the Corman-Fisher proposal has been well dealt with by those who have spoken for and against. It is an ingenious concept, albeit one that has appeared full-blown out of the bowels of the Treasury Department only in the last few days. Nevertheless, it is calculated to try to achieve the very best possible result for those attempting to undo the committee bill. Let me, if I can, however, raise two issues with my colleagues on both sides of the aisle.

Let me supplement, first of all, the remarks of my distinguished colleague, the gentleman from Iowa (Mr. SMITH), because in the effort to deal with the allocation of deductions and the effort to provide a vehicle to get at shelter losses, the effect of the Blumenthal-Fisher-Corman plan is to hit real losses as well as shelter losses. I am sure it is unintended; but there is, after all, no way by which we can differentiate, so the effect of that is such that I sent a "Dear Colleague'" letter to all of the Members last night in an effort to give them some basis on which to judge the rightness or wrongness of this concept.

Mr. Chairman, I gave the Members the following three examples.

First, for many years, Mr. and Mrs. John Doe have operated a small restaurant in a depressed area of a large city. They have managed to earn a modest living and their annual profits have averaged about $20,000 for the last few years.

During 1979, a serious fire in their neighborhood causes them to close the restaurant for 4 months of the year. Due to the loss of business, which was not adequately covered by insurance, they have a net loss of $10,000 from restaurant operations for 1979. To raise funds to provide living expenses and replace part of the restaurant facilities, they decide to sell a piece of rural real estate inherited from their parents many years ago, realizing a $40,000 profit.

Under the House bill (H.R. 13511), their 1979 tax would be $1,000, roughly $280 of which would be caused by the alternative minimum tax under the bill. Under the Corman-Fisher alternative, the tax would be slightly under $1,700.

The second example was that of Mr. and Mrs. James Roe who have operated a farm in a Midwestern State for over 40 years. For many of those years, they have managed to earn a decent living.

In recent years, however, adverse weather conditions, unstable commodities prices, and the increasing impact of inflation on operating costs have reduced their earnings. During 1979, usually bad weather conditions leads to a loss from farming operations of $50,000. Because of increasing age, declining health, and a disillusionment about farming prospects, Mr. and Mrs. Roe decide to sell their farm, and they realize a $175,000 profit in 1979, of which $25,000 relates to the sale of their residence.

Under the House bill (H.R. 13511), their total tax on the sale will be $6,500, of which over $2,400 is caused by the alternative minimum tax. Under the Corman-Fisher alternative, total taxes would be over $14,000.

The third example was Mrs. Sally Smith, an 80-year-old widow, who has lived for many years in a small town in west Texas. Her only source of income, other than social security payments, is from dividends and interest, which has been averaging around $12,000 to $15,000 per year.

In the summer of 1979, unprecedented heavy rains fall in this usually arid area causing extensive flooding and water damage. Mrs. Smith's home, in which she has a tax basis of $30,000, is completely destroyed, and none of her loss is covered by insurance. To rebuild her home, which at today's prices will cost $60,000, she decides to sell some real estate she inherited from her mother nearly 40 years ago. Because of her very low tax basis in the land, nearly all of the $75,000 she receives from the sale of the property will be treated as capital gain.

Assuming that her income from dividends and interest for 1979 is $15,000, the casualty loss on the destruction of her home is $30,000, and she realized a gain of $70,000 on the sale of the land, her 1979 tax under the House bill (H.R. 13511) would be approximately $3,500. Under the Corman-Fisher proposal, her 1979 tax would be slightly over $6,400.

Mr. Chairman, the net effect of the effort by Blumenthal-Fisher-Corman is to raise the rates in a very real fashion on those who suffer real losses, not shelter losses, but real losses, as a result of the complex formula that is contained in the bill.

Mr. CONABLE. Mr. Chairman, if the gentleman will yield back to me. I would like to check as to whether we are still within the 3-minute period.

The CHAIRMAN. The gentleman is still within his 3 minutes.

Mr. STEIGER. Mr. Chairman, let me take the remaining few seconds to compute for the Members or at least try to have the Members understand how to compute the tax under the Blumenthal-Corman-Fisher plan.

First. You start with taxable income.

Second. Add to taxable income the amount of charitable contributions;

Third. Add one-half of capital gains;

Fourth. Divide the sum by 2;

Fifth. Compare this result to the excluded one-half of capital gain;

Sixth. If the excluded one-half is greater, take the difference and add it to taxable income;

Seventh. Compute your tax on this amount.

Thus the Corman-Fisher amendment should be rejected.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Utah (Mr. MARRIOTT).

Mr. MARRIOTT. Mr. Chairman, I thank the gentleman for yielding.

I want to make the point that this committee bill basically has a provision in it which starts to address the problem of indexing, if I am not mistaken, on personal income taxes.

If the chairman would respond, is it not the fact that, if we go with the Corman-Fisher amendment, we would actually be doing away with that broadening of the brackets, and this would be doing away with the first step toward indexing; is that not correct?

Mr. ULLMAN. If the gentleman will yield; yes, the gentleman is correct. We would be doing away with the broadening of the brackets which we have in the committee bill.

Mr. MARRIOTT. Mr. Chairman, I would certainly urge that we vote down the Corman-Fisher amendment in that indexing is an idea whose time has come. Switzerland, Germany, Canada, and Brazil have all done it. This is a step in the right direction.

For that reason, Mr. Chairman, I would hope that we would stay with the committee bill and strike down the Corman-Fisher amendment.

Mr. Chairman, I thank the gentleman for yielding.

Mr. CONABLE. I thank the gentleman for his contribution.

Mr. Chairman, I now yield 3 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Chairman, there is the big vote. The Corman amendment will decide whether we will really choose those new directions toward across-the-board tax cuts and toward capital investment. If we can defeat it we will establish the new directions.

The Corman amendment redistributes income. The committee bill cuts taxes evenly. Corman amendment gives a $100 tax credit per person, but the committee bill gives a $1,000 personal exemption.

More importantly, the committee spreads the brackets forever. Corman is a one shot deal. In the second year the committee bill gives far larger cuts. The Corman amendments reverses the thrust of the Steiger amendment by increasing the minimum tax. I believe most Members of this body prefer cutting capital gains even farther like the original Steiger amendment. Those who are for the Steiger amendment. for capital investment, and for simplification will want to vote against the amendment.

The amendment also would seem to penalize farm families, because they do occasionally suffer losses and sell inflated land. If they do they will pay more taxes under Corman.

It is much safer to vote down the Corman amendment and stay with the committee bill. Its fairer, makes more economic sense. and does not have the questions or the "loser image" associated with it that Corman does. Also it is more generous because its bracket spreading is permanent.

I hope the Corman amendment is soundly defeated and that the committee bill is passed.

Mr. CONABLE. Mr. Chairman, I would like to ask the gentleman from Oklahoma (Mr. JONES) if he will yield me 3 additional minutes.

Mr. JONES of Oklahoma. I yield 3 additional minutes to the gentleman from New York.

Mr. CONABLE. I thank the gentleman. I would like now to yield 3½ minutes to the distinguished minority leader, the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Chairman, this amendment should not be adopted. The Committee on Ways and Means Bill has been considered for many weeks. It comes to the floor with the approval of a great majority of the members of that committee, and as far as I personally am concerned, I would not want to exchange it for the Corman-Fisher amendment.

Corman-Fisher is not anything new. We have seen tax proposals like this, for years, and years, and years. As the gentleman from Minnesota (Mr. FRENZEL) said, it is an income-redistribution proposal. What they are doing really is taking from those who have and giving to those who have not, which we have been doing for years and which in some instances is all right, but it is not all right in this particular context. It is not all right because it will fuel the fires of inflation like nothing else we could possibly do.

Of course, the classic definition of "inflation" is "too many dollars chasing too few goods." This type of amendment will cause the numbers of dollars to increase but will not cause the volume of goods to increase. On the other hand, the committee bill with the treatment which it gives capital gains will actually result in more production. It will result in a decrease in inflation. It will be hitting our economic woes right where they live. So it seems to me that the mere fact that the Corman amendment would do such violence to the capital gains tax system which is in the committee bill, is enough of a reason to be against it. As the gentleman from Wisconsin (Mr. STEIGER) said the provisions for capital gains treatments will not only hurt the big guy, but they are certainly going to hurt the little guy, too.

I think it is absolutely imperative that we realize that the name of the game, as far as helping our economy is concerned, is jobs. If this bill, which we are probably going to pass today, does not help the economy to produce more jobs for more people, it will have been a waste of time. It will have been counterproductive to the country. It is important that we understand this.

The people of our country expect a tax cut. They deserve a tax cut. They are given a tax cut in the Committee on Ways and Means bill. When we get a chance to offer the motion to recommit, we will give the people of the country a chance for a bigger tax cut with the Kemp-Roth initiative. But right now—right now is the time to support the Committee on Ways and Means. It is a good bill. It has been well thought out. I recommend that Corman-Fisher be voted down and that we proceed to go ahead with the committee bill.

Mr. Chairman, I yield back the balance of my time.

Mr. CORMAN. Mr. Chairman, I yield myself one-half minute.

Mr. Chairman, I am sure the chairman of the Committee on Ways and Means appreciates the support of the minority leader, even though it is apparently going to last for about 37½ minutes; that is, until after the vote on this amendment.

Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. RANGEL).

Mr. RANGEL. Mr. Chairman, I really think the President of the United States is being given entirely too much credit in believing that he finally came to us with a bill. I have been waiting and still am waiting for some revised bill from the administration; but, unfortunately, they have not been able to do that.

I think a lot of credit should be given to the chairman of our committee, Mr. ULLMAN who has been able with the odds against him to get the members of the committee to finally come up with a bill that did receive the majority of the support of the Members of the House.

I wish we had heard from the administration before now, and perhaps we could have done something in the committee; but I think with all the time we have spent in trying to make life a little easier for those involved in capital gains transactions, even to the extent we are going to protect these transactions against inflation. Certainly those on fixed incomes do not enjoy that type of benefit. Somewhere along the line when we are talking about tax cuts that we get concerned ourselves with 90 percent of the people that are paying taxes.

I heard the distinguished minority leader talking about the inflationary impact that the Corman-Fisher amendment would have. My God, I am going to watch very attentively to see how the votes go on the motion to recommit the Kemp-Roth proposal, because if this is inflationary, my God, what I think is going to be offered would have a strong impact.

Why is it we always talk about inflation, when we are talking about spreading a couple billion dollars around to those people who are paying the taxes?

It seems to me that notwithstanding the fine work that has been done by the committee in producing a bill, that is basically just a rider to that bill. What we are talking about is trying to identify those people who under the proposition 13 revolution are saying, "Enough." They are tired of carrying the burdens of those people unable to get jobs. They are tired of paying for the educational system and they are looking for a break.

Clearly, all we have to be able to do is to say what kind of break are we prepared to give the people? This is what I am concerned about, even though I fully recognized that no matter how hard we are, that even in that one-half of 1 per-

cent there will be some individuals who will suffer the loss of their fishing boats; but there are many people in the United States that do not have a boat to fish in and they are looking for a little tax relief and this is the opportunity to do it. If the reason for the tax cut is to spur the economy, it seems to me that in order for the economy to be spurred we have to have some assurances that the people are going to spend this money to purchase stock that is in inventory and to attempt to create jobs, so that we can get the economy moving.

At the income tax level that we have forced our salaries to, I doubt seriously whether the tax relief that we will receive under any bill is going to change the way we purchase anything; but it seems to me that as you get lower down in that income level that the more money you are able to put in the pockets of those people who are living during particularly hard inflationary times, that they will be spending the money that we are able to give them under this tax relief. If they purchase, God willing, we will be able to get people to buying and get people to selling and get people back to work; so all I am asking is let us just do a little bit of counting. We have really spent a lot of time in making certain that we have a healthier climate for capital formation. We are always talking about it and I think that any bill we are talking about this evening does give a lot of relief.

One of the more conservative Members said, "There has been a new light now on capital gains transactions."

Let us just have a little glimmer of light this afternoon for those people who are really paying the taxes. We are talking about the 90 percent of the people who are filing their forms.

I hope that after the vote is taken today, all the voters will just take a comparisons chart and see what they would receive under the committee bill and what they would receive under the Corman-Fisher bill. If it makes a lot of sense to them in dollars and cents, I am sure that politically speaking, it makes a lot of sense to us.

Mr. Chairman, I only look at this as an improvement on the work done by the committee and the chairman of the committee. I hope that once this passes we can all vote for the bill.

Mr. JONES of Oklahoma. Mr. Chairman, I yield 2 minutes to the gentleman from Georgia (Mr. JENKINS).

Mr. JENKINS. Mr. Chairman, I rise in support of the committee position on this bill.

If we wanted to spread around more of a tax decrease, we could, of course, increase the revenue loss by not $2 billion, but we could increase it $4 billion, $6 billion, or whatever. That is not a very difficult thing to do; however, it is not the most responsible thing to do either.

One thing in this argument that has somewhat disturbed me has been that we are going to make it up to those people who have been hurt by social security taxes, and especially those people in the $10,000 and the $15,000 brackets.

Well, the facts simply do not bear that out. The fact is that social security taxes have gone up from 5.85 to 6.05, and they have gone up from the figure in the old law to 6.13 under existing law.

That means for a $10,000-a-year employee the social security tax for 1979 has increased by $28 a year. Under the Corman-Fisher amendment, what we are doing for the $10,000-a-year man is giving him a $232 decrease. That is well and good, but we should not use the argument that we are making up for what we imposed on the $10,000-a-year employee in additional social security taxes. This is a completely fallacious argument.

The same thing is true with the $15,000-a-year employee. That is not the true facts. The facts are that his social security taxes went up $42, but under the Corman-Fisher amendment he would get a $187-a-year decrease. So we are not simply substituting for the increase in social security taxes.

The fact is that this amendment is an attempt to do away with the capital gains treatment that is included in the committee bill.

Mr. Chairman, the committee has worked long and hard on this bill. The Members will see tables and charts of every kind that do not necessarily reflect the true facts, and I urge them to examine these tables carefully. Anyone can prepare some chart or table to support his position.

Mr. Chairman, I want to support the largest possible tax cut that will not lead to additional inflation; and, I believe the committee position is the most responsible tax reduction bill before this House.

Mr. CORMAN. Mr. Chairman, I yield 2½ minutes to the gentleman from Illinois (Mr. MIKVA).

Mr. MIKVA. Mr. Chairman, I would like to pay my compliments to the distinguished gentleman from Wisconsin (Mr. STEIGER) for having packaged and having put forth the concept which has caused the committee bill to be in the shape it is and caused the present amendment to be before the House and caused a lot of discussion throughout the country about capital gains—a discussion that is not totally unnecessary.

I think the capital gains treatment that is now in the code is very deficient when we consider its original purpose was: As an averaging device it does not work very well.

Originally, though, the talk was about capital gains, the substance of the discussion later was about the minimum tax. The talk was about capital gains, but the assault was on the minimum tax.

Talk about 11th hour politics. The Steiger bill and the committee bill did not do anything about capital gains on homes; it did not do anything about some of the other problems with capital gains. What it did was to reduce the minimum tax to zero. Then, as politics came into play, we put a mini-minuscule tax back in the committee bill, but that does not do very much. It just promised not to hurt very many people.

But capital gains and the argument about capital gains have nothing to do with this assault on the minimum tax. There are 300,000 taxpayers who paid the minimum tax last year—out of a total of 89 million tax returns filed. That is what this whole fight has been about. What should we do about this minimum tax for those 300,000 taxpayers.

We have spent a lot of time and a lot of energy to give them a big tax break. The Corman-Fisher amendment also gives them a big tax break; it just is not quite as big. It is an awful lot bigger than we would care to justify when we are explaining it to the other 88 million 200 thousand people who do not earn enough income to pay the minimum tax. That is what one of the arguments has been about.

The second argument between the two bills has to do with this problem of the exemption versus the credit. A credit is a complicated idea. It is very hard to explain to somebody that a $240 credit is worth more than a $750 exemption. I tried it. It is very hard to do. But so is trying to explain to 2.5 million taxpayers who are going to get a tax increase under the committee bill. Explain to them why that was justified. When you vote for the committee bill and against this amendment, 2.5 million people, heads of families, some singles, are going to pay a tax increase. For those reasons, the Corman-Fisher amendment makes a great deal of sense, and it is going to be a lot easier to explain when you get back home.

Mr. JONES of Oklahoma. Mr. Chairman, I yield 3 minutes to the gentleman from Louisiana (Mr. WAGGONNER).

Mr. WAGGONNER. Mr. Chairman, the Committee on Ways and Means has brought to this floor today the best tax bill the House or the Congress has had the opportunity to consider since the so-called Kennedy cut proposal in 1964, and it has done it under the able leadership of AL ULLMAN, who deserves the support of the administration and the leadership of this House—and he has not really had the help or cooperation of either.

Mr. Chairman, I say to my colleagues that we hear it said here for example today that, "under the administration proposal"—what administration proposal? It does not make any difference what the proposal is. It is one thing today, but when it gets to the Senate it is going to be something else. This is nothing except a disruptive practice. They will change their mind as they have for months been changing their mind. But we hear it said that the rate cuts are larger. Absolutely they are larger. If you want to increase the deficit, you can make them still larger. If you add the same deficit back to the committee bill, you can have the same rate reduction that you get on this so-called Corman-Fisher proposal here today. Make no mistake about it. If you want larger rate reductions, get ready for a larger

deficit. The larger the reduction, the larger the deficit. It is just that simple.

The gentleman from Illinois (Mr. SIMON) stood here and justified his support of Vanik-Pickle because it would reduce the deficit. The gentleman from Illinois (Mr. SIMON), or anybody else who voted for Vanik-Pickle who votes for Corman-Fisher, will be voting in direct contradiction of that stated position. You cannot be consistent and do exactly that. For the very first time in recent years the House committee tried to provide cuts for middle-income taxpayers who have been financing this country. Why do you think the stock market has taken off the way it has and closed at 891 yesterday except for the hope held out by this committee bill? Do you want to come in here and destroy that optimism? If you do, you are going to vote to weaken what the committee has done in the instance of capital gains. There is a confidence in the stock market. You are if you vote for Corman-Fisher going to reduce the capital gains benefit to the tune of $300 million. Make absolutely no mistake about that. The capital gains proposal in the Corman-Fisher substitute is terribly complicated. But listen to me: If you vote for that proposal, you are going to see to it that there no deductions for such things as medical deductions and casualty losses. They will be gone. That proposal does not allow it. Do not kid yourselves.

And for those Members who have been crying "cold hearts" for singles, just get ready to raise the tax on single taxpayers in this country too, because that is what you are going to do. Why do you not stick with something that is worthwhile for a change?

Mr. CORMAN. Mr. Chairman, I yield 2 minutes to the gentleman from Arkansas (Mr. TUCKER).

Mr. TUCKER. Mr. Chairman, the facts are absolutely clear and uncontroverted. If the Members wish to vote for tax relief for middle-income taxpayers—and there is no one who can dispute it—the Corman-Fisher amendment gives greater relief for the $30,000, the $40,000, the $50,000 a year taxpayer than the committee bill. These facts are uncontrovertible. They cannot be challenged.

I have heard a number of examples from my colleague, the gentleman from Wisconsin, and my colleague, the gentleman from Louisiana. Let me give the Members this fact: If you are a middle-income taxpayer, you sell an asset for $200,000, and you have to turn around and pay a $200,000 extraordinary medical expense, do you know what happens under the committee bill? You pay a $9,000 tax.

Under Corman-Fisher there would be no tax. Corman-Fisher gives better treatment for the middle class with an extraordinary medical expense. If one has a casualty loss, an investor who has realized capital gains of $400,000, but in that same year fire destroys his house which is uninsured, and he loses $500,000, the committee bill will tax that individual $19,000. Corman-Fisher would have no tax for that individual. Take a cattle raiser in my neck of the woods, down in Arkansas, who sells his cattle for $40,000. A tornado knocks down his $20,000 house and his $20,000 uninsured barn. Under the committee bill he would pay $1,000 in taxes, but under Corman-Fisher he would pay no tax.

That is why Corman-Fisher is a better bill for middle-income taxpayers, a better bill for low-income taxpayers, and a better bill to take care of individual circumstances. I urge support for the amendment.

Mr. JONES of Oklahoma. Mr. Chairman, I yield such time as he may consume to the gentleman from Oregon (Mr. ULLMAN).

Mr. ULLMAN. Mr. Chairman, I want to say to the committee that it has taken a long, long time to get this bill to this point. It is a bill that is put together very delicately. We have only two votes yet remaining. I strongly urge the members of this committee to carefully consider their vote.

Let us hold a bill that we can take home with pride and get reelected on. Let us not take a gamble at this point. Let us vote against this amendment, and then let us wage an all-out fight over here against the Kemp-Roth amendment, and let us defeat that amendment. Let us then let this good bill be voted on by the House. That, I think, is the course of action that all of us can live with, and the course of action that we should take.

Mr. JONES of Oklahoma. Mr. Chairman, ordinarily the majority closes debate. In this particular instance, the majority of Democrats and majority of Republicans on the committee supported the committee bill, and the particular amendment in question was not even considered. Similar amendments were considered and rejected.

Out of deference to the Speaker, who wants to close debate, we will defer to the makers of the amendment for the closing of debate. But, I would like to remind the Members of what is at issue in this particular amendment.

In the first place, it does increase the budget deficit by $2 billion. In the second place, it does take away $300 million of capital gains relief. In the third place, it complicates rather than simplifies the individual and the capital gains tax processes. It has not been considered in committee. It was offered by the administration just this week. I urge that it be defeated.

● Mr. BIAGGI. Mr. Chairman, I rise to indicate my general preference for the Corman-Fisher amendment to H.R. 13511, largely because it targets most of its tax relief to those who need it most, the lower- and middle-income taxpayer.

Yet, our deliberations and actions today should be viewed in a broader context. Congress is responding to the overwhelming weight of American public opinion which is in favor of lowering taxes. No matter what is finally approved today, it will include a tax cut. The size and how extensive it is remains to be seen. Yet the demands of the American public are simple, lower our taxes.

Lest we forget it was just over 2 months ago when the voters from the State of California by an astounding 1.9 million margin passed proposition 13. This was considered one of the most far-reaching tax reduction proposals ever enacted by a unit of Government. It was the culmination of severe discontent by Californians to ever increasing property taxes with ever decreasing returns. Proposition 13 has its consequences in terms of reductions in social and human services, but for many, the relief in taxes which it provides is of far greater importance.

There is a national sense of anger about taxes, not only the amount but the system itself, a system which has always penalized the working man while allowing the super rich individual or corporation to escape taxation.

The working men and women of this Nation are having their hard-earned dollars consumed by taxes. They, like the people in California, wonder what they are getting as a return for their taxes. A study conducted by Stanford University concluded that Americans paid some $16 billion more in taxes than they receive in services. In addition to discontent over rising taxes, an equal aversion is felt for increases in the cost of Government. Reduction in taxes must be accompanied by reductions in Government spending on all levels. We must pursue this objective as aggressively as we are tax cuts.

I prefer the Corman-Fisher proposal because 87 percent of its benefits go to those with incomes under $50,000. More specifically those in the $15,000 to $25,000 income bracket, the middle class, get considerably more relief from the Corman amendment than the committee bill. A typical family of four with an income of $20,000 would save $228 under the Corman amendment as compared to $146 under the committee bill.

The one-two punch of inflation and taxation has left millions of Americans reeling on the edge of economic disaster. Enactment of a tax cut coupled with a concerted effort to reduce inflation must be viewed as this Nation's most important domestic priority. We will begin today with the tax cut, we should not cease until we complete this task.

Of course, there are numerous other benefits associated with the Corman proposal. The one time break for person selling their own home is most generous and should reap great benefits and windfalls for those eligible. Capital gains will be taxed more fairly allowing those in the lower brackets not be unfairly penalized by taxes on their gains, while those who seek to evade their full tax responsibility would be less able to do so.

Mr. Chairman, I feel the American people are in a no lose position today. At the very least, their taxes will be cut. If the Corman proposal is adopted, the benefits for most taxpayers will be even greater.

At this time, I wish to praise the President for his important initiatives in working to reduce taxes for the American people. He has been in the forefront of this effort since he came into office and deserves much credit.

I urge the House to adopt the most

comprehensive of all proposals the Corman-Fisher amendment. It provides the kind of meaningful tax relief which Americans are clamoring for. It behooves us to respond to their demand.●

Mr. MIKVA. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

Evidently a quorum is not present. The call will be taken by electronic device.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 682]

Andrews, N.C.	Jenrette	Rudd
Archer	Kindness	Ryan
Armstrong	Lafalce	Santini
Burke, Calif.	Le Fante	Sawyer
Carney	Leggett	Scheuer
Cavanaugh	Lloyd, Tenn.	Schulze
Conyers	Long, Md.	Sisk
Dellums	McCormack	Solarz
Devine	McDonald	Teague
Diggs	Milford	Udall
Drinan	Miller, Calif.	Waxman
Flowers	Myers, John	Wiggins
Fraser	Pike	Wilson, Bob
Gibbons	Pressler	Young, Tex.
Harrington	Rodino	

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. SHARP, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee, having had under consideration the bill H.R. 13511, and finding itself without a quorum, he had directed the Members to record their presence by electronic device, whereupon 388 Members recorded their presence, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The committee resumed its sitting.

Mr. CORMAN. Mr. Chairman, I yield 5 minutes to the distinguished Speaker, the gentleman from Massachusetts (Mr. O'NEILL).

Mr. O'NEILL. Mr. Chairman, I rise in support of the Corman-Fisher amendment. It is with diffidence that I rise to oppose the chairman of my Committee on Ways and Means. I appreciate the problem that he has had. It has been a rough and rocky road. In a democracy with its freedom and with its diversity of ideas, the chairman and the committee have had, indeed, a rough, tough spell. The chairman has responded to his obligation to bring forth what he thought was the best bill that he could get out of the committee, and that he has done.

The administration has been tardy in bringing tax legislation to this body. I truly feel, though, if the amendment offered by the gentleman from Virginia (Mr. FISHER) and the gentleman from California (Mr. CORMAN) had been brought up here 5 months ago, it would have been the product of the committee by now, and it would have sailed through this Congress. That is my opinion. In truth, it did not arrive to this Hill and into my office until such time as the Committee on Rules itself was meeting. There has been great consternation among the Democrats.

Mr. Chairman, I say to the gentleman from Oregon (Mr. ULLMAN) and the gentleman from Oklahoma (Mr. JONES) I appreciate their efforts along the line in which they have brought forth a bill. The administration has had an opportunity to read that bill line by line and go over it with the experts, and they have consulted with members of the gentleman's Committee on Ways and Means. The gentleman from California (Mr. CORMAN) and the gentleman from Virginia (Mr. FISHER) we regard, too, as tax experts. Again I reiterate, I appreciate the problem that the chairman and the committee were in. Now we want to improve upon what they have done.

We think that we have a very equitable amendment. What does it do? The Corman-Fisher amendment provides larger tax cuts for 87 percent of the taxpayers with incomes below $50,000.

A typical American family of four with an income of $25,000 would see reductions of $232 under the committee bill and $308 under the amendment.

A family with $20,000 in income would benefit by $146 under the committee bill and $228, or $82 more under the Corman-Fisher amendment.

A family with a $15,000 income would gain only $77 under the committee bill and $229 under the Corman-Fisher amendment.

The mean average income of the American family today is $17,000; so the Corman-Fisher amendment deliberates toward that group.

Eighty-seven percent of the people in America, or the families in America, earn less than $50,000; so it is well that we should give to them this rebate.

Now, the second section of the bill which the Corman-Fisher amendment addresses is the capital gains. Capital gains is an interesting thing. You know, in 1969 we closed the loophole, so they say, of capital gains. We raised it from 25 percent to 49 percent. That was the will of this Congress.

You know, yesterday I talked with Lew Harris, the pollster. He was showing me his statistics. In 1969, 70 percent of the American people thought that the capital gains was a loophole and should be closed, and 30 percent were in favor of changing the capital gains provision. You know, the Congress responded to the ways of the American people and their feelings. That was in 1969.

Now the pendulum has swung the other way. Lew Harris' poll, as of yesterday, as he showed it to me, indicates that 64 percent of the people today believe that the capital gains should be changed, as opposed to 20 percent who think it is the closing of a loophole; so the pendulum has swung back the other way.

What have we done with capital gains? Under the committee bill, individuals with substantial capital gains and no regular tax liability would pay an alternative minimum tax of 5 percent, no matter how large the gain. I say that is wrong. I say that is not what 64 percent of the American people want. They want a change in capital gains, but they want an equitable change.

What does the Corman-Fisher amendment do? The Corman-Fisher amendment would place a truly graduated alternative minimum tax, ranging from 5 percent to a maximum of 17½ percent; the top rate would be payable only on gains of more than $800,000.

I think this is a reasonable bill. We know that it will be signed by the President of the United States. Again, it came up awfully late. I am grateful to my colleagues, the gentleman from California (Mr. CORMAN) and the gentleman from Virginia (Mr. FISHER) for bringing this amendment before the House.

I support the amendment. I hope it is adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. CORMAN).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. CORMAN. Mr. Chairman I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 193, noes 225, not voting 14 as follows:

[Roll No. 683]

AYES—193

NOT VOTING—14

Burke, Calif.	Lloyd, Tenn.	Sawyer
Devine	McDonald	Schulze
Fraser	Miller, Calif.	Sisk
Jenrette	Rodino	Teague
Le Fante	Rudd	

The Clerk announced the following pairs:

On this vote:

Mr. Jenrette for, with Mrs. Lloyd of Tennessee against.

Mr. Le Fante for, with Mr. McDonald against.

Mr. Rodino for, with Mr. Teague against.

Mrs. Burke of California for, with Mr. Devine against.

Mr. Miller of California for, with Mr. Rudd against.

Mr. YATES changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. SHARP, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 13511) to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes, pursuant to House Resolution 1306, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. KEMP

Mr. KEMP. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. KEMP. I am in its present form, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. KEMP moves to recommit the bill H.R. 13511 to the Committee on Ways and Means with instructions to report back the same forthwith with the following amendment: Strike out section 101 of the bill and insert in lieu thereof the following:

SEC. 101. REDUCTION IN 1979 INDIVIDUAL INCOME TAX RATES.

(a) GENERAL RULE.—Section 1 (relating to tax imposed) is amended to read as follows:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)),

a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $3,200	No tax.
Over $3,200 but not over $4,200	12% of excess over $3,200.
Over $4,200 but not over $5,200	$120, plus 13% of excess over $4,200.
Over $5,200 but not over $6,200	$250, plus 14% of excess over $5,200.
Over $6,200 but not over $7,200	$390, plus 15% of excess over $6,200.
Over $7,200 but not over $11,200	$540, plus 17% of excess over $7,200.
Over $11,200 but not over $15,200	$1,200, plus 19% of excess over $11,200.
Over $15,200 but not over $19,200	$1,980, plus 22% of excess over $15,200.
Over $19,200 but not over $23,200	$2,860, plus 25% of excess over $19,200.
Over $23,200 but not over $27,200	$3,860, plus 28% of excess over $23,200.
Over $27,200 but not over $31,200	$4,980, plus 32% of excess over $27,200.
Over $31,200 but not over $35,200	$6,260, plus 35% of excess over $31,200.
Over $35,200 but not over $39,200	$7,660, plus 37% of excess over $35,200.
Over $39,200 but not over $43,200	$9,140, plus 40% of excess over $39,200.
Over $43,200 but not over $47,200	$10,740, plus 43% of excess over $43,200.
Over $47,200 but not over $55,200	$12,460, plus 45% of excess over $47,200.
Over $55,200 but not over $67,200	$16,060, plus 47% of excess over $55,200.
Over $67,200 but not over $79,200	$21,700, plus 49% of excess over $67,200.
Over $79,200 but not over $91,200	$27,580, plus 52% of excess over $79,200.
Over $91,200 but not over $103,200	$33,820, plus 54% of excess over $91,200.
Over $103,200 but not over $123,200	$40,300, plus 56% of excess over $103,200.
Over $123,200 but not over $143,200	$51,500, plus 58% of excess over $123,200.
Over $143,200 but not over $163,200	$63,100, plus 59% of escess over $143,200.
Over $163,200 but not over $183,200	$74,900, plus 61% of excess over $163,200.
Over $183,200 but not over $203,200	$87,100, plus 62% of excess over $183,200.
Over $203,200	$99,500, plus 63% of excess over $203,200.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of household (as defined in section 2(b)) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,200	No tax.
Over $2,200 but not over $2,700	12.0% of excess over $2,200.
Over $2,700 but not over $3,200	$60, plus 12.5% of excess over $2,700.
Over $3,200 but not over $3,700	$122.50, plus 13.5% of excess over $3,200.

Over $3,700 but not over $4,200	$190, plus 14.0% of excess over $3,700.
Over $4,200 but not over $5,200	$260, plus 15.5% of excess over $4,200.
Over $5,200 but not over $6,200	$415, plus 16.0% of excess over $5,200.
Over $6,200 but not over $8,200	$575, plus 17.5% of excess over $6,200.
Over $8,200 but not over $10,200	$925, plus 19.0% of excess over $10,200.
Over $10,200 but not over $12,200	$1,305, plus 20.5% of excess over $8,200.
Over $12,200 but not over $14,200	$1,715, plus 21.0% of excess over $12,200.
Over $14,200 but not over $16,200	$2,135, plus 24.0% of excess over $14,200.
Over $16,200 but not over $18,200	$2,615, plus 24.5% of excess over $15,200.
Over $18,200 but not over $20,200	$3,105, plus 28% of excess over $18,200.
Over $20,200 but not over $22,200	$3,665, plus 28.5% of excess over $20,200.
Over $22,200 but not over $24,200	$4,235, plus 30.5% of excess over $22,200.
Over $24,200 but not over $26,200	$4,845, plus 31.5% of excess over $24,200.
Over $26,200 but not over $28,200	$5,475, plus 33.5% of excess over $26,200.
Over $28,200 but not over $30,200	$6,145, plus 36.0% of excess over $28,200.
Over $30,200 but not over $34,200	$6,865, plus 37.5% of excess over $30,200.
Over $34,200 but not over $38,200	$8,365, plus 41.0% of excess over $34,200.
Over $38,200 but not over $40,200	$10,005, plus 42.5% of excess over $40,200.
Over $40,200 but not over $42,200	$10,855, plus 45.0% of excess over $38,200.
Over $42,200 but not over $46,200	$11,755, plus 46.5% of excess over $42,200.
Over $46,200 but not over $52,200	$13,615, plus 49.5% of excess over $46,200.
Over $52,200 but not over $54,200	$16,585, plus 50.5% of excess over $52,200.
Over $54,200 but not over $62,200	$17,595, plus 51.5% of excess over $54,200.
Over $62,200 but not over $66,200	$21,715, plus 52.5% of excess over $62,200.
Over $66,200 but not over $72,200	$23,815, plus 53.5% of excess over $66,200.
Over $72,200 but not over $78,200	$27,025, plus 54.0% of excess over $72,200.
Over $78,200 but not over $82,200	$30,265, plus 55.5% of excess over $78,200.
Over $82,200 but not over $90,200	$32,485, plus 56.5% of excess over $82,200.
Over $90,200 but not over $92,200	$37,005, plus 57.5% of excess over $90,200.
Over $92,200 but not over $102,200	$38,155, plus 58.0% of excess over $92,200.
Over $102,200 but not over $122,200	$43,955, plus 59.5% of excess over $102,200.
Over $122,200, but not over $142,200	$55,855, plus 60.5% of excess over $122,200.
Over $142,200 but not over $152,200	$67,955, plus 61.0% of excess over $142,200.
Over $152,200 but not over $162,200	$74,055, plus 61.5% of excess over $152,200.
Over $162,200 but not over $182,200	$80,155, plus 62.0% of excess over $162,200.
Over $182,200 but not over $202,200	$92,555, plus 62.5% of excess over $182,200.
Over $202,200	$105,055, plus 63.0% of excess over $202,200.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,200	No tax.
Over $2,200 but not over $2,700	12 percent of excess over $2,200.
Over $2,700 but not over $3,200	$60, plus 13 percent of excess over $2,700.
Over $3,200 but not over $3,700	$125, plus 14 percent of excess over $3,200.
Over $3,700 but not over $4,200	$195, plus 15 percent of excess over $3,700.
Over $4,200 but not over $6,200	$270, plus 17 percent of excess over $4,200.
Over $6,200 but not over $8,200	$610, plus 18 percent of excess over $6,200.
Over $8,200 but not over $10,200	$970, plus 21 percent of excess over $8,200.
Over $10,200 but not over $12,200	$1,390, plus 22 percent of excess over $10,200.
Over $12,200 but not over $14,200	$1,830, plus 23 percent of excess over $12,200.
Over $14,200 but not over $16,200	$2,290, plus 26 percent of excess over $14,200.
Over $16,200 but not over $18,200	$2,810, plus 27 percent of excess over $16,200.
Over $18,200 but not over $20,200	$3,350, plus 31 percent of excess over $18,200.
Over $20,200 but not over $22,200	$3,970, plus 32 percent of excess over $20,200.
Over $22,200 but not over $24,200	$4,610, plus 33 percent of excess over $22,200.
Over $24,200 but not over $28,200	$5,270, plus 35 percent of excess over $24,200.
Over $28,200 but not over $34,200	$6,670, plus 40 percent of excess over $28,200.
Over $34,200 but not over $40,200	$9,070, plus 45 percent of excess over $34,200.
Over $40,200 but not over $46,200	$11,770, plus 50 percent of excess over $40,200.
Over $46,200 but not over $52,200	$14,770, plus 54 percent of excess over $46,200.
Over $52,200 but not over $62,200	$18,010, plus 56 percent of excess over $52,200.
Over $62,200 but not over $72,200	$23,610, plus 58 percent of excess over $62,200.
Over $72,200 but not over $82,200	$29,410, plus 59 percent of excess over $72,200.
Over $82,200 but not over $92,200	$35,310, plus 61 percent of excess over $82,200.
Over $92,200 but not over $102,200	$41,410, plus 62 percent of excess over $92,200.
Over $102,200	$47,610, plus 63 percent of excess over $102,200.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $1,600	No tax.
Over $1,600 but not over $2,100	12% of excess over $1,600.
Over $2,100 but not over $2,600	$60, plus 13% of excess over $2,100.

Over $3,100 but not over $3,600	$195, plus 15% of excess over $3,100.
Over $3,600 but not over $5,600	$270, plus 17% of excess over $3,600.
Over $5,600 but not over $7,600	$610, plus 19% of excess over $5,600.
Over $7,600 but not over $9,600	$990, plus 22% of excess over $7,600.
Over $9,600 but not over $11,600	$1,430, plus 25% of excess over $9,600.
Over $11,600 but not over $13,600	$1,930, plus 28% of excess over $11,600.
Over $13,600 but not over $15,600	$2,490, plus 32% of excess over $13,600.
Over $15,600 but not over $17,600	$3,130, plus 35% of excess over $15,600.
Over $17,600 but not over $19,600	$3,830, plus 37% of excess over $17,600.

Over $19,600 but not over $21,600	$4,570, plus 40% of excess over $19,600.
Over $21,600 but not over $23,600	$5,370, plus 43% of excess over $21,600.
Over $23,600 but not over $27,600	$6,230, plus 45% of excess over $23,600.
Over $27,600 but not over $33,600	$8,030, plus 47% of excess over $27,600.
Over $33,600 but not over $39,600	$10,850, plus 49% of excess over $33,600.
Over $39,600 but not over $45,600	$13,790, plus 52% of excess over $39,600.
Over $45,600 but not over $51,600	$16,910, plus 54% of excess over $45,000.
Over $51,600 but not over $61,600	$20,150, plus 56% of excess over $51,600.
Over $61,600 but not over $71,600	$25,750, plus 58% of excess over $61,600.
Over $71,600 but not over $81,600	$31,550, plus 59% of excess over $71,600.
Over $81,600 but not over $91,600	$37,450, plus 61% of excess over $81,600.
Over $91,600 but not over $101,600	$43,550, plus 62% of excess over $91,600.
Over $101,600	$49,750, plus 63% of excess over $101,600.

"(e) ESTATES AND TRUSTS.—There is hereby imposed on the taxable income of every estate and trust taxable under this subsection a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $500	12% of taxable income.
Over $500 but not over $1,000	$60, plus 13% of excess over $500.
Over $1,000 but not over $1,500	$125, plus 14% of excess over $1,000.
Over $1,500 but not over $2,000	$195, plus 15% of excess over $1,500.
Over $2,000 but not over $4,000	$270, plus 17% of excess over $2,000.
Over $4,000 but not over $6,000	$610, plus 19% of excess over $4,000.
Over $6,000 but not over $8,000	$990, plus 22% of excess over $6,000.
Over $8,000 but not over $10,000	$1,430, plus 25% of excess over $8,000.
Over $10,000 but not over $12,000	$1,930, plus 28% of excess over $10,000.
Over $12,000 but not over $14,000	$2,490, plus 32% of excess over $12,000.
Over $14,000 but not over $16,000	$3,130, plus 35% of excess over $14,000.
Over $16,000 but not over $18,000	$3,830, plus 37% of excess over $16,000.
Over $18,000 but not over $20,000	$4,570, plus 40% of excess over $18,000.
Over $20,000 but not over $22,000	$5,370, plus 43% of excess over $20,000.
Over $22,000 but not over $26,000	$6,230, plus 45% of excess over $22,000.
Over $26,000 but not over $32,000	$8,030, plus 47% of excess over $26,000.
Over $32,000 but not over $38,000	$10,850, plus 49% of excess over $32,000.
Over $38,000 but not over $44,000	$13,790, plus 52% of excess over $38,000.
Over $44,000 but not over $50,000	$16,910, plus 54% of excess over $44,000.
Over $50,000 but not over $60,000	$20,150, plus 56% of excess over $50,000.
Over $60,000 but not over $70,000	$25,750, plus 58% of excess over $60,000.
Over $70,000 but not over $80,000	$31,550, plus 59% of excess over $70,000.
Over $80,000 but not over $90,000	$37,450, plus 61% of excess over $80,000.
Over $90,000 but not over $100,000	$43,550, plus 62% of excess over $90,000.
Over $100,000	$49,750, plus 63% of excess over $100,000."

(b) WITHHOLDING AMENDMENT.—Subsection (a) of section 3402 (relating to requirement of withholding) is amended by striking out the second and third sentences and inserting in lieu thereof the following new sentence: "With respect to wages paid after December 31, 1978, the tables so prescribed shall be the same as the tables prescribed under this subsection which were in effect on January 1, 1975, except that—

"(1) tables shall be modified to the extent necessary to reflect the amendments made by sections 101 and 102 of the Tax Reduction and Simplification Act of 1977, and

"(2) such tables shall be further modified—

"(A) with respect to wages paid in 1979, to the extent necessary to reflect the amendment made by section 101(a) of the Revenue Act of 1978,

"(B) with respect to wages paid in 1980, to the extent necessary to reflect the amendment made by section 102(a) of the Revenue Act of 1978, and

"(C) with respect to wages paid after 1980, to the extent necessary to reflect the amendment made by section 103(a) of the Revenue Act of 1978."

(c) EFFECTIVE DATE.—

(1) SUBSECTION (a).—The amendment made by this subsection (a) shall apply to taxable years beginning in calendar year 1979.

(2) SUBSECTION (b).—The amendment made by subsection (b) shall apply to wages paid after December 31, 1978.

SEC. 102. REDUCTION IN 1980 INDIVIDUAL INCOME TAX RATES

(a) PERMANENT REDUCTION.—Section 1 (relating to tax imposed) is amended to read as follows:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)),

a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $3,200	No tax.
Over $3,200 but not over $4,200	10% of excess over $3,200.
Over $4,200 but not over $5,200	$100, plus 11% of excess over $4,200.
Over $5,200 but not over $6,200	$210, plus 12% of excess over $5,200.
Over $6,200 but not over $7,200	$330, plus 13% of excess over $6,200.
Over $7,200 but not over $11,200	$460, plus 15% of excess over $7,200.
Over $11,200 but not over $15,200	$1,060, plus 17% of excess over $11,200.
Over $15,200 but not over $19,200	$1,740, plus 19% of excess over $15,200.
Over $19,200 but not over $23,200	$2,500, plus 22% of excess over $19,200.
Over $23,200 but not over $27,200	$3,380, plus 25% of excess over $23,200.
Over $27,200 but not over $31,200	$4,380, plus 28% of excess over $27,200.
Over $31,200 but not over $35,200	$5,500, plus 31% of excess over $31,200.
Over $35,200 but not over $39,200	$6,740, plus 33% of excess over $35,200.
Over $39,200 but not over $43,200	$8,060, plus 35% of excess over $39,200.
Over $43,200 but not over $47,200	$9,460, plus 38% of excess over $43,200.
Over $47,200 but not over $55,200	$10,980, plus 40% of excess over $47,200.
Over $55,200 but not over $67,200	$14,180, plus 41% of excess over $55,200.
Over $67,200 but not over $79,200	$19,100, plus 43% of excess over $67,200.
Over $79,200 but not over $91,200	$24,260, plu 46% of excess over $79,200.
Over $91,200 but not over $103,200	$29,780, plus 48% of excess over $91,200.

Over $103,200 but not over $123,200	$35,540, plus 50% of excess over $103,200.
Over $123,200 but not over $143,200	$45,540, plus 52% of excess over $123,200.
Over $143,200 but not over $163,200	$55,940, plus 53% of excess over $143,200.
Over $163,200 but not over $183,200	$66,540, plus 54% of excess over $163,200.
Over $183,200 but not over $203,200	$77,340, plus 55% of excess over $183,200.
Over $203,200	$88,340, plus 56% of excess over $203,200.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of household (as defined in section 2(b)) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,200	No tax.
Over $2,200 but not over $2,700	10 percent of excess over $2,200.
Over $2,700 but not over $3,200	$50, plus 10.5 percent of excess over $2,700.
Over $3,200 but not over $3,700	$102.50, plus 11.5 percent of excess over $3,200.
Over $3,700 but not over $4,200	$160, plus 12 percent of excess over $3,700.
Over $4,200 but not over $5,200	$220, plus 13 percent of excess over $4,200.
Over $5,200 but not over $6,200	$350, plus 13.5 percent of excess over $5,200.
Over $6,200 but not over $8,200	$485, plus 15.5 percent of excess over $6,200.
Over $8,200 but not over $10,200	$795, plus 16.5 percent of excess over $8,200.
Over $10,200 but not over $12,200	$1,125, plus 18 percent of excess over $10,200.
Over $12,200 but not over $14,200	$1,485, plus 19 percent of excess over $12,200.
Over $14,200 but not over $16,200	$1,865, plus 20.5 percent of excess over $14,200.
Over $16,200 but not over $18,200	$2,275, plus 21.5 percent of excess over $16,200.
Over $18,200 but not over $20,200	$2,705, plus 24.5 percent of excess over $18,200.
Over $20,200 but not over $22,200	$3,195, plus 25.5 percent of excess over $20,200.
Over $22,200 but not over $24,200	$3,705, plus 27.5 percent of excess over $22,200.
Over $24,200 but not over $26,200	$4,255, plus 28 percent of excess over $24,200.
Over $26,200 but not over $28,200	$4,815, plus 29.5 percent of excess over $26,200.
Over $28,200 but not over $30,200	$5,405, plus 32 percent of excess over $28,200.
Over $30,200 but not over $34,200	$6,045, plus 33.5 percent of excess over $30,200.
Over $34,200 but not over $38,200	$7,385, plus 37 percent of excess over $34,200.
Over $38,200 but not over $40,200	$8,865, plus 38 percent of excess over $38,200.
Over $40,200 but not over $42,200	$9,625, plus 39 percent of excess over $40,200.
Over $42,200 but not over $46,200	$10,405, plus 40.5 percent of excess over $42,200.
Over $46,200 but not over $52,200	$12,025, plus 44 percent of excess over $46,200.
Over $52,200 but not over $54,200	$14,665, plus 44.5 percent of excess over $52,200.
Over $54,200 but not over $62,200	$15,555, plus 45 percent of excess over $54,200.
Over $62,200 but not over $66,200	$19,155, plus 46 percent of excess over $62,200.
Over $66,200 but not over $72,200	$20,995, plus 47 percent of excess over $66,200.
Over $72,200 but not over $78,200	$23,815, plus 47.5 percent of excess over $72,200.
Over $78,200 but not over $82,200	$26,665, plus 49 percent of excess over $78,200.
Over $82,200 but not over $90,200	$28,625, plus 50 percent of excess over $82,200.
Over $90,200 but not over $92,200	$32,625, plus 51 percent of excess over $90,200.
Over $92,200 but not over $102,200	$33,645, plus 51.5 percent of excess over $92,200.
Over $102,200 but not over $122,200	$38,795, plus 53 percent of excess over $102,200.
Over $122,200 but not over $142,200	$49,395, plus 54 percent of excess over $122,200.
Over $142,200 but not over $152,200	$60,195, plus 54.5 percent of excess over $142,200.
Over $152,200 but not over $162,200	$65,645, plus 54.5 percent of excess over $152,200.
Over $162,200 but not over $182,200	$71,095, plus 55 percent of excess over $162,200.
Over $182,200 but not over $202,200	$82,095, plus 55.5 percent of excess over $182,200.
Over $202,200	$93,195, plus 56 percent of excess over $202,200.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,200	No tax.
Over $2,200 but not over $2,700	10% of excess over $2,200.
Over $2,700 but not over $3,200	$50, plus 11% of excess over $2,700.
Over $3,200 but not over $3,700	$105, plus 12% of excess over $3,200.
Over $3,700 but not over $4,200	$165, plus 13% of excess over $3,700.
Over $4,200 but not over $6,200	$230, plus 14% of excess over $4,200.
Over $6,200 but not over $8,200	$510, plus 16% of excess over $6,200.
Over $8,200 but not over $10,200	$830, plus 18% of excess over $8,200.
Over $10,200 but not over $12,200	$1,190, plus 19% of excess over $10,200.
Over $12,200 but not over $14,200	$1,570, plus 21% of excess over $12,200.
Over $14,200 but not over $16,200	$1,990, plus 22% of excess over $14,200.
Over $16,200 but not over $18,200	$2,430, plus 24% of excess over $16,200.
Over $18,200 but not over $20,200	$2,910, plus 27% of excess over $18,200.
Over $20,200 but not over $22,200	$3,450, plus 29% of excess over $20,200.
Over $22,200 but not over $24,200	$4,030, plus 30% of excess over $22,200.
Over $24,200 but not over $28,200	$4,630, plus 31% of excess over $24,200.
Over $28,200 but not over $34,200	$5,870, plus 36% of excess over $28,200.
Over $34,200 but not over $40,200	$8,030, plus 41% of excess over $34,200.
Over $40,200 but not over $46,200	$10,490, plus 43% of excess over $40,200.
Over $46,200 but not over $52,200	$13,070, plus 48% of excess over $46,200.
Over $52,200 but not over $62,200	$15,950, plus 49% of excess over $52,200.
Over $62,200 but not over $72,200	$20,850, plus 51% of excess over $62,200.
Over $72,200 but not over $82,200	$25,950, plus 52% of excess over $72,200.
Over $82,200 but not over $92,200	$31,150, plus 54% of excess over $82,200.
Over $92,200 but not over $102,200	$36,550, plus 55% of excess over $92,200.
Over $102,200	$42,050, plus 56% of excess over $102,200.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $1,600	No tax.
Over $1,600 but not over $2,100	10% of excess over $1,600.
Over $2,100 but not over $2,600	$50, plus 11% of excess over $2,100.
Over $2,600 but not over $3,100	$105, plus 12% of excess over $2,600.
Over $3,100 but not over $3,600	$165, plus 13% of excess over $3,100.
Over $3,600 but not over $5,600	$230, plus 15% of excess over $3,600.
Over $5,600 but not over $7,600	$530, plus 17% of excess over $5,600.
Over $7,600 but not over $9,600	$870, plus 19% of excess over $7,600.
Over $9,600 but not over $11,600	$1,250, plus 22% of excess over $9,600.
Over $11,600 but not over $13,600	$1,690, plus 25% of excess over $11,600.
Over $13,600 but not over $15,600	$2,190, plus 28% of excess over $13,600.
Over $15,600 but not over $17,600	$2,750, plus 31% of excess over $15,600.
Over $17,600 but not over $19,600	$3,370, plus 33% of excess over $17,600.
Over $19,600 but not over $21,600	$4,030, plus 35% of excess over $19,600.
Over $21,600 but not over $23,600	$4,730, plus 38% of excess over $21,600.
Over $23,600 but not over $27,600	$5,490, plus 40% of excess over $23,600.
Over $27,600 but not over $33,600	$7,090, plus 41% of excess over $27,600.
Over $33,600 but not over $39,600	$9,550, plus 43% of excess over $33,600.
Over $39,600 but not over $45,600	$12,130, plus 46% of excess over $39,600.
Over $45,600 but not over $51,600	$14,890, plus 48% of excess over $45,600.
Over $51,600 but not over $61,600	$17,770, plus 50% of excess over $51,600.
Over $61,600 but not over $71,600	$22,770, plus 52% of excess over $61,600.
Over $71,600 but not over $81,600	$27,970, plus 53% of excess over $71,600.
Over $81,600 but not over $91,600	$33,270, plus 54% of excess over $81,600.
Over $91,600 but not over $101,600	$38,670, plus 55% of excess over $91,600.
Over $101,600	$44,170, plus 56% of excess over $101,600.

"(e) ESTATES AND TRUSTS.—There is hereby imposed on the taxable income of every estate and trust taxable under this subsection a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $500	10% of taxable income.
Over $500 but not over $1,000	$50, plus 11% of excess over $500.
Over $1,000 but not over $1,500	$105, plus 12% of excess over $1,000.
Over $1,500 but not over $2,000	$165, plus 13% of excess over $1,500.
Over $2,000 but not over $4,000	$230, plus 15% of excess over $2,000.
Over $4,000 but not over $6,000	$530, plus 17% of excess over $4,000.
Over $6,000 but not over $8,000	$870, plus 19% of excess over $6,000.
Over $8,000 but not over $10,000	$1,250, plus 22% of excess over $8,000.
Over $10,000 but not over $12,000	$1,690, plus 25% of excess over $10,000.
Over $12,000 but not over $14,000	$2,190, plus 28% of excess over $12,000.
Over $14,000 but not over $16,000	$2,750, plus 31% of excess over $14,000.
Over $16,000 but not over $18,000	$3,370, plus 33% of excess over $16,000.
Over $18,000 but not over $20,000	$4,030, plus 35% of excess over $18,000.
Over $20,000 but not over $22,000	$4,730, plus 38% of excess over $20,000.
Over $22,000 but not over $26,000	$5,490, plus 40% of excess over $22,000.
Over $26,000 but not over $32,000	$7,090, plus 41% of excess over $26,000.
Over $32,000 but not over $38,000	$9,550, plus 43% of excess over $32,000.
Over $38,000 but not over $44,000	$12,130, plus 46% of excess over $38,000.
Over $44,000 but not over $50,000	$14,890, plus 48% of excess over $44,000.
Over $50,000 but not over $60,000	$17,770, plus 50% of excess over $50,000.
Over $60,000 but not over $70,000	$22,770, plus 52% of excess over $60,000.
Over $70,000 but not over $80,000	$27,970, plus 53% of excess over $70,000.
Over $80,000 but not over $90,000	$33,270, plus 54% of excess over $80,000.
Over $90,000 but not over $100,000	$38,670, plus 55% of excess over $90,000.
Over $100,000	$44,170, plus 56% of excess over $100,000."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning in calendar year 1980.

SEC. 103. PERMANENT REDUCTION IN INDIVIDUAL INCOME TAX RATES.

(a) PERMANENT REDUCTION.—Section 1 (relating to tax imposed) is amended to read as follows:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)),

a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $3,200	No tax.
Over $3,200 but not over $4,200	8% of excess over $3,200.
Over $4,200 but not over $5,200	$80, plus 9% of excess over $4,200.
Over $5,200 but not over $6,200	$170, plus 10% of excess over $5,200.
Over $6,200 but not over $7,200	$270, plus 11% of excess over $6,200.
Over $7,200 but not over $11,200	$380, plus 13% of excess over $7,200.
Over $11,200 but not over $15,200	$900, plus 15% of excess over $11,200.
Over $15,200 but not over $19,200	$1,500, plus 17% of excess over $15,200.
Over $19,200 but not over $23,200	$2,180, plus 19% of excess over $19,200.
Over $23,200 but not over $27,200	$2,940, plus 21% of excess over $23,200.
Over $27,200 but not over $31,200	$3,780, plus 24% of excess over $27,200.
Over $31,200 but not over $35,200	$4,740, plus 27% of excess over $31,200.
Over $35,200 but not over $39,200	$5,820, plus 29% of excess over $35,200.
Over $39,200 but not over $43,200	$6,980, plus 31% of excess over $39,200.

Over $43,200 but not over $47,200	$8,220, plus 33% of excess over $43,200.
Over $47,200 but not over $55,200	$9,540, plus 35% of excess over $47,200.
Over $55,200 but not over $67,200	$12,340, plus 36% of excess over $55,200.
Over $67,200 but not over $79,200	$16,660, plus 37% of excess over $67,200.
Over $79,200 but not over $91,200	$21,100, plus 40% of excess over $79,200.
Over $91,200 but not over $103,200	$25,900, plus 42% of excess over $91,200.
Over $103,200 but not over $123,200	$30,940, plus 44% of excess over $103,200.
Over $123,200 but not over $143,200	$39,740, plus 46% of excess over $123,200.
Over $143,200 but not over $163,200	$48,940, plus 47% of excess over $143,200.
Over $163,200 but not over $183,200	$58,340, plus 48% of excess over $163,200.
Over $183,200 but not over $203,200	$67,940, plus 49% of excess over $183,200.
Over $203,200	$77,740, plus 50% of excess over $203,200.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of household (as defined in section 2(b)) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,200	No tax.
Over $2,200 but not over $2,700	7.5% of excess over $2,200.
Over $2,700 but not over $3,200	$37.50, plus 8.5% of excess over $2,700.
Over $3,200 but not over $3,700	$80, plus 9.5% of excess over $3,200.
Over $3,700 but not over $4,200	$127.50, plus 10% of excess over $3,700.
Over $4,200 but not over $5,200	$177, plus 11% of excess over $4,200.
Over $5,200 but not over $6,200	$287, plus 11.5% of excess over $5,200.
Over $6,200 but not over $8,200	$402, plus 13% of excess over $6,200.
Over $8,200 but not over $10,200	$622, plus 14.5% of excess over $8,200.
Over $10,200 but not over $12,200	$952, plus 16% of excess over $10,200.
Over $12,200 but not over $14,200	$1,272, plus 16.5% of excess over $12,200.
Over $14,200 but not over $16,200	$1,602, plus 18.5% of excess over $14,200.
Over $16,200 but not over $18,200	$1,972, plus 19% of excess over $16,200.
Over $18,200 but not over $20,200	$2,352, plus 21% of excess over $18,200.
Over $20,200 but not over $22,000	$2,772, plus 21.5% of excess over $20,200.
Over $22,200 but not over $24,200	$3,202, plus 23.5% of excess over $22,200.
Over $24,200 but not over $26,200	$3,672, plus 24% of excess over $24,200.
Over $26,200 but not over $28,200	$4,152, plus 25.5% of excess over $26,200.
Over $28,200 but not over $30,200	$4,662, plus 27.5% of excess over $28,200.
Over $30,200 but not over $34,200	$5,212, plus 29% of excess over $30,200.
Over $34,200 but not over $38,200	$6,372, plus 32.5% of excess over $34,200.
Over $38,200 but not over $40,200	$7,672, plus 33.5% of excess over $38,200.
Over $40,200 but not over $42,200	$8,342, plus 34.5% of excess over $40,200.
Over $42,200 but not over $46,200	$9,032, plus 35.5% of excess over $42,200.
Over $46,200 but not over $52,200	$10,452, plus 38.5% of excess over $46,200.
Over $52,200 but not over $54,200	$12,762, plus 39% of excess over $52,200.
Over $54,200 but not over $62,200	$13,542, plus 39.5% of excess over $54,200.
Over $62,200 but not over $66,200	$16,702, plus 40% of excess over $62,200.
Over $66,200 but not over $72,200	$18,302, plus 40.5% of excess over $66,200.
Over $72,200 but not over $78,200	$20,732, plus 41% of excess over $72,200.
Over $78,200 but not over $82,200	$23,192, plus 42.5% of excess over $78,200.
Over $82,200 but not over $90,200	$24,892, plus 44% of excess over $82,200.
Over $90,200 but not over $92,200	$28,412, plus 45% of excess over $90,200.
Over $92,200 but not over $102,200	$29,312, plus 45.5% of excess over $92,200.
Over $102,200 but not over $122,200	$33,862, plus 47% of excess over $102,200.
Over $122,200 but not over $142,200	$43,262, plus 48% of excess over $122,200.
Over $142,200 but not over $152,200	$57,712, plus 48.5% of excess over $152,200.
Over $152,200 but not over $162,200	$57,712, plus 48.5% of excess over $162,200.
Over $162,200 but not over $182,200	$62,562, plus 49% of excess over $162,200.
Over $182,200 but not over $202,200	$72,362, plus 49.5% of excess over $182,200.
Over $202,200	$82,262, plus 50% of excess over $202,200.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)), who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,200	No tax.
Over $2,200 but not over $2,700	7 percent of excess over $2,200.
Over $2,700 but not over $3,200	$35, plus 9 percent of excess over $2,700.
Over $3,200 but not over $3,700	$80, plus 10 percent of excess over $3,200.
Over $3,700 but not over $4,200	$130, plus 11 percent of excess over $3,700.
Over $4,200 but not over $6,200	$185, plus 12 percent of excess over $4,200.
Over $6,200 but not over $8,200	$425, plus 13 percent of excess over $6,200.
Over $8,200 but not over $10,200	$685, plus 16 percent of excess over $8,200.
Over $10,200 but not over $12,200	$1,005, plus 17 percent of excess over $10,200.
Over $12,200 but not over $14,200	$1,345, plus 18 percent of excess over $12,200.
Over $14,200 but not over $16,200	$1,705, plus 20 percent of excess over $14,200.
Over $16,200 but not over $18,200	$2,105, plus 21 percent of excess over $16,200.
Over $18,200 but not over $20,200	$2,525, plus 23 percent of excess over $18,200.
Over $20,200 but not over $22,200	$2,985, plus 24 percent of excess over $20,200.
Over $22,200 but not over $24,200	$3,465, plus 26 percent of excess over $22,200.
Over $24,200 but not over $28,200	$3,985, plus 27 percent of excess over $24,200.
Over $28,200 but not over $34,200	$5,065, plus 31 percent of excess over $28,200.
Over $34,200 but not over $40,200	$6,925, plus 36 percent of excess over $34,200.
Over $40,200 but not over $46,200	$9,085, plus 38 percent of excess over $40,200.
Over $46,200 but not over $52,200	$11,365, plus 42 percent of excess over $46,200.

Over $52,200 but not over $62,200	$13,885, plus 43% of excess over $52,200.
Over $62,200 but not over $72,200	$18,185, plus 44% of excess over $62,200.
Over $72,200 but not over $82,200	$22,585, plus 45% of excess over $72,200.
Over $82,200 but not over $92,200	$27,085, plus 48% of excess over $82,200.
Over $92,200 but not over $102,200	$31,885, plus 49% of excess over $92,200.
Over $102,200	$36,785, plus 50% of excess over $102,200.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $1,600	No tax.
Over $1,600 but not over $2,100	8% of excess over $1,600.
Over $2,100 but not over $2,600	$40, plus 9% of excess over $2,100.
Over $2,600 but not over $3,100	$85, plus 10% of excess over $2,600.
Over $3,100 but not over $3,600	$135, plus 11% of excess over $3,100.
Over $3,600 but not over $5,600	$190, plus 13% of excess over $3,600.
Over $5,600 but not over $7,600	$450, plus 15% of excess over $5,600.
Over $7,600 but not over $9,600	$750, plus 17% of excess over $7,600.
Over $9,600 but not over $11,600	$1,090, plus 19% of excess over $9,600.
Over $11,600 but not over $13,600	$1,470, plus 21% of excess over $11,600.
Over $13,600 but not over $15,600	$1,890, plus 24% of excess over $13,600.
Over $15,600 but not over $17,600	$2,370, plus 27% of excess over $15,600.
Over $17,600 but not over $19,600	$2,910, plus 29% of excess over $17,600.
Over $19,600 but not over $21,600	$3,490, plus 31% of excess over $19,600.
Over $21,600 but not over $23,600	$4,110, plus 33% of excess over $21,600.
Over $23,600 but not over $27,600	$4,770, plus 35% of excess over $23,600.
Over $27,600 but not over $33,600	$6,170, plus 36% of excess over $27,600.
Over $33,600 but not over $39,600	$8,330, plus 37% of excess over $33,600.
Over $39,600 but not over $45,600	$10,550, plus 40% of excess over $39,600.
Over $45,600 but not over $51,600	$12,950, plus 42% of excess over $45,600.
Over $51,600 but not over $61,600	$15,470, plus 44% of excess over $51,600.
Over $61,600 but not over $71,600	$19,870, plus 46% of excess over $61,600.
Over $71,600 but not over $81,600	$24,470, plus 47% of excess over $71,600.
Over $81,600 but not over $91,600	$29,170, plus 48% of excess over $81,600.
Over $91,600 but not over $101,600	$33,970, plus 49% of excess over $91,600.
Over $101,600	$38,870, plus 50% of excess over $101,600."

"(e) ESTATES AND TRUSTS.—There is hereby imposed on the taxable income of every estate and trust taxable under this subsection a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $500	8% of taxable income.
Over $500 but not over $1,000	$40, plus 9% of excess over $500.
Over $1,000 but not over $1,500	$85, plus 10% of excess over $1,000.
Over $1,500 but not over $2,000	$135, plus 11% of excess over $1,500.
Over $2,000 but not over $4,000	$190, plus 13% of excess over $2,000
Over $4,000 but not over $6,000	$450, plus 15% of excess over $4,000.
Over $6,000 but not over $8,000	$750, plus 17% of excess over $6,000.
Over $8,000 but not over $10,000	$1,090 plus 19% of excess over $8,000.
Over $10,000 but not over $12,000	$1,470, plus 21% of excess over $10,000.
Over $12,000 but not over $14,000	$1,890, plus 24% of ercess over $12,000.
Over $14,000 but not over $16,000	$2,370, plus 27% of excess over $14,000.
Over $16,000 but not over $18,000	$2,910, plus 29% of excess over $16,000.
Over $18,000 but not over $20,000	$3,490, plus 31% of excess over $18,000.
Over $20,000 but not over $22,000	$4,110, plus 33% of excess over $20,000.
Over $22,000 but not over $26,000	$4,770, plus 35% of excess over $22,000.
Over $26,000 but not over $32,000	$6,170, plus 36% of excess over $26,000.
Over $32,000 but not over $38,000	$8,330, plus 37% of excess over $32,000.
Over $38,000 but not over $44,000	$10,550, plus 40% of excess over $38,000.
Over $44,000 but not over $50,000	$12,950, plus 42% of excess over $44,000.
Over $50,000 but not over $60,000	$15,470, plus 44% of excess over $50,000.
Over $60,000 but not over $70,000	$19,870, plus 46% of excess over $60,000.
Over $70,000 but not over $80,000	$24,470, plus 47% of excess over $70,000.
Over $80,000 but not over $90,000	$29,170, plus 48% of excess over $80,000.
Over $90,000 but not over $100,000	$33,970, plus 49% of excess over $90,000.
Over $100,000	$38,870, plus 50% of excess over $100,000."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1980.

Redesignate sections 102, 103, 104, and 105 of the bill as sections 104, 105, 106, and 107, respectively.

In paragraph (1) of section 21(f) of the Internal Revenue Code of 1954 (as proposed to be inserted by section 107 of the bill, as so redesignated), strike out "sections 101, 102" and insert in lieu thereof "sections 101, 102, 103, 104,".

Mr. KEMP (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the motion to recommit be dispensed with and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER. Pursuant to House Resolution 1306, the gentleman from New York (Mr. KEMP) will be recognized for 30 minutes, and the gentleman from Oregon (Mr. ULLMAN) will be recognized for 30 minutes.

PARLIAMENTARY INQUIRY

Mr. KEMP. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman from New York will state his parliamentary inquiry.

Mr. KEMP. Mr. Speaker, the 60 minutes will be equally divided, and on both sides of the aisle I assume we would be yielding back and forth across the aisle as the debate continues. Is that correct?

The SPEAKER. The gentleman is correct.

The gentleman from Oregon will close the debate.

The Chair recognizes the gentleman from New York (Mr. KEMP) for 30 minutes.

Mr. KEMP. Mr. Speaker, I yield to myself 8 minutes.

I offer this motion to recommit not because I am opposed strongly to what the Committee on Ways and Means has done in the bill brought to us from their months of deliberation. That bill is a good bill, the best in 15 years, in the direction it begins and in some of its specific provisions. It reduces the rates on capital gains taxes. It indexes those tax rates for changes in value produced by inflation, not real growth. It raises the personal exemption from $750 to $1,000. It reduces the corporate income tax rates. It provides some important tax relief for smaller businesses.

But this bill does not go far enough. That is the nature of my complaint and that of the cosponsors and supporters of this legislation and this motion. It does not go far enough to reduce the individual income tax rates, and because it does not, the American people are going to experience unprecedented increases in the taxes they pay. Unless this motion is passed, they will pay $262.5 billion in additional taxes between now and 1983.

Look at the extent of these rates and the increases they will face.

PENDING TAX INCREASES UNDER CURRENT LAW

[In billions]

	1979	1980	1981	1982	1983	Total
Due to—						
Inflation [1]	$16.8	$27.8	$40.8	$55.2	$72.4	$213.0
Social security [1]	9.6	13.1	25.3	34.3	37.5	119.8
Total tax increase	26.4	40.9	66.1	89.5	109.9	332.8

[1] Based on calculations of the Joint Committee on Taxation, assuming 7.5, 7, 6.5, 6 and 6 inflation.

NET TAX CUTS (I.E., PENDING TAX INCREASES LESS TAX CUTS)

	1979	1980	1981	1982	1983	Total
Ways and Means	$16.0	$28.9	$52.3	$73.7	$91.6	$262.5
Kemp-Roth	3.6	−12.8	−15.9	−16.1	−9.1	−60.2

And here is what the committee bill's effects will be in contrast to the Kemp motion.

1983 TAX INCREASES

[In constant 1978 dollars]

Family of 4 income in 1978	Scheduled change under current law	Change under committee bill	Change under Kemp-Roth
$12,000	$394	$184	−$438
$17,000	460	350	−870
$20,000	725	579	−975
$30,000	1,552	1,311	−1,710

Assumptions

1. Inflation rates for 1978–83 are 7.5 percent, 7.5 percent, 7 percent, 6.5 percent, 6 percent, and 6 percent.
2. Assumes no general tax credit.
3. Reflect changes in recently enacted social security laws and inflation-induced tax increases.

Mr. Speaker, when you stood in the well on the Corman-Fisher substitute a moment ago, you talked about that $17,500 median family income. To adjust upward the marginal tax bracket thresholds for personal income tax rates by just 6 percent starting in 1979 or whatever the inflation rate may be for a future year is not the way to deal effectively with the major problems in our income tax structure. It also does not start to account adequately for the extent of inflation they have suffered and for which tax relief has not been granted.

If you want to adjust the thresholds which begin each marginal tax bracket, which range from 14- to 70-percent in our present tax structure for inflation from 1970 to 1978, you would have to adjust everyone's threshold by 60 percent. I repeat, 60 percent, not 6 percent. That is how much inflation has pushed the American people's income taxes as a result of inflation pushing them into tax brackets where the percentages they pay in taxes on additional dollars of income are increasingly higher.

For instance, a 1970 taxable income of $10,500 was taxed at the marginal rate on each additional dollar earned at 22-percent. To keep pace with the cost of living, which means without any real increase in income or standard of living, that 1978 income will have to rise to $17,500. But the tax bracket will have gone up from 22 percent in 1970 to 28 percent in 1978.

To use the median income in the United States in 1967 and 1977 as an example, look at these effects of inflation on higher rates:

Changes in taxes and disposable income for a family of 4 [1] earning the median income, 1967–77

	1967	1977
Income:		
Nominal (current)	$8,400	[2] $17,000
Real (1967 dollars)	$8,400	$9,366
Personal exemption	$2,400	$3,000
Standard deduction	$1,240	$3,200
Taxable income	$4,760	$10,800
Federal income tax	$764	$1,822
Social security tax	$174	$965
Total Federal tax	$938	$2,787
Disposable income:		
Nominal (current)	$7,462	$14,213
Real (1967 dollars)	$7,462	$6,579
Tax rate (percent):		
Effective	11.2	16.4
Marginal	19	22

[1] Married couple with 2 dependents.

[2] The zero bracket is not shown in this table. To include the zero bracket, increase all taxable incomes shown by $3,200.

At 7-percent inflation, prices double every 10 years. As prices double in the next 10 years, the tax rates will go too; that means a double burden on the taxpayer. Blue-collar workers in Buffalo, New York City, Los Angeles, and everywhere else will see their marginal tax brackets climb closer and closer to 50 percent. That is particularly true when Federal and State and local taxes are paid.

This Congress must act to reduce the most fundamental flaw in the income tax schedule.

Mr. OTTINGER. Will the gentleman yield?

Mr. KEMP. Not at this time. There are several additional points which I wish to make.

I have a large chart by my side. It is designed to depict the effects of inflation on gross income and on marginal tax rates for three benchmarks: 1965, 1978, and 1987.

A $15,000 income in 1965 was taxed at the marginal rate of 22 percent. But the Consumer Price Index doubled in the 12 years to 1977. So in 1977 that taxpayer would have to earn $32,000 to stay abreast of that $15,000 1965 income, but the marginal tax rate would have gone from 22 percent to 32 percent. If consumer prices double in the next 10 years and they will at 7-percent inflation, by 1987 that person at $15,000 in 1965 dollars will have to earn $60,000 of normal income, but the tax rate will be 22 percent in 1965 going to 50 percent in 1987.

These examples are of crucial importance, for they show that the Committee on Ways and Means bill does not offset by reducing the marginal tax rates the effects of inflation.

It is not the purpose of this motion or the principle underlying it to cut taxes so the return to the taxpayer is a rebate, or to cut taxes just to put money back into the economy to stimulate demand and consumption.

The economic principles underlying the approach of the Kemp amendment is to recreate the incentive to work, save, invest, and take economic risks.

Why is this important?

By recreating the incentive to work save, invest, and take economic risks by reducing the percentage of reward for that economic activity taken by the Federal Government in the form of taxes, we will have more work, more savings, more investment, and more economic risk-taking. That will expand the total amount of economic activity, expanding the tax base from which Federal tax revenues are drawn, providing additional revenues with which to offset Federal budget deficits and to counteract the crowding out of investment capital arising from Government borrowing to pay portions of those deficits.

But something else will happen too. By restoring reward for greater levels of

economic activity, taxpayers who have sheltered their income, in order to avoid excessively high rates of taxation, will come out of those shelters in increasing numbers. This is what occurred as a result of the Kennedy tax rate reductions in the early 1960's, and I quote Dr. Michael K. Evans, president of Chase Econometric Associates, Inc., from his recent study of those rate reductions:

After virtually no growth in taxes collected from personal income over $100,000 for three years, actual income taxes paid rose dramatically beginning in 1964, when personal income was taxed at significantly lower rates.

The conclusions of Dr. Evans' study can be found in the RECORD of August 7, at pages E4389–E4391.

What does it mean to have the higher income taxpayers coming back into taxable economic activity? It means that, if total tax liabilities remain constant, the rates can be lowered for middle- and lower-income taxpayers. And that, my colleagues, is exactly what my amendment is structured to do, and the economic simulations of its effects, being produced by the Office of Tax Analysis in the Office of the Secretary of the Treasury, show this.

Under existing law, those in the $100,000 to $200,000 income class are responsible for 7.12 percent of the total Federal income tax liability, and those in the $200,000-and-over income class are responsible for 7.45 percent. The Kemp amendment would increase the $100,000 to $200,000 class to 7.60 and the $200,000 and over to 8.50 percent. That is more than Vanik-Pickle would do; more than the committee bill would do; more than Corman-Fisher would do.

The consequence of that additional tax liability at the top of the scale is to reduce it at the bottom and middle. Income classes from zero to $30,000 would have a 50.98-percent liability under present law and Vanik-Pickle, 50.90 percent under the committee bill, 50.10 percent under Corman-Fisher, but only 49.30 percent under the Kemp amendment.

The following table illustrates this point:

PERCENTAGE DISTRIBUTIONS OF INDIVIDUAL INCOME TAX LIABILITY

Expanded income class	Present law [1]	H.R. 13511 [3] (Committee bill)	Kemp amendment [1]
Less than $5,000	—0.07	4.40	—0.30
$5,000 to $10,000	4.47		3.80
$10,000 to $15,000	9.26	9.30	8.80
$15,000 to $20,000	13.05	13.10	12.80
$20,000 to $30,000	24.27	24.10	24.20
$30,000 to $50,000	21.29	21.20	21.30
$50,000 to $100,000	13.02	13.10	13.20
$100,000 to $200,000	7.12	7.30	7.60
$200,000 and over	7.45	7.50	8.50

That enables the Kemp amendment to assure that 65 percent of the dollars which will remain with the people, as a result of its enactment, will be in the $30,000 and under categories. That is two-thirds of the entire reduction.

So, I say to my colleagues, if your objective is to have the rich, as an income class, shouldering a greater percentage of total Federal personal income tax liability, albeit from lower marginal rates, then vote for the Kemp amendment.

It is important to refute the argument that cost-of-living wage increases keep everyone afloat and in the same economic position. That is not true. For every 10 percent increase in the nominal income of the American people, taxes increase by 16 percent.

Mr. Speaker, if we want to do something about the social security tax increase, if we want to do something about these marginal rates going on up into astronomical proportions, we must support this motion to reduce the marginal tax rates. This is the only alternative which gets to the heart of the individual income tax and tax rate problems, just as the Archer and Steiger amendments get to the heart of the capital gains problem.

But, Mr. Speaker, we must do something for those people who are the blue-collar workers. If they get 6-percent increases in their income today, whether it is won at a collective bargaining table or whether it is an increase that an employer might otherwise give an employee taxes will go up by 8 percent.

Kemp-Roth has come a long way, no matter about the outcome of the vote on this motion today.

For one thing, there is no longer any debate over whether taxes should be cut. The only debate in the House today and in America this year is what shape it should take and how much it should be.

Will Kemp-Roth or this amendment be inflationary? No, and let me detail why.

With so many economic decisions affected by tax rates, it is obvious that the market supply of goods and services must respond to changes in tax rates.

Our economy functions because people respond to changes in relative prices. The price of butter relative to that of margarine. Or beef relative to chicken. Capital relative to labor, and so on.

A tax rate change is just another relative price change. It changes the prices of leisure and current consumption in terms of foregone current and future income.

To claim that people do not respond to these price changes goes against the basic principles of economic science.

Yet there is no recognition of such responses in the economics now used to brand Kemp-Roth, the Tax Rate Reduction Act, as wildly inflationary. This is the charge of our colleague, of a portion of the Library's new study, of Walter Heller.

Walter Heller tells us, in contrast to what we know about the impact of tax rates on economic decisionmaking, that the decision to save does not depend on the relative prices of current consumption and future income. He tells us that the so-called Denison's Law shows that savings do not respond to higher after-tax reward. The problem here is that Denison's Law is inherent in the formulas structure of almost all of the econometric models. Thus, it skews their calculations on expansion of the tax base, deficits, and inflation.

But the most recent empirical studies of the responsiveness of savings conclude that "private savings is indeed strongly affected by changes in the real after-tax rate of return." As a matter of fact, the principal study dismisses Denison's Law as a "conjecture based on evidence which is filmsy at best and dangerously misleading at worst."

But a current understanding of the Kemp-Roth bill's effect on savings is absolutely crucial to assessing an asserted inflationary effect.

Let us try to reach such an understanding. In order to judge the impact of a cut in marginal tax rates on growth and inflation, we have to know what the cut will do to GNP and saving. To finance itself without causing inflation, a tax cut can do four things:

First. It should increase GNP, which is the tax base, and get back revenues to offset some or all of the initial cut.

Second. It should cause existing savings and investments funds to switch out of tax shelters and nontaxable uses into taxable uses, raising the tax base and revenue. This probably also raises GNP by shifting saving and investment from low-yield, but sheltered, projects into straightforward, high-yield activities.

Third. A tax cut should make saving more rewarding after taxes. It should raise the total amount of saving in the economy. Some of this saving would go to buy the bonds the Treasury may have to sell to cover any deficit remaining from the tax cut. Any excess would be used to increase net investment and growth.

Fourth. A tax cut should increase incentives for output and employment.

Roth-Kemp, which is a cut in marginal tax rates, will do all of the above as the Library of Congress study shows it will, because the after-tax reward from working and saving will be enlarged.

As long as revenues rise to offset the tax cut, or as long as savings rise by enough to cover any added debt, the Federal Reserve does not have to buy even one additional Treasury bill, and does not have to add one cent to the money supply.

A Chase Econometrics study estimates that personal savings, retained earnings, and other capital inflows will rise enough from the tax-rate reductions found in the Roth-Kemp bill to cover any added deficit and to still leave enough saving left over to increase net investment by well over one-half, delivering an enormous boost to real growth.

Here is what Chase showed:

INCREASE IN SAVINGS AND RETAINED EARNINGS OVER INCREASES IN FEDERAL DEFICITS

	1979	1890	1981	1982	1983
Sum of increases in savings and retained earnings	$28	$49	$62	$71	$76
Increase in deficit from Kemp-Roth over what would otherwise have been	25	28	33	33	36
Increase in savings and retained earnings, less increase in deficits	+3	+11	+29	+38	+40

There is nothing unusual about this, look at what happened to savings as a product of the Kennedy cuts before inflation wiped out the effects of those cuts.

INCREASE IN SAVINGS RESULTING FROM KENNEDY TAX CUT

Year	Total individual savings [1] (billions)	Increase over preceding year	
		Dollars (billions)	Percent
1960	$34.900	—$2.472	—6.61
1961	34.693	—.207	—.59
1962	40.243	+5.550	+16.00
1963	45.232	+4.989	+12.40
1964	54.901	+9.669	+21.38
1965	62.028	+7.127	+12.98
1966	72.003	+9.975	+16.08
1967	72.726	+.723	+1.00
1968	78.028	+5.302	+7.29
1969	69.563	—8.465	—10.85

[1] Increase in financial assets, plus net increase in tangible assets, less debt.

Thus, Roth-Kemp is not inflationary. It is self-financing four ways. Dr. Heller has forgotten why inflation occurs, and has no way to distinguish between a tax cut which alters incentives, reduces the use of tax shelters, and stimulates savings and investment, and one which simply cuts Federal revenue and forces the Federal Reserve to create money to buy Treasury debt.

The SPEAKER. The time of the gentleman from New York (Mr. KEMP) has expired.

Mr. ULLMAN. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, what this bill is all about is inflation. We are living in an economy which is on the thin edge of double-digit inflation at 10 percent-plus interest rates.

We have carefully tailored this bill. It reduces the budget deficit by over $4 billion below the level set by the House resolution. That is doing something about inflation. It gives the proper amount of tax relief to the right people to meet the impact of inflation on the average family of this country.

But what do we have here, Mr. Speaker? We have a proposition which would reduce individual income tax rates by about 12 percent in 1979, 23 percent in 1980, and 35 percent in 1981 and subsequent years. The revenue reduction would be $27.4 billion in calendar year 1979, $63.8 billion in 1980, and $112.3 billion in 1981.

The individual tax cut in the committee's bill will be $11.9 billion in 1979. In fiscal year 1979, the revenue loss will be about $17 billion, as compared to $7.4 billion in the committee bill.

Mr. Speaker, those who believe that $100 billion-plus deficits in this country will ultimately encourage more production and lower interest rates and lower employment simply believe in magic. It will not happen. There is nothing magical about a 33-percent income tax cut. It is wildly inflationary, at a time when this economy can stand no further impetus toward inflation. The immediate shock would mean that we would have increased deficits; we would have increased interest rates; and we would have inflation going out of control. I say again to my friends we have come a long way in this bill. We have suffered through the agony of a lot of amendments. Some people are unhappy, but let me tell the Members it is almost a miracle that we even have a bill here before us today, because the divisions are so great in the committee, in the Congress, and in the country. We have a bill that we can be proud of, so let us stand together with the bill. Let us vote down this amendment, which would be exactly the wrong medicine at the wrong time in our economy. My judgment is that it would have a disastrous impact on what we are trying to do. It would make our job here impossible in the years ahead because we would be faced with demand after demand to cover our revenue base to try to recover from a $100 billion deficit. So I urge the House to stay with the bill and vote against this recommittal motion.

Mr. KEMP. Mr. Speaker, I yield 3 minutes to my colleague, the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Speaker, before I take any of my time to discuss the pending amendment, I do want to say once again how grateful I am to the chairman of our committee, the gentleman from Oregon (Mr. ULLMAN), for his patience, his fairness, his persistence, and for his willingness to see this bill through to a conclusion. I think it has been a very difficult time for us all, and his leadership has been a sparkling thing, something that we have all been proud of in the committee. I think the most recent vote we had on the last amendment was a tribute to his leadership as well. I am very proud to be associated with him in this bill. I regret that we have to differ on this particular amendment.

I am not an economist, and I do not pretend to be. I must say that many people who pretend to be economists have a very unpredictable view of what is going to happen in the future as a result of the types of stimulus we put into the economy, or the action we take on something even as central as a tax issue of this sort. I know this, however, that all tax cuts are not inflationary. We are so conditioned in this body to Keynesian economics and to the mindless stimulation of aggregate demand by giving tax cuts to people who have no choice but to spend them because they are in fact poor people and have no opportunity to do anything else with them. We have such a tendency to take money away from the middle class and give it to the poor that the result is that we are constantly stimulating consumer demand, and that is why we think of tax cuts instinctively as nothing but inflationary.

This is a different kind of tax cut. This is a tax cut that will leave some additional money in the pockets of the middle class: the people who want to invest, who want to have capital gains but who have not been able to up to this time. Frankly, Mr. Speaker, I hope desperately that the result will be that the savings rate in America will go up rather than just the additional stimulation of the consumer sector. If the savings rate goes up and we are able to achieve a level of investment that will meet this capital shortage this country has at this point, it will prove to be anti-inflationary in the long run. I submit that if the rate of savings goes up in the short run, it will be anti-inflationary in that respect also.

The idea that a bigger tax cut has got to be inflationary completely misses the point. The type of tax cut we create here is terribly important. Savings instead of consumption, investment rather than indulgence, will make this type of tax cut an economic asset for the country, not an economic liability.

Mr. ULLMAN. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio (Mr. VANIK).

Mr. VANIK. Mr. Speaker, the plan that is advocated here by our colleague, the gentleman from New York, was born of the experience of the period between 1963 to 1968 when we had the so-called Kennedy tax cut. In those years there was an income gain to the Government of $54 billion, notwithstanding the tax cut. The important thing to observe when you look at this revenue gain, is that 40 percent of the gain came from four social security tax increases. It was in this period that we created the medicare program and increased social security taxes four times to fund it.

It is a erroneous myth to assume that this policy of tax reduction in that period increased revenues.

There is one other fact. The overriding force in that period was the movement of this country into the Vietnam war. This was a propellent of $160 billion in spending. Our unemployment rate was down to 3.6 percent. Everybody was busy making defense material, or going abroad for military services. The country was moving at such a tremendous pace.

The fact of the matter is that the Kennedy tax reduction had practically no effect on the increment of Government revenues, when you take out the social security increase and the impact of the Vietnam war.

Now, if we adopt the proposal of the gentleman from New York, where will it impact? You must realize today that three-quarters of the Federal budget is in an area in which we have lost discretion; social security, medicare, medicaid. In all of those programs, we have given up our discretion. These are automatic programs, so that all of the $112 billion loss of revenue when this program is fully implemented will concentrate on our discretionary spending—25 percent of the total. And what is the 25 percent discretionary spending? It is defense. It is our social programs. It is health. It is education. When you tell people you are going to cut taxes, you tell them you are going to get the Federal Government out of education. You tell them you are going to withdraw the Federal Government from our health programs. You tell them that we are probably going to be faced with a $50 billion reduction of our defense expenditures.

Yes, yes, you can vote for Kemp-Roth, but if you do, you better buy yourself the Kemp-Roth home defense kit. Get a slingshot, a flashlight and a stick, and plan on defending yourself.

Mr. KEMP. Mr. Speaker, I yield 5 minutes to the distinguished minority leader, the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Speaker, I hope that the motion to recommit will be agreed to. The facts are that the people of this country expect a tax cut. They expect a tax cut that will last not only this year, but in the years to come.

I have a study here which was prepared for my use and the use of the gentleman from New York. It is a study concerning the effect upon taxes which the various plans which we have considered today would have.

The Vanik-Pickle plan, which we did not adopt, would have caused an increase of $200 billion in taxes by 1983.

The Corman-Fisher plan, which we did not adopt, would also have caused an increase in taxes by 1983 of $200 billion.

Mr. Speaker, the bill from the Committee on Ways and Means, although it is a good bill, will result in an increase in taxes paid of $262.5 billion by fiscal year 1983. On the other hand, Kemp-Roth will result, by the end of fiscal year 1983, in a net cut in taxes of $60.2 billion. Kemp-Roth is the only plan which we have had before us today which will really result in a lasting tax cut.

This, of course, is because of the phenomenon which we call taxflation. Whenever inflation sets in, there is only one winner, there is only one entity in this country that does better than it did before. That is the Federal Government. And we do better than we did before here in the Federal Government because of the phenomenon of progressive taxes.

In periods of inflation the income of the individual goes up. At least I hope it does, because if it does not, he is really in trouble. Because of this, the taxpayer moves into a higher bracket, and as he moves into a higher bracket, he pays more dollars.

Not only is it true that these other plans will cause an increase in tax dollars, but the social security tax has just been increased by this Congress. So the tax dollar totals rise astronomically. Only with Kemp-Roth do we actually give the people of this country a tax cut.

It is not a great big tax cut when we compare it with our three-trillion-dollar gross national product, but at least it is not an increase. It is not the drag on the economy that these other plans would be.

A lot of people have been doing some soul-searching about the desires of the American people in the last several months and weeks, ever since proposition 13 was adopted in California. When proposition 13 was adopted, I took the floor of the House, and I said, "Mr. Speaker, the reason proposition 13 was adopted is because we in this Chamber have not done our jobs."

We have caused the things to happen which made proposition 13 inevitable. Those things we did were inflationary. They have added up to an $800 billion national debt. They have put us in a situation where we are scratching to get a deficit for the next fiscal year below $50 billion

We have expanded the Federal Government to the point of absolute absurdity. The way to beat back is to have a tax cut right now.

It has been said that this tax cut is inflationary. I say not so. I say it is not inflationary because so much of the tax money which is saved by Kemp-Roth will go into investment. That will mean an increase in the production of our economy which will be followed by more jobs, and the name of the game in this economy is jobs.

Jobs are not inflationary; the lack of jobs is inflationary. If we are able to stimulate the investment in the economy by the Kemp-Roth formula, then the people of the country will not only have the jobs they require but they will have available the goods which will be produced from those jobs. We will have an efficient industrial plant which once more will cause an increase in the productivity rate per man hour instead of the decrease that we have been experiencing. And this is so important. This is the keystone to the increase in the economy which we need. This is the keystone which will set the sails of this economy for the next 10 or 15 years. This is the most important vote we are going to cast this year—the vote on the Kemp-Roth proposal.

So, Mr. Speaker, I sincerely hope that my colleagues will adopt this motion to recommit, because it is very important, not only to us but to all the people of our great country.

Mr. ULLMAN. Mr. Speaker, I yield 3 minutes to the gentleman from Georgia (Mr. JENKINS).

Mr. JENKINS. Mr. Speaker, I rise in opposition to the Kemp-Roth bill and the motion to recommit.

Mr. Speaker, for the past 2 months I have been involved in a campaign in which I have heard Kemp-Roth on every single day. That Kemp-Roth decision ended on this past Tuesday of this week.

I want to tell the Members that I am convinced the American people all across this country, while they want a tax cut, are more concerned about responsibility on your part and on my part than they are about a 33⅓-percent tax cut or a 35-percent tax cut.

Mr. Speaker, I ask the Members to think about this, when they vote on this motion to recommit: We have 33 million people in this country who are drawing Social Security today. We have a large additional number of people who are making less than $8,000 a year. An when you vote for this motion to recommit, if there is inflation—and I submit that there will be, in a spiraling amount—those are people who are going to get hurt with this action, because a tax reduction does not help them. Inflation will kill them. It sounds tempting. It was very tempting to me, and I know it is to the Members of this body, to vote for a 33⅓ percent tax cut right before a November election. But if we are going to index, if we are going to look into the future and say we are going to have these tremendous tax reductions, we ought to index everything; we ought to index the minimum wage that the people in this body voted against before, and so did I. But I do not know what is going to happen 2 years from now, and you do not either. You are going to go back to the people 2 years from now, too. And, if the inflation rate at that time is shooting out the top of the ceiling, and you have supported the Kemp-Roth on this date, I submit that you will have to answer at that time for your action today.

Mr. Speaker, I will vote for any tax cut that is combined with a responsible cut from the other side of the ledger and as this House well knows, I have consistently voted to cut spending. And, coming from a conservative district, voting a conservative pattern in this House, I know how tempting it is to you and to me to support this enticing political maneuver. But if we go down this route, we are doing a disservice to the people that we represent. I would urge that every single Member of this House think about that, not only for this November, but for the time in the future when you are going to have to answer for it. I urge the defeat of this motion for the best interest of this Nation.

Mr. KEMP. Mr. Speaker, I yield 4 minutes to the gentleman from Illinois (Mr. ANDERSON).

Mr. ANDERSON of Illinois. Mr. Speaker, the gentleman from New York has, of course, waged a tremendous personal campaign in behalf of the bill that forms the basis of the motion to recommit. But I know he is interested in far more than a personal victory. I can assure the Members on my left that what we on my side of the aisle are interested in this evening is not to administer a rebuke to the distinguished chairman of the committee, our friend and colleague, the gentleman from Oregon (Mr. ULLMAN), or to administer a rebuke to the President of the United States. What we are interested in, I say to my friends, is to bring a genuine victory to the American taxpayer. And this bill is not simply a reflexive, defensive reaction to Proposition 13, because anyone who has studied this matter knows that it was offered as a proposal far in advance of that recent phenomenon.

Mr. Speaker, a few moments ago we heard the distinguished Speaker of this House praise the Corman-Fisher substitute because of its tilt in favor of those who earn below the medium income of this country, which is about $17,000 a year. If we look at the tables that have been presented and distributed on the so-called Kemp-Roth bill, it clearly indicates that the largest percentage cuts are going to go precisely to that group, that the 90 percent cut is going to go to those in the adjusted income group of $8,000 income a year or less, that those making $17,500 a year are going to get a percentage cut of 37 percent in their tax bill. And without it, as we have heard

from the distinguished minority leader, instead of presenting a tax cut to the American people, they are going to discover very early next year that we have instead handed them a tax increase. And I suggest again, as I said under the rule, that those of you who are concerned about the impact of that $6 billion increase that is going to take place on January 1 in social security taxes, this is your chance now, by addressing the question of the marginal tax rate, to do something about those higher social security taxes. We heard in the debate on the Archer amendment on taxing capital gains that it was not going to do anything for the workingman in this country. Here in the motion to recommit, I report, is your chance to do something for every workingman and for every workingwoman in this great country of ours, by simply giving back to them some of the lost purchasing power that they have suffered since the decade began because of the increase that has taken place in the cost of living and the push that has put them in these higher tax brackets.

Now, you have the further question that we must address as to whether or not the reductions in marginal rates are going to destroy the discipline we need if we are going to control and check inflation. The answer ought to be perfectly clear. It is going to strengthen that discipline. It is going to force us to do what we should have been doing long ago to set forth more clearly the kind of spending priorities in this Congress we simply must have.

If you want to do something to repeal the cruelest tax of all—inflation; if you want to deal with this thief that robs us all—inflation; then I suggest that first you have to preempt the increase in tax revenues that is otherwise going to occur between now and 1983 when this proposal would be fully implemented. If that money—and I differ from the gentleman who just preceded me in the well; I would like to stand up here and believe that we can proceed to cut taxes and at the same time cut expenditures, but I think the lessons of my 18 years in Congress show me that we have got to proceed first to cut those taxes, and then we will have the enforced discipline to reduce expenditures.

Mr. Speaker, I urge support of the motion to recommit. I do so, because I think it is important that Congress pass a real, not an illusionary, tax cut this year. The Revenue Act of 1978, in its present form, will not stem the rising tide of inflation, it will not stop the relentless escalation of the Federal tax burden, and it will not give tax relief, as tax relief is understood by the American people.

This bill as it stands is a tax increase—a tax increase of at least $7 billion. If this motion to recommit fails, and the bill is passed as presently drafted, the headlines tomorrow may read "$16 billion Tax Cut Voted by the House."

But I say "caveat civis"—pronounced kēvis. Let the citizen beware. Let the taxpayer know that his or her tax burden will rise next year, and will rise again in 1980, and again in 1981—unless, and until this body acts in an honest and straightforward fashion to fully offset the pernicious effect of inflation on tax brackets and to fully offset all other Federal tax increases.

But will the taxpayer beware? Maybe the Revenue Act of 1978 is simply another example of the advantage of incumbency. Maybe you can vote today for an overall 1979 tax increase by voting against this motion to recommit, and then, if the motion to recommit fails, you can vote for final passage of the bill and still claim you voted for a reduction of Federal taxes. Maybe you can still go home and tell your constituents that you voted for a $16 billion tax cut for 1979, even though their real tax burden will rise again next year. Maybe, the voters will not understand that by voting against this motion to recommit, you were voting for a tax increase.

On the other hand, you could vote for this motion to recommit and be honest with the voters in your district. You could tell them that you voted for a tax bill that will actually reduce his or her Federal tax burden. After allowing for the increases in Federal revenues attributable to inflation and higher payroll taxes, the Kemp-Roth proposal will mean a modest but genuine net personal tax reduction of: $2 billion in 1979; $15 billion in 1980; $18 billion in 1981; $7 billion in 1982; and $1 billion in 1983.

That may not sound like much, but it is a bona fide tax cut. More importantly, if you vote for this motion to recommit, you will be voting for jobs. The steadily increasing marginal rates of taxation in this country have all but eliminated the real economic incentives to work harder, save more and invest more. As a result, capital formation is lagging far behind that which is necessary to maintain the pace of the Nation's recovery. When capital formation lags, job formation lags; and this country needs more jobs.

The unemployment rates in this country are intolerable. We have for too long endured the enormous social and economic cost of unemployment. We have a 6.2-percent overall unemployment rate, a 13.4-percent rate of unemployment amongst blacks and other minorities, and a 37-percent rate amongst minority teenagers.

According to the Chase Econometrics analysis of the Kemp-Roth proposal, it would reduce unemployment to 4.1 percent by as early as 1982. In other words, this is a "full employment" bill.

If you want the real Federal tax burden to increase, if you want the recovery to falter, if you are content with the present rates of unemployment, then vote against this motion to recommit. But if on the other hand, you want to vote for a genuine tax cut, if you want to maintain the momentum of the economy, if you want to move the Nation toward full employment, then vote for this motion to recommit.

Mr. ULLMAN. Mr. Speaker, I yield two minutes to the gentleman from New York (Mr. PIKE).

Mr. PIKE. Mr. Speaker, I say to my friends over here, I have marched with you on Archer, and I have marched with you against Blumenthal, and I have marched with you on your 2-percent cuts—and there have been times when I have marched on 2-percent cuts that you forgot to march on—but I am going to leave you now.

This motion should not be voted down; it ought to be laughed down. But really, it is not any laughing matter. It is a matter for weeping over.

We always have to have a tax cut in election year. Everybody knows we have a tax cut every election year, but weep, ladies and gentlemen; grieve; lament for the death of fiscal responsibility in the party of Calvin Coolidge and Alfred M. Landon and Herbert Hoover and Robert Taft. As a great American President once said, "If they were alive today, they would be spinning in their graves."

Fiscal responsibility has been replaced by political pie in the sky. We all know that the Republican party is in trouble, but we did not think in its death throes it was willing to sell its immortal soul.

Mr. KEMP. Mr. Speaker, I yield 1 minute to my colleague from Massachusetts (Mr. BURKE).

Mr. BURKE of Massachusetts. Mr. Speaker, I would like to show the House what the headline says today: "House Kills Social Security Tax Relief."

I said today that the action by the Rules Committee was an act of arrogance, arrogance of power. I am going to vote for the Kemp-Roth bill because it is the only show in town. It is the only show in town, and what the Republicans have done is, they have outmaneuvered the Democrats on every vote here today.

Now, those Members on this side of the aisle who are in close fights back in their district will have a chance to vote on this bill. The issues have been well drawn up. The Republican Party is in favor of tax cuts. Why, even Mr. CONABLE was in favor of rolling back social security taxes. We have not got a limb to stand on. I have only one, but for God's sakes, I am going to take care of it and I am going to vote for the Kemp-Roth bill.

Mr. ULLMAN. Mr. Speaker, I yield 1 minute to the gentleman from Virginia (Mr. FISHER).

Mr. FISHER. Mr. Speaker, I want to urge my colleagues to vote against this recommittal motion before us. I have taken a pretty good shot today, but this is another round, and I think it would be just the wrong thing to do, to vote for this motion. The Kemp-Roth proposal calls for far too much of a tax cut, to the point of being irresponsible.

It would be a very high-risk adventure—too high for the American people to want to take. It most likely will be extremely inflationary. It most likely will lead to severe, very severe program cuts or to more borrowing and high deficits, or both.

The only way that Kemp-Roth can work the way its advocates say it will work is for the economy to be so stimulated, without inflation, that vast in-

creases in tax receipts will offset the tax rate cuts. I give this result about a 1-in-5 or 1-in-10 chance.

By a strange inversion the Republicans in the House have become the economic radicals by advocating this risky, far-out proposal.

Vote against this motion and for final passage of the committee bill.

Mr. KEMP. Mr. Speaker, I yield 5 minutes to my colleague, the gentleman from Michigan (Mr. STOCKMAN).

Mr. STOCKMAN. Mr. Speaker, I have listened very carefully to this debate and obviously the only serious argument that can be made against this recommittal motion is the argument that it would be wildly inflationary and send the economy into a tailspin from which we could not recover.

As the gentleman from New York (Mr. CONABLE) points out, a tax cut per se does not necessarily cause inflation. That outcome will only occur if a number of things happen in between. The problem in the debate today is we have heard nothing about those steps that have to happen in between in order to get this dire outcome.

First and foremost, if we are going to have runaway inflation, we have to have runaway growth in the money supply.

The gentleman from Ohio (Mr. VANIK) said that a while ago. Mr. Heller, I think, would agree also.

Now, the Federal Reserve Board is not composed of a bunch of wild-eyed disciples of William Jennings Bryan. It is composed of responsible bankers, businessmen, and economists, and they are not about to accelerate money growth at that rate, unless the credit demand so exceeds the credit supply that the only alternative to this kind of policy is a devastating interest rate crunch.

So the real question about whether or not Kemp-Roth will have a wildly inflationary impact is simply what will it do to the credit demand and to the savings supply in the next 3 years.

If we look at credit demand, that obviously depends on the rate of Federal borrowing and the size of the deficit. That is where any major increase in credit demand would come from.

What has been overlooked time and time again in this debate is the size of the Federal deficit is not determined solely by the Federal revenue level, but it is a residual from a number of factors.

First, the actual size of the deficit that has to be financed will result from the expenditure growth trend that we have in the next 3 years. In the last 5 years it has risen at 12 percent, in nominal terms. We have had a 6-percent real growth rate even when we discount for inflation. That does not have to occur over the next 3 years. The American people do not want it. That is clear from California a few months ago.

The fact is that we have 3 years and we will have 3 budget resolutions and we will have 45 appropriations bills which will give us an ample opportunity to begin to hold the real growth rate of Federal spending to 3 percent, 2 percent, or even zero. And if we did that, we could still permit all the existing programs to continue, and we would not have to penalize anybody or cut anybody off a grant or even fire one Federal employee. We just have to restrain the real growth rate.

Second, the deficit level will be a function of Federal revenue, which in turn is a function of the tax rate and the size of the tax base.

If we reduce taxes by 30 percent, there will be a reduction in revenue, but the economic base which we will tax, that economic base will be higher.

We can argue all afternoon about how much the response will be, what the elasticity is, but if you argue there will be a zero response, no increase in production and no increase in work effort and no increase in the supply factors that make production possible, then you are on a collision course with commonsense.

If we lower the top marginal tax rate from 70 percent to 50 percent, there will be a substantial amount of money coming out of the tax shelters and the municipal bond markets and it will go into taxable investments, and that means we will have more income and production to tax, and that will raise revenue.

If we lower the marginal tax rate by 30 percent, there will be some increase in the number of entrepreneurs who will be willing to break out of the IBM's of the world and start their own companies, and there will be an increase in the number of doctors who will want to get off the ski lifts and back into their operating rooms.

There will be at least some increase in the number of research and development studies that come off the drawing boards and get into production. You will get some salesmen who are willing to work more hours. You will get some farmers who are willing to put in more acreage. You will get some retailers who are willing to work extra hours. And you will have some workers who will be willing to take on more overtime at lower marginal rates. So, in short, you are going to get more production.

It does not take a lot of extra production to get a substantial revenue impact. If we get about a one-half of 1 percent increase in national production, it will raise Government revenue by $40 billion a year. I do not think it is unreasonable at all to think that with a 33-percent decrease in marginal income tax rates we will not get a half of 1 percent increase in production.

Finally, and hopefully, a deep tax reduction would substantially increase the supply of savings and money in the economy.

First, there is the income effect. Kemp-Roth reduces taxes by $100 billion, and that means at least a $25 billion increase in supply of savings because that is the aftertax net savings rate.

There will also be a price or incentive effect: this measure reduces taxes on savings by one-third because the income tax is the only tax we levy directly on savings. That effect will further augument the savings supply in credit markets.

In short, with expenditure resistant and the feedback revenues, the deficit does not have to exceed $40 billion during the next 3 years. With a substantial increase in savings supply, there will be no credit inbalance, no pressure on the Fed to pump up the money supply, and no additional inflation.

Mr. ULLMAN. Mr. Speaker, I yield 2 minutes to the gentleman from Missouri (Mr. GEPHARDT).

Mr. GEPHARDT. Mr. Speaker, to my colleagues on this side of the aisle I would say that unlike OTIS PIKE, I have not been marching with you at all this afternoon. But I do not think you need me to march with you now because I do not think this is a war you really want to win.

To my colleagues on this side of the aisle I would say that many of you are disappointed on the votes on many of the amendments, I certainly am, but I am going to vote against Kemp-Roth and for this bill. Because, when you analyze the bill, it does call for a moderate responsible tax cut that I think most people can justify.

The arguments against Kemp-Roth have been made and made very well. But, let me sum up by quoting Dr. Walter Heller, who has been quoted by our fine colleague, the gentleman from New York (Mr. KEMP) as the man who thought up Kemp-Roth back in the early 1960's.

He said this about Kemp-Roth:

> To summarize, then, nothing in the history of tax cuts, econometric studies of taxpayers responses, or field surveys of incentives suggests that the effects of a big tax cut on the supply of output even begin to match its effects on the demand for output. A $114 billion tax cut in three years would simply overwhelm our existing productive capacity with a tidal wave of increased demand and sweep away all hopes of curbing deficits and containing inflation. Indeed, it would soon generate soaring deficits and roaring inflation.
>
> One wonders whether these considerations are not beginning to generate some self-doubts, as they should, in the Kemp-Roth camp. Disarmingly, Laffer, as their "economic guru," recently told Newsweek: "There's more than a reasonable probability that I'm wrong. But . . . why not try something new?"

Why not? One reason might be that in getting the Republican Party on the Kemp-Roth hook, he may be leading it over a cliff.

Mr. Speaker, I would suggest that we save the Republican Party from itself and save America from an economic disaster. I urge a vote against Kemp-Roth.

Mr. ULLMAN. Mr. Speaker, I yield 1 minute to the gentleman from Arkansas (Mr. TUCKER).

Mr. TUCKER. Mr. Speaker, I want to say to my colleagues that although I have not been very successful on several issues today and I am disappointed about it, I intend to vote against the Kemp-Roth proposal.

Kemp-Roth was not brought up in committee. Neither was the Corman-Fisher amendment. It was not subjected to cross examination. No questions were asked about it. It was an issue that simply was never discussed in the Committee on Ways and Means. It makes one wonder how interested in passage the Republicans really are.

Mr. Speaker, it is not a responsible ac-

tion to support Kemp-Roth. It is dangerous for the country, and is dangerous for the economy. It is a little bit like putting on a pair of homemade wings and jumping off a cliff. If the wings happen to work, it is a wonderful, thrilling experience. If the wings do not work, it is an absolute disaster.

We are the majority party. We cannot afford to run that kind of risk with our economy, with our people, with our country.

Mr. Speaker, I urge the Members to vote against the motion to recommit.

Mr. ULLMAN. Mr. Speaker, I yield 1 minute to the gentleman from New Hampshire (Mr. D'AMOURS).

Mr. D'AMOURS. Mr. Speaker, I share the anger which was expressed earlier by my good colleague, the gentleman from Massachusetts (Mr. BURKE). I, too, am angry because we were unfairly prevented from voting to relieve both employers and employees from the burden of social security taxes. Let us remember that one of the reasons we wanted to do something about social security is the inflationary impact we feared those rises would bring us.

Mr. Speaker, what we are talking about here is inflation. Just because we failed to curb the inflationary impact of social security let us not compound that mistake by increasing inflation in other areas.

The Kemp proposal adds a $115 billion increase to the deficit by 1982.

The gentleman from New York (Mr. KEMP) says, "Don't worry that will not happen. I have a theory."

We in New Hampshire are conservative, just as they are in the State of the gentleman from Georgia (Mr. JENKINS). My people know that the time to economize is when they give you the menu, not when they hand you the bill.

Mr. Speaker, that is what they are asking us to do. I was amazed to find it out. I checked it, and it is absolutely true. As the gentleman from Missouri (Mr. GEPHARDT) says, Mr. Laffer himself, the author of this economic theory has said, "There is a good probability that it won't work."

Mr. Speaker, that is what we are being asked to vote on, so I would ask the Members to join those who really want to fight inflation and get to a balanced budget by defeating this motion to recommit.

Mr. ULLMAN. Mr. Speaker, I yield 1 minute to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Speaker, I have decided to support final passage of the committee bill, as it has developed to this point and therefore to oppose the motion to recommit. In light of the fact that a year ago I cosponsored the proposal offered by the gentleman from New York, I feel that I should take a few minutes to explain my decision to oppose the motion before us.

Before I do so, I want to say that I sincerely appreciate the fact that Mr. KEMP introduced his proposal and has so forcefully advocated tax cuts over the last year. His proposal has undoubtedly played a key role in emphasizing the need for a tax cut and in focusing the debate on how large a cut is in order. I cosponsored the bill a year ago, but subsequently changed my mind for the following reasons:

The economic picture today is much different than it was a year ago when I agreed to cosponsor his bill. Last year, the inflation rate was running at 6 percent; today inflation has reached 10.4 percent. I think we have all agreed that inflation is the Nation's No. 1 problem. And most major economists have come to the conclusion that a cut of the magnitude proposed in the Kemp-Roth bill would add significantly to the budget deficit and therefore to inflation. There is just no way that I can let myself be a part of worsening inflation which would be the case if I supported this motion.

Furthermore, the changes that have occurred in the economy since I came to Congress not yet 2 years ago have made me realize that it would not be wise to decide today what would be an appropriate level of taxation 2 or 3 years hence. We all know how long it took to get the tax bill before us to the floor, and I certainly do not think it makes sense to take a chance of tying ourselves into potentially irresponsible tax cuts a few years down the road when it is so difficult to undo decisions by means of the legislative process.

If a further tax cut is needed in the next few years, you can be sure that there will be pressures, just as effective as those exerted over recent months, for one to be approved. And the realities of the political process make it highly likely that a cut would be approved. On the other hand, I seriously doubt that an increase in taxes, to compensate for an unwise reduction now, could be readily brought to the floor or enacted. In light of that fact, I think we should take a prudent course at this point and only consider tax cuts that effect time periods for which we can predict the economic situation.

In closing, I think the level of the tax cut we approve should reflect the level of cuts which can be achieved in the Federal budget for the same period of time. Otherwise, we will only be adding to inflationary deficit spending. The second concurrent budget resolution which we will be considering shortly includes a deficit which is $16.9 billion below that included in the President's budget proposal. Therefore, I think the tax cut proposed in the bill before us—which is comparable to the cuts we have made in the budget, is a prudent and wise one. I agree with Milton Friedman, who said:

> If Kemp-Roth were enacted without a simultaneous reduction in government spending the deficit would, at least initially, go up—and so would these hidden taxes. Lower explicit tax rates would foster efficiency and output, but higher hidden tax rates would encourage the waste of human energy and financial capital.

We should have as our highest priority the reduction of our budget deficit, the formation of capital through properly targeted tax measures, responsible tax cuts for all Americans, and the death of inflation.

Mr. ULLMAN. Mr. Speaker, I yield 1 minute to the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Mr. Speaker, it occurred to me when I listened to some of my colleagues on this side of the aisle that there was some inconsistency in the position taken by three out of the four speakers on behalf of Kemp-Roth.

I dug out the CONGRESSIONAL RECORD of May 10. It is 3 months to the day. I looked at the names of those who voted to balance the budget. Lo and behold, three of the speakers, including the prime mover of this motion to recommit would have us balance the budget in the next fiscal year. That was just 3 months ago.

Mr. Speaker, I find it totally incomprehensible that they would today be talking about a measure that would increase the budget deficit by between $30 to $50 billion.

I urge my colleagues to defeat an economic proposition that could be disastrous to our country at this time. Thank you.

Mr. ULLMAN. Mr. Speaker, I yield 3 minutes to the gentleman from Oklahoma (Mr. JONES) a member of the committee.

Mr. JONES of Oklahoma. I thank the chairman for yielding.

I rise in opposition to the Kemp-Roth bill. Let's be clear about what is the issue. The issue here is not the Laffer Curve. The Laffer Curve makes some sense. At some point, yes, you tax too much; you decrease revenue; you decrease productivity. But the issue before us today is what is the proper balance of a tax cut versus a budget deficit that will not exacerbate inflation and create even deadlier taxation.

Of all the witnesses—and there were many—who came before the Committee on Ways and Means, the great preponderance encouraged us to have a tax cut right in the area of the $15 billion—$16 billion that the committee is proposing to the House of Representatives. None of them, to my knowledge, recommended that during the 1979 fiscal year we borrow $28 billion to $30 billion just so we could go back home and say, "Look what we have done for you in a tax cut."

Marty Feldstein, who is a Harvard professor of economics and chairman of the Bureau of National Economics Research, and who is as much responsible for the content of the committee bill as anyone off the committee, recommended the size tax cut that we have here today and supported most of the component parts. If we increase this size, I think we are going to increase the inflationary pressures. That is something that our colleague, the gentleman from Georgia (Mr. JENKINS) says we are going to have to answer for—not in this election but in the next one.

Among the groups who are recognized as fiscally responsible and conservative and who are supporting the committee bill down the line without any exceptions, with no amendments, are: NFIB representing small business, the Coalition for Capital Formation, the NAM, and even the Chamber of Commerce says that they do not support such a tax cut without a corresponding cut in spending.

We do not have a corresponding cut in spending here.

I would commend to those who have not read it the August 7, 1978, Business Week editorial. Business Week pretty well speaks for the conservative viewpoint in the business community. I am going to quote from part of that editorial. It says:

> The Kemp-Roth proposal . . . would be a completely irresponsible way to approach the federal budget problem, and it would generate an inflation that would destroy the value of the currency. . . .
>
> Kemp-Roth would add $100 billion to a deficit that is already dangerously swollen. It would touch off an inflationary explosion that would wreck the country and impoverish everyone on a fixed income.

I urge everyone to vote against the Kemp-Roth amendment.

● Mr. SEIBERLING. Mr. Chairman, the events of recent days, culminating in the rejection just now of the Corman-Fisher amendment, make a mockery of both tax reform and fiscal responsibility.

We are about to participate in the act of cutting the Federal income tax—which has been a progressive tax based on ability to pay—after having provided last year for an increase in the social security payroll tax—which is a regressive tax, the burden of which falls heaviest on the lower and middle-income workers. Worse yet, the cuts in the Federal income tax will be skewed in favor of the wealthy and against the lower and middle-income workers.

Not only will this bill produce tax reform in reverse, but by reducing the Federal revenue by a total of $16 billion in 1979 and $20 billion in 1980, will make it difficult, if not impossible, to undertake meaningful tax reform legislation next year. If the Corman-Fisher substitute had passed, it would have provided enough reform so as to justify the loss of revenue and resultant increase in the projected deficit. But certainly this bill cannot be justified from either standpoint.

As our colleague, Mr. VANIK, has so aptly pointed out, since the tax cuts in this bill will be paid for through additional treasury borrowing equivalent to the revenue loss, it must be expected that such increased deficit borrowing will bring about an increase in inflation. Every 1-percent increase in inflation costs the average family $300. So it is entirely likely that the increase in inflation will more than wipe out the tax cut of $115 which the average family will receive from this rich man's legislation.

The Vanik-Pickle substitute, while it would not have produced any additional income tax cut, would have eliminated the inflationary pressure that this bill would create. It would also have preserved for next year the possibility of tax reform, particularly the option of reducing the social security payroll tax, either by providing for part of the social security burden to be paid from the general revenues or by a tax credit, such as the one I introduced last year or the Gephardt amendment. We could not even vote for Gephardt, because the Rules Committee made the amendment out of order.

Mr. Chairman, about all I can say for this bill is that it is better than the Kemp-Roth substitute which, if it were adopted, would send our economy into double-digit, double-decile inflation of a kind this country has not experienced in over 100 years. The Kemp-Roth bill should be recognized for what it is—a cynical hoax.

Mr. Chairman, the final irony is that most of those who have been sponsoring this kind of tax relief for the wealthy, with all of its regressive and inflationary features, are the very same group who have been proclaiming their opposition to deficit spending. They are also in the group who this week voted for the $119 billion military appropriations bill—the highest military spending bill in history—which far exceeds even the huge deficits of the last several years. They even voted against cutting it eight-tenths of a percent.

Mr. Chairman, we should vote down both the committee bill and the Kemp-Roth substitute and send the Ways and Means Committee back to do a better job for the American people.●

GENERAL LEAVE

Mr. ULLMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks on the bill H.R. 13511, and all amendments thereto, and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. ULLMAN. Mr. Speaker, the majority leader will conclude the debate, and I would ask the gentleman from New York (Mr. KEMP) if he would conclude his debate at this time.

Mr. KEMP. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. Mr. Speaker, I rise in strong support of the Kemp motion to recommit the bill with instructions to reduce individual income tax rates by 33 percent over the next 3 years. This would provide real tax relief to our citizens.

Everywhere I go the message is clear. Americans are fed up with high taxes. They are tired of watching the Government walk away with so many of their hard-earned dollars.

I can certainly understand this concern. Simply put, Americans are being taxed to death.

The average person now finds that approximately 34 cents out of every dollar he or she earns is going to pay Federal, State, and local taxes. In other words, for every 8 hours of work, 2 hours and 45 minutes are spent working for the Government.

This is intolerable. For too long our Government has been obsessed with a tax, tax, tax and spend, spend spend mentality. Federal spending has increased by leaps and bounds, while inflation and high taxes have followed right along. It is time to reduce spending and cut taxes.

That is why I have been a cosponsor of the Kemp-Roth Tax Rate Reduction Act. And that is why I support the Kemp motion to recommit today. It would provide real tax relief to millions of overburdened Americans.

Ironically the committee bill does not really provide for a tax cut at all. If adopted, most Americans would still pay more taxes next year than they do now. The Joint Committee on Taxation has stated the so-called tax cut bill approved by the Ways and Means Committee would not make up for the higher social security taxes and the tax increases caused by inflation.

The Kemp motion to recommit with instructions, however, is what our overtaxed citizens need.

During the next 3 years it would reduce individual income tax rates by approximately one-third. These lower rates would be of great assistance to working men and women. More money would stay where it belongs—in people's pockets.

Liberals attack tax cuts. They have tried by spending for three decades to solve our problems. They have done little more than cause the problems. It is time to try the opposite theory. Reduce the taxes and let the American people save, invest, spend—make their own decisions. That is the issue. Liberals have had their day. Now we must allow the taxpayer to have his day.

Americans are being taxed too much. They need tax relief. Government should be working for the people, not the other way around.

Mr. KEMP. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Speaker, I rise in support of the Kemp motion to recommit the bill to the Ways and Means Committee with instructions to report it back to the House containiing an amendment reducing individual income tax rates by an average of 33 percent over the next 3 years.

Before advancing my reasons for urging your support, I believe we all must recognize what is taking place in the House today. Once again, we are being prevented from voting directly on the merits of popular and needed legislation—the Kemp/Roth bill.

The betrayal of a promise to permit the Kemp/Roth bill to be offered as an amendment is another example of the imperial House leadership thwarting the will of the elected representatives. All of us were elected ostensibly to represent the interests and views of our constituents. There can be little doubt that our constituents are interested in slashing the inordinate Federal tax burden and, to forestall a direct vote on the Kemp/Roth bill, is an effrontery that should not be condoned.

This legislative shellgame of preventing votes on major issues is an unfortunate hallmark of the 95th Congress. I ask each Member to assess honestly what he intends to do for his constituents in passing a real tax cut—a cut that will effectively improve each family's purchasing power. If there is to be a realistic tax cut then it is important that all fair-minded Representatives, at least, permit the tax bill to be recommitted with instructions to reduce rates

by an average of one-third over a 3-year period.

I further support this motion because I recognize that the average taxpayer in America is losing his stake in the future. Each year the Government takes more and more of his earnings with no resultant benefits. The taxpayer is no longer improving his standard of living but being impoverished solely as a consequence of mounting taxes and inflation caused primarily by excessive Government spending. Taxpayer resentment is shown in a recent Associated Press/National Broadcasting Co. poll which gave the Federal income tax the most negative rating of any of the listed taxes.

Recession is threatening. Inflation is speeding up. Runaway Government spending has eroded confidence in the dollar both at home and abroad. Government efforts to improve our economic picture have failed. I strongly believe that it is time for an honest and forthright tax cut, not a cut based on restricting or expanding some favored tax deductions.

The legislation we have been discussing today offers the taxpayer some hope of improvement, especially the section dealing with capital gains indexing. But even if the bill is enacted, almost every American taxpayer will face a tax increase next year.

According to the Joint Committee on Taxation, the bill will not even offset the new social security taxes, the automatic boosts into higher tax brackets as wage-earners try to catch up with inflation, nor the anticipated rises in energy taxes should the administration's energy bill be enacted. In fact, unless taxes are substantially reduced, American taxpayers will be paying approximately $100 billion more in taxes per year 5 years from now than they are today.

Our Nation needs a real tax cut to offset these huge tax increases and reduce the tremendous tax burden on the working men and women of this country. The Kemp-Roth bill is just such a tax cut—one that can restore incentive to our stagnant economy and create real economic growth and meaningful new jobs.

As a cosponsor of the Kemp-Roth bill, I urge all Members of the House to support the motion to recommit H.R. 13511 with instructions. Congressional action is long overdue. Real tax relief has been promised and promised but never produced. Today, we can keep these promises and I hope the motion to recommit is adopted.

Mr. KEMP. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. HARSHA).

Mr. HARSHA. Mr. Speaker, I rise in support of the Kemp-Roth tax reduction bill. A bill which I have cosponsored.

President Carter has done everything possible to avoid giving middle income Americans a meaningful reduction in income taxes. He was goaded into action in the beginning only after congressional reaction to the huge social security tax increase was signed into law. Those Members who had supported the largest tax increase in history were feeling the heat from the folks back home, and eventually President Carter opened his eyes to the growing taxpayer revolt as well.

His initial proposal was a $25 billion tax cut. Then, he reduced his recommendation to a $15 billion tax reduction. However, the Ways and Means Committee reported a package calling for a $16.2 billion cut. While I will vote for this it is totally inadequate. Then the President changed his mind again and decided to "compromise' and support an $18.1 billion tax cut.

Yet, after all is said and done, none of President Carter's proposals, which have shifted like the sands of the Sahara, are sufficient to offset the Carter administration's social security tax increase.

If the President has reservations about returning to the taxpayers some of their own money, he apparently has none about giving American tax dollars away as foreign aid.

President Carter proposed a record $8.4 billion foreign aid program for fiscal year 1979, which the House Appropriations Committee reduced to $7.3 billion. Even that figure is $614 million above the fiscal year 1978 funding level.

Still, the administration was asking for $800 million more than it did for fiscal year 1978, and $1.7 billion more than was actually appropriated for fiscal 1978.

I fail to see how returning $8 billion in tax cuts to the already over-burdened American taxpayer is inflationary and giving away $8 billion in foreign aid is not inflationary. This administration's logic is difficult for the taxpayer to accept.

Furthermore, the purchasing power of the U.S. dollar has fallen roughly 30 percent since 1970, marginal tax rates have increased by about 33 percent. The Kemp-Roth bill, which lowers rates by about 33 percent in 3 years is not taking revenues from Government, it is just returning to the American people what has been taxed away due to inflation. Inflation caused primarily by the spending policies of this government and the Congress.

It is time the American taxpayer was given a break. If there is any belt-tightening to be done why not stop foreign aid for a year an let these foreign nations, most of whom detest us, do without our largesse. I urge my colleagues to support the Kemp-Roth amendment and give the American taxpayer a break for a change.

Mr. KEMP. Mr. Speaker, I yield such time as he may consume to the gentleman from Louisiana (Mr. LIVINGSTON).

Mr. LIVINGSTON. Mr. Speaker, I wish to speak today in favor of the motion to recommit this bill with instructions to include in it the Kemp-Roth plan for tax rate reduction.

I believe, Mr. Speaker, that the people of this country have simply reached the end of their patience with our overwhelming tax burden. And I believe they deserve relief.

The Congress has for too long ignored the ordinary, working, middle-class person in America. And, what is worse, the Congress has felt it necessary to think for that peron, to decide what he really wants from his Government, and to decide that he wants to give a huge share of his income to support that Government.

The Congress has seemed to feel, for a number of years, that the pockets of the American taxpayer were bottomless pits.

A letter I received recently from a Mr. Williams of Metairie, La., put the case this way:

> My wife and I both have worked for a salary for 25 and 30 years respectively and we consider ourselves average and certainly not rich. It is obvious that the government considers us rich by the taxes extracted from us and we wish to bring this difference of opinion to your attention . . .
>
> We ask your earnest consideration of first, budget reductions, and second, tax reductions, as soon as possible. This tax rate is certainly destroying our incentive to work any harder and creating many thoughts about how we can quit work and quit paying such tax rates.

I could not agree with Mr. Williams more. High tax rates do destroy incentive. In order to encourage incentive we must cut those tax rates, and stimulate the economy while reducing the overwhelming load presently being borne by middle America.

My distinguished colleague and good friend, JACK KEMP, was in the vanguard of this movement. He had the foresight to propose this tax cut several years ago—but then it was considered a wild idea. Today it is an idea whose time has come.

The American people have simply realized that, not only is a large percentage of their income going to the Government, but in addition, they are not getting their money's worth.

Not long ago a Wall Street Journal editorial pointed out that it is very difficult for a citizen to actually see the services he gets from the Federal Government. He cannot measure the value of the Department of Agriculture or the Department of Commerce.

The editorial points out that when a taxpayer begins to get unhappy about his taxes, he begins to ask questions about what kinds of service he is getting. And the editorial concludes that the answers Government is providing to those questions are not at all satisfactory.

Our taxpayers are not getting their money's worth. And they are not being allowed to enjoy the product of their labor. As a result, they do not have the incentive to work harder, if in fact they have the incentive to work at all. The American Dream has become distorted. The goal of an American no longer is how much one can do to better himself and his family, it has become how little he can do, just to avoid the interference of Government meddling in his life.

And that's what the Kemp-Roth plan would do—give our people the incentive to again produce, and thereby induce more production, more jobs and a bigger, stronger, healthy economy.

This plan is good for the country—it is what we need right now, this year, today, in order to stimulate the economy, reduce unemployment, and simply give our people a breather.

I support this plan to cut tax rates. I have supported it since the first day I was sworn into office. And I want to urge my colleagues to vote to recommit this bill and bring it out with a tax rate cut that will give the American economy—and the American people—the

boost that they so desperately want and need.

Mr. KEMP. Mr. Speaker, I yield such time as he may consume to the gentleman from Utah (Mr. MARRIOTT).

Mr. MARRIOTT. Mr. Speaker, I rise in support of the Kemp-Roth bill.

Mr. KEMP. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. LENT).

Mr. LENT. Mr. Speaker, I rise in support of the motion made by the gentleman from New York (Mr. KEMP). The cuts contained in the tax bill, as reported, are woefully inadequate. It is tragic that the House leadership reneged on a commitment to permit a direct vote on the Kemp-Roth tax cut amendment. I commend my colleague from New York, (Mr. KEMP) for the fortitude he has displayed in an effort to provide the House an opportunity to vote on his amendment through this parliamentary device of a motion to recommit the bill with instructions to report the bill back with an amendment to section 101 reducing individual tax rates across-the-board by an average of 33 percent, over a 3-year period.

A recent Lou Harris poll found 70 percent of the American population convinced that "taxes in this country are unreasonable," and 66 percent sharing the feeling that taxes had "reached the breaking point."

Kemp-Roth is an honest, direct, commonsense program to bring real and significant tax relief to everyone who pays Federal income taxes. It is far, far more equitable and far, far healthier for the Nation's economy than anything that has yet come out of the Carter administration's ever-changing laundry list of tax proposals.

The Kemp-Roth bill provides for across-the-board reductions in tax rates. Sixty-five percent of those reductions would go to families making $30,000 a year or less, most to middle- and low-income families.

If enacted. the Federal tax rate for a family of four with an income of $15,000 a year would drop from $1,380 to $852. A family of four earning $17,500 a year would have its Federal tax liability reduced from $1,745 to $1,092. A family of four earning $20,000 would have its tax burden reduced from $2,180 to $1,388.

Most important, the reduction in tax rates would give all Americans more real disposable income in return for their work and productivity instead of simply pushing them into higher and higher tax brackets for only the tax collector's benefit and no real gain in disposable income.

Additionally, every income group benefits from the tax rate reductions in proportion to the share of Federal income tax payments it is presently making. What could be fairer?

Now let us examine the unsubstantiated claims that the Kemp-Roth bill would double the budget deficit, overheat the economy, and that it would be only a question of time until essential services are slashed.

Well, essential services will not be slashed under Kemp-Roth. Nor would Kemp-Roth double the budget deficit. An econometric study, prepared by respected economist Norman Ture, shows the Kemp-Roth Tax Reduction Act should generate enough new tax revenue to reach a balanced budget (no deficit) within 2 years, and would produce a $42 billion surplus after the third year. And Kemp-Roth can do this without one cutback in existing programs. In fact, the Ture projection assumes annual increases of 10 percent in spending for current programs.

There is a good solid record of experience to back up the Ture study predictions. I point to 1963, the Kennedy tax cut year, which saw Congress approve almost as big a reduction (in percentage of tax revenues) as is called for in the Kemp-Roth bill. When the reductions took effect in 1964, the unemployment rates and the percentage of use of industrial capacity were almost identical with what they are now. Taxes were heavy then. President Kennedy said at the time: "The main block to full employment is an unrealistically heavy burden of taxation. . . ." Taxes are higher today. The Treasury Department experts made the same dire predictions of heavy deficits that we are hearing now.

What happened? As Dr. Walter Heller, main architect of the 1963 tax cut testified in 1976, the Kennedy tax cut had a "multiplier effect on the economy. It was the major factor that led to our running a $3 billion surplus by the middle of 1965, before escalation in Vietnam struck us."

That "multiplier effect" will work on the economy when the Kemp-Roth Tax Reduction Act takes effect, because our bill restores incentive to the worker, saver, and investor in America. Our bill is an incentive-oriented tax cut. By lowering tax rates (not only on personal incomes, but also for corporate and small businesses) more money would be available for businesses, services, and industries providing more incentive to hire more workers and to expand. Individuals and families will have more money and therefore more incentive to make more purchases and more to put aside as savings or to invest thus encouraging further investment in expansion of business and industry and providing new jobs and greater wage opportunities.

Each expansion of business and industry and each new job produces its own ripple effect on the national economy, bringing yet additional business and jobs to those who supply the raw material, tools, equipment, and construction needed for expansion. In turn, every supplier then adds his own share of additional business to those he deals with, producing still more demand and more new jobs. Each new job means a new customer, and each new customer means still more business. And—this is a vital point—each business expansion, each added sale, each new worker means added tax revenues to the Government, even with the lower tax rates. So total revenues go up.

That is how the restoration of incentive will work, as each dollar freed from the tax collector goes to work in the national economy. It is a powerful force. And because Kemp-Roth encourages savings and investment and retained earnings by families and by businesses, it is not inflationary. It is self-financing.

One other very important point: Unless there is a substantial tax reduction now, there will be a real increase in Federal taxes next year, due to a sharp rise in social security taxes, and inflation forcing taxpayers into higher brackets. The miserly $15 billion tax "reduction" plan proposed by President Carter will actually result in a net increase in Federal taxes for nearly all families. The increase in social security taxes, and the effects of inflation would outweigh the small decreases provided in the Carter program.

No matter how you look at it, the Kemp-Roth Tax Reduction Act is good. It eases the heavy tax burden on every taxpayer. It encourages investors and businesses to expand and creates new jobs. It lessens the welfare burden and the cost of Government. It encourages savings to help further expansion of the economy. It builds a larger Federal revenue base. Is it any wonder that 170 members of Congress—Democrats and Republicans—have joined in sponsoring this sound blueprint for the future?

I urge my colleagues to give their support to this fair and realistic tax rate reduction plan by voting in favor of the Kemp recommittal motion.

Mr. KEMP. Mr. Speaker, I yield such time as he may consume to the gentleman from Tennessee (Mr. QUILLEN).

Mr. QUILLEN. Mr. Speaker, I am a cosponsor and firm supporter of the substantial reduction in individual income tax rates that is contained in this motion to recommit, and I urge its adoption. The tax bill we have been debating all day is basically a good tax bill. It reduces business taxes and it reduces taxes on capital gains. This is fine as far as it goes, but it fails to cut individual income tax rates for the great majority of the American people.

We must stand up for the people who sent us here to represent them and vote for this tax rate cut of 33 percent over the next 3 years. This will adjust the tax rates to offset the terrible ravages of inflation that have occurred since 1970.

The tax bill reported by the Committee on Ways and Means will not even offset the new social security tax increases, which I voted against but which are going into effect next January, nor will that bill offset the automatic tax increases that are caused by inflation.

We need a real tax cut to offset these huge tax increases and reduce the heavy tax burden on the working men and women of this country. A vote for this substantial tax rate reduction is a vote for incentive and enterprise, a vote for thrift and savings, a vote for creating real economic growth and meaningful new jobs, a vote for bringing pressure to bear to reduce the rate of growth in Government spending, a vote for letting people keep more of their own money and for forcing Government to have less of it. It is a vote for the American people.

People do not work and save to pay taxes. They work and save to have some

money left after paying taxes so that they can spend it as they wish. Let us give them a chance to do this—it is their money, not the Government's.

Now is the time for action. The American people are ground down by high taxes and they cannot wait any longer for real tax relief. They want tax relief now and they should have it.

Mr. Speaker, I urge the adoption of the motion to recommit.

Mr. KEMP. Mr. Speaker, I yield such time as he may consume to the gentleman from Oklahoma (Mr. EDWARDS).

Mr. EDWARDS of Oklahoma. Mr. Speaker, I stand in strong support of this amendment, of which I am a cosponsor.

Mr. KEMP. Mr. Speaker, the debate over the Kemp-Roth legislation during the past year and the debate here today has been healthy.

Several comments: Business Week says Kemp-Roth is dangerous; that it is irresponsible to lower the tax rates of the American people. But Business Week believes that "the business of America is business," to quote someone else, when the business of America is confidence that there will be opportunity to attain the American dream. It is also living without an inflation rate of 10.4 percent and an unemployment rate of 6.2 percent.

If there is anything dangerous in and to America, it is letting inflation continue to increase the taxes of the people by $332 billion over the next 5 years, $262 billion even with the committee bill. That is dangerous to the American people, to their economy, to their way of life. Economists and certain political figures used to say it could never happen: that you could have high unemployment and high inflation at the same time. Well, we have it today. The bitter lessons of the last 10 years should convince all of us that inflation is no answer for unemployment, and unemployment is no answer for inflation.

Raising the taxes of the American people is not the way to fight deficits. Expanding the tax base through lower tax rates is the way to end deficits. Raising the taxes of the American people is not going to stop inflation, not without destroying the people's incentive first. It is the burden and prospect of increases in taxes that is both crowding out investments and opportunities for unemployed and underemployed people.

The committee bill, by not going far enough to reduce the tax burden by reducing rates, suggests that our country can continue down this same road of simultaneous high inflation and high unemployment. Why is it—that policy—going to produce a different result in the future than it has in the past and present?

Where is the answer to that type of problem? It has not come from those who are critical of the Kemp-Roth plan.

If you look at the entire world today, not just the United States, you will find a very direct and positive correlation between tax rates and production. Where there are low tax rates there is higher production. West Germany does not have a capital gains tax, and it does not have any tax rate over 48 percent; yet it has the lowest rate of inflation and the lowest rate of unemployment in the industrialized West.

As my friend, the gentleman from New York (Mr. CONABLE) has said, that all tax cuts are not created equally. We are not suggesting that you have tax cuts so people can buy more television sets, although the American people have a right to more disposable income and to use it as they wish.

Let me use the brief time remaining to respond to several of the points raised in today's deliberations and the consideration of Kemp-Roth.

First, the individual income tax rate reductions which Kemp-Roth would bring about are staggered over 3 year's time.

On January 1, 1979, the present 14 to 70 percent range in marginal tax rates would be reduced to 12 to 63 percent. On January 1, 1980, they would be reduced to a range of 10 to 56 percent. And on January 1, 1981, they would be reduced to 8 to 50 percent.

And they are designed to give the greatest percentage break to those at the bottom end of our income ladder:

Reduction in marginal tax rates under Kemp motion to recommit

Present marginal tax rates	Under Kemp motion to recommit	Percent reduction in rates
14	8	43
15	9	40
16	10	37
17	11	35
19	13	31
21	15	28
24	17	25
25	19	24
27	21	22
29	24	17
31	27	16
34	29	15
36	31	14
38	33	13
40	35	12
45	36	20
50	37	26
55	40	27
60	42	29
62	44	29
64	46	29
66	47	29
68	48	29
69	49	29
70	50	28

Second, Walter Heller has been on every side of the issue as to the causes and effects of the Kennedy tax rate reductions of the early 1960's.

One of my colleagues just told us that he said those reductions did nothing to give us the economic growth of the 1960's. He said that recently, when asked about the Kemp-Roth measure.

But in an appearance before the Joint Economic Committee in February 1977, he testified exactly to the contrary. There he said the Kennedy cut:

* * * was the major factor that led to our running a $3 billion surplus by the middle of 1965 before escalation in Vietnam struck us. It was a $12 billion tax cut which would be about $33 or $34 billion in today's terms, and within one year the revenues into the federal Treasury were already above what they had been before the tax cut." He concluded, "Did it pay for itself in increased revenues? I think the evidence is very strong that it did."

Only Dr. Heller knows why he is constantly changing positions, but I think it should be observed that his career has been closely identified with a political party, and it is not mine or Senator ROTH's.

Third, the gentleman from Missouri (Mr. GEPHARDT) said tonight and in a "Dear Colleague" letter that the Roth-Kemp proposal had not been considered before Ways and Means. That is wrong.

The Kemp-Roth legislation was aired before the Committee on Ways and Means in its extensive hearings on tax reform. I testified personally on the legislation on April 6, a copy of which is in the RECORD of that day at pages H2578–H2582. Many other witnesses addressed Kemp-Roth in their remarks too. If the committee's hearings were printed for us to use in this debate, which they are not, I could point out much discussion of Kemp-Roth, pro and con, including the particular individual income tax rate reduction portion being offered as an amendment. Kemp-Roth has had the benefit of public comment.

Kemp-Roth, that portion dealing with individual income tax rate reductions, was prepared for committee consideration. It was to be offered by the gentleman from Florida (Mr. BAFALIS). It was drafted and mimeographed. It was not presented, however, after three things happened. First, the committee leadership wanted to report the bill as soon as possible and did not wish to take the additional time to consider Kemp-Roth, in that it was assumed that the amendment would fail in committee. Second, the chairman and the ranking minority member gave assurances that the amendment could be offered on the floor, as an amendment, during full House consideration. Third, it became apparent that this was going to be the full committee's recommendation, that it be permitted to be offered as an amendment before the full House.

But the consideration of Kemp-Roth does not end here. It has been the subject of a full day's hearings before the Senate Finance Committee's Subcommittee on Taxation and Debt Management, hearings of the Joint Economic Committee in its economic review sessions, and of the House Budget Committee. That is fairly exhaustive consideration.

Fourth, we have heard income—the loss taxes and their flow to Washington—discussed here often tonight. I want to comment on this point.

There are two basic, quite distinct viewpoints on Government revenue. They reflect the most divergent philosophies of Government.

According to one view, all the income is the Government's. Anything which it wishes to leave with the people, to not bring into the Government through taxation, is part of the largess of Government. This is the view underlying such terms as "tax expenditures," the dollar costs of those provisions in the tax code which permit the people to keep dollars which would otherwise be sent to Washington.

According to the other view, all the income is the people's. This is the view inherent in our Declaration of Independence and our Constitution. It is the view inherent in a free society. Since, by this view, Government is the servant and not the master, the people's income is their own; that portion which they wish to provide to Government to carry out responsibilities agreed to in the constitutional framework, and nothing more, is Government's revenue.

We should keep this very much in mind as we examine the Revenue Act of 1978. This point, this dichotomy, over how income and revenue are to be viewed, should be at the forefront of our considerations.

This will make it very clear what is intended when "born-again" budget balancers talk about taking from the people levels of revenue sufficient to offset the spending levels those "born-again" budget balancers previously enacted.

I am not talking here about those Members who have consistently believed in a balanced budget and have voted against authorizations and appropriations which would have violated that principle.

I am, rather, talking about those "born-again" budget balancers who have voted time after time for higher authorizations, higher appropriations, running up tens of billions in deficits, but who now demand that we not reduce the tax burden upon the American people in order to keep Government's revenue from declining and the budget balanced. I do not think I have to detail who these Members are. They have been fairly visible in their opposition to reducing the tax rates and reducing the level of individual taxes paid. Think of a couple of names which come most readily to mind, then go back and look at their voting records. You will see how they have voted on motions to reduce spending and the Federal deficit. Those votes stand in contrast with their new found, their "born again," claim that we now have to keep the budget balanced and the way to do that is to keep taxes at their present rates. Those rates are too high. They are unnecessarily high. They are counterproductive, too.

But it gets worse.

It is not just that these "born-again" budget balancers want to keep the present rates of taxation in place. It is that they know that taxes will actually increase as inflation—that insidious hidden-tax—pushes taxpayers into tax brackets where the percentages they pay in taxes on additional dollars of income are increasingly higher. That process will account for higher personal income taxes. Then we have higher Social Security taxes, higher excise taxes, higher customs, estate, gift, and other taxes, and in many places throughout the country higher State and local taxes, especially property and sales taxes.

The average family of four will pay $538 more just in Federal taxes in fiscal year 1979, $806 more in fiscal year 1980, as a result of what Congress has already set in motion. We owe it to the taxpayers to bring these taxes and tax rates back in line.

None of this needs to happen. It can be ended without incurring the inflation which these "born-again" budget balancers have finally decided can be a cause of inflation.

Deficits can be a cause of inflation, if the level of investment capital available in the money markets is so low that the Treasury must finance part of the deficit by turning to the Federal Reserve to buy Treasury bills and notes by printing more money, thus increasing the money supply relative to goods and services available.

But if a tax cut results in total economic growth in such a way that increases in savings and retained earnings exceed the additional borrowing needs, then the Fed will not have to increase the money supply by $1 and there will be no inflation caused by that deficit.

It was with this, as well as other, thought in mind that the Kemp-Roth amendment was structured. It would be the first tax reduction in many years which was designed from a supply-side model. The first since the Kennedy cuts to cut tax rates appreciably. That answers the question why other tax reductions have not had the impact in the economy that is forecast by very reliable sources to be the impact which would result from Kemp-Roth.

It is wrong, dead wrong, to say Kemp-Roth cannot have more bang in it than prior tax reducing measures, because those prior measures are not patterned the way this one is and could not therefore be expected to have the same or similar results. Not all tax cuts are created equal. The reason for this one having more impact, more bang, than the others is that this one cuts the actual rates. It reduces them across the board, for every category of taxpayer, and it elicits a certain type of economic response from them.

By re-creating the incentive to work, to save, to invest, and to take economic risks—four basic, crucially important, yet distinct, economic activities—by reducing the percentage of reward for that economic activity taken by the Federal Government in the form of taxes, we will have more work, more savings, more investment, and more entrepreneurial activity in the part of individuals.

When taken as a whole, this will expand the total amount of economic activity, expanding the tax base from which Federal tax revenues are drawn, providing additional revenues with which to offset Federal budget deficits and to counteract the crowding out of investment capital already arising from Government borrowing to pay portions of the debt resulting from its continuing insistence that tax and economic policies not be revised.

Fifth, the economic growth occurring as a result of passing Kemp-Roth will not so far outpace our Nation's manufacturing capacity that it will cause inflation.

It is the vitality of a new idea which determines the level and quality of response it generates for the body politic. By any measurement, the Kemp-Roth bill, calling for a 30-percent across-the-board rate reduction in Federal personal income taxes over the next 3 years, has generated widespread and frequently sophisticated commentary.

The most common criticism I hear of the Roth-Kemp bill is that it is inflationary. Some critics claim that steep cuts in personal income taxes cannot fail to generate excess demand pressures on an economy pressing up against its productive limits. They contend prices will soar as consumers laden with cash run out to spend their extra dollars for goods that will become increasingly less available. We also hear from these critics that Roth-Kemp must mean large Federal deficits into the future, carrying with it the requirement that these deficits be financed by money creation; again, too much money will chase too few goods. If excessive demand pressures or indefinite Federal budget deficits were to occur, the bill would be inflationary.

History is not on the side of those who claim that inflation and manufacturing capacity utilization rates are inversely related.

Since 1946, there has been no relationship between productive capacity and inflation. In fact, for 5 of the 13 post-war years during which inflation has been 3.4 percent or higher, the capacity utilization rate was very low—in the 73.6 to 79.2 percent range. Conversely, during the 8 years for which inflation has exceeded 3.4 percent, the capacity utilization rate has ranged between 80.6 percent and 87.6 percent. We have experienced inflation during periods of relatively high capacity utilization, and low capacity utilization. It is interesting to note that the two times since 1946 that productive capacity came close to the Keynesian danger point of 90 percent, inflation was low. In 1953, capacity utilization was 89.2 percent and inflation was 1.3 percent; in 1965, the year following the Kennedy tax cut, capacity utilization was 89.6 percent, and inflation was 2.2 percent.

Last and in summary of the case for Kemp-Roth, the Kemp motion to recommit will accomplish the following objectives, according to a Library of Congress study of major econometric analyses by DRI, Wharton and Chase Econometrics, found at pages H7858–61 of August 3:

First. It will increase real GNP by a range of 1.2 to 2.9 percent in 1979 and 2.4 to 4.9 percent in 1980, according to a Library of Congress study introduced by Mr. VANIK. These are increases above inflationary increases.

Second. Real disposable income of the American workers will go up from by a range of 2.7 to 5.1 percent in 1979 and 4.6 to 8.3 percent in 1980, according to that study.

Third. Unemployment would drop from a range of 0.6 to 1.1 percent in 1979, 0.3 to 2.1 percent in 1980, and 0.7 to 3.3 percent in 1982, according to that study. That means a jobs creation of 700,000 to 1,100,000 in 1979; 1.4 to 2.0 million in 1980. This in turn reduces social welfare spending payments and adds to the tax base.

Fourth. It will provide 65 percent of the reduction to lower and middle income families so that all Americans can enjoy more real disposable income.

Fifth. It will cause a change in Fed-

eral income tax liability in such a way that $100,000 and over families will pay a greater share than today, by drawing them out of tax shelters into taxable economic activity, thereby lowering the tax liability percentages on every income class under $100,000.

Sixth. It will be self-financing because increased personal savings and increased retained earnings will be sufficient to cover all additional borrowing needs of Treasury, meaning the Federal Reserve will not have to increase the money supply to cover a portion of that borrowing, and will provide additional investment capital for the private sector's borrowing needs. According to Chase's calculations, it will result in crowding in, not crowding out.

Mr. Speaker, this is a convincing case for the enactment of Kemp-Roth, the amendment embodied in my motion to recommit. At least the people feel it is a convincing case, and they know it to be a responsible one too.

Mr. ULLMAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Nebraska (Mr. THONE).

Mr. THONE. Mr. Speaker, I rise in support of the motion that will be offered to recommit H.R. 13511 with instructions to reduce individual income tax rates by 33 percent over the next 3 years.

In support of this motion, I offer the testimony of the President's director of the Council on Wage and Price Stability, Mr. Barry Bosworth. Recently, Mr. Bosworth said:

> Productivity, which increased at a healthy 3 percent annual rate during the 1950s and 1960s, might have fallen to about 1.5 percent in recent years. This year it might not increase at all.

During the first 3 months of this year, U.S. productivity actually declined at a 3-percent annual rate.

Now, what is the most effective way to increase productivity, so that Americans in general can enjoy an increased standard of living. The answer is to attract capital for investment in new plants and equipment that will make U.S. production more efficient.

How do we attract such capital? By lowering the share of personal income taken by the Federal Government and increasing the share left in the wage earner's pocket. It will not be just the additional money used to purchase shares of stock that will increase business investment. Each additional dollar placed in savings or used to purchase insurance will help provide more funds for the investments that will increase U.S. productivity.

Beyond the economic sense that this proposal makes, I hope the Members of this body will be aware of the mood of the people of America. They believe rightly that Uncle Sam is taking too large a share of their earnings. They believe correctly that some of their hard-earned money is being completely wasted by the Federal Government. The taxpayers believe that much of the money taken from their paychecks for the U.S. Treasury would be used for more essential purposes if wage earners were allowed to keep it.

Mr. Speaker, the American taxpayers are fed up with wild and reckless Federal spending. They want it slashed. I hope this body will carry out their will by supporting the motion to recommit. Then, I hope the House will adopt my bill to put a lid on Federal spending—freezing it at the present level for a year and then permitting no more than a 5-percent annual growth in total Federal spending in each of the next 3 years.

If we will take these two actions—cutting Federal personal income taxes by 33 percent and putting a lid on total Federal spending—America can enjoy its greatest growth in the standard of living and the highest level of employment in its history.

● Mr. HAGEDORN. Mr. Speaker, I rise in support of the Roth-Kemp tax relief measure pending before the House. Inflation and progressive tax rates have provided enormous windfalls to the Federal Government. These tax increases have been so steep that, according to Dr. Rudolph Penner of the American Enterprise Institute, Roth-Kemp's 33 percent across-the-board reduction in personal income tax rates will merely return the average tax burden to what it was in 1976. This legislation does not, properly speaking, cut taxes; it simply returns to the American people what has been taxed away by inflation.

While the Roth-Kemp proposal prevents the average tax burden from increasing, and actually lowers it slightly, it also has a dramatic effect on marginal tax rates. The top rate is reduced from 70 to 50 percent and the bottom rate from 14 to 8 percent. The purpose of reducing tax rates across the board is to help restore the incentives in the American economy which have been destroyed by inflation. Because inflation pushes individuals into higher and higher tax brackets as their nominal income increases, and because it causes businesses to be taxed on illusory profits, the reward declines for work, saving, investment, and production. People work and invest less, or they work in ways which avoid taxation and invest in unproductive tax shelters. The result is a combination of economic stagnation and inflation.

By restoring marginal tax rates to reasonable levels, this legislation will increase investment, create jobs, raise productivity, improve wages, shift economic resources into ther most productive capacities, and get this country moving again. Taxing your way to prosperity is like standing in a bucket and attempting to lift yourself up by the handle. It is the wrong way to get a handle on the economy.●

Mr. ULLMAN. Mr. Speaker, before yielding to the majority leader, I would like to express my personal thanks to the members of the Committee on Ways and Means and to the Members of this House for what I consider a highly motivated debate, of which we can all be proud.

Mr. Speaker, I now yield the balance of my time to the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, there is a responsible way to cut taxes, and there is an irresponsible way.

The responsible way is to combine prudent and selective tax reductions with a prudent and restrained spending policy, so that the result does not escalate the deficit, nor exacerbate inflation. That is the responsible way.

Congress this year has followed a policy of moderation and restraint in Federal spending. Now, I hear some guffaws. But let us look at the simple and incontrovertible facts. As a result of repeated selective reductions in authorizations and expenditures voted by this House this year, the second concurrent budget resolution which we shall vote upon next week will demonstrate that we have effectively reduced the deficit forecast by the President in January for fiscal year 1979 by approximately $20 billion.

And that is no small feat. That figure, which fully embraces all the tax reductions contained in this committee bill, represents approximately a 33-percent reduction in that original deficit forecast. We are cutting taxes by $16 billion on an annualized basis, and still reducing the projected deficit by about $20 billion. Now, that is responsibility. I want to assure you that the Amercian public is neither blind to nor unappreciative of the steady, responsible course we have followed.

The respected pollster, Lou Harris, reveals this week—and I know all of you will be pleased with this—that the public estimation of the Congress of the United States has risen to approximately three times the level of approval that it enjoyed in January of last year, and to the highest point of public approval since the publicly televised hearings on impeachment by the Committee on the Judiciary.

The Congress has been responsible, and the public recognizes and appreciates that fact.

The irresponsible way to cut taxes, by contrast, is simply to slash them indiscriminately and without regard for the effect it will have on spiraling deficits and rampaging inflation. That is the route of Kemp-Roth as espoused by the gentleman from New York (Mr. KEMP).

I am aware of the gentleman's contention that we can cut all taxes by 30 percent and wind up with more money in the Treasury. I am sure that the gentleman is quite sincere in believing that would be the result. We would cut income by 30 percent and still we would have more money to spend. It is an attractive illusion.

But there is not a single responsible economist, either liberal or conservative, who accepts that conclusion. Nor is there any informed member of the American business community who accepts it. It smacks of sleight of hand and blatant hucksterism to suggest to the American people that we can cut their taxes radically and also reduce the deficit, and reduce inflation, and still have ample money for all the things they want from their Government—that we can cut taxes by a third right across the board without severe negative consequences. Yes, it is attractive. But it just will not wash. It simply does not add up.

Professor Samuelson of MIT declares that the Kemp-Roth cure-all has been "marketed like snake oil * * * not like serious research." Those are his words, not my words.

I realize there are ways in which properly selected reductions in taxes can, indeed, stimulate the kinds of investments and job-producing enterprises that will generate economic activity and ultimately create more money for the Treasury. I think we have been doing that. That is one of the reasons we have been able to reflect such a substantial reduction in the rate of unemployment in the past year and a half.

Private investment in the private business economy during these last 19 months has increased at an annualized rate of 9 percent. Compare that, if you will, with the preceding 8 years before last January, when the average annual increase in private investment was 1 percent.

So clearly the extreme surgery of Kemp-Roth is not needed now. We are embarked on a course. It is a course of responsibility. It is steady, consistent, persistent, and cumulative.

Of course, there are those in your constituencies who would appreciate a 30-percent cut in taxes. Are there any who would not? Sure, we all would like that if we could do it responsibly. But, emphatically, they would not appreciate the estimated $150 billion addition to the public debt; nor would they appreciate the increase in interest rates, nor the raging inflation that Kemp-Roth predictably would set in motion. The American people are far too sensible to want us to do those things for a mere temporary boon that will produce those predictable results.

Please, let us not engage in the ultimate folly of selling the American people short.

Business Week magazine, as has been pointed out by the gentleman from Oklahoma, has editorialized that the Kemp-Roth proposal "would be a completely irresponsible way to approach the Federal budget problem."

These are rather strong words for that business publication. It says:

> Kemp-Roth would add $100 billion to a deficit that is already dangerously swollen. It would touch off an inflationary explosion that would wreck the country and impoverish everyone on a fixed income.

That is not my conclusion; that is the conclusion of the conservative editors of Business Week.

And so today every Member of Congress is facing an acid test of the metal of which he or she is made. Are we, as Members of the House of Representatives, merely mirrors of every fleeting whim? Or are we, in the truest sense of the tradition of statesmanship, trustees of the republic? That is the test we face.

We have a responsible tax reduction bill which will stimulate private investment. It will stimulate buying power. It will allow the average American to keep more of his money to utilize in the private sector of this economy. And it will do this while reducing, not increasing, the size of the deficit. I have no doubt personally that this House, when it faces that test in just a few moments, will do the responsible thing by rejecting this glittering bauble of opportunism, by resoundingly rejecting the motion to recommit, and by resoundingly approving this committee bill as now amended.

● Mr. BINGHAM, Mr. Speaker, I shall vote against the Revenue Act of 1978 as it emerged from the amendment process. Frankly it is hard to believe that a Democratic Congress would send to a Democratic President a bill that is so antithetical to the tradition of the Democratic Party, and I hope the bill will be greatly improved in conference.

The committee bill before us has been called a tax relief bill. It is that—but the relief it provides goes less to the struggling lower- and middle-income taxpayer than to the very wealthy. Under this bill 13 percent of the tax cuts would go to those earning less than $15,000 but 24 percent would go to those earning over $50,000. The bill allows the very rich to shield their entire capital gains income from regular tax liability. Under an amendment adopted on the House floor, the bill also provides an automatic cost of living adjustment for certain capital assets while leaving those whose assets are locked up in savings accounts and pension plans to fend for themselves.

I had hoped for a real tax reform bill this year. President Carter had recommended that the Congress eliminate some of the most excessive tax shelters but his recommendations were given short shrift by the Ways and Means Committee. In the wake of proposition 13 it was inevitable that we would enact a tax cut—and one is necessary—but I had hoped that the cut would be directed at those most in need, not at those most cushioned from the effects of both inflation and the high unemployment rate. This bill will only contribute to inflation (through the increased Treasury borrowing its revenue cuts make necessary) while it does little to lighten the tax load on most people. In short, the bill is a sham.

I supported two substitutes to the committee bill. One, offered by Mr. VANIK of Ohio, would have simply extended those tax cuts which would expire this year without an extension. Those are the general tax cut of $35 per person; the earned income credit; the jobs credit and the small business surtax exemption. The Vanik proposal would have cost the Treasury $9 billion in contrast to the committee bill's $16 billion price tag.

Of all the proposals before us, the Vanik amendment would have had the most salutary effect on inflation. The Vanik amendment was overwhelmingly defeated. Ironically it was defeated with the votes of those very House Members who claim to be so opposed to deficit spending that they would constitutionally mandate a balanced budget. Such is the politics of taxation in 1978.

After the defeat of the Vanik proposal, I supported the Corman-Fisher substitute. Under Corman-Fisher, 87 percent of the tax cut benefits would go to those with incomes under $50,000. 24 percent of the benefits would go to those earning less than $15,000 and 38 percent to those earning under $20,000. Under Corman-Fisher a family of four would have to pay no income tax unless its income reaches $8,900. (Under the committee bill, that family would be taxed). The Corman-Fisher proposal was far more progressive than the committee bill and I would have voted for the entire bill if Corman-Fisher had been adopted. Incredibly, it was defeated.

The only good action taken by the House during its consideration of H.R. 13511 was its rejection of the Kemp-Roth tax cut. Kemp-Roth would have cut individual income taxes 30 percent over the next 3 years. It would have produced a Federal deficit of between $75 billion and $130 billion by 1981, a deficit which could only produce a major jump in the inflation rate. Kemp-Roth was regressive. A family of four with a $10,000 income would have benefited by $228 while the $100,000 income family would receive $8,700. Again it is interesting to note that Kemp-Roth was supported by the same "fiscal conservatives" who lecture us about "fiscal responsibility" and the sacredness of the balanced budget. One need not belabor the point: Kemp-Roth was an election year gimmick but it was one that could have done this Nation significant damage.

In conclusion, I will vote against H.R. 13511. I shall continue to work for tax relief through progressive tax reform, not through revenue giveways to the wealthy.●

The SPEAKER. Under the rule, the previous question is ordered on the motion to recommit.

The question is on the motion to recommit.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. KEMP. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 177, nays 240, not voting 15, as follows:

The Clerk announced the following pairs:

On this vote:

Mrs. Lloyd of Tennessee for, with Mr. Rodino against.

Mr. McDonald for, with Mr. Le Fante against.

Mr. Sawyer for, with Mr. Jenrette against.

Mr. Rudd for, with Mr. Miller of California against.

Mr. Devine for, with Mrs. Burke of California against.

Until further notice:

Mr. Teague with Mr. Sisk.

Mr. Fraser with Mr. Metcalfe.

Mr. YOUNG of Alaska and Mr. APPLEGATE changed their vote from "nay" to "yea."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the passage of the bill.

Mr. ULLMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 362, nays 49, not voting 21, as follows:

Mrs. Lloyd of Tennessee with Mr. Rudd.
Mr. Metcalfe with Mr. Quie.
Mr. Santini with Mr. McDonald.
Mr. Sisk with Mr. Fraser.
Mr. Staggers with Mr. Miller of California.
Mrs. Burke of California with Mr. Milford.

Mr. DORNAN changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Marks, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills of the House of the following titles:

On August 3, 1978:

H.R. 13385. An act to provide for a temporary increase in the public debt limit.

On August 4, 1978:

H.R. 1420. An act for the relief of Umberto Ruffolo;

H.R. 10569. An act to amend the Alcohol and Drug Abuse Education Act to extend the authorizations and appropriations for carrying out the provisions of such Act, and for other purposes;

H.R. 11504. An act to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program for farmers and ranches, extend the Emergency Livestock Credit Act of 1974, and for other purposes; and

H.R. 12933. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1979, and for other purposes.

August 8, 1978:

H.R. 11832. An act to authorize appropriations under the Arms Control and Disarmament Act for the fiscal year 1979, and for other purposes; and

H.R. 12426. An act to authorize the Secretary of the Treasury to provide financial assistance for the city of New York.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 11280, CIVIL SERVICE REFORM ACT OF 1978

Mr. MEEDS, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1473) on the resolution (H. Res. 1307) providing for consideration of the bill (H.R. 11280) to reform the civil service laws, which was referred to the House Calendar and ordered to be printed.

CONFERENCE REPORT ON S. 9, OUTER CONTINENTAL SHELF LANDS ACT AMENDMENTS OF 1978

Mr. STUDDS (on behalf of Mr. MURPHY of New York) submitted the following conferences report and statement on the Senate bill (S. 9) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes:

CONFERENCE REPORT (H. REPT. No. 95–1474)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 9) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

That this Act may be cited as the "Outer Continental Shelf Lands Act Amendments of 1978".

TABLE OF CONTENTS

TITLE I—FINDINGS AND PURPOSES WITH RESPECT TO MANAGING THE RESOURCES OF THE OUTER CONTINENTAL SHELF

Sec. 101. Findings.
Sec. 102. Purposes.

TITLE II—AMENDMENTS TO THE OUTER CONTINENTAL SHELF LANDS ACT

Sec. 201. Definitions.
Sec. 202. National policy for the Outer Continental Shelf.
Sec. 203. Laws applicable to the Outer Continental Shelf.
Sec. 204. Outer Continental Shelf exploration and development administration.
Sec. 205. Revision of bidding and lease administration.
Sec. 206. Outer Continental Shelf oil and gas exploration.
Sec. 207. Annual report.
Sec. 208. New sections of the Outer Continental Shelf Lands Act.
"Sec. 18. Outer Continental Shelf leasing program.
"Sec. 19. Coordination and consultation with affected States and local governments.
"Sec. 20. Environmental studies.
"Sec. 21. Safety regulations.
"Sec. 22. Enforcement.
"Sec. 23. Citizen suits, court jurisdiction, and judicial review.
"Sec. 24. Remedies and penalties.
"Sec. 25. Oil and gas development and production.
"Sec. 26. Outer Continental Shelf oil and gas information program.
"Sec. 27. Federal purchase and disposition of oil and gas.
"Sec. 28. Limitation on export.
"Sec. 29. Restrictions on employment.
"Sec. 30. Documentation, registry, and manning requirements."

TITLE III—OFFSHORE OIL SPILL POLLUTION FUND

Sec. 301. Definitions.
Sec. 302. Fund establishment, administration, and financing.
Sec. 303. Damages and claimants.
Sec. 304. Liability.
Sec. 305. Financial responsibility.
Sec. 306. Notification, designation, and advertisement.
Sec. 307. Claims settlement.
Sec. 308. Subrogation.
Sec. 309. Jurisdiction and venue.
Sec. 310. Relationship to other law.
Sec. 311. Prohibition.
Sec. 312. Penalties.
Sec. 313. Authorization of appropriations.
Sec. 314. Annual report.
Sec. 315. Effective dates.

TITLE IV—FISHERMEN'S CONTINGENCY FUND

Sec. 401. Definitions.
Sec. 402. Establishment of the Fishermen's Contingency Fund; fee collection.
Sec. 403. Duties and powers.
Sec. 404. Burden of proof.
Sec. 405. Claim procedures and subrogation of rights.
Sec. 406. Annual report.
Sec. 407. Survey of obstructions on the Outer Continental Shelf.

TITLE V—AMENDMENTS TO THE COASTAL ZONE MANAGEMENT ACT OF 1972

Sec. 501. Coastal energy impact program.
Sec. 502. Authorization of appropriations.
Sec. 503. Outer Continental Shelf grants.
Sec. 504. State management program.

TITLE VI—MISCELLANEOUS PROVISIONS

Sec. 601. Review of shut-in or flaring wells.
Sec. 602. Review and revision of royalty payments.
Sec. 603. Natural gas distribution.
Sec. 604. Antidiscrimination provisions.
Sec. 605. Sunshine in Government.
Sec. 606. Investigation of availability of oil and natural gas from the Outer Continental Shelf.
Sec. 607. Recommendations for training program.
Sec. 608. Relationship to existing law.

TITLE I—FINDINGS AND PURPOSES WITH RESPECT TO MANAGING THE RESOURCES OF THE OUTER CONTINENTAL SHELF

FINDINGS

Sec. 101. The Congress finds and declares that—

(1) the demand for energy in the United States is increasing and will continue to increase for the foreseeable future;

(2) domestic production of oil and gas has declined in recent years;

(3) the United States has become increasingly dependent upon imports of oil from foreign nations to meet domestic energy demand;

(4) increasing reliance on imported oil is not inevitable, but is rather subject to significant reduction by increasing the development of domestic sources of energy supply;

(5) consumption of natural gas in the United States has greatly exceeded additions to domestic reserves in recent years;

(6) technology is or can be made available which will allow significantly increased domestic production of oil and gas without undue harm or damage to the environment;

(7) the Outer Continental Shelf contains significant quantities of oil and natural gas and is a vital national resource reserve which must be carefully managed so as to realize fair value, to preserve and maintain competition, and to reflect the public interest;

(8) there presently exists a variety of technological, economic, environmental, administrative, and legal problems which tend to retard the development of the oil and natural gas reserves of the Outer Continental Shelf;

(9) environmental and safety regulations relating to activities on the Outer Continental Shelf should be reviewed in light of current technology and information;

(10) the development, processing, and distribution of the oil and gas resources of the Outer Continental Shelf, and the siting of related energy facilities, may cause adverse impacts on various States and local governments;

(11) policies, plans, and programs developed by States and local governments in response to activities on the Outer Continental Shelf cannot anticipate and ameliorate such adverse impacts unless such States, working in close cooperation with affected local governments, are provided with timely access to information regarding activities on the Outer Continental Shelf and an opportunity to review and comment on decisions relating to such activities;

(12) funds must be made available to pay for the prompt removal of any oil spilled or discharged as a result of activities on the Outer Continental Shelf and for any damages to public or private interests caused by such spills or discharges;

(13) because of the possible conflicts between exploitation of the oil and gas resources in the Outer Continental Shelf and other uses of the marine environment, including fish and shellfish growth and recovery, and recreational activity, the Federal Government must assume responsibility for the minimization or elimination of any conflict associated with such exploitation;

(14) the oil and gas resources of the Outer Continental Shelf are limited, nonrenewable resources which must be developed in a manner which takes into consideration the Nation's long-range energy needs and also assures adequate protection of the renewable resources of the Outer Continental Shelf which are a continuing and increasingly important source of food and protein to the Nation and the world; and

(15) funds must be made available to pay for damage to commercial fishing vessels and gear resulting from activities involving oil and gas exploration, development, and production on the Outer Continental Shelf.

PURPOSES

SEC. 102. The purposes of this Act are to—

(1) establish policies and procedures for managing the oil and natural gas resources of the Outer Continental Shelf which are intended to result in expedited exploration and development of the Outer Continental Shelf in order to achieve national economic and energy policy goals, assure national security, reduce dependence on foreign sources, and maintain a favorable balance of payments in world trade;

(2) preserve, protect, and develop oil and natural gas resources in the Outer Continental Shelf in a manner which is consistent with the need (A) to make such resources available to meet the Nation's energy needs as rapidly as possible, (B) to balance orderly energy resource development with protection of the human, marine, and coastal environments, (C) to insure the public a fair and equitable return on the resources of the Outer Continental Shelf, and (D) to preserve and maintain free enterprise competition;

(3) encourge development of new and improved technology for energy resource production which will eliminate or minimize risk of damage to the human, marine, and coastal environments;

(4) provide States, and through States, local governments, which are impacted by Outer Continental Shelf oil and gas exploration, development, and production with comprehensive assistance in order to anticipate and plan for such impact, and thereby to assure adequate protection of the human environment;

(5) assure that States, and through States, local governments, have timely access to information regarding activities on the Outer Continental Shelf, and opportunity to review and comment on decisions relating to such activities, in order to anticipate, ameliorate, and plan for the impacts of such activities;

(6) assure that States, and through States, local governments, which are directly affected by exploration, development, and production of oil and natural gas are provided an opportunity to participate in policy and planning decisions relating to management of the resources of the Outer Continental Shelf;

(7) minimize or eliminate conflicts between the exploration, development, and production of oil and natural gas, and the recovery of other resources such as fish and shellfish;

(8) establish an oilspill liability fund to pay for the prompt removal of any oil spilled or discharged as a result of activities on the Outer Continental Shelf and for any damages to public or private interests caused by such spills or discharges;

(9) insure that the extent of oil and natural gas resources of the Outer Continental Shelf is assessed at the earliest practicable time; and

(10) establish a fishermen's contingency fund to pay for damages to commercial fishing vessels and gear due to Outer Continental Shelf activities.

TITLE II—AMENDMENTS TO THE OUTER CONTINENTAL SHELF LANDS ACT

DEFINITIONS

SEC. 201. (a) Paragraphs (b) and (c) of section 2 of the Outer Continental Shelf Lands Act (43 U.S.C. 1331 (b) and (c)) are amended to read as follows:

"(b) The term 'Secretary' means the Secretary of the Interior, except that with respect to functions under this Act transferred to, or vested in, the Secretary of Energy or the Federal Energy Regulatory Commission by or pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), the term 'Secretary' means the Secretary of Energy, or the Federal Energy Regulatory Commission, as the case may be;

"(c) The term 'lease' means any form of authorization which is issued under section 8 or maintained under section 6 of this Act and which authorizes exploration for, and development and production of, minerals;".

(b) Such section is further amended—

(1) in paragraph (d), by striking out the period and inserting in lieu thereof a semicolon; and

(2) by adding at the end thereof the following new paragraphs:

"(e) The term 'coastal zone' means the coastal waters (including the lands therein and thereunder) and the adjacent shorelands (including the waters therein and thereunder), strongly influenced by each other and in proximity to the shorelines of the several coastal States, and includes islands, transition and intertidal areas, salt marshes, wetlands, and beaches, which zone extends seaward to the outer limit of the United States territorial sea and extends inland from the shorelines to the extent necessary to control shorelands, the uses of which have a direct and significant impact on the coastal waters, and the inward boundaries of which may be identified by the several coastal States, pursuant to the authority of section 305(b)(1) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1454(b)(1));

"(f) The term 'affected State' means, with respect to any program, plan, lease sale, or other activity, proposed, conducted, or approved pursuant to the provisions of this Act, any State—

"(1) the laws of which are declared, pursuant to section 4(a)(2) of this Act, to be the law of the United States for the portion of the outer Continental Shelf on which such activity is, or is proposed to be, conducted;

"(2) which is, or is proposed to be, directly connected by transportation facilities to any artificial island or structure referred to in section 4(a)(1) of this Act;

"(3) which is receiving, or in accordance with the proposed activity will receive, oil for processing, refining, or transshipment which was extracted from the outer Continental Shelf and transported directly to such State by means of vessels or by a combination of means including vessels;

"(4) which is designated by the Secretary as a State in which there is a substantial probability of significant impact on or damage to the coastal, marine, or human environment, or a State in which there will be significant changes in the social, governmental, or economic infrastructure, resulting from the exploration, development, and production of oil and gas anywhere on the outer Continental Shelf; or

"(5) in which the Secretary finds that because of such activity there is, or will be, a significant risk of serious damage, due to factors such as prevailing winds and currents, to the marine or coastal environment in the event of any oilspill, blowout, or release of oil or gas from vessels, pipelines, or other transshipment facilities;

"(g) The term 'marine environment' means the physical, atmospheric, and biological components, conditions, and factors which interactively determine the productivity, state, condition, and quality of the marine ecosystem, including the waters of the high seas, the contiguous zone, transitional and intertidal areas, salt marshes, and wetlands within the coastal zone and on the outer Continental Shelf;

"(h) The term 'coastal environment' means the physical, atmospheric, and biological components, conditions, and factors which interactively determine the productivity, state, condition, and quality of the terrestrial ecosystem from the shoreline inward to the boundaries of the coastal zone;

"(i) The term 'human environment' means the physical, social, and economic components, conditions, and factors which interactively determine the state, condition, and quality of living conditions, employment, and health of those affected, directly or indirectly, by activities occurring on the outer Continental Shelf;

"(j) The term 'Governor' means the Governor of a State, or the person or entity designated by, or pursuant to, State law to exercise the powers granted to such Governor pursuant to this Act;

"(k) The term 'exploration' means the process of searching for minerals, including (1) geophysical surveys where magnetic, gravity, seismic, or other systems are used to detect or imply the presence of such minerals, and (2) any drilling, whether on or off known geological structures, including the drilling of a well in which a discovery of oil or natural gas in paying quantities is made and the drilling of any additional delineation well after such discovery which is needed to delineate any reservoir and to enable the lessee to determine whether to proceed with development and production;

"(l) The term 'development' means those activities which take place following discovery of minerals in paying quantities, including geophysical activity, drilling, platform construction, and operation of all onshore support facilities, and which are for the purpose of ultimately producing the minerals discovered;

"(m) The term 'production' means those activities which take place after the successful completion of any means for the removal of minerals, including such removal, field operations, transfer of minerals to shore, operation monitoring, maintenance, and work-over drilling;

"(n) The term 'antitrust law' means—

"(1) the Sherman Act (15 U.S.C. 1 et seq.);

"(2) the Clayton Act (15 U.S.C. 12 et seq.);

"(3) the Federal Trade Commission Act (15 U.S.C. 41 et seq.);

"(4) the Wilson Tariff Act (15 U.S.C. 8 et seq.); or

"(5) the Act of June 19, 1936, chapter 592 (15 U.S.C. 13, 13a, 13b, and 21a);

"(o) The term 'fair market value' means the value of any mineral (1) computed at a unit price equivalent to the average unit price at which such mineral was sold pursuant to a lease during the period for which any royalty or net profit share is accrued or reserved to the United States pursuant to such lease, or (2) if there were no such sales, or if the Secretary finds that there were an insufficient number of such sales to equitably determine such value, computed at the average unit price at which such mineral was sold pursuant to other leases in the same region of the outer Continental Shelf during such period, or (3) if there were no sales of such mineral from such region during such period, or if the Secretary finds that there are an insufficient number of such sales to equitably determine such value, at an appropriate price determined by the Secretary;

"(p) The term 'major Federal action' means any action or proposal by the Secretary which is subject to the provisions of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)); and

"(q) The term 'minerals' includes oil, gas, sulphur, geopressured-geothermal and associated resources, and all other minerals which are authorized by an Act of Congress to be produced from 'public lands' as defined in section 103 of the Federal Land Policy and Management Act of 1976.".

NATIONAL POLICY FOR THE OUTER CONTINENTAL SHELF

SEC. 202. Section 3 of the Outer Continental Shelf Lands Act (43 U.S.C. 1332) is amended to read as follows:

"SEC. 3. NATIONAL POLICY FOR THE OUTER CONTINENTAL SHELF.—It is hereby declared to be the policy of the United States that—

"(1) the subsoil and seabed of the outer Continental Shelf appertain to the United States and are subject to its jurisdiction, control, and power of disposition as provided in this Act;

"(2) this Act shall be construed in such a manner that the character of the waters above the outer Continental Shelf as high seas and the right to navigation and fishing therein shall not be affected;

"(3) the outer Continental Shelf is a vital national resource reserve held by the Federal Government for the public, which should be made available for expeditious and orderly development, subject to environmental safeguards, in a manner which is consistent with the maintenance of competition and other national needs;

"(4) since exploration, development, and production of the minerals of the outer Continental Shelf will have significant impacts on coastal and non-coastal areas of the coastal States, and on other affected States, and, in recognition of the national interest in the effective management of the marine, coastal, and human environments—

"(A) such States and their affected local governments may require assistance in protecting their coastal zones and other affected areas from any temporary or permanent adverse effects of such impacts; and

"(B) such States, and through such States, affected local governments, are entitled to an opportunity to participate, to the extent consistent with the national interest, in the policy and planning decisions made by the Federal Government relating to exploration for, and development and production of, minerals of the outer Continental Shelf;

"(5) the rights and responsibilities of all States and, where appropriate, local governments, to preserve and protect their marine, human, and coastal environments through such means as regulation of land, air, and water uses, of safety, and of related development and activity should be considered and recognized; and

"(6) operations in the outer Continental Shelf should be conducted in a safe manner by well-trained personnel using technology, precautions, and techniques sufficient to prevent or minimize the likelihood of blowouts, loss of well control, fires, spillages, physical obstruction to other users of the waters or subsoil and seabed, or other occurrences which may cause damage to the environment or to property, or endanger life or health.".

LAWS APPLICABLE TO THE OUTER CONTINENTAL SHELF

SEC. 203. (a) Section 4(a)(1) of the Outer Continental Shelf Lands Act (43 U.S.C. 1333(a)(1)) is amended—

(1) by striking out "and fixed structures" and inserting in lieu thereof ", and all installations and other devices permanently or temporarily attached to the seabed,"; and

(2) by striking out "removing, and transporting resources therefrom" and inserting in lieu thereof "or producing resources therefrom, or any such installation or other device (other than a ship or vessel) for the purpose of transporting such resources".

(b) Section 4(a)(2) of such Act is amended by redesignating paragraph (2) as (2)(A) and by adding at the end thereof the following new subparagraph:

"(B) Within one year after the date of enactment of this subparagraph, the President shall establish procedures for settling any outstanding international boundary dispute respecting the outer Continental Shelf.".

(c) Section 4(c) of such Act is amended by striking out "described in subsection (b)" and inserting in lieu thereof "conducted on the outer Continental Shelf for the purpose of exploring for, developing, removing, or transporting by pipeline the natural resources, or involving rights to the natural resources, of the subsoil and seabed of the outer Continental Shelf".

(d) Section 4(d) of such Act is amended to read as follows:

"(d) For the purposes of the National Labor Relations Act, as amended, any unfair labor practice, as defined in such Act, occurring upon any artificial island, installation, or other device referred to in subsection (a) of this section shall be deemed to have occurred within the judicial district of the State, the laws of which apply to such artificial island, installation, or other device pursuant to such subsection, except that until the President determines the areas within which such State laws are applicable, the judicial district shall be that of the State nearest the place of location of such artificial island, installation, or other device.".

(e) Section 4 of such Act is amended—

(1) in paragraph (1) of subsection (e), by striking out "the islands and structures referred to in subsection (a)", and inserting in lieu thereof "the artificial islands, installations, and other devices referred to in subsection (a)";

(2) in subsection (f), by striking out "artificial islands and fixed structures located on the outer Continental Shelf" and inserting in lieu thereof "the artificial islands, installations, and other devices referred to in subsection (a)"; and

(3) in subsection (g), by striking out "the artificial islands and fixed structures referred to in subsection (a)" and inserting in lieu thereof "the artificial islands, installations, and other devices referred to in subsection (a)".

(f) Section 4(e)(1) of such Act is amended by striking out "head" and inserting in lieu thereof "Secretary".

(g) Section 4(e)(2) of such Act is amended to read as follows:

"(2) The Secretary of the Department in which the Coast Guard is operating may mark for the protection of navigation any artificial island, installation, or other device referred to in subsection (a) whenever the owner has failed suitably to mark such island, installation, or other device in accordance with regulations issued under this Act, and the owner shall pay the cost of such marking.".

(h) Section 4 of such Act is further amended by striking out subsection (b) and relettering subsections (c), (d), (e), (f), and (g) as subsections (b), (c), (d), (e), and (f), respectively.

OUTER CONTINENTAL SHELF EXPLORATION AND DEVELOPMENT ADMINISTRATION

SEC. 204. Section 5 of the Outer Continental Shelf Lands Act (43 U.S.C. 1334) is amended to read as follows:

"SEC. 5. ADMINISTRATION OF LEASING OF THE OUTER CONTINENTAL SHELF.—(a) The Secretary shall administer the provisions of this Act relating to the leasing of the outer Continental Shelf, and shall prescribe such rules and regulations as may be necessary to carry out such provisions. The Secretary may at any time prescribe and amend such rules and regulations as he determines to be necessary and proper in order to provide for the prevention of waste and conservation of the natural resources of the outer Continental Shelf, and the protection of correlative rights therein, and, notwithstanding any other provisions herein, such rules and regulations shall, as of their effective date, apply to all operations conducted under a lease issued or maintained under the provisions of this Act. In the enforcement of safety, environmental, and conservation laws and regulations, the Secretary shall cooperate with the relevant departments and agencies of the Federal Government and of the affected States. In the formulation and promulgation of regulations, the Secretary shall request and give due consideration to the views of the Attorney General with respect to matters which may affect competition. In considering any regulations and in preparing any such views, the Attorney General shall consult with the Federal Trade Commission. The regulations prescribed by the Secretary under this subsection shall include, but not be limited to, provisions—

"(1) for the suspension or temporary prohibition of any operation or activity, including production, pursuant to any lease or permit (A) at the request of a lessee, in the national interest, to facilitate proper development of a lease or to allow for the construction or negotiation for use of transportation facilities, or (B) if there is a threat of serious, irreparable, or immediate harm or damage to life (including fish and other aquatic life), to property, to any mineral deposits (in areas leased or not leased), or to the marine, coastal, or human environment, and for the extension of any permit or lease affected by suspension or prohibition under clause (A) or (B) by a period equivalent to the period of such suspension or prohibition, except that no permit or lease shall be so extended when such suspension or prohibition is the result of gross negligence or willful violation of such lease or permit, or of regulations issued with respect to such lease or permit;

"(2) with respect to cancellation of any lease or permit—

"(A) that such cancellation may occur at any time, if the Secretary determines, after a hearing, that—

"(i) continued activity pursuant to such lease or permit would probably cause serious harm or damage to life (including fish and other aquatic life), to property, to any mineral (in areas leased or not leased), to the national security or defense, or to the marine, coastal, or human environment;

"(ii) the threat of harm or damage will

not disappear or decrease to an acceptable extent within a reasonable period of time; and

"(iii) the advantages of cancellation outweigh the advantages of continuing such lease or permit in force;

"(B) that such cancellation shall not occur unless and until operations under such lease or permit shall have been under suspension, or temporary prohibition, by the Secretary, with due extension of any lease or permit term continuously for a period of five years, or for a lesser period upon request of the lessee;

"(C) that such cancellation shall entitle the lessee to receive such compensation as he shows to the Secretary as being equal to the lesser of (i) the fair value of the canceled rights as of the date of cancellation, taking account of both anticipated revenues from the lease and anticipated costs, including costs of compliance with all applicable regulations and operating orders, liability for cleanup costs or damages, or both, in the case of an oilspill, and all other costs reasonably anticipated on the lease, or (ii) the excess, if any, over the lessee's revenues, from the lease (plus interest thereon from the date of receipt to date of reimbursement) of all consideration paid for the lease and all direct expenditures made by the lessee after the date of issuance of such lease and in connection with exploration or development, or both, pursuant to the lease (plus interest on such consideration and such expenditures from date of payment to date of reimbursement), except that (I) with respect to leases issued before the date of enactment of this subparagraph, such compensation shall be equal to the amount specified in clause (i) of this subparagraph; and (II) in the case of joint leases which are canceled due to the failure of one or more partners to exercise due diligence, the innocent parties shall have the right to seek damages for such loss from the responsible party or parties and the right to acquire the interests of the negligent party or parties and be issued the lease in question;

"(3) for the assignment or relinquishment of a lease;

"(4) for unitization, pooling, and drilling agreements;

"(5) for the subsurface storage of oil and gas other than by the Federal Government;

"(6) for drilling or easements necessary for exploration, development, and production;

"(7) for the prompt and efficient exploration and development of a lease area; and

"(8) for compliance with the national ambient air quality standards pursuant to the Clear Air Act (42 U.S.C. 7401 et seq.), to the extent that activities authorized under this Act significantly affect the air quality of any State.

"(b) The issuance and continuance in effect of any lease, or of any assignment or other transfer of any lease, under the provisions of this Act shall be conditioned upon compliance with regulations issued under this Act.

"(c) Whenever the owner of a nonproducing lease fails to comply with any of the provisions of this Act, or of the lease, or of the regulations issued under this Act, such lease may be canceled by the Secretary, subject to the right of judicial review as provided in this Act, if such default continues for the period of thirty days after mailing of notice by registered letter to the lease owner at his record post office address.

"(d) Whenever the owner of any producing lease fails to comply with any of the provisions of this Act, of the lease, or of the regulations issued under this Act, such lease may be forfeited and canceled by an appropriate proceeding in any United States district court having jurisdiction under the provisions of this Act.

"(e) Rights-of-way through the submerged lands of the outer Continental Shelf, whether or not such lands are included in a lease maintained or issued pursuant to this Act, may be granted by the Secretary for pipeline purposes for the transportation of oil, natural gas, sulphur, or other minerals, or under such regulations and upon such conditions as may be prescribed by the Secretary, or where appropriate the Secretary of Transportation, including (as provided in section 21(b) of this Act) assuring maximum environmental protection by utilization of the best available and safest technologies, including the safest practices for pipeline burial and upon the express condition that oil or gas pipelines shall transport or purchase without discrimination, oil or natural gas produced from submerged lands or outer Continental Shelf lands in the vicinity of the pipelines in such proportionate amounts as the Federal Energy Regulatory Commission, in consultation with the Secretary of Energy, may, after a full hearing with due notice thereof to the interested parties, determine to be reasonable, taking into account, among other things, conservation and the prevention of waste. Failure to comply with the provisions of this section or the regulations and conditions prescribed under this section shall be ground for forfeiture of the grant in an appropriate judicial proceeding instituted by the United States in any United States district court having jurisdiction under the provisions of this Act.

"(f)(1) Except as provided in paragraph (2), every permit, license, easement, right-of-way, or other grant of authority for the transportation by pipeline on or across the outer Continental Shelf of oil or gas shall require that the pipeline be operated in accordance with the following competitive principles:

"(A) The pipeline must provide open and nondiscriminatory access to both owner and nonowner shippers.

"(B) Upon the specific request of one or more owner or nonowner shippers able to provide a guaranteed level of throughput, and on the condition that the shipper or shippers requesting such expansion shall be responsible for bearing their proportionate share of the costs and risks related thereto, the Federal Energy Regulatory Commission may, upon finding, after a full hearing with due notice thereof to the interested parties, that such expansion is within technological limits and economic feasibility, order a subsequent expansion of throughput capacity of any pipeline for which the permit, license, easement, right-of-way, or other grant of authority is approved or issued after the date of enactment of this subparagraph. This subparagraph shall not apply to any such grant of authority approved or issued for the Gulf of Mexico or the Santa Barbara Channel.

"(2) The Federal Energy Regulatory Commission may, by order or regulation, exempt from any or all of the requirements of paragraph (1) of this subsection any pipeline or class of pipelines which feeds into a facility where oil and gas are first collected or a facility where oil and gas are first separated, dehydrated, or otherwise processed.

"(3) The Secretary of Energy and the Federal Energy Regulatory Commission shall consult with and give due consideration to the views of the Attorney General on specific conditions to be included in any permit, license, easement, right-of-way, or grant of authority in order to ensure that pipelines are operated in accordance with the competitive principles set forth in paragraph (1) of this subsection. In preparing any such views, the Attorney General shall consult with the Federal Trade Commission.

"(4) Nothing in this subsection shall be deemed to limit, abridge, or modify any authority of the United States under any other provision of law with respect to pipelines on or across the outer Continental Shelf.

"(g)(1) The lessee shall produce any oil or gas, or both, obtained pursuant to an approved development and production plan, at rates consistent with any rule or order issued by the President in accordance with any provision of law.

"(2) If no rule or order referred to in paragraph (1) has been issued, the lessee shall produce such oil or gas, or both, at rates consistent with any regulation promulgated by the Secretary of Energy which is to assure the maximum rate of production which may be sustained without loss of ultimate recovery of oil or gas, or both, under sound engineering and economic principles, and which is safe for the duration of the activity covered by the approved plan. The Secretary may permit the lessee to vary such rates if he finds that such variance is necessary.

"(h) The head of any Federal department or agency who takes any action which has a direct and significant effect on the outer Continental Shelf or its development shall promptly notify the Secretary of such action and the Secretary shall thereafter notify the Governor of any affected State and the Secretary may thereafter recommend such changes in such action as are considered appropriate.

"(i) After the date of enactment of this section, no holder of any oil and gas lease issued or maintained pursuant to this Act shall be permitted to flare natural gas from any well unless the Secretary finds that there is no practicable way to complete production of such gas, or that such flaring is necessary to alleviate a temporary emergency situation or to conduct testing or work-over operations.".

REVISION OF BIDDING AND LEASE ADMINISTRATION

SEC. 205. (a) Subsections (a) and (b) of section 8 of the Outer Continental Shelf Lands Act (43 U.S.C. 1337 (a) and (b)) are amended to read as follows:

"(a)(1) The Secretary is authorized to grant to the highest responsible qualified bidder or bidders by competitive bidding, under regulations promulgated in advance, any oil and gas lease on submerged lands of the outer Continental Shelf which are not covered by leases meeting the requirements of subsection (a) of section 6 of this Act. Such regulations may provide for the deposit of cash bids in an interest-bearing account until the Secretary announces his decision on whether to accept the bids, with the interest earned thereon to be paid to the Treasury as to bids that are accepted and to the unsuccessful bidders as to bids that are rejected. The bidding shall be by sealed bid and, at the discretion of the Secretary, on the basis of—

"(A) cash bonus bid with a royalty at not less than 12½ per centum fixed by the Secretary in amount or value of the production saved, removed, or sold;

"(B) variable royalty bid based on a per centum in amount or value of the production saved, removed, or sold, with either a fixed work commitment based on dollar amount for exploration or a fixed cash bonus as determined by the Secretary, or both;

"(C) cash bonus bid, or work commitment bid based on a dollar amount for exploration with a fixed cash bonus, and a diminishing or sliding royalty based on such formulae as the Secretary shall determine as equitable to encourage continued production from the lease area as resources diminish, but not less than 12½ per centum at the beginning of the lease period in amount or value of the production saved, removed, or sold;

"(D) cash bonus bid with a fixed share of the net profits of no less than 30 per

centum to be derived from the production of oil and gas from the lease area;

"(E) fixed cash bonus with the net profit share reserved as the bid variable;

"(F) cash bonus bid with a royalty at no less than 12½ per centum fixed by the Secretary in amount or value of the production saved, removed, or sold and a fixed per centum share of net profits of no less than 30 per centum to be derived from the production of oil and gas from the lease area;

"(G) work commitment bid based on a dollar amount for exploration with a fixed cash bonus and a fixed royalty in amount or value of the production saved, removed, or sold; or

"(H) subject to the requirements of paragraph (4) of this subsection, any modification of bidding systems authorized in subparagraphs (A) through (G), or any other systems of bid variables, terms, and conditions which the Secretary determines to be useful to accomplish the purpose and policies of this Act, except that no such bidding system or modification shall have more than one bid variable.

"(2) The Secretary may, in his discretion, defer any part of the payment of the cash bonus, as authorized in paragraph (1) of this subsection, according to a schedule announced at the time of the announcement of the lease sale, but such payment shall be in total no later than five years after the date of the lease sale.

"(3) The Secretary may, in order to promote increased production on the lease area, through direct, secondary, or tertiary recovery means, reduce or eliminate any royalty or net profit share set forth in the lease for such area.

"(4)(A) The Secretary of Energy shall submit any bidding system authorized in subparagraph (H) of paragraph (1) to the Senate and House of Representatives. The Secretary may institute such bidding system unless either the Senate or the House of Representatives passes a resolution of disapproval within thirty days after receipt of the bidding system.

"(B) Subparagraphs (C) through (J) of this paragraph are enacted by Congress—

"(i) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but they are applicable only with respect to the procedures to be followed in that House in the case of resolutions described by this paragraph, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(ii) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner, and to the same extent as in the case of any other rule of that House.

"(C) A resolution disapproving a bidding system submitted pursuant to this paragraph shall immediately be referred to a committee (and all resolutions with respect to the same request shall be referred to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

"(D) If the committee to which has been referred any resolution disapproving the bidding system of the Secretary has not reported the resolution at the end of ten calendar days after its referral, it shall be in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other resolution with respect to the same bidding system which has been referred to the committee.

"(E) A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same recommendation), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(F) If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the same bidding system.

"(G) When the committee has reported, or has been discharged from further consideration of, a resolution as provided in this paragraph, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(H) Debate on the resolution is limited to not more than two hours to be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order, and it is not in order to move to reconsider the vote by which the resolution is agreed to or disagreed to.

"(I) Motions to postpone, made with respect to the discharge from the committee, or the consideration of a resolution with respect to a bidding system, and motions to proceed to the consideration of other business, shall be decided without debate.

"(J) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution with respect to a bidding system shall be decided without debate.

"(5)(A) During the five-year period commencing on the date of enactment of this subsection, the Secretary may, in order to obtain statistical information to determine which bidding alternatives will best accomplish the purposes and policies of this Act, require, as to no more than 10 per centum of the tracts offered each year, each bidder to submit bids for any area of the outer Continental Shelf in accordance with more than one of the bidding systems set forth in paragraph (1) of this subsection. For such statistical purposes, leases may be awarded using a bidding alternative selected at random for the acquisition of valid statistical data if such bidding alternative is otherwise consistent with the provisions of this Act.

"(B) The bidding systems authorized by paragraph (1) of this subsection other than the system authorized by subparagraph (A), shall be applied to not less than 20 per centum and not more than 60 per centum of the total area offered for leasing each year during the five-year period beginning on the date of enactment of this subsection, unless the Secretary determines that the requirements set forth in this subparagraph are inconsistent with the purposes and policies of this Act.

"(6) At least ninety days prior to notice of any lease sale under subparagraph (D), (E), (F), or, if appropriate, (H) of paragraph (1), the Secretary shall by regulation establish rules to govern the calculation of net profits. In the event of any dispute between the United States and a lessee concerning the calculation of the net profits under the regulation issued pursuant to this paragraph, the burden of proof shall be on the lessee.

"(7) After an oil and gas lease is granted pursuant to any of the work commitment options of paragraph (1) of this subsection—

"(A) the lessee, at its option, shall deliver to the Secretary upon issuance of the lease either (i) a cash deposit for the full amount of the exploration work commitment, or (ii) a performance bond in form and substance and with a surety satisfactory to the Secretary, in the principal amount of such exploration work commitment assuring the Secretary that such commitment shall be faithfully discharged in accordance with this section, regulations, and the lease; and for purposes of this subparagraph, the principal amount of such cash deposit or bond may, in accordance with regulations, be periodically reduced upon proof, satisfactory to the Secretary, that a portion of the exploration work commitment has been satisfied;

"(B) 50 per centum of all exploration expenditures on, or directly related to, the lease, including, but not limited to (i) geological investigations and related activities, (ii) geophysical investigations including seismic, geomagnetic, and gravity surveys, data processing and interpretation, and (iii) exploratory drilling, core drilling, redrilling, and well completion or abandonment, including the drilling of well sufficient to determine the size and areal extent of any newly discovered field, and including the cost of mobilization and demobilization of drilling equipment, shall be included in satisfaction of the commitment, except that the lessee's general overhead cost shall not be so included against the work commitment, but its cost (including employee benefits) of employees directly assigned to such exploration work shall be so included; and

"(C) if at the end of the primary term of the lease, including any extension thereof, the full dollar amount of the exploration work commitment has not been satisfied, the balance shall then be paid in cash to the Secretary.

"(8) Not later than thirty days before any lease sale, the Secretary shall submit to the Congress and publish in the Federal Register a notice—

"(A) identifying any bidding system which will be utilized for such lease sale and the reasons for the utilization of such bidding system; and

"(B) designating the lease tracts selected which are to be offered in such sale under the bidding system authorized by subparagraph (A) of paragraph (1) and the lease tracts selected which are to be offered under any one or more of the bidding systems authorized by subparagraphs (B) through (H) of paragraph (1), and the reasons such lease tracts are to be offered under a particular bidding system.

"(9) Within six months after the end of each fiscal year, the Secretary of Energy, in consultation with the Secretary of the Interior, shall report to the Congress with respect to the use of various bidding options provided for in this subsection. Such report shall include—

"(A) the schedule of all lease sales held during such year and the bidding system or systems utilized;

"(B) the schedule of all lease sales to be held the following year and the bidding system or systems to be utilized;

"(C) the benefits and costs associated with conducting lease sales using the various bidding systems;

"(D) if applicable, the reasons why a particular bidding system has not been or will not be utilized; and

"(E) if applicable, the reasons why more than 60 per centum or less than 20 per centum of the area leased in the past year, or to be offered for lease in the upcoming year, was or is to be leased under the bid-

ding system authorized by subparagraph (A) of paragraph (1) of this subsection.

"(b) An oil and gas lease issued pursuant to this section shall—

"(1) be for a tract consisting of a compact area not exceeding five thousand seven hundred and sixty acres, as the Secretary may determine, unless the Secretary finds that a larger area is necessary to comprise a reasonable economic production unit;

"(2) be for an initial period of—

"(A) five years; or

"(B) not to exceed ten years where the Secretary finds that such longer period is necessary to encourage exploration and development in areas because of unusually deep water or other unusually adverse conditions,

and as long after such initial period as oil or gas is produced from the area in paying quantities, or drilling or well reworking operations as approved by the Secretary are conducted thereon;

"(3) require the payment of amount or value as determined by one of the bidding systems set forth in subsection (a) of this section;

"(4) entitle the lessee to explore, develop, and produce the oil and gas contained within the lease area, conditioned upon due diligence requirements and the approval of the development and production plan required by this Act;

"(5) provide for suspension or cancellation of the lease during the initial lease term or thereafter pursuant to section 5 of this Act;

"(6) contain such rental and other provisions as the Secretary may prescribe at the time of offering the area for lease; and

"(7) provide a requirement that the lessee offer 20 per centum of the crude oil, condensate, and natural gas liquids produced on such lease, at the market value and point of delivery applicable to Federal royalty oil, to small or independent refiners as defined in the Emergency Petroleum Allocation Act of 1973.".

(b) Section 8 of the Outer Continental Shelf Lands Act (43 U.S.C. 1337) is further amended by striking out subsection (j), by relettering subsections (c) through (i), and all references thereto, as subsections (i) through (o), respectively, and by inserting immediately after subsection (b) the following new subsections:

"(c) (1) Following each notice of a proposed lease sale and before the acceptance of bids and the issuance of leases based on such bids, the Secretary shall allow the Attorney General, in consultation with the Federal Trade Commission, thirty days to review the results of such lease sale, except that the Attorney General, after consultation with the Federal Trade Commission, may agree to a shorter review period.

"(2) The Attorney General may, in consultation with the Federal Trade Commission, conduct such antitrust review on the likely effects the issuance of such leases would have on competition as the Attorney General, after consultation with the Federal Trade Commission, deems appropriate and shall advise the Secretary with respect to such review. The Secretary shall provide such information as the Attorney General, after consultation with the Federal Trade Commission, may require in order to conduct any antitrust review pursuant to this paragraph and to make recommendations pursuant to paragraph (3) of this subsection.

"(3) The Attorney General, after consultation with the Federal Trade Commission, may make such recommendations to the Secretary, including the nonacceptance of any bid, as may be appropriate to prevent any situation inconsistent with the antitrust laws. If the Secretary determines, or if the Attorney General advises the Secretary, after consultation with the Federal Trade Commission and prior to the issuance of any lease, that such lease may create or maintain a situation inconsistent with the antitrust laws, the Secretary may—

"(A) refuse (i) to accept an otherwise qualified bid for such lease, or (ii) to issue such lease, notwithstanding subsection (a) of this section; or

"(B) issue such lease, and notify the lessee and the Attorney General of the reason for such decision.

"(4) (A) Nothing in this subsection shall restrict the power under any other Act or the common law of the Attorney General, the Federal Trade Commission, or any other Federal department or agency to secure information, conduct reviews, make recommendations, or seek appropriate relief.

"(B) Neither the issuance of a lease nor anything in this subsection shall modify or abridge any private right of action under the antitrust laws.

"(d) No bid for a lease may be submitted if the Secretary finds, after notice and hearing, that the bidder is not meeting due diligence requirements on other leases.

"(e) No lease issued under this Act may be sold, exchanged, assigned, or otherwise transferred except with the approval of the Secretary. Prior to any such approval, the Secretary shall consult with and give due consideration to the views of the Attorney General.

"(f) Nothing in this Act shall be deemed to convey to any person, association, corporation, or other business organization immunity from civil or criminal liability, or to create defenses to actions, under any antitrust law.

"(g) (1) At the time of soliciting nominations for the leasing of lands within three miles of the seaward boundary of any coastal State, the Secretary shall provide the Governor of such State—

"(A) an identification and schedule of the areas and regions proposed to be offered for leasing;

"(B) all information concerning the geographical, geological, and ecological characteristics of such regions;

"(C) an estimate of the oil and gas reserves in the areas proposed for leasing; and

"(D) an identification of any field, geological structure, or trap located within three miles of the seaward boundary of such coastal State.

"(2) After receipt of nominations for any area of the outer Continental Shelf within three miles of the seaward boundary of any coastal State, the Secretary shall inform the Governor of such coastal State of any such area which the Secretary believes should be given further consideration for leasing. The Secretary, in consultation with the Governor of the coastal State, shall then determine whether any such area may contain one or more oil or gas pools or fields underlying both the outer Continental Shelf and lands subject to the jurisdiction of such State. If, with respect to such area, the Secretary selects a tract or tracts which may contain one or more oil or gas pools or fields underlying both the outer Continental Shelf and lands subject to the jurisdiction of such State, the Secretary shall offer the Governor of such coastal State the opportunity to enter into an agreement concerning the disposition of revenues which may be generated by a Federal lease within such area in order to permit their fair and equitable division between the State and Federal Government.

"(3) Within ninety days after the offer by the Secretary pursuant to paragraph (2) of this subsection, the Governor shall elect whether to enter into such agreement and shall notify the Secretary of his decision. If the Governor accepts the offer, the terms of any lease issued shall be consistent with the provisions of this Act, with applicable regulations, and, to the maximum extent practicable, within the applicable laws of the coastal State. If the Governor declines the offer, or if the parties cannot agree to terms concerning the disposition of revenues from such lease (by the time the Secretary determines to offer the area for lease), the Secretary may nevertheless proceed with the leasing of the area.

"(4) Notwithstanding any other provision of this Act, the Secretary shall deposit in a separate account in the Treasury of the United States all bonuses, royalties, and other revenues attributable to oil and gas pools underlying both the outer Continental Shelf and submerged lands subject to the jurisdiction of any coastal State until such time as the Secretary and the Governor of such coastal State agree on, or if the Secretary and the Governor of such coastal State cannot agree, as a district court of the United States determines, the fair and equitable disposition of such revenues and any interest which has accrued and the proper rate of payments to be deposited in the treasuries of the Federal Government and such coastal State.

"(h) Nothing contained in this section shall be construed to alter, limit, or modify any claim of any State to any jurisdiction over, or any right, title, or interest in, any submerged lands.".

(c) Subsection (c) of section 105 of the Energy Policy and Conservation Act (42 U.S.C. 6213(c)) is amended to read as follows:

"(c) The Secretary may, in his discretion, consider a request from any person described in subsection (a) of this section for an exemption from the prohibition of this section. In considering any such request, the Secretary may exempt bidding for leases for lands in any area only if the Secretary finds, on the record after opportunity for an agency hearing, that—

"(1) such lands have extremely high cost exploration or development problems; and

"(2) exploration and development will not occur on such lands unless such exemption is granted.

Findings of the Secretary under this subsection shall be final, and shall not be invalidated unless found to be arbitrary or capricious.".

OUTER CONTINENTAL SHELF OIL AND GAS EXPLORATION

SEC. 206. Section 11 of the Outer Continental Shelf Lands Act (43 U.S.C. 1340) is amended—

(1) by inserting "(a) (1)" immediately before "Any"; and

(2) by adding at the end thereof the following:

"(2) The provisions of paragraph (1) of this subsection shall not apply to any person conducting explorations pursuant to an approved exploration plan on any area under lease to such person pursuant to the provisions of this Act.

"(b) Except as provided in subsection (f) of this section, beginning ninety days after the date of enactment of this subsection, no exploration pursuant to any oil and gas lease issued or maintained under this Act may be undertaken by the holder of such lease, except in accordance with the provisions of this section.

"(c) (1) Except as otherwise provided in this Act, prior to commencing exploration pursuant to any oil and gas lease issued or maintained under this Act, the holder thereof shall submit an exploration plan to the Secretary for approval. Such plan may apply to more than one lease held by a lessee in any one region of the outer Continental Shelf, or by a group of lessees acting under a unitization, pooling, or drilling agreement, and shall be approved by the Secretary if he finds that such plan is consistent with the provisions of this Act, regulations prescribed under this Act, including regulations pre-

scribed by the Secretary pursuant to paragraph (8) of section 5(a) of this Act, and the provisions of such lease. The Secretary shall require such modifications of such plan as are necessary to achieve such consistency. The Secretary shall approve such plan, as submitted or modified, within thirty days of its submission, except that the Secretary shall disapprove such plan if he determines that (A) any proposed activity under such plan would result in any condition described in section 5(a)(2)(A)(i) of this Act, and (B) such proposed activity cannot be modified to avoid such condition. If the Secretary disapproves a plan under the preceding sentence, he may, subject to section 5(a)(2)(B) of this Act, cancel such lease and the lessee shall be entitled to compensation in accordance with the regulations prescribed under section 5(a)(2)(C)(i) or (ii) of this Act.

"(2) The Secretary shall not grant any license or permit for any activity described in detail in an exploration plan and affecting any land use or water use in the coastal zone of a State with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455), unless the State concurs or is conclusively presumed to concur with the consistency certification accompanying such plan pursuant to section 307(c)(3)(B)(i) or (ii) of such Act, or the Secretary of Commerce makes the finding authorized by section 307(c)(3)(B)(iii) of such Act.

"(3) An exploration plan submitted under this subsection shall include, in the degree of detail which the Secretary may by regulation require—

"(A) a schedule of anticipated exploration activities to be undertaken;

"(B) a description of equipment to be used for such activities;

"(C) the general location of each well to be drilled; and

"(D) such other information deemed pertinent by the Secretary.

"(4) The Secretary may, by regulation, require that such plan be accompanied by a general statement of development and production intentions which shall be for planning purposes only and which shall not be binding on any party.

"(d) The Secretary may, by regulation, require any lessee operating under an approved exploration plan to obtain a permit prior to drilling any well in accordance with such plan.

"(e)(1) If a significant revision of an exploration plan approved under this subsection is submitted to the Secretary, the process to be used for the approval of such revision shall be the same as set forth in subsection (c) of this section.

"(2) All exploration activities pursuant to any lease shall be conducted in accordance with an approved exploration plan or an approved revision of such plan.

"(f)(1) Exploration activities pursuant to any lease for which a drilling permit has been issued or for which an exploration plan has been approved, prior to ninety days after the date of enactment of this subsection, shall be considered in compliance with this section, except that the Secretary may, in accordance with section 5(a)(1)(B) of this Act, order a suspension or temporary prohibition of any exploration activities and require a revised exploration plan.

"(2) The Secretary may require the holder of a lease described in paragraph (1) of this subsection to supply a general statement in accordance with subsection (c)(4) of this section, or to submit other information.

"(3) Nothing in this subsection shall be construed to amend the terms of any permit or plan to which this subsection applies.

"(g) Any permit for geological explorations authorized by this section shall be issued only if the Secretary determines, in accordance with regulations issued by the Secretary, that—

"(1) the applicant for such permit is qualified;

"(2) the exploration will not interfere with or endanger operations under any lease issued or maintained pursuant to this Act; and

"(3) such exploration will not be unduly harmful to aquatic life in the area, result in pollution, create hazardous or unsafe conditions, unreasonably interfere with other uses of the area, or disturb any site, structure, or object of historical or archeological significance.

"(h) The Secretary shall not issue a lease or permit for, or otherwise allow, exploration, development, or production activities within fifteen miles of the boundaries of the Point Reyes Wilderness as depicted on a map entitled 'Wilderness Plant, Point Reyes National Seashore', numbered 612–90,000–B and dated September 1976, unless the State of California issues a lease or permit for, or otherwise allows, exploration, development, or production activities on lands beneath navigable waters (as such term is defined in section 2 of the Submerged Lands Act) of such State which are adjacent to such Wilderness.".

ANNUAL REPORT

SEC. 207. (a) Section 15 of the Outer Continental Shelf Lands Act (43 U.S.C. 1344) is amended to read as follows:

"SEC 15. ANNUAL REPORT BY SECRETARY TO CONGRESS.—Within six months after the end of each fiscal year, the Secretary shall submit to the President of the Senate and the Speaker of the House of Representatives the following reports:

"(1) A report on the leasing and production program in the outer Continental Shelf during such fiscal year, which shall include—

"(A) a detailed accounting of all moneys received and expended;

"(B) a detailed acocunting of all exploration, exploratory drilling, leasing, development, and production activities;

"(C) a summary of management, supervision, and enforcement activities;

"(D) a list of all shut-in and flaring wells; and

"(E) recommendations to the Congress (i) for improvements in management, safety, and amount of production from leasing and operations in the outer Continental Shelf, and (ii) for resolution of jurisdictional conflicts or ambiguities.

"(2) A report prepared after consultation with the Attorney General, with recommendations for promoting competition in the leasing of outer Continental Shelf lands, which shall include any recommendations or findings by the Attorney General and any plans for implementing recommended administrative changes and drafts of any proposed legislation, and which shall contain—

"(A) an evaluation of the competitive bidding systems permitted under the provisions of section 8 of this Act, and, if applicable, the reasons why a particular bidding system has not been utilized;

"(B) an evaluation of alternative bidding systems not permitted under section 8 of this Act, and why such system or systems should or should not be utilized;

"(C) an evaluation of the effectiveness of restrictions on joint bidding in promoting competition and, if applicable, any suggested administrative or legislative action on joint bidding;

"(D) an evaluation of present measures and a description of any additional measures to encourage entry of new competitors; and

"(E) an evaluation of present measures and a description of additional measures dealing with supplies of oil and gas to independent refiners and distributors.".

NEW SECTIONS OF THE OUTER CONTINENTAL SHELF LANDS ACT

SEC. 208. The Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) is amended by adding at the end thereof the following new sections:

"SEC. 18. OUTER CONTINENTAL SHELF LEASING PROGRAM.—(a) The Secretary, pursuant to procedures set forth in subsections (c) and (d) of this section, shall prepare and periodically revise, and maintain an oil and gas leasing program to implement the policies of this Act. The leasing program shall consist of a schedule of proposed lease sale indicating, as precisely as possible, the size, timing, and location of leasing activity which he determines will best meet national energy needs for the five-year period following its approval or reapproval. Such leasing program shall be prepared and maintained in a manner consistent with the following principles:

"(1) Management of the outer Continental Shelf shall be conducted in a manner which considers economic, social, and environmental values of the renewable and nonrenewable resources contained in the outer Continental Shelf, and the potential impact of oil and gas exploration on other resource values of the outer Continental Shelf and the marine, coastal, and human environments.

"(2) Timing and location of exploration, development, and production of oil and gas among the oil- and gas-bearing physiographic regions of the outer Continental Shelf shall be based on a consideration of—

"(A) existing information concerning the geographical, geological, and ecological characteristics of such regions;

"(B) an equitable sharing of developmental benefits and environmental risks among the various regions;

"(C) the location of such regions with respect to, and the relative needs of, regional and national energy markets;

"(D) the location of such regions with respect to other uses of the sea and seabed, including fisheries, navigation, existing or proposed sealanes, potential sites of deepwater ports, and other anticipated uses of the resources and space of the outer Continental Shelf;

"(E) the interest of potential oil and gas producers in the development of oil and gas resources as indicated by exploration or nomination;

"(F) laws, goals, and policies of affected States which have been specifically identified by the Governors of such States as relevant matters for the Secretary's consideration;

"(G) the relative environmental sensitivity and marine productivity of different areas of the outer Continental Shelf; and

"(H) relevant environmental and predictive information for different areas of the outer Continental Shelf.

"(3) The Secretary shall select the timing and location of leasing, to the maximum extent practicable, so as to obtain a proper balance between the potential for environmental damage, the potential for the discovery of oil and gas, and the potential for adverse impact on the coastal zone.

"(4) Leasing activities shall be conducted to assure receipt of fair market value for the lands leased and the rights conveyed by the Federal Government.

"(b) The leasing program shall include estimates of the appropriations and staff required to—

"(1) obtain resource information and any other information needed to prepare the leasing program required by this section;

"(2) analyze and interpret the exploratory data and any other information which may be compiled under the authority of this Act;

"(3) conduct environmenal studies and prepare any environmental impact statement

required in accordance with this Act and with section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)); and

"(4) supervise operations conducted pursuant to each lease in the manner necessary to assure due diligence in the exploration and development of the lease area and compliance with the requirements of applicable law and regulations, and with the terms of the lease.

"(c)(1) During the preparation of any proposed leasing program under this section, the Secretary shall invite and consider suggestions for such program from any interested Federal agency, including the Attorney General, in consultation with the Federal Trade Commission, and from the Governor of any State which may become an affected State under such proposed program. The Secretary may also invite or consider any suggestions from the executive of any affected local government in such an affected State, which have been previously submitted to the Governor of such State, and from any other person.

"(2) After such preparation and at least sixty days prior to publication of a proposed leasing program in the Federal Register pursuant to paragraph (3) of this subsection, the Secretary shall submit a copy of such proposed program to the Governor of each affected State for review and comment. The Governor may solicit comments from those executives of local governments in his State which he, in his discretion, determines will be affected by the proposed program. If any comment by such Governor is received by the Secretary at least fifteen days prior to submission to the Congress pursuant to such paragraph (3) and includes a request for any modification of such proposed program, the Secretary shall reply in writing, granting or denying such request in whole or in part, or granting such request in such modified form as the Secretary considers appropriate, and stating his reasons therefor. All such correspondence between the Secretary and the Governor of any affected State, together with any additional information and data relating thereto, shall accompany such proposed program when it is submitted to the Congress.

"(3) Within nine months after the date of enactment of this section, the Secretary shall submit a proposed leasing program to the Congress, the Attorney General, and the Governors of affected States, and shall publish such proposed program in the Federal Register. Each Governor shall, upon request, submit a copy of the proposed leasing program to the executive of any local government affected by the proposed program.

"(d)(1) Within ninety days after the date of publication of a proposed leasing program, the Attorney General may, after consultation with the Federal Trade Commission, submit comments on the anticipated effects of such proposed program upon competition. Any State, local government, or other person may submit comments and recommendations as to any aspect of such proposed program.

"(2) At least sixty days prior to approving a proposed leasing program, the Secretary shall submit it to the President and the Congress, together with any comments received. Such submission shall indicate why any specific recommendation of the Attorney General or a State or local government was not accepted.

"(3) After the leasing program has been approved by the Secretary, or after eighteen months following the date of enactment of this section, whichever first occurs, no lease shall be issued unless it is for an area included in the approval leasing program and unless it contains provisions consistent with the approved leasing program, except that leasing shall be permitted to continue until such program is approved and for so long thereafter as such program is under judicial or administrative review pursuant to the provisions of this Act.

"(e) The Secretary shall review the leasing program approved under this section at least once each year. He may revise and reapprove such program, at any time, and such revision and reapproval, except in the case of a revision which is not significant, shall be in the same manner as originally developed.

"(f) The Secretary shall, by regulation, establish procedures for—

"(1) receipt and consideration of nominations for any area to be offered for lease or to be excluded from leasing;

"(2) public notice of and participation in development of the leasing program;

"(3) review by State and local governments which may be impacted by the proposed leasing;

"(4) periodic consultation with State and local governments, oil and gas lessees and permittees, and representatives of other individuals or organizations engaged in activity in or on the outer Continental Shelf, including those involved in fish and shellfish recovery, and recreational activities; and

"(5) consideration of the coastal zone management program being developed or administered by an affected coastal State pursuant to section 305 or section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1454, 1455).

Such procedures shall be applicable to any significant revision or reapproval of the leasing program.

"(g) The Secretary may obtain from public sources, or purchase from private sources, any survey, data, report, or other information (including interpretations of such data, survey, report, or other information) which may be necessary to assist him in preparing any environmental impact statement and in making other evaluations required by this Act. Data of a classified nature provided to the Secretary under the provisions of this subsection shall remain confidential for such period of time as agreed to by the head of the department or agency from whom the information is requested. The Secretary shall maintain the confidentiality of all privileged or proprietary data or information for such period of time as is provided for in this Act, established by regulation, or agreed to by the parties.

"(h) the heads of all Federal departments and agencies shall provide the Secretary with any nonprivileged or nonproprietary information he requests to assist him in preparing the leasing program and may provide the Secretary with any privileged or proprietary information he requests to assist him in preparing the leasing program. Privileged or proprietary information provided to the Secretary under the provisions of this subsection shall remain confidential for such period of time as agreed to by the head of the department or agency from whom the information is requested. In addition, the Secretary shall utilize the existing capabilities and resources of such Federal departments and agencies by appropriate agreement.

"SEC. 19. COORDINATION AND CONSULTATION WITH AFFECTED STATES AND LOCAL GOVERNMENTS.—(a) Any Governor of any affected State or the executive of any affected local government in such State may submit recommendations to the Secretary regarding the size, timing, or location of a proposed lease sale or with respect to a proposed development and production plan. Prior to submitting recommendations to the Secretary, the executive of any affected local government in any affected State must forward his recommendations to the Governor of such State.

"(b) Such recommendations shall be submitted within sixty days after notice of such proposed lease sale or after receipt of such development and production plan.

"(c) The Secretary shall accept recommendations of the Governor and may accept recommendations of the executive of any affected local government if he determines, after having provided the opportunity for consultation, that they provide for a reasonable balance between the national interest and well-being of the citizens of the affected State. For purposes of this subsection, a determination of the national interest shall be based on the desirability of obtaining oil and gas supplies in a balanced manner and on the findings, purposes, and policies of this Act. The Secretary shall communicate to the Governor, in writing, the reasons for his determination to accept or reject such Governor's recommendations, or to implement any alternative means identified in consulation with the Governor to provide for a reasonable balance between the national interest and the well-being of the citizens of the affected State.

"(d) The Secretary's determination that recommendations provide, or do not provide, for a reasonable balance between the national interest and the well-being of the citizens of the affected State shall be final and shall not, alone, be a basis for invalidation of a proposed lease sale or a proposed development and production plan in any suit or judicial review pursuant to section 23 of this Act, unless found to be arbitrary or capricious.

"(e) The Secretary is authorized to enter into cooperative agreements with affected States for purposes which are consistent with this Act and other applicable Federal law. Such agreements may include, but need not be limited to, the sharing of information (in accordance with the provisions of section 26 of this Act), the joint utilization of available expertise, the facilitating of permitting procedures, joint planning and review, and the formation of joint surveillance and monitoring arrangements to carry out applicable Federal and State laws, regulations, and stipulations relevant to outer Continental Shelf operations both onshore and offshore.

"SEC. 20. ENVIRONMENTAL STUDIES.—(a)(1) The Secretary shall conduct a study of any area or region included in any oil and gas lease sale in order to establish information needed for assessment and management of environmental impacts on the human, marine, and coastal environments of the outer Continental Shelf and the coastal areas which may be affected by oil and gas development in such area or region.

"(2) Each study required by paragraph (1) of this subsection shall be commenced not later than six months after the date of enactment of this section with respect to any area or region where a lease sale has been held or announced by publication of a notice of proposed lease sale before such date of enactment, and not later than six months prior to the holding of a lease sale with respect to any area or region where no lease sale has been held or scheduled before such date of enactment. The Secretary may utilize information collected in any study prior to such date of enactment.

"(3) In addition to developing environmental information, any study of an area or region, to the extent practicable, shall be designed to predict impacts on the marine biota which may result from chronic low level pollution or large spills associated with outer Continental Shelf production, from the introduction of drill cuttings and drilling muds in the area, and from the laying of pipe to serve the offshore production area, and the impacts of development offshore on the affected and coastal areas.

"(b) Subsequent to the leasing and developing of any area or region, the Secretary shall conduct such additional studies to establish environmental information as he deems necessary and shall monitor the human, marine, and coastal environments of such area or region in a manner designed to provide time-series and data trend infor-

mation which can be used for comparison with any previously collected data for the purpose of identifying any significant changes in the quality and productivity of such environments, for establishing trends in the areas studied and monitored, and for designing experiments to identify the causes of such changes.

"(c) The Secretary shall, by regulation, establish procedures for carrying out his duties under this section, and shall plan and carry out such duties in full cooperation with affected States. To the extent that other Federal agencies have prepared environmental impact statements, are conducting studies, or are monitoring the affected human, marine, or coastal environment, the Secretary may utilize the information derived therefrom in lieu of directly conducting such activities. The Secretary may also utilize information obtained from any State or local government, or from any person, for the purposes of this section. For the purpose of carrying out his responsibilities under this section, the Secretary may by agreement utilize, with or without reimbursement, the services, personnel, or facilities of any Federal, State, or local government agency.

"(d) The Secretary shall consider available relevant environmental information in making decisions (including those relating to exploration plans, drilling permits, and development and production plans), in developing appropriate regulations and lease conditions, and in issuing operating orders.

"(e) As soon as practicable after the end of each fiscal year, the Secretary shall submit to the Congress and make available to the general public an assessment of the cumulative effect of activities conducted under this Act on the human, marine, and coastal environments.

"(f) In executing his responsibilities under this section, the Secretary shall, to the maximum extent practicable, enter into appropriate arrangements to utilize on a reimbursable basis the capabilities of the Department of Commerce. In carrying out such arrangements, the Secretary of Commerce is authorized to enter into contracts or grants with any person, organization, or entity with funds appropriated to the Secretary of the Interior pursuant to this Act.

"SEC. 21. SAFETY REGULATONS.—(a) Upon the date of enactment of this section, the Secretary and the Secretary of the Department in which the Coast Guard is operating shall, in consultation with each other and, as appropriate, with the heads of other Federal departments and agencies, promptly commence a joint study of the adequacy of existing safety and health regulations and of the technology, equipment, and techniques available for the exploration, development, and production of the minerals of the outer Continental Shelf. The results of such study shall be submitted to the President who shall submit a plan to the Congress of his proposals to promote safety and health in the exploration, development, and production of the minerals of the outer Continental Shelf.

"(b) In exercising their respective responsibilities for the artificial islands, installations, and other devices referred to in section 4(a)(1) of this Act, the Secretary, and the Secretary of the Department in which the Coast Guard is operating, shall require, on all new drilling and production operations and, wherever practicable, on existing operations, the use of the best available and safest technologies which the Secretary determines to be economically feasible, wherever failure of equipment would have a significant effect on safety, health, or the environment, except where the Secretary determines that the incremental benefits are clearly insufficient to justify the incremental costs of utilizing such technologies.

"(c) The Secretary of the Department in which the Coast Guard is operating shall promulgate regulations or standards applying to unregulated hazardous working conditions related to activities on the outer Continental Shelf when he determines such regulations or standards are necessary. The Secretary of the Department in which the Coast Guard is operating may from time to time modify any regulations, interim or final, dealing with hazardous working conditions on the outer Continental Shelf.

"(d) Nothing in this Act shall affect the authority provided by law to the Secretary of Labor for the protection of occupational safety and health, the authority provided by law to the Administrator of the Environmental Protection Agency for the protection of the environment, or the authority provided by law to the Secretary of Transportation with respect to pipeline safety.

"(e) The Secretary of Commerce, in cooperation with the Secretary of the Department in which the Coast Guard is operating, and the Director of the National Institutes of Occupational Safety and Health, shall conduct studies of underwater diving techniques and equipment suitable for protection of human safety and improvement of diver performance. Such studies shall include, but need not be limited to, decompression and excursion table development and improvement and all aspects of diver physiological restraints and protective gear for exposure to hostile environments.

"(f)(1) In administering the provisions of this section, the Secretary shall consult and coordinate with the heads of other appropriate Federal departments and agencies for purposes of assuring that, to the maximum extent practicable, inconsistent or duplicative requirements are not imposed.

"(2) The Secretary shall make available to any interested person a compilation of all safety and other regulations which are prepared and promulgated by any Federal department or agency and applicable to activities on the outer Continental Shelf. Such compilation shall be revised and updated annually.

"SEC. 22. ENFORCEMENT.—(a) The Secretary, the Secretary of the Department in which the Coast Guard is operating, and the Secretary of the Army shall enforce safety and environmental regulations promulgated pursuant to this Act. Each such Federal department may by agreement utilize, with or without reimbursement, the services, personnel, or facilities of other Federal departments and agencies for the enforcement of their respective regulations.

"(b) It shall be the duty of any holder of a lease or permit under this Act to—

"(1) maintain all places of employment within the lease area or within the area covered by such permit in compliance with occupational safety and health standards and, in addition, free from recognized hazards to employees of the lease holder or permit holder or of any contractor or subcontractor operating within such lease area or within the area covered by such permit on the outer Continental Shelf;

"(2) maintain all operations within such lease area or within the area covered by such permit in compliance with regulations intended to protect persons, property, and the environment on the outer Continental Shelf; and

"(3) allow prompt access, at the site of any operation subject to safety regulations, to any inspector, and to provide such documents and records which are pertinent to occupational or public health, safety, or environmental protection, as may be requested.

"(c) The Secretary and the Secretary of the Department in which the Coast Guard is operating shall individually, or jointly if they so agree, promulgate regulations to provide for—

"(1) scheduled onsite inspection, at least once a year, of each facility on the outer Continental Shelf which is subject to any environmental or safety regulation promulgated pursuant to this Act, which inspection shall include all safety equipment designed to prevent or ameliorate blowouts, fires, spillages, or other major accidents; and

"(2) periodic onsite inspection without advance notice to the operator of such facility to assure compliance with such environmental or safety regulations.

"(d)(1) The Secretary or the Secretary of the Department in which the Coast Guard is operating shall make an investigation and public report on each major fire and each major oil spillage occurring as a result of operations conducted pursuant to this Act, and may, in his discretion, make an investigation and report of lesser oil spillages. For purposes of this subsection, a major oil spillage is any spillage in one instance of more than two hundred barrels of oil during a period of thirty days. All holders of leases or permits issued or maintained under this Act shall cooperate with the appropriate Secretary in the course of any such investigation.

"(2) The Secretary or the Secretary of the Department in which the Coast Guard is operating shall make an investigation and public report on any death or serious injury occurring as a result of operations conducted pursuant to this Act, and may, in his discretion, make an investigation and report of any injury. For purposes of this subsection, a serious injury is one resulting in substantial impairment of any bodily unit or function. All holders of leases or permits issued or maintained under this Act shall cooperate with the appropriate Secretary in the course of any such investigation.

"(e) The Secretary, or, in the case of occupational safety and health, the Secretary of the Department in which the Coast Guard is operating, may review any allegation from any person of the existence of a violation of a safety regulation issued under this Act.

"(f) In any investigation conducted pursuant to this section, the Secretary or the Secretary of the Department in which the Coast Guard is operating shall have power to summon witnesses and to require the production of books, papers, documents, and any other evidence. Attendance of witnesses or the production of books, papers, documents, or any other evidence shall be compelled by a similar process as in the district courts of the United States. Such Secretary, or his designee, shall administer all necessary oaths to any witnesses summoned before such investigation.

"(g) The Secretary shall, after consultation with the Secretary of the Department in which the Coast Guard is operating, include in his annual report to the Congress required by section 15 of this Act the number of violations of safety regulations reported or alleged, any investigations undertaken, the results of such investigations, and any administrative or judicial action taken as a result of such investigations, and the results of the diving studies conducted under section 21(e) of this Act.

"SEC. 23. CITIZEN SUITS, COURT JURISDICTION, AND JUDICIAL REVIEW.—(a)(1) Except as provided in this section, any person having a valid legal interest which is or may be adversely affected may commence a civil action on his own behalf to compel compliance with this Act against any person, including the United States, and any other government instrumentality or agency (to the extent permitted by the eleventh amendment to the Constitution) for any alleged violation of any provision of this Act or any regulation promulgated under this Act, or of the terms of any permit or lease issued by the Secretary under this Act.

"(2) Except as provided in paragraph (3) of this subsection, no action may be commenced under subsection (a)(1) of this section—

"(A) prior to sixty days after the plaintiff has given notice of the alleged violation, in writing under oath, to the Secretary and any other appropriate Federal official, to the State in which the violation allegedly occurred or is occurring, and to any alleged violator; or

"(B) if the Attorney General has commenced and is diligently prosecuting a civil action in a court of the United States for a State with respect to such matter, but in any such action in a court of the United States any person having a legal interest which is or may be adversely affected may intervene as a matter of right.

"(3) An action may be brought under this subsection immediately after notification of the alleged violation in any case in which the alleged violation constitutes an imminent threat to the public health or safety or would immediately affect a legal interest of the plaintiff.

"(4) In any action commenced pursuant to this section, the Attorney General, upon the request of the Secretary or any other appropriate Federal official, may intervene as a matter of right.

"(5) A court, in issuing any final order in any action brought pursuant to subsection (a)(1) or subsection (c) of this section, may award costs of litigation, including reasonable attorney and expert witness fees, to any party, whenever such court determines such award is appropriate. The court may, if a temporary restraining order or preliminary injunction is sought, require the filing of a bond or equivalent security in a sufficient amount to compensate for any loss or damage suffered, in accordance with the Federal Rules of Civil Procedure.

"(6) Except as provided in subsection (c) of this section, all suits challenging actions or decisions allegedly in violation of, or seeking enforcement of, the provisions of this Act, or any regulation promulgated under this Act, or the terms of any permit or lease issued by the Secretary under this Act, shall be undertaken in accordance with the procedures described in this subsection. Nothing in this section shall restrict any right which any person or class of persons may have under any other Act or common law to seek appropriate relief.

"(b)(1) Except as provided in subsection (c) of this section, the district courts of the United States shall have jurisdiction of cases and controversies arising out of, or in connection with (A) any operation conducted on the outer Continental Shelf which involves exploration, development, or production of the minerals, of the subsoil and seabed of the outer Continental Shelf, or which involves rights to such minerals or (B) the cancellation, suspension, or termination of a lease or permit under this Act. Proceedings with respect to any such case or controversy may be instituted in the judicial district in which any defendant resides or may be found, or in the judicial district of the State nearest the place the cause of action arose.

"(2) Any resident of the United States who is injured in any manner through the failure of any operator to comply with any rule, regulation, order, or permit issued pursuant to this Act may bring an action for damages (including reasonable attorney and expert witness fees) only in the judicial district having jurisdiction under paragraph (1) of this subsection.

"(c)(1) Any action of the Secretary to approve a leasing program pursuant to section 18 of this Act shall be subject to judicial review only in the United States Court of Appeals for the District of Columbia.

"(2) Any action of the Secretary to approve, require modification of, or disapprove any exploration plan or any development and production plan under this Act shall be subject to judicial review only in a United States court of appeals for a circuit in which an affected State is located.

"(3) The judicial review specified in paragraphs (1) and (2) of this subsection shall be available only to a person who (A) participated in the administrative proceedings related to the actions specified in such paragraphs, (B) is adversely affected or aggrieved by such action, (C) files a petition for review of the Secretary's action within sixty days after the date of such action, and (D) promptly transmits copies of the petition to the Secretary and to the Attorney General.

"(4) Any action of the Secretary specified in paragraph (1) or (2) shall only be subject to review pursuant to the provisions of this subsection, and shall be specifically excluded from citizen suits which are permitted pursuant to subsection (a) of this section.

"(5) The Secretary shall file in the appropriate court the record of any public hearings required by this Act and any additional information upon which the Secretary based his decisions, as required by section 2112 of title 28, United States Code. Specific objections to the action of the Secretary shall be considered by the court only if the issues upon which such objections are based have been submitted to the Secretary during the administrative proceedings related to the actions involved.

"(6) The court of appeals conducting a proceeding pursuant to this subsection shall consider the matter under review solely on the record made before the Secretary. The findings of the Secretary, if supported by substantial evidence on the record considered as a whole, shall be conclusive. The court may affirm, vacate, or modify any order or decision or may remand the proceedings to the Secretary for such further action as it may direct.

"(7) Upon the filing of the record with the court, pursuant to paragraph (5), the jurisdiction of the court shall be exclusive and its judgment shall be final, except that such judgment shall be subject to review by the Supreme Court of the United States upon writ of certiorari.

"(d) Except as to causes of action which the court considers of greater importance, any action under this section shall take precedence on the docket over all other causes of action and shall be set for hearing at the earliest practical date and expedited in every way.

"SEC. 24. REMEDIES AND PENALTIES.—(a) At the request of the Secretary, the Secretary of the Army, or the Secretary of the Department in which the Coast Guard is operating, the Attorney General or a United States attorney shall institute a civil action in the district court of the United States for the district in which the affected operation is located for a temporary restraining order, injunction, or other appropriate remedy to enforce any provision of this Act, any regulation or order issued under this Act, or any term of a lease, license, or permit issued pursuant to this Act.

"(b) If any person fails to comply with any provision of this Act, or any term of a lease, license, or permit issued pursuant to this Act, or any regulation or order issued under this Act, after notice of such failure and expiration of any reasonable period allowed for corrective action, such person shall be liable for a civil penalty of not more than $10,000 for each day of the continuance of such failure. The Secretary may assess, collect, and compromise any such penalty. No penalty shall be assessed until the person charged with a violation has been given an opportunity for a hearing.

"(c) Any person who knowingly and willfully (1) violates any provision of this Act, any term of a lease, license, or permit issued pursuant to this Act, or any regulation or order issued under the authority of this Act designed to protect health, safety or the environment or conserve natural resources, (2) makes any false statement, representation, or certification in any application, record, report, or other document filed or required to be maintained under this Act, (3) falsifies, tampers with, or renders inaccurate any monitoring device or method of record required to be maintained under this Act, or (4) reveals any data or information required to be kept confidential by this Act shall, upon conviction, be punished by a fine of not more than $100,000, or by imprisonment for not more than ten years, or both. Each day that a violation under clause (1) of this subsection continues, or each day that any monitoring device or data recorder remains inoperative or inaccurate because of any activity described in clause (3) of this subsection, shall constitute a separate violation.

"(d) Whenever a corporation, or other entity is subject to prosecution under subsection (c) of this section, any officer or agent of such corporation or entity who knowingly and willfully authorized, ordered, or carried out the proscribed activity shall be subject to the same fines or imprisonment, or both, as provided for under subsection (c) of this section.

"(e) The remedies and penalties prescribed in this Act shall be concurrent and cumulative and the exercise of one shall not preclude the exercise of the others. Further, the remedies and penalties prescribed in this Act shall be in addition to any other remedies and penalties afforded by any other law or regulation.

"SEC. 25. OIL AND GAS DEVELOPMENT AND PRODUCTION.—(a)(1) Prior to development and production pursuant to an oil and gas lease issued after the date of enactment of this section in any area of the outer Continental Shelf, other than the Gulf of Mexico, or issued or maintained prior to such date of enactment in any area of the outer Continental Shelf, other than the Gulf of Mexico, with respect to which no oil or gas has been discovered in paying quantities prior to such date of enactment, the lessee shall submit a development and production plan (hereinafter in this section referred to as a 'plan') to the Secretary, for approval pursuant to this section.

"(2) A plan shall be accompanied by a statement describing all facilities and operations, other than those on the outer Continental Shelf, proposed by the lessee and known by him (whether or not owned or operated by such lessee) which will be constructed or utilized in the development and production of oil or gas from the lease area, including the location and site of such facilities and operations, the land, the labor, material, and energy requirements associated with such facilities and operations, and all environmental and safety safeguards to be implemented.

"(3) Except for any privileged or proprietary information (as such term is defined in regulations issued by the Secretary), the Secretary, within ten days after receipt of a plan and statement, shall (A) submit such plan and statement to the Governor of any affected State, and, upon request, to the executive of any affected local government, and (B) make such plan and statement available to any appropriate interstate regional entity and the public.

"(b) After the date of enactment of this section, no oil and gas lease may be issued pursuant to this Act in any region of the outer Continental Shelf, other than the Gulf of Mexico, unless such lease requires that development and production activities be car-

ried out in accordance with a plan which complies with the requirements of this section.

"(c) A plan may apply to more than one oil and gas lease, and shall set forth, in the degree of detail established by regulations issued by the Secretary—

"(1) the specific work to be performed;

"(2) a description of all facilities and operations located on the outer Continental Shelf which are proposed by the lessee or known by him (whether or not owned or operated by such lessee) to be directly related to the proposed development, including the location and size of such facilities and operations, and the land, labor, material, and energy requirements associated with such facilities and operations;

"(3) the environmental safeguards to be implemented on the outer Continental Shelf and how such safeguards are to be implemented;

"(4) all safety standards to be met and how such standards are to be met;

"(5) an expected rate of development and production and a time schedule for performance; and

"(6) such other relevant information as the Secretary may by regulation require.

"(d) The Secretary shall not grant any license or permit for any activity described in detail in a plan and affecting any land use or water use in the coastal zone of a State with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455), unless the State concurs or is conclusively presumed to concur with the consistency certification accompanying such plan pursuant to section 307(c)(3)(B)(i) or (ii) of such Act, or the Secretary of Commerce makes the finding authorized by section 307(c)(3)(B)(iii) of such Act.

"(e)(1) At least once the Secretary shall declare the approval of a development and production plan in any area or region (as defined by the Secretary) of the outer Continental Shelf, other than the Gulf of Mexico, to be a major Federal action.

"(2) The Secretary may require lessees of tracts for which development and production plans have not been approved, to submit preliminary or final plans for their leases, prior to or immediately after a determination by the Secretary that the procedures under the National Environmental Policy Act of 1969 shall commence.

"(f) If approval of a development and production plan is found to be a major Federal action, the Secretary shall transmit the draft environmental impact statement to the Governor of any affected State, and upon request, to the executive of any local government, and shall make such draft available to any appropriate interstate regional entity and the public.

"(g) If approval of a development and production plan is not found to be a major Federal action, the Governor of any affected State and the executive of any affected local government shall have sixty days from the date of receipt of the plan from the Secretary to submit comments and recommendations. Prior to submitting recommendations to the Secretary, the executive of any affected local government must forward his recommendations to the Governor of his State. Such comments and recommendations shall be made available to the public upon request. In addition, any interested person may submit comments and recommendations.

"(h)(1) After reviewing the record of any public hearing held with respect to the approval of a plan pursuant to the National Environmental Policy Act of 1969 or the comments and recommendations submitted under subsection (g) of this section, the Secretary shall, within sixty days after the release of the final environmental impact statement prepared pursuant to the National Environmental Policy Act of 1969 in accordance with subsection (e) of this section, or sixty days after the period provided for comment under subsection (g) of this section, approve, disapprove, or require modifications of the plan. The Secretary shall require modification of a plan if he determines that the lessee has failed to make adequate provision in such plan for safe operations on the lease area or for protection of the human, marine, or coastal environment, including compliance with the regulations prescribed by the Secretary pursuant to paragraph (8) of section 5(a) of this Act. Any modification required by the Secretary which involves activities for which a Federal license or permit is required and which affects any land use or water use in the coastal zone of a State with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455) must receive concurrence by such State with respect to the consistency certification accompanying such plan pursuant to section 307(c)(3)(B)(i) or (ii) of such Act unless the Secretary of Commerce makes the finding authorized by section 307(c)(3)(B)(iii) of such Act. The Secretary shall disapprove a plan—

"(A) if the lessee fails to demonstrate that he can comply with the requirements of this Act or other applicable Federal law, including the regulations prescribed by the Secretary pursuant to paragraph (8) of section 5(a) of this Act;

"(B) if any of the activities described in detail in the plan for which a Federal license or permit is required and which affects any land use or water use in the coastal zone of a State with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455) do not receive concurrence by such State with respect to the consistency certification accompanying such plan pursuant to section 307(c)(3)(B)(i) or (ii) of such Act and the Secretary of Commerce does not make the finding authorized by section 307(c)(3)(B)(iii) of such Act.

"(C) if operations threaten national security or national defense; or

"(D) if the Secretary determines, because of exceptional geological conditions in the lease areas, exceptional resource values in the marine or coastal environment, or other exceptional circumstances, that (i) implementation of the plan would probably cause serious harm or damage to life (including fish and other aquatic life), to property, to any mineral deposits (in areas leased or not leased), to the national security or defense, or to the marine, coastal or human environments, (ii) the threat of harm or damage will not disappear or decrease to an acceptable extent within a reasonable period of time, and (iii) the advantages of disapproving the plan outweigh the advantages of development and production.

"(2)(A) If a plan is disapproved—

"(i) under subparagraph (A) of paragraph (1); or

"(ii) under subparagraph (B) of paragraph (1) with respect to a lease issued after approval of a coastal zone management program pursuant to the Coastal Zone Management Act of 1972 (16 U.S.C. 1455),

the lessee shall not be entitled to compensation because of such disapproval.

"(B) If a plan is disapproved—

"(i) under subparagraph (C) or (D) of paragraph (1); or

"(ii) under subparagraph (B) of paragraph (1) with respect to a lease issued before approval of a coastal zone management program pursuant to the Coastal Zone Management Act of 1972, and such approval occurs after the lessee has submitted a plan to the Secretary,

the term of the lease shall be duly extended, and at any time within five years after such disapproval, the lessee may reapply for approval of the same or a modified plan, and the Secretary shall approve, disapprove, or require modifications of such plan in accordance with this subsection.

"(C) Upon expiration of the five-year period described in subparagraph (B) of this paragraph or, in the Secretary's discretion, at an earlier time upon request of a lessee, if the Secretary has not approved a plan, the Secretary shall cancel the lease and the lessee shall be entitled to receive compensation in accordance with section 5(a)(2)(C) of this Act. The Secretary may, at any time within the five-year period described in subparagraph (B) of this paragraph, require the lessee to submit a development and production plan for approval, disapproval, or modification. If the lessee fails to submit a required plan expeditiously and in good faith, the Secretary shall find that the lessee has not been duly diligent in pursuing his obligations under the lease, and shall immediately initiate procedures to cancel such laws, without compensation, under the provisions of section 5(c) of this Act.

"(3) The Secretary shall, from time to time, review each plan approved under this section. Such review shall be based upon changes in available information and other onshore or offshore conditions affecting or impacted by development and production pursuant to such plan. If the review indicates that the plan should be revised to meet the requirements of this subsection, the Secretary shall require such revision.

"(i) The Secretary may approve any revision of an approved plan proposed by the lessee if he determines that such revision will lead to greater recovery of oil and natural gas, improve the efficiency, safety, and environmental protection of the recovery operation, is the only means available to avoid substantial economic hardship to the lessee, or is otherwise not inconsistent with the provisions of this Act, to the extent such revision is consistent with protection of the human, marine, and coastal environments. Any revision of an approved plan which the Secretary determines is significant shall be reviewed in accordance with subsections (d) through (f) of this section.

"(j) Whenever the owner of any lease fails to submit a plan in accordance with regulations issued under this section, or fails to comply with an approved plan, the lease may be canceled in accordance with sections 5(c) and (d). Termination of a lease because of failure to comply with an approved plan, including required modifications or revisions, shall not entitle a lessee to any compensation.

"(k) If any development and production plan submitted to the Secretary pursuant to this section provides for the production and transportation of natural gas, the lessee shall contemporaneously submit to the Federal Energy Regulatory Commission that portion of such plan which relates to production of natural gas and the facilities for transportation of natural gas. The Secretary and the Federal Energy Regulatory Commission shall agree as to which of them shall prepare an environmental impact statement pursuant to the National Environmental Policy Act of 1969 applicable to such portion of such plan, or conduct studies as to the effect on the environment of implementing it. Thereafter, the findings and recommendations by the agency preparing such environmental impact statement or conducting such studies pursuant to such agreement shall be adopted by the other agency, and such other agency shall not independently prepare another environmental impact statement or duplicate such studies with respect to such portion of such plan, but the Federal Energy Regulatory Commission, in connection with its review of an application for a certificate of public convenience and necessity applicable to such transportation facilities pursuant to

section 7 of the Natural Gas Act (15 U.S.C. 717), may prepare such environmental studies or statement relevant to certification of such transportation facilities as have not been covered by an environmental impact statement or studies prepared by the Secretary. The Secretary, in consultation with the Federal Energy Regulatory Commission, shall promulgate rules to implement this subsection, but the Federal Energy Regulatory Commission shall retain sole authority with respect to rules and procedures applicable to the filing of any application with the Commission and to all aspects of the Commission's review of, and action on, any such application.

"(i) The Secretary may require the provisions of this section to apply to an oil and gas lease issued or maintained under this Act, which is located in that area of the Gulf of Mexico which is adjacent to the State of Florida, as determined pursuant to section 4(a)(2) of this Act.

"SEC. 26. OUTER CONTINENTAL SHELF OIL AND GAS INFORMATION PROGRAM.—(a)(1)(A) Any lessee or permittee conducting any exploration for, or development or production of, oil or gas pursuant to this Act shall provide the Secretary access to all data and information (including processed, analyzed, and interpreted information) obtained from such activity and shall provide copies of such data and information as the Secretary may request. Such data and information shall be provided in accordance with regulations which the Secretary shall prescribe.

"(B) If an interpretation provided pursuant to subparagraph (A) of this paragraph is made in good faith by the lessee or permittee, such lessee or permittee shall not be held responsible for any consequence of the use of or reliance upon such interpretation.

"(C) Whenever any data and information is provided to the Secretary, pursuant to subparagraph (A) of this paragraph—

"(i) by a lessee, in the form and manner of processing which is utilized by such lessee in the normal conduct of his business, the Secretary shall pay the reasonable cost of reproducing such data and information;

"(ii) by a lease, in such other form and manner of processing as the Secretary may request, the Secretary shall pay the reasonable cost of processing and reproducing such data and information;

"(iii) by a permittee, in the form and manner of processing which is utilized by such permittee in the normal conduct of his business, the Secretary shall pay such permittee the reasonable cost of reproducing such data and information for the Secretary and shall pay at the lowest rate available to any purchaser for processing such data and information the cost attributable to such processing; and

"(iv) by a permittee, in such other form and manner of processing as the Secretary may request, the Secretary shall pay such permittee the reasonable cost of processing and reproducing such data and information for the Secretary,

pursuant to such regulations as he may prescribe.

"(2) Each Federal department and agency shall provide the Secretary with any data obtained by such Federal department or agency pursuant to section 11 of this Act, and any other information which may be necessary or useful to assist him in carrying out the provisions of this Act.

"(b)(1) Data and information provided to the Secretary pursuant to subsection (a) of this section shall be processed, analyzed, and interpreted by the Secretary for purposes of carrying out his duties under this Act.

"(2) As soon as practicable after information provided to the Secretary pursuant to subsection (a) of this section is processed, analyzed, and interpreted, the Secretary shall make available to the affected States, and upon request, to any affected local government, a summary of data designed to assist them in planning for the onshore impacts of possible oil and gas development and production. Such summary shall include estimates of (A) the oil and gas reserves in areas leased or to be leased, (B) the size and timing of development if and when oil or gas, or both, is found, (C) the location of pipelines, and (D) the general location and nature of onshore facilities.

"(c) The Secretary shall prescribe regulations to (1) assure that the confidentiality of privileged or proprietary information received by the Secretary under this section will be maintained, and (2) set forth the time periods and conditions which shall be applicable to the release of such information. Such regulations shall include a provision that no such information will be transmitted to any affected State unless the lessee, or the permittee and all persons to whom such permittee has sold such information under promise of confidentiality, agree to such transmittal.

"(d)(1) The Secretary shall transmit to any affected State—

"(A) an index, and upon request copies of, all relevant actual or proposed programs, plans, reports, environmental impact statements, tract nominations (including negative nominations) and other lease sale information, any similar type of relevant information, and all modifications and revisions thereof and comments thereon, prepared or obtained by the Secretary pursuant to this Act, but no information transmitted by the Secretary under this subsection shall identify any particular tract with the name or names of any particular party so as not to compromise the competitive position of any party or parties participating in the nominations;

"(B)(i) the summary of data prepared by the Secretary pursuant to subsection (b)(2) of this section, and (ii) any other processed, analyzed, or interpreted data prepared by the Secretary pursuant to subsection (b)(1) of this section, unless the Secretary determines that transmittal of such data prepared pursuant to such subsection (b)(1) would unduly damage the competitive position of the lessee or permittee who provided the Secretary with the information which the Secretary had processed, analyzed, or interpreted; and

"(C) any relevant information received by the Secretary pursuant to subsection (a) of this section, subject to any applicable requirements as to confidentiality which are set forth in regulations prescribed under subsection (c) of this section.

"(2) Notwithstanding the provisions of any regulation required pursuant to the second sentence of subsection (c) of this section, the Governor of any affected State may designate an appropriate State Official to inspect, at a regional location which the Secretary shall designate, any privileged information received by the Secretary regarding any activity adjacent to such State, except that no such inspection shall take place prior to the sale of a lease covering the area in which such activity was conducted. Knowledge obtained by such State during such inspection shall be subject to applicable requirements as to confidentiality which are set forth in regulations prescribed under subsection (c) of this section.

"(e) Prior to transmitting any privileged information to any State, or granting such State access to such information, the Secretary shall enter into a written agreement with the Governor of such State in which such State agrees, as a condition precedent to receiving or being granted access to such information, to waive the defenses set forth in subsection (f)(2) of this section, and to hold the United States harmless from any violations of the regulations prescribed pursuant to subsection (c) that the State or its employees may commit.

"(f)(1) Whenever any employee of the Federal Government or of any State reveals information in violation of the regulations prescribed pursuant to subsection (c) of this section, the lessee or permittee who supplied such information to the Secretary or to any other Federal official, and any person to whom such lessee or permittee has sold such information under promise of confidentiality, may commence a civil action for damages in the appropriate district court of the United States against the Federal Government or such State, as the case may be.

"(2) In any action commenced against the Federal Government or a State pursuant to paragraph (1) of this subsection, the Federal Government or such State, as the case may be, may not raise as a defense (A) any claim of sovereign immunity, or (B) any claim that the employee who revealed the privileged information which is the basis of such suit was acting outside the scope of his employment in revealing such information.

"(g) Any provision of State or local law which provides for public access to any privileged information received or obtained by any person pursuant to this Act is expressly preempted by the provisions of this section, to the extent that it applies to such information.

"(h) If the Secretary finds that any State cannot or does not comply with the regulations issued under subsection (c) of this section, he shall thereafter withhold transmittal and deny inspection of privileged information to such State until he finds that such State can and will comply with such regulations.

"SEC. 27. FEDERAL PURCHASE AND DISPOSITION OF OIL AND GAS.—(a)(1) Except as may be necessary to comply with the provisions of sections 6 and 7 of this Act, all royalties or net profit shares, or both, accruing to the United States under any oil and gas lease issued or maintained in accordance with this Act, shall, on demand of the Secretary, be paid in oil or gas.

"(2) The United States shall have the right to purchase not to exceed 16⅔ per centum by volume of the oil and gas produced pursuant to a lease issued or maintained in accordance with this Act, at the regulated price, or, if no regulated price applies, at the fair market value at the well head of the oil and gas saved, removed, or sold, except that any oil or gas obtained by the United States as royalty or net profit share shall be credited against the amount that may be purchased under this subsection.

"(3) Title to any royalty, net profit share, or purchased oil or gas may be transferred, upon request, by the Secretary to the Secretary of Defense, to the Administrator of the General Services Administration, or to the Secretary of Energy, for disposal within the Federal Government.

"(b)(1) The Secretary, except as provided in this subsection, may offer to the public and sell by competitive bidding for not more than its regulated price, or, if no regulated price applies, not less than its fair market value, any part of the oil (A) obtained by the United States pursuant to any lease as royalty or net profit share, or (B) purchased by the United States pursuant to subsection (a)(2) of this section.

"(2) Whenever, after consultation with the Secretary of Energy, the Secretary determines that small refiners do not have access to adequate supplies of oil at equitable prices, the Secretary may dispose of any oil which is taken as a royalty or net profit share accruing or reserved to the United States pursuant to any lease issued or maintained under this Act, or purchased by the United States pursuant to subsection (a)(2) of this section, by conducting a lottery for the sale of such oil,

or may equitably allocate such oil among the competitors for the purchase of such oil, at the regulated price, or if no regulated price applies, at its fair market value. The Secretary shall limit participation in any allocation or lottery sale to assure such access and shall publish notice of such allocation or sale, and the terms thereof, at least thirty days in advance. Such notice shall include qualifications for participation, the amount of oil to be sold, and any limitation in the amount of oil which any participant may be entitled to purchase.

"(3) The Secretary may only sell or otherwise dispose of oil described in paragraph (1) of this subsection in accordance with any provision of law, or regulations issued in accordance with such provisions, which provide for the Secretary of Energy to allocate, transfer, exchange, or sell oil in amounts or at prices determined by such provision of law or regulations.

"(c)(1) Except as provided in paragraph (2) of this subsection, the Secretary, pursuant to such terms as he determines, may offer to the public and sell by competitive bidding for not more than its regulated price, or, if no regulated price applies, not less than its fair market value any part of the gas (A) obtained by the United States pursuant to a lease as royalty or net profit share, or (B) purchased by the United States pursuant to subsection (a)(2) of this section.

"(2) Whenever, after consultation with and advice from the Secretary of Energy, the Federal Energy Regulatory Commission determines that an emergency shortage of natural gas is threatening to cause severe economic or social dislocation in any region of the United States and that such region can be serviced in a practical, feasible and efficient manner by royalty, net profit share, or purchased gas obtained pursuant to the provisions of this section, the Secretary of the Interior may allocate or conduct a lottery for the sale of such gas and shall limit participation in any allocation or lottery sale of such gas to any person servicing such region but he shall not sell any such gas for more than its regulated price, or, if no regulated price applies less than its fair market value. Prior to selling or allocating any gas pursuant to this subsection, the Secretary shall consult with the Federal Energy Regulatory Commission.

"(d) The lessee shall take any Federal oil or gas for which no acceptable bids are received as determined by the Secretary, and which is not transferred pursuant to subsection (a)(3) of this section and shall pay to the United States a cash amount equal to the regulated price or, if no regulated price applies the fair market value of the oil or gas so obtained.

"(e) As used in this section—

"(1) the term 'regulated price' means the highest price—

"(A) at which oil may be sold pursuant to the Emergency Petroleum Allocation Act of 1973 and any rule or order issued under such Act;

"(B) at which natural gas may be sold to natural-gas companies pursuant to the Natural Gas Act, any other Act, regulations governing natural gas pricing, or any rule or order issued under any such Act or any such regulations; or

"(C) at which either Federal oil or gas may be sold under any other provision of law or rule or order thereunder which sets a price (or manner for determining a price) for oil or gas; and

"(2) the term 'small refiner' has the meaning given such term by Small Business Administration Standards 128.3–8 (d) and (g), as in effect on the date of enactment of this section or as thereafter revised or amended.

"(f) Nothing in this section shall prohibit the right of the United States to purchase any oil or gas produced on the outer Continental Shelf as provided by section 12(b) of this Act.

"SEC. 28. LIMITATION ON EXPORT.—(a) Except as provided in subsection (d) of this section, any oil or gas produced from the outer Continental Shelf shall be subject to the requirements and provisions of the Export Administration Act of 1969 (50 App. U.S.C. 2401 et seq.).

"(b) Before any oil or gas subject to this section may be exported under the requirements and provisions of the Export Administration Act of 1969, the President shall make and publish an express finding that such exports will not increase reliance on imported oil or gas, are in the national interest, and are in accord with the provisions of the Export Administration Act of 1969.

"(c) The President shall submit reports to the Congress containing findings made under this section, and after the date of receipt of such report Congress shall have a period of sixty calendar days, thirty days of which Congress must have been in session, to consider whether exports under the terms of this section are in the national interest. If the Congress within such time period passes a concurrent resolution of disapproval stating disagreement with the President's finding concerning the national interest, further exports made pursuant to such Presidential findings shall cease.

"(d) The provisions of this section shall not apply to any oil or gas which is either exchanged in similar quantity for convenience or increased efficiency of transportation with persons or the government of a foreign state, or which is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenters the United States, or which is exchanged or exported pursuant to an existing international agreement.

"SEC. 29. RESTRICTIONS ON EMPLOYMENT.—No full-time officer or employee of the Department of the Interior who directly or indirectly discharged duties or responsibilities under this Act, and who was at any time during the twelve months preceding the termination of his employment with the Department compensated under the Executive Schedule or compensated at or above the annual rate of basic pay for grade GS–16 of the General Schedule shall—

"(1) within two years after his employment with the Department has ceased—

"(A) knowingly act as agent or attorney for, or otherwise represent, any other person (except the United States) in any formal or informal appearance before;

"(B) with the intent to influence, make any oral or written communication on behalf of any other person (except the United States) to; or

"(C) knowingly aid or assist in representing any other person (except the United States) in any formal or informal appearance before,

any department, agency, or court of the United States, or any officer or employee thereof, in connection with any judicial or other proceeding, application request for a ruling or other determination, regulation, order, lease, permit, rulemaking, or other particular matter involving a specific party or parties in which the United States is a party or has a direct and substantial interest which was actually pending under his official responsibility as an officer or employee within a period of one year prior to the termination of such responsibility or in which he participated personally and substantially as an officer or employee; or

"(2) within one year after his employment with the Department has ceased—

"(A) knowingly act as agent or attorney for, or otherwise represent, any other person (except the United States) in any formal or informal appearance before; or

"(B) with the intent to influence, make any oral or written communication on behalf of any other person (except the United States) to,

the Department of the Interior, or any officer or employee thereof, in connection with any judicial, rulemaking, regulation, order, lease, permit, regulation, or other particular matter which is pending before the Department of the Interior or in which the Department has a direct and substantial interest.

"SEC. 30. DOCUMENTATION, REGISTRY, AND MANNING REQUIREMENT.—(a) Within six months after the date of enactment of this section, the Secretary of the Department in which the Coast Guard is operating shall issue regulations which require that any vessel, rig, platform, or other vehicle or structure—

"(1) which is used at any time after the one-year period beginning on the effective date of such regulations for activities pursuant to this Act and which is built or rebuilt at any time after such one-year period, when required to be documented by the laws of the United States, be documented under the laws of the United States;

"(2) which is used for activities pursuant to this Act, comply, except as provided in subsection (b), with such minimum standards of design, construction, alteration, and repair as the Secretary or the Secretary of the Department in which the Coast Guard is operating establishes; and

"(3) which is used at any time after the one-year period beginning on the effective date of such regulations for activities pursuant to this Act, be manned or crewed, except as provided in subsection (c), by citizens of the United States or aliens lawfully admitted to the United States for permanent residence.

"(b) The regulations issued under subsection (a)(2) of this section shall not apply to any vessel, rig, platform, or other vehicle or structure built prior to the date of enactment of this section, until such time after such date as such vehicle or structure is rebuilt.

"(c) The regulations issued under subsection (a)(3) of this section shall not apply—

"(1) to any vessel, rig, platform, or other vehicle or structure if—

"(A) specific contractual provisions or national registry manning requirements in effect on the date of enactment of this section provide to the contrary;

"(B) there are not a sufficient number of citizens of the United States, or aliens lawfully admitted to the United States for permanent residence, qualified and available for such work; or

"(C) the President makes a specific finding, with respect to the particular vessel, rig, platform, or other vehicle or structure, that application would not be consistent with the national interest; and

"(2) to any vessel, rig, platform, or other vehicle or structure, over 50 percent of which is owned by citizens of a foreign nation or with respect to which the citizens of a foreign nation have the right effectively to control, except to the extent and to the degree that the President determines that the government of such foreign nation or any of its political subdivisions has implemented, by statute, regulation, policy, or practice, a national manning requirement for equipment engaged in the exploration, development, or production of oil and gas in its offshore areas.".

POLLUTION FUND

DEFINITIONS

SEC. 301 For the purposes of this title, the term—

(1) "Secretary" means the Secretary of Transportation;

(2) "Fund" means the Offshore Oil Pollution Compensation Fund established under section 302 of this title;

(3) "person" means an individual, firm, corporation, association, partnership, consortium, joint venture, or governmental entity;

(4) "incident" means any occurrence or series of related occurrences, involving one or more offshore facilities or vessels, or any combination thereof, which causes or poses an imminent threat of oil pollution;

(5) "vessel" means every description of watercraft or other contrivance, whether or not self-propelled, which is operating in the waters above the Outer Continental Shelf (as the term "outer Continental Shelf" is defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331 (a))), or which is operating in the waters above submerged lands seaward from the coastline of a State (as the term "submerged lands" is described in section 2(a) of the Submerged Lands Act (43 U.S.C. 1301(a) (2))), and which is transporting oil directly from an offshore facility;

(6) "public vessel" means a vessel which—

(A) is owned or chartered by demise, and operated by (i) the United States, (ii) a State or political subdivision thereof, or (iii) a foreign government; and

(B) is not engaged in commercial service;

(7) "facility" means a structure, or group of structures (other than a vessel or vessels), used for the purpose of transporting, drilling for, producing, processing, storing, transferring, or otherwise handling oil;

(8) "offshore facility" includes any oil refinery, drilling structure, oil storage or transfer terminal, or pipeline, or any appurtenance related to any of the foregoing, which is used to drill for, produce, store, handle, transfer, process, or transport oil produced from the Outer Continental Shelf (as the term "outer Continental Shelf" is defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a))), and is located on the Outer Continental Shelf, except that such term does not include (A) a vessel, or (B) a deepwater port (as the term "deepwater port" is defined in section 3(10) of the Deepwater Port Act of 1974 (33 U.S.C. 1502));

(9) "oil pollution" means—

(A) the presence of oil either in an unlawful quantity or which has been discharged at an unlawful rate (i) in or on the waters above, submerged lands seaward from the coastline of a State (as the term "submerged lands" is described in section 2(a)(2) of the Submerged Lands Act (43 U.S.C. 1301(a) (2))), or on the adacent shoreline of such a State, or (ii) on the waters of the contiguous zone established by the United States under Article 24 of the Convention on the Territorial Sea and the Contiguous Zone (15 UST 1606); or

(B) the presence of oil in or on the waters of the high seas outside the territorial limits of the United States—

(i) when discharged in connection with activities conducted under the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.); or

(ii) causing injury to or loss of natural resources belonging to, appertaining to, or under the exclusive management authority of, the United States; or

(C) the presence of oil in or on the territorial sea, navigable or internal waters, or adjacent shoreline of a foreign country, in a case where damages are recoverable by a foreign claimant under this title;

(10) "United States claimant" means any person residing in the United States, the Government of the United States or an agency thereof, or the government of a State or a political subdivision thereof, who asserts a claim under this title;

(11) "foreign claimant" means any person residing in a foreign country, the government of a foreign country, or any agency or political subdivision thereof, who asserts a claim under this title;

(12) "United States" includes and "State" means the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Canal Zone, Guam, American Samoa, the United States Virgin Islands, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession over which the United States has jurisdiction;

(13) "oil" means petroleum, including crude oil or any fraction or residue therefrom;

(14) "cleanup costs" means costs of reasonable measures taken, after an incident has occurred, to prevent, minimize, or mitigate oil pollution from such incident;

(15) "damages" means compensation sought pursuant to this title by any person suffering any direct and actual injury proximately caused by the discharge of oil from an offshore facility or vessel, except that such term does not include cleanup costs;

(16) "person in charge" means the individual immediately responsible for the operation of a vessel or offshore facility;

(17) "claim" means a demand in writing for a sum certain;

(18) "discharge" means any emission, intentional or unintentional, and includes spilling, leaking, pumping, pouring, emptying, or dumping;

(19) "owner" means any person holding title to, or in the absence of title, any other indicia of ownership of, a vessel or offshore facility, whether by lease, permit, contract, license, or other form of agreement, or with respect to any offshore facility abandoned without prior approval of the Secretary of the Interior, the person who owned such offshore facility immediately prior to such abandonment, except that such term does not include a person who, without participating in the management or operation of a vessel or offshore facility, holds indicia of ownership primarily to protect his security interest in the vessel or offshore facility;

(20) "operator" means—

(A) in the case of a vessel, a charterer by demise or any other person, except the owner, who is responsible for the operation, manning, victualing, and supplying of the vessel; or

(B) in the case of an offshore facility, any person, except the owner, who is responsible for the operation of such facility by agreement with the owner;

(21) "property" means littoral, riparian, or marine property;

(22) "removal costs" means—

(A) costs incurred under subsection (c), (d), or (l) of section 311 of the Federal Water Pollution Control Act, and section 5 of the Intervention on the High Seas Act; and

(B) cleanup costs, other than the costs described in subparagraph (A);

(23) "guarantor" means the person, other than the owner or operator, who provides evidence of financial responsibility for an owner or operator;

(24) "gross ton" means a unit of 100 cubic feet for the purpose of measuring the total unit capacity of a vessel; and

(25) "barrel" means 42 United States gallons at 60 degrees Fahrenheit.

FUND ESTABLISHMENT, ADMINISTRATION, AND FINANCING

SEC. 302. (a) There is hereby established in the Treasury of the United States an Offshore Oil Pollution Compensation Fund in an amount not to exceed $200,000,000, except that such limitation shall be increased to the extent necessary to permit any moneys recovered or collected which are referred to in subsection (b)(2) of this section to be paid into the Fund. The Fund shall be administered by the Secretary and the Secretary of the Treasury as specified in this title. The Fund may sue and be sued in its own name.

(b) The Fund shall be composed of—

(1) all fees collected pursuant to subsection (d) of this section; and

(2) all other moneys recovered or collected on behalf of the Fund under section 308 or any other provision of this title.

(c) The Fund shall be immediately available for—

(1) removal costs described in section 301(22);

(2) the processing and settlement of claims under section 307 of this title (including the costs of assessing injury to, or destruction of, natural resources); and

(3) subject to such amounts as are provided in appropriation Acts, all administrative and personnel costs of the Federal Government incident to the administration of this title, including, but not limited to, the claims settlement activities and adjudicatory and judicial proceedings, whether or not such costs are recoverable under section 308 of this title.

The Secretary is authorized to promulgate regulations designating the person or persons who may obligate available money in the Fund for such purposes.

(d)(1) The Secretary shall levy and the Secretary of the Treasury shall collect a fee of not to exceed 3 cents per barrel on oil obtained from the Outer Continental Shelf, which shall be imposed on the owner of the oil when such oil is produced.

(2) The Secretary of the Treasury, after consulting with the Secretary, may promulgate reasonable regulations relating to the collection of the fees authorized by paragraph (1) of this subsection and, from time to time, the modification thereof. Any modification shall become effective on the date specified in the regulation making such modification, but no earlier than the ninetieth day following the date such regulation is published in the Federal Register. Any modification of the fee shall be designed to insure that the Fund is maintained at a level of not less than $100,000,000 and not more than $200,000,000. No regulation that sets or modifies fees, whether or not in effect, may be stayed by any court pending completion of judicial review of such regulation.

(3)(A) Any person who fails to collect or pay any fee as required by any regulation promulgated under paragraph (2) of this subsection shall be liable for a civil penalty not to exceed $10,000, to be assessed by the Secretary of the Treasury, in addition to the fee required to be collected or paid and the interest on such fee at the rate such fee would have earned if collected or paid when due and invested in special obligations of the United States in accordance with subsection (e)(2) of this section. Upon the failure of any person so liable to pay any penalty, fee, or interest upon demand, the Attorney General may, at the request of the Secretary of the Treasury, bring an action in the name of the Fund against that person for such amount.

(B) Any person who falsifies records or documents required to be maintained under any regulation promulgated under this subsection shall be subject to prosecution for a violation of section 1001 of title 18, United States Code.

(4) The Secretary of the Treasury may, by regulation, designate the reasonably necessary records and documents to be kept by persons from whom fees are to be collected pursuant to paragraph (1) of this subsection, and the Secretary of the Treasury and the Comptroller General of the United States shall have access to such records and documents for the purpose of audit and examination.

(e) (1) The Secretary shall determine the level of funding required for immediate access in order to meet potential obligations of the Fund.

(2) The Secretary of the Treasury may invest any excess in the Fund, above the level determined under paragraph (1) of this subsection, in interest-bearing special obligations of the United States. Such special obligations may be redeemed at any time in accordance with the terms of the special issue and pursuant to regulations promulgated by the Secretary of the Treasury. The interest on, and the proceeds from the sale of, any obligations held in the Fund shall be deposited in and credited to the Fund.

(f) If at any time the moneys available in the Fund are insufficient to meet the obligations of the Fund, the Secretary shall issue to the Secretary of the Treasury notes or other obligations in the forms and denominations, bearing the interest rates and maturities, and subject to such terms and conditions as may be prescribed by the Secretary of the Treasury. Redemption of such notes or other obligations shall be made by the Secretary from moneys in the Fund. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding marketable obligations of comparable maturity. The Secretary of the Treasury shall purchase any notes or other obligations issued under this subsection and, for that purpose, he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act. The purpose for which securities may be issued under that Act are extended to include any purchase of such notes or other obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as public debt transactions of the United States.

DAMAGES AND CLAIMANTS

SEC. 303. (a) Claims for economic loss, arising out of or directly resulting from oil pollution, may be asserted for—

(1) removal costs; and

(2) damages, including—

(A) injury to, or destruction of real or personal property;

(B) loss of use of real or personal property;

(C) injury to, or destruction of, natural resources;

(D) loss of use of natural resources;

(E) loss of profits or impairment of earning capacity due to injury to, or destruction of, real or personal property or natural resources; and

(F) loss of tax revenue for a period of one year due to injury to real or personal property.

(b) A claim authorized by subsection (a) of this section may be asserted—

(1) under paragraph (1), by any claimant, except that the owner or operator of a vessel or offshore facility involved in an incident may assert such a claim only if he can show—

(A) that he is entitled to a defense to liability under section 304(c)(1) or 304(c)(2) of this title; or

(B) if not entitled to such a defense to liability, that he is entitled to a limitation of liability under section 304(b), except that if he is not entitled to such a defense to liability but is entitled to such a limitation of liability, such claim may be assured only as to the removal costs incurred in excess of that limitation;

(2) under paragraphs (2) (A), (B), and (D), by any United States claimant if the property involved is owned or leased, or the natural resource involved is utilized, by the claimant;

(3) under paragraph (2)(C), by the President, as trustee for natural resources over which the Federal Government has sovereign rights or exercises exclusive management authority, or by any State for natural resources within the boundary of the State belonging to, managed by, controlled by, or appertaining to the State, and sums recovered under paragraph (2)(C) shall be available for use to restore, rehabilitate, or acquire the equivalent of such natural resources by the appropriate agencies of the Federal Government or the State, but the measure of such damages shall not be limited by the sums which can be used to restore or replace such resources;

(4) under paragraph (2)(E), by any United States claimant if the claimant derives at least 25 per centum of his earnings from activities which utilize the property or natural resource;

(5) under paragraph (2)(F), by the Federal Government and any State or political subdivision thereof;

(6) under paragraphs (2) (A) through (E), by a foreign claimant to the same extent that a United States claimant may assert a claim if—

(A) the oil pollution occurred in or on the territorial sea, navigable waters or internal waters, or adjacent shoreline of a foreign country of which the claimant is a resident;

(B) the claimant is not otherwise compensated for his loss;

(C) the oil was discharged from an offshore facility or from a vessel in connection with activities conducted under the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.); and

(D) recovery is authorized by a treaty or an executive agreement between the United States and the foreign country involved, or the Secretary of State, in consultation with the Attorney General and other appropriate officials, certifies that such country provides a comparable remedy for United States claimants;

(7) under paragraph (1) or (2), by the Attorney General, on his own motion or at the request of the Secretary, on behalf of any group of United States claimants who may assert a claim under this subsection, when he determines that the claimants would be more adequately represented as a class in asserting their claims.

(c) If the Attorney General fails to take action under paragraph (7) of subsection (b) within sixty days of the date on which the Secretary designates a source under section 306 of this title, any member of a group described in such paragraph may maintain a class action to recover damages on behalf of that group. Failure of the Attorney General to take action shall have no bearing on any class action maintained by any claimant for damages authorized by this section.

LIABILITY

SEC. 304. (a) Subject to the provisions of subsections (b) and (c) of this section, the owner and operator of a vessel other than a public vessel, or of an offshore facility, which is the source of oil pollution, or poses a threat of oil pollution in circumstances which justify the incurrence of the type of costs described in section 301(22) of this title, shall be jointly, severally, and strictly liable for all loss for which a claim may be asserted under section 303 of this title.

(b) Except when the incident is caused primarily by willful misconduct or gross negligence, within the privity or knowledge of the owner or operator, or is caused primarily by a violation, within the privity or knowledge of the owner or operator, of applicable safety, construction, or operating standards or regulations of the Federal Government, the total of the liability under subsection (a) of this section incurred by, or on behalf of, the owner or operator shall be—

(1) in the case of a vessel, limited to $250,000 or $300 per gross ton, whichever is greater, except when the owner or operator of a vessel fails or refuses to provide all reasonable cooperation and assistance requested by the responsible Federal official in furtherance of cleanup activities; or

(2) in the case of an offshore facility, the total of removal and cleanup costs, and an amount limited to $35,000,000 for all damages.

(c) There shall be no liability under subsection (a) of this section—

(1) if the incident is caused solely by any act of war, hostilities, civil war, or insurrection, or by an unanticipated grave natural disaster or other natural phenomenon of an exceptional, inevitable, and irresistable character, the effect of which could not have been prevented or avoided by the exercise of due care or foresight; or

(2) if the incident is caused solely by the negligent or intentional act of the damaged party or any third party (including any government entity).

(d) Notwithstanding the limitations, exceptions, or defenses of subsection (b) or (c) of this section, all costs of removal incurred by the Federal Government or any State or local official or agency in connection with a discharge of oil from any offshore facility or vessel shall be borne by the owner and operator of the offshore facility or vessel from which the discharge occurred.

(e) The Secretary shall, from time to time, report to Congress on the desirability of adjusting the monetary limitation of liability specified in subsection (b) of this section.

(f) (1) Subject to the provisions of paragraph (2) of this subsection, the Fund shall be liable, without any limitation, for all losses for which a claim may be asserted under section 303 of this title, to the extent that such losses are not otherwise compensated.

(2) Except for the removal costs specified in section 301(22), there shall be no liability under paragraph (1) of this subsection—

(A) as to a particular claimant, where the incident or economic loss is caused, in whole or in part, by the gross negligence or willful misconduct of that claimant; or

(B) as to a particular claimant, to the extent that the incident or economic loss is caused by the negligence of that claimant.

(g) (1) In addition to the losses for which claims may be asserted under section 303 of this title, and without regard to the limitation of liability provided in subsection (b) of this section, the owner, operator, or guarantor of an offshore facility or vessel shall be liable to the claimant for interest on the amount paid in satisfaction of the claim for the period from the date upon which the claim is presented to such person to the date upon which the claimant is paid, inclusive, less the period, if any, from the date upon which such owner, operator, or guarantor offers the claimant an amount equal to or greater than the amount finally paid in satisfaction of the claim to the date upon which the claimant accepts such amount, inclusive. However, if such owner, operator, or guarantor offers the claimant, within sixty days of the date upon which the claim is presented, or of the date upon which advertising is commenced pursuant to section 306 of this title, whichever is later, an amount equal to or greater than the amount finally paid in satisfaction of the claim, the owner, operator, or guarantor shall be liable for the interest provided in this paragraph only from the date the offer is accepted by the claimant to the date upon which payment is made to the claimant, inclusive.

(2) The interest provided in paragraph (1) of this subsection shall be calculated at the average of the highest rate for commercial and finance company paper of maturities of one hundred and eighty days or less obtaining on each of the days included within the

period for which interest must be paid to the claimant, as published in the Federal Reserve Bulletin.

(h) Nothing in this title shall bar a cause of action that an owner or operator, subject to liability under subsection (a) of this section, or a guarantor, has or would have, by reason of subrogation or otherwise, against any person.

(i) To the extent that they are in conflict or otherwise inconsistent with any other provision of law relating to liability or the limitation thereof, the provisions of this section shall supersede such other provision of flaw, including section 4283(a) of the Revised Statutes (46 U.S.C. 183(a)).

FINANCIAL RESPONSIBILITY

SEC. 305. (a)(1) The owner of operator of any vessel (except a non-self-propelled barge that does not carry oil as fuel or cargo) which uses an offshore facility shall establish and maintain, in accordance with regulations promulgated by the President, evidence of financial responsibility sufficient to satisfy the maximum amount of liability to which the owner or operator of such vessel would be exposed in a case where he would be entitled to limit his liability in accordance with the provisions of section 304(b) of this title. Financial responsibility may be established by any one, or any combination, of the following methods, acceptable to the President: evidence of insurance, guarantee, surety bond, or qualification as a self-insurer. Any bond filed shall be issued by a bonding company authorized to do business in the United States. In any case where an owner or operator owns, operates, or charters more than one vessel subject to this subsection, evidence of financial responsibility need be established only to meet the maximum liability applicable to the largest of such vessels.

(2) The Secretary, in accordance with regulations promulgated by him, shall—

(A) deny entry to any port or place in the United States or to the navigable waters to; and

(B) detain at the port or place in the United States from which it is about to depart for any other port or place in the United States;

any vessel subject to this subsection which, upon request, does not produce certification furnished by the President that such vessel is in compliance with the financial responsibility provisions of paragraph (1) of this subsection.

(3) The Secretary, in accordance with regulations promulgated by him, shall have access to all offshore facilities and vessels conducting activities under the Outer Continental Shelf Lands Act, and such facilities and vessels shall, upon request, show certification of financial responsibility.

(b) The owner or operator of an offshore facility which (1) is used for drilling for, producing, or processing oil, or (2) has the capacity to transport, store, transfer, or otherwise handle more than one thousand barrels of oil at any one time, shall establish and maintain, in accordance with regulations promulgated by the President, evidence of financial responsibility sufficient to satisfy the maximum amount of liability to which the owner or operator of such facility would be exposed in a case where he would be entitled to limit his liability in accordance with the provisions of section 304(b) of this title, or $35,000,000, whichever is less.

(c) Any claim authorized by section 303 (a) may be asserted directly against any guarantor providing evidence of financial responsibility for any owner or operator of an offshore facility or vessel as required under this section. In defending such claim, the guarantor shall be entitled to invoke all rights and defenses which would be available to such owner or operator under this owner or operator, but shall not be entitled to invoke the defense that the incident was caused by the willful misconduct of such owner or operator, but shall not be entitled to invoke any other defense which such guarantor might be entitled to invoke in proceedings brought by such owner or operator against such guarantor.

(d) The President shall conduct a study to determine—

(1) whether adequate private oil pollution insurance protection is available on reasonable terms and conditions to the owners and operators of vessels, onshore facilities, and offshore facilities; and

(2) whether the market for such insurance is sufficiently competitive to assure purchasers of features such as a reasonable range of deductibles, coinsurance provisions, and exclusions.

The President shall submit the results of his study, together with his recommendation, within one year after the date of enactment of this title, and shall submit an interim report on his study within three months after such date of enactment.

NOTIFICATION, DESIGNATION, AND ADVERTISEMENT

SEC. 306. (a) The person in charge of a vessel or offshore facility which is involved in an incident shall immediately notify the Secretary of the incident as soon as he has knowledge thereof. Notification received pursuant to this subsection or information obtained by the exploitation of such notification shall not be used against such person or his employer in any criminal case other than a case involving prosecution for perjury or for giving a false statement.

(b)(1) When the Secretary receives information pursuant to subsection (a) of this section or otherwise of an incident which involves oil pollution, the Secretary shall, where possible, designate the source or sources of the oil pollution and shall immediately notify the owner and operator of such source and the guarantor of such designation.

(2) When a source designated under paragraph (1) of this subsection is a vessel or offshore facility and the owner, operator, or guarantor fails to inform the Secretary, within five days after receiving notification of the designation, of his denial of such designation, such owner, operator, or guarantor, as required by regulations promulgated by the Secretary, shall advertise the designation and the procedures by which claims may be presented to him. If advertisement is not made in accordance with this paragraph, the Secretary shall, as he finds necessary, and at the expense of the owner, operator, or guarantor involved, advertise the designation and the procedures by which claims may be presented to such owner, operator, or guarantor.

(c) In a case where—

(1) the owner, operator, and guarantor all deny a designation in accordance with paragraph (2) of subsection (b) of this section;

(2) the source of the discharge was a public vessel; or

(3) the Secretary is unable to designate the source or sources of the discharge under paragraph (1) of such subsection (b), the Secretary shall advertise or otherwise notify potential claimants of the procedures by which claims may be presented to the Fund.

(d) Advertisement under subsection (b) of this section shall commence no later than fifteen days after the date of the designation made under such subsection and shall continue for a period of no less than thirty days.

CLAIMS SETTLEMENT

SEC. 307. (a) Except as provided in subsection (b) of this section, all claims shall be presented to the owner, operator, or guarantor.

(b) All claims shall be presented to the Fund—

(1) where the Secretary has advertised or otherwise notified claimants in accordance with section 306(c) of this title; or

(2) where the owner or operator may recover under the provisions of section 303(b)(1) of this title.

(c) In the case of a claim presented in accordance with subsection (a) of this section, and in which—

(1) the person to whom the claim is presented denies all liability for the claim, for any reason; or

(2) the claim is not settled by any person by payments to the claimant within sixty days from the date upon which (A) the claim is presented, or (B) advertising is commenced pursuant to section 306(b)(2), whichever is later,

the claimant may elect to commence an action in court against the owner, operator, or guarantor, or to present the claim to the Fund, that election to be irrevocable and exclusive.

(d) In the case of a claim presented in accordance with subsection (a) of this section, where full and adequate compensation is unavailable, either because the claim exceeds a limit of liability invoked under section 304(b) of this title or because the owner, operator, and guarantor to whom the claim is presented are financially incapable of meeting their obligations in full, a claim for the uncompensated damages may be presented to the Fund.

(e) In the case of a claim which is presented to any person, pursuant to subsection (a) of this section, and which is being presented to the Fund, pursuant to subsection (c) or (d) of this section, such person, at the request of the claimant, shall transmit the claim and supporting documents to the Fund. The Secretary may, by regulation, prescribe the documents to be transmitted and the terms under which they are to be transmitted.

(f) In the case of a claim presented to the Fund, pursuant to subsection (b), (c), or (d) of this section, and in which the Fund—

(1) denies all liability for the claim, for any reason; or

(2) does not settle the claim by payment to the claimant within sixty days after the date upon which (A) the claim is presented to the Fund, or (B) advertising is commenced pursuant to section 306(c) of this title, whichever is later.

the claimant may submit the dispute to the Secretary for decision in accordance with section 554 of title 5, United States Code. However, a claimant who has presented a claim to the Fund pursuant to such subsection (b) may elect to commence an action in court against the Fund in lieu of submission of the dispute to the Secretary for decision, that election to be irrevocable and exclusive.

(g)(1) The Secretary shall promulgate regulations which establish uniform procedures and standards for the appraisal and settlement of claims against the Fund.

(2) Except as provided in paragraph (3) of this subsection, the Secretary shall use the facilities and services of private insurance and claims adjusting organizations or State agencies in processing claims against the Fund and may contract to pay compensation for those facilities and services. Any contract made under the provisions of this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes (41 U.S.C. 5) upon a showing by the Secretary that advertising is not reasonably practicable. The Secretary may make advance payments to a contractor for services and facilities, and the Secretary may advance to the contractor funds to be used for the payment of claims. The Secretary may review

and audit claim payments made pursuant to this subsection. A payment to a claimant for a single claim in excess of $100,000, or two or more claims aggregating in excess of $200,000, shall be first approved by the Secretary. When the services of a State agency are used in processing and settling claims, no payment may be made on a claim asserted by or on behalf of such State or any of its agencies or subdivisions unless the payment has been approved by the Secretary.

(3) To the extent necessitated by extraordinary circumstances, where the services of such private organizations or State agencies are inadequate, the Secretary may use Federal personnel to process claims against the Fund.

(h) Notwithstanding subsection (b) of section 556 of title 5, United States Code, the Secretary is authorized to appoint, from time to time for a period of not to exceed one hundred and eighty days, one or more panels, each comprised of three individuals, to hear and decide disputes submitted to the Secretary pursuant to subsection (f) of this section. At least one member if each panel shall be qualified to conduct adjudicatory proceedings and shall preside over the activities of the panel. Each member of a panel shall possess competence in the evaluation and assessment of property damage and the economic losses resulting therefrom. Panel members may be appointed from private life or from any Federal agency except the staff administering the Fund. Each panel member appointed from private life shall receive a per diem compensation, and each panel member shall receive necessary traveling and other expenses while engaged in the work of a panel. The provisions of chapter 11 of title 18, United States Code, and of Executive Order 11222, as amended, regarding special Government employees, shall apply to panel members appointed from private life.

(i)(1) Upon receipt of a request for a decision from a claimant, properly made, the Secretary shall refer the dispute to (A) an administrative law judge appointed under section 3105 of title 5, United States Code, or (B) a panel appointed under subsection (h) of this section.

(2) The administrative law judge and each member of a panel to which a dispute is referred for decision shall be a resident of the United States judicial circuit within which the damage complained of occurred, or, if the damage complained of occurred within two or more circuits, of any of the affected circuits, or, if the damage occurred outside any circuit, of the nearest circuit.

(3) Upon receipt of a dispute, the administrative law judge or panel shall adjudicate the case and render a decision in accordance with section 554 of title 5, United States Code. In any proceeding subject to this subsection, the presiding officer may require by subpena any person to appear and testify or to appear and produce books, papers, documents, or tangible things at a hearing or deposition at any designated place. Subpenas shall be issued and enforced in accordance with procedures in subsection (d) of section 555 of title 5, United States Code, and rules promulgated by the Secretary. If a person fails or refuses to obey a subpena, the Secretary may invoke the aid of the district court of the United States where the person is found, resides, or transacts business in requiring the attendance and testimony of the person and the production by him of books, papers, documents, or any tangible things.

(4) A hearing conducted under this subsection shall be conducted within the United States judicial district within which, or nearest to which, the damage complained of occurred, or, if the damage complained of occurred within two or more districts, in any of the affected districts, or if the damage occurred outside any district, in the nearest district.

(5) The decision of the administrative law judge or panel under this subsection shall be the final order of the Secretary, except that the Secretary, in his discretion and in accordance with regulations which he may promulgate, may review the decision upon his own initiative or upon exception of the claimant or the Fund.

(6) Final orders of the Secretary made under this subsection shall be reviewable pursuant to section 702 of title 5, United States Code, in the district courts of the United States.

(j)(1) In any action brought pursuant to this title against an owner, operator, or guarantor, both the plaintiff and defendant shall serve a copy of the complaint and all subsequent pleadings therein upon the Fund at the same time such pleadings are served upon the opposing parties.

(2) The Fund may intervene in any action described in paragraph (1) of this subsection as a matter of right.

(3) In any action described in paragraph (1) of this subsection to which the Fund is a party, if the owner, operator, or guarantor admits liability under this title, the Fund upon its motion shall be dismissed therefrom to the extent of the admitted liability.

(4) If the Fund receives from either the plaintiff or the defendant notice of an action described in paragraph (1) of this subsection, the Fund shall be bound by any judgment entered therein, whether or not the Fund was a party to the action.

(5) If neither the plaintiff nor the defendant gives notice of an action described in paragraph (1) of this subsection to the Fund the limitation of liability otherwise permitted by section 304(b) of this title shall not be available to the defendant, and the plaintiff shall not recover from the Fund any sums not paid by the defendant.

(k) In any action brought against the Fund under this title, the plaintiff may join any owner, operator, or guarantor, and the Fund may join any person who is or may be liable to the Fund under any provision of this title.

(l) No claim may be presented, nor may an action be commenced for economic losses recoverable under this title, unless such claim is presented to, or such action is commenced against, the owner, operator, or guarantor, or the Fund, as to their respective liabilities, within three years after the date of discovery of the economic loss for which a claim may be asserted under section 303(a) of this title, or within six years of the date of the incident which resulted in such loss, whichever is earlier.

SUBROGATION

SEC. 308. (a) Any person or governmental entity, including the Fund, who pays compensation to any claimant for an economic loss, compensable under section 303 of this title, shall be subrogated to all rights, claims, and causes of action which such claimant has under this title.

(b) Upon request of the Secretary, the Attorney General may commence an action, on behalf of the Fund, for the compensation paid by the Fund to any claimant pursuant to this title. Such an action may be commenced against any owner, operator, or guarantor, or against any other person or governmental entity, who is liable, pursuant to any law, to the compensated claimant or to the Fund, for economic losses for which the compensation was paid.

(c) In any claim or action by the Fund against any owner, operator, or guarantor, pursuant to the provisions of subsection (a) or (b), the Fund shall recover—

(1) for a claim presented to the Fund (where there has been a denial of source designation) pursuant to section 307(b)(1) of this title, or (where there has been a denial of liability) pursuant to section 307(c)(1) of this title—

(A) subject only to the limitation of liability to which the defendant is entitled under section 304(b) of this title, the amount the Fund has paid to the claimant, without reduction;

(B) interest on such amount, at the rate calculated in accordance with section 304(g)(2) of this title, from the date upon which the claim is presented by the claimant to the defendant to the date upon which the Fund is paid by the defendant, inclusive, less the period, if any, from the date upon which the Fund offers to the claimant the amount finally paid by the Fund to the claimant in satisfaction of the claim against the Fund to the date upon which the claimant accepts that offer, inclusive; and

(C) all costs incurred by the Fund by reason of the claim, both of the claimant against the Fund and the Fund against the defendant, including, but not limited to, processing costs, investigating costs, court costs, and attorneys' fees; and

(2) for a claim presented to the Fund pursuant to section 307(c)(2) of this title—

(A) in which the amount the Fund has paid to the claimant exceeds the largest amount, if any, the defendant offered to the claimant in satisfaction of the claim of the claimant against the defendant—

(i) subject to dispute by the defendant as to any excess over the amount offered to the claimant by the defendant, the amount the Fund has paid to the claimant;

(ii) interest, at the rate calculated in accordance with section 304(g)(2) of this title, for the period specified in paragraph (1)(B) of this subsection; and

(iii) all costs incurred by the Fund by reason of the claim of the Fund against the defendant, including, but not limited to, processing costs, investigating costs, court costs, and attorneys' fees; or

(B) in which the amount the Fund has paid to the claimant is less than or equal to the largest amount the defendant offered to the claimant in satisfaction of the claim of the claimant against the defendant—

(i) the amount which the Fund has paid to the claimant, without reduction;

(ii) interest, at the rate calculated in accordance with section 304(g)(2) of this title, from the date upon which the claim is presented by the claimant to the defendant to the date upon which the defendant offered to the claimant the largest amount referred to in this subparagraph, except that if the defendant tenders the offer to the largest amount referred to in this subparagraph within sixty days after the date upon which the claim of the claimant is either presented to the defendant or advertising is commenced pursuant to section 306 of this title, the defendant shall not be liable for interest for that period; and

(iii) interest from the date upon which the claim of the Fund against the defendant is presented to the defendant to the date upon which the Fund is paid, inclusive, less the period, if any, from the date upon which the defendant offers to the Fund the amount finally paid to the Fund in satisfaction of the claim of the Fund to the date upon which the Fund accepts that offer, inclusive.

(d) The Fund shall pay over to the claimant that portion of any interest the Fund recovers, pursuant to subsection (c)(1) and (2)(A), for the period from the date upon which the claim of the claimant is presented to the defendant to the date upon which the claimant is paid by the Fund, inclusive, less the period from the date upon which the Fund offers to the claimant the amount finally paid to the claimant in satisfaction of the claim to the date upon which the claimant accepts such offer, inclusive.

(e) The Fund is entitled to recover for all interest and costs specified in subsection (c) of this section without regard to any limita-

tion of liability to which the defendant may otherwise be entitled under this title.

JURISDICTION AND VENUE

SEC. 309. (a) The United States district courts shall have original and exclusive jurisdiction of all controversies arising under this title, without regard to the citizenship of the parties or the amount in controversy.

(b) Venue shall lie in any district wherein the injury complained of occurred, or wherein the defendant resides, may be found, or has his principal office. For the purposes of this section, the Funds shall reside in the District of Columbia.

RELATIONSHIP TO OTHER LAWS

SEC. 310. (a) Any person who receives compensation for damages or removal costs pursuant to this title shall be precluded from recovering compensation for the same damages or removal costs pursuant to any other State or Federal law. Any person who receives compensation for damages or removal costs pursuant to any other State or Federal law shall be precluded from receiving compensation for the same damages or removal costs under this title.

(b) No owner or operator of an offshore facility or vessel who establishes and maintains evidence of financial responsibility in accordance with this section shall be required under any State law, rule, or regulation to establish any other evidence of financial responsibility in connection with liability for the discharge of oil from such offshore facility or vessel. Evidence of compliance with the financial responsibility requirement of this section shall be accepted by a State in lieu of any other requirement of financial responsibility imposed by such State in connection with liability for the discharge of oil from such offshore facility or vessel.

(c) Except as otherwise provided in this title, this title shall not be interpreted to preempt the field of liability or to preclude any State from imposing additional requirements or liability for any discharge of oil resulting in damages or removal costs within the jurisdiction of such State.

PROHIBITION

SEC. 311. The discharge of oil from any offshore facility or vessel, in quantities which the President under section 311(b) of the Federal Water Pollution Control Act (33 U.S.C. 1321(b)) determines to be harmful, is prohibited.

PENALTIES

SEC. 312. (a)(1) Any person who fails to comply with the requirements of section 305 of this title, the regulations promulgated thereunder, or any denial or detention order, shall be subject to a civil penalty of not to exceed $10,000.

(2) The civil penalty described in paragraph (1) of this subsection may be assessed and compromised by the resident or his designee, in connection with section 305(a)(1) of this title, and by the Secretary, in connection with section 305(a)(3) and section 305(b) of this title. No penalty shall be assessed until notice and an opportunity for hearing on the alleged violation have been given. In determining the amount of the penalty or the amount agreed upon in compromise, the demonstrated good faith of the party shall be taken into consideration.

(3) At the request of the official assessing a penalty under this subsection, the Attorney General may bring an action in the name of the Fund to collect the penalty assessed.

(b) Any person in charge who is subject to the jurisdiction of the United States and who fails to give the notification required by section 306(a) of this title shall, upon conviction, be fined not more than $10,000 or imprisoned for not more than one year, or both.

AUTHORIZATION OF APPROPRIATIONS

SEC. 313. (a) There is authorized to be appropriated for the administration of this title $10,000,000 for the fiscal year ending September 30, 1979, $5,000,000 for the fiscal year ending September 30, 1980, and $5,000,000 for the fiscal year ending September 30, 1981.

(b) There are also authorized to be appropriated to the Fund, from time to time, such amounts as may be necessary to carry out the purposes of the applicable provisions of this title, including the entering into contracts, any disbursements of funds, and the issuance of notes or other obligations pursuant to section 302(f) of this title.

(c) Notwithstanding any other provision of this title, the authority to make contracts, to make disbursements, to issue notes or other obligations pursuant to section 302(f) of this title, to charge and collect fees pursuant to section 302(d) of this title, or to exercise any other spending authority shall be effective only to the extent provided, without fiscal year limitation, in appropriation Acts enacted after the date of enactment of this title.

ANNUAL REPORT

SEC. 314. Within six months after the end of each fiscal year, the Secretary shall submit to the Congress (1) a report on the administration of the Fund during such fiscal year, and (2) his recommendations for such legislative changes as he finds necessary or appropriate to improve the management of the Fund and the administration of the liability provisions of this title.

EFFECTIVE DATES

SEC. 315. (a) This section, subsection (e) of section 304, subsection (d) of section 305, and all provisions of this title authorizing the delegation of authority or the promulgation of regulations shall be effective on the date of enactment of this title.

(b) All other provisions of this title, and rules and regulations promulgated pursuant to such provisions, shall be effective on the one hundred and eightieth day after the date of enactment of this title.

TITLE IV—FISHERMEN'S CONTINGENCY FUND

DEFINITIONS

SEC. 401. As used in this title, the term—

(1) "citizen of the United States" means any person who is a United States citizen by law, birth, or naturalization, any State, any agency of a State or a group of States, or any corporation, partnership, or association organized under the laws of any State which has as its president or other chief executive officer and as its chairman of the board of directors, or holder of a similar office, a person who is a United States citizen by law, birth, or naturalization, and which has at least 75 per centum of the interest of therein owned by citizens of the United States. Seventy-five per centum of the interest in the corporation shall not be deemed to be owned by citizens of the United States—

(A) if the title to 75 per centum of its stock is not vested in such citizens free from any trust or fiduciary obligation in favor of any person not a citizen of the United States;

(B) if 75 per centum of the voting power in such corporation is not vested in citizens of the United States;

(C) if through any contract or understanding it is so arranged that more than 25 per centum of the voting power may be exercised, directly or indirectly, in behalf of any person who is not a citizen of the United States; or

(D) if by any other means whatsoever control of any interest in the corporation in excess of 25 per centum is conferred upon or permitted to be exercised by any person who is not a citizen of the United States;

(2) "commercial fisherman" means any citizen of the United States who owns, operates, or derives income from being employed on a commercial fishing vessel;

(3) "commercial fishing vessel" means any vessel, boat, ship, or other craft which is (A) documented under the laws of the United States or, if under five net tons, registered under the laws of any State, and (B) used for, equipped to be used for, or of a type which is normally used for commercial purposes for the catching, taking, or harvesting of fish or the aiding or assisting at sea of any activity related to the catching, taking, or harvesting of fish, including, but not limited to, preparation, supply, storage, refrigeration, transportation, or processing;

(4) "fish" means finfish, mollusks, crustaceans, and all other forms of marine animal and plant life other than marine mammals, birds, and highly migratory species;

(5) "fishing gear" means (A) any commercial fishing vessel, and (B) any equipment of such vessel, whether or not attached to such a vessel;

(6) "Fund" means the Fishermen's Contingency Fund established under section 402 of this title; and

(7) "Secretary" means the Secretary of Commerce or the designee of such Secretary.

ESTABLISHMENT OF THE FISHERMEN'S CONTINGENCY FUND; FEE COLLECTION

SEC. 402. (a) There is hereby established in the Treasury of the United States a Fishermen's Contingency Fund. The Fund shall be available to the Secretary without fiscal year limitation as a revolving fund for the purpose of making payments pursuant to this section. The total amount in the Fund shall at no time exceed $1,000,000. Amounts paid pursuant to the provisions of subsections (c) and (d) of this section shall be deposited in the Fund. The Fund may sue or be sued in its own name.

(b) The Secretary is authorized to establish and maintain an area account within the Fund for any area of the Outer Continental Shelf for purposes of providing reasonable compensation for damages to, or loss of, fishing gear and any resulting economic loss to commercial fishermen due to activities related to oil and gas exploration, development, and production in such area.

(c) Upon establishment of an area account for any area of the Outer Continental Shelf pursuant to subsection (b) of this section, any holder of a lease issued or maintained under the Outer Continental Shelf Lands Act for any tract in such area and any holder of an exploration permit, or of an easement or right-of-way for the construction of a pipeline in such area, shall pay an amount specified by the Secretary for the purpose of the establishment and maintenance of an area account for such area. The Secretary of the Interior shall collect such amount and deposit it to the credit of such area account within the Fund. In any calendar year, no holder of a lease, permit, easement, or right-of-way shall be required to pay an amount in excess of $5,000 per lease, permit, easement, or right-of-way.

(d) Subject to subsection (a) of this section, each area account established pursuant to this section shall be maintained at a level not to exceed $100,000 and, if depleted, shall be replenished by assessments of holders of leases, permits, easement, and right-of-way in such area.

(e) Amounts in each such area account shall be available for disbursement and shall be disbursed, subject to such amounts as are provided in appropriations Acts, for only the following purposes:

(1) Administrative and personnel expenses of such area account and administrative

and personnel expenses of the Fund which relate to such area account, except that amounts disbursed for such expenses in any fiscal year shall not exceed 15 per centum of the amounts deposited in such revolving account in such fiscal year.

(2) The payment of any claim in accordance with procedures established under this section for damages suffered as a result of activities in the area for which such area account was established.

(3) Reasonable attorney's fees awarded pursuant to section 405 (e) of this title.

DUTIES AND POWERS

SEC. 403. (a) In carrying out the provisions of this title, the Secretary shall—

(1) prescribe, and from time to time amend, regulations for the filing, processing, and fair and expeditious settlement of claims pursuant to this title, including a time limitation on the filing of such claims; and

(2) identify and classify all potential hazards to commercial fishing caused by Outer Continental Shelf oil and gas exploration, development, and production activities, including all obstructions on the bottom, throughout the water column, and on the surface.

(b) The Secretary of the Interior shall establish regulations requiring all materials, equipment, tools, containers, and all other items used on the Outer Continental Shelf to be properly color coded, stamped, or labeled, wherever practicable, with the owner's identification prior to actual use.

(c) (1) Payments shall be disbursed by the Secretary from the appropriate area account to compensate commercial fishermen for actual and consequential damages, including loss of profits, due to damages to, or loss of, fishing gear by materials, equipment, tools, containers, or other items associated with oil and gas exploration, development, or production activities in such area, whether or not such damage occurred in such area.

(2) Notwithstanding the provisions of paragraph (1) of this subsection, no payment may be made by the Secretary from any area account established under this title—

(A) when the damage set forth in a claim was caused by materials, equipment, tools, containers, or other items attributable to a financially responsible party;

(B) to the extent that damages were caused by the negligence or fault of the commercial fisherman making the claim;

(C) if the damage set forth in the claim was sustained prior to the date of enactment of this title;

(D) in the case of a claim for damage to, or loss of, fishing gear, in an amount in excess of the replacement value of the fishing gear with respect to which the claim is filed;

(E) in the case of a claim for loss of profits (i) for any period in excess of 6 months, and (ii) unless such claim is supported by records with respect to the claimant's profits during the previous 12-month period; and

(F) for any portion of the damages claimed with respect to which the claimant has or will receive compensation from insurance.

BURDEN OF PROOF

SEC. 404. With respect to any claim for damages filed pursuant to this title, there shall be a presumption that such claim is valid if the claimant establishes that—

(1) the commercial fishing vessel was being used for fishing and was located in an area affected by Outer Continental Shelf activities;

(2) a report on the location of the material, equipment, tool, container, or other item which caused such damages and the nature of such damages was made within five days after the date on which such damages were discovered;

(3) there was no record on nautical charts or the Notice to Mariners on the date such damages were sustained that such material, equipment, tool, container, or other item existed in such area; and

(4) there was no proper surface marker or lighted buoy which was attached or closely anchored to such material, equipment, tool, container, or other item.

CLAIM PROCEDURES AND SUBROGATION OF RIGHTS

SEC. 405. (a) Any commercial fisherman suffering damages compensable under this title may file a claim for compensation with the Secretary, except that no such claim may be filed more than 60 days after the date of discovery of the damages with respect to which such claim is made.

(b) Upon receipt of any claim under this section, the Secretary shall—

(1) transmit a copy of the claim to the Secretary of the Interior; and

(2) refer such matter to a hearing examiner appointed under section 3105 of title 5, United States Code.

(c) The Secretary of the Interior shall make reasonable efforts to notify all persons known to have engaged in activities associated with Outer Continental Shelf energy activity in the vicinity. Each such person shall promptly notify the Secretary and the Secretary of the Interior as to whether he admits or denies responsibility for the damages claimed. Any such person, including lessees or permittees or their contractors or subcontractors, may submit evidence at any hearing conducted with respect to such claim.

(d) The hearing examiner shall, within 120 days after such matter is referred to him by the Secretary, adjudicate the case and render a decision in accordance with section 554 of title 5, United States Code.

(e) If the decision of the hearing examiner is in favor of the commercial fishermen filing the claim, such hearing examiner shall include, as part of the amount certified to the Secretary under subsection (h) (1) of this section, reasonable attorneys' fees incurred by such commercial fisherman in pursuing such claim.

(f) (1) For purposes of any hearing conducted pursuant to this section, the hearing examiner shall have the power to administer oaths and subpena the attendance or testimony of witnesses and the production of books, records, and other evidence relative or pertinent to the issues being presented for determination.

(2) In any hearing conducted pursuant to this section with respect to a claim for damages resulting from activities on any area of the Outer Continental Shelf, the hearing examiner shall consider evidence of obstructions in such area which have been identified pursuant to the survey conducted under section 407 of this title.

(g) A hearing conducted under this section shall be conducted within the United States judicial district within which the matter giving rise to the claim occurred, or, if such matter occurred within two or more districts, in any of the affected districts, or, if such matter occurred outside of any district, in the nearest district.

(h) (1) Upon a decision by the hearing examiner and in the absence of a request for judicial review, any amount to be paid, subject to the limitations of this section, shall be certified to the Secretary, who shall promptly disburse the award. Such decision shall not be reviewable by the Secretary.

(2) Upon payment of a claim by the Secretary pursuant to this subsection, the Secretary shall acquire by subrogation all rights of the claimant against any person found to be responsible for the damages with respect to which such claim was made.

(3) Any person who denies responsibility for damages with respect to which a claim is made and who is subsequently found to be responsible for such damages, and any commercial fisherman who files a claim for damages and who is subsequently found to be responsible for such damages, shall pay the costs of the proceedings under this section with respect to such claim.

(i) Any person who suffers legal wrong or who is adversely affected or aggrieved by the decision of a hearing examiner under this section may, no later than 60 days after such decision is made, seek judicial review of such decision in the United States court of appeals for the circuit in which the damage occurred, or if such damage occurred outside of any circuit, in the United States court of appeals for the nearest circuit.

ANNUAL REPORT

SEC. 406. (a) The Secretary shall submit an annual report to the Congress which shall set forth—

(1) a description of the types of damages set forth in claims filed with the Secretary during the previous year for compensation from the Fund;

(2) the amount of compensation awarded to claimants during the previous year; and

(3) the number of cases during the previous year in which damages were determined to be the responsibility of a lessee or permittee conducting operations on the Outer Continental Shelf, or the contractor or subcontractor of such a lessee or permittee.

(b) In addition to the material described in subsection (a) of this section, the Secretary shall, after consultation with the Secretary of the Interior, include in the first annual report an evaluation of the feasibility and comparative cost of preventing or reducing obstructions on the Outer Continental Shelf which pose potential hazards to commercial fishing or fishing gear by (1) imposing fines or penalties on lessees or permittees, or contractors or subcontractors of lessees or permittees, who are responsible for such obstructions, or (2) requiring the bonding of such lessees or permittees or such contractors or subcontractors.

SURVEY OF OBSTRUCTIONS ON THE OUTER CONTINENTAL SHELF

SEC. 407. (a) The Secretary, in cooperation with the Secretary of the Interior, shall conduct a two-year survey of obstructions on the Outer Continental Shelf. Such survey shall be conducted for purposes of identifying (1) natural obstructions on the Outer Continental Shelf which pose potential hazards to commercial fishing or fishing gear, and (2) in addition, in the case of areas in which oil and gas exploration, development, or production is taking place, manmade obstructions relating to such activities which pose potential hazards to commercial fishing or fishing gear.

(b) The Secretary shall, on the basis of the survey conducted under this section, and regulations promulgated under section 403 (a) of this title, develop charts for commercial fisherman identifying obstructions on the Outer Continental Shelf.

(c) During the first six months of the survey conducted under this section, the Secretary shall concentrate on areas of the Outer Continental Shelf where oil and gas production has commenced or is expected to commence prior to the expiration of the two-year period of such survey.

TITLE V—AMENDMENTS TO THE COASTAL ZONE MANAGEMENT ACT OF 1972

COASTAL ENERGY IMPACT PROGRAM

SEC. 501. (a) Paragraph (2) of section 308 (b) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a(b)(2)) is amended—

(1) by striking out "The amounts granted" and inserting in lieu thereof "Subject to paragraph (3), the amounts payable";

(2) by striking out "(A), (B), (C), and (D)" and inserting in lieu thereof "(A), (B), and (C)";

(3) in subparagraph (A), by striking out "one-third" and inserting in lieu thereof "one-half";

(4) in subparagraph (B), by striking out "one-sixth" and inserting in lieu thereof "one-quarter";

(5) in subparagraph (C), by striking out "one-sixth" and inserting in lieu thereof "one-quarter"; and

(6) by striking out subparagraph (D).

(b) Such section 308(b) is amended—

(1) by renumbering paragraphs (3) through (5), and any references thereto, as paragraphs (4) through (6), respectively; and

(2) by inserting after paragraph (2) the following new paragraph:

"(3)(A)(i) After making the calculations required under paragraph (2) for any fiscal year, the Secretary shall—

"(I) with respect to any coastal state which, based on such calculations, would receive an amount which is less than 2 per centum of the amount appropriated for such fiscal year, increase the amount payable to such fiscal year, except that a coastal state appropriated amount; and

"(II) with respect to any coastal state which, in such fiscal year, would not receive a grant under paragraph (2), make a grant to such coastal state in an amount equal to 2 per centum of the total amount appropriated for making grants to all states under paragraph (2) in such fiscal year if any other coastal state in the same region will receive a grant under such paragraph in such fiscal year, except that a coastal state shall not receive a grant under this subclause unless the Secretary determines that it is being or will be impacted by outer Continental Shelf energy activity and that it will be able to expend or commit the proceeds of such grant in accordance with the purposes set forth in paragraph (5).

"(ii) For purposes of this subparagraph—

"(I) the states of Connecticut, Delaware, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, and Virginia, the Commonwealth of Puerto Rico, and the Virgin Islands (the Atlantic coastal states) shall constitute one 'region';

"(II) the states of Alabama, Florida, Louisiana, Mississippi, and Texas (the Gulf coastal states) shall constitute one 'region';

"(III) the states of California, Hawaii, Oregon, and Washington (the Pacific coastal states) shall constitute one 'region'; and

"(IV) the state of Alaska shall constitute one 'region'.

"(B) If, after the calculations required under subparagraph (A), the total amount of funds appropriated for making grants to coastal states in any fiscal year pursuant to this subsection is less than the total amount of grants payable to all coastal states in such fiscal year, there shall be deducted from the amount payable to each coastal state which will receive more than 2 per centum of the amount of funds so appropriated an amount equal to the product of—

"(i) the amount by which the total amount of grants payable to all coastal states in such fiscal year exceeds the total amount of funds appropriated for making such grants; multiplied by

"(ii) a fraction, the numerator of which is the amount of grants payable to such coastal state in such fiscal year reduced by an amount equal to 2 per centum of the total amount appropriated for such fiscal year and the denominator of which is the total amount of grants payable to coastal states which, in such fiscal year, will receive more than 2 per centum of the amount of funds so appropriated, reduced by an amount equal to the product of 2 per centum of the total amount appropriated for such fiscal year multiplied by the number of such coastal states.

"(C)(i) If, after the calculations required under subparagraph (B) for any fiscal year, any coastal state would receive an amount able to such coastal state to 37½ per ecntum the amount appropriated for such fiscal year, the Secretary shall reduce the amount payable to such coastal state to 37½ per centum of such appropriated amount.

"(ii) Any amount not payable to a coastal state in a fiscal year due to a reduction under clause (i) shall be payable proportionately to all coastal states which are to receive more than 2 per centum and less than 37½ per centum of the amount appropriated for such fiscal year, except that in no event shall any coastal state receive more than 37½ per centum of such appropriated amount.

"(iii) For purposes of this subparagraph, the term 'payable proportionately' means payment in any fiscal year in accordance with the provisions of paragraph (2), except that in making calculations under such paragraph the Secretary shall only include those coastal states which are to receive more than 2 per centum and less than 37½ per centum of the amount appropriated for such fiscal year.".

(c)(1) Paragraph (5)(B)(i) of such section 308(b) (as renumbered by subsection (b) of this section) is amended to read as follows:

"(i) necessary to provide new or improved public facilities and public services which are required as a result of outer Continental Shelf energy activity;".

(2) Paragraph (5)(B of such section 308(b) (as so renumbered) is amended by adding at the end thereof the following new sentence:

"The Secretary may, pursuant to criteria promulgated by rule, describe geographic areas in which public facilities and public services referred to in clause (i) shall be presumed to be required as a result of outer Continental Shelf energy activity for purposes of disbursing the proceeds of grants under this subsection.".

AUTHORIZATION OF APPROPRIATOINS

SEC. 502. Paragraph (3) of section 318(a) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1464(a)(3) is amended to read as follows:

"(3) such sums, not to exceed $50,000,000 for each of the fiscal years ending September 30, 1977, and September 30, 1978, and not to exceed $130,000,000 per fiscal year for each of the fiscal years occurring during the period beginning on October 1, 1978, and ending September 30, 1988, as may be necessary for grants under section 308(b);".

OUTER CONTINENTAL SHELF GRANTS

SEC. 503. (a) Section 308(c) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a(c)) is amended—

(1) by inserting "(1)" immediately after "(c)"; and

(2) by adding at the end thereof the following new paragraph:

"(2) The Secretary shall make grants under this paragraph to any coastal state which the Secretary finds is likely to be affected by outer Continental Shelf energy activities. Such grants shall be used by such state to carry out its responsibilities under the Outer Continental Shelf Lands Act. The amount of any such grant shall not exceed 80 per centum of the cost of carrying out such responsibilities.".

(b) Section 308(a)(1) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456(a)(1)) is amended—

(1) in subparagraph (B) thereof, by striking out "subsection (c)" and inserting in lieu thereof "subsection (c)(1)"; and

(2) by redesignating subparagraphs (C) through (F), and any references thereto, as subparagraphs (D) through (G), respectively, and inserting immediately after subparagraph (B) the following new subparagraph:

"(C) grants, under subsection (c)(2), to coastal states to carry out their responsibilities under the Outer Continental Shelf Lands Act;".

(c) Section 308(h) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a(h)) is amended by striking out "subsections (c)" each place it appears and inserting in lieu thereof "subsections (c)(1)".

(d) Section 308(k)(1) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a(k)(1)) is amended by striking out "and (c)" and inserting in lieu thereof "and (c)(1)".

(e) Section 318(a) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a is amended—

(1) by redesignating paragraphs (4) through (8), and all references thereto, as paragraphs (5) through (9), respectively; and

(2) by inserting immediately after paragraph (3) the following new paragraph:

"(4) such sums, not to exceed $5,000,000 for each of the fiscal years ending September 30, 1979, September 30, 1980, September 30, 1981, September 30, 1982, and September 30, 1983, as may be necessary for grants under section 308(c)(2), to remain available until expended;".

(f) Section 318(b) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1464(b)) is amended—

(1) by striking out "subsection (b)" and inserting in lieu thereof "subsections (b) and (c)(2)"; and

(2) by striking out "subsections (c)" and inserting in lieu thereof "subsections (c)(1)".

STATE MANAGEMENT PROGRAM

SEC. 504. Section 307(c)(3)(B)(ii) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456(c)(3)(B)(ii)) is amended to read as follows:

"(ii) concurrence by such state with such certification is conclusively presumed as provided for in subparagraph (A), except if such state fails to concur with or object to such certification within three months after receipt of its copy of such certification and supporting information, such state shall provide the Secretary, the appropriate federal agency, and such person with a written statement describing the status of review and the basis for further delay in issuing a final decision, and if such statement is not so provided, concurrence by such state with such certification shall be conclusively presumed; or".

TITLE VI—MISCELLANEOUS PROVISIONS

REVIEW OF SHUT-IN OR FLARING WELLS

SEC. 601. (a) In a report submitted within six months after the date of enactment of this Act, and his annual report thereafter, the Secretary of the Interior shall list all shut-in oil and gas wells and wells flaring natural gas on leases issued under the Outer Continental Shelf Lands Act. Each such report shall be submitted to the Comptroller General and shall indicate why each well is shut-in or flaring natural gas, and whether the Secretary intends to require production on such a shut-in well or order cessation flaring.

(b) Within six months after receipt of the Secretary's report, the Comptroller General shall review and evaluate the methodology used by the Secretary in allowing the wells to be shut-in or to flare natural gas and submit his findings and recommendations to the Congress.

SEC. 602. As soon as feasible and no later than ninety days after the date of enactment of this Act, and annually thereafter, the Secretary of the Interior shall submit a report or reports to the Congress describing

the extent, during the two-year period preceding such report, of delinquent royalty accounts under leases issued under any Act which regulates the development of oil and gas on Federal lands, and what new auditing, post-auditing, and accounting procedures have been adopted to assure accurate and timely payment of royalties and net profit shares. Such report or reports shall include any recommendations for corrective action which the Secretary of the Interior determines to be appropriate.

NATURAL GAS DISTRIBUTION

SEC. 603. (a) The purpose of this section is to encourage expanded participation by local distribution companies in acquisition of leases and development of natural gas resources on the Outer Continental Shelf by facilitating the transportation in interstate commerce of natural gas, which is produced from a lease located on the Outer Continental Shelf and owned, in whole or in part, by a local distribution company, from such lease to the service area of such local distribution company.

(b) The Federal Energy Regulatory Commission shall, after opportunity for presentation of written and oral views, promulgate and publish in the Federal Register a statement of Commission policy which carries out the purpose of this section and sets forth the standards under which the Commission will consider applications for, and, as appropriate, issue certificates of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, for the transportation in interstate commerce of natural gas, which is produced from a lease located on the Outer Continental Shelf and owned, in whole or in part, by a local distribution company, from such lease to the service area of such local distribution company. Such statement of policy shall specify the criteria, limitations, or requirements the Commission will apply in determining—

(1) whether the application of any local distribution company qualifies for consideration under the statement of policy; and

(2) whether the public convenience and necessity will be served by the issuance of the requested certificate of transportation.

Such statement of policy shall also set forth the terms or limitations on which the Commission may condition, pursuant to section 7 of the Natural Gas Act, the issuance of a certificate of transportation under such statement of policy. To the maximum extent practicable, such statement shall be promulgated and published within one year after the date of enactment of this section.

(c) For purposes of this section, the term—

(1) "local distribution company" means any person—

(A) engaged in the distribution of natural gas at retail, including any subsidiary or affiliate thereof engaged in the exploration and production of natural gas; and

(B) regulated, or operated as a public utility, by a State or local government or agency thereof;

(2) "interstate commerce" shall have the same meaning as such term has under section 2(7) of the Natural Gas Act; and

(3) "Commission" means the Federal Energy Regulatory Commission.

ANTIDISCRIMINATION PROVISIONS

SEC. 604. Each agency or department given responsibility for the promulgation or enforcement of regulations under this Act or the Outer Continental Shelf Lands Act shall take such affirmative action as deemed necessary to prohibit all unlawful employment practices and to assure that no person shall, on the grounds of race, creed, color, national origin or sex, be excluded from receiving or participating in any activity, sale, or employment, conducted pursuant to the provisions of this Act or the Outer Continental Shelf Lands Act. The agency or department shall promulgate such rules as it deems necessary to carry out the purposes of this section, and any rules promulgated under this section, whether through agency and department provisions or rules, shall be similar to those established and in effect under title VI and title VII of the Civil Rights Act of 1964.

SUNSHINE IN GOVERNMENT

SEC. 605. (a) Each officer or employee of the Department of the Interior who—

(1) performs any function or duty under this Act or the Outer Continental Shelf Lands Act, as amended by this Act; and

(2) has any known financial interest in any person who (A) applies for or receives any permit or lease under, or (B) is otherwise subject to the provisions of this Act or the Outer Continental Shelf Lands Act,

shall, beginning on February 1, 1979, annually file with the Secretary of the Interior a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

(b) The Secretary of the Interior shall—

(1) within ninety days after the date of enactment of this Act—

(A) define the term "known financial interest" for purposes of subsection (a) of this section; and

(B) establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Secretary of such statements; and

(2) report to the Congress on June 1 of each calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) In the rules prescribed in subsection (b) of this section, the Secretary may identify specific positions within the Department of the Interior which are of a nonregulatory or nonpolicymaking nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Any officer or employee who is subject to, and knowingly violates, this section shall be fined not more than $2,500 or imprisoned not more than one year, or both.

INVESTIGATION OF AVAILABILITY OF OIL AND NATURAL GAS FROM THE OUTER CONTINENTAL SHELF

SEC. 606. (a) The Congress hereby finds that—

(1) there is a serious lack of adequate basic energy information available to the Congress and the Secretary of the Interior with respect to the availability of oil and natural gas from the Outer Continental Shelf;

(2) there is currently an urgent need for such information;

(3) the existing collection of information by Federal departments and agencies relevant to the determination of the availability of such oil and natural gas is uncoordinated, is jurisdictionally limited in scope, and relies too heavily on unverified information from industry sources;

(4) adequate, reliable, and comprehensive information with respect to the availability of such oil and natural gas is essential to the national security of the United States; and

(5) this lack of adequate reserve data requires a reexamination of past data as well as the acquisition of adequate current data.

(b) The purpose of this section is to enable the Secretary of the Interior and the Congress to gain the best possible knowledge of the status of Outer Continental Shelf oil and natural gas reserves, resources, productive capacity, and production available to meet current and future energy supply emergencies, to gain accurate knowledge of the potential quantity of oil and natural gas resources which could be made available to meet such emergencies, and to aid in establishing energy pricing and conservation policies.

(c) The Secretary of the Interior shall conduct a continuing investigation, based on data and information which he determines has been adequately and independently audited and verified, for the purpose of determining the availability of all oil and natural gas produced or located on the Outer Continental Shelf.

(d) The investigation conducted pursuant to this section shall include, among other items—

(1)(A) a determination of the maximum attainable rate of production (MAR) of crude oil and natural gas from significant fields on the Outer Continental Shelf; and

(B) an analysis of whether the actual production has been less than the MAR and, if so, the reasons for the differences;

(2) an estimate of the total discovered crude oil and natural gas reserves by fields (including proved and indicated reserves) and undiscovered crude oil and natural gas resources (including hypothetical and speculative resources) of the Outer Continental Shelf;

(3) the relationship of any and all such information to the requirements of conservation, industry, commerce, and the national defense; and

(4) an independent evaluation of trade association procedures for estimating Outer Continental Shelf reserves, ultimate recovery, and productive capacity for years in which trade associations made such estimates. In order to provide maximum opportunity for evaluation and continuity, the Secretary shall obtain all the available data and other records, including a description of the methodology and estimating procedures, which the trade associations used in compiling their data with respect to the reserves.

(e) The Secretary shall, not later than one year after the date of enactment of this section, submit an initial report to the Congress. The initial report shall include cost estimates for the separate components of the continuing investigation and a time schedule for meeting all of its specifications. The schedule shall provide for producing all the information required in subsections (d)(1)(A), (d)(2), and (d)(3) of this section on the day following the first complete calendar year after such date of enactment, and every two years thereafter. The Secretary shall make separate reports on the data acquired pursuant to subsection (d)(4) of this section as follows:

(1) Within six months after the date of enactment of this section, a report on the acquisition and details of trade association data and information.

(2) Within twelve months after submission of the report, required by subsection (e)(1) of this section, an evaluation of the trade association materials.

(3) Within twelve months after submission of the report required by paragraph (2) of this subsection, a report on the relationship between trade association data and the new data collected under this section.

(f) The Secretary of the Interior shall consult with the Federal Trade Commission regarding categories of information acquired pursuant to this section. Notwithstanding any other provision of law, the Secretary of the Interior shall, upon request of the Federal Trade Commission, make available to such Commission any information acquired under this section.

(g) For purposes of this section, the term—

(1) "maximum attainable rate of production" or "MAR" means the maximum rate of production of crude oil and natural gas

which may be produced under actual operating conditions without loss of ultimate recovery of crude oil and natural gas; and

(2) "Outer Continental Shelf" has the meaning given such term in section 2(a) of the Outer Continental Shelf Lands Act.

RECOMMENDATIONS FOR TRAINING PROGRAM

SEC. 607. Not later than ninety days after the date of enactment of this Act, the Secretary of the Interior, in consultation with the Secretary of the Department in which the Coast Guard is operating, shall prepare and submit to the Congress a report which sets forth the recommendations of the Secretary for a program to assure that any individual—

(1) who is employed on any artificial island, installation, or other device located on the Outer Continental Shelf; and

(2) who, as part of such employment, operates, or supervises the operation of pollution-prevention equipment,

is properly trained to operate, or supervise the operation of, such equipment, as the case may be.

RELATIONSHIP TO EXISTING LAW

SEC. 608. (a) Except as otherwise expressly provided in this Act, nothing in this Act shall be construed to amend, modify, or repeal any provision of the Coastal Zone Management Act of 1972, the National Environmental Policy Act of 1969, the Mining and Mineral Policy Act of 1970, or any other Act.

(b) Nothing in this Act or any amendment made by this Act to the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) or any other Act shall be construed to affect or modify the provisions of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.) which provide for the transferring and vesting of functions to and in the Secretary of Energy or any component of the Department of Energy.

And the House agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 9) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment.

The provisions of the Senate bill and the House amendment considered by the committee on conference were based on identical bills introduced in the opening days of the 95th Congress. These bills were thereafter amended by the House Ad Hoc Select Committee on the Outer Continental Shelf and the Senate Committee on Energy and Natural Resources and then by the full House and Senate. To fully inform the House and the Senate as to the effect of the amendment contained in the accompanying conference report, the Managers will set forth, with the exception of certain technical and conforming changes, an explanation of all differences and the resolution of the differences, section by section.

SECTION-BY-SECTION DISCUSSION

TITLE I—FINDINGS AND PURPOSES

Section 101—Findings

This section follows provisions in both the Senate bill and the House amendment in setting out a number of findings about the current and future energy supply situation, and the potential role of the oil and gas resources of the Outer Continental Shelf (OCS), the intent of which are clear.

The House amendment contains a finding that OCS lands and resources are public property held in trust. The Senate bill contains no such provision. The House receded to the Senate and the conference report contains no such provision.

Findings in the House amendment pointed out that OCS impacts and policies and programs specifically apply to and impact on States and on local governments. The Senate bill does not include any specific language as to local governments. The conference report incorporates a modified version of the House amendment. First, finding (10) recognizes that there is a possibility of adverse impacts on States and on local government units within States. Finding (11) provides that affected local governments are to have access to planning information and to make comments on decisions, but through States. States are to work in close cooperation with affected local governments to ensure such access and input.

The change is the first of several that the Managers made as to the involvement of local governments in OCS activities and decision-making. Other changes will be explained as they arise in this discussion. In general, it is intended that local governments are generally to act through their State government representatives; that data and recommendations are to be forwarded to and by local governments through State governments. Which local governments are to be considered affected will be determined by the Governors of affected States. In addition, the Managers intend that there is to be no independent basis for legal action by a local government unit against activities under this Act, or actions pursuant to this Act, because of a dispute with a State government as to whether they are "affected" and regarding any alleged failure to consult with, submit data to, or receive the recommendations of a local government.

The conference report includes as a finding (14), language in the Senate bill not contained in the House amendment, which details the need to develop resources in light of long range energy needs and adequate protection of renewable resources. In addition, the conference report includes as a finding (15) language in the Senate bill, not contained in the House amendment, which states that funds should be made available for damages to commercial fishing vessels and gear.

Section 102—Purposes

This section follows provisions in both the Senate bill and House amendments stating the purposes of the Act, the intent of which is clear.

Purpose number (1) follows the Senate bill and provides that the policies and procedures for managing OCS resources are those "which are intended to result in expedited exploration and development of the area." The House amendment contains no such language. The conference report thereby emphasizes the need for the expeditious yet safe exploration and development of the Outer Continental Shelf.

The House amendment specifically refers to local governments in purposes (4), (5), and (6). The Senate bill does not include such references in these provisions. The conference report adopted a modified version of the House amendment, which makes it clear, as noted in the discussion on Section 101, that the purposes of the Act are to assist and involve local governments, but only "through States".

The Senate bill includes a purpose (10) to establish a fishermen's fund to compensate for damages to commercial fishing vessels and gear, resulting from Outer Continental Shelf activities. The House amendment contains no such explicit purpose, but does later provide for the establishment of such a fund. The conference report includes the referenced purpose of the Senate bill calling for the establishment of a Fishermen's Contingency Fund.

TITLE II—AMENDMENTS TO THE OUTER CONTINENTAL SHELF LANDS ACT

This title contains a series of amendments to the Outer Continental Shelf Lands Act of 1953 (43 U.S.C. 1331–9) (OCS Act).

Section 201—Definitions

Both the Senate bill and House amendment, in similar language, provide definitions for use throughout the bill. The conference report resolves the minor differences between the two versions and amends section 2 of the OCS Act.

New definition of "Secretary"—Section 2(b)

The House amendment changes the definition of "Secretary" to insure applicability not only to the Secretary of the Interior but to the Secretary of Energy or the Federal Energy Regulatory Commission, where appropriate, as certain functions under the OCS Act were transferred to them pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 et seq.) (DOE Act). The Senate bill contains no such language. The conference report adopts the House definition of the term "Secretary". In addition, the conference report adopts specific language in Section 608(b) to make it explicit that the passage of this Act is not to modify provisions of the DOE Act transferring authority or functions.

The Managers recognize the need for a new definition for the term "Secretary" in order to maintain the responsibilities of the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) in light of the enactment of the Department of Energy Organization Act (P.L. 95–91).

Specifically, under section 302(b), transferred to the Secretary of Energy are the "functions of the Secretary of the Interior to promulgate regulations under the Outer Continental Shelf Lands Act, . . . which relate to the

"(1) fostering of competition for Federal leases (including, but not limited to, prohibition on bidding for development rights by certain types of joint ventures);

"(2) implementation of alternative bidding systems authorized for the award of Federal leases;

"(3) establishment of diligence requirements for operations conducted on Federal leases (including, but not limited to, procedures relating to the granting or ordering by the Secretary of the Interior of suspension of operations or production as they relate to such requirements);

"(4) setting rates of production for Federal leases; and

"(5) specifying the procedures, terms, and conditions for the acquisition and disposition of Federal royalty interests taken in kind."

In addition the DOE Act also provides that functions of the Secretary of the Interior to establish production rates for all Federal leases are to be transferred to the Secretary of Energy.

The DOE Act also established a leasing liaison committee composed of employees of the Department of Energy and the Department of Interior to provide an institutional coordinating mechanism to supplement and to assist in alternative interdepartmental coordination efforts regarding energy mineral leasing. In addition, the DOE Act directs the Secretary of Energy to consult with the Secretary of the Interior during preparation of regulations relating to certain provisions in Federal leases. Furthermore, the DOE Act directs the Secretary of Interior to afford the Secretary of Energy not less than 30 days prior to granting a Federal lease to disapprove any term or condition of such lease which relates to a matter within the Secretary of Energy's area of responsibility.

Finally, the DOE Act provides that the Department of the Interior shall be the lead agency for purposes of preparation of an environmental impact statement as required by Section 102(2)(C) of the National Environmental Policy Act for any action with respect to Federal energy mineral leases, unless the action involves matters within the exclusive authority of the Secretary of Energy.

In addition to this new definition of "Secretary" and conforming language in section 608(b), the Managers have also made certain changes throughout the bill, and will provide comments in this explanation to more specificially indicate the appropriate delegation, under the DOE Act, of responsibilities between the Secretary of the Interior, the Federal Energy Regulatory Commission, and the Secretary of Energy.

New definition of "Lease"—Section 2(c)

The House amendment defines "lease" to authorize exploration, development, and production of "geothermal steam". The Senate bill authorizes leases for "geothermal resources." There are also punctuation and structural differences between the two provisions defining "lease". The conference report follows the House amendment by changing the term, "mineral lease," in the OCS Act of 1953, to "lease" so as to more properly describe the authorization for the exploration, development and production of oil and gas or other mineral resources; and by adding a new definition of "minerals" to make explicit that the Secretary of the Interior has the power to lease geothermal resources on the OCS.

Additional definitions

The conference report retains new definitions included in both the Senate bill and the House amendment for the terms "coastal zone", "affected State", "marine environment", "coastal environment", "human environment", "Governor", "exploration", "development", "production", "antitrust law", "fair market value", "major Federal action", and "minerals."

In the definition of "affected State", the Managers intend that the "Secretary," determining applicability of this provision in certain circumstances, is to be the Secretary of the Interior. In the definition of "affected States", the House amendment adds "directly to such State" to relate to oil transported. The Senate bill contains no such phrase. The conference report follows the House amendment, so that oil indirectly transported would not, in and of itself, qualify a State for "affected State" status.

In the definition of "human environment" the House amendment refers to "esthetic" components and applies to the "recreation, air and water" of those areas affected. The Senate bill does not include such references. The conference report is the same as the Senate bill.

In the definition of "exploration" the House amendment describes drilling "on or off geological structures", while the Senate bill describes such drilling as "on or off known geological structures". The conference report follows the Senate bill, adopting the phrase "on or off known geological structures".

The definition of "exploration" and "development" of the House amendment discusses discovery "in paying quantities", while the Senate bill refers to discovery "in commercial quantities". On this technical difference, the conference report follows the House amendment, employing the phrase, "in paying quantities"—presently used in OCS practice. Also the House amendment defines "development" to include "pipeline routing". The Senate bill contains no such reference. The conference report adopts the language of the House amendment.

In the definition of "major Federal action" as to actions by the Secretary calling into operation the provisions of the National Environmental Policy Act (NEPA), "Secretary" means the Secretary of the Interior.

Regarding the definition of the term "fair market value", the Managers intend that the determination by the Secretary of the Interior of fair market value is to be undertaken in consultation with the Secretary of Energy. This term, as defined in subsection (o), is only used in this Act in relation to the purchase and distribution of oil and gas under section 27.

The House amendment defines "frontier area" for the purpose of applying certain proedures required by the OCS Amendments. The Senate bill contains no such definition. The conference report follows the Senate bill and contains no such definition. The inapplicability of provisions of this Act to specific areas are specifically detailed in the conference report and will be noted in this discussion as appropriate.

The House amendment defines "minerals" to include all kinds of resources. The Senate bill contains no such provision. This change in the House amendment has resulted in a number of technical changes throughout the House amendment, deleting references to oil, natural gas, and geothermal resources, which are contained in the Senate bill. The Conference report is the same as the House amendment, defining "minerals".

The Managers recognize that "geopressured—geothermal and associated resources" included in the new definition of "minerals", apply to such combined resources as methane, heat and kinetic energy and that these resources may sometimes be developed with other hydrocarbons. Much progress is expected to be made in developing the technology to produce and utilize the resources. The Managers therefore intend that the Secretary have the flexibility to issue leases for geopressured—geothermal and associated resources either alone or in combination with oil and gas leases.

Section 202—National policy for the Outer Continental Shelf

Section 202 amends section 3 of the OCS Act, originally a jurisdictional provision, and makes it into a declaration of national policy. The original provisions of section 3, providing that the subsoil and seabed of the OCS belong to the United States and that all existing rights of navigation and fishing in OCS waters are to be continued, are restated.

Policy statements are added to emphasize that the ACS is held for all the people, and its resources should be made available for expeditious and orderly development subject to environmental safeguards, and with due consideration to affected States.

The House amendment as to adverse effects policy (4)(A), contains reference to impacts on "affected local governments". The House amendment as to policy (4)(B), on participation, contains references to "affected local governments". The House amendment as to purpose (5), dealing with recognition of local rights and responsibilities, includes specifically "local governments". The Senate bill contains no such references. In all of the above-mentioned policy statements, the conference report adopted a modified version of the House amendment.

Policies for assistance, participation, and consideration are to involve local governments "through States", and "where appropriate." As the discussion in the explanation on references to local governments in the findings (Section 101) noted, such references to local governments' involvement in this Act provide no independent basis for legal action by a local government unit against activities under this Act, or actions pursuant to this Act, because of a dispute with a State government as to whether they are "affected", or regarding any alleged failure to consult with, submit data to, or receive the recommendations of a local government.

Section 203—Laws applicable to the Outer Continental Shelf

Both the Senate bill and the House amendment amend section 4(a)(1) of the OCS Act of 1953 by changing the term "fixed structures" to "and all installations and other devices permanently or temporarily attached to the seabed" and making other technical changes. The Conference report retains this language.

The intent of the Managers in amending section 4(a) of the 1953 OCS Act is technical and perfecting and is meant to restate and clarify and not change existing law. Under the conference report language, Federal law is to be applicable to all activities on all devices in contact with the seabed for exploration, development, and production.

One particular aspect of federal law, and its applicability to OCS operations, was specifically addressed by the Conferees—application of United States customs laws.

The Conferees were informed that the United States Customs Service has interpreted existing section 4(a)(1) to mean that foreign built production platforms are not subject to import duties when they are brought into OCS waters and attached to the seabed. Specifically, the Customs Service has stated that such platforms are not actually being imported to the United States until they are placed on the shelf and need not pay customs duties.* The Conferees reject this interpretation and believe it is contrary to the intent of Congress in enacting the 1953 Act. Moreover, to make it explicit that this interpretation should not be continued to be given effect, the Conferees state that one of the purposes of this change in 4(a)(1) is to make it clear that U.S. custom duties *are* to apply to platforms, built overseas, and brought into OCS waters for placement so that it can be used to develop and produce OCS minerals.

Under Section 4(a)(1) of the conference report, federal laws and "civil and political jurisdiction of the United States" are applicable to the subsoil and seabed of the OCS, to all artificial islands and "all installations and other devices permanently or temporarily attached to the seabed, which may be

*The Customs Service indicates that once the platforms are in place, machinery, equipment, and other items placed on the structure are subject to duties. Of course, the Conferees believe this is, and continues to be, the law.

erected thereon" to explore, develop, produce or transport OCS mineral resources. This customs laws apply—as within the "political and civil jurisdiction" of the United States—to platforms constructed outside the United States and brought into OCS waters—as being "installations and other devices . . . which may be erected thereon".

Section 4(a)(2) of the OCS Act provides that when federal law or regulations are not applicable, the laws of adjacent states are to apply "to that portion of the subsoil and seabed of the outer Continental Shelf, and artificial islands and fixed structures erected thereon." Considerable case law has developed as to the effect of this provision. The House amendment includes a paragraph (3), changing 4(a)(2) to utilize the conforming "islands and installations" language. The intent is only technical. Some concern was raised, however, that a change might be interpreted as being substantive. The conference report therefore follows the Senate bill and makes no change in Section 4(a)(2).

The Senate bill adds a new section 4(a)(2)(B)—and conforming changes—to provide for the establishment of international boundaries dispute settlement procedures. The House amendment contains no such language. The conference report includes the boundary dispute settlement provision of the Senate bill.

The conference report also adopted a conforming change to section 4(c) of the 1953 OCS Act. Section 4(c) describes the application of the Longshoremen's and Harbor Worker's Compensation Act and makes reference to section 4(b) of the original 1953 Act. Section 4(b), providing the jurisdictional bases for cases and controversies, has been deleted and an analogous provision adopted as part of a comprehensive section 23 on "Citizen Suits, Court Jurisdiction, and Judicial Review."

It was therefore necessary to more specifically describe the applicability of the Longshoremen's Act to OCS activities. This amendment involves no change in existing law. It was not the intent of the managers to alter in any way the existing coverage of the Longshoremens' Act, nor of other remedies that may be available for injury or death.

Section 4(f) of the Outer Continental Shelf Lands Act of 1953 provides that the authority of the Corps of Engineers to prevent obstructions to navigation is extended to artificial islands and fixed structures located on the Outer Continental Shelf. This authority has been used by the Corps of Engineers to regulate the construction and location of such things as artificial fishing reefs, radio towers, and a proposed gambling casino which was to be constructed on reefs. It also applies to structures erected for the purpose of exploring for and transporting resources, such as oil drilling rigs.

As indicated above, Section 203 of the Conference report amends section 4 by changing the phrase "artificial islands and fixed structures" in subsection (a) to "artificial islands and all installations and other devices permanently or temporarily attached to the seabed."

In addition, a conforming change to old section 4(b), the new Section 4(f), relating to the authority of the Corps of Engineers, describes it as applying to artificial islands, installations and other devices referred to in subsection (a).

Again, these changes were technical only and there was no intent to change present law. The existing authority of the Corps of Engineers, in subsection 4(f), applies to all artificial islands and fixed structures on the Outer Continental Shelf, whether or not they are erected for the purpose of exploring for, developing, removing, and transporting resources therefrom. The amendment to subsection 4(f) is not intended to change the scope of this authority, but merely to conform the description of the types of structures, no matter what their purpose, to the types of structures listed in subsection (a), namely all installations and other devices permanently or temporarily attached to the seabed. It is not the intention of the conferees to limit the authority of the Corps of Engineers as to structures used for the exploration, development, removal, and transportation of resources.

The House amendment adds a new paragraph 4(e)(3), for agreements by owners or operators of foreign vessels working on the outer Continental Shelf, providing that such vessels are to conform to the laws of the United States and applicable regulations. The Senate bill contains no such provision. The House receded and the conference report contains no such provision. (The conference report does provide in a separate section 30, discussed later, certain requirements for foreign vessels).

Section 204—Outer Continental Shelf Exploration and Development Administration

This section amends section 5 of the Outer Continental Shelf Lands Act of 1953 by providing detailed requirements for the administration of leasing on the OCS.

General regulatory authority—Section 5(a)

Subsection (a) of section 5 is now to provide that leasing be administered by the Secretary of the Interior, the Secretary of Energy, and the Federal Energy Regulatory Commission, in accordance with their respective authority (see discussion on Section 2(b)), who are to promulgate all necessary regulations to carry out their responsibilities. These regulations are to be applicable to any lease in effect at the date of promulgation, as well as to any lease to be let in the future. Of course, the appropriate "Secretary" is not required to repromulgate regulations already consistent with the 1978 amendments. He may retain present appropriate and effective rules.

In this section, "Secretary" means the appropriate Secretary with responsibility to promulgate regulations; the Secretary of the Interior, the Secretary of Energy, or the FERC.

Minor grammatical and structural differences between amended section 5(a) in the House amendment and the Senate bill have been reconciled.

The original subsection (a) of section 5 of the OCS Act granted very broad authority, with few guidelines, to promulgate regulations. The amended subsection, while not limiting the generality of the power granted to promulgate any appropriate regulation, does provide statutory guidelines and requirements for certain types of regulations, and together with the requirements of other subsections provides a mechanism for coordinated bureaucratic action.

The Senate bill specifically provides that regulations apply "as of the date of their promulgation". The House amendment contains no such specific language. The conference report provides that they apply "as of their effective date," to all operations conducted under a lease or permit issued or maintained under this Act, thus explicitly adopting the intent of both versions.

The House amendment provides that in formulating and promulgating regulations on matters which they affect competition, the views of the Attorney General and the Federal Trade Commission are to be requested and then to by given "due consideration". The Senate bill provides for such requests and consideration only as to the views of the Attorney General. The conference report adopts the Senate language but specifies that in reviewing regulations, and preparing comments, the Attorney General must consult with the Federal Trade Commission.

Accordingly, the Secretary is only mandated by this section to request the opinions of the Attorney General regarding competition matters.

Of course, under the general authority in section 5(a) for the proper promulgation of appropriate regulations, the Secretary may consult with any other appropriate department or agency, including the Federal Trade Commission.

In addition, the Conferees expect that the Secretary give consideration to the views of other federal agencies (such as the Federal Trade Commission) with respect to the competitive impact of the proposed regulations. The Secretary should make available to those agencies whatever information or data the agencies require to analyze adequately the competitive impact of the regulations.

After the Secretary makes a request as to advice on regulations, the Attorney General must consult with the Federal Trade Commission regarding competition matters. He should do so, of course, in an expeditious manner, to assure FTC input and no delays in the regulatory adoption procedure.

The Attorney General may then submit any views or recommendations to the Secretary, but he is not required to do so. Any recommendations or views of the Attorney General, after consultation with the Federal Trade Commission, must be submitted expeditiously. In accordance with administrative procedures concerning *all* regulations, views must be submitted during the appropriate comment period. If no views or recommendations are submitted with the appropriate time frame, the Secretary is free to promulgate regulations.

No other agency, including the Federal Trade Commission, is barred from independently submitting views or recommendations to the Secretary.

To allow thorough and adequate consideration of any views and recommendations, any views or recommendations must set forth the reasons, including the pertinent factual and policy considerations and legal precedents, if any, which led to such views or recommendations. The failure of the Attorney General to submit views, or the Secretary to accept recommendations, are not an independent basis for a cause of action by a third party.

Suspension—Section 5(l)(1)

The conference report adopts the almost identical provision in both the Senate bill and House amendment, dealing with suspensions of operations or activities.

The Senate bill provides for suspension at the request of lessee, "in the interest of conservation". The House amendment provides for such requested suspensions when "in the national interest". The conference report is the same as the House amendment—thus specifically granting a broader basis for a grant of a requested suspension, including allowing the grant of requested suspensions to facilitate timely development of a lease.

The House amendment allows suspension at the request of lessee "to allow for the construction or negotiation for use of transportation facilities". The Senate bill provides for suspension at the request of a lessee "to allow for the unavailability of transportation facilities". The conference report is the same as the House amendment.

The conference report provides that the Secretary of Interior, after authorizing a suspension, either at the request of a lessee or, on his own, because of a threat of "serious, irreparable or immediate harm," shall extend a lease equivalent to the period of suspension unless the basis for the suspension is the result of gross negligence, or willful violation of applicable regulations or lease or permit terms. In determining whether the Secretary of Interior should deny an extension because of gross negligence, in complying with, or willful violation of, diligence requirements, he should solicit and consider

written comments from the Secretary of Energy.

The present requirement that leases are to be generally extended so long as oil and gas is being produced is retained and clarified.

Cancellation—Section 5(a)(2)

The Conference report adopts a comprehensive provision, based on similar language in the Senate bill and House amendment, authorizing cancellation of a lease or permit, in appropriate circumstances, because of probable serious harm or damage.

The Senate bill in paragraph 5(a)(2) provides that cancellation is not to occur until there has been suspension for a five-year period, or a lesser period at the request of a lessee. The House amendment contains no such provision. The conference report follows the Senate bill, providing for cancellation only after a five-year suspension period, or a lesser period at the request of a lessee.

The Senate bill contains detailed provisions for the determination of compensation after cancellation with no fault involved—as the lesser of (1) fair value of rights or (2) excess of expenses over revenues. The House amendment provides that such cancellation "shall not foreclose any claim for compensation as may be required" by the Constitution or law. The House receded and the conference report language is the same as the Senate bill, providing for a two-step formula for new leases and a one-step formula—fair value of rights—for old leases. Thus, under 5(a)(2), explicit authority is given to the Secretary to cancel a lease; and once a cancellation without fault occurs, a lessee is entitled to compensation according to the appropriate formula.

In deciding whether to order a cancellation, the Secretary of the Interior is to solicit and consider written comments from the Secretary of Energy as to the advantages and disadvantages of cancellation as against the advantages and disadvantages of development production.

General Provisions on Regulations

The Senate bill contains provisions requiring regulations for the sale of royalty, net profit or purchased oil and gas, for use of new bidding systems and for citizens suits. The House amendment contains no such requirements in this section. The Senate receded and the conference report does not include these provisions in this section. Specific requirements are included later in the conference substitute in those sections dealing with royalty or purchased oil and gas, citizen suits, and bidding systems.

Clean Air

The House amendment requires regulations for compliance with national ambient air quality standards and requirements (8), and for the establishment of air quality standards for OCS operations (9). The Senate bill contains no such provisions. The conference report does not adopt a paragraph (9) but does include a revised paragraph (8), of section 5(a) of the House amendment, to provide for regulations to be promulgated by the Secretary of Interior for compliance with national ambient air quality standards pursuant to the Clean Air Act, to the extent that the activities under the OCS Act significantly affect the air quality of a State.

The Secretary of Interior is to promulgate regulations implementing this paragraph. The standards of applicability the Conferees intended the Secretary to incorporate in such regulations is that when a determination is made that offshore operations may have or are having a significant effect on the air quality of an adjacent onshore area, and may prevent or are preventing the attainment or maintenance of the ambient air quality standards of such area, regulations are to be promulgated to assure that offshore operations conducted pursuant to this Act do not prevent the attainment or maintenance of those standards. The terms "may have" and "may prevent" refer to the Secretarial judgment regarding future consideration of exploration plans, or development and production plans, in which the potential for "significant effect" is analyzed prior to approval and thus commencement of the proposed activities.

The Conferees agreed that if an approved State implementation plan has ambient air quality standards which are more stringent than the national ambient air quality standards, the Secretary of the Interior shall, with appropriate regulations, assure that offshore operations conducted pursuant to this Act do not prevent the attainment of those State standards, if the air quality of that State is significantly affected by such offshore operations. These State standards and any national standards would not, however, apply to the quality of air above the OCS itself, or to OCS activities located in other parts of the country.

The Conferees' intent was that the regulations promulgated by the Secretary not generally require that the air mass above the OCS itself be brought into compliance with national or state ambient air quality standards but that regulations might be appropriate for the air above or near an artificial installation or other device (platform), so that emissions from such source is controlled to prevent a significant effect on the air quality of an adjacent onshore area.

Other provisions in the conference report provide that exploration plans, and development and production plans, are to comply with any regulations promulgated pursuant to section 5(a)(8) of the amended OCS Act. Thus, in considering approval, modifications, and disapproval of a submitted exploration plan, or a development and production plan, the Secretary is to ensure compliance with any applicable regulations promulgated, pursuant to section 5(a)(8).

The Conferees do not intend that the application of section 5(a)(8) regulations will interfere with the time periods provided in the conference report for review and approval of explorations plans, and development and production plans. The Conferees expect that these regulations will be implemented consistently with the timetables established by these amendments.

The Managers were aware that on April 13, 1978, the Environmental Protection Agency made a Notice of Determination that the Clean Air Act, as amended (42 U.S.C. Sec. 7401 et seq.) and regulations promulgated thereunder, apply to activities on the outer Continental Shelf when such activities could affect the air quality of an adjacent State.

By their adoption of requirements for regulations for compliance with air quality standards, the Conferees do not intend to supersede the Clean Air Act or the responsibilities of the EPA Administrator. There is no intent to affect, extend or reduce, whatever present authority the Environmental Protection Agency has in applying and enforcing the Clean Air Act, including the use of EPA's permitting authority.

Specifically, the Conferees intend that the Secretary of Interior shall be guided by the Clean Air Act, in consultation with the Environmental Protection Agency, in promulgating regulations to maintain consistency with ambient air quality standards, and its procedures establishing the technological means for controlling air emissions.

It is expected that some activities may not have significant effects because of distance from shore or meteorological conditions that blow the pollution out to sea. If an OCS activity or facility is determined to have no such significant effect, when, for example, it is located many miles from the coast, the requirements of the regulations under section 5(a)(8) would not apply.

Pipeline Rights of Way

The original OCS Act of 1953 provides in Section 5(e) for rights of way for pipeline purposes for the transportation of minerals. The conference report adopts certain technical changes to this subsection from the House amendment and Senate bill.

The House amendment provides in section (5)(e) for regulations to be prescribed by "the Secretary (of Interior), or where appropriate, the Secretary of Transportation". The Senate provides for regulations and conditions as may be prescribed by "the Secretary (of Interior) . . . not inconsistent with regulations promulgated by the Secretary of Transportation under the Natural Gas Pineline Safety Act of 1968". The conference report is the same as the House amendment.

The House amendment provides in section (5)(e) for regulations and conditions "including (as provided in section 21(b) of this Act) utilization of the best available and safest technology for pipeline burial and other procedures." The Senate bill provides for conditions and regulations "including assuring maximum environmental protection by utilization of the best available and safest technology, including the safest practices for pipeline burial". The conference report follows the Senate bill, with the addition of the phrase "(as provided in section 21(b) of this Act)" from the House amendment. Section 21(b), as will be discussed later, notes that more than one technology may be acceptable as "the best available and safest".

To emphasize the point, a technical change was adopted to make "technology" plural.

The House amendment also provides for nondiscriminatory pipeline transportation or purchase as to oil or natural gas "produced from such lands in the vicinity of the pipeline". The Senate bill contains no such production area reference. The conference report follows the House amendment.

A number of technical changes were made in 5(e) to conform the subsection to present law. The "Federal Power Commission" is changed to "Federal Energy Regulatory Commission". The phrases "in the case of gas and the Interstate Commerce Commission" and "in the case of oil" were stricken. And the "Administrator of the Federal Energy Administration" was changed to the "Secretary of Energy".

Pipeline Competition

The Senate bill alone contains a subsection (f) detailing the competitive principles for pipeline transportation of OCS oil and gas. The provision in the Senate bill is intended to (1) prevent "bottleneck monopolies" and other anti-competitive situations involving OCS pipelines and (2) promote efficiency and sound planning involving pipeline sizing. The House amendment contains no such provision. The conference report adopts the provision of the Senate bill with an amendment. The agreed-to subsection (f) provides for open and nondiscriminatory access to apply to all pipelines and is a reaffirmation and strengthening of subsection 5(e), which provides for the transport or purchase of all OCS oil and gas "without discrimination."

In addition, in the case of new pipelines, except in the Gulf of Mexico and Santa Barbara Channel, the Secretary is given the discretion to order an expansion of throughput capacity. However prior to doing so: (1) there must be a specific request by a shipper, owner or non-owner; (2) there must be a full hearing after due notice; (3) there must be a finding that expansion is within technological limits and economic feasibility.

If such expansion is ordered, then the requesting shipper must be responsible for bearing the proportionate share of costs and risks related to the expansion.

The Conferees recognize that there may be circumstances in which it would be ap-

propriate and fair to all concerned for the company requesting expansion of a pipeline's throughput capacity to pay the pipeline owner *both* (1) a proportionate share of the incremental cost associated with the expansion, and (2) a proportionate share of the current value of the pipeline.

If, for instance, an expenditure of $14 million for new pumps would double the throughput capacity of a pipeline having a current value of $200 million, it might be entirely fair and reasonable under all the circumstances—especially those involving the promotion of financial incentives and competition and the protection of investments—for the company requesting the expansion to pay a share of the $14 million *and* a share of the $200 million. If the requesting company had to pay only a share of the $14 million, it might be able to take full advantage of the expansion without having to bear any of the cost or risk previously assumed by the pipeline owner.

The language agreed to by the Conferees, therefore, authorizes a determination to be made whether the requesting company should pay the pipeline owner a portion of the current value in addition to a portion of the incremental cost of expansion.

Whenever it is determined that the requesting company should bear a proportionate share of the costs and risks of the pipeline itself and not just the expansion, the share should not exceed the expected percentage of the company's average throughput. In addition, the price of such share should be consistent with rate base and rate of return regulations, and payment in appropriate circumstances, may confer to the requesting company an equivalent portion of the ownership and control of the pipeline.

The Conferees were explicit that expansion may not be ordered under this section for any pipeline operating in a developed area (the Gulf of Mexico and the Santa Barbara Channel) and for any pipeline authorized prior to the date of enactment of this bill.

The Conferees believe that provisions for non-discriminatory access and expansion of capacity upon request are ordinarily not appropriate for feeder lines to a facility where oil and gas are first collected, or where oil or gas are first separated, dehydrated, or otherwise processed. Thus, in most cases, such lines would be exempted from the requirements of this subsection. Such exemption, however, is to occur only after a review and if necessary, a hearing, and then an appropriate order or regulation.

In conformity with present agency responsibility, this subsection provides that the application of competition principles are to be undertaken by the Department of Energy and FERC where appropriate. The discretionary decision of throughput expansion is to be made by FERC.

In implementing this subsection and applying competitive principles, the Secretary of Energy and the FERC are to consult with and give due consideration to the views of the Attorney General, who in turn is to consult with the Federal Trade Commission. Once again, in submitting his views, the Attorney General is to set forth the reasons for his views, and any recommendations, including the pertinent factual and policy considerations and legal precedents, if any. No independent cause of action is created by this consultation requirement. Therefore, the failure of the Attorney General to submit his views, or the insufficiency of the reasons given for his views and recommendations, are not to be an independent basis for a law suit. Furthermore, the Conferees do not intend to abridge any existing authority of any agency or department, including the Federal Trade Commission, to solicit or give comments as to this or any other provision of this bill or actions taken in accordance with such provisions. (See discussion in this statement of managers on section 5(a) as to Attorney General and Federal Trade Commission role, responsibilities and independent authority.)

Finally, as specifically stated in paragraph (4) nothing in this subsection on pipeline competition is intended to alter present authority, under any other provision of law, of any agency of the United States with respect to pipelines on or across the OCS.

Rates of Production

Both the House amendment and Senate bill provide for production of oil and gas at determined rates. Rates must be set that are consistent with any rule or order issued by the President in accordance with other laws. If no such rate or order has been issued, rates must be consistent with regulations established to assure maximum production as described in section 5(g)(2). The conference report adds a technical change, adding "of Energy" to make explicit that the reference to "Secretary" to promulgate regulations as to production rates in this provision means the "Secretary of Energy" in accordance with Section 302(b)(4) of the DOE Act.

The Senate subsection as to rates of production includes a paragraph (3) amending the Energy Policy and Conservation Act of 1975 to require the publication of final rules on the maximum efficient rate of production. The House amendment contains no such language. The conference report follows the House amendment, and paragraph (3) from the Senate bill was deleted.

Coordination of and Recommendations on OCS Activities

The House amendment contains a subsection providing for the coordination of activities of all Federal agencies by the Secretary of Interior, and for notification to the Secretary of Interior of all OCS related actions by any Federal department or agency. The Senate bill contains no such provisions. The Conferees adopted the House amendment with an amendment which provides that, in order to facilitate coordinated Federal action on OCS activities, the head of any Federal department or agency taking any action significantly affecting OCS activities is to notify the Secretary of the Interior of this action. The Secretary is thereafter to notify Governors of affected States. After such notification, the Secretary may recommend changes to the agency or department proposing such action.

The Governor of any State shall have the right to be notified of any action. However, no third party, including citizens, shall have the right to raise as a basis for legal action, the failure of the Governor to be notified. The head of the Federal departments or agencies which are to submit notification of an action to the Secretary can be compelled by the Secretary to comply with this coordination mandate. However, the failure of a department or agency to submit such information shall not be a basis for an independent cause of action by any third party. Furthermore, the failure of the Federal department or agency to accept any recommendations by the Secretary shall not be a basis for an independent cause of action by any third party.

The Secretary of Interior, by receiving notice and information on all actions affecting the OCS, will be able to evaluate the overall effect of any particular Federal decision on OCS policy. In addition, the Governor shall be able to look to one person—the Secretary—to receive information concerning any Federal Government action affecting OCS areas impacting on his jurisdiction.

Section 205—Revision of bidding and lease administration

New Bidding Systems

Section 205 amends section 8 of the OCS Lands Act by providing new bidding options and procedures.

The original OCS Lands Act of 1953 provides that leases are to be awarded to the highest responsible qualified bidder, through competitive and sealed bidding procedures, on the basis of a cash bonus, with a fixed royalty of no less than 12½ per centum, or on the basis of a royalty, at no less than 12½ per centum, and a fixed bonus. Subsection (a) of section 8 is amended to still require competitive, sealed bidding procedures and to still authorize bonus and royalty bids, but now also to authorize a number of new bidding systems.

Under this Act, and in accordance with the DOE Act, the Secretary of the Interior retains the power to issue leases. The Secretary of Energy is to retain responsibility for promulgating regulations implementing alternative bidding systems (see Section 302(b)(2) of the DOE Act). Both Secretaries are to continually consult with each other in accordance with Sections 303(b) and 303(c) of the DOE Act.

The House amendment provides in (a)(1) for regulations for the depositing of cash bids in an interest-bearing account and for earned interest to be paid to the Treasury when bids are accepted, and to unsuccessful bidders if bids are rejected. The Senate bill contains no such provision. The conference report follows the House amendment by providing for such regulations.

Both the Senate bill and the House amendment contained specific provisions authorizing variable royalty, variable net profit, fixed net profit, and work commitment bidding alternatives, but use different language and structure to do so. The conference report adopts the Senate bill language and form.

Both the Senate bill and House amendment authorize the use of nonenumerated alternative bidding systems or modifications of bidding systems specifically described.

The Senate bill provides that any non-enumerated system can only be used after having been submitted to Congress and then only if neither House passes a resolution of disapproval within 30 days. The House amendment simply provides that new bidding systems shall be promulgated by rule, after an opportunity for a hearing, and then transmitted to Congress. No provision for disapproval, specifically as to use of new bidding systems, by Congress is included in the House amendment. The conference report follows the Senate bill and contains a one House veto provision for non-enumerated bidding systems, as paragraph (a)(4).

Any such non-enumerated system or modification, while it can include any number of fixed terms, conditions, or parts, can only have one variable term, condition or part, which would be the basis for the bidding and selection of the successful bidder or bidders.

To comply and conform with the DOE Act, the conference substitute provides that it is the Secretary of Energy who is to submit any non-enumerated or modified bidding system to Congress but that it is the Secretary of Interior who is to conduct lease sales, using such bidding system, if not vetoed by either the House or Senate within the assessed time.

Both versions of S. 9 provide for deferment and installment payments of cash bonuses. The Senate bill provides that the final payment should be made no later than five years from the lease sale, or on the date of approval of development and production plan, whichever occurs first. To ensure nondilatory action, the House amendment provides in paragraph (a)(2) for final payment no later than five years from the date of the lease sale. The conference substitute is the same as the House amendment.

The Senate bill provides for the use of the so-called "dual leasing system" in the Outer Continental Shelf off of Alaska. The House amendment contains no such provision. The Senate receded and the conference report

contains no such provision. Hence, no authorization was granted for leasing just for exploration with exploration lessees sharing in the costs of exploration and receiving a share of revenues from the sales of subsequent development and production leases. It is expected, however, that as part of the requirements of this Section that there be a report on bidding options, there should be an evaluation of this so-called dual leasing option—its advisability, practicality, costs, benefits, and risk.

Use of Systems and Standards

The House amendment contains a provision specifically providing for establishment of previously unauthorized bidding systems, or modifications of such systems, only by rule, after an opportunity for a hearing. The Senate bill contains no such provision. The House receded and this provision is not specifically included in the conference report. The Conferees intended that implementation of the newly authorized system be in accordance with the requirements of this Act, the Administrative Procedures Act (APA) and other law. Specifically, section 5(a)(1) of this Act, as retained in the conference report, provides that competitive bidding regulations are to be "promulgated in advance" of any utilization. Such regulations are promulgated in accordance with requirements of the APA. In addition, section 302(b)(2) of the DOE Act provides authority for the Secretary of Energy to promulgate regulations for use of alternative bidding systems. Such regulations are promulgated in accordance with section 501 of the DOE Act. The Conferees expect the Secretary of Interior and the Secretary of Energy to continue to exercise their appropriate respective statutory responsibilities in using new bidding systems.

The House amendment contains a provision detailing the purposes and policies of the new bidding systems. The Senate bill contains no such provision, but a statement of purposes and policies was included in its committee report.

The Conferees agreed that an expression of purpose and policies was more appropriate for this statement than for the text of the OCS Act and therefore the conference report follows the Senate bill and contains no such provision.

The Conferees intend that in utilizing the new bidding alternatives, a variety of considerations should be taken into account, including, but not limited to: (i) providing a fair return to the Federal Government; (ii) increasing competition; (iii) assuring competent and safe operations; (iv) avoiding undue speculation; (v) avoiding unnecessary delays in exploration, development and production; (vi) discovering and recovering oil and gas; (vii) developing new oil and gas resources in an efficient and timely manner; and (viii) limiting administrative burdens on government and industry.

The House amendment contains provisions (1) generally authorizing the requiring of submission of bids based on more than one bidding system and (2) allowing for submission of bids on the basis of more than one bidding system, in order to establish statistical information. The Senate bill contains no such language. The conference report adopts the House language, with an amendment. The Secretary can use the authority of this subparagraph, and require submission of bids based on more than one system, but only for statistical purposes and can use the authority in bidding on not more than ten percent (10%) of all tracts offered each year.

The authority to require bidders to submit bids on the basis of more than one bidding system is to be utilized for the purposes of statistical information, and the actual system upon which a lease will be awarded is to be selected on a random basis. The Conferees note that the Secretary of Energy and the Secretary of the Interior maintain their respective responsibilities on alternative bidding systems in accordance with section 302(b)(2), and sections 303(a)-(c) of the DOE Act.

Mandate on Use of Bidding Systems

The Senate bill provides that during each of the next five years, bonus bids cannot be utilized in more than 50 percent of the leases offered in previously undeveloped areas. The House amendment provides that new bidding systems are to be utilized in no less than 20 percent and no more than 50 percent of the leases offered in lease sales held for all areas during each of the next five years. The conference report follows the House amendment with an amendment. Bidding systems other than bonus bidding, including royalty, net profit, work commitment, and non-enumerated systems, are to be utilized in at least 20 percent and not more than 60 percent of the tracts offered for leasing OCS areas during each of the next five years.

The Senate bill provides that new leasing systems are to be applied using a random selection method. The House amendment contains no such provision. The Senate receded and the conference report contains no such provision.

Although there is no requirement for random selection, the Secretary, in setting forth systems for use on tracts, shall seek to secure a fair selection of different methods on different tracts. The purpose of such a selection is to assure that adequate information is obtained as to relative advantages and disadvantages of the various bidding systems, including the front-end bonus bid systems, as applied to different types of tracts, having different expectations of the amount of hydrocarbons that can be recovered

The Senate bill provides that the 50 percent limitation on the use of bonus bidding can be waived during the first year by a finding that it would unduly delay development. Thereafter, it can be waived after the submission of a report to Congress, and, if there is no resolution of disapproval by either House, within 30 days after receipt of such report. The House amendment provides that both the minimum on use of new systems and maximum on the use of new systems can be waived if the Secretary determines that such waiver is necessary to comply with the bidding purposes established under the OCS amendments. No procedure for congressional disapproval is included in the House amendment. The conference report adopts the House approach.

The Secretary of the Interior is given the discretion to waive the minimum or maximum requirement for the use of bidding systems other than bonus bidding, based on a determination that either the minimum or maximum percentage level is not consistent with the purposes and policies of the Act. Such a determination on the part of the Secretary of the Interior is to be made after consultation with the Secretary of Energy in light of the responsibilities of the Secretary of Energy as to fostering competition and as to promulgating regulations for the use of alternative bidding systems (see sections 302(b)(1) and 302(b)(2) of the DOE Act). In addition, the Secretary of Interior retains authority as under present law to reject any bid that is not, in his opinion adequate.

Bidding System Report

Both versions of S. 9 require that within six months after the end of each fiscal year, the "Secretary" shall submit a report to Congress concerning the use of the various bidding options provided in this subsection. The conference report adopts a technical amendment specifying that it is the Secretary of Energy who is to submit such report "in consultation with the Secretary of the Interior." The bidding system report is both factual and analytical. It is to include a schedule of lease sales held in the past year or to be held in the following year and the bidding systems which have been or are to be used. The Secretary of Energy is to obtain this factual data from the Secretary of Interior and include it in this report. The report is also to include an analysis and evaluation, if applicable, of why a system has not been or will not be utilized and if applicable, why the bonus bid system was used or is to be used in more than 60% of the areas actually leased. This analysis and evaluation is to be undertaken by the Secretary of Energy.

The Department of Energy is to solicit the written comments of the Secretary of the Interior as to this analysis on various bidding options; and such comments and recommendations, if not accepted by the Secretary of Energy as part of his statement, shall be separately included in any report.

Lease Sale Announcement and Review

The House amendment contains a provision providing that 30 days prior to a lease sale, a notice must be sent to Congress and published in the Federal Register, identifying bidding systems to be used in that sale, designating tracts having the various systems and why a system is being used for a tract. The Senate bill contains no such provision. The Senate receded and the conference report includes the House provision.

The House amendment also contains a provision that the Governor of an affected State, or the chief executive officer of a local government, may request and obtain a public hearing, prior to the initial announcement of the tracts selected for inclusion in a proposed lease sale. The Senate bill contains no such provision. The House receded and the conference report contains no such provision.

The Conferees note that present procedures provide for nomination, positive and negative, by all interested parties, including State and local governments. In addition, present procedures, implemented by the Interior Department, pursuant to the National Environmental Policy Act, provide for a public hearing on a draft Environmental Impact Statement, prior to every lease sale. At such a hearing, usually held in the community adjacent to the proposed sale, all interested parties, including State and local governments, may offer comments and suggestions. Such comments and suggestions are to be evaluated and considered by the Secretary in preparing a final Environmental Impact Statement, prior to a lease sale, and then in deciding if, when and how, to conduct such a sale. The Conferees deleted the specific mandate for a public hearing on a sale, in light of these present procedures for state and local government and citizen input. This deletion should not be viewed as an attempt to limit public hearings, but simply as an avoidance of duplicative provisions.

Special Rules—Net Profit and Work Commitment Bids

The Senate bill contains a provision providing for establishment of rules to govern the calculation of net profits. The House amendment contains no such provision. The conference report is the same as the Senate bill, establishing rules to govern the calculation of net profits.

The Senate bill contains detailed provisions as to the procedures for a work commitment bid. The House amendment does not. The conference report adopts the provisions of the Senate bill on work commitment bidding with an amendment, specifying that 50 percent of all exploration expenditures shall be included in satisfaction of the work commitment.

The Conferees adopted the so-called "work commitment" bidding system as an alterna-

tive system. To insure that such system would lead to efficient and expeditious activities, detailed provisions for such a bidding alternative are included. The lessee is to bid an amount equal to the amount to be expended on exploration activities and, if awarded a lease on that amount, deliver either a cash deposit or bond for the amount. This is a fixed amount.

One-half of exploration costs incurred by the lessee are to be credited against the deposit or bond, which can be periodically reduced. Any amounts remaining after completion of exploration or the lease term shall be paid in cash to the Secretary.

To insure that unnecessary work is not performed, two safeguards are included. First, the Secretary retains the authority to monitor exploration activities, including approving, modifying or disapproving exploration plans. Second, the lessee must put up 50 percent of his own funds, as work continues, as a match to the credit against his work commitment bid. That is, for every dollar spent on exploration, the lessee's cash deposit or bond principal would be reduced by one half dollar, rather than a full dollar. This would assure the element of risk. If an operator is awarded a lease based on a dollar-figure work commitment bid, he would have to spend twice the bid amount on exploration to satisfy the commitment. Half the amount he spent on exploration would come from his own account, and would not be "house money."

Regarding work commitment bidding and other bidding systems, the Secretary of the Interior is to establish lease terms in accordance with applicable regulations promulgated by the Secretary of Energy (see sections 302(b)(1)–(4) and 302(c) of the DOE Act).

Lease Terms

The House amendment provides for a lease term of 10 years where the Secretary finds that such longer period is necessary in areas "because of unusually deep water or other unusually adverse conditions." The Senate bill provides for a 10-year lease term "in areas of unusually deep water or unusually adverse weather conditions." The conference report is the same as the House amendment.

Both the Senate bill and House amendment, and thus the conference report, provide that the Secretary of Interior is to include in leases a requirement that the lessee offer 20 percent of "crude oil, condensate, and natural gas liquids" produced on a lease to "small refiners" or "independent refiners" as defined in the Emergency Petroleum Allocation Act of 1973.

The Conferees note that this provision refers to the definition of "small refiners" or "independent refiners" in the Emergency Petroleum Allocation Act of 1973, P.L. 93–159, as found in paragraphs (3) and (4) of section 3 of that Act. The reference in this section of the conference report is to those definitions only and not to the scope nor the application of the 1973 Emergency Petroleum Allocation Act of 1973.

Lease terms pursuant to subsection 8(b) are to be set by the Secretary of the Interior. However, such terms must be consistent with applicable regulations of the Secretary of Energy, for example, as competition, diligence, and production rates. (See DOE Act, Section 302(b).)

Lease Sale Competition Review

The House amendment and the Senate bill contain different provisions for a lease sale competition review. The Senate bill provides for a review by the Federal Trade Commission and provides that unless fitting into certain exceptions, there has to be a public hearing whenever there is a finding of "a situation inconsistent with the antitrust laws," and the Secretary nevertheless proposes to issue the lease, despite the finding. The House amendment provides for review by the Attoney General and the Federal Trade Commission. The House amendment does not provide for the automatic requirement of a public hearing or findings. The conference report in subsection 8(c) adopts the House provisions on lease sale competition reviews with several changes.

In subsection 8(c), responsibility for the review of the competitive effects of a lease sale is given to the Attorney General. However, the Attorney General is to consult with the Federal Trade Commission in making any review, in securing information and in making recommendations. It is the responsibility of the Secretary of the Interior to provide such information as may be required to conduct any competition review. To avoid delays, and to expedite the review process, it is also anticipated that the Secretary will provide all necessary information (as requested by the Attorney General in consultation with the Federal Trade Commission) simultaneously to the Attorney General and the Federal Trade Commission.

The Conferees did not accept a provision in the House amendment that would have specifically made a lease sale review an "antitrust investigation" within the meaning of the Antitrust Civil Process Act (15 U.S.C. 1311 et seq.). The Conferees believe that a lease sale competitive review is a distinct type of review and not an "investigation."

It should be noted that Section 11 of the Energy Supply and Environmental Coordination Act of 1974 authorizes the Department of Energy to obtain "energy information." Of course, information for a review under this subsection may also be obtained by the Secretary of Energy and forwarded to the Attorney General and the Federal Trade Commission pursuant to Section 11 of the Energy Supply Act. In addition, the Federal Trade Commission has the independent authority under the Federal Trade Commission Act (15 U.S.C. 41 et seq.) to secure necessary records and information and to use this data in its consultations with the Attorney General (see 15 U.S.C. 46, 49). The Conferees intend that the Federal Trade Commission is to retain its full authority to obtain records and information and is to retain its full authority to exercise this power in appropriate circumstances, including utilization of this power to adequately consult with, and give recommendations to, the Attorney General. Because information-gathering under such authority may be time consuming, the Conferees expect both the Department of Interior and the Department of Energy to expedite lease sale reviews by forwarding to the Attorney General and the Federal Trade Commission any information which the Attorney General, after consultation with the FTC, may request.

The Conferees do not intend to affect the limitations, under present law and this Act, on the release of proprietary or confidential information gathered from a company pursuant to the procedures established for a competition review under this subsection.

The Attorney General is given the discretion to make a review of a lease sale or sales and to make recommendations as to whether such sale or sales indicate a situation "inconsistent with the antitrust laws". The Attorney General is not required to make a review of any or all sales or to make any recommendations as to any or all sales. His decision to undertake or not undertake a review, and to make or not make any recommendations must be after consultation with the Federal Trade Commission.

It is anticipated that any report of the Attorney General will include a section containing the results of his consultation with the Federal Trade Commission, including any specific recommendations and comments submitted by the Federal Trade Commission. In the interest of maximizing the time the Secretary will have to review antitrust comments and recommendations, the FTC may submit a copy of its comments and recommendations directly to the Secretary.

While the procedures under this subsection, including decisions to review or not review, the actual review itself, and the recommendations to the Secretary are to be undertaken by the Attorney General after consultation with the Federal Trade Commission, the Conferees did not, in any way, intend to affect any existing power and authority to conduct investigations and reviews and to make recommendations. Specifically, the Federal Trade Commission Act, 15 U.S.C. 45, authorizes the Federal Trade Commission to conduct proceedings on unfair methods of competition; 15 U.S.C. 46, authorizes the Commission to "gather and compile information", to "investigate" businesses and to make reports on this information and the investigations, including any recommendations, to the President, Congress, and the public. Nothing in this subsection is intended to limit this authority.

As with all other recommendations to be made by the Attorney General, the Conferees believe that such recommendations should be made as promptly as possible. To ensure this, the Conferees expect the Secretary of Interior to forward any requested information to the Attorney General and the FTC as soon as possible. In addition, to allow thorough and adequate consideration of a recommendation, any recommendation should set forth the reasons for any recommendation, including the pertinent factual and policy considerations, and legal precedents, if any. No independent cause of action, however, is created by this mandate for reasons to be given. The failure to give adequate reasons or supporting facts or to give any reasons or facts, or to make any review or give any recommendations, is not an independent basis for a legal challenge to any lease sale or lease award.

The Secretary of Interior is free to accept or reject any recommendation. He may accept a bid and award a lease despite any recommendation from the Attorney General, so long as he notifies the lessee and the Attorney General of the reasons for his decision. He may, of course, accept the recommendations and refuse to accept an otherwise qualified bid and not award a lease. There is no requirement of a hearing prior to this decision of the Secretary. In addition the failure of the Secretary to accept a recommendation is not basis for an independent cause of action against a sale or lease award.

The decision of the Attorney General to conduct or not conduct a review, to make or not make a recommendation, and the decision of the Secretary to accept or not accept a recommendation, as already noted, is not to be a basis for an independent cause of action. In addition, under section 8(f) of this Act, nothing in this subsection, or anywhere else in the Act is to create a defense or to grant immunity from any criminal or civil action for violation of antitrust laws.

Specifically, the Conferees intend that the failure of the Attorney General to undertake a review, or to make recommendations, or the failure of the Secretary to accept any recommendation, while it may be introduced in proceedings as relevant evidence, is not to be a bar to any government or private antitrust action.

The Conferees, as noted earlier, do not intend to abridge any existing authority of any agency or department to collect data, make investigations, solicit or give comments, or institute and undertake judicial actions.

The Conferees do not intend to abridge any existing right of the government or a private party to bring a cause of action. However, as noted above, the failure of the Attorney General or the Secretary to act in ac-

cordance with this subsection does not create any independent cause of action.

Diligence

The House amendment provides that no lease may be issued if the Secretary finds that the bidder is not meeting due diligence requirements on other leases. The Senate bill provides that no application for a lease may be submitted if the Secretary finds, after notice and hearing, that the applicant is not meeting due diligence requirements on other leases. The conference report adopts the language of the Senate bill in subsection 8(d) with a technical amendment substituting "bid" and "bidder" in lieu of "application" and "applicant", respectively. Determinations as to diligence on other leases are to be made prior to lease sale and companies are to be informed prior to such sale if they are disqualified by this provision from bidding on this sale. Such a determination may be appropriately made through a list of ineligible companies—which can be revised periodically. Such a procedure has been utilized in applying present joint bidding bans.

This subsection is to be carried out by the Secretary of the Interior.

Sale Or Exchange Of Leases

The House amendment provides that no lease may be sold, exchanged, assigned or transferred except with the approval of, and subject to renegotiation by, the Secretary, after consultation with the Attorney General and the Federal Trade Commission. The Senate bill contains no comparable provision. The Senate receded and the conference report in subsection 8(e) adopts the language of the House amendment with an amendment, striking "and subject to renegotiation" and "and the Federal Trade Commission".

The intent of this provision is to codify existing practice, authorized by the 1953 Act, and add Attorney General input on the competitive impacts of a sale, exchange, assignment or other transfer of a lease. The Secretary shall retain his power to approve or disapprove a sale, transfer, assignment or exchange. Prior to approving or disapproving, he is to consult with and consider the views of the Attorney General.

Federal-State Agreements

Provisions in both versions of S. 9 similarly authorize Federal/State agreements as to areas within three miles of the seaward boundary of any coastal State but contain minor grammatical and structure differences. The conference report resolves those differences while maintaining the intent of both versions.

The House amendment provides that the Secretary shall "deposit" in a separate account in the Treasury of the United States certain revenues. The Senate bill provides that the Secretary shall "impound" in whole or in part, in a separate account in the Federal Treasury, revenues. The conference report adopts the House language.

The House amendment provides that nothing in this section is to limit or modify the rights of any State to jurisdiction or title to submerged lands. The Senate bill contains no comparable provision. The conference report adopts the House language.

Joint Bidding Ban

The House amendment provides that the Secretary may permit joint bids unless more than one of the bidders is chargeable with an average daily production of 1,600,000 barrels a day or more. The Senate bill does not include an amendment to the OCS Act, but amends the Energy Policy and Conservation Act of 1975, to allow joint bids involving bidders having an average daily worldwide volume of 1,600,000 barrels or more, when "it is determined that exploration and development will occur only if the exemption is granted", for areas "determined to be extremely high risk lands or to present unusually high cost exploration or development problems". The House amendment contains no such exemption. The House receded and the conference report adopts the Senate provision with an amendment.

The conference report amends subsection (c) of section 105 of the Energy Policy and Conservation Act of 1975 (42 U.S.C. 6213 (c)).

With a limited exception, there is a ban on joint bidding by two "majors" pursuant to appropriate regulations, where more than one of the bidders controls average daily worldwide production of 1.6 million barrels a day. The Secretary may, but does not have to, exempt a bidder or bidders from the ban in the bidding for leases anywhere involving high cost exploration or development problems.

No such exemption may be granted unless there is a finding, after an opportunity for a hearing, that exploration and development will only occur if such exemption is granted. Such a finding is nonreviewable, unless arbitrary or capricious. An exemption can only be granted if requested by a potential bidder and the potential bidder has the burden of coming forward with factual evidence to support his request. A finding that exploration and development will only occur if there is an exemption must be based on demonstrated evidence.

Such evidence supporting the Secretary's determination includes, but is not limited to, an economic analysis demonstrating the need for such an exemption; a financial statement of potential joint bidders demonstrating their inability to bid without such an exemption; the number of nominations for tracts or lease areas to be exempted; prior experience in bidding and lease awards in the lease area or in lease areas with similar problems; and geological, environmental or safety information detailing special, unique or increased costs.

Section 206.—Outer Continental Shelf oil and gas exploration

Section 206 amends section 11 of the OCS Act, providing the procedures for exploration of areas on the Outer Continental Shelf.

Authority

The Outer Continental Shelf Lands Act of 1953 provides:

"SEC. 11. GEOLOGICAL AND GEOPHYSICAL EXPLORATIONS.—Any agency of the United States and any person authorized by the Secretary may conduct geological and geophysical explorations in the outer Continental Shelf, which do not interfere with or endanger actual operations under any lease maintained or granted pursuant to this Act, and which are not unduly harmful to aquatic life in such area."

The Senate bill provides in subsection 11 (a)(1) that "the Secretary or any agency of the United States, and any person" authorized can conduct explorations. The House amendment only provides that "any person" authorized can conduct explorations. The Conferees decided not to adopt either version's language, but rather to retain the exact language of Section 11 of the 1953 OCS Act, regarding exploration authorization. Thus, Section 206 does not modify, in any way, the existing language of section 11.

The Conferees' action does not indicate any particular interpretation of existing law. Accordingly, the Conferees intend to keep in effect, and neither limit nor extend whatever authority the Secretary of the Interior and other Government agencies have under existing law.

Exploration Plans—Application

The House amendment provides that 90 days after enactment of this subsection, exploration has to be pursuant to the requirements of this new exploration section, with an exception provided for leases where a drilling permit had been issued prior to the date of enactment. For exploration on leases included in this exception, the House amendment provided that the Secretary is authorized to require such activities to be described in an exploration plan, to require a revised exploration plan, to require a general statement of onshore intentions, and to require the submission of additional information or to establish additional requirements on leases in accordance with his general regulatory authority.

The Senate bill contains comparable exemptions. Specifically, the Senate bill exempts from the requirement of compliance with this new section and any regulations promulgated pursuant to this section, those leases in which a drilling permit had been issued prior to the enactment. In a later subsection, the Senate bill allows the Secretary to approve the exploration plan submitted prior to enactment, which he finds is in substantial compliance with the provisions of this new section and to require the submission of additional information.

The conference report requires compliance with the new provision of section 11 on exploration, except that exploration activities pursuant to any lease for which a drilling permit has been issued or for which an exploration plan has been approved prior to ninety days after the date of enactment, shall be considered in compliance with section 11. The conference report does retain the language of both versions that the Secretary may require the submission of information by a lessee for exploration activities otherwise exempted from new requirements of section 11 and provides that the Secretary retains the authority granted in section 5(a)(1)(B) to order a suspension or temporary prohibition of any exploration activities, and then to require a revised exploration plan to be submitted.

The specific requirements of new section 11, dealing with the submission, contents and review of exploration plans are therefore ordinarily not to apply to exploration activities pursuant to a lease for which a drilling permit has been issued or an exploration plan approved prior to ninety days after the date of enactment of the 1978 Amendments. Exploration activities which are excluded by this subsection are to be conducted in accordance with existing law and regulations and the terms of any existing permit or plan.

Exploration Plans

Both versions of S. 9 and therefore the conference report require exploration plans to be submitted and reviewed by the Secretary of Interior. Both the House amendment and Senate bill provide for revisions of plans. The intent of both versions is clarified by making it explicit that only "significant revisions" need go through that approval process. In subsection (c)(1), the Conferees adopted an amendment to insure that exploration plans are consistent with regulations prescribed by the Secretary pursuant to paragraph (8) of Section (5)(a) of this Act, relating to air quality standards where States are significantly affected by OCS activities (see discussion on section 5(a)(8), *supra*).

There are grammatical and technical differences between the House amendment and the Senate bill as to the process and effect of approval, modification and disapproval. These were resolved in the conference report; in addition, the House amendment provides for the possibility of cancellation after a period of suspension, in appropriate circumstances, if an exploration plan cannot be approved, and also provides for compensation after cancellation. Under the Senate bill, when a lessee is eligible for such cancellation, the Secretary may only "delay" approval of the exploration plan. The conference report is the same as the House amendment.

The House amendment provides for a re-

quirement of consistency of any license or permit for any activity in an exploration plan with an approved State coastal zone management program. The Senate bill contains no comparable provision. The Senate receded and the conference report includes the House provision.

Drilling

The House amendment provides in section 11(g) for the authorization of permits for qualified applicants to conduct "onstructure" exploration. The House amendment requires the offering of such permits at least once during the next two-year period. The Senate bill contains no comparable provision, but does provide in a separate section for a pre-lease drilling program which may include such on-structure permits drilling program which may include such onstructure permits (see discussion in section 26, *infra*). The House receded and the conference report contains no such provision. The Conferees' action does not indicate any intention to limit, modify, or expand whatever authority the Government has under existing law to grant permits to applicants to conduct drilling operations.

The House amendment in subsection (h) provides for standards and regulations for permits for geological explorations. The Senate bill contains no specific language as to such permits or regulations. The Conferees adopted the House provision.

Wilderness—Point Reyes

The House amendment provides for the exclusion from any leasing or exploratory drilling of any tract within fifteen miles of a wilderness area. This provision was adopted on the House Floor and was intended to apply to only one area in California. The Senate bill contains no comparable provision. The conference report follows the House provision with an amendment, specifying that the exclusion is to apply only to one area in California—Point Reyes.

Point Reyes National Seashore is located thirty miles north and west of San Francisco, California. This seashore contains beaches, mountains, and numerous species of flora and fauna. A portion of the Seashore has been designated by Congress as part of the National Wilderness Preservation System. It is presently administered by the National Park Service, with oversight by a special panel appointed by the Secretary of the Interior.

The Conferees determined that because of the unique recreational, ecological and other qualities of this area, exploration and leasing within 15 miles of Point Reyes should be prohibited.

There are State waters abutting the Point Reyes National Seashore. To avoid the possibility of inconsistent activities, if California authorizes mineral activity in its waters, the exclusion is automatically withdrawn and there is no further bar to Federal OCS activities.

Finally, adoption of this provision is not intended as a precedent as to whether or not similar protection is to be afforded to other present or future wilderness areas.

Reservation by the Congress

The House amendment contains a section 208 which provides that the Congress can withdraw areas from OCS leasing by passing a concurrent resolution so declaring. The Senate bill contains no such provision. The House receded and the conference report contains no such provision.

Section 208—Annual report

Section 208 amends section 15 of the Outer Continental Shelf Lands Act to require the Secretary of the Interior to submit an annual report in two parts within 6 months of the end of each fiscal year. The required contents of the report are specified in the subsection and the intent of the language is clear.

One part of the report is to include recommendations and findings as to competition and is to be made after consultation with the Attorney General. The Attorney General may, but need not, submit findings or recommendations, which are to be included in the report of the Secretary of Interior submitted to Congress. The Secretary of Interior is to prepare his report on competition, the second part of his annual report, after consultation with the Secretary of Energy and the Federal Energy Regulatory Commission, and is to receive their written comments within their respective applicable responsibilities. Any comments not accepted by the Secretary of Interior are to be separately included in the report.

The House amendment provides for the competition portion of the annual report to contain an evaluation and description of measures "to insure an adequate supply of oil and gas to" independent refiners and distributors. The Senate bill provides for an evaluation and description of additional measures "to increase the supply of" oil and gas to independent refiners and distributors. The conference report adopts the new phrase "dealing with supplies" of oil and gas to independent refiners and distributors.

Section 209—New sections of the Outer Continental Shelf Lands Act

Section 18—Outer Continental Shelf Leasing Program

Section 18 establishes a process which will permit the Secretary of the Interior to weigh energy potential, and other benefits against environmental and other risks in determining how, when and where oil and gas should be made available from the various Outer Continental Shelf areas to meet national energy needs.

Considerations

The House amendment provides that a leasing program "shall consist of a schedule of proposed sales indicating" the size, timing and location of activities. The Senate bill provides that the leasing program is to indicate the size, timing and location and does not specifically provide for it to consist of a "schedule of proposed lease sales." The conference report is the same as the House amendment.

The House amendment includes among the considerations for a leasing program, the sufficiency of resources including equipment and capital to assure exploitation expeditiously. The Senate bill contains no comparable provision. The House receded and the conference report contains no such provision.

The House amendment includes among the considerations for a leasing program, the relative environmental sensitivity and marine productivity of different areas. The Senate bill contains no comparable provision. The conference report is the same as the House amendment.

The House amendment includes among the consideration for a leasing program the policies and plans under the Coastal Zone Management Act. The Senate bill contains no comparable provision. The conference report follows the House amendment and contains no such specific provision as it is included within the consideration of "laws, goals and policies of affected States".

Both versions contain as a consideration of a leasing program, the receipt of value for lands. The House amendment provides that activities are to be conducted to assure receipt of "fair value for the lands leased and the rights conveyed by the Federal Government". The Senate bill provides for leasing and gas owned by the Federal Government. The Conference report follows the House amendment, with the addition of the term "market" so as to read "fair market value for the lands leased and the rights conveyed conveyed by the Federal Government."

Preparation of Proposed Leasing Program

The House amendment provides for a report by the Attorney General and the Federal Trade Commission as to competition aspects of the leasing program during the preparation of any proposed leasing program. The Senate bill contains no comparable provision. The conference report adopts the Senate language and deletes this provision. However, the conference report does specifically include the Attorney General in consultation with the Federal Trade Commission, as a party to be given input into the preparation of a program.

As just noted, both versions contain provisions for input from appropriate parties during the preparation of a leasing program. The House amendment specifically provides that the Secertary is to include suggestions "from any interested Federal agency" and "from the executive of any affected local government unit in such an affected State". The Senate bill contains no such specific language. The conference report follows the House amendment with an amendment, providing that the Secretary may solicit and consider suggestions on a proposed leasing program from the head of any local government unit affected by OCS activities, after such recommendations have been submitted to the Governor of the affected State, and also providing that the Secretary may solicit and consider suggestions from any interested Federal agency, including the Attorney General in consultation with the Federal Trade Commission.

The Governor is given discretion to identify—and then solicit and consider the suggestions of—affected local government units. Local governments can, of course, request information from the Governor or Secretary as to OCS leasing activities. Governors must be notified by the executives of any such affected local government units so as to be able to consider their inclusion in his recommendations.

The Conferees intend that local governments are generally to act through their state government representatives; and that recommendations are to be forwarded to and by local governments through State governments. In addition, there is to be no independent basis for legal action by a local government unit against activities under this Act, or actions pursuant to this Act, because of a dispute with a State government as to whether they are "affected" or any alleged failure to consult with, submit data to, or receive the recommendations of a local government.

The House amendment further provides that the Governors of affected States are to solicit comments from the executives of local governments units in his state affected by OCS activities, after the actual proposed program is submitted to them. The Senate bill contains no such specific requirement. The conference report follows the House amendment with an amendment, emphasizing that is up to the discretion of the Governors to solicit comments from representatives of those local governments which the Governors determine will be affected. No responsibility is placed on the Federal Government.

Again, the Managers intend that local governments are to act through their State government representatives; and that data and recommendations are to be forwarded to and by local governments through State governments.

There is to be no independent basis for legal action by a local government unit

against activities under this Act, or actions pursuant to this Act, because of a dispute with a State government as to whether they are "affected" or any alleged failure to consult with, submit data to, or receive the recommendations of a local government.

Both versions provide for the submission of a proposed leasing program to appropriate parties. The House amendment provides specifically for submission to the Federal Trade Commission, and through Governors, to local government executives. The Senate bill contains no such specific requirements for submissiin to these two parties. The conference report follows the Senate bill with respect to the Federal Trade Commission, and does not mention the FTC, and the House amendment with respect to the inclusion of local government executives with an amendment providing that the Governor shall submit a copy of the proposed leasing program to the executive of any affected local government unit but only upon request.

The Governors are to submit the proposed leasing program upon request to heads of affected local governments. No responsibility is placed on the Federal Government by the inclusion of the reference to local governments. There is to be no independent basis for legal action by the executives of an affected local government unit against activities under this Act, or actions pursaunt to this Act, because of any alleged failures of a State government to submit a proposed leasing program to such local government.

Comments on Leasing Program

Subsection (d)(1) provides that the Attorney General may submit comments on a final proposed leasing program but no later than ninety days (90) after the publication of such a program. He is to submit comments after consultation with the Federal Trade Commission.

No independent cause of action is created by this provision. Therefore, the failure of the Attorney General to submit a report, or the insufficiency of the reasons given for his views and recommendations, are not to be an independent basis for a law suit.

The Conferees do not intend to abridge existing authority of any agency or department, including the Federal Trade Commission, to solicit information or give comments.

CZMA

Both versions provide for regulations as to coastal zone management applicability. The House amendment provides for regulations involving "consideration" of a program "being developed or administered" pursuant to section 305 or 306, respectively, of the Coastal Zone Act. The Senate bill provides for "coordination" of the program with the management program being developed and also for "consistency" to the extent practicable with the management program. The conference report is the same as the House amendment. The Secretary is to establish procedures by regulation for consideration of State coastal zone management programs.

Data

Both versions provide for the obtaining by the Secretary of Interior of relevant data. The House amendment specifically provides that classified data is to remain confidential for such a period of time as agreed to by the head of a department or agency from whom the information is requested. The Senate bill contains no such comparable language. The conference report is the same as the House amendment. In addition, the House amendment provides for the confidentiality of "all privileged data". The Senate bill provides for the confidentiality of all "proprietary" data. The conference report refers to both "privileged or proprietary data."

This subsection deals with the authority and responsibility of the Secretary of the Interior to collect data and keep it confidential. This subsection does not affect the independent authority of the Secretary of Energy and the Federal Energy Regulatory Commission, under the DOE Act, and other statutes, including section 11 of the Energy Supply and Environmental Coordination Act of 1974, to collect, obtain, classify and release information.

Both versions provide for the forwarding of nonprivileged information by other Fedcral departments and agencies. The House amendment provides that such agencies are to provide the Secretary with "nonprivileged information". The Senate bill provides for the forwarding of any "nonproprietary information". The House amendment also authorizes other Federal departments and agencies to provide the Secretary with privileged information. The Senate bill does not specifically provide such an authorization. Furthermore, the House amendment provides that such privileged information given to the Secretary is to remain confidential for such period of time as agreed to by the department or agency. The conference report with minor technical changes follows the House amendment, authorizing other Fedcral department and agencies to provide the Secretary with privileged information, which is to remain confidential for the agreed period of time.

This subsection deals with the authority and responsibility of the Secretary of Interior to collect data and keep it confidential. The subsection does not affect the independent authority of the Secretary of Energy and the FERC, under other statutes, to collect, obtain and release information.

Revisions

Both the Senate bill and House amendment authorize revision and reapproval of a leasing program. Minor revisions need not go through the detailed procedures. Significant revisions—affecting the substance of a program—must go through the same procedures established for the original development of the program.

Section 19—Coordination and consultation with affected States and governments

This section is intended to insure that Governors of affected States, and local government executives within such States, have a leading role in OCS decisions and particularly as to potential lease sales and development and production plans. In addition, it is intended to provide a mechanism for involvement of Governors and local government officials.

The House amendment titles section 19 "Coordination and Consultation with Affected States and Local Governments." The Senate bill titles section 19 as "Coordination with Affected States and Local Governments". The conference report is the same as the House amendment.

Both versions allow, but do not require, Governors of affected States to submit recommendations regarding the size, timing, or location of a proposed lease sale or with respect to a proposed development and production plan. The House amendment, in addition, allows the submission of recommendations by "the executive of any affected local government in such State". The conference report follows the House amendment, providing for the submission of recommendations by the heads of local government units to the Secretary, after those recommendations have been forwarded to the Governor.

The House amendment provides for the submission of recommendations within 90 days after receipt of a development and production plan. The Senate bill provides for submission of recommendations within 60 days of the receipt of a development and production plan. The conference report is the same as the Senate bill—60 days.

Both versions provide procedures for the acceptance by the Secretary of Interior of the recommendations of Governors. In addition, the House amendment provides procedures for the acceptance of the recommendations of the executive of any local government units. In the conference report, the submission of recommendations to the Secretary and the acceptance of recommendations by the Secretary is made discretionary as to executives of local governments, and only allowable after the submission of the recommendations to the Governors.

Both versions and the conference report require acceptance of a Governor's recommendation if the Secretary of the Interior determines that the recommendations provide a reasonable balance between the national interest and the well-being of citizens of the affected State.

The Secretary shall communicate the reasons for accepting or rejecting the recommendations of the Governors in writing to them.

The Conferees intend that local governments are generally to act through their State government representatives; and that data and recommendations are to be forwarded to and by local governments through State Governments. In addition, there is to be no independent basis for legal action by a local government unit against activities under this Act, or actions pursuant to this Act, because of an alleged failure to consult with, submit data to, or receive the recommendations of a local government.

Both versions provide for cooperative agreements by the Secretary of Interior with affected States for the sharing of information and other purposes, making it explicit that such cooperative agreements are to be consistent with the confidentiality, waiver of immunity, and liability responsibilities of section 26 (see discussion, on Section 26). The House amendment specifically provides that the sharing of information should be "(in accordance with the provisions of section 26 of this Act)". The Senate bill contains no such specific limitation. On this point the conference report is the same as the House amendment.

Section 20—Environmental studies

Section 20 provides a mechanism by which information concerning the environment in an area leased or to be leased and then developed is to be analyzed and then used as a basis to monitor effects.

The House amendment titles this section "Environmental Studies". The Senate bill titles this "Baseline and Monitoring Studies". The conference report is the same as the House amendment.

The House amendment provides for studies to establish "information needed for the assessment and management of environmental impacts on" the environment. The Senate bill provides for studies in order to establish "baseline information concerning the status of" the environment. The Senate receded and the conference report is the same as the House amendment.

Both versions provide for required studies within cetrain limits of time for new leases and existing leases. The House amendment provides for a study to be commenced not later than six months after enactment with respect to any area or region where a lease sale has been held "or announced by publication of a notice of a proposed lease sale". The Senate bill does not refer to the announcement by publication of a notice of a proposed sale in regard to the initiation of such studies. The conference report adopts the House language.

The House amendment provides the commencement for a study six months prior to a lease sale for areas where no lease sale has been held "or scheduled". The Senate bill does not make reference to lease sales

scheduled. The Senate recedes and the conference report is the same as the House amendment.

The House amendment refers to "environmental information" in predictive studies. The Senate bill refers to "baseline information" as part of the predictive studies. The Senate receded and the conference report is the same as the House amendment.

The House amendment provides that the Secretary is to consider relevant environmental information in making appropriate decisions and developing regulations and conditions. The Senate bill contains no comparable provision. The Senate receded and the conference report is the same as the House amendment.

Both versions provide for utilization of the Department of Commerce to the maximum extent practicable. The House amendment provides that the "Secretary shall, to the maximum extent practicable, enter" into appropriate arrangements. The Senate bill provides that "the Secretary is authorized and directed, to the maximum extent practicable, to enter" into appropriate arrangements. The Senate receded and the conference report is the same as the House amendment.

Section 21—Safety regulations

Section 21 establishes procedures for study, review, coordination, and if necessary, revision of safety regulations in light of the policy of the 1978 amendments for safe operations on the Outer Continental Shelf.

Both versions provide in subsection 21(a) for a study of existing safety regulations by the Department of the Interior and the Coast Guard, in consultation with other appropriate Federal officials, but use different language. In addition, the Senate bill mandates participation by the Secretary of Labor in the study, while the House amendment allows such participation as Labor would be a Federal department or agency to be consulted, when appropriate. The conference report follows the House amendment and does not explicitly list the Secretary of Labor.

It is expected that in undertaking this study, the Secretary of the Interior and the Secretary of the Department in which the Coast Guard is operating will consult with the Department of Labor, and specifically the Occupational Safety and Health Administration, and other agencies having expertise in the areas of safety and health, oil and gas development and production, and environmental protection.

In addition, the conference report provides, as a conforming and technical change to include "health" regulations in the study. Since the President is required under both versions and the conference report to submit, after receipt of this study, a plan to Congress of his proposals to promote safety and health, it is both appropriate and necessary that the study include "health" considerations as well.

The House amendment requires use of best available and safest "technologies", as described, for all new drilling and production operations and wherever practicable on existing operations. The Senate bill similarly provides for use of the best available and safest "technology". The conference report is the same as the House amendment, in order to emphasize that more than one technology may be applicable as the best way to achieve a particular objective or do a particular job.

In addition, the House amendment provides for such technology which the Secretary determines to be economically "feasible". The Senate bill provides for use of such technology which the Secretary determines to be economically "achievable". The conference report is the same as the House provision.

There are structural differences between the House and Senate versions as to use of technology. Both versions provide for use of such new technology or techologies on existing operations "wherever practicable". Both versions also provide for a determination by the Secretary as to the incremental benefits against the incremental costs, but use slightly different language to do so. The conference report is the same as the House amendment. It is, of course, the responsibility of an operator on an existing operation to demonstrate why application of a new technology would not be "practicable".

The Conferees expect, to assure uniformity of requirements for industry compliance, that a determination as to what are the best available and safest technologies economically feasible is to be made by the regulating agency on an industry-wide basis or with respect to classes or categories of operations, rather than on an installation-by-installation, company-by-company, or lessee-by-lessee basis. In addition, the language provides for economical feasibility to be a balance of costs against benefits.

Best available and safest technologies (BAST) is required when "significant" effects are involved and can only be then waived when incremental benefits "are clearly insufficient" to justify increased costs. Ordinarily, again to assure uniformity of requirements, considerations of costs and benefits should also be done by the regulating agency on an industrywide basis or with respect to classes or categories of operations, rather than on a company-by-company, installation-by-installation, or lessee-by-lessee basis. Responsibilities for safety are presently shared by Interior, Coast Guard, and other agencies. It is expected that the appropriate agency will make this cost/benefit analysis in exercising their respective responsibilities.

It is expected that in promulgating regulations and in administering the program, the Secretary and the Department in which the Coast Guard is operating will consult and cooperate with OSHA and other Federal agencies having expertise in the areas of safety and health, oil and gas production, and the environment.

The House amendment provides in section 21(c) for the Coast Guard to promulgate regulations or standards as to diving activities and other unregulated hazardous working conditions. The Senate bill provides for the Coast Guard, working with the Secretary of Labor, to promulgate regulations for diving standards. The Senate bill provides that, notwithstanding the Occupational Safety and Health Act, both Labor and Coast Guard are to promulgate and enforce these regulations jointly and in a coordinated manner. The House amendment has no such language. The conference report follows the House intent and requires regulations as to unregulated hazardous working conditions in the OCS only by the Coast Guard.

As regulations and standards on diving activities have already been proposed by the Coast Guard, they are no longer specifically enumerated. Regulations on workers' safety shall be promulgated, and can be modified, by the Secretary of the Department in which the Coast Guard is operating.

Both versions provide that existing authority of agencies is not to be affected by this section, although the Senate provides that the existing authority of the Secretary of Labor is to be expanded to cover diving practices in all circumstances. The conference report deletes this reference and specifies that the existing authority under law of the Secretary of Labor (as to occupational safety and health), the Administrator of the Environmental Protection Agency (as to protection of the environment) and of the Secretary of Transportation (as to pipeline safety) is not affected by this Act.

In adopting the language providing for OCS workers' safety regulations to be promulgated by the Coast Guard, and also providing for the existing authority of the Secretary of Labor (through the Occupational Safety and Health Administration) as to workers' safety to be retained, the Conferees clearly intend neither to reduce, nor to add to existing OSHA authority, under section 4(b)(1) of the Occupational Safety and Health Act.

This section merely requires the Coast Guard to undertake expedited action where it deems it necessary to regulate hazards currently unregulated by the Government. Under its existing authority, and section 4(b)(1) of the Occupational Safety and Health Act, the Coast Guard may take any appropriate action necessary to regulate any hazard, and may over time displace the applicability of OSHA standards to other working conditions through exercise of appropriate rulemaking actions. However, the Conferees intend that consultation with OSHA in standards development and administration, and opportunity for participation by interested parties in any such Coast Guard action, will assure that employees receive no less protection than under existing standards. Consistent goals contained in recent OSHA-Coast Guard agreements—maximizing the safety and health protection of employees, avoiding duplication of effort, and avoiding undue burden on the maritime industry—are also endorsed by the Conferees.

The Senate bill provides for the Secretary of Commerce, working with the Coast Guard and the National Institute of Occupational Safety and Health, to conduct studies of underwater diving techniques and equipment. The House amendment contains no comparable provision. The House receded and the conference report adopts the Senate provision for such a study.

The House amendment provides specifically that the Secretary of the Interior is to consult and coordinate with appropriate agencies to avoid inconsistent or duplicative requirements. The Senate bill contains no comparable provision. The conference report follows the House amendment.

The House amendment provides that the Secretary is to make available a compilation of safety and other regulations applicable to OCS activities by any and all Federal departments or agencies. The Senate bill contains no comparable provision. The conference report follows the House amendment.

Section 22—Enforcement

This section is to provide mechanisms and procedures for the enforcement of safety and environmental regulations issued pursuant to the provisions of the Act. Failure to comply with any provision of the Act, any implementing regulation, or the terms of a lease or permit included because of the Act or regulations, would subject the violators to civil or criminal penalties under Section 24 of the 1978 amendments.

The Senate bill provides for the Secretary of the Interior and Secretary of Department of Coast Guard to consult with each other regarding the enforcement of regulations. The House amendment specifies that "applicable Federal officials" shall enforce regulations. The conference report adopts the Senate language but adds the Secretary of the Army.

Regulatory responsibility is delegated in other sections of the Act, as well as is the power to implement and enforce such regulations. In many circumstances, it is the responsibility of Interior, in others, Coast Guard, in others, the Army, and in others the Department of Transportation.

Nothing in this section, or any other section in the bill is intended to affect the authority of other agencies or departments to exercise enforcement powers and impose duties under other laws. In addition, the Conferees expect that, as with regulatory authority, enforcement authority be executed

by applicable Federal officials in a cooperative manner with other Federal agencies having expertise in that area. Thus, for example, it is expected that in exercising his enforcement authority, the Secretary of the Department in which the Coast Guard is operating will consult and cooperate with OSHA and other Federal agencies having expertise in the areas of safety and health, oil and gas production, and environmental protection.

The House amendment provides for certain duties of a holder of a lease or a permit to maintain places of employment in accordance with safety and health standards and free from recognized hazards to employees, and to maintain operations in compliance with all other regulations. The Senate bill contains no comparable provision. The conference report follows the House amendment. Of course, this section does not relieve any contractor or subcontractor from other obligations under the law.

The House amendment provides that a lessee or permittee is to allow prompt access to any inspector and to provide such documents or records as are pertinent. The Senate bill provides authorization for the Secretary of Interior or the Coast Guard to enter without delay any part of a facility and to examine documents and records as are pertinent. The conference report follows the House amendment. Since prompt access and provision of records is a duty directly imposed by this provision, lease and permit holders should expect that inspectors will visit the site of any operation, with or without advance notice.

In addition, both versions mandate inspections. As to "surprise" inspections, the House amendment provides for such inspections without advance notice at least once a year. The Senate bill has no such specific time requirement but does require periodic "surprise" inspections. The conference report follows the Senate bill.

Both versions provide in this section for investigations and reports on fires and major oil spills. The Senate bill defines major spillage in terms of "any discharge from a single source". The House amendment defines it in terms of "spillage in one instance". The conference report follows the House amendment.

In addition, the House amendment provides specifically that lessees or permittees are to cooperate with the investigation. No such specific language is included in the Senate bill. The conference report follows the House amendment.

The House amendment provides for investigations and public reports on any death or serious injury as a result of operations conducted pursuant to this Act. The Senate bill contains no such comparable provision. The conference report follows the House amendment.

The House amendment provides that appropriate agencies are to consider allegations from any person as to the violation of safety regulations and to answer same. The Senate bill contains no comparable provision. The conference report provides that the agency "may review" rather than "shall consider" any allegation and does not require a report on each such allegation. The Conferees were aware that the Coast Guard has broad authority and responsibility for safety and health under this Act and other maritime statutes and to review allegations of safety and health regulations and violations. The language of this section is not intended in any way to restrict the Coast Guard's ability to investigate violations or allegations of violations of any safety or health regulation.

Both House and Senate provisions provide for necessary power to agencies to conduct investigations. The House amendment is more specific than the Senate bill in that it includes specific references to process in the District Courts of the United States, and the power to administer oaths. The conference report follows the House amendment.

The House amendment provides that the annual report shall include a report on safety violations and investigations. The Senate bill contains no comparable provision. The conference report follows the House amendment with a technical amendment substituting "any" in lieu of "the" in reference to "investigations undertaken" to make it clear that investigations of allegations are discretionary and not mandatory.

Section 23—Citizen suits, court jurisdiction, and judicial review

Section 23 details the procedures by which citizens, including lessees, or permittees, employees, local and state governmental officials, and others, can participate in the enforcement of the Act. Review of certain types of actions are through administrative proceedings, followed by an appeal in a court of appeals. Review of other actions are by suits in a district court.

Clearly included in this section are local governments and local government officials. This is in addition to the responsibilities placed on the State Governors, throughout the conference report, to consult with affected local government officials. As noted in this statement in various places, the responsibilities placed on the Governor to consult with, supply information to, and forward the recommendations of, local government officials are not to be an independent basis for a lawsuit against the Federal Government if the Governor should not adequately comply with the responsibilities. However, this limitation is not intended to restrict any right a local government or local government official may otherwise have under this section to commence a civil action.

The House amendment terms this section "Citizen Suits, Court Jurisdiction, and Judicial Review". The Senate bill terms this section "Citizen Suits". The conference substitute follows the House amendment.

CITIZEN SUITS

There are slight structural differences between the two versions on citizen suits. Both provisions in Section 23(a) permit suits against any person, including government instrumentalities and the Secretary of Interior. The House amendment does not specifically state that suits are authorized against the Secretary for nondiscretionary duties or acts. The Senate receded and the conference substitute follows the more general and inclusive language of the House amendment.

The House amendment provides for control of the citizen suits and responses to be with the Attorney General. The Senate bill provides for such control to be by the Secretary of Interior, his authorized representative or the Attorney General. The Senate receded, and the conference substitute follows the House amendment, as Section 23(a)(2).

The House amendment limits intervention by the Federal Government to the Attorney General, upon the request of the Secretary or other appropriate Federal officials. The Senate provides for intervention by the Secretary of Interior. The conference report follows the House amendment, and provides for intervention by the federal government only to the Attorney General.

Both the Senate bill and House amendment and thus the conference report provide that citizen suits cannot be commenced until after a sixty day notice period or if the federal government has commenced and is diligently prosecuting a comparable action. This sixty day delay period, however, may be waived if a plaintiff can show an imminent threat to the public health or safety or an immediate affect on the plaintiff's legal interest. This reference to imminent threat to the "public health or safety" relates only to those circumstances justifying an immediate citizen's suit. Thus, under this section, a plaintiff can only commence a suit if he has "a valid legal interest which is or may be adversely affected." Ordinarily, he must then give notice and wait sixty days before actually commencing litigation. However, if a citizen, with the requisite standing, can also show an imminent threat to the public health or safety, or an immediate effect on his legal interest, he may commence litigation immediately after notification, without waiting the sixty day period.

Exclusivity of Suits

The House amendment and Senate bill have similar provisions as to the exclusivity of the citizens suit and other judicial procedures. The House amendment provides that all suits challenging violations of the OCS Act or implementing regulations are to be in accordance with this new section. Rights under any other Act or the common law to seek appropriate relief are not barred. The Senate bill provides that no rights under any statute or common law to seek enforcement of the Act or any regulations or to seek any other relief are barred by this section. The conference report adopts the House language.

General Jurisdiction

The House amendment provides for jurisdiction in the District Courts (restating section 4(b) of the 1953 OCS law). The Senate bill merely refers to section 4(b) of the OCS law. The conference report follows the House amendment, as subsection 23(b).

The Senate bill specifically provides that any resident who is injured in any manner may only sue in the judicial district having jurisdiction under section 4(b). The House amendment makes no specific reference to suits for injuries. The conference report follows the Senate bill with a technical change, substituting 23(b) in lieu of 4(b).

Judicial Review

Both versions provide for limitations of judicial review after administrative proceedings. The House amendment provides that specific objections are to be considered "only if issues upon which such objections are based" have been previously submitted. The Senate bill provides for consideration only if "such objections have been submitted" previously. The conference report follows the broader House amendment. The Senate bill provides that citizen suits and judicial review procedures are to take precedence on the docket over other causes of action. The House amendment contains no comparable provision. The conference report adopts the Senate language.

Compensation to Plaintiffs—Court Costs

Both the Senate bill and House amendment provide that a court may award costs of litigation, including reasonable attorney's fees and expert witness fees, to a party when the court determines such an award as appropriate. The conference report adopts the House language, authorizing such awards in citizen suits, and in administrative proceedings, and judicial review of, a leasing program, exploration plan, or "D&P" plan.

Section 24—Remedies and penalties

Both versions provide for appropriate remedies and penalties. The House amendment provides in subsection 24(a) for actions only "upon a request by the Secretary". The Senate bill provides for civil actions "at the requestion of the Secretary, the Secretary of the Army, or the Secretary of the department of which the Coast Guard is operating". The conference report follows the Senate bill.

The House amendment provides in subsection 24(a) for the institution of action by "the Attorney General". The Senate bill provides for the institution of action by the Attorney General "or United States Attor-

ney". The conference report adopts the Senate language.

The House amendment specifically provides for civil penalties for violation of the terms of a lease, license or permit. The Senate bill contains no such specific reference. The conference report employs the House language.

The House amendment provides in subsection 24(b) that only the Secretary of Interior may assess, collect and compromise penalties. The Senate bill provides that the Secretary of Interior, Secretary of the Army and the head of the Coast Guard may all collect penalties. The conference report follows the House amendment. The Secretary is, of course, bound to seek appropriate penalties, and collect them, for violations discovered and reported by other agencies, such as the Coast Guard or Army, which have enforcement responsibilities under this Act. In addition, nothing is intended by this section to affect the power of the Secretary of Energy or the Federal Energy Regulatory Commission, or other agencies, to take appropriate action, under other laws, to enforce their own regulations.

The House amendment specifically provides in subsection 24(c) for criminal penalties for the violation of the terms of a lease, permit or license. The Senate bill contains no such specific reference. The conference report follows the House amendment.

Section 25—Oil and gas development and production

Section 25 is intended to provide the mechanism for review and evaluation of and decision on, development and production in a leased area, after consultation and coordination with all affected parties.

Application

Both versions contain detailed and similar provisions describing development and production plans. The House amendment requires a development and production plan to be submitted for all future leases in a frontier area. The Senate bill provides for a development and production plan to be submitted for all future leases anywhere. The conference report requires a plan to be submitted for all future leases except in the Gulf of Mexico.

The House amendment also requires a plan to be submitted for existing leases in frontier areas, where no oil or gas has been yet discovered. The Senate bill similarly requires a plan to be submitted for existing leases where there has not yet been a discovery, but exempts the Gulf of Mexico. The conference report adopts the Senate language. Thus, the mandate and specific procedures of this bill that the Secretary of Interior must secure submission, and then review, approve, or disapprove a development and production plan applies to new leases of existing leases where there has not yet been a discovery and does not apply to leases, old or new, in the Gulf of Mexico. This does not affect the existing requirements on leases, already established by the Secretary of Interior.

The Conferees, by recommending the enactment of section 25 to the Congress, are not approving or disapproving existing requirements for development and production. It is hoped that the Secretary of Interior will apply existing law and requirements to tracts which have commenced development and production, and to other areas in the Gulf of Mexico, where development and production activities have been going on for a number of years, in such a manner as to limit bureaucratic "red-tape" and otherwise minimize delays in the search for and production of oil and gas.

The requirements of this new section are specifically made inapplicable to the Gulf of Mexico. However, there are areas in the Eastern Gulf that have never been developed. While a sale—the so-called MAFLA sale—has been held for this region, no development or production has occurred there. The Conferees therefore adopted a provision that gives the Secretary of the Interior the discretion to require submission of plan—in accordance with this section—for development and production activity in this area which is defined as being adjacent to the State of Florida.

The Conference Committee understands that lines have already been drawn to determine those areas that are adjacent to the State of Florida. [See 43 Federal Register 24711 (June 7, 1978.)].

Onshore Impacts and Submission and Contents of Plans

Both versions provide for an accompanying onshore impact statement. The House amendment provides for the statement to include all operations for development, production, transportation, processing, or refining. The Senate bill provides for operations for development or production. The conference report follows the Senate bill.

Both versions provide for the submission of plans and statements to Secretary of Interior and then by the Secretary to outside groups. The House amendment excludes from these requirements of submission, "privileged information (as such term is defined in regulations issued by the Secretary)". The Senate bill excludes "interpretative data, which, pursuant to regulations prescribed by the Secretary, constitute confidential or privileged information." The conference report follows the House amendment.

The House amendment provides that information is to be submitted to the Governors and upon request, to the executive of any affected local government. The Senate bill provides that they are only to be "made available" to the executive of any affected local government. The conference report follows the House amendment.

It is intended that development and production plans and statements are to be provided to local government executives upon request. Furthermore, there is to be no independent basis for legal action by a local government unit against activities under this Act, or actions pursuant to this Act, because of an alleged failure to consult with, submit data to, or receive the recommendations of a local government.

The House amendment precludes a future lease from being issued without a requirement of compliance with the development and production plan for any lease "in any frontier area". The Senate bill provides an exception for this requirement for future leases in "the Gulf of Mexico". The conference report adopts the Senate language but in a separate section allows the Secretary to apply this provision to future leases in the Gulf of Mexico adjacent to the State of Florida (see discussion above).

Both versions provide for specific items to be included in a development and production plan. Among other things, the House amendment provides a requirement of a "description of all facilities and operations located on the outer Continental Shelf". The Senate bill uses the words: "all offshore facilities and operations". The conference report follows the House amendment, making it explicit that the plan itself is to only cover OCS facilities and operations, including pipelines, and not facilities and operations in State waters.

Also, both versions, and the conference report, require a plan to include "an expected rate of development and production and a time schedule for performance." The consideration and review by the Secretary of Interior of this element of a plan must be made in light of any applicable regulations by the Secretary of Energy on production rates and diligence. [See DOE Act, Section 302 (b) and 302(c)]

The requirements as to information to be submitted to the Secretary of Interior under the section are not intended to affect the authority of the Secretary of Energy, the Federal Energy Regulatory Commission, or any Federal department or agency, to collect, or require information under any other law.

Consistency, Approvals, Modifications, Disapprovals and Revisions

The House amendment provides that no license or permit for any activity described in a development or production plan is to be granted unless there is conformity with the requirements of the Coastal Zone Management Act. The Senate bill contains no comparable provision. The conference report follows the House amendment.

Both versions provide for an environmental impact statement (EIS) at least once, but use differing words. The House amendment provides that the Secretary shall at least once "in each frontier area, declare the approval of a development and production plan or plans to be a major Federal action". The Secretary is also to evaluate the cumulative effect of activities on an area. The Senate bill provides that the Secretary shall at least once prior to approving a development and production plan in any area or region as defined by the Secretary, other than the Gulf of Mexico, declare approval to be a major Federal action. No language as to cumulative effects is included. The conference report adopts the common intent of both provisions. Except for the Gulf of Mexico area or region, the Secretary of Interior is to declare approval of a development and production plan in each defined area or region to be a "major Federal action". Thus, for each area or region, there shall be, as required by the National Environmental Policy Act (NEPA), and C.E.Q. guidelines, preparation of a draft environmental impact statement, a hearing and a final statement.

The Secretary of Interior is given the discretion to invoke NEPA procedures after submission of a plan for the first development proposal in an area or region, or the second or third—so long as it is invoked at least once. The Conferees expect that NEPA will be invoked prior to approval of a plan when major or substantial development and production activities seem to be indicated for an area or region. In preparing, drafting, and revising the EIS, the Conferees expect the Secretary of Interior to consider and address the cumulative effects of past and future OCS activities in an area or region.

Both bills provide for plans to be submitted by nearby lessees, when NEPA procedures are invoked. The House amendment provides that the Secretary may require lessees of tracts "for which development and production plans have not been approved" to submit such plans. The Senate bill provides that the Secretary "may require lessees on adjacent or nearby leases" to submit such plans. The conference report follows the House language.

The House amendment provides for specific review procedures and a 90 day review period for development and production plans where no EIS is required or prepared. The Senate bill similarly provides for such procedures, but provides for a 60 day review period. The conference report follows the House language, with the adoption of the 60 day review period as in the Senate bill.

Both versions provide for a determination by the Secretary as to approval of a development and production plan. The House amendment provides for review and decision by the Secretary within 60 days of a final EIS or submission of a plan. The Senate bill provides for determination within 60 days of release of an EIS, or 120 days after the period for comment for a plan. The conference report follows the House amendment.

Both versions provide for modifications

of a plan because of environmental inadequacies. In addition, the House amendment specifically provides for modification in light of air quality regulations. The Senate bill contains no comparable language. The conference report follows the House amendment with reference to air quality regulatory requirements of the conference substitute (see discussion as to Section 5(a)(8)).

The Senate bill provides for modifications to comply with the Coastal Zone Management Act and the consistency requirements of such act. The House amendment contains no comparable language as amendments to the OCS Lands Act of 1953. The conference report follows the Senate bill with a conforming amendment to require any modification which involves activities for which a Federal license or permit is required and which affects any land use or water use in the coastal zone of a State with an approved coastal zone management program to receive concurrence by such State with respect to the consistency certification unless the Secretary of Commerce makes a certain finding.

Both versions provide for procedures for disapproval. The House amendment specifically provides for disapproval for failure to comply with air quality regulatory requirements. The Senate bill contains no specific reference to air quality. The conference report follows the House amendment with reference to the air quality regulatory requirements of the conference report. See discussion as to section 5(a)(8)).

Both versions provide for disapproval for failure to comply with the requirements of the Coastal Zone Management Act, but use different language. The conference report follows the House amendment.

Both versions provide disapproval for environmental reasons in substantially the same language. However, there are structural differences in these provisions and the House amendment specifically includes "fish and other aquatic life" as part of "life", while the Senate bill only includes "aquatic life". The conference report follows the House amendment.

Both versions provide for cases where compensation is not to be granted for disapproval where there is a failure to comply with regulations, or requirements of the Coastal Zone Management Act, but use different language. The conference report follows the House amendment.

Both versions provide for procedures for disapproval, followed by cancellation, and compensation, but use different wording. The Senate bill provides detailed standards for compensation if there is a cancellation after disapproval. The House amendment provides that cancellation shall not foreclose any claim for compensation as required by the Constitution or any law. The conference report follows the Senate bill, and adopts the procedures of section 5(a)(2) as to compensation. (See discussion as to section 5(a)(2)(C).)

Both versions provide for cancellation if a plan is not submitted or not complied with. The House amendment provides that such cancellation is to be in accordance with procedures described in section 5(c) and (d) of the Act. The Senate bill provides that such cancellation is to occur after notice, a reasonable period for corrective action, an opportunity for a hearing, and judicial review. The conference report adopts the House language.

As described above, the machinery for approvals, modifications, disapprovals, and revision of D & P plans is the responsibility of the Secretary of Interior. However, any such approvals, modifications, disapprovals and revisions must be consistent with any applicable regulations promulgated by the Secretary of Energy. [See DOE Act, Sections 302 and 303.]

Section 26—Outer Continental Shelf oil and gas information program

Section 26 describes the procedures and requirements for obtaining and releasing information from lessees and permittees.

Both versions, provide for the submission of data by lessees or permittees. The House amendment provides that the Secretary is to have access "to all data and information (including processed, analyzed and interpreted information)". The Senate bill provides for access to "all data obtained from such activity". The conference report follows the House amendment, adopting the common intent of both versions.

Both versions provide for payments for reproduction and reprocessing in certain circumstances. The House amendment provides for payment to a permittee of the cost of processing and reproducing data, in all cases. The Senate only provides for payments to a permittee for processing data specifically requested by the Secretary and not otherwise prepared in the normal conduct of business. The conference report follows the House provision but with an amendment to conform it to existing regulatory requirements, 30 C.F.R. 251.13. Thus under the conference report, a permittee is to be fully compensated by the federal government for reproduction costs. In addition, he is to be compensated for any processing or reprocessing, specifically requested by the Secretary and not otherwise prepared in the normal conduct of business. If processing has been done by the permittee in the normal conduct of his business, the Secretary must pay the costs attributable to processing or reprocessing of data and information at the "lowest rate available to any purchaser for processing such data and information.".

Both versions provide for the submission to affected States of summaries of data designed to assist them in planning for onshore impacts. In addition, the House amendment provides for the submission of such summaries "to any requesting affected local government." The Senate bill contains no such reference. The conference report follows the House provision but amends it to read: "and upon request, to any affected local government". The language was slightly altered to emphasize that summaries of such data are only to go to local government units when specifically requested. It is intended that local governments are generally to act through their state government representatives. There is to be no independent basis for legal action by a local government unit against activities under this Act, or actions pursuant to this Act, because of a dispute regarding any alleged failure to consult with, submit data to, or receive the recommendations of a local government.

Both versions provide for the transmittal of certain information, for example, reports and statements to affected States. The Senate bill provides that no information is to identify any particular tract with a name of a party, so as to compromise competitive position. The House amendment contains no comparable language. The conference report follows the Senate bill and makes a technical change. To reduce the volume of information that would otherwise be forwarded to a possibly overwhelmed government, the Secretary is to submit an index of all documents and then if a reqeust is made, submit any document or documents requested.

The House amendment provides that if an employee of the Federal government or of a State reveals privileged information, the lessee or permittee may commence a civil action for damages against the United States or a State. The House amendment also provides that the State or Federal government cannot claim immunity because such employee was outside of his scope of employment. The Senate bill contains no comparable provision. The conference report follows the House amendment.

The Conferees adopted this provision, and the restrictions on release of information, to protect proprietary information, and not to discourage access by qualified officials.

The Senate provides that if the Secretary makes a determination that drilling is necessary for more accurate information, then the Secretary can contract for such drilling. Specific budgetary procedures are outlined for funding such drilling, and the annual report is to include the cost of a drilling program, staffing, and a description of such program. The House amendment contains no comparable provision. The Senate receded on the provisions and they are not included in the conference report.

The procedures and requirements of the OCS oil and gas information provision described in Section 26 relate to the authority and responsibilities of the Secretary of Interior. Nothing in this section affects the authority of the Secretary of Energy, Federal Energy Regulatory Commission, or any other Federal department or agency, to obtain, collect, assess, classify and release information when authorized or required under any other law including section 11 of the Energy Supply and Environmental Coordination Act of 1974.

The House amendment contains a provision relating to release of information obtained by the federal government "in the conduct of geological or geophysical explorations by any Federal agency pursuant to section 11 of this Act".

The conference report, as a conforming change to section 11 of this report (see discussion on section 11(a), *supra*), deletes this reference.

Section 27.—Federal purchase and disposition of oil and gas

S. 9 provides many new bidding options, involving royalty and net profit shares. Section 27 provides the procedures for the securing of royalty and net profit share oil and gas and, in addition gives the United States the right to purchase oil and gas and to distribute it.

The Senate bill provides for collection of royalty on net profit of oil and gas, and the purchase of oil and gas from a "lease or permit" and the House amendment only refers to "lease". The conference report follows the House language.

The Conferees note the passage of the Department of Energy Organization Act, 91 Stat. 565, and intend that the collection of royalty or net profit shares in kind and purchase of oil and gas by the Secretary of Interior is to be in conformity with applicable regulations promulgated by the Secretary of Energy, DOE Act, Sec. 302(b)(5).

Both versions and the conference report allow title to any oil or gas to be transferred to certain requesting federal agencies and departments. Such transfers are to be in accordance with any applicable regulations of affected agencies and departments.

As a conforming change, the conference report specifies that the allocation, offering, distribution and sale of such oil are to be in compliance with any applicable regulations promulgated by the Secretary of Energy.

Both versions provide that the authority of the Secretary of Interior to sell oil is limited by any provision of law in effect, or regulation implementing such law, providing for mandatory allocation and pricing.

Both versions and the conference report provide that if oil or gas is offered for sale and no acceptable bids are received, and if the oil or gas is not otherwise transferred, the lessee is to take any such oil or gas and pay the regulated price, if applicable, or fair market value. The determination as to whether a bid is acceptable is to be made

jointly by the Secretary of Interior *and* the Federal Energy Regulatory Commission as to gas.

Both versions provide for allocation of royalty oil to small refiners.

The House amendment provides that any oil sold or allocated to small refiners under this section is to be credited against that amount allocated under section 8 of the Act, which deals with the 20 percent set aside for small and independent refineries. The Senate bill contains no such limitation. The House receded and the crediting provision is not included in the conference report.

The House amendment defines "small refiner" in accordance with the Small Business Administration standards. The Senate bill defines "small refiner" specifically, as one who qualifies as a small business concern under the rules of the S.B.A. and who cannot purchase in the open market an adequate supply of oil to meet his needs. The conference report follows the House amendment with the addition of the phrase "in effect as of the date of enactment of this section or as thereafter revised or amended". Thus, a small refiner, for purposes of Section 27, is one so defined by the Small Business Administration standards, now or in the future.

Section 28—Limitation of exports

The findings, purposes, and policies of S. 9, make it clear that the development of the Outer Continental Shelf is to be one method to reduce dependence on foreign energy sources and increase the domestic supply of oil and natural gas. Section 28 limits exports of any OCS oil and gas. Exports are to be allowed only in cases of exchange agreements, efficiency, or the national interest, and then only when such exports do not add to dependency on foreign energy sources and when the President makes a specific finding to this effect. The President must submit his findings and recommendations to Congress as to the export of any oil or gas for approval or disapproval. If the Congress, within 60 days, passes a concurrent resolution of disapproval stating that such export would not be in the national interest, further exports are to cease.

Both versions provide for limitations on exports of domestic oil and gas. The House amendment provides that before there is such an export, the President has to make a finding that such exports "will not increase the number of barrels of oil or cubic feet of gas imported into this country". The Senate bill provides that the President's finding is only to be that "such exports will not increase reliance on imported oil and/or gas". The conference substitute adopts the Senate language.

The House amendment provides in subsection 28(d) for an exemption to the limitation for oil or gas "which is exchanged or exported pursuant to an existing international agreement". The Senate bill contains no comparable language. The conference report adopts the House language.

Section 29.—Restrictions on employment

Both versions provide for restrictions on employment of employees of the Department of Interior who have had duties or responsibilities under the Act. The Senate bill provides an absolute ban of employment related to previous work for two years after termination of employment. The House amendment provides more specific standards as to which kind of activity is or is not permitted after termination of employment. For example, it provides that former high-ranking Interior Department employees may not represent a party other than the United States for a period of 2 years after leaving the Interior Department, if that representation relates to a matter that was within his official responsibility. It also prohibits any effort by a former high-ranking employee to influence the Interior Department on any matter for a period of 1 year after leaving the Department. The conference report follows the House amendment.

Section 30—Documentation, registry and manning requirements

The House amendment contains a section detailing certain requirements for OCS facilities and vessels. Specifically, the provision provides for regulations (1) to generally require manning or crewing by United States citizens or permanent resident aliens; (2) to require documentation under the law of the United States; and (3) to require certain minimum standards of design, construction, alterations, and repair. The Senate bill contains no such section.

The Conferees adopted a substitute section intended to insure safe operations on all OCS facilities and vessels, and to reconcile the dual concerns of providing the fullest possible employment for Americans in United States Outer Continental Shelf activities and eliminating to the fullest possible extent the likelihood of retaliation by foreign nations against American workers in foreign offshore activities.

Safety

The House amendment provides that within six months after enactment of the 1978 OCS amendments, the Coast Guard is to promulgate regulations requiring any vehicle or structure used for OCS activities authorized by this Act to comply with such minimum standards of design, construction, alteration, and repair as the Coast Guard is to require. The Senate bill contains no such provision.

The conference report adopts the House provision with two changes. First, the conference report provides that standards can be established by the Coast Guard or the Secretary of Interior. This conforms this section to the rest of the OCS Act. Coast Guard and Interior generally share safety and other regulatory responsibilities (see discussion in this Statement of Managers on Sections 21 and 22). Second, a new subparagraph (b) is inserted into this section to provide that the requirement of application and enforcement of such standards is not to be applied retroactively to any vehicle or structure.

Thus, such standards are not required for any vehicle or structure built prior to the enactment of the 1978 OSC Amendments—until such time as they are rebuilt. If such vehicles or structures are rebuilt—then such new standards are to be applied. Of course, as detailed in this Statement of Managers in its discussion on section 5(a) and sections 21 and 22, nothing in this limitation is meant to supercede the general regulatory and enforcement authority of the Secretary of Interior or the Coast Guard, granted elsewhere in the OSC Act. It only limits the *mandate* of new standards and enforcement of such standards and does not limit the general regulatory discretionary authority.

Documentation

The House amendment requires the Coast Guard, within six months of enactment of the 1978 OSC Amendments, to promulgate regulations, applicable one year after the effective date of the regulations, requiring "any vessel, rig, platform or other vehicle or structure" used for OSC activities, and built or rebuilt after the applicable date "when required to be documented, be documented under the laws of the United States." The Senate bill contains no such provision. The conference report adopts the House provision with a clarifying amendment. Such regulations are to apply to vessels "required to be documented by the laws of the United States." Thus, this provision reaffirms existing interpretations and applications of mandatory documentation under U.S. laws.*

Manning and Crewing

The House amendment requires the Secretary of the Department in which the Coast Guard is operating to promulgate regulations within 6 months of enactment of the 1978 Amendments which require, with certain exceptions, that vessels or other vehicles or structures used for OCS activities be manned or crewed by U.S. citizens or permanent resident aliens.

The Senate bill contains no such provision. The conference report adopts a substitute for this provision providing for exceptions in certain cases and limitations in others.

The conference report thus provides, as does the House version, that the Coast Guard is to promulgate regulations that vessels or other vehicles or structures be manned by U.S. citizens or permanent resident aliens. "Permanent resident aliens" are those lawfully admitted to the United States, in accordance with the Immigration and Naturalization Act of 1952, as amended, section 101(a)(20), 8 U.S.C. 1101(a)(20).

The conference report also adopts the three limitations or exceptions included within the House version to avoid any disruption in OCS activities by this manning requirement. First, the requirement does not apply where "specific contractual requirements or national registry requirements in effect at the time of the promulgation of the regulation" provide for foreign personnel. This waives the requirement of this section requiring exclusive use of American citizens or resident aliens when an existing contract already covers operations. In this case, immediately upon the expiration of the contract, the American crew requirement would come into effect.

This also omits from the citizenship or permanent residence requirements those members of the crew of foreign-flag vehicles or structures that come under the manning requirements established under certification

---

* Under existing law, only vessels *can be* documented and only vessels of 5 net tons or more which are engaged in commerce are "required to be documented." Platforms are never documented. No fixed rigs (platforms) are required to be documented because they are not engaged in commerce. Thus, under present law, vessels operating between points in the United States are embraced within coastwise laws. Under consistent federal government application, vessels operating *between* the coast of the United States or any point within the United States, its territorial waters, and its territories and possessions—and fixed OSC platforms or mobile rigs secured to or submerged onto the OSC for drilling—have been required to be documented under the laws of the United States. Of course, vessels engaged in traffic between platform and platform, secured rig and secured rig, a platform and secured rig are also included. Vessels which can be documented include ships, semi-submersible, submersible or jack-up drill rigs and drill ships, whether propelled or self-propelled. Thus, this provision does not change this existing law. There has been some question raised as to whether vessels, *not* departing from a point within the United States, or its territories or possessions, and delivering items to a vessel in the offshore waters—but not carrying merchandise or passengers from one point in U.S. waters or on the OSC to another—are required to be documented. By present opinion of the Treasury Department, they are not. In any event, if they are not "required to be documented," they are not covered by this provision. If they at some future time are required, they would be so under this section—but also be so under present law.

of registry of other nations, generally only the marine crew. Any such foreign manning laws enacted after the passage of this law would not be applicable.

Second, section 30 would not apply if "there are not a sufficient number of such citizens or aliens who are qualified and available for work." This is virtually the present standard of the immigration law. Special circumstances may exist which prevent all operators from complying within the prescribed time and thus the substitute provision has, in those instances, made allowance for the temporary employment of foreign nationals until qualified U.S. citizens or resident aliens are available.

The provision as to use of citizens and permanent resident aliens applies only to "manning" or "crewing." Thus, specialists, professionals, or other technically trained personnel called in to handle emergencies or other temporary operations would not be included.

Third, this requirement is prospective only. It only applies to vessels, vehicles or structures used one year after enactment of the regulations and thus no later than 18 months after enactment of the 1978 amendments.

The conference report adds two more exceptions or limitations. The *fourth* exception is that the manning or crewing provision could be waived if the President makes a specific finding, as to a particular vehicle or structure, that application of this requirement would be adverse to the national interest. Thus, if national security or defense would be affected, for example, the President could waive this provision. However, such waiver can only be after a specific finding and only on a vehicle-by-vehicle, structure-by-structure basis.

Finally, as a *fifth* exception or limitation, the conference report does not automatically apply the domestic manning and crewing provision to foreign offshore vehicles or structures. The Conferees sought to establish appropriate response to foreign "hire national" statutes, policies or practices which discriminate against Americans working overseas or to otherwise damage international relations.

Under the conference report the manning or crewing requirement does not apply to foreign offshore vehicles or structures *until* the President makes certain findings in relation to the foreign country in which the vehicle or structure was built. If the President finds that a foreign nation, directly or indirectly, by statute, regulations, policy or practice, has adopted a national manning requirement for equipment in its offshore waters, he may apply this manning or crewing provision.

The Conferees were explicit as to the scope of this application to foreign nations. A vehicle or structure of a foreign nation is defined as one over 50% owned by citizens of a foreign nation, or under the effective right of such citizens to effectively control such vehicles or structure. If not 50% so owned, or so controlled, it is not a "vehicle or structure of a foreign nation" and this limitation does not apply. The general requirement of domestic manning or crewing would apply, with the four exceptions outlined earlier.

Next a finding is required that a foreign nation has acted to provide for domestic manning. The actions are to be those of the government of the foreign nation—whether by its national government or a political subdivision. The actions may be direct—by statute or regulations—or indirect—by lease, license, permit or contract terms. The Conferees expect the President to utilize these mechanisms and to make a continuing review of existing and future statutes, rules, policies, and practices and to apply this provision in appropriate circumstances. The Conferees expect that Congress will actively exercise its oversight responsibilities to assure that this provision is utilized in appropriate circumstances.

If such a finding is made, the President is to determine to what extent and to what degree it is being applied and to respond in kind, that is in proportion. Thus, if only a political subdivision has domestic manning, our regulations would apply to the citizens of the political subdivision and not to those of the whole country. Or, if a foreign nation has two-thirds manning requirement for certain structures, regulations implementing the President's determination would similarly apply to similar structures and be limited to a two-thirds requirement. Or if a foreign country requires its citizens to be used for certain types of work and not for others, this section would be applied to those workers and not generally. Of course, a general broad-based foreign government domestic manning requirement would allow a similar application here.

TITLE III—OFFSHORE OIL POLLUTION FUND

Title III provides the procedures to be followed in the event of an oilspill and compensation for cleanup costs and damages resulting from such a spill. The title applies to spills from any offshore facility in the OCS, and any oil tanker, barge or other watercraft which is operating in offshore waters, and which is carrying oil directly from an offshore facility."

Both the Senate bill and House amendment have comprehensive oil spill liability titles (Title III of both versions) The Conferees are aware that a comprehensive oil spill bill has passed the House of Representatives and has been approved by the Senate Commerce and Transportation Committee, and that a similar bill is now pending in the Senate Environment and Public Works Committee. Such bills apply to all oil spills into the marine environment, including those resulting from OCS-related activities."

The Conferees do not in any way intend, by adoption of this Title, to affect consideration of, or approval of, any language in a comprehensive oil spill act. It is hoped and expected that such a comprehensive bill will soon be enacted and thus obviate the need for this Title. The Conferees expect that this Title would be abrogated by passage and enactment of such a comprehensive bill.

Moreover, certain decisions were made by the Conferees as to language in sections of this Title. By this action, the Conferees do not intend in any way to bind themselves, their committees, or the Senate and House as to appropriate language for a comprehensive oil spill bill.

To fully explain the action of the Conferees, this Statement of Managers will discuss this Title section-by-section, and describe resolution of substantive differences in the two versions.

Sec. 301—Definitions

This section defines twenty-five (25) terms which appear in the oil spill liability title.

Both the Senate and House amendment contain either identical or very similar language for seven terms. Certain technical and conforming changes were made and language expressing the desires and intents of both Houses were included in the conference report for these terms: "Secretary", "fund", "person", "damages", "person-in-charge", "offshore facility", and "discharge".

The House amendment contains several terms not defined in the Senate bill or defined differently than in the Senate bill. The Senate receded and the following terms, as defined in the House amendment, are included in the conference report as follows:

In the definition of *"incident"*, the House amendment relates to occurrences involving one or more offshore facilities or vessels, or any combination thereof. The Senate bill does not include the phrase, "any combination thereof". The conference report follows the House amendment.

The House amendment includes a definition of "public vessel" which is a subclass of vessel that performs governmental functions for Federal, State, or local units of government. In the House amendment, public vessels are exempted from later liability provisions and the victims of oil pollution caused by such vessels must seek relief from the fund. Government owned or operated vessels which are engaged in commercial activities are not included in the definition. The Senate bill contains no comparable definition. The conference report adopts the House amendment.

The House amendment includes a definition of "facility" which means a structure, or group of structures (other than a vessel or vessels), used for the purpose of transporting, drilling for, producing, processing, storing, transferring, or otherwise handling oil. The Senate bill contains no comparable definition. The conference report adopts the House amendment.

The House amendment includes a detailed definition of "oil pollution" to include discharged oil in the contiguous zone, on the high seas when discharged in connection with OCS activities, or on or near a foreign country entitled to reciprocal rights under this Title. The Senate bill contains no comparable definition. The conference report adopts the House language with an amendment. "Oil pollution" is to include spills from vessels transporting OCS oil whenever the vessels are in offshore waters and to include effects on offshore waters and the adjacent shore.

The House amendment includes separate definitions of "United States claimant" and "foreign claimants." In each case, a claimant includes individual residents, and government agencies. The Senate bill has no comparable provisions. The conference report follows the House amendment.

The House amendment includes definitions of "United States" and "State" which mean all of the States, territories and possessions of the United States. The Senate bill has no comparable provision. The conference report follows the House amendment.

The House amendment includes a definition of "oil" which means petroleum including crude oil or any fraction or residue thereof. The Senate bill contains no comparable provision. The conference report follows the House amendment.

The House amendment defines "cleanup costs" to mean the cost of reasonable measures taken, after an incident has occurred to prevent, minimize, or mitigate oil pollution from that incident. The Senate bill more specifically defines "cleanup costs" to include all reasonable and actual costs incurred in removing or attempting to remove oil discharged or in attempting to prevent, reduce or mitigate damages from such a discharge. The conference report follows the House amendment.

The House amendment includes a definition of "claim" which means a demand in writing for a sum certain. The Senate bill contains no comparable provision. The conference report follows the House amendment.

Both versions have similar definition of "owner" except that the House amendment specifically includes the holding of a title as proof of ownership and specifically excludes any person who hold indicia of ownership primarily to protect his security interest. The conference report is the same as the House amendment.

Both versions have similar definitions of "operator" except that the House amendment specifically excludes owners of either a vessel or an offshore facility, (as already included in the definition of "owner") and

specifically includes, with respect to any vessel, any person responsible for the manning, victualing and supplying of the vessel. The conference report is the same as the House amendment.

The House amendment includes a definition of "property" which means littoral, riparian, or marine property. The Senate bill contains no comparable provision. The conference report is the same as the House amendment.

The House amendment includes a definition of "guarantor" which means the person, other than the owner or operator, who provides evidence of financial responsibility for an owner or operator. The Senate bill contains no comparable provision. The conference report is the same as the House amendment.

The House amendment includes a definition of "gross ton" which means a unit of 100 cubic feet for the purpose of measuring the total unit capacity of a vessel. The Senate bill contains no comparable provision. The conference report is the same as the House amendment.

The House amendment includes a definition of "barrel" which means 42 United States gallons at 60 degrees Fahrenheit. The Senate bill contains no comparable provision. The conference report is the same as the House amendment.

The Senate bill includes a definition of "revolving account" which means the account referred to in section 302(b) of that bill. The House amendment contains no comparable provision. The Senate receded to the House and the conference report does not contain this definition.

The Conferees also agreed to the following:

The House amendment includes a definition of "ship" which means either of the following types of vessels carrying oil as bulk in cargo: (1) a self-propelled vessel, or (2) a non-self-propelled vessel which is certificated to operate outside the internal waters of the United States. The Senate bill contains no comparable definition. The House receded to the Senate and the Conferees deleted this definition. This provision is no longer appropriate or relevant to, or used in, Title III of the conference report.

The Senate bill includes within the scope of the Oil Spill Title, a "vessel" transporting OCS oil, whether in the waters above the OCS or in the navigable waters. The House amendment is limited to the waters above the OCS. The conference report provides for the scope to be for vessels operating in all "offshore waters", that is in the waters above the OCS and above the submerged lands.

The House amendment includes a definition of "removal costs" which means (1) costs incurred under section 5 of the Intervention of the High Seas Act; and (2) other cleanup costs. The Senate bill contains no comparable provision. The conference report follows the House amendment, with an amendment. It specifically defines removal costs to include costs incurred under subsection (c), (d) or (1) of section 311 of the Federal Water Pollution Control Act. This enables the Government to recover from the Fund any removal costs authorized by the recently amended Federal Water Pollution Control Act for OCS-related spills.

Sec. 302—Fund establishment, administration, and financing

Both versions call for the establishment of Funds which are to be maintained at a level of not less than $100 million and not more than $200 million. The House amendment allows the limitation to be exceeded when necessary to permit moneys recovered or collected on behalf of the fund, to be paid into the Fund. In the House amendment, the Fund is created within the Treasury of the United States, while the Senate bill establishes the Fund within the Department of Transportation and establishes also a revolving account, without fiscal year limitation, within the Treasury. In the House amendment, the Fund is called the "Offshore Oil Pollution Compensation Fund". In the Senate bill, the Fund is called the "Offshore Oil Production Compensation Fund". On all these minor differences, the Conferees accepted the language of the House amendment.

The Senate bill establishes a revolving account in the Treasury of the United States that would be available to the Fund to carry out the provisions of the Title. There is no comparable House provision. The Senate receded to the House and the conference report does not contain this paragraph.

Both versions, in slightly different words, provide that the Fund shall consist of money generated by a 3 percent barrel tax on oil obtained from the Outer Continental Shelf, and money obtained by the Fund through fines, penalties and efforts to obtain reimbursement. The conference report follows the House amendment.

Both versions authorize the Secretary to promulgate regulations to modify the fee for the purposes of maintaining a proper amount in the Fund.

The House amendment specifically requires that such regulations not become effective until at least 90 days following their publication in the Federal Register. The conference report follows the House amendment.

The House amendment alone provides that no such fee regulation, whether or not actually in effect, may be stayed by any court pending completion of judicial review of that regulation or modification. The conference report adopts this provision. The House amendment provides further than no modified fees paid by any owner pending completion of judicial review of the modified fee regulation shall be repaid to such owner. The Senate bill contains no comparable language. The House receded to the Senate and the conference report does not contain this language.

The House amendment alone includes a provision making any person who fails to pay fees required under this Title liable for a civil penalty and liable for all fees due plus the interest. Also under the House amendment, the Attorney General is authorized, at the request of the Secretary of the Treasury, to bring an action for fee amounts due and penalties in the name of the Fund. The Senate bill has no such provision. The conference report is the same as the House amendment.

Both versions contain a provision which would make the Fund immediately available for removal costs. The House amendment also specifically authorizes the Secretary to promulgate regulations designating the person or persons who may obligate available money for this purpose. The conference report adopts the House language and also adds provisions authorizing immediate availability of funds for claims settlement and other administrative and personnel costs. This allows the government to charge all necessary costs of administering the Fund to the Fund itself. In addition, the conference report makes it clear that any payments are subject to such amounts as provided in appropriations acts.

The House amendment includes a provision making criminal the falsification of any required record or document. The Senate bill contains no comparable provision. The conference report is the same as the House amendment.

In different language, both versions authorize regulations for requiring certain records and documents and access to such records. The House amendment provides for such regulations to be promulgated by the Secretary of the Treasury. The Senate bill provides for promulgation by the Secretary of Transportation. In addition, the House amendment provides access to the Secretary of the Treasury and the Comptroller General. The Senate bill provides for access to the Comptroller General and the Secretary of Transportation. Finally, the House amendment specifically provides that the Secretary of Transportation is to determine the level of funding. The Senate bill contains no such specific authorization. The conference report adopts the House language for these requirements on regulations for records and documents and access to them.

Both versions, in differing language, allow money not immediately needed by the Fund to be invested in interest bearing special obligations of the United States. The House amendment states that such investments shall be made by the Secretary of the Treasury, while the Senate bill states that they shall be made by the Secretary of Transportation with the approval of the Secretary of the Treasury. The House amendment also states that the special obligations may be redeemed at any time in accordance with the terms of the special issue and pursuant to regulations promulgated by the Secretary of the Treasury. The House provides that any interest on, and the proceeds from the sale of, any obligations held in the fund shall be credited to and form a part of the Fund. The Senate bill contains no such specific provisions. The conference report is the same as the House amendment on interest accounts.

Both versions have similar provisions authorizing the Fund to borrow from the Treasury when necessary. However, the Senate bill provides that such borrowing shall not be in excess of $500 million, while the House amendment contains no stated ceiling. The House amendment states specifically that notes and obligations shall be redeemed by the Secretary from moneys in the Fund. The conference report is the same as the House amendment on authority to borrow, no limit on amounts that can be borrowed and redeemed.

Section 303—Damages and claimants

Both the Senate bill and House amendment list a variety of potential damages from oil pollution, for which compensation may be sought from the Fund.

The House amendment specifically states that claims are to be asserted for "economic loss", arising out of, or directly resulting from, oil pollution for certain enumerated items. The Senate bill contains no such specific language but only enumerates items to be considered as damages. The conference report adopts the House language. While both versions generally include the same basic items within the scope of allowable damages, there are some differences.

The House amendment specifically includes removal costs as a basis for a claim under this provision. The Senate bill does not. The conference report adopts the House language.

The House amendment limits a claim for removal costs in that the owner or operator of a vessel or offshore facility involved in an incident may assert such a claim for removal costs only if he can show that he is entitled under another provision of the Title to a defense to liability. The Senate bill does not include any of this specific language. The conference report adopts the House language.

The House amendment includes as a basis for a claim loss of use of real or personal property, if the property involved is owned or leased, or the natural resource involved is utilized by the claimant. The Senate bill does not specifically enumerate this basis—but does provide for damage for the cost of repairing or replacing, income lost during repairs or replacement, and loss of value.

The conference report adopts the House language.

The House amendment includes injury to, or destruction of, natural resources. The claim can be made by the President as trustee for natural resources over which the United States Government has sovereign rights or exercises exclusive management authority; or by any State for natural resources within the boundary of the State belonging to, managed by, controlled by, or appertaining to the State. Compensation is to be used only for the restoration of the damaged natural resources or for acquisition of equivalent resources. The Senate bill simply allows recovery for any costs or expenses incurred by the Federal or any State government in the restoration, repair, or replacement of natural resources damaged by an oil discharge. The conference report adopts the House language with an amendment which specifically provides sums recovered for injury to natural resources to be available to restore, rehabilitate, or acquire the equivalent of the resource and which specifically provides that the measure of damages is *not* limited to sums to restore or replace.

In addition, it is intended that reasonable costs associated with the preparation and presentation of natural resource damage claims are intended to be recoverable as part of each claim.

The House amendment includes as a basis for a claim, loss of use of natural resources if the resource involved is used by the claimant. The Senate bill contains no specific provision on this basis of a claim. The House amendment allows a claim for loss of profits or impairment of earning capacity due to injury or destruction of real or personal property or natural resources, if the claimant derives 25% or more of his earnings from activities which utilize the property or natural resource. The Senate bill contains a similar provision, except that the period of loss of income or impairment of earning capacity for which a claim may be asserted must not exceed 5 years. On these two provisions, the conference report adopts the House language.

The House amendment includes as a basis for a claim, loss of tax revenue for a period of one year due to injury to real or personal property by any State or political subdivision thereof. The Senate bill contains a similar provision except that recovery may also be sought by the Federal Government. The conference substitute incorporates the House language but includes as a basis for a claim loss of tax revenue by the Federal Government.

Except for removal costs, the House amendment allows recovery by a foreign claimant to the same extent that a United States claimant may assert a claim. Such recovery is based on reciprocal rights and duties. The foreign claim is allowed for oil pollution in the navigable waters or in or on the territorial sea or adjacent shoreline of a foreign country of which the claimant is a resident; if the foreign claimant is not otherwise compensated for his loss, and recovery is authorized by a treaty or executive agreement between the United States and the foreign country involved or if the Secretary of State, in consultation with the Attorney General and other appropriate officials, certifies that such country provides a comparable remedy for United States claimants. The Senate bill contains a similar provision stating that no person shall be liable under the title to a foreign claimant unless a reciprocal condition similar to that in the House amendment is present. The conference report follows the House amendment with an amendment making the intent of both Houses clear that the foreign government can not be recompensed for tax losses. A claim for tax losses from a foreign government may present an awkward case for administrative adjudication.

Both versions have similar provisions authorizing the Attorney General to bring class action suits. The Senate bill specifically provides that sums recovered in such suits be distributed to the members of the class except for reasonable costs which shall be deposited in the U.S. Treasury. The House amendment contains no such specific language. The Senate receded to the House and the Conferees adopted the House provision.

Both versions have similar provision allowing any member of a group to bring a class action suit in the absence of action by the Attorney General. In the House amendment, such suits are allowed after 60 days have elapsed from the date on which the Secretary designates the source of the oil discharge, while in the Senate bill such suits are allowed ninety days (90) after a prohibited discharge has occurred. The conference report is the same as the House amendment.

The Senate bill has a provision which states that if the number of members of a class exceeds one thousand, publishing notice of the action in the Federal Register and in local newspapers serving the areas in which the damaged parties reside shall be deemed to fulfill the requirement for public notice established by rule 23(c)(2) of the Federal Rules of Civil Procedure. The House amendment has no similar provision. The Senate receded to the House. The conference report does not contain this provision.

Sec. 304—Liability

Subject to certain exemptions in each case, both versions with different language hold the owner and operator of a vessel or an offshore facility strictly liable, jointly and severally, for the damages spelled out in the respective bills. The House amendment refers only to the owner and operator of a vessel other than a public vessel. The Senate bill has no such specific limitation for vessels. The conference report is the same as the House amendment.

Both versions place limits on liability except in certain similar circumstances involving gross negligence or violations of applicable safety standards. The House amendment provides that such violations are of applicable safety, construction, or operating standards or regulations of the Federal Government; and must be within the privity or knowledge of the owner or operator. The Senate bill neither has this privity requirement nor does it limit regulations to those of "the Federal Government." In addition, the House amendment does not limit liability when the owner or operator fails or refuses to provide all reasonable cooperation and assistance requested by the responsible Federal official in furtherance of cleanup activities. The Senate bill has no such specific language. The conference report follows the House amendment on exceptions to limits of liability.

Both versions limit liability for the owner and operator of a vessel. In the House amendment, the limitation is $250,000 or $300 per gross ton, up to a maximum of $30 million, whichever is greater; in the Senate bill, the limitation is $150 per gross registered ton with no maximum. The conference report provides for a limitation of $250,000 or $300 per gross ton, whichever is greater, thus striking the maximum.

Both versions limit liability for the owner and operator of an offshore facility of removal costs and an amount up to $35 million.

The conference report specifically provides for a limitation of "the total of removal and cleanup costs and an amount limited to $35,000,000 for all damages."

Both versions provide certain defenses to liability. The House amendment provides that owners and operators shall not be liable where the incident was caused primarily by an act of war, civil war, or insurrection. The Senate bill would impose no liability to the extent that the owner or operator establishes that the discharge of oil or that any damages resulting from such discharge were caused by an act of war. The conference report precludes liability when the incident is caused solely by an act of war, hostilities, civil war or insurrection.

The House amendment states that no liability shall exist where the incident is caused primarily by a natural phenomenon of an exceptional, inevitable or irresistible character. The Senate bill does not include this natural phenomenon exception. The conference report precludes liability where the incident is caused solely by "an unanticipated grave national disaster or other natural phenomenon of an exceptional, inevitable, and irresistible character", which could not have been prevented by "due care or foresight".

The House amendment provides a defense to liability to the extent that the incident was caused by the negligence of a third party or the claimant. The Senate bill provides a defense only if the incident was totally caused by the negligence or intentional act of a third party, or the damaged party. The conference report adopts the Senate intent and provides a defense if the "incident is caused solely by the negligence or intentional act of the damaged party or any third party (including any government entity).

When such intentional or negligent acts are involved, the Senate bill provides that the damaged party or third party involved shall, if also an offshore facility or vessel, be liable for such cleanup costs of damages to the same extent as if such discharge had occurred from their facility or vessel. The House amendment has no comparable language. The conference report deletes this provision.

The Senate bill provides that all removal costs incurred by a government agency are not subject to defense or limitations. The House amendment contains similar language as to facilities, but is not specific as to vessels. The House recedes and the Senate intent is included in a new subsection.

The House amendment requires that the Secretary, from time to time shall report to Congress on the desirability of adjusting the monetary limitations on liability for the owners and operators of offshore facilities and vessels. The Senate bill contains no such provision, but requires the President to adjust the financial responsibility and liability requirements in accordance with the wholesale price index. The conference report adopts the House provision.

Subject to certain exceptions in both versions, both the Senate bill and the House amendment provide that the Fund shall be liable for damages not actually compensated and for which a claim may be asserted under the provisions of each respective title.

The House amendment provides that except for removal costs, the Fund is not liable where the incident is caused primarily by an act of war, hostilities, civil war or insurrection, and, as to a particular claimant, where the incident or economic loss is caused, in whole or in part, by negligent or willful misconduct of that claimant, or as to a particular claimant, to the extent such damages or costs were caused by the negligent or intentional actions of the damaged party.

The Senate bill provides that the fund shall not be liable for cleanup costs and damages to the extent that the discharge was caused by war, negligence of the Federal Government, or negligent or intentional acts of a damaged party. The conference report bars liability of the Fund for gross negligence—or—willful misconduct, in whole or in part, of a claimant and to the extent

it is caused by the plain negligence of a claimant. Acts of WAR can be a basis for a claim against the Fund.

Both versions provide that owners and operators shall also be liable for the interest on claims from the time the claim is presented until the time it is paid. The Senate bill alone specifically states that this interest payment shall not be subject to the limitation on liability provisions. The House amendment excludes from the period during which the interest is accruing the time, if any, from the date upon which the owner or operator offers to the claimant a settlement equal to or greater than that ultimately paid to settle the claim to the date on which the claim shall be settled. No such language is in the Senate bill. In addition, the House amendment provides that if the owner, operator or guarantor shall offer the claimant, within 60 days of the date upon which the claim was presented or advertised whichever is later, an amount equal to or greater than that finally paid in satisfaction of the claim, he shall be liabe for interest only from the date the offer was accepted by the claimant to the date upon which payment is received by the claimant. The Senate bill contains no comparable language. The conference report is the same as the House language on these interest provisions.

In the House amendment, it is stated that no indemnification, or similar agreement shall be effective to transfer the liability, other than as specified in the Title. The Senate bill contains no comparable provision. The House receded and the conference report does not include this provision. The Conferees were concerned that inclusion of this provision of the House amendment might radically change existing practice in regards to certain vehicles owned and operated by service contractors, who are too small to bear liability risks and for whom insurance coverage is not readily available. Non-inclusion of this provision will ensure continued involvement of these companies and thus not decrease competition on the OCS.

Both versions, using differing language, have similar provisions protecting the rights of owners or operators to sue parties who may have been responsible for a discharge of oil. The conference report adopts the House language amendment.

The House amendment provides that the provision of its section on liability shall supersede all such other provisions of law. The Senate bill has no comparable provision. The conference report is the same as the House provision.

Sec. 305—Financial responsibility

Both versions have similar provisions requiring the owners and operators of vessels to file certificates of financial responsibility.

In the House amendment, such filing shall be in accordance with regulations issued by the President, while the Senate bill requires the regulations to be issued by the Federal Maritime Commission.

Only the Senate bill exempts vessels of under 300 gross registered tons. Only the House amendment requires bonds to be issued by an authorized U.S. bonding company.

Both versions spell out acceptable methods of proving financial responsibility but the Senate bill adds, "other evidence * * * acceptable to the President".

On all these matters, the conference report follows the House amendment.

The House amendment has a provision requiring the Secretary of the Treasury to refuse required customs clearance to any vessel, subject to this section, which does not have a valid certificate of financial responsibility. The Senate bill has no comparable provision. The conference report adopts an alternative provision providing for regulations for denial of entry and detention of any vessel that does not produce the required certification.

The House amendment allows the Secretary to issue regulations granting himself access to all offshore facilities and vessels and requiring that he be shown upon request certifications of financial responsibility. The Senate bill has no comparable provision. The conference report follows the House amendment.

Both versions have provisions requiring the owner and operator of an offshore facility to obtain certificates of financial responsibility. The House amendment does not include in this requirement any facility not used to drill for, produce or process, oil, and which does not have the capacity to transport, store, transfer, or otherwise handle more than 1,000 barrels at any one time. The conference report contains the House language with a technical amendment making it clear that the subsection refers to "offshore facilities".

The House amendment provides that the evidence of financial responsibilties shall be sufficient to satisfy the limits of liability which has been established, or $35,000,000, whichever is less. The Senate bill provides that such proof shall be based on the capacity of the offshore facility and other relevant factors. The Senate bill spells out a list of acceptable methods for demonstrating financial responsibility, while the House amendment simply states that such demonstration must be in accordance with regulations promulgated by the Secretary. With an amendment changing "regulations promulgated by the Secretary", to "regulations promulgated by the President" the conference report follows the House amendment.

Both versions provide that claims may be brought directly against the guarantor providing evidence of financial responsibility. The House amendment and not the Senate bill also states that the guarantor shall be entitled to invoke all rights and defenses which would be available to the owner and operator, and that he shall be entitled to invoke the defense that the incident was caused by the willful misconduct of the owner and operator, but he shall not be entitled to invoke in proceeding brought by the owner or operator against him. The conference report follows the House amendment.

The House amendment provides for a study by the President of the marine insurance industry. The study shall attempt to determine whether adequate insurance is available for the owners and operators subject to this Title to meet their obligations and whether the market is sufficiently competitive to assure purchasers of a reasonable range of insurance services. The study shall be completed within one year, with an interim report due in three months. The Senate bill has no comparable provision. The conference report includes onshore facilities in this provision. The intent of this change is to avoid a duplicative study of insurance if one is required by a future comprehensive oil spill bill.

Sec. 306—Notification, designation, and advertisement

Both versions have similar provisions requiring owners and operators to notify the Secretary of oil pollution incidents from their vessels or facilities.

Both versions require the Secretary to notify owners and operators in cases where an oil pollution discharge from their vessel or facility is suspected. The House amendment requires that this be done upon designation by the Secretary that a particular facility was the source of a discharge. The Senate bill requires that it be done when the Secretary learns that a discharge is alleged to have occurred from a facility. Under both, the owner and operator are given 5 days to respond to the allegation. The House amendment also requires the Secretary to notify the guarantor of the financial responsibility certificate of the facility or vessel involved.

In both versions, advertisement procedures are spelled out for cases where the owner or operator involved fails to deny the allegation or designation that the discharge came from his vessel or facility. These procedures are similar, except that in the Senate bill, the Secretary is required to publish the advertisement, in modified form if necessary, in the Federal Register.

Both versions outline procedures for advertising in cases where no owner or operator accepts, or fails to deny, that a discharge occurred from his vessel or facility. These procedures are similar except that in the House amendment they also apply specifically to cases where the source of a dischange was a public vessel, or when the Secretary is unable to designate a source.

Only the Senate bill requires that the Secretary continue to advertise after the initial advertisement period, at a rate not less frequently than once each calendar quarter for a total period of five years.

The conference report incorporates the House language for this entire section.

The two versions have similar provisions spelling out those instances in which claims may be presented to the Fund for settlement, except that the House amendment provides in addition for such presentation where the Secretary has advertised or otherwise notified claimants—cases where the spill emanated from an unknown source or a public vessel.

The House amendment alone provides that in cases where a claimant attempts unsuccessfully to reach an agreement with the owner and operator or guarantor, he may elect to commence an action in court against the owner, operator or guarantor, or to present the claim to the Fund; that election to be irrevocable and exclusive.

The House amendment alone also specifically provides that claims for uncompensated damages may be presented to the Fund in cases where the claim exceeds the liability limit of the owner and operator, or where the owner and operator and the guarantor are financially incapable of meeting their full obligations.

Both versions require that any person presented with a claim under this Title shall, at the request of the claimant, transmit certain documents to the Secretary and the Fund. In the Senate bill, such person is required to transmit such documents within two days of the request, and the claim in such cases shall be deemed to have been presented to the Fund.

Both versions have similar provisions spelling out procedures for instances where a dispute arises between a claimant and the Fund. The House amendment allows a claimant to submit the dispute to the Secretary sixty days after its initial presentation to the Fund, while the Senate bill requires a wait of 90 days. The House amendment also allows claimants to elect to commence an action in court against the Fund in lieu of submitting the dispute to the Secretary for decision; that election to be irrevocable and exclusive.

Both versions require, with different wording, the Secretary to promulgate regulations establishing procedures for the settlement of claims against the Fund.

Both versions have similar provisions spelling out the private and governmental sources which the Secretary shall use to assist in adjusting and adjudicating claims. The House amendment alone includes State agencies among those who may be used to assist in processing claims against the Fund. In such cases, the House amendment pro-

vides that no payment may be made on a claim asserted on or behalf of that State or any of its agencies or subdivisions unless the payment has been approved by the Secretary. The House amendment also specifically allows the Secretary to review and audit all claim payments.

In cases where a claimant is unable to reach a satisfactory settlement with the Fund and thereafter presents his claims to the Secretary for review, the House amendment gives the Secretary the option of delegating the review to a three person panel. The House amendment sets out the general qualifications of the panel members. The Senate bill contains no comparable provisions.

Both versions allow the Secretary to refer disputes to an official appointed under section 3105 of Title V, United States Code. The House amendment refers to the appointment of an administrative law judge; the Senate bill refers to the appointment of a hearing examiner.

The House amendment provides that the administrative law judge be a resident of the United States judicial circuit within which the damage complained of occurred. The Senate bill has no comparable provision.

Both versions have similar provisions spelling out the procedures for consideration of a dispute, except that, the House amendment states specifically that subpenas shall be issued in accordance with procedures in subsection (d) of section 555 of title 5, U.S.C., and rules promulgated by the Secretary. In addition, the House amendment allows the Secretary to invoke the aid of the local U.S. District Court in enforcing its power of subpena.

The two versions have similar provisions spelling out the proper location for hearings and disputes.

The House amendment allows the Secretary to review decisions of the administrative law judge if he so chooses.

The Senate bill however, would prohibit the Secretary from reviewing decisions reached by the hearings examiner.

Both versions have similar judicial review provisions, except that the Senate bill specifies review in the district court in the nearest circuit in which the damage occurred or if the U.S. Court of Appeals for the District of Columbia, in the U.S. Court of Appeals for the District of Columbia.

The House amendment provides that in cases brought in court, both plaintiffs and defendants are required to provide the Fund with copies of complaints and pleadings, that the Fund may intervene as a matter of right and may be dismissed from an action, upon its own motion, when either the owner, operator or guarantor admits liability.

Under the House amendment, receipt of notice by the Fund shall give *res adjudicata* effect to any judgment, even though the Fund chooses not to become a party.

Under the House amendment, the sanction imposed on plaintiffs or defendants for failure to give notice to the Fund is a loss of limitation of liability to which the defendant would otherwise be entitled and the loss of any plaintiff's right to recovery from the Fund for amounts not paid by the defendant.

The House amendment has a provision allowing the plaintiff to join the owner, operator, or guarantor in an action brought against the Fund, and giving the Fund the right to implead any other person who might be liable under the Title, pursuant to Rule 14 of the Federal Rules of Civil Procedure. The Senate has no comparable provision.

Both bills have similar provisions providing for time limits on the filing of claims, except that the House amendment allows three years from the date of discovery of economic loss or six years from the date of the incident resulting in the loss, whichever is earlier and the Senate bill allows only one year from the date of discovery of the damages of five years from the date that advertising was commenced, whichever is earlier.

The Senate bill provides that each person's damage claims arising from one incident which are presented to the Secretary shall be stated in one form, which may be amended to include new claims as they are discovered. Damages which are known or reasonably should be known, and which are not included at the time compensation is made, shall be deemed waived. The House amendment has no comparable provision.

With certain technical changes, the conferees adopted the House language for this entire section.

Section 308—Subrogation

Both versions provide that any person or government entity, including the Fund, who makes payment to a claimant under this Title, acquires by subrogation the rights of that claimant to recover costs or damages covered by such payment.

The House amendment provides that it would be the Attorney General who would be the party bringing action on behalf of the Fund against any liable party; the Senate bill allows the Secretary the option of appointing other attorneys.

Both versions have similar provisions spelling out what the Fund shall recover in claims against the owner and operator, or the guarantor or a vessel or facility involved in an incident, except that the House amendment requires computation of interest pursuant to a stated formula, while the Senate bill requires it to be computed at the existing commercial interest rate. The House amendment includes in those administrative and other costs which are to be recovered, those costs incurred by the claimant or claimants against the Fund.

The House amendment separates potential defendants into two classes for the purpose of differentiating their respective rights to dispute claim settlements. If the Fund proceeds against owners, operators and guarantors who either deny designation or who deny liability, such parties cannot contest the amount involved, except to the extent that it exceeds their limit of liability. If, however, such parties accepted the designation and attempted to negotiate with the claimant, the defendant has a right to contest any amount paid in excess of the largest amount offered in settlement to the claimant by the defendant. The Senate bill does not make this separation.

The House amendment has a provision requiring the Secretary to pay claimants the amounts which the Fund recovers equal to the costs incurred by the claimants against the Fund, plus interest, except that the Fund shall not be liable for interest for the period from the date upon which the Fund offered to the claimant the amount finally paid to the claimant in satisfaction of the claim to the date upon which the claimant accepts the offer. The Senate bill has no comparable provision. With certain technical amendments, the conference report incorporates the House language for this entire section.

Section 309—Jurisdiction and venue

Both versions have similar provisions setting out jurisdiction and venue. The Senate bill, however, specifically states that in cases where the damages involved occurred outside of any district, venue may lie in the nearest district. The House amendment assumed that proper jurisdictional lines would be drawn and that this provision was not necessary. The conference report contains the House language for this section.

Sec. 310—Relationship to other law

The House amendment states that the damages listed in this Title can only be recovered in Federal Court under this Title. The Senate bill does not contain a comparable provision, and it specifies that nothing in the Title shall be interpreted to preempt the field of liability or to preclude any state from imposing additional requirements or liability for any discharge of oil resulting in damages or cleanup costs within the jurisdiction of any State.

The House amendment does say however, that its preemption language should not be interpreted to preclude any State from imposing a tax or fee upon any person or upon oil in order to finance the purchase and prepositioning of oil pollution and cleanup equipment.

The Senate bill makes clear that no person may recover for the same damages under both this Title and under other state or federal law.

Both versions specifically relieve owners and operators from any responsibility to establish evidence of financial responsibility for oil pollution in excess of the requirements of the respective titles.

The House Amendment states that nothing in its preemption language shall prohibit an action by the Fund, under any other provision of law, to recover compensation paid pursuant to this title.

On this section, the House receded and with certain technical changes, the conference report adopts the Senate language on this section. Thus, the conference report does not preempt liability or preclude a State from imposing additional requirements or liability for any discharge resulting in damages or cleanup costs within a State's jurisdiction. Double recovery by a claimant is barred, however, and no State can require evidence of financial responsibility if such evidence is maintained in accordance with this Title. As noted in the introduction to the discussion of this Title, the Conferees do not in any way intend, by adoption of this Title, to affect consideration of, or approval of, any language in a comprehensive oil spill act. It is hoped and expected that such a comprehensive bill will soon be enacted and thus obviate the need for this Title.

Specifically, by adopting the Senate language on "non-preemption", the Conferees do not in any way intend to bind the House or Senate in its final determination as to whether or not State laws, or how State laws, are to be affected by enactment of a comprehensive oil spill statute.

Sec. 311—Prohibition

The conference report is the same as the House amendment and the Senate bill.

Sec. 312—Penalties

Both versions would assess penalties for failure to comply with regulations requiring the acquisition of proof of financial responsibility. In the House amendment, the maximum civil penalty is $10,000; in the Senate bill it is $25,000.

The House amendment includes additional language stating that the authority to assess and compromise the penalties involved is conferred upon the President or his designee in connection with the establishment and maintenance of evidence of financial responsibility for vessels, and upon the Secretary in connection with such requirements as to facilities, as well as to violations involving denials or detention orders issued to vessels.

Both versions have similar provisions establishing penalties for failure to notify, except that the Senate bill specifically prohibits conviction under both this Title and the Federal Water Pollution Control Act, for the same failure. The conference report follows the House amendment for this entire section.

Sec. 313—Authorization of appropriations

Both versions have identical authorization of appropriations sections except that in the Senate bill, the authorization begins in FY

'78 one year earlier than the House amendment.

Also the Senate bill authorizes such sums as may be necessary to reimburse the Fund for cleanup costs paid as a result of spills caused by negligence or the intentional act of any Federal agency or instrumentality.

The conference report contains the House language for this entire section.

Sec. 314—Annual report

Both versions call for the submission by the Secretary of an annual report. The House amendment states that the report shall be submitted to the "Congress", while the Senate bill specifies the Speaker of the House and the President of the Senate. The Senate bill alone requires that the report include a summary of the management and enforcement activities of the Fund.

The conference report follows the House amendment language for this entire section.

Sec. 315—Effective dates

The House amendment contains a provision which states that the subsection requiring a study of available insurance and all other provisions of the Title authorizing the delegation of authority or the promulgation of regulations shall be effective on the date of enactment of the Act, and that all other provisions and applicable regulations would become effective 180 days after the date of enactment. The Senate bill contains comparable provision. With certain conforming changes, the conference report is the same as the House amendment.

Other Provisions

The House amendment contains a provision stating that if any provision is found invalid, the remainder of the Act shall not be affected. This provision is deleted in the conference report as assumed to be the situation without specific language.

The Senate bill contains a provision requiring the President to act to remove or arrange for the removal of oil spilled in violation of the Title, unless he determines that such removal will be done properly and quickly by the owner and operator of the vessel or facility involved. Such action is to be conducted, to the greatest extent possible, in accordance with the regulations issued under the Federal Water Pollution Control Act for the removal of oil and hazardous substances. The House amendment contains no comparable provision.

The Senate bill has a separate section enumerating the duties and powers of the Secretary. The House amendment has no comparable provision, but includes the powers and duties under separate sections where appropriate.

The Senate bill contains a provision requiring that copies of communications transmitted between Federal officials and any persons concerning liability and damages under this Title be available for public inspection and copying. The House amendment contains no similar provision.

The latter three provisions of the Senate bill are deleted in the conference report.

TITLE IV—FISHERMAN'S CONTINGENCY FUND

The House amendment included a "Fishermen's Gear Compensation Fund" as a section of an amended OCS Lands Act. The Senate bill included a "Fishermen's Contingency Fund" as a separate title to the 1978 Amendments, not directly amending the OCS Act. The conference report contains the Senate structure and caption.

This Title is intended to provide a formal mechanism for compensation to fishermen for damages to fishing vessels, gear, and other consequential damages stemming from activities related to the development of oil and gas resources on the OCS.

Sec. 401—Definitions

Sec. 401 of the conference report adds definitions for seven new terms.

The Senate bill contains a definition of "citizen of the United States" which includes all citizens, all States and groups of States and their agencies, and all businesses organized under the laws of any State, if such businesses are clearly owned and controlled by at least 75 percent by U.S. citizens and if their President or Chairman of the Board is a U.S. citizen. The House amendment contains no comparable provision.

The Conferees recognize the need to define who is eligible for compensation for damages suffered and for loss of income resulting from certain offshore oil exploration, production and development activities. Accordingly, the conference report follows the Senate bill by including this provision.

The House amendment defines a "commercial fisherman" as one who is a citizen of the United States and who owns, operates or derives income from being employed on a commercial fishing vessel. The Senate bill contains no such definition. The conference report is the same as the House provision.

The House amendment defines "commercial fishing vessel" to mean any vessel primarily used for the handling or harvesting of living marine resources for commercial purposes. The Senate bill has no comparable provision. The conference report follows the House amendment with an amendment defining "commercial fishing vessel to mean any vessel, boat, ship or craft primarily used for the handling or harvesting of living marine resources for commercial purposes, including fish-harvesting related vessels. It specifies that all "commercial fishing vessels" be U.S. documented except those under five net tons which may be registered under the laws of any State. The Conferees indicated that the total package of vessels that deal with the catching and harvesting of marine resources should be included. The Conferees recognize that any limit to the scope of the Fund might cause litigation, confusion and a loss of benefits to fishermen, and thus adopted this more inclusive definition.

The conference report defines "fish" to mean any of numerous cold-blooded aquatic vertebrates having fins, gills and a streamlined body. It includes mollusks, the shell-bearing invertebrates, such as clams, and crustaceans, the aquatic arthropods, such as lobsters. All other forms of marine animal and plant life are included in this definition except for marine mammals, birds, and highly migratory fish species, eg. tuna. The Senate bill and the House amendment did not define the term "fish". The Conferees included this definition to avoid any confusion and loss of benefits to the fishermen.

The House amendment in 401(5) defines "fishing gear" to include (A) any commercial fishing vessel, and (B) any equipment, whether or not attached to such a vessel, which is used in the handling or harvesting of living marine resources for commercial purposes. The Senate bill contains no comparable provision. The conference report follows the House amendment with the deletion of the reference to "the handling or harvesting of living marine resources for commercial purposes", which is covered by the definition of "commercial fishing vessel."

Neither version included a definition per se of "Fund." However, one was included in the conference report for the sake of clarity. "Fund" means the Fishermen's Contingency Fund established under this Title.

The Senate bill defines the term "Secretary" to mean the Secretary of Commerce The House amendment contains no comparable provision. The conference report contains the Senate definition of the term "Secretary" but expands it to include the designee of the Secretary. The Conferees expect that the Administrator of the National Oceanic and Atmospheric Administration (NOAA) will be responsible for administering the fishermen's Funds.

The Senate bill alone defines "commercial fishing" as meaning all aspects of the commercial harvesting and handling of living marine resources. The House amendment contains no such provision. The conference report deletes this provision as unnecessary since a definition for "commercial fishing vessel" is included.

Section 402—Establishment of the fishermen's contingency fund fee collection

Both the House amendment and the Senate bill require the establishment of a Fund to be available for compensating fishermen for damages suffered to their vessels and equipment, and for loss of income, resulting from certain offshore oil exploration, production and development activities. The conference report follows the House amendment with certain technical changes.

The House amendment establishes the Fund directly within the Treasury of the United States, while the Senate bill establishes the Fund within the Department of Commerce. The conference report follows the House amendment. Both the Senate and House establish a revolving account within the Treasury. The conference report includes this provision.

The House amendment limits amounts in the Fund to $600,000, while the Senate requires the collection of fees at least until the Fund attains a level of $2,000,000 and requires that the Fund be maintained thereafter at between $2,000,000 and $5,000,000. The conference report limits the fund to $1,000,000.

The Senate bill and the House amendment have similar provisions allowing the Fund to sue, and providing for the deposit of certain sums into the Fund. The conference report is the same as the House amendment.

The House amendment authorizes the Secretary to establish and maintain separate area accounts within the Fund for the purpose of providing compensation for certain damages to fishermen within each area of the outer Continental Shelf. The Senate bill has no comparable provision.

Area accounts in the House amendment would be financed by assessments made by the Secretary on OCS lease holders and pipeline permittees in each affected area. These assessments would be limited to a maximum of $5,000 per lessee or permittee in any calendar year. The accounts, in turn, would be maintained at a level not to exceed $100,000 and, if depleted, would be replenished by equal assessments by the Secretary of the lessees and permittees in the area. The Senate bill contains no comparable provision, relating to special area accounts. The conference report follows the House amendment with some technical changes. A reference is included for a holder of "easement, or right-of-way," to make certain they may be assessed an appropriate amount. In addition, the Secretary of the Interior and not the Secretary of Commerce is to collect the assessments and deposit them in the appropriate account within the Fund. As just mentioned, the Conferees intend that the Secretary of Commerce assess any holder of a "exploration" permit, or of an "easement" or "right-of-way" for the construction of a pipeline in an appropriate amount up to $5,000 and not just the holder of a "permit" as specified by the House amendment.

The conference report also includes within the purposes of area accounts, compensation for "loss of" fishing gear and not just damages, as provided in the House amendment. This change was made to clarify that compensation may be paid for loss of gear, as well as damage.

The House amendment provides that each area account shall be established and maintained at a level not to exceed $100,000, and to be replenished, if necessary, by equal assessments by the Secretary on each holder and each pipeline permit holder in such area. The Senate bill contains no such pro-

vision. The conference report follows the House provision with an amendment providing, discussed earlier for replenishing accounts by "appropriate" not necessarily "equal" assessments, of holders of easements and rights-of-way.

Both the Senate bill and the House amendment provide for the disbursement of money from the respective Funds. The House amendment would allow disbursements from the area accounts, subject to such amounts as are provided in appropriations Acts, while the Senate bill would allow disbursements from the Fund. The conference report follows the House amendment, allowing disbursements from the area accounts in amounts provided by appropriations acts.

Both the bill and the amendment allow disbursement for administrative or personnel expenses of the Fund or area account, except that the House amendment limits such disbursements to 15 percent of the total amount deposited in the revolving account during the fiscal year. The conference report is the same as the House provision.

Both the Senate bill and the House amendment, using different language, allow disbursements for the payment of claims under this section or title.

The conference substitute is the same as the House provision.

The House amendment would allow disbursements for the payment of reasonable attorneys' fees awarded pursuant to the claims settlement provisions of the section. The Senate bill contains no comparable provision. The conference report is the same as the House amendment.

The House amendment requires that any exploration plan, and any development and production plan, approved by the Secretary, as well as any permit issued for the construction of a pipeline in an area of the outer Continental Shelf, contain a provision that the lessee or permittee shall agree to pay amounts specified by the Secretary, up to a maximum of $5,000 per year in order to establish and maintain a fishermen's gear compensation fund for such area. The Senate bill contains no comparable provision. As the "funds" are now included as a separate title and not as part of the OCS Act, and as independent authority is given for assessments, the Conferees believed this provision unnecessary. Thus, the conference report follows the Senate bill and contains no such provision.

Sec. 403—Duties and powers

Both the House amendment and the Senate bill have a provision spelling out the general powers and duties of the Secretary. These provisions are similar with respect to the Secretary's power to prescribe regulations for the settlement of claims. With regard to prescribing such regulations, the conference report adopts the common language of both versions and in addition adopts the Senate language requiring, and not merely authorizing, such regulations.

Both versions contain similar provisions with respect to the classification of potential hazards to commercial fishing, except that the House amendment specifies hazards caused by outer Continental Shelf oil and gas exploration, production and development activities rather than referring simply to outer Continental Shelf activities. The conference report follows the House amendment with a technical amendment providing that such hazards are to be "identified" and not "established".

Both versions are similar with respect to regulating the stamping of materials, except that the House amendment specifically requires such stamping or labelling, wherever practicable. The conference report follows the House amendment, with an amendment specifying that it is the Secretary of the Interior that is required to establish the regulations for identifying all OCS materials, and that such materials when necessary for purposes of identification, should be "color-coded".

The Senate bill also contains provisions requiring the Secretary generally to administer and maintain the Fund, in accordance with the provisions of the Title, and to perform such other functions as are necessary to carry out these provisions. The House amendment does not contain similar language. The conference report follows the House amendment and contains no such provisions since the Secretary is already empowered with all such necessary incidental authority.

Recoverable Damages

Both the Senate bill and the House amendment contain provisions spelling out the types of damages which fishermen may be entitled to recover. The House amendment would allow payments to be disbursed by the Secretary from the appropriate area account to compensate commercial fishermen for actual and consequential damages, including loss of profits, due to the damage of fishing gear. The Senate bill would allow recovery for "damages and loss to profit" to commercial fishing vessels and gear for the replacement value of any loss of all or part of a commercial fishing vessel, the replacement value of any loss of all or part of gear used, and the loss of revenue to a commercial fishing vessel and crew due to OCS activities; such loss to be based on the averaged daily revenue over the previous year. The conference report follows the House amendment with the addition of a phrase allowing payments, whether or not such damage occurred in such area. This change was included to avoid administrative and other problems when the exact location of known or disputed or when the damage occurs somewhere along the supply route between the oil drilling equipment in the OCS and the shore.

Section 403(c)(1) authorizes the payment to fishermen of damages, for damages to or loss of fishing gear, and includes loss of profits. Section 403(a)(1) requires the Secretary of Commerce to promulgate appropriate regulations to handle claims and awards. The Conferees intend that appropriate regulations should determine what "profits" are to include. Such "profits" should be limited to the actual loss of the fishermen and thus should ordinarily be limited to the net profits lost.

The House amendment includes a list of circumstances under which payments cannot be made to fishermen. These include circumstances under which the damages were caused by objects of known ownership; payments which are in excess of $75,000 per incident; payments to the extent that damages were caused by the negligence or fault of the claimant; cases where the damage involved was sustained prior to the enactment date of the Act; payments which are in excess of the depreciated value of the damaged fishing gear; payments for loss of profits for a period in excess of six months unless such a claim is supported by specified records; and payments for damages which have already been or which will be compensated for by insurance. The Senate bill contains no comparable list.

The report follows the House amendment except for two changes. First, the ceiling of $75,000 per incident is deleted. Second, the House amendment limiting recovery to the depreciated value of the fishing gear was amended by limiting recovery instead to the replacement value. This sets a limit and not a floor. The Secretary of Commerce is authorized to disburse payment for "actual and consequential damages." Determinations of amounts to be paid, first by the hearing examiner and then pursuant to judicial review are similarly to be limited to "actual and consequential damages." Thus, in evaluating payments on a claim, the replacement cost is to be the maximum allowable—but may not necessarily be the actual amount paid. The actual amount is to be determined case by case on the basis of the "actual and consequential" damages standard.

This section limits payments to fishermen in cases where the fisherman is negligent or at fault. Specifically such payments are limited "to the extent" that damages were caused by negligence or fault. This establishes a "comparative negligence" type standard. Recovery is not barred totally if negligence or fault is involved. However, the amount of recovery is to be diminished in proportion to the negligence or fault to the claimant.

Section 404—Burden of proof

Both the House amendment and the Senate bill contain a provision spelling out a set of circumstances under which the standing of any particular claim would be improved. The House amendment states that if the claimant can establish certain facts, there shall be a presumption that his claim is valid while the Senate bill says that under those conditions there shall be a presumption in favor of the claim.

The lists of circumstances allowing a presumption are similar in the amendment and the bill except that the House amendment refers throughout to damage caused by "material, tools, containers or other items" while the Senate bill refers simply to "obstacles".

The House version requires the report of damages to be made within five days after they are discovered. The Senate bill requires an "immediate report."

The House version requires the lack of a record on nautical charts or the Notice to Mariners on the date damages were sustained, while the Senate bill specifies no previous or existing record.

Both versions refer to the lack of a surface marker or buoy, but the Senate bill includes this basis only in lieu of the lack of a record of nautical charts.

In each of the above instances, the conference report is the same as the House amendment.

Only the Senate bill includes in the list a requirement that the claimant establish that the damage or loss of revenue was received after the enactment date of the Act. The conference report is the same as the House amendment, and contains no such provision. It is intended that the Secretary of Commerce, in consultation with the Secretary of Interior, establish area accounts and utilize this title in appropriate circumstances, for existing leases, permits, or rights of way, and be given the discretion to disburse funds for damage occurring prior to enactment.

Sec. 405—Claim procedures and subrogation of rights

Section 405 describes the procedures by which claims are determined and awarded.

Only the House amendment requires a claim to be filed within 60 days of discovery of a claim. The conference report is the same as the House amendment.

Claims Decisions

The House amendment and the Senate bill differ greatly in the manner in which claims will be considered. The House amendment provides for determination by a hearing examiner and the Senate bill by the Secretary with advice from a Board, described in detail in the Senate bill. The conference report follows the House amendment by referring the matter to a hearing examiner.

The House amendment would require the Secretary to refer claims to a hearing examiner appointed under section 3105 of the U.S. Code and to notify, to the extent reasonable, all persons known to have engaged in activities associated with OCS energy operations in the vicinity. Each person so notified would be required to inform as to

whether he admits or denies responsibility for the damages claimed. All such persons would be accorded the opportunity to submit evidence at any hearing conducted in connection with the claim. The hearing examiner would be allowed 120 days to adjudicate the case and render a decision in accordance with section 554 of title V of the U.S. Code. The conference report follows the House amendment with some minor structural changes.

The House amendment would require the hearing examiner to include reasonable attorneys' fees in the amount certified to the Secretary as compensation for claims which he judges to be valid. The Senate bill allows attorneys' fees when the Secretary's decision is affirmed on judicial review. The conference substitute is the same as the House amendment with minor structural changes.

The House amendment provides that the hearing examiner shall have the power to administer oaths and to subpoena pertinent witnesses and documents in connection with any hearing conducted pursuant to this section. The Senate bill does not mention the right of the Secretary to administer oaths but does give him (and the Comptroller General) access to records. The conference report is the same as the House amendment with minor structural changes.

In any hearing conducted pursuant to this section, the House bill provides that the hearing examiner shall consider evidence of obstructions in the area as identified by the survey required. The Senate bill contains no such provision. The conference report is the same as the House amendment with minor structural changes.

The House bill states that hearings shall be conducted within the judicial district nearest to, or within which, the matter occurred, or, if the matter took place in more than one district, in any of the affected districts. The Senate bill, not providing for hearings, does not have comparable language. The conference report is the same as the House amendment.

The House amendment provides that decisions by the hearing examiner are final and not reviewable by the Secretary. The Senate bill contains no such language as the Secretary makes the intial decision as to a claim. The conference report is the same as the House amendment.

The House amendment and the Senate bill have similar subrogation provisions. The conference report is the same as the House amendment with minor technical changes so as to provide that payments from a fund to a claimant entitles the Secretary to acquire by subrogation the applicable rights of a claimant against a responsible party. Thus, the right of subrogation is limited to the amounts awarded to the claimant. No other rights, or amounts beyond that awarded, are subrogated.

The House amendment has a provision stating that any person who denies responsibility for damages and is found responsible for damages, and any commercial fisherman who files a claim and is subsequently found to be responsible for damages, shall pay the costs of the proceedings conducted with respect to such claim. The Senate bill has a roughly comparable provision stating that those persons involved in OCS activities who are identified as having caused damages or loss of revenue shall reimburse the Fund for such amounts that it has paid to the claimant for such damage. The conference report is the same as the House provision.

Both the Senate bill and the House amendment provide, in a similar manner, for judicial review of decisions made with respect to claims. The conference report is the same as the House amendment.

The Senate bill alone, in addition, provides specifically that in any case in which the person responsible for damage to commercial fishing vessels or gear seeks judicial review, attorneys' fees and court costs shall be awarded to the claimant if the decision is affirmed. The House amendment contains no such specific provision. The conference report contains no such provision, however, elsewhere it does require the hearing examiner to include reasonable attorneys' fees in the amount certified to the Secretary as compensation for claims which he judges to be valid. As with any award for attorneys' fees, this certification may be amended to include costs on appeal.

Sec. 406—Annual report

Both the House amendment and the Senate bill require the submission of an annual report by the Secretary to the Congress. The House amendment would require a report setting forth (1) an evaluation of the feasibility and comparative cost of preventing or reducing obstructions on the OCS which pose potential hazards to commercial fishing or fishing gear by imposing fines where appropriate or by requiring the bonding of OCS lessees or permittees, (2) a description of the types of damages set forth in claims filed during the previous year, (3) the amount of compensation awarded during the year, and (4) the number of cases during the previous year in which damages were determined to be the responsibility of a lessee or permittee on the OCS, or of a contractor or subcontractor. The Senate bill would require a report within six months after the end of each fiscal year, which would (1) report on the administration of, and payments from, the Fund during such fiscal year and (2) recommend to the Congress such additional legislative authority as may be necessary to improve the management of the Fund and the administration of the liability provisions of the Title. The conference report is the same as the House amendment, except that paragraph (1) regarding an evaluation of the feasibility and comparative costs of preventing or reducing obstructions on the OCS is deleted as separately provided for in subsection 406(b).

Sec. 406(b) requires the Secretary, after consulting the Secretary of Interior, to include in the *first* annual report an evaluation of the feasibility and comparative cost of preventing or reducing obstructions on the OCS which pose potential hazards to commercial fishing or fishing gear by imposing fines where appropriate or by requiring the bonding of OCS lessees or permittees. The Conferees believed it was not necessary to provide for this required calculation every year.

Section 407—Survey of obstructions on the OCS

The House amendment directs the Administrator of NOAA to conduct a 2-year survey of obstructions on the OCS, and requires a report and the development of charts based on the survey. The Senate bill contains no comparable provision. The conference report follows the House amendment with an amendment deleting the specific reference to the Administrator of NOAA. The provision now directs the Secretary (of Commerce) in cooperation with the Secretary of the Interior to conduct a two year survey of obstructions on the OCS, and requires a report and the development of charts based on the survey. It directs the Secretary to concentrate during the first 6 months of the survey on areas of the OCS where oil and gas production has commenced or is expected to commence shortly. It is expected that the Secretary will use the Administrator of NOAA to conduct the survey.

Other Provisions

The Senate bill contains a specific provision providing jurisdiction and venue in the district courts over non-claim controversies. The House amendment has no comparable provision. The conference report follows the House amendment and contains no such provision.

The Senate bill requires the Secretary to ask the Attorney General to represent the Fund If the Attorney General does not respond within a reasonable time, the Secretary may appoint other attorneys. The House amendment contains no comparable language. The conference report follows the House amendment and contains no such provision. It is assumed that as with other provisions of the 1978 Amendments, the Attorney General will represent the Fund.

The Senate bill contains a section authorizing appropriations for the administration of the Title, in the amount of $200,000 for each fiscal year through 1990. Also authorized is $500,000 to serve as an initial deposit in the Fund, to be repaid to the Treasury as soon as practicable. The authority to pay claims under the title will only be effective to the extent provided, without fiscal year limitation, in appropriations Acts. The House amendment has no comparable provision. Establishment of a fund or funds is discretionary with the Secretary. The conference report follows the House amendment and contains no such provision, as authorization to appropriate is now provided elsewhere in this Title.

TITLE V—AMENDMENTS TO THE COASTAL ZONE MANAGEMENT ACT OF 1972

The Coastal Zone Management Act Amendments of 1976 (Public Law 94–370), among other purposes, were intended to provide Federal financial assistance to coastal States impacted by coastal energy activity.

The Coastal Energy Impact Program (CEIP), which was the major section of the 1976 Amendments, is composed essentially of three parts. Planning grants are provided to States if their coastal zones are affected by the location of energy facilities. Loans and bond guarantees are also provided to assist the coastal States in financing public facilities and public services required as a result of coastal energy activity.

The third part provides grant funds to coastal States impacted by outer Continental Shelf (OCS) energy activities which are intended to assist in the financing of public facilities, public services, and environmental costs associated with such activity. These so-called OCS formula grants are provided in section 808(b) of the existing CZMA.

Section 501—Coastal energy impact program

Both the Senate bill and the House amendment contain amendments to section 308(b) but do not provide any modifications in the planning grants or loans and bond guarantee provisions of the CEIP.

Formula

The Coastal Zone Management Act (CZMA) provided a formula for distribution of OCS formula grants. The Senate bill makes no change in the four criteria of the present CZMA. The House amendment changes the percentage of each criterion and drops the provision referring to "the number of individuals . . . who obtained new employment in such preceding fiscal year as a result of . . . " OCS energy activity. The conference report contains the House amendment modification of the formula. Specifically, the formula in the conference report is based on three criteria: new acreage leased adjacent to a coastal State (50%); oil and gas produced adjacent to a coastal State (25%); and oil and gas first landed in the coastal State (25%). The present criterion with respect to new employment is dropped in the conference report.

Floor and Ceiling

The House amendment contains provisions which establish an individual State "ceiling," and a "floor" for States which are not included in the formula but which fulfill certain criteria. The Senate bill has no comparable provisions.

With respect to the former provision, the House amendment establishes a ceiling of

thirty percent of the total amount credited to the CEIF which any individual coastal State may receive in a fiscal year. Additionally, the amendment provides that any "affected State", as determined by the Secretary of Commerce in accordance with stated standards, which does not fulfill any of the three formula criteria, but is located in a region of a State which does, shall receive 2 percent of the total amount appropriated in a fiscal year.

Because the nature of the CEIP program and distribution formula is focused on offshore oil and gas activity, the vast proportion of grant funds will continue to be allocated to the region of the country already heavily involved in such activity. A significantly reduced amount could be available to frontier States if one or two "developed" States took a large portion of the appropriated funds. Consequently, the concept of a ceiling is included in the House amendment.

The "floor" provision arises out of the difficulties in adequately anticipating onshore impacts and, in part from the need to rely on delimiting State lateral seaward boundaries for the purpose of allocating CEIP funds. Consequently, it is probable that some States experiencing spillover impact from OCS development may be ineligible for formula grant assistance under the existing formula. The concept of a minimum floor contained in the House amendment is designed to address this particular problem.

Because the 2% floor provision allocates funds to non-formula States, it may lead to an inadequate amount of funds being available to provide the full amount to which each State is eligible under the formula. As conforming language, therefore, the House amendment contains a "proportional reduction" mechanism which provides that, when this situation obtains, each State's share will be reduced in accordance with its proportion of any fiscal year's allotment. The Senate bill, because it has no minimum floor for States, has no comparable provision.

The House amendment specifies the coastal States which are located in each of the four regions: Atlantic, Gulf, Pacific, and Alaska. It also provides an additional requirement for a State to receive the 2% funds. Specifically, such State would have to be an "affected State", the definition of which is taken directly from section 201(f) of the definitions section of the conference report.

The intent of the "affected States" provision is to prevent the coastal States which would not be impacted in a region from receiving the 2% funds. This is a particular problem in the Atlantic where all States along the coast are included in one region. For example, OCS drilling in the Baltimore Canyon area may have little or no impact on the State of Georgia but Georgia is included in the Atlantic region by definition.

Sequence and Chronology

The conference report contains the concepts of a ceiling, minimum floor, specification of regions, proportional reduction, and "affected States" determination. However, the Managers made certain modifications in some of these House Amendment provisions and also agreed to specify statutorily the sequence of steps to be taken in the calculations of individual State allotments and the precise chronology for the imposition of the ceiling, minimum floor, and proportional reduction stages. Also, the Managers deleted the provision in the House amendment in which any unallocated funds (resulting from the ceiling) would remain in the Treasury. The conference report contains a provision which would redistribute such funds to coastal States above the minimum and below the ceiling.

Specifically, it is the intent of the Managers that the following steps in the calculation be taken in the order indicated:

1. The proportion of each State's allocation under the formula contained in paragraph 2 of section 308(b) of CZMA be calculated.

2. Those "formula" States which would receive an amount less than 2% of the amount appropriated should be raised to 2% of such appropriation.

3. "Non-formula" States which are located in the region of any other coastal State which is included within the formula are entitled to receive 2% of the amount appropriated in a fiscal year if the Secretary of Commerce determines that such non-formula States are being or will be impacted by OCS energy activity and that they will be able to expend or commit the funds in accordance with the purposes set forth in the OCS formula grant section.

This clause referring to the Secretary's determination of impact by offshore activity was an amendment offered during the Conference Committee and accepted by the Managers in lieu of a five-part definition of "affected States" which is contained in the House amendment.

"Outer Continental Shelf energy activity" is a defined term in the existing CZMA and refers generally to any offshore exploration, development, or production activity or the siting, construction, expansion, or operation of energy facilities required by such activity. It is the intent of the Managers that the Secretary look to OCS energy activity which occurs in the prior fiscal year for purposes of making this determination. This would be consistent with the manner in which the formula is applied, namely that funds appropriated for formula grant purposes are allocated on the basis of OCS activity occurring in the previous fiscal year.

At the same time, it is understood that the phrase "will be impacted" implies an anticipatory judgement by the Secretary and that this discretionary authority to determine eligibility for the 2% grants is not, and is not intended to be, strictly circumscribed by hard data. It is the intent of the Managers that the 2% minimum floor provision provide funds to those States which do not fall into the formula but which will experience spillover impacts necessitating public facilities, public services and environmental costs occasioned by OCS activities. Assessments of the causal effects emanating from such activities and, thus the need for the 2% minimum floor for non-formula States, should be determined by the Secretary within the context of this primary purpose and based on an analysis of the immediacy of impact, equity in distribution, and the reasonable needs for and the ability of the States properly to expend the proceeds on OCS-induced public facilities, public services, and environmental needs.

4. If the amount of appropriations is less than the amount payable to all coastal States under those calculations, all States receiving more than 2% of the amount appropriated shall be proportionately reduced to conform the amounts payable with the amounts appropriated. Proportional reduction shall be accomplished by reducing the amounts payable to those coastal States that receive more than 2% of the total amount appropriated by an amount represented by the following formula:

$$(T-A)\times P-2\%\text{ of }A/TP-(2\%\text{ of }A\times S)$$

Where:

T = the total amount payable to all coastal States;

A = the total amount appropriated for making grants;

P = the amount payable to a coastal State which will receive more than 2% of the funds appropriated;

TP = the total amount payable to those States which will receive more than 2% of the funds appropriated;

S = the number of coastal States which will receive more than 2% of the funds appropriated.

5. After the proportional reduction calculations are made, any coastal State which would receive more than 37½ percent of the amount appropriated is to be reduced to 37½ percent of such appropriations.

6. If the application of the 37½ percent ceiling results in any residual appropriated funds, such excess shall be paid proportionately to all coastal States which are to receive more than 2% but less than 37½ percent of the amount appropriated. No State may receive more than 37½ percent of the amount appropriated after the residual funds are paid proportionately to the appropriate States. "Payable proportionately" means that any residual funds are to be apportioned among the States receiving more than 2% but less than 37½ percent based on the formula contained in paragraph 2 of section 308. In making the formula calculations under that paragraph, the ratios to be calculated for each of the three criteria are to be made up of data applicable only to those States receiving more than 2% and less than 37½ percent of the amount appropriated. Specifically the numerator and denominator of the proportions in each of the criteria are to be composed of the appropriate OCS activities of only those States above the 2% floor and below the ceiling.

Changes in Grant Eligibility and Use

Both the Senate bill and the House amendment delete the obligation on a coastal State to obtain financing under the loans and bond guarantees provision of section 308 of CZMA before formula grant funds may be used. The term "new or expanded" modifying outer Continental Shelf energy activity in the same provision of the existing law is also deleted by both versions. Consequently, the conference report does not contain these two provisions.

Presumption of OCS Activity

The Senate bill contains a provision which authorizes by regulation, in which public facilities and public services are presumed to be required as a result of OCS energy activity. The House amendment has no comparable provision and the conference report follows the Senate bill.

Timing and Distribution of Grants

The House bill modifies the existing law with respect to the timing of the distribution of OCS formula grant proceeds and the assurances which the Secretary must obtain before forwarding such proceeds to the States. The Senate bill contains no comparable language and thereby retains the existing provision of the CZMA on this matter.

Specifically, the existing law is administered in a manner whereby OCS formula funds are maintained in individual State accounts in the U.S. Treasury (based on the State's allocation under the formula) and dispersed only at the time of expenditure and after a federal review of the purposes of the proposed project.

The House amendment provides that the funds are to be transferred to State banks and held in "escrow" until the Secretary of Commerce completes the project review process, makes a grant award, and the funds are actually expanded. The conference report follows the Senate provision.

Section 502—Authorization of appropriations

The House amendment amends section 9 of the Outer Continental Shelf Lands Act to provide that all Federal OCS rentals, royalties, revenues, or other sums, be deposited in the Treasury (other than the proceeds presently credited). Of this amount, twenty percent (up to a maximum of $200 million) is to be credited in each fiscal year to the Coastal Energy Impact Fund (CEIF) which was established by the 1976 Amendments. Amounts actually dispersed to the

States are subject to appropriations. At present, the CEIF is a revolving fund for the provision of loans and bond guarantees to the States for coastal energy activity. There is no fiscal year limitation on the crediting mechanism in the House amendment.

The Senate bill contains standard authorization of appropriations language to increase authorizations for the OCS formula grants from $50 million to $75 million for each of the eight fiscal years beginning with FY 78.

The conference report provides for standard authorization of appropriation language at a yearly level of $130 million beginning in FY 79 and for the following nine fiscal years.

Section 503—OCS grants

The House amendment adds a new provision to section 308(c) of CZMA authorizing the Secretary of Commerce to make 80 percent grants to coastal States likely to be affected by OCS energy activities. The purpose of these grants is to enable such States to carry out their responsibilities under the OCSLA. The State responsibilities intended to be financially assisted by such grants include the administrative policy, operational, and managerial aspects of, participating in the Federal leasing program but do not include any of the planning, public facility, public service, or environmental protection costs contained in other provisions of the CEIP.

It is the intent of the House amendment that the Secretary of Commerce have considerable discretion in administering this new administrative grant provision. This flexibility is needed because of the uncertainty of lease sale schedules, exploration and production timetables, and the precise incidence and magnitude of actual impacts on any individual coastal State.

For purposes of dispersing the grant funds to coastal States, this provision intends that some type of formula be established and then be contained in the regulations promulgated by the Secretary of Commerce.

In 1975, $3 million was appropriated in supplemental funds to coastal States through the Coastal Zone Management program. This money was to be used by the States to improve their capabilities to plan for and manage projected OCS impacts. In the regulations which were developed to implement these grants, a formula was provided for their allocation among the States. Specifically, a uniform allocation of one percent to the affected States was established. Then, of the remaining funds, 40 percent was to be allocated based on the length of a State's marine shoreline; 40 percent on coastal county population; and 20 percent on the basis of identified needs.

Some formula along these lines is intended by this measure although the precise system of allocation remains with the Secretary and should be based, to the maximum extent possible, on the actual OCS administrative responsibilities borne by each coastal State.

It should also be noted that the recipient executive agency in each State will vary—depending on which department or unit has OCS responsibilities. It need not be the same agency as the one which administers the coastal zone management program for the State or the one which receives coastal energy impact program financial assistance.

The Senate bill contained no comparable provision and the Senate Conferees receded to the House. Consequently, the conference report contains a provision for these OCS administrative grants at the level of $5 million per year, beginning in FY 79 and ending with FY 83.

Section 504—State management program

The House amendment modifies the OCS Federal consistency provision (section 307(c)(3)(B)(ii)) of the CZMA by reducing the amount of time by which State concurrence with an OCS exploration, development or production plan consistency certification is conclusively presumed. The Senate bill has no comparable provision and, thus, would retain the present statutory language which provides for a six month period for conclusive presumption. The House amendment reduces this to three months.

The Managers agreed to an amendment which provides that if a State fails to make a consistency determination within three months after it receives its copy of the consistency certification, it (the State) shall provide a written statement describing the status of its review and the basis for further delay. The statement is to be submitted to the Secretary of Commerce, the appropriate Federal agency, and the lessee. If the statement is not provided on or before the end of the three month period, concurrence by the State with the certification is conclusively presumed. The submission of such statement, however, will preserve the State's present six month period for conclusive presumption.

The intent of the amendment is to maintain the six month review period but also to put coastal States on notice that they must begin to respond to development and production plans expeditiously and the submission of the written statement is intended to be an indication of that responsiveness.

Other Provisions

The Senate bill contains a provision (sec. 507) regarding the inapplicability of any provision in section 308 of CZMA with respect to the National Environmental Policy Act and its effect on grants made pursuant to the OCS formula grants section. The House amendment contains no comparable provision and the conference report follows the House amendment on this matter.

TITLE VI—MISCELLANEOUS PROVISIONS

This Title contains a number of miscellaneous provisions which are for the most part self-explanatory.

The conference report includes sections present, in identical form, in both the Senate bill and House amendment: Section 601—Review of Shut-in or Flaring Wells; Section 602—Review and Revision of Royalty Payments; Section 605—Sunshine in Government. In addition, the conference report contains sections in this Title, reconciling differences between the Houses as follows:

Section 603—Natural gas distribution

The Senate bill directs the Federal Power Commission (now the Federal Energy Regulatory Commission) to permit natural gas distribution companies to transport natural gas from the outer Continental Shelf to the service areas of such companies if those companies engage, directly or indirectly, in the development or production of such gas from the outer Continental Shelf.

The House amendment specifically states that the purpose of this section is to encourage participation by such companies in the acquisition and development of natural gas resources on the outer Continental Shelf by facilitating the transportation in interstate commerce of natural gas produced from an outer Continental Shelf lease that is owned by any such company to the company's service area. It directs FERC, after an opportunity for written and oral public participation, to promptly issue and publish in the *Federal Register*, a FERC policy statement to carry out such purpose and to set general standards under which FERC would consider, under normal FERC procedural rules, applications by such companies for certificates of convenience and necessity for such transportation. Such certificates are to be issued pursuant to section 7 of the Natural Gas Act. The statement of policy will specify criteria, limitations, or requirements that FERC must apply in making determinations whether the applicant company qualifies for consideration of such a certificate pursuant to the FERC policy statement, and whether the public convenience and necessity will be served by the issuance of such a certificate. The policy statement will also establish the general terms or limitations on which FERC may condition, in accordance with section 7 of the Natural Gas Act, the issuance of such certificate. Any needed specific terms and conditions will be included pursuant to section 7 of the Act. The section also defines the terms "local distribution company" and "interstate commerce."

The Conferees adopted the House amendment with some modifications. It is the intent of this section as modified, to facilitate entry by gas distributing companies into OCS leasing. To allow bids to be offered by such companies, they need assurances that they will be able to return any gas found on its lease to their own service area. The first modification makes it explicit that this purpose—and the policy to be formulated based on it—is appropriate for gas distribution companies, acting with others or utilizing alternative corporate methods. It is likely that gas distributing companies will enter into joint ventures to obtain OCS leases. Thus, the policy to be established by FERC should be applicable to gas distributing companies owning a portion of an OCS lease, such as participants in a joint bid, or as a part of a consortium.

Thus, the Conferees make it clear that the companies need not be the sole owners of an outer Continental Shelf lease for the production of natural gas. They can be participants, such as in a joint venture, in such lease with other persons who also share the risks and benefits of the lease. It is intended, however, that their participation be substantial and not a sham. It is expected that FERC will, as one element of the criteria of the policy statement, look at the risk shared by the local distribution company (LDC), taking into consideration the size and economic position of the LDC.

In addition, the Conferees revised the definition of a local distribution company to include their subsidiaries or affiliates that actually engage in the exploration and production of natural gas on the outer Continental Shelf. The Conferees recognize that local distribution companies may not actually engage in such exploration and production, but they may form subsidiaries or affiliates to perform this function. The amendment would permit such a local distribution company to participate. At the same time, the Conferees stress that the definition also requires that the local distribution company, including its subsidiaries or affiliates, must be regulated or operated as a public utility by a nonfederal government agency, although such regulation may not be to the same extent as the parent LDC. It is sufficient, in the case of a subsidiary or affiliate formed by the parent LDC, that there be State or local regulation which authorizes or sanctions the creation or organization of the subsidiary or affiliate and which applies, through regulation of the parent, to the costs and funds of the subsidiary or affiliate. FERC must be satisfied that there is sufficient corporate, functional, and financial linkage between the LDC and the subsidiary or affiliate to insure that no sham has been created and that the benefits of this section do not extend to persons, other than LDC's. Any affiliate or subsidiary that is not subject to such regulation is not eligible.

Clearly, as already stated, the intent of this section is to benefit local distribution companies only. It is designed to facilitate entry by such companies in the outer Continental Shelf leasing so that they can distribute the proposed natural gas to their service areas only. Applications for certificates to transport natural gas by entities

other than LDC's and their subsidiaries and affiliates are to be treated under normal FERC standards and procedures pursuant to section 7 of the Natural Gas Act.

In another modification, the Conferees provide that FERC is to act promptly to develop a proposed policy statement and issue a final one. The Conference Committee agreement provides that the statements should be promulgated by the Commission, after full public participation, within one year after enactment. This period should be ample. However, the Conferees recognize that FERC has many other duties and responsibilities. Thus, FERC has sufficient flexibility under the section to take a longer period, if needed. The Conferees stress that FERC should make every effort to complete the policy statement, including the required public participation, and promulgate within a one year time frame.

The statement, of course, should be published, when finalized, in the *Code of Federal Regulations*, along with other FERC rules, regulations, etc. The Conferees also wish to make it clear that such a statement can be reviewed from time to time by FERC and revised consistent with the requirements of this section if FERC deems it appropriate.

Finally, the Conferees add a provision making it clear that after considering applications for certificates made after promulgation of the policy statement, FERC will issue such certificates where FERC determines it appropriate to do so in accordance with the policy statement and section 7 of the Natural Gas Act.

Section 604—Antidiscrimination provisions

Both versions include anti-discrimination provisions. The House amendment makes reference to rules under Title VI and VII of the Civil Rights Act. The Senate bill makes reference only to Title VI. The conference report follows the House amendment including Title VII with an amendment *deleting* the provision that the anti-discrimination rules shall apply to aliens and include employment outside the United States where the Secretary of Labor shall not have the authority to grant exemptions.

Section 606—Investigation of availability of oil and natural gas from the Outer Continental Shelf

Both versions provide for an investigation of the availability of oil and gas.

The Senate bill is more inclusive. Thus, its title, findings, purposes and direction relate to all crude oil and natural gas. The House amendment relates only to OCS oil and gas. The conference report contains the more limited scope of the House amendment throughout the section.

The Senate bill authorizes the President to conduct a continuing investigation of availability of all domestic oil and gas. The House amendment directs the Secretary of the Interior to conduct an investigation as to the availability of OCS oil and gas. The conference report is the same as the House amendment.

Both versions provide for a determination or rates of production. The House amendment provides for determination of OCS "maximum attainable rates" and also a determination if actual production is less than MAR. The Senate bill provides for an independent determination of "MER" and "MPR" and for a Presidential study as to whether rates are being met. The conference report is the same as the House amendment.

The House amendment includes a definition of MAR. The Senate bill does not. The conference report is the same as the House amendment.

Both versions provide for the estimate of discovered reserves and undiscovered resources. The House amendment provides for an estimate of OCS reserves and resources only. The Senate bill provides for an estimate of all resources.

In addition, the Senate bill provides specifically for "geological and geophysical explorations carried out by other Federal or appropriate agencies" when determined to be the "only means" to obtain "adequate . . . data". The House amendment contains no such specific comparable language. On these two provisions, the conference report is the same as the House amendment.

The Senate bill provides for determination of the use of oil and gas in terms of its end use market. The House amendment contains no comparable provision. The conference report is the same as the House amendment, and thus deletes this provision.

The House amendment provides for an independent evaluation of trade association procedures for estimating OCS reserves. The Senate bill provides for an independent evaluation of estimates of all reserves. The House amendment refers to the evaluation by the Secretary. The Senate bill describes it as by the President. The conference report is the same as the House amendment.

Both versions provide for a report to Congress. The House amendment describes a schedule relating to OCS information. The Senate bill describes a schedule for OCS and non-OCS information. The versions differ in actual months granted and for respective details of information to be supplied. The conference report is the same as the House amendment.

Both versions provide for consultation with the FTC, using different words. The conference report is the same as the House amendment.

The House amendment defines "OCS". The Senate bill has no comparable provision. The conference report is the same as the House amendment.

The Senate bill contains an extensive series of provisions providing for the collection of information, use of other Federal agencies and severance of provisions of this section. The House amendment contains no comparable provisions. The conference report is the same as the House amendment.

The Senate bill would preclude any injunctive relief as to any provision of the Act, or action by the President under the Act. The House amendment has no comparable provision. The conference report is the same as the House provision.

The Senate bill specifically provides that the invalidity of part of the Act or application of the Act to a particular person, does not affect the validity of the remainder of the Act or application to other persons. The House provision has no comparable language. The conference report is the same as the House amendment.

The Senate bill contains a provision detailing an extensive series of means to collect information, conduct exploratory drilling, use other agencies and delegate authority. The House amendment contains no comparable language. The conference report follows the House amendment and deletes this provision.

As discussed earlier in relation to Title II, this section, or any action by the Conferees on this section, title or other provisions of the 1978 Amendments is not intended, in any way, to affect the authority and responsibility of the Secretary of Energy, FERC, or other agencies or departments to obtain, collect, and release information under other statutes.

Section 607—Recommendations for training programs

The House amendment provides for the Secretary of the Interior, working with the Coast Guard, to prepare a report and recommendations for employment training relating to the OCS. The Senate bill has no comparable provision. The conference report adopts the House provision.

Section 608—Relationship to existing law

Both the Senate bill and House amendment provide that the 1978 Amendments (all titles) are not intended to affect provisions or other statutes—unless expressly provided in the 1978 Amendments. The conference report retains this provision.

In addition, both versions provide for retaining the authority given the Department of Energy and Federal Energy Regulatory Commission by the Department of Energy Organization Act but use different language to do so. The conference report is the same as the House language on consistency with the DOE Act. In addition, as described in this statement, in discussing the new definition of "Secretary," (as included in Section 201 of the conference report) the Conferees adopted the new definition and made changes in the text and explanatory comments in this statement to specifically indicate the appropriate delegation of responsibilities.

Other Provisions

The House amendment contains a provision providing for a one-House Congressional disapproval of any rule or regulation. The Senate bill has no comparable provision. The House receded and the conference report contains no such provision.

PERMISSION FOR INTERSTATE AND FOREIGN COMMERCE TO HAVE UNTIL MIDNIGHT TOMORROW, FRIDAY, AUGUST 11, 1978, TO FILE REPORTS ON H.R. 13655 AND H.R. 13611

Mr. BARNARD. Mr. Speaker, I ask unanimous consent that the Committee on Interstate and Foreign Commerce have until midnight, Friday, August 11, 1978, to file the reports to accompany H.R. 13655, the Health Maintenance Organization Amendments of 1978, and H.R. 13611. the Child Health Assessment Act of 1978.

Mr. Speaker, this request has been cleared with the minority.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

FOURTH REORGANIZATION PLAN FOR 1978—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was

read and, together with the accompanying papers, referred to the Committee on Government Operations and ordered to be printed:

To the Congress of the United States:

Today I am submitting to the Congress my fourth Reorganization Plan for 1978. This proposal is designed to simplify and improve the unnecessarily complex administrative requirements of the Employee Retirement Income Security Act of 1974 (ERISA). The new plan will eliminate overlap and duplication in the administration of ERISA and help us achieve our goal of well regulated private pension plans.

ERISA was an essential step in the protection of worker pension rights. Its administrative provisions, however, have resulted in bureaucratic confusion and have been justifiably criticized by employers and unions alike. The biggest problem has been overlapping jurisdictional authority. Under current ERISA provisions, the Departments of Treasury and Labor both have authority to issue regulations and decisions.

This dual jurisdiction has delayed a good many important rulings and, more importantly, produced bureaucratic runarounds and burdensome reporting requirements.

The new plan will significantly reduce these problems. In addition, both Departments are trying to cut out red tape and paperwork, to eliminate unnecessary reporting requirements, and to streamline forms wherever possible.

Both Departments have already made considerable progress, and both will continue the effort to simplify their rules and their forms.

The Reorganization Plan is the most significant result of their joint effort to modify and simplify ERISA. It will eliminate most of the jurisdictional overlap between Treasury and Labor by making the following changes:

(1) Treasury will have statutory authority for minimum standards. The new plan puts all responsibility for funding, participation, and vesting of benefit rights in the Department of Treasury. These standards are necessary to ensure that employee benefit plans are adequately funded and that all beneficiary rights are protected. Treasury is the most appropriate Department to administer these provisions; however, Labor will continue to have veto power over Treasury decisions that significantly affect collectively bargained plans.

(2) Labor will have statutory authority for fiduciary obligations. ERISA prohibits transactions in which self-interest or conflict of interest could occur, but allows certain exemptions from these prohibitions. Labor will be responsible for overseeing fiduciary conduct under these provisions.

(3) Both Departments will retain enforcement powers. The Reorganization Plan will continue Treasury's authority to audit plans and levy tax penalties for any deviation from standards. The plan will also continue Labor's authority to bring civil action against plans and fiduciaries. These provisions are retained in order to keep the special expertise of each Department available. New coordination between the Departments will eliminate duplicative investigations of alleged violations.

This reorganization will make an immediate improvement in ERISA's administration. It will eliminate almost all of the dual and overlapping authority in the two Departments and dramatically cut the time required to process applications for exemptions from prohibited transactions.

This plan is an interim arrangement. After the Departments have had a chance to administer ERISA under this new plan, the Office of Management and Budget and the Departments will jointly evaluate that experience. Based on that evaluation, early in 1980, the Administration will make appropriate legislative proposals to establish a long-term administrative structure for ERISA.

Each provision in this reorganization will accomplish one or more of the purposes in Title 5 of U.S.C. 901(a). There will be no change in expenditure or personnel levels, although a small number of people will be transferred from the Department of Treasury to the Department of Labor.

We all recognize that the administration of ERISA has been unduly burdensome. I am confident that this reorganization will significantly relieve much of that burden.

This plan is the culmination of our effort to streamline ERISA. It provides an administrative arrangement that will work.

ERISA has been a symbol of unnecessarily complex goverment regulation. I hope this new step will become equally symbolic of my Administration's commitment to making government more effective and less intrusive in the lives of our people.

JIMMY CARTER.

THE WHITE HOUSE, *August 10, 1978.*

PRESIDENT FLUNKS FIRST WAR POWERS TEST IN ZAIRE

(Mr. FINDLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. FINDLEY. Mr. Speaker, today, with several of my colleagues, I am introducing a concurrent resolution which expresses the conviction of the Congress of the United States that the President was required by the terms of section 4 of the war powers resolution of 1973 to report to Congress concerning the actions of the U.S. Armed Forces in Zaire in May and June of this year.

I wish to make clear that I supported the activities the President carried out in Zaire but I feel he made a serious error in not making what I contend was a required report.

I take this step with great reluctance, because I had hoped that at long last a greater degree of comity had developed between the President and the Congress in the exercise of the war powers. Four times in the past, Congress has received reports pursuant to section 4, and in at least one of those instances, the potential for hostilities was certainly no greater, and perhaps less, than existed for the American servicemen sent to Zaire.

It is vital for Congress to apply the same rigorous standards to the administration's handling of the situation in Zaire that have been applied in the past when the war powers resolution was implemented. It is vital that we preserve the integrity of the resolution and Congress important role in decisions which can lead our Nation to war.

FACTS UNCLEAR DUE TO INADEQUATE CONSULTATION

Perhaps the greatest single argument for a full report to Congress is the paucity of facts and the lack of clarity concerning precisely who did what in Zaire. Press accounts are rife with conflicting facts as to the degree of U.S. involvement. The number of planes used, their ownership, and the types of crew, cargo, and passengers they carried is far from clear. The only thing certain is that a large number of C–130's, C–141 Starlifters, one giant Lockheed C–5A and an assortment of commercial aircraft belonging to the air forces of at least four nations transported thousands of armed combat troops from at least five nations plus tons of ammunition, fuel, and equipment to Zaire in May and June. In at least some instances, U.S. pilots flew these armed combat troops to staging areas where they went directly into combat. For a period of several weeks, U.S. pilots ferried combat troops to and from these staging areas adjacent to the front, while at least 72 other U.S. personnel on the ground in Zaire helped unload the ammunition and coordinate the distribution of supplies.

The only official communication which Congress has on the Zaire operation is a memorandum from the legal adviser of the State Department dated June 16, 1978, which neglects to point out that U.S. Air Force planes were used not only to transport French and Belgian troops to Zaire, but also more than 1,000 troops from Morocco, Senegal, and Gabon in order to help maintain order. The memorandum makes no effort to clarify the nature or degree of U.S. involvement in Zaire. This total lack of information beyond what was available in the news media should have caused the administration to report promptly to Congress on its actions in Zaire, even if section 4 of the war powers resolution had not been a part of the law.

CONSULTATION REQUIREMENT IGNORED

Section 3 of the war powers resolution states:

The President in every possible instance shall consult with Congress before introducing United States Armed Forces into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances. . . ."

The House report on the war powers resolution was very specific on the requirements of consultation under section 3.

A considerable amount of attention was given to the definition of consultation. Rejected was the notion that consultation should be synonymous with merely being informed. Rather, consultation in this provision means that a decision is pending on a problem and that Members of Congress are being asked by the President for their advice and opinions and, in appropriate circumstances, their approval of action contem-

plated. Furthermore, for consultation to be meaningful, the President himself must participate and all information relevant to the situation must be made available.

The distinguished chairman of the International Relations Committee gave perhaps the best and most succinct definition of the requirements of consultation under section 3 during the oversight hearings held in 1975. Chairman ZABLOCKI stated:

Congress' intent was that it be fully and accurately advised of all developing circumstances in any given situation requiring the possible commitment of U.S. armed forces sufficiently in time to have meaningful input into formulation of such a decision. Clearly, it was not the intent of Congress to be merely informed of decisions already made.

I would only note that as chief House sponsor of the War Powers Resolution I can say clearly that consultation was contemplated in all cases in which U.S. armed forces are committed into areas of hostilities abroad. This understanding is obviously contrary to what appears to be the Administration's view that such consultation is required or desirable only in instances in which actual hostilities can be anticipated with some degree of certainty.

Consultation is required when U.S. Armed Forces are committed into areas of hostilities abroad, not only when they are committed to actual hostilities. In this instance, it is clear that the U.S. pilots flew U.S. Air Force planes to the country and to the province where the hostilities were in progress. If that was not the area of hostilities, I do not know what would be.

PRESIDENT'S FAILURE TO REPORT VIOLATES SECTION 4(a)(1)

As the primary author of the reporting requirement contained in section 4 of the war powers resolution, I feel that I can speak with some authority and precision as to when reports are to be provided to Congress.

In the absence of a declaration of war, section 4(a)(1) requires a report from the President "in any case in which U.S. Armed Forces are introduced into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances." According to the committee report:

The word hostilities was substituted for the phrase armed conflict during the Subcommittee drafting process because it was considered to be somewhat broader in scope. In addition to a situation in which fighting actually has begun, hostilities also encompasses a state of confrontation in which no shots have been fired but where there is a clear and present danger of armed conflict. "Imminent hostilities" denotes a situation in which there is a clear potential either for a state of confrontation or for actual armed conflict.

While I believe the entire operation in Zaire called for compliance with the reporting requirement of section 4(a)(1), the clearest incident of imminent hostilities involving U.S. troops and planes occurred on Friday, June 16, when Zairian troops threatened to open fire on a U.S. transport plane sitting on the runway at Lubumbashi Airport in Shaba Province. The plane, a C-141 with a U.S. Air Force crew at the controls, was one of many to ferry foreign combat troops to and from this staging area located just south of the actual fighting. In this incident, according to eyewitnesses, French legionnaires had loaded a Peugeot car on the plane saying it had been given to them by a Belgian businessman. The Zairian troops, with automatic rifles at the ready, insisted that the car remain in Lubumbashi and threatened to fire on the C-141 plane if it attempted to leave with the vehicle. Finally, the car was unloaded from the plane, although the French ripped the wiring from the dashboard to immobolize it and left it on the runway. It is difficult to conceive of a situation where hostilities could have been more imminent without actually breaking out.

During the hearings held by the Subcommittee on International Security in 1975, the chairman gave a precise definition of hostilities as used in the war powers resolution. "Even if there was one artillery piece fired," he said, "that is a hostile action." The committee report clearly indicates that there can be hostilities even if "no shots have been fired," and a logical extension of Chairman Zablocki's sound reasoning is that even if there is just one instance where foreign troops threaten to fire upon members of the U.S. Armed Forces, that constitutes imminent hostilities and requires a report to Congress under section 4(a)(1).

The Legal Adviser of the Department of State gives the impression that U.S. involvement in the operation in Zaire was only slightly more dangerous than a Sunday picnic for members of the U.S. Armed Forces involved. The Secretary of Defense, however, had quite a different view of the seriousness of the situation. The U.S. Army alerted its own crack 82d Airborne Division to be ready to go on a moment's notice if needed. And every tactical airlift wing in the United States sent C-130's and C-141's to Pope Air Force Base to support the 82d Airborne Division. Clearly, the Secretary of Defense thought that hostilities were imminent and was ready to deal with them. One wonders what would have happened if the French and Belgian troops had been unable to rescue the whites and push the rebels out of Kolwezi. Would the 82d have rushed to their aid? Would that have triggered Presidential compliance with the war powers resolution? Would the President have "consulted" with Congress as the parachutes opened over Kolwezi? Would he have sent Congress a report?

To contend that U.S. forces were out of danger simply because they were flying to airports located more than 130 miles from the fighting in Kolwezi is to ignore the decades of strife and violence which have plagued Shaba Province of which this episode was but the latest incident. In 1960, Moise Tshombe etched a gory place in history of Katanga when he unsuccessfully tried to take it out of the Republic of the Congo. Hundreds were slaughtered in the bloody uprising. Today, Tshombe's gendarmes and their sons still carry on the fight, their one goal still secession. The place is also still the same—Katanga Province, now called Shaba.

In July 1967, uprising again flared and President Johnson, under almost identical circumstances to those faced by President Carter, sent three C-130 aircraft piloted by Americans to rescue whites and ferry foreign combat troops around the country to quell the fighting. Our forces never engaged in the fighting and stayed well away from the battlefield. Yet, the reaction to the President's failure to consult with Congress was deafening. Even Senator Richard B. Russell, the President's staunchest ally, publicly excoriated him for his "unjustified intervention in a local disturbance." On August 4, the President announced that due to congressional pressure, he was withdrawing the C-130's and pilots from the Congo, now Zaire. Surely, with this long history of strife in Zaire, and with the intense congressional reaction to the last American intervention, the President could not have doubted the appropriateness and wisdom of reporting to Congress.

President Carter categorically told the Nation that these rebels were Cuban trained and equipped. Can anyone doubt what would have happened if just one of these units came in contact with members of the American Armed Forces bringing in foreign troops, ammunition, and supplies?

When the bloody fighting and slaughter of whites and blacks began in Kolwezi in May of this year, many observers expected it to spread quickly throughout Shaba Province. In fact, the important railroad center of Mutshatsha, located 75 miles to the west, quickly fell to rebel troops. Had the uprising continued to spread as many anticipated, the American troops might well have found themselves in the middle of a seccesionist province, being fired upon by rebels from all sides and fighting for their very lives. It is naive to pretend that imminent hostilities did not face the American military personnel sent to Kamina and Lubumbashi.

PRESIDENT'S FAILURE TO REPORT VIOLATES SECTION 4(a)(2)

Under section 4(a)(2), the President is required to report to Congress—

"In any case in which United States Armed Forces are introduced into the territory, air space, or waters of a foreign nation, while equipped for combat, except for deployments which relate solely to supply, replacement, repair, or training of such forces."

The House committee report states that:

While subsection (1) refers to the commitment of U.S. troops to an area where armed conflict actually is in progress, subsection (2) covers the initial commitment of troops in situations in which there is no actual fighting but some risk, *however small*, of the forces being involved in hostilities. A report would be required any time combat military forces were sent to another nation *to alter or preserve the existing political status quo or to make the U.S. presence felt.*" (Emphasis added.)

It is clear that the situation in Zaire fits the requirements of the House report to a tee. While the stated purpose of the airlift was to protect foreign nationals in Zaire, according to the New York Times—

Administration officials made no effort to conceal that they viewed the operation in

much larger geopolitical terms, connected with concern about Cuban and Soviet activity in Africa and the widespread view in Europe that the United States was showing indecisive leadership of the Western alliance.

Incredibly, the Legal Adviser, in his memorandum of June 16, attempts to escape the reporting requirement of section 4(a)(2) by maintaining that the U.S. Armed Forces were not "equipped for combat." Presumably, because the pilots did not have revolvers strapped to their sides, the Legal Adviser does not believe that they were equipped for combat, even though hundreds of armed combat troops sat in the bellies of their planes on the way to actual combat as soon as the pilots brought the planes down at Kamina. According to the legal adviser's definition, a U.S. soldier driving a tank into a foreign capital would not be considered armed for combat because he did not carry a sidearm.

The relevant question is not whether the U.S. forces are decked out in the full panoply of war with their sabers rattling, but whether they brought into the territory, air space, or waters of a foreign nation the capacity to make war. The hundreds of armed combat troops our pilots brought into Zaire clearly had that capacity and therefore, the pilots must be deemed to have been "equipped for combat" within the meaning of the act. Given the clear purpose of the war powers resolution, to insure consultation between the political branches of the Government whenever any action might result in a risk of war, "however small," it is little more than a subterfuge of the law for the Legal Adviser to interpret "equipped for combat" as he did in his memorandum of June 16.

As Judge Learned Hand observed:

> It is one of the surest indexes of a mature and developed jurisprudence not to make a fortress out of the dictionary; but to remember that statutes always have some purpose or object to accomplish whose sympathetic and imaginative discovery is the surest guide to their meaning.

Or as the noted jurist stated on another occasion:

> Interpretation is the art of proliferating the purpose which is meant to cover many occasions so that it shall be best realized upon the occasion in question.

The Legal Adviser has simply ignored the clear purpose of Congress when it enacted the war powers resolution.

The whole purpose of section 4(a)(2) was to involve Congress in decisions which placed our forces in circumstances where armed conflict may later develop. The theory was that this initial decision may well be as important as a subsequent decision authorizing those forces to continue—or discontinue—their engagement in actual hostilities. Certainly the political, psychological and emotional factors present when the earlier decision is made would be much more conducive to thoughtful, objective deliberation than later when guns are blazing. On the later occasion, our forces and our flag would be under attack. Concern would center on the safety of our forces and the broad—and important—questions of national honor, prestige and influence. At that juncture, the wisdom of our presence could not receive the same dispassionate consideration that would have been possible earlier.

Had the Zairian troops opened fire on our pilots and the C-141 plane sitting on the tarmac at Lubumbashi Airport, all opportunity for a thoughtful consideration of alternatives would have evaporated. Had the uprising in Kolwezi spread throughout Shaba Province and engulfed our pilots and planes in the fighting, our flag would have been under attack and, no doubt, the paratroopers from the 82d Airborne would have flown to the rescue. Section 4(a)(2) was designed to require a Presidential report to Congress before such an eventuality developed. The Legal Adviser seems to be totally oblivious to this history behind the legislation.

The previous Legal Adviser to the Department of State, Monroe Leigh, did not take such a narrow definition of the reporting requirement under section 4(a)(2). In his testimony before the Subcommittee on International Security in 1975, he discussed the circumstances leading up to the triggering of a section 4(a)(2) report:

> All the earlier evacuations from Cambodia, for example, required no such reporting because we were doing it by civilian aircraft—we were not using Armed Forces for that period.

The distinction Mr. Leigh seemed to be drawing was that evacuation by a civilian aircraft did not trigger the reporting requirement, whereas evacuation by armed forces aircraft did.

In fact, the first report filed under the war powers resolution occurred in circumstances quite similar to those faced by the U.S. Armed Forces who flew into Zaire. On April 4, 1975, President Ford submitted a report to Congress under section 4(a)(2) concerning U.S. participation in the refugee evacuation effort at Danang, South Vietnam. The naval rescue vessels sent to Danang were limited to areas where there certainly was less danger of becoming involved in hostilities than faced the U.S. Armed Forces sent to Zaire. The Vietcong were many miles outside the city. Like the present situation, the U.S. action at Danang was part of an international humanitarian relief effort, with other countries participating. As Mr. Leigh told the subcommittee at the 1975 hearings,

> In the Da Nang sealift we were confident that we were not going to be involved in a section 4(a)(1) situation of hostilities, and in fact, the President's orders required that the force avoid any kind of hostilities. We felt certain that that was going to fall under 4(a)(2)...."

The real differences between the evacuations at Danang and in Zaire are: At Danang, U.S. Armed Forces did not make it possible for foreign combat troops to land and engage in fighting as part of the evacuation; and at Danang, there was no threat by foreign troops to fire upon the American ship participating in the evacuation effort. If a section 4(a)(2) report was required by the Danang evacuation, then it certainly was required by the use of U.S. Armed Forces in Zaire.

INTERPRETATION OF SECTION 8(C) IS DISINGENUOUS

Section 8(c) of the war powers resolution states:

> For purposes of this joint resolution, the term "introduction of United States Armed Forces" includes the assignment of members of such Armed Forces to command, coordinate, participate in the movement of, or accompany the regular or irregular military forces of any foreign country or government when such military forces are engaged, or there exists an imminent threat that such forces will become engaged, in hostilities.

The legal adviser's memorandum seeks to avoid the clear implication of section 8(c) that a section 4 report is required by quoting Senator JAVITS to the effect that the former section was intended to prevent secret unauthorized military support activities by U.S. troops. The analysis is somewhat disingenuous, and in any case, Senator JAVITS' remarks do not exhaust the significance of section 8(c). In fact, as the legal adviser well knows, "by traditional canons of interpretation, legislative history is irrelevant to an unambiguous statute." Section 8(c) is unambiguous. The U.S. pilots were members of the U.S. Armed Forces and were assigned to participate in the movement of regular forces of several foreign countries, which military forces in fact became engaged in hostilities. To suggest that the U.S. forces must actually be present when the shooting starts is to ignore the clear letter of the law.

Insisting as the Legal Adviser does that the U.S. troops must be threatened with imminent hostilities not only ignores the clear meaning of section 8(c), but also parses the law in a manner never contemplated by those of us who drafted it. The Legal Adviser insists that since the U.S. pilots flew to Kamina, located more than 100 miles from the site of hostilities—

> The United States forces involved in the airlift did not participate in movement of or accompany the airlifted foreign forces when such military forces [were] engaged, or there exist[ed] an imminent threat that such forces will become engaged in hostilities.

Once again, he insists that because "the Zaire airlift deposited the airlifted foreign forces in secure areas a short distance from a combat zone, the airlift was not brought within the resolution by section 8(c)."

The Legal Adviser's whole argument throughout his memorandum is predicted upon the supposition that the drafters of the resolution imposed an arbitrary 100-mile cutoff point for determining imminent hostilities. One can search the legislative history word by word and find no evidence of such a useless distinction. If the President is to be permitted to disregard the clear intention of the War Powers Act by establishing a 100 mile limitation in this instance, I fully expect to see the day when the next secure staging area will be only 90 miles away from combat. Then 80, then 70—until eventually the President can avoid the War Powers Act as long as the U.S. plane manages to land and take off in one piece. The Legal Adviser might just as well establish an arbitrary time limit of say, 2 hours, to determine whether hostilities

were imminent. He could argue that if the foreign troops waited at least 2 hours before going into combat no war powers report was required by the President. However, if the troops went into combat in less than 2 hours, hostilities would be deemed to be imminent and a report would be required. In fact, it would be interesting to know what the shortest amount of time was between foreign troops landing at Kamina and taking off again for the battlefront at Kolwezi.

PRESIDENT CARTER SHOULD STILL FILE WAR POWER REPORT

I have never approached the implementation of the war powers resolution in a partisan manner. Despite the fact that the President of my party, Richard Nixon, vetoed the resolution, I worked unceasingly to build Republican support to override that veto because I felt that the issue transcended political considerations. I am proud of the role I played, not only in drafting the resolution but in securing its enactment into law.

When hearings were held in 1975 after the first four reports were filed pursuant to section 4, I examined closely the adherence by President Ford to the requirements of the war powers resolution, and where I felt it necessary, I offered constructive criticism.

It is in that spirit that I take the floor today. As the Member of Congress who had the primary responsibility for drafting the reporting requirement of section 4, I am absolutely convinced that President Carter has erred grievously in not reporting to Congress concerning the extent of U.S. involvement in the Zaire airlift. I believe his failure to report is a clear violation of the law, and while I assume it is unintended and the result of poor legal advice, it cannot go unchallenged. If our country learned anything from the long agony of Vietnam, it was the absolute necessity for Congress to assume its constitutional responsibility over decisions which could lead our Nation to war. If we allow the President to ignore the clear intention of section 4 of the war powers resolution and not file a report in this instance, then we repudiate one of the most sacred responsibilities committed to us by the Founding Fathers.

I have stood by President Carter on foreign policy questions which I thought were vital to the future of our country, even though there was partisan advantage to be gained by remaining silent or voting the other way. I find it uncomfortable to stand against him in this situation, the more so because I do not disagree with the ultimate decision he made to send U.S. pilots to Zaire. I feel our participation was in the national interest. But far more important than that decision was his failure to report to Congress on his actions. I hope that he will recognize that a report is still in order and send it to Capitol Hill forthwith.

H. CON. RES. —

Concurrent resolution relating to war powers

Resolved by the House of Representatives (the Senate concurring), that the President of the United States was required by the terms of section 4 of the War Powers Resolution of 1973 (P.L. 93–148) to submit a report to the Speaker of the House of Representatives and the President pro tempore of the Senate concerning the actions of United States Armed Forces in Zaire in May and June of 1978, and the President should submit such report forthwith.

A BILL TO HALT ARBITRARY IRS AUDITS

(Mr. PANETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PANETTA. Mr. Speaker, the bill I am introducing today represents the culmination of a series of events, all of which have been directed at relieving thousands of small business men and women from unfair and inconsistent audit practices which are currently being carried out by the Internal Revenue Service. Recent actions by the Service to reclassify independent contractors in over 14 industries as employees for Federal tax purposes reverses over 30 years of previous tax policy and is in direct conflict with a directive contained in the conference report on the Tax Reform Act of 1976 which specifically called for a halt in arbitrary audit practices.

Originally, I introduced H.R. 12427 to suspend two revenue rulings regarding the tax status of real estate agents since it is obvious that these particular rulings have placed that industry on the brink of financial disaster. As a result of the introduction of my bill, the support of over 60 cosponsors, and the introduction of an identical bill in the Senate by Senator DOLE, the Treasury Department testified before the Senate Finance Committee on July 24 that Revenue Rulings 76–136 and 76–137 were, indeed, unfair to the realtors and that they would be revoked by the IRS.

More recently, I introduced H.R. 13313 to suspend similar audit practices which are causing financial chaos for direct sellers, insurance agents, beauticians, loggers, barbers, and independent service station operators. This bill merely broadens the protection offered by H.R. 12427 so that all independent contractors who have been treated consistently and in good faith as independent contractors cannot have their tax status reversed by treatment of independent contractors cannot have their tax status reversed by new interpretations by the Internal Revenue Service until Congress enacts new legislation which will clarify the tax treatment of independent contractors once and for all.

Today, the Senate Finance Committee approved by a vote of 11 to 1 a bill which is identical to H.R. 13313 but which contains new language defining the good faith test in order to guarantee that in no event will good faith be found if the taxpayer's treatment of an independent contract constituted negligence or fraud. I think it is an important provision and it is for this reason that I am introducing a clean bill at this time.

Hopefully, the revised version of H.R. 12427 and H.R. 13313 will provide the type of interim relief that our business community so desperately needs. While I continue to feel that it is essential that the Congress develop a more comprehensive and long-term solution to this problem, I also feel that it is equally important for the Congress to take action now to correct an inequitable and unfortunate situation which has resulted from inconsistent actions by the Internal Revenue Service.

I direct my proposal to the attention of my colleagues in the House and particularly to those members who are serving on the Ways and Means Committee task force on independent contractors. It is my view that this measure represents a workable solution and one that has the full support of a wide range of self-employed persons.

I would like to point out that the bill is supported by the National Association of Realtors, Direct Selling Association, National Association of Independent Insurers, National Small Business Association, National Home Furnishing Association, American Retail Floor Covering Association, National Association of Hairdressers and Cosmetologists, American Pulpwood Association, Independent Gasoline Association, and a number of independent businesses, large and small.

Mr. Speaker, I include the text of my bill at this point in the RECORD:

H.R. —

A bill relating to the independent contractor status of individuals for employment tax purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

(a) In determining whether an individual is an employee for purposes of chapters 21, 23, and 24 of the Internal Revenue Code of 1954, the Internal Revenue Service shall not apply any changed position or any newly stated position which is inconsistent with a general audit position, a regulation, or a ruling in effect on January 1, 1976.

(b) Notwithstanding subsection (a), an individual shall not be treated as an employee of any person for purposes of chapters 21, 23, and 24 of the Internal Revenue Code of 1954 if such person, in good faith, consistently treated such individual or the class of individuals of which such individual is a member as independent contractors for such purposes. Such person shall be deemed to have acted in good faith if such individual or such class of individuals were treated by such person as independent contractors in reasonable reliance on any of the following:

(1) past Internal Revenue Service audit practice with respect to such person; or

(2) published rulings or judicial precedent; or

(3) recognized practice in the industry of which such person is a member; or

(4) long-standing treatment by such person of such individual or such class of individuals as independent contractors for employment tax purposes:

Provided, That all Federal tax returns (including information returns) required to be filed by such person were filed on a basis consistent with such person's treatment of such individual or such class of individuals as independent contractors. In no event shall such person be deemed to have acted in good faith if the treatment of such individual or such class of individuals as independent contractors would, on the basis of the pertinent facts and circumstances, constitute negligence, intentional disregard of rules and regulations, or fraud within the meaning of section 6653 of the Internal Revenue Code.

(c) The provisions of this Act shall apply in determining the employment status of individuals for (1) all calendar quarters for which, on the date of enactment of this Act, assessment of an underpayment of tax, or refund of an overpayment of tax, under chapters 21, 23, and 24 of the Internal Revenue Code of 1954 is not barred by the operation of any law or rule of law, and (2) for the calendar quarter in which this Act is enacted and for all future calendar quarters until the end of the calendar year in which the Congress enacts a law terminating the future applicability of this Act.

LEGISLATION PERMITTING TAXPAYER TO DEPRECIATE EQUIPMENT ON OPTIONAL DEPRECIATION LIFE RATHER THAN USEFUL LIFE

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. REGULA) is recognized for 5 minutes.

● Mr. REGULA. Mr. Speaker, today I have introduced a bill that would allow the taxpayer to depreciate equipment based on an optional depreciation life rather than necessarily the useful life of the property. The bill would allow after 1982 for a 1-year or more depreciation schedule at the option of the taxpayer. The decision once made would be irrevocable. The bill further provides for a 4-year phase beginning in 1979 to mitigate the 1-year impact of tax collection.

This bill would allow taxpayers greater flexibility in determining what is the most desirable capital recovery for their particular application. Because the bill would allow taxpayers to fix depreciation schedules that would permit a recovery of capital without the errosive impact of inflation, this proposal would fuel a strong boom in capital investment for technological modernization as well as expansion of industrial capacity and the creation of new jobs. In my judgment, it would be helpful in improving the competitive position of American industry.

The second feature of this bill would allow effective January 1, 1979, current expense treatment for Government mandated nonproductive equipment. Since this equipment is required by Government order and does not enhance the capacity or the profitability of any taxpayer, the option of writing this off as a current expense should be available.

Neither of the above provisions in my proposal would affect present investment tax credit law. Therefore, a taxpayer in opting to use a current expense writeoff or an accelerated depreciation schedule would have to weigh the tradeoff of losing the investment tax credit, if the period chosen did not qualify the same for investment tax credit.

Recently William Miller, Chairman of the Federal Reserve Board, testified before the Budget Committee. During the hearing I asked Chairman Miller what he thought the effects of a change in depreciation allowances such as I have outlined above and that are part of the bill I propose would be. His reply was as follows:

The best system on depreciation in the long run would be to leave it optional, as you suggest; write off the assets and do it anytime you want. I would be cautious, however, and remind you if we are going to limit our taxes to $15 billion or $20 billion on January 1, and if only a third of it is going to be allocated to business, we want to be sure that your general thing would be phased in so we wouldn't have too much impact against our budget.

But in principle, I agree with you, and actually once you get over that hurdle of write-off anytime you want, then it is a one-time adjustment, because it is a deferred tax, and you have only deferred the tax; you haven't forgotten it. It works extremely well.

You might want to consider linking that with requiring any public corporation to write off assets for tax purposes, write it off the same way for shareholder purposes, and then you would have a real discipline. And that would be too cruel; it would cause businessmen to act for shareholders like they do for Uncle Sam, and I would be in favor of that, but I am not very popular with my friends when I say that.

The second thing of writeoffs for government mandated: yes, I would think if you are going to have an optional write off period, you could start with a mandated pollution control as a 100-percent available or write it off in 1 year or 20 years, but you can only write it off once. I would take the other and keep it 5 years and look at the flow of cash and see when you can afford to liberalize more.

I also wrote to Chairman Miller requesting his ideas on developing a more effective exports policy for the United States. In a letter dated July 28, 1978, and in response to my original letter, Chairman Miller replied:

We should also take steps to increase capital investment in order to ensure the productivity increases and technological advances that have helped stimulate our export trade in the past. Accelerated depreciation allowances would be the most effective means to achieve this goal in my opinion.

Within the last 20 years, we have seen a steady erosion both in our productivity and in our growth rate in relation to other industrialized nations. I believe one of the major factors in this trend has been the increased cost of governmental requirements of a nonproductive nature and the lack of sufficient investment capital. These trends must be reversed if we are to continue to be competitive in world markets.

Since 1950 the annual growth rate of our economy has been about 3.7 percent whereas many other Western nations have growth rates of about 5.5 percent. From 1949 to 1968 the private nonfarm productivity increases averaged 2.6 percent per year. From 1968 to 1977 productivity increased only 1.4 percent. In part this reflects a reduction in technological advances that would result from enhanced capital investment. Increased productivity is vital to economic growth and the creation of jobs.

If our economy had grown at approximately 5.5 percent, we would today have a $3 trillion economy and at this level it is estimated that personal incomes would be 50 percent higher and Federal revenue would be $2 billion more. With this level of economic activity we in Government would be able to balance the budget and provide substantial tax cuts. This type of a dynamic economy would be the most effective tool to dampen inflation. Fundamentally, inflation results from too much money chasing too few goods and the key to altering that scenario is increased productivity. The bill I propose would be very useful in achieving this objective.●

VETERANS PREFERENCE AND THE CIVIL SERVICE

The SPEAKER. Under a previous order of the House, the gentleman from Connecticut (Mr. SARASIN) is recognized for 15 minutes.

● Mr. SARASIN. Mr. Speaker, in the course of our deliberations on the civil service reform legislation that proposes some significant and substantive changes to the current Federal civil service structure, this House will be faced with the challenge of resolving one of the most difficult, and certainly always controversial, issues—that of veterans' preference.

With the battle ensuing, we can be sure of only one thing—that there will be no clear or easy resolution to this issue engulfed in emotions and competing interests. However, I would like to remind my colleagues that the United States is fortunate in having a military force of outstanding quality—a quality that has been founded upon the expertise, skills, and standards established and continued by those who have served our country for the past decades. These men must not be forgotten amidst the shuffle of current issues and causes, nor should they be denied their just compensation in the name of bureaucratic reform.

Mr. Speaker, the Government, indeed the public, must own up to its obligation and responsibility to repay in some meager way the priceless sacrifice these men and women have given to preserve our freedom and liberty. They have given time, money, health, and even risked death on behalf of their fellow Americans. To curtail the veterans' preference program established in the 1944 act would not only place these dedicated citizens at a disadvantage in the competitive job market, but would deny them their due reward for the great service they have rendered. The program has been successful in helping reintegrate veterans into the job market and in adjusting to civilian life—important needs which demand fulfillment.

Proponents of the reform measures maintain that they are intended to strengthen the position of Vietnam veterans in the Federal job market. However, I have seen statistics which show that by 1987, 6,290,000 Vietnam-era veterans would lose all veterans' preference opportunities currently provided in Federal employment. Very serious consideration to the implications of such action would have to be given, and I implore my colleagues not to act so quickly in an area that has far-reaching impact upon the lives of so many who have given so much.

No one will deny the overwhelming need for constructive reform of our Federal employment structure. For far too long the civil service system has been the object of abuse and inefficiency, at great cost to the taxpayer. However, denying preference to these men and women who have served our country so

well would not necessarily elevate the level of service produced by the Government bureaucracy. In fact, it could possibly do more harm by eliminating individuals who have developed talents and expertise for which the Government is in great need. I urge my colleagues, then, to resist any attempt that would undermine the present system and deny these citizens the opportunities they so deserve.●

LEGISLATION TO ESTABLISH GREAT PRAIRIE LAKES NATIONAL RECREATION AREA

The SPEAKER. Under a previous order of the House, the gentleman from South Dakota (Mr. ABDNOR) is recognized for 5 minutes.

● Mr. ABDNOR. Mr. Speaker, I would like to take a few moments to expound upon a bill I have introduced today to establish the Great Prairie Lakes National Recreation Area in North and South Dakota and Nebraska. Congressman MARK ANDREWS has joined me as a cosponsor of this measure.

The following criteria have been established for the evaluation and selection of areas proposed for congressional designation as national recreation areas in the National Park System:

National Recreation Areas should be located and designed to achieve comparatively heavy recreation use and should usually be located where they can contribute significantly to the recreation needs of urban populations.

National Recreation Areas should provide recreation opportunities significant enough to assure national, as well as regional visitation.

The scale of investment, development, and operational responsibility should be sufficiently high to require either direct Federal involvement or substantial Federal participation to assure optimum public benefit.

Within the National Recreation Area, outdoor recreation is recognized as a primary management purpose; however, such management shall be compatible with the protection of the natural and cultural resources.

In my view the virtually unlimited recreational potential of the huge reservoirs and remaining seminatural stretches of the Missouri River which would be included in the Great Prairie Lakes NRA fully justify congressional action to provide the designation.

Following is a brief historical sketch of the river:

Beginning at Three Forks, Mont., the Missouri River flows south easterly over 2,300 miles to join the Mississippi a few miles north of St. Louis, Mo. It ranks as the second longest and historically one of the most famous rivers in the United States. It was the primary route of Lewis and Clark on their epic journey of exploration. Long before the advent of transcontinental railways, it shared with the Oregon Trail and Santa Fe Trail the distinction of being one of the three main thoroughfares to the Far West, witnessing a cavalcade of fur trappers, missionaries, gold miners, and pioneer settlers. But here, instead of covered wagons, conveyance was by pirogue—a hollowed-out tree—keelboat, and steamboat. It was a wild and unpredictable river that carried millions of tons of freight.

Waters of this mighty river that for centuries ran uncontrolled are now harnessed in the upper and middle reaches by a series of multipurpose dams and reservoirs. In its lower reaches, the Missouri has been further tamed by channelization. The net effect of man's endeavors has been increased opportunities for outdoor recreation, improved flood control, and improved navigation. However, these worthy projects have also eliminated many of the extraordinary esthetic, historic, wildlife, and recreational values associated with the river.

The national recreation river designation will facilitate realization of the increased opportunities for recreation on the Missouri River, while helping to insure protection of the natural and cultural resources of the river as well.

One example of a historic site this legislation would preserve is the "Old Chapel" located at Fort Randall in South Dakota. This historic chapel was an important link in the development of Dakota Territory, being established in 1856, and was extremely important and active during the Indian unrest of the 1860's. It remained active on the frontier until July 1892, when it was abandoned. The chapel housed South Dakota's first library. The site draws many visitors to the area and should be restored before further deterioration takes place on the one remaining structure.

The condition of the Old Chapel calls to mind the final criteria listed above for proposed national recreation river proposals. It bears repeating:

The scale of investment, development, and operational responsibility should be sufficiently high to require either direct Federal involvement or substantial Federal participation to assure optimum public benefit.

This criteria is particularly appropriate to the Missouri River in the Dakotas and Nebraska because the potential for optimal public recreational benefits is so great. At the same time the financial, institutional, and promotional resources of the area are relatively inadequate to develop the potential.

Both the Bureau of Outdoor Recreation—now the Heritage Conservation and Recreation Service—and the Corps of Engineers have developed conceptual proposals for tapping the recreational potential of the river. The BOR proposal met with local opposition due to the need for large land acquisitions.

The corps proposal avoids this objection by limiting acquisitions to those necessary to develop recreational activity nodes, rather than to provide a corridor along the entire several nundred miles of the river. The corps concept would just as effectively develop the recreational potential while limiting the cost and accommodating local wishes.

The following is an excerpt from the corps report detailing the nodal concept and possible development strategies:

This report proposes a nodal concept in lieu of the B.O.R. proposed corridor concept. By identifying the present locations of more intense development, expanding the terminal recreation-type activities and acquiring limited land acquisitions at these points, nodes will be identifiable. These nodes then would be connected by a system of water trails, scenic drives, equestrian trails, etc. From observation of the area encompassed by the proposed N.R.A. study, it becomes apparent we are dealing with an area of great physical magnitude, far beyond the scope of the vacationing public to appreciate on a typical two week vacation. (It is conceded that the region could be toured in two weeks, but only by giving a cursory look to any specific development.) It is logical to predict that the typical vacationer, after prior examination of maps, publicity, etc. would choose to visit the particular area (or node) offering the activities of his particular interest. Having chosen a particular node to visit, it is further logical to predict he might partake of one-day excursions or circle-tours, visiting points of interest in the general vicinity. This is the nodal concept in practice.

Development of the nodes will be of infinite variety. Each existing node will be carefully examined to determine its particular appeal. Research will be conducted into ways to develop and expand that appeal. Development potential runs the entire spectrum of possibility from urban riverfront development potential at Bismarck-Mandan, North Dakota, to wilderness experiences on the Little Missouri arm of Lake Sakakawea; from slack-water boating on the various lakes to river float trips between lakes; from historical Indian pageants to government-sponsored interpretive centers and from camping developments to commercial housing and supporting activities. Each node should be developed in a way to best express its potential. All development would be primarily "terminal" in nature; that is, aimed at being the recreation destination of the user, as opposed to overnight transient-type facilities. This is not to say the transient user should be discouraged, however, in most instances the user can readily avail himself of terminal type facilities and adapt the use of these facilities to his needs.

At each node it is expected that there will be recreation potential and historical interest within a days drive. One day "circle" tours, either of a self-guided or commercial nature should be explored and developed.

Between nodes, opportunity exists for development of a variety of trails. Trails would provide opportunity for use of motorized recreation vehicles, professionally guided horseback trail rides and pack trips, narrow-gauge railroad trips, lake steamer, and (wild) river float and canoe trips. Also, signing of new and existing roadways.

My bill is designed to implement the nodal concept as set forth in the corps' report:

H.R. —

A bill to establish the Great Prairie Lakes National Recreation Area in the States of South Dakota, North Dakota, and Nebraska, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) That there is hereby established the Great Prairie Lakes National Recreation Area in the States of South Dakota, North Dakota, and Nebraska, to be administered by the Secretary of the Army (hereinafter referred to as the "Secretary"), acting through the Chief of Engineers, in a manner coordinating with the purposes, development, operation, and maintenance of open stretches of the Missouri River between Sioux City, Iowa, and Garrison Dam, Lewis and Clark Lake, Lake Francis Case, Lake Sharpe, Lake Oahe, and Lake Sakakawea, as

authorized by the Flood Control Act of 1944 (58 Stat. 884), and any amendments thereto, as integral units of a general comprehensive water resource development plan for the Missouri River Basin, all in order—

(1) to further the purposes for which the aforesaid lakes were created;

(2) to provide for enhanced public outdoor recreation use and enjoyment of such waters and adjacent lands by the people of the United States; and

(3) to facilitate the preservation of the scenic, scientific, environmental, cultural, and historic features contributing to public enjoyment of such waters and lands.

(b) The national recreation area shall consist of the lands, waters, and interests therein acquired or controlled by the United States for the above lakes pursuant to the Flood Control Act of 1944 (58 Stat. 884), as amended and those portions of the Missouri River below ordinary high water between Sioux City, Iowa, and Gavins Point Dam, Niobrara, Nebraska, and Fort Randall Dam and Bismark, North Dakota, and Garrison Dam.

SEC. 2. (a) The Secretary shall administer, protect, and develop the Great Prairie Lakes National Recreation Area under such rules and regulations as he may deem necessary to carry out the purposes of this Act. In such administration, the Secretary shall adopt and implement, and may from time to time revise, a land and water use management plan, which shall include specific provision for—

(1) purposes of the water resource projects as authorized by the Flood Control Act of 1944 (58 Stat. 884), as amended;

(3) public outdoor recreation activities;

(3) development, preservation, and protection of the scenic, scientific, environmental, cultural, and historic features contributing to public enjoyment; and

(4) such utilization of natural resources that does not destroy or impair the recreational opportunities nor diminish the environmental values present.

(b) The Secretary shall permit hunting and fishing on lands and waters under his jurisdiction within the national recreation area in accordance with the appropriate Federal and State laws, to the extent applicable, except that he may designate zones where no hunting or fishing shall be permited or hunting or fishing shall be limited to specific periods of time for reasons of public safety, administration, fish or wildlife management, or public use and enjoyment. Except in emergencies, any regulations prescribing any such restrictions shall be put into effect only after consultation with the appropriate State agency responsible for hunting and fishing activities.

(c) Designated Department of the Army employees of the national recreation area may issue citations for violations of any Federal laws or regulations applicable to the area causing the accused to be brought before the nearest magistrate, judge, or court of the United States having jurisdiction in the premises. Any person who violates a rule or regulation issued pursuant to this Act shall be guilty of a misdemeanor, and may be punished by a fine of not more than $500, or by imprisonment not exceeding six months, or by both such fine and imprisonment.

SEC. 3. Nothing in this Act shall be construed to deprive any State, a political subdivision thereof, or an Indian tribe, of its right to exercise civil and criminal jurisdiction over lands and waters within the Great Prairie Lakes National Recreation Area or its right to tax persons, corporations, franchises, or property on the lands and waters included in the national recreation area.

SEC. 4. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

This legislation has the support of the Great Lakes of South Dakota Association, and it was endorsed by the 47th session of the South Dakota Legislature (House Concurrent Resolution 506).

The director of the North Dakota Parks and Recreation Department has also expressed his support. His recent letter said, in part:

I urge your continued strong support of the Prairie Lake National Recreation Area Bill, which would improve the recreational facility currently available on Lake Sakakawea. At the present time, the only marina development readily possible on the lake is through the North Dakota Parks and Recreation Department. While we have been able to provide limited marina facilities, there is constant demand for additional dock and marina space which we cannot possibly supply to the maximum. Consequently, it would be of great help if the federal government would assume a portion of this responsibility. As you know, this area is in the center of our coal impact region, which indicates that the federal government should assist in providing recreational opportunities for the great influx of people serving the coal development effort.

Again, the recreational potential is great, and I urge enactment of this measure to designate the Great Prairie Lakes National Recreation Area so that the potential can be realized.●

COMMITTEE ON WAYS AND MEANS SUBCOMMITTEE ACTION ON AMENDMENTS TO THE MEDICARE PROGRAM

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI) is recognized for 30 minutes.

● Mr. ROSTENKOWSKI. Mr. Speaker, on Wednesday, August 8, the Subcommittee on Health of the Committee on Ways and Means completed action on various amendments to the Social Security Act and reported two bills to the full Ways and Means Committee for further action. The subcommittee agreed to the following provisions relating only to the medicare program:

1. HOME HEALTH

The medicare home health benefit would be liberalized in the following manner: unlimited visits would be available under both parts A and B; the present three-day prior hospitalization requirement under part A would be eliminated; home health benefits under part B would no longer be subject to the $60 deductible; and the present requirement that proprietary home health agencies be licensed under state law in order to participate in medicare would be eliminated.

In addition, the Secretary of HEW would be provided authority to establish additional standards and reimbursement guidelines for the effective administration of the home health benefit; home health aides would be required to complete an appropriate training program; and the Secretary would be directed to designate regional intermediaries for home health agencies.

2. ELIMINATION OF SECOND WAITING PERIOD FOR REENTITLED DISABILITY BENEFICIARIES

Entitlement to medicare benefits would be provided for individuals who have been entitled to disability payments for a total of 24 months, regardless of whether those 24 months were consecutive. In that way, an individual who has satisfied the 24-month requirement and attempts unsuccessfully to return to work would be immediately entitled to medicare benefits.

3. RECIPROCAL AGREEMENTS FOR MEDICARE COVERAGE OUTSIDE THE UNITED STATES

The President would be authorized to enter into agreements with other countries to provide hospital and medical benefits to medicare beneficiaries living or traveling outside the United States.

4. DENTISTS' SERVICES

Services performed by dentists would be covered if the same services would be covered if furnished by physicians under present law. Also, hospital stays for the performance of a noncovered dental service would be covered where the severity of the dental procedure warrants hospitalization.

5. TREATMENT FOR PLANTAR WARTS

The present exclusion of services related to treatment of plantar warts (warts on the feet) would be eliminated.

6. COMMUNITY MENTAL HEALTH CENTERS

Services provided in community mental health centers would be reimbursed on the basis of the reasonable cost incurred in providing the covered services. A total of ten outpatient visits per year would be covered and up to 60 days of partial hospitalization. Beneficiaries would exchange one day of hospital coverage (including one day of their 190-day lifetime limit on inpatient psychiatric hospitalization) for every four days of partial hospitalization in a community mental health center. The provision also covers the charges for services rendered by a licensed clinical psychologist in an inpatient setting.

7. OPTOMETRISTS' SERVICES

Services furnished by optometrists in connection with treatment of aphakic patients (patients without the natural lens of the eye) would be covered. Also, the Secretary would be directed to report to Congress within nine months as to specific legislative recommendations for implementing coverage for services furnished by optometrists for treatment of cataracts.

8. DEMONSTRATION PROJECTS FOR HOSPICE SERVICES

The Secretary would be directed to conduct a demonstration project to acquire necessary information and data with respect to reimbursement for hospice services under medicare.

9. AMBULANCE SERVICES

Coverage for transportation services would be expanded to include transportation to a more distant hospital where the nearer hospital does not have appropriate medical staff. Transportation to outpatient radiological facilities would also be covered.

10. STUDY OF COVERAGE FOR ORTHOPEDIC SHOES

The Secretary would be required to study and submit legislative recommendations to the Congress with respect to the coverage of orthopedic shoes where such shoes are required as an appropriate part of medical treatment.

11. COVERAGE OF ANTIGENS

Medicare payment would be authorized to an allergist for the preparation of antigens forwarded to another physician for administration.

12. PAYMENT FOR NONCOVERED SERVICES WHERE BENEFICIARY IS NOT AT FAULT

The Secretary would be authorized to make payment where a medicare beneficiary who medically required a higher level of care was erroneously placed in a distinct part of an institution designed to offer a lower level of care.

13. CHIROPRACTORS' SERVICES

The requirement for chiropractic coverage that a subluxation be demonstrated to exist

could be satisfied either through x-ray or other clinical findings. Neither the x-ray nor other clinical procedures used by the chiropractor would be covered.

14. COMPREHENSIVE OUTPATIENT REHABILITATION

Certain comprehensive outpatient rehabilitation centers would be recognized as providing a program of diagnostic and therapeutic services to outpatients and which must meet specified requirements.

15. FLEXIBLE STANDARDS FOR RURAL HOSPITALS

Flexibility would be authorized in the application of medicare standards to rural hospitals to take into account the availability of qualified technical personnel, the scope of services furnished, and the economic impact of structural standards which if rigidly applied would result in unreasonable financial hardship for a rural hospital; but only to the extent that such differential application of the standards does not jeopardize or adversely affect the health and safety of patients.

16. ROLE OF PODIATRISTS IN CERTIFICATION AND UTILIZATION REVIEW

Podiatrists, acting within the scope of their practice, would be recognized by medicare for purposes of physician certification and participation as physicians in utilization review. This recognization would be extended where consistent with state law and the policies of the health care institutions involved.

17. REPEAL OF PHYSICIAN PLAN OF TREATMENT REQUIREMENT FOR SPEECH PATHOLOGY

The existing medicare requirement that a physician establish a detailed plan of treatment for speech pathology services would be repealed.

18. PAYMENT FOR PHYSICIANS' SERVICES WHERE BENEFICIARY HAS DIED

Medicare reimbursement for physicians' services rendered to a medicare patient before his death would be authorized, on the basis of an unpaid bill, to an individual who has assumed the legal obligation to pay for the physician's services.

19. REPEAL OF PRESUMED COVERAGE PROVISIONS

Existing medicare provisions authorizing, by type of diagnosis, presumed periods of coverage for skilled nursing facility and home health services would be repealed. Protection against retroactive denials would continue to be afforded by general waiver of liability provisions, which would be retained.

20. REPEAL OF LOWER OF COSTS OR CHARGES PROVISION

The existing provisions of medicare law that limit reimbursement to the customary charges of a provider of services where these charges are lower than reasonable costs would be repealed.

21. LIMIT ON PREMIUM INCREASES DUE TO LATE ENROLLMENT

The existing provisions that require premiums for medicare part B (and for optional part A coverage) to be increased by ten percent for each year the beneficiary could have been but was not enrolled would be modified by limiting the premium increase to a maximum of 30 percent.

22. REPEAL OF EXISTING LIMITATIONS ON ENROLLMENT IN PART B

The provision of existing law that permits an individual to reenroll in medicare part B only once would be repealed.

23. EFFECT OF PART B COINSURANCE ON PROVIDER REIMBURSEMENT

Medicare reimbursement to providers of services under part B would be based on reasonable cost minus the coinsurance amounts charged beneficiaries by the provider. (Under existing law, medicare pays 80 percent of the reasonable cost, and providers charge coinsurance equal to 20 percent of the customary charge; these amounts which are determined without reference to each other, sometimes result in a provider receiving in excess of 100 percent of reasonable cost.)

24. RESIDENCE IN AN INSTITUTION AND ITS EFFECT ON COVERAGE OF DURABLE MEDICAL EQUIPMENT AND SPELL OF ILLNESS

The Secretary would be directed to devise and apply a more discriminating interpretation of existing law in order to avoid inappropriately denying coverage for durable medical equipment to beneficiaries living in residential institutions. The Secretary would also be directed to study and report on possible solutions to the predicament of beneficiaries who exhaust their benefits because they are unable to start a new spell of illness as long as they are residing in an institution that provides some skilled nursing care.

These provisions were incorporated in H.R. 13097 and the bill was reported to the full Committee.

The Subcommittee agreed to the following provisions relating to *both the medicare and medicaid* programs:

1. NONPHYSICAN MEMBERSHIP ON NATIONAL PROFESSIONAL STANDARDS REVIEW COUNCIL

The membership of the National Council would be expanded to include a dentist, a registered professional nurse, and one other nonphysician health professional.

2. ADVISORY COMMITTEE TO THE NATIONAL PROFESSIONAL STANDARDS REVIEW COUNCIL

An advisory committee to the National Council, composed of nonphysician health practitioners, would be created.

3. REGISTERED NURSE AND DENTIST MEMBERSHIP ON STATEWIDE COUNCIL ADVISORY GROUP

At least one registered professional nurse and one dentist would have to be included in the membership of the advisory group to each Statewide PSRO Council.

4. EXPANDED MEMBERSHIP OF LOCAL PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

Each local PSRO would be authorized to offer membership, at its own option, to those nonphysician health practitioners who hold independent hospital admitting privileges.

5. HOSPITAL PROVIDERS OF LONG-TERM CARE SERVICES ("SWING BEDS")

The Secretary would be authorized to enter into agreements with hospitals, for the purposes of reimbursement under the medicare and medicaid programs, under which inpatient hospital facilities could be used to provide post-hospital extended care services in certain circumstances.

6. COORDINATED AUDITS UNDER THE SOCIAL SECURITY PROGRAM

Common audits of entities participating in programs under titles V, XVIII, and XIX of the Social Security Act would be required.

These provisions were agreed to and included in H.R. 13817.●

THE 20TH OBSERVANCE OF CAPTIVE NATIONS WEEK MADE ITS ANNUAL IMPACT

The SPEAKER. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 5 minutes.

● Mr. FLOOD. Mr. Speaker, nearly 20 years ago our Congress passed the Captive Nations Week Resolution, which President Eisenhower signed into Public Law 86-90. The captive nations ideology, based on this law, is even more vibrant and applicable today than it was then. As Moscow well knows. This ideological structure accommodates with perspective every seemingly new Soviet Russian thrust, whether in Asia, the Mideast, Africa, or Latin America. Put simply, it relates every new thrust to the long background of Soviet Russian aggression, going back to 1920. The persistent reminder irks the Soviet Russian strategists to no end, and the documented record shows this plainly.

In this continuing report of the recent Captive Nations Week—indeed, is the spirit of Public Law 86-90—I bring to the attention of my colleagues these further examples of the 20th observance impact: First, the proclamation by Governor Dixie Lee Ray of Washington and that issued by Mayor Phillip L. Isenberg of Sacramento; second a report in the July 14 San Diego Union; third, a letter in the July 16 Boston Herald American; fourth, the report and editorial in the China Post, July 20; and fifth, the article by Dr. Lev E. Dobriansky of Georgetown University, "Captive Nations Week and Mock Trials".

A PROCLAMATION BY THE GOVERNOR

Whereas, the imperialistic politics of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czechoslovakia, Latvia, Estonia, Byelorussia, Romania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Serbia, Croatia, Slovenia, Tibet, Cossackia, Turkestan, North Vietnam, Cuba, Cambodia, South Vietnam, Laos and others; and

Whereas, the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas, the freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas, the Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week of July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies and activities; expressing their sympathy with and support for the just aspirations of the captive nations.

Now, therefore, I, Dixy Lee Ray, Governor of the State of Washington, do hereby proclaim the week of July 16-22, 1978, as Captive Nations Week in Washington, and call upon our citizens to join with others in observing this week by offering prayers and dedicating their efforts for the peaceful liberation of oppressed and subjugated peoples all over the world.

DIXY LEE RAY,
Governor.

PROCLAMATION ISSUED BY THE MAYOR, CITY OF SACRAMENTO

CAPTIVE NATIONS WEEK

Whereas, the desire for liberty and independence by the overwhelming majority of peoples in conquered nations is obvious; and

Whereas, the freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas, the Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies and activities; expressing their sympathy with and support for the just aspirations of the captive nations;

Now, therefore, I, Phillip L. Isenberg, Mayor of the City of Sacramento, do hereby proclaim the week of July 16-22, 1978, as CAPTIVE NATIONS WEEK in the City of Sacramento, and call upon our citizens to join with others in observing this week by offering prayers and dedicating their efforts for the peaceful liberation of oppressed and subjugated peoples all over the world.

PHILLIP L. ISENBERG,
Mayor.

[From the San Diego, (Calif.) Union, July 14, 1978]

FREEDOM FIGHT FETED

WASHINGTON (UPI)—President Carter has set aside the week beginning Sunday as Captive Nations Week and invited Americans to renew their dedication "to the cause of all people who seek freedom, independence and basic human rights."

[Boston (Mass.) Herald American, July 16, 1978]

CAPTIVE NATIONS WEEK JULY 16-22

The third week of July is Captive Nations Week. And with the liberal push for recognition of Red China, I think we ought to examine the track record of the Communists in eastern Asia.

China—According to Dr. Richard L. Walker, the Chicoms killed 64 million people in the 1949 revolution. During the Red Guard purges ten years ago, an estimated 700,000 went before the firing squads. Add another 10,000 for the recent Gang of Four purge. The killing continues today, almost 30 years after the revolution. The Taiwanese news agency GPI reported in June that nine people were assassinated for "political crimes" at Nanan and Yungchun in March and April.

Cambodia—When the Reds took over here in 1975, they massacred approximately 1.7 million people. In February 1977, concerned about plots against their regime, the Angka Loeu "instigated a ferocious wave of purges," according to author John Barron. The most notorious of these was the Kompong Nong massacre in September 1977, in which 20 hospital patients were bludgeoned to death.

Vietnam—The massacre following the fall of Saigon in 1975 was short but bloody. The CIA estimated that around 200,000 were killed during the Red takeover. On China Beach alone (Da Nang), 90,000 died. Their remains were photographed from the air. Vietnam refugees later reported other mass murders, such as the 300 people executed at Ban Me Thuot.

Laos—No statistics are yet available, but 110,000 Laotians have fled to Thailand since the Pathet Lao took over in December 19. That's seven percent of the population, a bigger exodus than Cuba.

And let's not forget the 34,000 Americans killed by the Chicom in Korea and the 55,000 Americans slain by the Southeast Asian Reds.

Asian Communists hold the all-time record for mass murder. None of their regimes should ever be given diplomatic recognition.

JOSEPH TRAINOR.

ATTLEBORO.

Another annual Captive Nations Week is coming (July 16-22), the 20th since it was originally proclaimed by President Eisenhower back in the summer of '59.

Since last year's Captive Nations Week, the Soviet sphere of influence has expanded further into Africa, Western Europe and even in our own hemisphere. The Big Red Machine rolls on with one goal in mind.

Leonard Brezhnev knows it. V. I. Lenin and Joe Stalin knew it. The Soviets want the ability to exert their will wherever they need to or want. They are, and always have been, imperialists of the first order.

There are some who think Captive Nations Week should be forgotten or given just lip-service. I disagree.

This week embodies an idea rooted in the very beginnings of the American Revolution: Individual liberty. When the rights of some are denied or endangered, the rights of all are threatened.

I only hope that the Carter administration's double standard comes to a swift halt. We, as a free people, cannot have two sets of standards. One for pro-Communist dictatorships and one for anti-Communist ones.

We cannot expect any less from Cuba than we do from Chile. We can no more excuse Great Britain's role in Northern Ireland than we can the Soviet occupation of the Baltic States.

Someday national self-determination will prevail in all countries run by dictators. No amount of force can forever hold back our natural urge for freedom and dignity.

So, during this Captive Nations Week let us remember the courage and patriotism of all the captive people of the world.

People everywhere ought to be free to choose their leaders and not have totalitarian or authoritarian regimes foisted on them.

SAL GIARRATANI.

CHARLESTOWN.

[From the China Post, July 20, 1978]

CONGRESSMAN BACKS MILITARY OPTION AGAINST REDS

U.S. Representative John Ashbrook told the free world yesterday military measures should be taken if necessary in the "war" against the Communists.

In his keynote speech to some 2,000 participants in a lecture at the Taipei City Hall to mark the 1978 Captive Nations Week, the U.S. Representative said he would suspend any economic or political support for the Communist nations.

He warned that "any help to the Communists will hurt the interests of the free world."

He asked: "Why should we (the free world) change in giving up our defense and beliefs while the Communists are still using their same old tricks as some 25 years ago.

He noted that the majority of the American people and members of Congress support the Republic of China.

John Milan Ashbrook of Ohio, was a graduate of Harvard University in 1952, and a former member of the Ohio General Assembly.

He was elected to Congress in 1960.

[From the China Post, July 20, 1978]

RALLYING CRY AGAINST COMMUNISM

Many visitors attending the Captive Nations week observance have spoken against Communism in general and Communist enslaving of countless captive people in particular.

One of the speakers at Tuesday's gatherings, Bertrand Motte, chairman of the National Center of Independents and Farmers of France, pointed out that even though Communism is different in the East and West, to eliminate the Communists is the common goal of the free world.

Motte also warned the European nations not to ignore the threat of Euro-Communists whose goal, like all the Communists, is to gain political power, eliminate democracy and overthrow democratic governments.

The French political leader's views deserve special attention in preventing any misconception about Euro-Communism. For even though Euro-Communist leaders professed their differences with Moscow, they remain Communist conspirations aimed at destroying western democracies and Communizing the world. It would be fatal, therefore, to consider Euro-Communism any less harmful or dangerous than Communism of other brands such as Titoism or Maoism besides Soviet Communism.

The saying that only a dead Communist is a good Communist remains true in this respect. Free people everywhere must not resort to any wishful thinking in dealing with Communists of any brand hoping that they may be different from Soviet or Chinese Communists or Titoists. They are all equally dangerous and vicious in carrying out their final objectives.

The only way to deal with them is to wage an uncompromising struggle against them. In this respect, Motte paid a glowing tribute to "the war against Communism waged by the Republic of China" saying that it is "a model of the free world standing firm with no compromise". He said also that the Republic of China is a great anti-Communist nation and its presence could not be denied.

In this respect the Captive Nations week observance in the Republic of China provides a convincing proof that our dedication to the anti-Communist struggle may serve as an example to all free nations who are caught in the same situation of confronting a Communist threat. The people of the Republic of China are truly united and determined in opposing Communism and defending our freedom and democracy. We do so because we have suffered from the Chinese Communist conspiracy and aggression more than any other people of the free nations. Free people must not overlook the rallying cry of the French visitor against Communism.

FREEDOM-FIGHTERS' DECLARATION

At the Captive Nations week Freedom Fighters Forum, a ringing declaration was issued by a group of freedom fighters to reiterate their "determination to fight on unceasingly for the freedom of all Chinese and the future of all mankind".

The forum was attended by more than 250 persons including many freedom fighters recently arrived at the anti-Communist bastion of the Republic of China. They told their heartbreaking stories of their heroic escapes from the Chinese mainland at the risk of their lives. They also answered questions posed by foreign visitors who came to attend the Captive Nations Week observance.

In the declaration, they professed puzzlement in finding certain phenomena after reaching the free world. One is that "People who have all along lived in free areas do not know how painful it is to be without freedom and dignity". Many of them, they noted, feel the world is insecure and dare not think what may happen in the days ahead. They also noted that many politicians on the political stage of the world are playing with fire. Their specialty is appeasement, the declaration said. They are "mortally risking the future" and "are thus pushing mankind into an abyss of restlessness, facing the danger of wars that will be crueler than

ever and may bring a total holocaust", the declaration added. Their outcries against further appeasement should be heeded.

[From the America (Phila., Pa.) July 27, 1978]

CAPTIVE NATIONS WEEK AND MOCK TRIALS

(By Lev E. Dobriansky)

The mock trials of leading human rights activists in the Soviet Union have drawn vehement protests from all over the world.

In May 1976, Dr. Yuri Orlov formed in Moscow a group to monitor Soviet compliance with the Helsinki accords. The Helsinki Watch Group was quickly joined by similar citizens' groups in Ukraine, Lithuania, Georgia and Armenia. Founders of the groups have ever since undergone savage repression. The Kremlin's suppression drive climaxed in recent weeks with the use of phony charges to convict Orlov, Vladimir Slepack, Zviad Gamsakhurdia and others, and the harassment of American newspapermen who have refused to disseminate Soviet slanders.

DOWN WITH COMMUNISM

Members of the U.S. Congress have urged the Carter administration to express "in the strongest terms the opposition of the United States to the imprisonment of members of the Helsinki Watch group." Prominent U.S. scientists, including three Nobel laureats, boycotted a scientific meeting in the Soviet Union while the largest U.S. organization of computer sciences discontinued its cooperation with Moscow.

British Prime Minister Callaghan voiced his government's "abhorrence at the show trials." Norway stated that the sentences "contradicted Soviet promises and declarations."

Even Communist parties in Europe were unable to conceal their disgust. The Spanish Communist party expressed "our condemnation," while its British counterpart called on Moscow "to rescind the sentences." *L'Humanite*, the French Communist party's organ, termed the crackdown "unacceptable." An official newspaper in Tirana, Albania, disclosed that hundreds of thousands in Georgia and Lithuania have staged demonstrations against Moscow's repression of dissidents and intensified process of Russification.

Yet, the most significant protest came from usually hardline Communist Bulgaria. In Sofia, a flag reading "Down With Communism" was flown from a roof in the heavily-guarded city center and leaflets carrying the same slogan were scattered on the crowd.

YOU ARE NOT ALONE

This past January, Sen. Henry M. Jackson (D-Wash.) told the relatives of Andrei Sakharov, Anatoly Shcharansky and Vladimir Slepack at a Washington, D.C., human rights meeting, "You are not alone."

In October 1976, Democratic Presidential candidate Jimmy Carter sent Slepack a telegram, "I want you to know of my deep personal interest in the treatment that you and your colleagues receive." As a President, Carter personally defended physicist Scharansky against Soviet charges. Carter also wrote in a personal letter to Nobel laureate Sakharov, "We shall use our good offices to seek the release of prisoners of conscience."

Now Orlov is alone in a Soviet cell. So is Slepack. So is Gamsakhurdia. The untrials of Scharansky and Ginsburg held on the eye of Captive Nations Week have triggered a new wave of awareness and indignation. This kind of timing is by no means new for the annual observance of the Week.

Sakharov has predicted that Moscow's travesty of justice was a "test of the resolve of the West to insist on the fulfillment of the principles proclaimed at Helsinki."

The other day, Radio Moscow trumpeted that "a suitable riposte was given to the actions of the U.S. which speculates on the human rights issue" and that "other future actions will be met with a similar fate."

The die has been cast. Captive Nations Week is a redeeming opportunity for the Carter administration to redefine and reassert its human rights policy.

CHICAGO'S PIONEER MORTGAGE POOL IS A GREAT SUCCESS

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, interest rates on home mortgages are now at the highest point ever recorded. Couple interest rates with the spiraling cost of housing, and the price of buying a home is out of the grasp for most young middle-class couples.

But, for an estimated 2,500 Chicago residents the dream of homeownership is becoming a reality. These residents will be financing their homes at an interest rate of 7.9 percent, a full 2 percentage points lower than the going interest rate on a home mortgage in Chicago.

These residents are getting their low-interest loans through Chicago Mayor Michael A. Bilandic's new mortgage pool plan for middle-income home buyers. The plan provides for low-interest home mortgages of up to $80,000 for middle-class families with incomes of $40,000 or less. Under the program, which is being financed through the sale of $100 million in tax-exempt municipal bonds, interest rates are 7.9 percent for the homes purchased through the pool. This 2-percent difference in interest rates translates into a savings of $100 a month in mortgage payments for persons financing a $60,000 home.

Chicago's pioneer program won quick acceptance in the money market. The full issue of bonds sold out on the first day of the offering. The bonds will be secured by the properties themselves and by private life insurance policies. The securities are not an obligation of the city and in no way endanger the city's creditworthiness.

This novel use of tax-exempt bond financing could be the forerunner of many similar programs, both in Chicago and around the Nation. In the initial stage, First Federal Savings and Loan, Chicago's largest thrift institution, is processing all the mortgage loans. But, several other large S & L's in the city have expressed great interest in the plan. Immediately after the city council approved the original program on July 7, four other large S & L's in Chicago asked to set up mortgage pools totaling $310 million.

Mr. Speaker, this loan plan is one of the few existing programs that adequately addresses the problems of the middle class' struggle to afford the high costs of city living. I commend Mayor Bilandic for his efforts in designing the plan.

On August 8, the Chicago Tribune featured an article about three Chicago families that are buying homes under the loan plan. I would like to submit the article for the RECORD:

[From the Chicago Tribune, Aug. 8, 1978]

AMERICAN DREAM: BLESS THIS HOUSE, O BANK, WE PRAY

(By Ann Marie Lipinski)

Margaret Tader doesn't usually visit the Loop in her pajamas, but on the morning First Federal Savings & Loan Association of Chicago opened its doors to applicants for the city's mortgage loan program, she made an exception.

"I'll never forget it," she said. "My husband called and said, 'Honey, I just read in the paper that they're taking applications today. Go.' 'You mean right away?' I asked. 'Right away,' he said.

"I was hardly dressed for the occasion, but we'd been waiting so long for that day that I wasn't about to waste time changing. I grabbed the kids, threw on a coat over my pajamas, and raced out in the pouring rain. Even when I got to First Federal and was filling out the application, I still couldn't believe the whole thing was real. To this day, it seems like a dream."

Indeed, it is a dream, the American Dream, fed by Jay Gatsby and his West Egg manse, by magazine advertisements for white rum featuring super thin couples on the green-blue lawns of their country estates, by television shows where cavernous, antiqued living rooms appear a prerequisite to good family conversation.

"You turn on the TV," mortgage applicant James McGuffage said, "and see that even Laverne and Shirley have a nicer and bigger apartment than you do. No wonder Americans have dream-like expectations."

If there was ever any concern for the health of the American Dream, it has been quashed by the city's recent experiment in home mortgage loans. To see the crowds in First Federal offices during the last several weeks, one would have thought the savings and loan was giving away money. Nearly 2,400 applicants flocked to First Federal asking for a piece of the $100 million the city is making available for home mortgage loans.

Some seek a house as their hedge against inflation, others ask nothing more than the back yard forgotten in apartment house blueprints. But if there is a common sentiment among the home seekers, it is their desire to possess. "People need that security of owning property," McGuffage said. "'Bury me in my own back yard'—that's the American Dream."

Although the conversion from monthly rental payments to monthly mortgage payments will prove a financial burden to many of the home-loan applicants, it is a hardship they are willing to bear.

"We are going to be on a budget like you wouldn't believe," Mrs. Tader said. "But we felt if we didn't go ahead and buy now, we never would."

"In many ways, we felt forced into buying," said her husband, William. "Every year at tax time we wondered what we did with all our money, and we realized we didn't have anything to call our own. Nothing we had was increasing in value at the same rate that inflation was increasing.

"We wanted a house, but couldn't afford the standard 10 per cent mortgage rate. So when the city and First Federal offered this rate (7.9 per cent) we felt we had no choice but to buy now or be stuck in this apartment forever."

"It's true," Mrs. Tader agreed. "As excited as we are above having our own home, the state of the economy has really taken that deciding factor away from us and that is very depressing."

Depressing as it may be, the compulsion to flee their two-bedroom apartment on West Nelson Street and buy their own home is strong enough so that the Taders are willing to forego frequent trips to McDonald's and annual vacations in order to squirrel away the funds to pay off a $50,000 mortgage.

"We're chucking out all the frills," Mrs. Tader said. "That includes my adult education classes, Bill's photography expenses, lavish gifts, and dinners out. Bill will only take pictures once in a while, I'm making my own presents, and we're eating a lot of PB&J. It's just like you read in the women's magazines," she said. "'How I support my family on $2 a month.'"

The Tader regimen also includes a part-time job for Mrs. Tader. The former school teacher recently took work checking and billing at a nearby Jewel to supplement her husband's income as a broker for a plastics firm.

"I had no choice," she said. "It's an expensive world we live in."

In fact, the spirit of conservation became so feverish in the Tader household once they decided to purchase a $62,000 two-flat, that their six-year-old daughter, Becky, offered to "take in washing to help out."

"I didn't know whether to laugh or cry," Mrs. Tader said.

Robert Mitchell knows what to do. He's crying. He applied for the cut-rate mortgage loan in early July and was told by a First Federal official that he would almost certainly receive the loan money in time for his closing date in early August. But Mitchell (not his real name) found out two weeks ago that the loan money would not be available until mid-to-late August, "and it makes my blood boil."

"I'm a policeman, my wife's a teacher, so we're definitely middle class," Mitchell said. "As middle-class home buyers, we would obviously have liked to pay $450 a month on an 8 per cent mortgage, as opposed to the $560 we're going to have to pay now on 10 per cent. I can't tell you how depressing it is. Here we thought we'd be saving ourselves by buying now, and it turns out we're killing ourselves."

The city and First Federal required that applicants already have a home in mind when they requested the mortgage loan. When the Mitchells found a home, the owners, who were in a hurry to move out, set the closing date for early August.

The Mitchells explained their predicament to First Federal officials when they applied for a mortgage, and were told that a rush would be put on their application. They found out recently, however, that approval would come too late.

"We would have dropped the contract and tried to find another house so we could take advantage of the low mortgage rate," Mitchell said, "but the cost of housing gets more expensive by the day. By the time we found something livable we might have ended up paying $71,000 instead of the $61,000 we're paying for a home now."

Housing has become more expensive by the day. In the year ended in May, the dollar value of homes sold in Cook County increased by 36 per cent while the sales volume increased by only 2 per cent.

Although Mitchell blames greedy sellers for encouraging the soaring prices, he is about to become part of the problem.

"I absolutely plan on selling this house we're buying now in one year," he said. "I'll get all the money I can for it, then try to find something bigger and better. Your house is your badge of status, and I want a home that speaks to the kind of lifestyle I want. Call it greed, call it the American Dream, but we want to be a part of it. Bigger and better, that's the name of the game, right?"

For James and Pat McGuffage of Oak Lawn, the American Dream is a quieter, simpler hope. "A brick bungalow with hardwood floors and plaster walls," McGuffage says.

"When people fantasize about their first home they think stables and a pool and 60 acres, and much of that is the fault of TV," McGuffage said. "People's expectations are too high. After all, what is a home really? A place to live or a status symbol? I say a place to live."

The place the McGuffages found to live is the simple brick bungalow they'd always imagined in a Southwest Side neighborhood. Not only does it have plaster walls and hardwood floors, but a backyard for their 15-month-old son, a living room "big enough to accommodate both sides of the family on Thanksgiving," and a fence "we can lean over and talk to our neighbors," Mrs. McGuffage says.

"No, it's not a luxury house, no it's not like the houses in House Beautiful, but it's a place I plan on living in for the rest of my life," McGuffage said. "If we get the mortgage money," he added.

None of the special loans administered by First Federal has received approval yet. According to City Controller Clark Burrus, the city is scheduled to turn over the funds to the S&L by the end of this week, and shortly thereafter First Federal will begin making the low-interest loans.

There will be applicants who will receive no money from the mortgage loan pool. First Federal accepted applications for $110 million in loans, 10 percent more money than the plan provides for.

Some once-hopeful applicants, like the Mitchells, already know their fate. The McGuffages and Taders, however, are still waiting to hear.

If the McGuffages are denied the low-interest loan, they say they will secure a standard interest rate of 10 percent "and try to make ends meet."

Mrs. Tader, however, is not of that temper. If she and her husband are denied the loan, she jokes that her course may parallel that of poor Myrtle Wilson in "The Great Gatsby"—that sad tale of lost dreams and "that huge incoherent failure of a house . . ."

"If we don't get this loan," she said. "I'll throw myself in front of a Jewel truck."

"Listen to me," she says turning to her husband. "If this is supposed to be a happy occasion, why do I sound so sad?"●

SUPPORT THE HANLEY AMENDMENT ON VETERANS PREFERENCE

The SPEAKER. Under a previous order of the House, the gentleman from Texas (Mr. TEAGUE) is recognized for 5 minutes.

● Mr. TEAGUE. Mr. Speaker, I understand the civil service reform bill is scheduled for consideration tomorrow. The Honorable JIM HANLEY of New York, a senior member of the Post Office and Civil Service Committee, plans to offer an amendment to that provision of the bill that would limit the use of the 5-point veterans preference for wartime veterans. I am sure you have heard from veterans throughout the country expressing their opposition to this proposed change in the law.

I commend the distinguished gentleman from New York for offering his amendment. He has long been recognized as a friend of our veterans and their families having served with me on the Committee on Veterans' Affairs for a number of years. He understands the continuing problems that veterans face in seeking employment following discharge from service. He understands that these difficulties remain for years. He also understands how critical it is that we retain protection for veterans once they become employed. It is grossly unfair to place the veteran at a distinct disadvantage when there is a reduction-in-force simply because he was drafted and called to service to fight in time of war.

Mr. Speaker, the chairman of our Committee on Veterans' Affairs, the very able and distinguished gentleman from Texas, my friend and colleague, RAY ROBERTS, and the ranking minority member of the committee, the distinguished gentleman from Arkansas, JOHN PAUL HAMMERSCHMIDT, have advised the Members of the House of their plan to fully support the amendment to be offered by Mr. HANLEY. I also plan to support JIM HANLEY in his efforts.

The administration has attempted to convince everyone that the proposed change in the law will help Vietnam veterans. It simply is not true. On the contrary, Vietnam veterans will be adversely affected by this proposal in that the 5-point preference will be available to them only for a period of 15 years while the same preference was available for veterans of World War II and Korea up until now. It seems pretty clear to me. The 5-point preference was never intended to be a readjustment benefit. The Congress has always provided equal benefits to veterans for equal service. It is hard for me to believe that at this point in time we now want to place the Vietnam veteran at a disadvantage and deny him equal benefits for his service.

Mr. Speaker, it is unthinkable that we should be considering a change in the veterans preference law. Many Vietnam veterans have encountered extreme difficulties. Surely we do not now want to compound those problems by denying them this small benefit that we have made available for a lifetime to veterans who participated in prior wars.

I urge my colleagues to support the proposed Hanley amendment and I want to assure my colleagues of my strong support of the gentleman's proposal.●

PERSONAL EXPLANATION

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. LUNDINE) is recognized for 5 minutes.

● Mr. LUNDINE. Mr. Speaker, as we begin conference committee deliberations on the Housing and Community Development amendments today, I would like to offer a brief explanation regarding my failure to vote on a significant amendment that was adopted during floor debate on this legislation. On June 29, the House agreed, by a vote of 244 to 140, to an amendment offered by my colleague from Michigan (Mr. BROWN) which would enable either the House or the Senate to veto rules or regulations prescribed by the Department of Housing and Community Development.

Although I was on the floor during the debate, at the time the vote was taken on the Brown amendment, I was engaged in a serious discussion with some of my colleagues about other provisions in this bill, and I inadvertently neglected to cast my vote.

I regret that oversight. I believe that the adoption of this amendment repre-

sents a flagrant and inappropriate intrusion by the Congress into the rightful responsibilities of the executive branch of Government. While I share the concern of many of my colleagues with regard to some of the interpretations of our laws that are reflected in agency regulations, I agree wholeheartedly with the distinguished chairman of the subcommittee, Mr. ASHLEY, in his assessment of the Brown amendment as a "classic case of overkill."

The attacks on our regulatory processes are justified. The processes are often slow and complicated, creating prolonged uncertainty among State and local governments, businesses and others. In order to address those very real problems, Congress should proceed more aggressively and deliberately toward achieving meaningful regulatory reform. The Brown amendment only further complicates the inefficiencies in our regulatory process—it does nothing to address the underlying problems.

I share the President's concern about the possible constitutional questions that are raised by this kind of amendment, but beyond that I see it as a potentially disruptive device that will further slow the legislative and regulatory processes and place the Congress inappropriately into the arena of administering substantive programs and laws. Rather than enhancing and streamlining our regulatory processes, this amendment has the potential for creating further delays and inconvenience for those at the state and local levels who are responsible for the actual delivery of Federal programs.

I hope that this damaging provision will be deleted from the Housing and Community Development Amendments during Conference Committee deliberations.●

"TO SURVIVE, BLACKS MUST CHALLENGE THE SYSTEM"—ADDRESS BY DR. CARLTON B. GOODLETT

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. PHILLIP BURTON) is recognized for 5 minutes.

● Mr. PHILLIP BURTON. Mr. Speaker, Dr. Carlton B. Goodlett, the distinguished president of the National Newspaper Publishers Association, recently addressed the Summit Conference of the NAACP concerning problems faced by black Americans in today's society.

Most of us who have lived through the recent era or major black gains in employment practices, civil liberties and other areas, realize that black Americans still face many major problems in their drive for equality.

I think the address given by Dr. Goodlett covers the current status of black Americans in an informative and revealing manner. For this reason, I am inserting the remarks made by Dr. Goodlett in the RECORD and would like to invite the attention of my colleagues to this address.

The address follows:

TO SURVIVE, BLACKS MUST CHALLENGE THE SYSTEM

(By Carlton B. Goodlett)

As President of the National Newspaper Publishers Association—Black Press of America, I am pleased to address this important Black Summit Conference convened by Benjamin Hooks, National Executive Director of the NAACP. The previous speakers today, Dr. Joseph Lowery, President, Southern Christian Leadership Conference, and Dr. Kenneth S. Tollet, Director, Institute for the Study of Educational Policies, Howard University, have proven themselves to be adequate diagnosticians of the evil of racism suffered by 26 million Blacks in the USA. Neither of these speakers has prescribed the thereapy required for Black survival in racist America.

As a psychologist who has spent over 45 years testing the pulse and the vital signs of racist White America, I have come to prescribe the therapy necessary for Black survival, under the subject, "To Survive, Blacks Must Challenge the System". Eleanor Holmes' discussion last night of quotas and the Bakke Case has forced me to enlarge the dimensions of my statement. Dr. Tollet has succinctly described the dangers which Blacks face in the Bakke Case; I shall not repeat material arguments profoundly stated by him.

Those of us who would lead 26 million Blacks to a Promised Land must take heed of the advice of Mari Evans, a young Black poet, presented in Orde Coombs' Anthology, "We Speak as Liberators;" I quote:

SPEAK THE TRUTH

Speak the truth to the people
Talk sense to the people
Free them with reason
Free them with honesty
Free the people with love and courage and care for their being
Spare them the fantasy
Fantasy enslaves

* * * * *

Move them instead to a Black One-ness
A Black strength which will defend its own
Needing no cacophony of screams for activation
A Black strength which attacks the laws
Exposes the lies, disassembles the structure
And ravages the very foundation of evil
Speak the truth to the people
To identify the enemy is to free the mind
Free the mind of the people
Speak truth.

Sixty-nine years ago, when the NAACP was founded, a Black was lynched every two and a half days. While death by the mob's noose is no more, Black Americans by the tens of thousands fear and suffer the pangs of psychological death and the ravages of racism daily in racist White America.

The President's Report on Civil Disorders, 1968 (the Kerner Report) has clearly identified the cancer, racism, which pervades the United States of America. Above all else, the Kerner Report should have marked a new beginning in Black America's search for a new ideology and agenda to combat the pervasive threat to the Black experience from individual and institutional racism, both covert and overt, which stalks the land.

We live in a sick society. The avaricious greed of the early pioneers was joined in struggle by those seeking special privilege and favors in the founding conventions of the young nation, in which the supporters of materialistic values won the day against those of humanistic values. For 202 years property rights have been inviolate when in contest with human rights. From the landing at Plymouth Rock, the activities of the White Settlers and now the White majority began and sustained a ravenous plundering march of physical and human exploitation which nearly destroyed the Red Man and for more than 249 years endured the moral stench of Black slavery. And today, all the judicial, legislative and executive machinations have not permanently freed Blacks from the status of second-class citizens.

In this, the age of Black discontent, as we grope for solutions to seemingly imponderable problems, the words uttered by Dr. W. E. B. Du Bois in celebration of his 90th birthday come to us loud and clear, when he pondered the question: How fare Black folks in America?—

"If we aim to be Americans and do only what America does, think what she thinks and say what she says, we are a stupid people; if on the other hand we are determined to reach the highest standards of the world, and broaden and lift those standards by developing the best part of our Negro culture, erased from our souls by blood and slavery, by poverty and insults, we may, led by Africa, yet save the world. On the other hand, if we are bribed by high salaries to our gifted while our masses starve, by privilege to our rich while our millions crawl, by publicity for our fools while our leaders and our youth rot in jail, we are lost. This nation, by its mad plunge into lying, stealing and murder, will drag us as a part of it down to an age . . . of eternal night."

In this 115th post-Lincoln Emancipation Proclamation year Blacks must ponder these words of Du Bois, and be guided by his sage counsel. Black America, in its placid acceptance of a second-class citizenship, which sees its best minds, its most enterprising youth, its struggling middle-class, trying to get a "piece of the action", fails to reflect in its behavior that in the life-and-death struggle against racism 26 million Blacks must come to terms with the question of survival.

The struggle to survive during slavery, history shows, was guided by the ideological concept that only through freedom and the struggle to be free, even at the sacrifice of life, itself, could a slave and his progeny lead a meaningful life. But, during the 115 years since Lincoln's Emancipation, Black Americans have congregated into thousands of organizations with many separate agendas, and their marching resembles that of the forty years tramping of the Children of Israel around in the wilderness.

Black America needs an ideology. An unemployed Black laborer whose family for approximately three generations lived on welfare or some form of charity, who had suffered recurring cycles of depression, inflation, war, the last-hired-first-fired syndrome, ventured: "There must be something better than this! Call it what you may, I'm ready for it!"

A government more interested in inflation than it is concerned about the mass unemployment of more than 7% of the countable adults; a government which tolerates without alarm an unemployment rate among its adolescents twice that of adults; and a government more concerned about human rights abroad than the rights of its Black youth who suffer three times the unemployment rate of White Youth, demonstrates by these very acts alone the meaning of the Black laborer's "There must be something better than this, call it what you may!"

Let us find a name for that "something better," and marshal our forces to secure it, not only for Black America but also for our whole United States of America.

On many occasions I have quantified Martin Luther King's "I am Somebody" litany. Blacks must reject the "freedom of the individual" concept, and accept the "freedom of the masses" concept as the true index on the scale of freedom. For, lo, 115 years, few of our leaders have pondered the question, "Is the laissez-faire Capitalist system, shrouded in democratic garments, as it exists in America, a fertile soil for the survival of a racial minority forced to serve in slavery and crypto-freedom, as the bottom of the pyramid of Capitalism, to be exploited and ravaged by all who are non-Black who in their greed scramble to ascend the materialistic success ladder? Blacks ignore the cancer of racism at their peril.

THE CANCER OF RACISM

According to the Joint Commission on Mental Health, 1969, in terms of mental health racism is a more pervasive and far more serious threat than childhood schizophrenia, mental retardation, psychoneurosis or any other emotional derangement. Its destructive effects severely cripple the growth and development of millions of our citizens, both young and old alike. Yearly, racism directly and indirectly causes more fatalities, disabilities and economic loss than any other single factor.

INDIVIDUAL RACISM—A WAY OF LIFE

Institutional racism is an umbrella under which all the individual racists may gather for action. Individual racism is glaringly illustrated in the continuing struggle against implementation of the Supreme Court 1954 Decision declaring segregation and discrimination in public education unconstitutional.

The Quota System: Individual racists also vociferously proclaim their opposition to a quota system, and bow before the mystical formulation called "positive affirmative action." Let there be no mistake about it: Blacks who have met every call of our nation in peace and war, and earned every privilege for citizenship, as a matter of right, demand governmental guarantees against institutional racism.

We live in a quantitative society. The only way victims of racism can be assured equity is for the government (national, state and local) to quantify the rights, responsibilities and opportunities for all citizens.

Quotas are accepted in every modality of our lives. Hundreds of thousands, year, millions of students are bussed to schools daily in America; it becomes distasteful only when we bus to remove inequities forced upon Blacks and their allies to obtain equity in the educational process. Our Jewish friends might look upon the quota system as a roof over their heads, but to Black America it is the floor under our feet, below which we shall not fall.

The Bakke Case

It is rather ironic that California, of whom so much was expected as the bellwether state in the second half of the 20th century, should spawn the Bakke case. Many convert supporters of the myth of racial superiority use this case as a *cause celebre*, with the charge of "reverse discrimination" increasingly being voiced by whites, WASPS, ethnics and Semitics alike, who covertly feel that every Black advance is a threat to their special territory. The Bakke case has literally set the progressive and liberal community at war. The words "race" and "quotas" are bandied about by the enemies not only of racial minority advancement but also of the struggle of women, senior citizens, youth and even the lower socio-economic classes, to redress inequities which exist in our society.

Bakke, a 36 year old white male engineer, was rejected by at least ten medical schools; however, he sued the University of California at Davis, claiming that the admission of 16 racial minority students out of 100 admissions to the medical school was a denial of his constitutional rights. Many factors were mitigated against Bakke's entry into a medical school, the foremost being the unwritten law of his age. Actually, 40,000 aspirants applied and 26,000 were rejected across the nation. The U.S. Supreme Court has been asked to determine how this coveted pie of only 14 or 14 thousand admitted applicants can legally be divided among the competing groups, Blacks, Chicanos, women, handicapped, too old, too young, or even, like, Bakke, white Protestant males; but no matter what the court decides, the solution will not address the underlying question: not just "Who gets in?" but "Why isn't there room for more?"

This inability of the contestants in the Bakke case to understand the basic indictment against the socio-economic system will deter the coalescence and unity so necessary for structured social change in the nation. The many inequities which exist in housing, education, employment and health care result from the parsimony of the government. It is clearly perceived now by even the Black masses that racial minorities have a stake in the development of a political ideology of abundance. The victims of economic racism, whose families for generations have been denied gainful employment, utter: "There must be something better than this, and we are ready for it!"

The victims of racism and poverty can never surmount, alone, these handicaps imposed by a socio-economic system which denies enriched opportunities to its people, not only in the field of medicine, but also in jobs, education and adequate health and welfare, to serve the needs of every citizen. Even Cuba, with its many demanding problems, finds it possible to educate proportionately more of its citizens in the medical sciences and healing arts than the USA.

Support for affirmative action must be coupled with the understanding that the DeFunises and the Bakkes as well as every other person excluded from law school or medical school because of the restricted number of admissions, or because the level of unemployment is kept artificially high, are part of a problem which is not just a racial one, but an old economic shell-game, in which ethnic and racial groups as well as black workers and white workers are played off against one another. The progressive forces must understand this no-win game, and develop strategies which unite, not divide, people with common needs.

Bakke and the thousands of all races rejected with him are victims of something other than "reverse discrimination": they are victims of a competitive system which generates far more losers than winners; the real enemy is an American social order controlled by those who utilize racism, sexism and classism to thwart the unity so necessary for the development of fundamental change in the direction of the economic and political life of the nation.

As a guide in our struggle against racism, the words of John D. Rockefeller III offer some clue, who says, in his call for the "Second American Revolution," that now is the time for the humanistic values to take ascendancy on our national life, that the second revolution is emerging from the bottom of the pyramid up, rather than from the top down. The humanistic revolution must use government as a response to the wants, needs and aspirations of the people, and the forces of economic and technological advancement must be directed toward humanistic values; there must be a development of a new "relationship of man, first to himself, then to other men, to society, to nature and to the land."

Rockefeller hopes that our society can move into this second revolution on the basis of logic, persuasion and the deliberation of free men in an open society; but objective pragmatism leads one to recall the violence which led to the Magna Carta, or which resulted in the American and the French Revolutions; and if we are to believe Santayana, we know something more than reason will be required, to take the acquisitions of the powerful few in a laissez-faire Capitalist society and redistribute the fruits of the loom, the hearth and the field through a planned society which guarantees as a matter of birthright an annual income to every American, a decent home to every citizen, the finest medical care throughout the land, and the education of every child to the maximum of his capabilities.

BLACK YOUTH—AN ENDANGERED SPECIES

26 million Blacks Americans living in Diaspora from Africa have many challenges facing them, the most important of which is the survival of their progeny.

One precious thread is woven throughout the fabric of the Black experience—the fact that Black people have and belong to each other. On many occasions we have described 26 million Black Americans as larger in population than 57 nations of Africa or 158 other nations in the world. American Blacks are the most highly educated and professionally trained Black people in the world. However, while over a million of our young people are in institutions of higher education, from 500,000 to 600,000 of our teenagers are jobless, without education, many with police records, in the 25 largest American cities. Though over a million Black youths in college is an impressive figure, this is counterbalanced by two to three times that number of Black youths who are not attending any school, anywhere—subject to no discipline or authority—lacking all the skills, education or psychological maturity to become "productive citizens" (a description by the capitalist society of those who produce goods and services.) Many of these jobless Black adolescents are still seeking nonexistent jobs, but many who are at the end of the hope rainbow have simply given up. Their most immediate option is crime—first and foremost against other Blacks.

Recently the commander of the Homicide Division of the Chicago Police Department stated that the average person found guilty of murder is "male, Black, 18 and under." Louisiana probably is the only state in the nation where there are more young Blacks incarcerated in prison than attending college.

An entire generation of Black youth are becoming useless, expendable, nonfunctional, nonproductive human waste material—because the system refuses to educate them or provide for them or their parents. They have become the nation's number one social liability; the same system of racism and exploitation which created their lot apparently is readying the machinery for their disposal.

The fear of crime in the Black ghettos is warranted and cannot be condoned. However, we vigorously reject the White analysis of the Black crime problem, which consistently leaves out the first culprit and villain—White America, itself—and instead places the blame on young Blacks for not "boot-strapping" themselves out of their poverty. The victim of racism, Black youth, is made the scapegoat for his own victimination!

Can a Black America be saved? Who will save Black America? Yes, Black America can be saved—but only Black America can and must save itself! No help can be expected from any other quarter!

What are the Black resources available for "self-service?" *The Black schools*, the *Black Family*, the *Black Sororities and Fraternities and Lodges*, the *Black Church*, the *Black Press*, the *Black Financial Institutions*, the *Black Politicians*, and the *NAACP*. And we would suggest that the NAACP, from this leadership conference, establish a permanent forum for Black behavioral scientists and allied professionals, to continually test the institutional forms of White America, and evaluate them on a scale of their hostility or support for Black survival. And out of this inventorying of the system, directives for militant Black response should be structured and disseminated by our Black leadership organizations.

I give you one possible instance of militant Black response:

Blacks must mount a campaign to control the air space in the black ghettos. Many of the white proprietors of black-oriented radio own the maximum allowable number of seven stations each; most are Southerners, who not only control the very important radio communications media in the South but also hold a death grip upon this medium in the Northern metropolitan areas, including Washington, D.C., whose population is now 74% black. These radio stations produce programs in the poorest taste, aimed

at the lowest common denominator of entertainment devoid of social concern or public service. If blacks fail to gain control of the ghetto airwaves and cannot determine the content of the programming, better that there be silence in the black ghettos!

Blacks must prepare, now, for a massive crusade, involving, if necessary, systematic jamming of all white-owned black-oriented stations! They must create such havoc until they bring to bear upon the nation's conscience the seriousness of their needs and demands and force her to deal with them. True, there are risks; many will go to jail; but better to languish in jail than ignore the shackles of racism and passively acquiese to a government in cahoots with a racist white industrial combine which denies to blacks the basic ingredient for survival: the control of their own communications media.

Three lessons we can learn from the Jewish experience for combating racism:

(1) As the Jews have so ably inculcated in their progeny their identity and their common struggle to be waged against anti-Semitism, so U.S. blacks must start a two-phase crusade, from the cradle to the grave: first, of developing an identity and appreciation of blackness, and, second, of never permitting our progeny to forget the menace of racism as a blight on the black experience.

(2) Jews have always recognized and accepted their responsibility to use their resources to take care of their own; blacks must sustain the newly-born National Black United Fund, which is patterned after the Jewish Welfare Appeal—not only to give aid to our needy, but also to provide leadership in the assistance and development of trade and commerce and relief to the nations in Africa and other third world peoples.

(3) Jews use their economic resources and their political power in forging opportunities for Jews as well as using political and economic means to punish their enemies. Similarly, Blacks must use Black economic and political power as instruments in developing intra-group opportunities for Blacks, and also to punish the racists who thwart Black progress. The Jews demonstrated the power of the economic boycott when they literally destroyed Mexico's multi-million-dollar tourist industry as retribution for Mexico's 1975 affirmative vote on the U.N. Resolution declaring Zionism a form of racism, and remained adamant until Mexico changed her vote at the 1976 U.N. session.

No Black sacrifice is too great in our struggle—with allies, if possible, but alone if necessary—to destroy racism, the enemy eternal, by any means necessary, and create for all people a decent life.

We have just recently seen "Holocaust." Let us not forget that Blacks have experienced their holocaust, when ten million died in passage from Mother Africa to America. Those who survived in this hostile land are the hardy ones determined to be free. Let us remember, there is a price that one pays for freedom—yes, especially in a hostile racist society.

Du Bois wrote: "I saw clearly . . . that the solution of letting a few of our capitalists share with Whites in the exploitation of our masses would never be a solution of our problem, but the forging of eternal chains." We approach the time, all pleas to the contrary, when the economic system called Capitalism must be judged as irrevocably stacked against the masses of Black people. Who or what force will move this nation toward a Democratic-Socialist society, a symbiosis between capitalism and socialism, with a democratic form of government where the people have the right to bring about public ownership of public utilities, transportation, banks, mass industries, and government control of the minimum essentials required for equalizing the opportunities of *all* people to enjoy the benefits of democracy.

We have no illusions about the chances of 26 million blacks, representing the black tail, wagging the white dog. Yet, 26 million Blacks, finally recognizing the ultimate disaster offered by capitalism for 26 million black colonials in capitalist America, led by the NAACP, the Black Church, the Black Press, the Black Youth, the Black Fraternal organizations, and even the Black Politicians and Black leaders everywhere, using their moral, mental, political and economic resources: such a unified, dedicated black force for change, residing in the belly of the beast, would create an irresistible process in the body politic that would force the total nation to seek and develop viable economic alternatives.

THE COMMON STRUGGLE OF BLACKS AND WHITES AGAINST RACISM

Before a people can achieve economic justice, they must join voices to cry out unceasingly for the right of every American citizen to a job, or to an economic level below which he and his children shall not fall; before a people can achieve justice in housing, they must join their voices to call unceasingly for an end to the System's present philosophy of "tremendous demand, limited supply", designed to enrich the real estate coffers of the greedy and maintain the squalor of the ghettos; before all children can get justice in education, we must join our voices, loudly, to declare that this nation is wealthy enough to develop each child's potential to its highest capacity; and we shall never find justice in the law without joining voices to unceasingly demand a police force and judicial system which is not a brutal instrument solely for maintaining the status quo, but an instrument designed to protect the innocent.

Our zeal must approximate that of Sojourner Truth, Harriet Hubman, and Frederick Douglass as they labored for Black liberation in pre-Civil War times. If we procrastinate behind a veil of see-hear-and-speak-no-evil and don't-rock-the-boat-ism while our masses starve, while our militant Black youth rot in jail, while a corrupt capitalist system attempts to co-opt our educated tenth, then we shall find ourselves an integral part of the oppressor's conspiracy against the oppressed masses, Black and white, who eke out their meager existence in Fortress America.

Those who believe that the fate of Black Americans is, after all, inextricably intertwined with that of all the powerless, dispossessed and wretched of the American earth must present their grand design for the raceless society. What are their means and timetables? What are their viable alternatives, when they look up and see that events have rushed by them, that the USA is now a divided society with a white nation well fed, well clothed and comparatively happy, and a black nation ill-housed, ill-educated, underemployed and progressively poorer?

Approximately twenty years after Patterson's cry: "We Charge Genocide!" Samuel Yette poignantly pointed out in his book, "The Choice: Survival USA", that the threat of genocide for Black America is not abating. While both Patterson and Yette describe in awesome terms the institutional crimes against the Negro people, let us never forget: the governments are instituted by the people and in some wise reflect the consent and the will of the governed. Just as the Nuremberg Trials placed before the bar of justice the whole of the German people as accomplices of the murderous Hitler and his gang, so individual citizens who commit the conspiracy of silence in the increasing struggle being waged against racism, sexism and poverty are culprits, who in the final judgment cannot escape some responsibility for the crimes against the people committed by their leaders in their name.

In marshalling our forces to secure that "something better—call it what you may," let us keep in mind the sage advice of Frederick Douglass:

". . . Power concedes nothing without a demand. It never did and it never will. Find out just what any people will quietly submit to and you have found out the exact measure of injustice and wrong which will be imposed upon them, and these will continue till they are resisted with either words or blows, or with both. The limits of tyrants are prescribed by the endurance of those whom they oppress."

In the twilight of his career, Frederick Douglass, when asked what would be his final words to colored America in their struggle for freedom, replied:

"Agitate! Agitate! Agitate!"

115 years after Lincoln's Emancipation Proclamation Blacks face a crisis of survival itself. For survival Blacks must challenge the system. 24 Million of the Black under-class cry, "There must be something better than this! We are ready for it!" Let the Black Leadership Summit of the NAACP accept this challenge, and dedicate our very beings to the search for "somehting better than this." If Black Americans should endure for one thousand years in this hostile land, let those that follow us proclaim that this day was Black America's finest hour! ●

POSITION ON RECORD VOTE

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. AMBRO) is recognized for 5 minutes.

● Mr. AMBRO. Mr. Speaker, I was unavoidably detained on official business yesterday during a portion of the consideration of the appropriation measure for the Department of Defense. Lest there be any doubt as to my position, I would like to state, for the RECORD, that I would have voted for the amendment to prohibit the use of funds contained in the DOD appropriation measure for abortions unless the life of the mother would be endangered if the fetus were carried to term.●

AMERICA NEEDS GOOD CITIZENS

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. SIKES. America needs good citizens. Yet, citizenship training may be one of the most neglected in all the evaluations in today's curricula. It should be obvious that in order for America to remain the leader of the free world, we must properly educate our young toward good citizenship. This we are not doing. We educate our youth to be capable of providing a good livelihood for themselves and their families. We educate our young so that each succeeding generation may enjoy a better life than the preceding generation. It follows that we should educate our young to fully accept the responsibilities of citizenship.

The lack of a proper education in citizenship and in moral principles surely is in part responsible for the lack of confidence by the American people in their Government, for the alarming rise in the crime rate and for the fact that so few citizens bother to exercise their

most cherished right to vote. In the 1976 Presidential election only 54 percent of those eligible to vote did so. Crime has increased to such alarming proportions that it is not safe in many neighborhoods to go out at night. The polls show that many Americans do not place confidence in their Government officials to serve responsibly and to be responsive to the needs of the Nation. Low voter turnout, high crime rates and low confidence in government all indicate a decline in the level of civic and moral responsibility in our society if we are to believe the media reports.

Democratic government cannot exist without the support of its citizens. This support is felt keenly and the Nation improves when citizens cast their votes intelligently. The complexities of government and the problems with which government must deal make it more and more difficult for citizens to vote in the interest of the Nation and therby in their own interests. Throughout our history public education has emphasized the need for the individual to support himself and his family to the best of his ability. That is good, but it is not enough. There is a compelling need to educate our youth and to be more responsible citizens.

I have recently received a letter from a distinguished constituent, Adm. LeRoy Simpler of Milton, Fla., who was kind enough to share some of his thoughts on this idea. Admiral Simpler pointed out in his letter that many of our Nation's problems are a direct result of the lack of proper citizenship training in our public schools. Furthermore, Admiral Simpler states that the elimination of the Lord's Prayer from the public schools in 1963 separated many of our Nation's young people from daily contact with Christian ethics.

I am convinced Admiral Simpler has an excellent point for the reintroduction of fundamental moral teachings in our public schools blended with a strong background in the ideals of democracy upon which this Nation was founded. Admiral Simpler makes an excellent suggestion in his letter when he calls for redirection and new objectives for our public schools. One need only to look briefly at the prevailing conditions in our public schools to realize that he is correct. We must impress upon our youth that they will be solely responsible for maintaining the freedom and form of government we hold so dear in the future.

The future of the generations of Americans that will follow us make it imperative that we, the leaders of this Nation, insist that our children be reared with a strong sense of citizenship and moral behavior and fundamental citizenship training and reintroduction of prayer holds the key to the future solution of many of the problems we grapple with in Congress everyday. Crime, citizen confidence, and even our energy problems could be mediated to some degree if our Nation's youth had a stronger sense of civic responsibility. As Admiral Simpler says:

The advantages of citizenship training are limited only by the imagination of our leadership.

The time has come for the exercise of both. We must get back to the basics and insist that our children be reared and trained with a strong sense of civic and moral responsibility if the tenets we hold dear are to survive in today's troubled world.

It is encouraging to note that the Milton, Fla., Kiwanis Club, of which Admiral Simpler is a member, has adopted resolutions of support of training, good citizenship, and forwarded these resolutions to all the Kiwanis Clubs of our State. The club also has adopted and forwarded to other clubs a resolution urging that the decision of the Supreme Court in 1963 on prayer in the schools be reversed to serve the vital interest of our democracy and the majority of its people.●

ALCOHOLISM PROGRAMS

(Mr. OTTINGER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. OTTINGER. Mr. Speaker, today I am introducing legislation to require Government contractors to establish and operate alcoholism programs or to provide adequate referrals for their employees as a condition of doing business with the Government. This bill is identical to the one introduced on February 7, 1978, by Senator WILLIAM HATHAWAY, chairman of the Senate Subcommittee on Alcoholism and Drug Abuse. As Senator HATHAWAY's subcommittee is holding joint hearings with the Subcommittee on Federal Spending Practices and Open Government on August 17, I believe it is particularly timely to introduce this legislation now.

There is no question that alcoholism continues to be one of the most serious health problems facing Americans today. Alcoholism exacts a serious economic price as well. The National Institute on Alcohol Abuse and Alcoholism estimates that alcoholism results in a direct economic loss of about $20 billion in productivity annually. In addition, alcoholism-related expenses including health care, car accidents, and others exceed $42 billion.

These economic costs directly affect the efficiency and productivity of American industry. The National Council on Alcoholism estimates that nationally 5.3 percent of the work force are currently alcoholics, and another 10 percent have serious drinking problems. These statistics translate into severe absenteeism, reduced productivity, faulty decisions, and a high personnel turnover. The Federal Government has a legitimate and direct interest in insuring that industry with which it does a $60 million business annually operates efficiently to save taxpayers money.

In my own district of Westchester County, with a population of 900,000, there are an estimated 54,000 alcoholics, many of whom are employed. These employed alcoholics, the Westchester Council on Alcoholism estimates, cost Westchester County alone between $50 and $60 million last year in productivity. The council has found the proposed occupational alcoholism programs extremely effective, with very low start-up costs. They strongly support this legislation.

Occupational alcoholism programs provide an effective, humane and cost-efficient way to try to combat the terrible human and economic cost of alcoholism. Many organizations have testified at Senate hearings that such occupational programs have helped employee rehabilitation and have resulted in substantial savings as well, paying for themselves many times over. These programs have a 60 to 80 percent success rate, as opposed to a 20-percent rehabilitation rate among the unemployed who have no such programs available to them. Like many diseases, alcoholism is best treated when detected early, and alcoholics have excellent rehabilitation rates under these programs. It is important to stop alcohol abuse before it becomes alcoholism.

The bill amends the Rehabilitation Act of 1973, adding a new section, section 505, which requires specified occupational alcoholism programs and provides for model programs to be set up, with consultation between labor and management. In addition the Small Business Administration would be brought in to help small businesses implement these programs.

I firmly believe that this legislation can help to stem one of this country's gravest health problems and at the same time help alleviate a serious economic loss. I urge my colleagues to support this bill and join me in working toward its swift enactment.

The text of the legislation follows:

H.R. —

A bill to require Government contractors to establish and operate alcohol abuse and alcoholism programs and services, or otherwise arrange for referral to such services, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Rehabilitation Act of 1973 is amended by adding after section 504 the following new section:

"OCCUPATIONAL ALCOHOLISM PROGRAMS UNDER FEDERAL CONTRACTS

"SEC. 505. (a) (1) Any contract in excess of $2,500 entered into by any Federal department or agency for the procurement of personal property and nonpersonal services (including construction) for the United States shall contain a provision requiring that, in employing persons to carry out such contract the party contracting with the United States shall—

"(A) establish and operate by itself or together with one or more other employers, labor organizations, public agencies or private organizations, or with consortia thereof appropriate prevention, identification, treatment, counseling, and rehabilitation programs and services for alcohol abuse and alcoholism among its employees, or

"(B) arrange by way of contract, cooperative agreement, or other arrangement for the referral of employees affected by the illness of alcoholism to appropriate available programs and services conducted by public agencies or private organizations.

"(2) The provisions of this section shall apply to any subcontract in excess of $2,500 entered into by a prime contractor in carrying out any contract for the procurement of personal property and nonpersonal services (including construction) for the United States.

"(3) In the case of a contracting party with employees represented by a labor organization, no program affecting such employees shall be established or required under the provisions of this section unless the method of conduct, identification, and the scope of services of such program have been determined by agreement entered into by the labor organization and the employer through collective bargaining procedures.

"(b) If any employed person of such contracting party believes that the party has failed or refuses to comply with the provisions of his contract with the United States, relating to alcohol abuse and alcoholism programs, services, and referral mechanisms, such person may file a complaint with the Department of Labor. The Department shall promptly investigate such complaint and shall take such action thereon as circumstances warrant, consistent with the terms of such contract and the laws and regulations applicable thereto. A contracting party shall be deemed to be in compliance with the requirements of this section if he institutes and maintains one of the model programs developed pursuant to section 201(b) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970, except that such model programs shall not be the exclusive methods of achieving compliance.

"(c) The requirements of this section may be waived, in whole or in part, by the President with respect to a particular contract or subcontract, in accordance with guidelines set forth in regulations which he shall prescribe, when he determines that special circumstances in the national interest so require and states in writing his reasons for such determination.".

SEC. 2. (a) Section 201(b) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 (hereinafter referred to as the "Act") is amended to read as follows:

"(b)(1) The Secretary, acting through the Institute, shall be responsible for fostering and encouraging similar alcohol abuse and alcoholism prevention, treatment and rehabilitation programs and services in State and local government and in private business and industry.

"(2) Consistent with such responsibility, the Secretary, acting through the Institute, shall develop a wide variety of model programs suitable for replication on a cost-effective basis in different types of business concerns and State and local governmental entities, taking into account the number of employees, geographical location, proximity to other concerns and entities, and availability of existing services from public agencies and private organizations. With respect to small business concerns, the Secretary (acting through the Institute) shall consult with the Small Business Administrator in the development of model programs affecting such concerns.

"(3) With respect to business concerns and governmental entities which employ individuals represented by labor organizations, any model program affecting such individuals shall require that the method of conduct, identification, and scope of services to be provided shall be determined by agreement entered into by the labor organization and the employer through collective bargaining procedures prior to the establishment of such program.

"(4) The Secretary, acting through the Institute, shall disseminate information and materials relative to such model programs to single state agencies designated pursuant to section 303 of this Act, and shall provide technical assistance to such agencies as requested."

(b) Section 303(a) of the Act is amended by—

(1) redesignating pargraph (16) as paragraph (17); and

(2) by inserting immediately after paragraph (15) the following:

"(16) Provide assurance that the State agency—

"(A) will foster and encourage the development of alcohol abuse and alcoholism prevention, treatment and rehabilitation programs and services in State and local governments and in private businesses and industry;

"(B) will make available to all business concerns and governmental entities within such State information and materials concerning such model programs suitable for replication on a cost-effective basis as developed pursuant to section 201(b); and

"(C) will furnish technical assistance as requested to such business concerns and governmental entities.".●

CONFERENCE REPORT ON H.R. 13467

Mr. MAHON submitted the following conference report and statement on the bill (H.R. 13467) making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes.

CONFERENCE REPORT (H. REPT. No. 95–1475)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13467) making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 6, 21, 23, 26, and 63.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 7, 13, 14, 16, 17, 19, 20, 24, 30, 31, 45, 46, 50, 54, 55, 56, 57, 66, 67, 68, 69, 71, 72, 73, 74, 75, 77, 78, 80, and 81, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,000,000"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$9,000,000"; and the Senate agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows: In lieu of the matter proposed by said amendment insert:

INDEPENDENT AGENCY

ACTION—INTERNATIONAL PROGRAMS

PEACE CORPS

For an additional amount for "Operating expenses, international programs", $2,265,000.

And the Senate agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$20,817,000"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$49,000,000"; and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$35,000,000"; and the Senate agree to the same.

Amendment numbered 12: That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$7,009,000"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

For an additional amount for "Health resources", $500,000.

And the Senate agree to the same.

Amendment numbered 25: That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

LIMITATION ON ADMINISTRATION EXPENSES

For an additional amount for "Limitation on administrative expenses", $8,800,000: *Provided*, That $5,000,000 of the foregoing amount shall be apportioned for use pursuant to section 3679 of the Revised Statutes (31 U.S.C. 665) only to the extent necessary to process workloads not anticipated in the budget estimates and to meet mandatory increases in costs of agencies or organizations with which agreements have been made to participate in the administration of title XVIII of the Social Security Act, and after maximum absorption of such costs within the remainder of the existing limitation has been achieved.

And the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment insert the following: "301 and Section 304"; and the Senate agree to the same.

Amendment numbered 59: That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$111,500,000"; and the Senate agree to the same.

Amendment numbered 60: That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,238,000"; and the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert:

NATIONAL FIRE PREVENTION AND CONTROL ADMINISTRATION

FACILITIES

For facilities as authorized by the Act of October 29, 1974 (88 Stat. 1535–1549), $6,150,-

000, to remain available until September 30, 1980.

And the Senate agree to the same.

Amendment numbered 65: That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert: "$20,000,000"; and the Senate agree to the same.

Amendment numbered 76: That the House recede from its disagreement to the amendment of the Senate numbered 76, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$407,133,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 9, 15, 18, 29, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 47, 48, 49, 51, 52, 53, 58, 62, 64, 70, 79, 82, and 83.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13467) making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I

CHAPTER I—DEPARTMENT OF AGRICULTURE

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

Amendment No. 1. Appropriates $2,000,000 for the Animal and Plant Health Inspection Service, instead of $1,455,000 as proposed by the Senate and $3,675,000 as proposed by the House.

The bill passed by the House included $870,000 for gypsy moth control, $800,000 for pink bollworm eradication, $450,000 to combat cattle fever tick outbreaks, and $300,000 for contagious equine metritis (CEM). The bill passed by the Senate deleted these funds, with the exception of $200,000 for gypsy moth control.

With six weeks or less remaining for funds to be available between now and the end of the fiscal year, the conferees have taken cognizance of the change in requirements since the House action. Contingency funds have recently been utilized by the agency for the CEM emergency, contractual delays have been reported in the production of sterile pink bollworm moths, and the availability of certain chemicals for use against gypsy moths has been restricted. Cattle dipping still needs to be conducted to combat cattle fever tick outbreaks.

Consequently, the conference agreement includes $545,000 to be available for use as needed with regard to cattle fever ticks, gypsy moths, pink bollworm, or contagious equine metritis. Any funds not used by October 1 will revert to the Treasury. These problems will continue to be dealt with in the regular bill for fiscal year 1979, which begins October 1, 1978.

Emergency assistance

A total of $100,000,000 for emergency assistance is included in the bill. Of that amount, $80,000,000 is to repair damage to watersheds as a result of major storms or forest fires which have occurred during late 1977 and thus far in 1978, as provided by Section 216 of the Flood Control Act of 1950. The other $20,000,000 is for Emergency Conservation Measures to repair damages to farm and rangeland resulting from natural disasters.

The above funds are to be distributed to the States listed in the House or Senate Report based on the latest available estimate of needs as reported by the States. Any unused funds shall be available for similar damages in other areas.

FARMERS HOME ADMINISTRATION

Amendment No. 2: Appropriates $1,000,000 for the Farmers Home Administration as proposed by the Senate instead of $5,260,000 as proposed by the House. The Department has stated that only $1,000,000 can be obligated based on the expected date of enactment of the bill.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

Agricultural conservation program

Amendment No. 3: Deletes language proposed by the Senate which would have rescinded $30,000,000 in emergency drought and flood assistance funds available under the Agricultural Conservation Program. The conferees direct that these funds are to be available to meet any emergency needs resulting from flood or droughts occurring in calendar 1978. Funds not allocated by the end of the fiscal year will expire on September 30, 1978.

CHAPTER II—FOREIGN OPERATIONS

FUNDS APPROPRIATED TO THE PRESIDENT

Economic assistance

International Organizations and Programs

Amendment No. 4: Appropriates $9,000,000 instead of $9,500,000 as proposed by the Senate and $8,500,000 as proposed by the House.

INDEPENDENT AGENCY

ACTION—International programs

Peace Corps

Amendment No. 5: Appropriates $2,265,000 as proposed by the Senate but deletes language proposed by the Senate which stated that the appropriation would not be available until the enactment of authorizing legislation. The Peace Corps authorization was enacted into law on August 2, 1978 (P.L. 95-331), making the Senate proposed language necessary.

DEPARTMENT OF STATE

Migration and refugee assistance

Amendment No. 6: Appropriates $7,480,000 as proposed by the House instead of $7,270,000 as proposed by the Senate.

CHAPTER III—INDEPENDENT AGENCIES

VETERANS' ADMINISTRATION

Veterans insurance and indemnities

Amendment No. 7: Appropriates $1,000,000 for veterans insurance and indemnities as proposed by the Senate.

CHAPTER IV—DEPARTMENT OF THE INTERIOR

BUREAU OF INDIAN AFFAIRS

Amendment No. 8: Appropriates $20,817,000 for operation of Indian programs instead of $21,310,000 as proposed by the House and $19,310,000 as proposed by the Senate. The total amount appropriated includes $7,000,000 to cover the cost of suppression and emergency prevention of fires, $3,700,000 for social services, and $10,117,000 for contract support.

Amendment No. 9: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $825,000 for construction.

OFFICE OF TERRITORIAL AFFAIRS

Amendment No. 10: Appropriates $49,000,000 for administration of territories instead of $54,000,000 as proposed by the House and $39,000,000 as proposed by the Senate. The total amount appropriated includes $14,000,000 for the Virgin Islands, $10,000,000 for Guam General Grants, of which $5,000,000 is for capital improvements and $5,000,000 is for government operations, and $25,000,000 for Guam health care grants.

Amendment No. 11: Earmarks $35,000,000 for grants to Guam instead of $40,000,000 as proposed by the House and $25,000,000 as proposed by the Senate.

Amendment No. 12: Appropriates $7,009,000 for Trust Territory of the Pacific Islands instead of $7,809,000 as proposed by the House and $5,049,000 as proposed by the Senate. No funds are provided for Rongelap, Utirik, and Bikini community compensation.

RELATED AGENCIES

Department of Agriculture—Forest Service

Amendment No. 13: Appropriates $194,000,000 for forest protection and utilization as proposed by the Senate instead of $204,000,000 as proposed by the House.

Joint Federal-State Land Use Planning Commission for Alaska

Amendment No. 14: Deletes language proposed by the House appropriating $139,000 for salaries and expenses.

CHAPTER V—DEPARTMENT OF LABOR

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

Salaries and expenses

Amendment No. 15: Reported in technical disagreement. The Managers on the part of the House will move to recede and concur in the Senate amendment which increases by $2,000,000 the amount earmarked in fiscal year 1978 for furnishing consultation services to employers under section 21(c) of the Occupational Safety and Health Act.

DEPARTMENTAL MANAGEMENT

Salaries and expenses

Amendment No. 16: Appropriates $1,900,000 as proposed by the Senate, instead of $2,323,000, as proposed by the House.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE CENTER FOR DISEASE CONTROL

Preventive Health Services

Amendment No. 17: Appropriates $1,500,000 for design and engineering for construction of an addition to the Appalachian Laboratory for Occupational Safety and Health, as proposed by the Senate. The House bill contained no funds for this purpose.

Amendment No. 18: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate, which appropriates $8,200,000 to remain available until expended for influenza vaccination.

HEALTH SERVICES ADMINISTRATION

Health services

Amendment No. 19: Appropriates an additional amount of $6,000,000 for the Rural Health Initiative program, as proposed by the Senate. No funds were included in the House bill for this purpose.

NATIONAL INSTITUTES OF HEALTH

National Institute of Allergy and Infectious Diseases

Amendment No. 20: Deletes appropriation of $3,000,000 for research on influenza vaccine proposed by the House but not approved by the Senate.

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION

Construction and Renovation, St. Elizabeth's Hospital

Amendment No. 21: Restores appropriation of $52,200,000 to remain available until expended which was proposed by the House but deleted by the Senate.

HEALTH RESOURCES ADMINISTRATION

Health resources

Amendment No. 22: Appropriates $500,000, instead of the $628,000 proposed by the House. No funds were included in the Senate bill.

HEALTH CARE FINANCING ADMINISTRATION

Amendment No. 23: Restores heading inserted by the House but deleted by the Senate.

QUALITY CARE MANAGEMENT, RESEARCH AND ADMINISTRATION

Amendment No. 24: Deletes appropriation of $400,000 proposed by the House but not approved by the Senate.

Limitation on administrative expenses

Amendment No. 25: Appropriates $8,800,000 of which $5,000,000 may be used only for unanticipated workloads and costs, instead of the $18,797,000 of which $15,000,000 was to be used for unanticipated workloads and costs which was proposed by the House. The Senate bill deleted this item.

OFFICE OF EDUCATION

Student loan insurance fund

Amendment No. 26: Appropriates $223,939,000 as proposed by the House, instead of $180,000,000, as proposed by the Senate.

ASSISTANT SECRETARY FOR HUMAN DEVELOPMENT SERVICES

Human development

Amendment No. 27: Adjusts legal citations.

Amendment No. 28: Appropriates $5,300,000, as proposed by the Senate, instead of $600,000 as proposed by the House.

The amount agreed to by the conferees includes $600,000 for the Vinland National Center, $2,100,000 for the Institute of Physical Medicine and Rehabilitation in Louisville, Kentucky, and $2,600,000 for the Rehabilitation Hospital of the Pacific.

SPECIAL INSTITUTIONS

Amendment No. 29: Reported in technical disagreement. The Managers on the part of the House will move to recede and concur in the Senate amendment, amended to read as follows:

"SPECIAL INSTITUTIONS

"Hereafter, Gallaudet College, Howard University, the National Technical Institute for the Deaf, and the American Printing House for the Blind are authorized to make purchases through the General Services Administration.".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

DEPARTMENTAL MANAGEMENT

Office for Civil Rights

Amendment No. 30: Appropriates $6,900,000 as proposed by the Senate, instead of $7,700,000 as proposed by the House.

The conferees are agreed that the funds provided will permit the filling of up to 449 new positions during fiscal year 1978.

GENERAL DEPARTMENT MANAGEMENT

Amendment No. 31: Deletes appropriation of $359,000 proposed by the House, but not approved by the Senate.

CHAPTER VI—LEGISLATIVE BRANCH

SENATE

Amendments Nos. 32 through 43: Reported in technical disagreement. Inasmuch as these amendments relate solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs without intervention, the managers on the part of the House will offer motions to recede and concur in the Senate amendments Nos. 32 through 43.

OFFICE OF TECHNOLOGY ASSESSMENT

Amendment No. 44: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $1,000,000 and providing 10 additional staff positions for the duration of the project for a comprehensive evaluation of energy policy alternatives.

ARCHITECT OF THE CAPITOL

Capitol Buildings and Grounds

Capitol Buildings

Amendments Nos. 45–46: Appropriate $655,000, of which $635,000 shall remain available until expended, as proposed by the Senate instead of $595,000 of which $575,000 shall remain available until expended, as proposed by the House.

Senate Office Building

Amendment No. 47: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $1,110,000 for various alterations and repairs to Senate office buildings.

Construction of Extension to the New Senate Office Building

Amendment No. 48: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $54,853,000 and placing a ceiling of $135,000,000 on the total cost for construction and initial furnishing of the Hart Office Building.

Library of Congress James Madison Memorial Building

Amendment No. 49: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $7,675,000 for construction and related work on the interior of the James Madison Memorial Building.

Library of Congress

Amendment No. 50: Insert title as proposed by the Senate.

Congressional Research Service

Amendment No. 51: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, which reads as follows:

In lieu of the sum named in said amendment, insert "$50,000".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This amendment appropriates $50,000 instead of $100,000 as proposed by the Senate for two staff positions to strengthen CRS capabilities in the areas of fisheries, marine resource policy, coastal zone management, and other basic elements of ocean policy.

COPYRIGHT OFFICE

Amendment No. 52: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which amends the Legislative Branch Appropriation Act, 1978, by raising the limitation on the amount of receipts from copyright fees collected under Title 17, U.S.C., which can be credited to this appropriation and made available for obligation during the fiscal year 1978 from $3,000,000 to $3,500,000.

CHAPTER VII—DEPARTMENT OF DEFENSE—CIVIL

DEPARTMENT OF THE ARMY

Corps of Engineers—Civil

General Provision

Amendment No. 53: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which adds a general provision relating to the transition period July 1, 1976, to September 30, 1976.

The Conferees agree with the language in the House or Senate report relating to the Sowashee Creek, Mississippi project, the Bethel, Alaska Kuskokwim River project, the Quivira Basin, Mission Bay, California project, and the Pinellas County Beach, Florida, project.

The Conferees direct the Chief of the Corps of Engineers to undertake a preliminary analysis of the serious embankment failure along with north Branch of the Susquehanna River in Forty Fork, Pennsylvania. This analysis is to be presented to the Committees on Appropriations not later than September 15, 1978. The report should detail the work necessary to permanently restore the river bank which was destroyed by Hurricane Agnes. Cost estimates of the work to be accomplished should be included in the study.

CHAPTER VIII—DEPARTMENT OF STATE

INTERNATIONAL ORGANIZATIONS AND CONFERENCES

Missions to international organizations

Amendment No. 54: Appropriates $727,000 as proposed by the Senate instead of $900,000 as proposed by the House.

Amendment No. 55: Deletes proposal of the House to prohibit the use of funds to promote, express, or disseminate the personal views of any official, member, or employee of the United States mission to the United Nations.

DEPARTMENT OF JUSTICE

Legal activities

Salaries and Expenses, Antitrust Division

Amendment No. 56: Deletes proposal of the House to appropriate $628,000.

Salaries and Expenses, United States Attorneys and Marshals

Amendment No. 57: Appropriates $4,495,000 as proposed by the Senate instead of $1,445,000 as proposed by the House.

Amendment No. 58: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which designates $3,050,000 for payments to United States Deputy Marshals for overtime duties performed between 1972 and 1978.

DEPARTMENT OF COMMERCE

Economic Development Administration

Economic Development Assistance Programs

Amendment No. 59: Appropriates $111,500,000 instead of $106,000,000 as proposed by the House and $117,000,000 as proposed by the Senate. The amount provided includes $5,500,000 for title I of which $2,000,000 is for the public works impact program (PWIP).

National Oceanic and Atmospheric Administration

Operations, Research and Facilities

Amendment No. 60: Appropriates $1,238,000 instead of $549,000 as proposed by the House and $1,749,000 as proposed by the Senate.

The conferees are agreed that $400,000 for the increased cost of constructing an aquaculture research laboratory in Newport, Oregon is to be reprogrammed by the Department from existing appropriations made under this heading.

The amount provided includes $689,000 for an S band radar for eastern Kentucky. The conferees are agreed that an additional $111,000 required for such a radar is to be reprogrammed by the Department from appropriations currently available under this heading.

National Fire Prevention and Control Administration

Facilities

Amendment No. 61: Appropriates $6,150,000 as proposed by the Senate, but deletes the words "renovation of".

The conferees are agreed that a Federal fire service training and educational facility is required to meet the need for improved training of the nation's fire service personnel. However, the conferees believe that a site for such a facility which would permit enhancement of the presently planned training program would better serve this need than the present site. Consequently, the conferees are agreed that the funds provided are to be used for the acquisition and improvement of a new site for a national fire academy. The conferees urge the Department of Commerce to begin an expedited search for a new site immediately. In addition, the conferees urge the appropriate authorizing committees of the House and Senate to consider legislation which would make the proceeds of any sale of the Marjorie Webster Junior College site available for the purchase and improvement of the site selected.

Science and Technical Research

Scientific and Technical Research and Services

Amendment No. 62: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: ": *Provided*, That not to exceed $200,000 shall be available from existing appropriations made under this heading to be used for construction and installation of improvements to existing National Bureau of Standards buildings.".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Maritime Administration

Operations and Training

Amendment No. 63: Deletes proposal of the Senate to appropriate an additional $750,000 for improvements to training vessels for State marine schools.

Related Agencies

Small Business Administration

Disaster Loan Fund

Amendment No. 64: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $378,000,000 of which $375,000,000, to remain available without fiscal year limitation, is for disaster loans; and $3,000,000, to be transferred to "Salaries and Expenses", is for processing and administering such loans.

CHAPTER IX—DEPARTMENT OF TRANSPORTATION

COAST GUARD

Acquisition, construction, and improvements

Amendment No. 65: Appropriates $20,000,000 instead of $60,000,000 as proposed by the Senate. The conferees are in agreement that a new icebreaker is required to replace the *Westwind*. The conferees believe that this replacement vessel should be designed so that its primary mission is for icebreaking on the Great Lakes but should also have dual draft capacity to permit icebreaking in other regions during the period of the year not needed in the Great Lakes.

The conferees direct the Coast Guard to proceed with this design in the most expeditious manner and to be in a position to award a construction contract no later than December 31, 1980. The conferees also direct the Coast Guard to report every three months on the progress made in accomplishing this purpose.

FEDERAL RAILROAD ADMINISTRATION

Grants to the National Railroad Passenger Corporation

Amendment No. 66: Appropriates $51,500,000 as proposed by the Senate instead of $29,500,000 as proposed by the House. The conference agreement includes $29,500,000 for operating losses and $22,000,000 for capital improvements.

CHAPTER X—DEPARTMENT OF THE TREASURY

INTERNAL REVENUE SERVICE

Amendment No. 67: Appropriates $9,900,000 for accounts, collection and taxpayer service as proposed by the Senate instead of $5,400,000 as proposed by the House.

Amendment No. 68: Appropriates $1,600,000 for compliance as proposed by the Senate instead of $4,100,000 as proposed by the House.

CHAPTER XI—DEPARTMENT OF DEFENSE—MILITARY

OPERATION AND MAINTENANCE, ARMY

Amendment No. 69: Appropriates $69,487,000 for Operation and Maintenance, Army, as proposed by the Senate instead of $169,487,000 as proposed by the House.

Amendment No. 70: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate making available $100,000,000 by transfer from the Secretary of Defense Readiness Fund, 1978.

OPERATION AND MAINTENANCE, NAVY

Amendment No. 71: Appropriates $66,400,000 for Operation and Maintenance, Navy, as proposed by the Senate instead of $57,900,000 as proposed by the House.

OPERATION AND MAINTENANCE, MARINE CORPS

Amendment No. 72: Appropriates $22,798,000 for Operation and Maintenance, Marine Corps, as proposed by the Senate instead of $16,298,000 as proposed by the House.

CHAPTER XII—MILITARY CONSTRUCTION

MILITARY CONSTRUCTION, NAVY

Amendment No. 73: Appropriates $8,500,000 for highways in Washington State under the defense access roads program of the Department of Defense as proposed by the Senate. The conferees agree that inclusion of these funds under the Navy access roads program with Military Construction funding does not constitute a precedent for future use of such funds where other state or federal funds should be applied.

TITLE II—INCREASED PAY COSTS

ARCHITECT OF THE CAPITOL

Amendment Nos. 74 and 75: Appropriate $484,600 for "Senate office buildings" and $8,400 for "Senate garage" as proposed by the Senate.

DEPARTMENT OF DEFENSE—MILITARY

Military personnel

Amendment No. 76: Appropriates $407,133,000 for Military Personnel, Army, instead of $384,133,000 as proposed by the House and $411,133,000 as proposed by the Senate.

The Army is directed to transfer $4.0 million from National Guard Personnel, Army, to Military Personnel, Army, in accordance with the transfer authority granted to the Secretary of Defense in Section 833 of Public Law 95–111 without further approval of the Appriations Committees.

Amendment No. 77: Appropriates $266,551,000 for Military Personnel, Navy, as proposed by the Senate instead of $257,851,000 as proposed by the House.

Amendment No. 78: Appropriates $10,625,000 for Reserve Personnel, Navy, as proposed by the Senate instead of $19,325,000 as proposed by the House.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Management and Administration

Salaries and expense, Department of Housing and Urban Development

Amendment No. 79: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate decreasing the appropriation amount for salaries and expenses of the Department of Housing and Urban Development by $6,000,000 and adding language providing for the transfer of $6,000,000 from the appropriation for flood insurance.

National Transportation Safety Board

Salaries and Expenses

Amendment No. 80: Appropriates $540,000 as proposed by the Senate instead of $390,000 as proposed by the House.

TITLE III—GENERAL PROVISIONS

Amendment No. 81: Deletes language proposed by the House which would have withheld from obligation and expenditure two per centum of the total budget authority provided in this Act for payments not required by law.

Amendment No. 82: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amending 5 U.S.C. 8332 to provide that a credit shall be allowed for civil service retirement purposes for service as an employee of a Congressional campaign committee.

Amendment No. 83: Reported in technical

disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate applicable to the account entitled "Bureau of the Internal Revenue Refunding Internal Revenue Collections".

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1978 recommended by the Committee of Conference, with comparisons to the budget estimates, and the House and Senate bills follows:

Budget estimates of new (obligational) authority	[1] $7,168,446,986
House bill	6,333,389,186
Senate bill	6,719,228,686
Conference agreement	6,808,778,686
Conference agreement compared with:	
Budget estimates of new (obligational) authority	−359,668,300
House bill	+475,389,500
Senate bill	+89,550,000

[1] Includes $492,560,500 of budget estimates not considered by the House, contained in House Docs. 95-281, 95-331 and 95-335, and Sen. Docs. 95-106, 95-110, 95-113, 95-117, 95-118, 95-119, and 95-121.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. CORCORAN of Illinois) and to revise and extend their remarks and include extraneous matter:)

Mr. KEMP, for 5 minutes, today.
Mr. REGULA, for 5 minutes, today.
Mr. SARASIN, for 15 minutes, today.
Mr. ABDNOR, for 5 minutes, today.
Mr. FINDLEY, for 5 minutes, today.

(The following Members (at the request of Mr. BARNARD) to revise and extend their remarks and include extraneous material:)

Mr. ROSTENKOWSKI, for 30 minutes, today.
Mr. FLOOD, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. TEAGUE, for 5 minutes, today.
Mr. LUNDINE, for 5 minutes, today.
Mr. PHILLIP BURTON, for 5 minutes, today.
Mr. AMBRO, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. STEIGER, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $739.13.

Mr. MURPHY of New York, to add his statement which begins, "Mr. Speaker, H.R. 10878 passed"—to go after the sentence. "They would result in no additional cost to the Federal budget."

(The following Members (at the request of Mr. CORCORAN) and to include extraneous material:)

Mr. STEIGER in two instances.
Mr. GILMAN.
Mr. WINN.
Mr. CRANE.
Mr. MCCLOSKEY.
Mr. ANDERSON of Illinois.
Mr. ASHBROOK in three instances.
Mr. WYDLER.
Mr. EDWARDS of Oklahoma.
Mr. CARTER in two instances.

Mrs. MEYNER in two instances.
Mr. DOWNEY.
Mr. MCDONALD.
Mr. DELANEY.
Mr. WHITE.
Mr. FORD of Michigan.
Mr. FOUNTAIN.
Mr. BRECKINRIDGE in three instances.

ADJOURNMENT

Mr. BARNARD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 52 minutes p.m.), the House adjourned until tomorrow, Friday, August 11, 1978, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4748. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Federal Seed Act (53 Stat. 1275) to update its provisions, and for other purposes; to the Committee on Agriculture.

4749. A letter from the Associate Director of Legislative Liaison, Department of the Air Force, transmitting the semiannual report covering the period January 1 through June 30, 1978, on Air Force research and development procurement actions of $50,000 and more, pursuant to 10 U.S.C. 2357; to the Committee on Armed Services.

4750. A letter from the Secretary of Labor, transmitting his annual report on the administration of the Fair Labor Standards Act of 1938, pursuant to section 4(d)(1) of the act; to the Committee on Education and Labor.

4751. A letter from the Acting Executive Secretary to the Department of Health, Education, and Welfare, transmitting proposed final regulations governing suspension, termination and voiding of assistance under Emergency School Aid, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

4752. A letter from the Acting Executive Secretary to the Department of Health, Education, and Welfare, transmitting proposed final regulations governing the community service and continuing education programs, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

4753. A letter from the Acting Executive Secretary to the Department of Health, Education, and Welfare, transmitting proposed final regulations and guidelines governing support for research and related purposes in the education of the handicapped, pursuant to section 431(d)(1) of the General Education Provisions Act; to the Committee on Education and Labor.

4754. A letter from the Chairman, U.S. Civil Service Commission, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

4755. A letter from the Acting Assistant Secretary of the Interior, transmiting a proposed plan for the use and distribution of Seneca Nation judgment funds in docket 342-G before the Indian Claims Commission, pursuant to sections 2(a) and 4 of Public Law 93-134; to the Committee on Interior and Insular Affairs.

4756. A letter from the Deputy Assistant Secretary of the Interior, transmitting a copy of a proposed research contract with Eagle Crusher Co., Galion, Ohio, for a research project entitled "Portable Crusher For Underground Mining Applications Phase II—Construction and Testing and Phase III—Production Test In Underground Mine," pursuant to section 1(d) of Public Law 89-672; to the Committee on Interior and Insular Affairs.

4757. A letter from the Acting Fiscal Assistant Secretary of the Treasury, transmitting a report on the inventory of nonpurchased foreign currencies as of March 31, 1978, pursuant to section 613(c) of the Foreign Assistant Act of 1961, as amended; to the Committee on International Relations.

4758. A letter from the Administrator, Energy Information Administration, Department of Energy, transmitting a report on changes in market shares of the statutory categories of retail gasoline marketers, covering the month of March 1978, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Interstate and Foreign Commerce.

4759. A letter from the Administrator, Energy Information Administration, Department of Energy, transmitting a report on changes in market shares for refined petroleum products during April 1978, pursuant

to section 4(c)(2)(A) of the Emergency Petrolem Allocation Act of 1973; to the Committee on Interstate and Foreign Commerce.

4760. A letter from the Chairman, U.S. Nuclear Regulatory Commission, transmitting a report covering the quarter ended June 30, 1978, on the Commission's hiring and promotion of minorities and women, pursuant to section 201(h) of the Energy Reorganization Act of 1974, as amended (91 Stat. 1482); to the Committee on Post Office and Civil Service.

4761. A letter from the Comptroller General of the United States, transmitting a report on the problem of housing abandonment (CED–78–126, August 10, 1978); jointly, to the Committees on Government Operations, and Banking, Finance and Urban Affairs.

4762. A letter from the Comptroller General of the United States, transmitting a report on the audit of the accounts of the Minority Printing Clerk, House of Representatives, for the fiscal year ended September 30, 1977, (GGD–78–89, August 9, 1978), pursuant to section 451 of the Legislative Reorganization Act of 1970; jointly, to the Committees on Government Operations, and House Administration.

4763. A letter from the Comptroller General of the United States, transmitting a report on the audit of the accounts of the Majority Printing Clerk, House of Representatives, for the fiscal year ended August 31, 1977 (GGD–78–88, August 9, 1978), pursuant to section 451 of the Legislative Reorganization Act of 1970; jointly, to the Committees on Government Operations, and House Administration.

4764. A letter from the Comptroller General of the United States, transmitting a report on electric energy needs in the Pacific Northwest (EMD–78–76, August 10, 1978); jointly, to the Committees on Government Operations, Interior and Insular Affairs, and Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ULLMAN: Committee on Ways and Means. H.R. 13488. A bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of earned income of U.S. citizens and resident aliens from sources outside the United States, and for other purposes; with amendment (Rept. No. 95–1463). Referred to the Committee of the Whole House on the State of the Union.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 7279. A bill to name the U.S. Customs Court and Federal Office Building at 1 Federal Plaza, New York, N.Y., the "Paul P. Rao U.S. Customs Court and Federal Office Building." (Rept. No. 95–1464). Referred to the House Calendar.

Mr. JOHNSON of California: Committee of Public Works and Transportation. H.R. 7296. A bill to designate the new Terminal Radar Approach Control Federal Building in Hempstead, Long Island, N.Y., as the "Charles A. Lindberg Federal Building". (Rept. No. 95–1465). Referred to the House Calendar.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 7305. A bill to designate a certain Federal building in Champaign, Ill., the "William L. Springer Building" (Rept. No. 95–1466). Referred to the House Calendar.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 12634. A bill to designate the Social Security Administration District Office Building in Pittsburg, Kans., as the "Joe Skubitz Federal Building"; with amendment (Rept. No. 95–1467). Referred to the House Calendar.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 8812. A bill to name a certain Federal building in Jonesboro, Ark., the "E. C. 'Took' Gathings Building" (Rept. No. 95–1468). Referred to the House Calendar.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 11671. A bill to designate a certain Federal building in Big Stone Gap, Va., the "C. Bascom Slemp Building" (Rept. No. 95–1469). Referred to the House Calendar.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 13187. A bill to designate the U.S. Post Office and Federal Building in Griffin, Ga., the "John J. Flynt, Jr. Federal Building"; with amendment (Rept. No. 95–1470). Referred to the House Calendar.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 13481. A bill to name the post office and Federal building in Portland, Maine, the "Frederick G. Payne Building"; (Rept. No. 95–1471). Referred to the House Calendar.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 13514. A bill to name a certain Federal building in Shreveport, La., the "Joe Waggonner Federal Building"; with amendment (Rept. No. 95–1472). Referred to the House Calendar.

Mr. MEEDS: Committee on Rules. House Resolution 1307. Resolution providing for the consideration of H.R. 11280. A bill to reform the civil service laws (Rept. No. 95–1473). Referred to the House Calendar.

Mr. MURPHY of New York: Committee of conference. Conference report on S. 9 (Rept. No. 95–1474). Ordered to be printed.

Mr. MAHON: Committee of conference. Conference report on H.R. 13467 (Rept. No. 95–1475). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ABDNOR (for himself and Mr. ANDREWS of North Dakota):

H.R. 13820. A bill to establish the Great Prairie Lakes National Recreation Area in the States of South Dakota, North Dakota, and Nebraska, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. PHILLIP BURTON (for himself, Mr. CHARLES WILSON of Texas, Mr. GLICKMAN, Mr. DICKS, Mr. CONYERS, Mr. FAUNTROY, Mr. HARRINGTON, Mr. RISENHOOVER, Mrs. COLLINS of Illinois, Mr. PRICE, Ms. OAKAR, Mr. AMBRO, Mr. DICKS, Mr. ROE, Mr. CARNEY, Mr. PEPPER, Mr. MIKVA, Mr. CHARLES H. WILSON of California, Mr. JONES of North Carolina, Mr. AUCOIN, Mr. RUSSO, Mr. TUCKER, Mr. FOLEY, and Mr. RYAN):

H.R. 13821. A bill to provide that the Territory of American Samoa be represented by a nonvoting Delegate to the U.S. House of Representatives, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. COHEN (for himself and Mr. PEPPER):

H.R. 13822. A bill to amend title XVIII of the Social Security Act to provide for the enforcement of standards relating to the rights of patients in certain medical facilities; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. FORSYTHE:

H.R. 13823. A bill to authorize appropriations to carry out the Endangered Species Act of 1973 through fiscal year 1981 and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. GEPHARDT (for himself, Mr. HOLLAND, Mr. MADIGAN, Mr. HAGEDORN, Mr. PATTERSON of California, Mr. BALDUS, Mr. VENTO, Mr. FRENZEL, Mr. WEISS, Mr. EVANS of Georgia, and Mr. AMMERMAN):

H.R. 13824. A bill to provide that future Federal employees will be covered by social security and may elect not to be covered by the applicable Federal employees retirement system, that current Federal employes may elect to be covered by social security and if they so elect to discontinue being covered by a retirement system for Federal employees and have retirement credits under any such system transferred to social security; jointly, to the Committee on Ways and Means, and Post Office and Civil Service.

By Mr. GRADISON (for himself and Mr. MOTTL):

H.R. 13825. A bill to amend the Internal Revenue Code of 1954 to provide for automatic cost-of-living adjustments in the income tax and withholding rates; to the Committee on Ways and Means.

By Mr. LEACH (for himself, Mr. ABDNOR, Mr. AUCOIN, Mr. BEDELL, Mr. BEVILL, Mr. CARR, Mr. CAVANAUGH, Mr. COCHRAN of Mississippi, Mr. COLEMAN, Mr. CORCORAN of Illinois, Mr. ERTEL, Mr. GAMMAGE, Mr. GRASSLEY, Mr. HEFTEL, Mr. JEFFORDS, Mr. KINDNESS, Mr. LAGOMARSINO, Mr. LOTT, Mr. MARLENEE, Mr. MITCHELL of New York, Mr. PRICE, Mr. STOCKMAN, Mr. THONE, and Mr. WHITTEN):

H.R. 13826. A bill to amend the Internal Revenue Code of 1954 to provide that certain farm buildings shall be eligible for the investment tax credit; to the Committee on Ways and Means.

By Mr. OTTINGER:

H.R. 13827. A bill to require Government contractors to establish and operate alcohol abuse and alcoholism programs and services, or otherwise arrange for referral to such services, and for other purposes; to the Committee on Education and Labor.

By Mr. PANETTA (for himself, Mr. GEPHARDT, Mr. BAFALIS, Mr. GRADISON, Mr. HANNAFORD, Mr. HEFTEL, Mr. HOLLAND, Ms. KEYS, Mr. KINDNESS, Mr. PATTISON of New York, Mr. STEERS, Mr. TUCKER, and Mr. WHITEHURST):

H.R. 13828. A bill relating to the independent contractor status of individuals for employment tax purposes; to the Committee on Ways and Means.

By Mr. REGULA:

H.R. 13829. A bill to amend the Internal Revenue Code of 1954 to allow certain federally required nonproductive expenditures to be treated as expenses and for other purposes; to the Committee on Ways and Means.

By Mr. SIKES:

H.R. 13830. A bill to amend title 38, United States Code, to provide that a member of the Armed Forces who dies while on active duty shall be considered to be a veteran for purposes of the entitlement of such member's survivors to medical care under the civilian health and medical program of the Veterans' Administration; to the Committee on Veterans' Affairs.

H.R. 13831. A bill to amend chapter 55 of title 10, United States Code, to authorize the provision of medical and dental care to surviving spouses of members and certain former members of the uniformed services who are not remarried; to the Committee on Armed Services.

By Mr. WEAVER:

H.R. 13832. A bill to establish pilot projects for testing and demonstrating practical application of technology for the utilization of wood residues from timber harvesting, forest protection and management, and the

manufacture of wood products, to the Committee on Agriculture.

By Mr. BURLISON of Missouri:

H.J. Res. 1111. Joint resolution raising the price support levels for milk, wheat, corn, soybeans, and cotton to 90 percent of the respective parity prices therefor, and for other purposes; to the Committee on Agriculture.

By Mr. DORNAN:

H.J. Res. 1112. Joint resolution to provide an end to the persecution of religion and genocide in Equatorial Guinea; to the Committee on International Relations.

H.J. Res. 1113. Joint resolution directing the Administrator of Veterans' Affairs to recommend to the Congress ways of improving the quality of health care provided the Nation's aging veterans; to the Committee on Veterans' Affairs.

By Mr. RONCALIO (for himself, Mr. CORRADA, Mr. LAGOMARSINO, Mr. LAFALCE, Mr. VENTO, Mr. ANDERSON of California, and Mr. NOLAN):

By Mr. TSONGAS (for himself and Mrs. SPELLMAN):

H. Con. Res. 691. Concurrent resolution expressing congressional disapproval of the denial by the Government of the Soviet Union of the right to emigrate and the harassment and imprisonment by that Government of individuals who desire to emigrate; to the Committee on International Relations.

By Mr. BROOKS:

H. Res. 1308. Resolution to disapprove Reorganization Plan No. 4 transmitted by the President on August 10, 1978; to the Committee on Government Operations.

By Mr. DOWNEY:

H. Res. 1309. Resolution disapproving the modification of certain shipbuilding contracts between the Department of the Navy and General Dynamics Corp.; to the Committee on Armed Services.

H. Res. 1310. Resolution disapproving the modification of certain shipbuilding contracts between the Department of the Navy and Litton Systems, Inc.; to the Committee on Armed Services.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. ROBERT W. DANIEL, JR., introduced a bill (H.R. 13833) for the relief of Gina Marie S. Hernandez, which was referred to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

The SPEAKER presented a petition of the Michigan Aeronautics Commission, Lansing, Mich., relative to airport development, which was referred jointly, to the Committees on Public Works and Transportation, and Ways and Means.

AMENDMENTS

Under clause 6 of the rule XXIII, proposed amendments were submitted as follows:

H.R. 11280

By Mr. BONIOR:

(Amendment to section 3303a. in section 304(a).)

"(3) Notwithstanding the time limitation of subparagraph (1) of this section, an individual whose service on or subsequent to August 5, 1934, is the basis for awarding the Vietnam Service Medal or the Armed Forces Expeditionary Medal for Vietnam and who has not received an appointment to a position that is not time limited, is entitled to use of preference until such appointment is received or until December 31, 1985, whichever occurs first."

H.R. 11280

By Mr. CLAY:

—Page 129, in the table of contents for title I add the following:

"SEC. 102. Category Rating."

—Page 144, after line 2, insert the following:

"CATEGORY RATING

"SEC. 102. Title 5, United States Code, is amended by inserting the following new section:

"'§ 3327. Category rating.

"'Notwithstanding the provisions of this subchapter, whenever the Office of Personnel Management measures the qualifications of job candidates by oher than written tests, it may provide that individuals shall be evaluated in accordance with a category rating system which divides the whole body of qualified applicants into three or more groups. An appointing official may select any individual within the top category, or if at least three candidates have not received such a rating, any individual in the next highest category or from lower categories if necessary to provide the appointing officer with at least three applicants from which to choose, provided that:

"'(1) Five or ten points based on a scale of 100, or the equivalent preference shall be added to the rating of a preference eligible for the purpose of assigning the individual to an appropriate category,

"'(2) within the group of candidates being considered for selection, a preference eligible in a higher category may not be passed over to select a nonveteran from a lower category unless objection is approved under section 3318(b) of this title, and

"'(3) except for scientific and professional positions in GS-9 or higher, a preference eligible under section 2108(3)(c) of this title, who has a compensable service-connected disability of 10 percent or more, shall be placed in the highest category and shall not be passed over to select anyone other than such a preference eligible in that category unless an objection is made to the preference eligible and sustained for proper and adequate reasons under regulations established by Office of Personnel Management. Such objections shall be processed in accordance with procedures provided in section 3318 (b) of this title'".

—On page 133, line 11, strike the word "and"

On page 133, line 12, insert the following:

"(4) government operations; and

"(5) the General Accounting Office."

—On page 144, strike lines 17 through 20, and insert the following in lieu thereof:

"(a)(1) There is at the head of the Office of Personnel Management a Director of the Office of Personnel Management appointed by the President, by and with the advise and consent of the Senate for a term of four years coterminous with that of the President.

(a)(2) The Director may be removed by the President only for inefficiency, neglect of duty, or malfeasance in office."

—On page 145, strike lines 7 through 10 and insert the following in lieu thereof:

"(c) no person shall, while serving as Director, or Deputy Director, serve in any other office or position in the Government of the United States except as otherwise provided by law or at the direction of the President, except that the Director or Deputy Director shall not advise the President concerning political appointments."

—Page 145, line 18, insert "except as otherwise provided in section 1104(a) of this title.".

Page 147, 5, strike out "service." and insert in lieu thereof "service;"

Page 147, after line 5, insert the following:

except that the Director may not delegate the function of executing, administering, and enforcing the civil service rules and regulations of the President and the Office and the statutes governing the civil service.

—Page 146, after line 12, insert the following:

"(6) providing, notwithstanding any other provisions of this title, whenever the Office of Personnel Management measures the qualifications of job candidates by other than written tests, that individuals may be evaluated in accordance with a category rating system which divides the whole body of qualified applicants into three or more groups. An appointing official may select any individual within the top category, or if at least three candidates have not received such a rating, any individual in the next highest category or from lower categories if necessary to provide the appointing officer with at least three applicants from which to choose, provided that:

"(1) Five or ten points based on a scale of 100, or the equivalent preference shall be added to the rating of a preference eligible for the purpose of assigning the individual to an appropriate category,

"(2) within the group of candidates being considered for selection, a preference eligible in a higher category may not be passed over to select a nonveteran from a lower category unless objection is approved under section 3318(b) of this title, and

"(3) except for scientific and professional

positions in GS–9 or higher, a preference eligible under section 2108(3)(c) of this title, who has a compensable service-connected disability of 10 percent or more, shall be placed in the highest category and shall not be passed over to select anyone other than such a preference eligible in that category unless an objection is made to the preference eligible and sustained for proper and adequate reasons under regulations established by Office of Personnel Management. Such objections shall be processed in accordance with procedures provided in section 3318(b) of this title".

Page 146, line 13, strike "(6)" and insert, in lieu thereof, "(7)".

Page 146, line 15, strike "(7)" and insert, in lieu thereof "(8)".

—On page 146, line 16, insert immediately after "examinations" the following:

"(except competitive examinations for administrative law judges appointed under section 3105 of this title for service in any grade above GS–15 of the General Schedule)".

—Page 149, line 20, after "party", insert the following:

"No more than two members of the Board shall be from the same race, sex, or ethnic group."

—On page 150, line 2, after the words "United States." insert the following words:

"One member of the Board shall be selected from among individuals who serve in the competitive service.".

—Page 152, after line 22, insert the following:

"(e) The Merit Systems Protection Board shall submit its request for annual appropriations to the Office of Management and Budget and to the Congress."

—Page 152, after line 22, insert the following:

(e) The Merit Systems Protection Board shall report annually to the President and to the Congress on the adjudication of appeals to the Board, actions taken on allegations of prohibited personnel practices, and protection provided to employees under section 2302(b)(8) of this title. In addition, the Merit Systems Protection Board shall conduct special studies relating to the civil service and review annually the policies and program decisions in the evaluation and enforcement actions of the Office of Personnel Management, and report annually to the President and to the Congress as to whether the public interest in a civil service based on merit system principles and free of prohibited personnel practices is being adequately protected.

—On page 164, lines 23 and 24, strike the phrase "an order" and insert in lieu thereof "a final order".

—On page 168, strike lines 10 through 13 and insert the following in lieu thereof:

"(3) 'unacceptable performance' means performance of an employee which fails to meet established performance standards of the employee's position when the employee's job performance is considered as a whole."

—Page 174, line 10, strike out "subchapters I and II" and insert in lieu thereof "subchapters I, II, and III".

Page 57, after line 20, insert the following:

"SUBCHAPTER III—ADMINISTRATIVE LAW JUDGES

"7521. Actions against administrative law judges

"(a) An action may be taken against an administrative law judge appointed under section 3105 of this title by the agency in which he is employed only for good cause established and determined by the Merit Systems Protection Board on the record after opportunity for hearing before the Board. An administrative law judge may obtain judicial review of any final order or decision by the Board under this section under section 7702 of this title.

"(b) Actions covered by this section are as follows:

"(1) a removal;

"(2) a suspension;

"(3) a reduction in grade;

"(4) a reduction in pay;

"(5) a furlough of 30 days or less; and

"(6) a written reprimand or admonition based on the exercise of his adjudication responsibilities;

except that such actions do not include:

"(A) a suspension or removal under section 7532 of this title;

"(B) a reduction in force action under section 3502 of this title; or

"(C) an action initiated under section 1206 of this title.".

—On page 178, line 13, insert a semicolon after the word "suspension", and delete all words after the word "suspension" on that line.

—On page 178, strike lines 18 and 19 and redesignate the following paragraphs accordingly.

—On page 183, lines 16 and 17, strike out "only if the agency's decision is supported by a preponderance of evidence" and insert in lieu thereof "by substantial evidence."

—On page 184, lines 6 and 7, strike the phrase "or the Director of the Office of Personnel Management."

—On page 184, lines 6 and 7, strike the words "or the Director of the Office of Personnel Management."

—On page 187, lines 18 through 20, strike the sentence "If the court determines that further evidence is necessary, it shall remand the case to the Board.", and insert in lieu thereof, "If the court determines that further evidence is necessary, it shall, if it is the Court of Claims, remand the case to its trial division or, if it is the United States District Court, take testimony or in its discretion, the Courts may remand the case to the Board."

—On page 215, line 2, after "section," insert "and except as provided in paragraph (2),".

On page 216, after line 4, insert the following:

(2) In order to insure impartiality in, and the public's confidence in the impartiality of, the Federal Government, any position—

"(A) in the Bureau of the Census of the Department of Commerce which is filled by an employee in the competitive service on August 1, 1978, or

"(B) in a successor unit of the unit described in subparagraph (A) the primary responsibilities of which—

"(i) are similar to a position described in subparagraph (A), or

"(ii) were, prior to the creation of the successor unit, performed by an employee in the competitive service,

which is to be placed in the Senior Executive Service shall be designated a career reserved position.".

—On page 288, line 11, strike out the period.

—On page 288, after line 11, insert the following:

EMPLOYEE ORGANIZATIONS

SEC. 3. (a)(1) Section 304 of the Intergovernmental Personnel Act of 1970 is amended by redesignating subsection (b) as subsection (c), and by inserting after subsection (a) the following new subsection:

"(b) The Commission is authorized to make grants to employee organizations to pay up to 75 per centum (or, with respect to fiscal years commencing on and after October 1, 1978, up to 50 per centum) of the costs of providing training of officers and employees of employee organizations, and of employees of State and local governments, to enable their effective participation in labor-management relations if the Commission—

"(1) determines that the capability to provide such training does not exist, or is not readily available, within the employee organization or within any organization, council, or federation with which such employee organization is affiliated, or if such capability does not exist that such organization, council, or federation is not disposed to provide such training, and

"(2) approves the program with respect to which such grants are to be made as meeting such requirements as may be prescribed by the Commission in its regulations pursuant to this Act.

Such a program may not be approved unless it covers training related to the following: the techniques of negotiation; interpretation of collective-bargaining agreements; use of grievance procedures; or orientation in public sector labor relations laws and administrative orders, the role of civil service commissions (or equivalent agencies), antidiscrimination laws and procedures, statutory employee appeal procedures, position, classification processes, or mediation and arbitration processes and procedures. An application to be submitted to the Commission under this subsection shall first be submitted by the employee organization to the Governor for review, comments, and recommendations. The Governor may refer the application to the State office designated under section 202(b)(1) of this Act for review. Comments and recommendations (if any) made as a result of the review, and a statement by the employee organization that it has considered the comments and recommendations of the Governor, shall accompany the application to the Commission. The application need not be accompanied by the comments and recommendations of the Governor if the employee organization certifies to the Commission that the application has been before the Governor for review and comment for a period of sixty days without comment by the Governor. An explanation in writing shall be sent to the Governor of a State by the Commissioner whenever the Commission does not concur with recommendations of the Governor in approving any employee organization applications."

(2) Section 304(c) of such Act, as redesignated by paragraph (1) of this subsection, is amended by striking out "For the purpose of this section" and inserting in lieu thereof "For the purpose of subsection (a) of this section".

(3) Section 301 of such Act is amended by inserting immediately after "State and local government employees and officials" the following: ", and officers and employees of certain employee organizations,".

(b)(1) Section 202(b) of such Act, relating to personnel administration grant applications, is amended by striking out "and" at the end of paragraph (4), by striking out the period at the end of paragraph (5) and inserting in lieu thereof a semicolon, and by adding at the end thereof the following new paragraphs:

"(6) provides assurance that the State office designated under paragraph (1) of this subsection will, within thirty days after any program or project has been approved which relates to the formulation of policies and procedures affecting conditions of employment of State and local government employees, transmit a summary of such program or project to any employee organization which has notified such State office that it wishes to receive such summaries; and

"(7) provides that the State office designated in paragraph (1) of this subsection shall (subject to subsection (c) of this section) make available at a reasonable time and place to any employee organization entitled under paragraph (6) of this subsection to receive a summary of a program or project, all records (such as reports, survey results, survey data, manuals, document col-

lections and models) regarding such program or project."

(2) Section 202 of such Act is amended by adding at the end thereof the following new subsection:

"(c) The State office designated under subsection (b)(1) of this section shall specify a uniform fee schedule applicable to requests for records under subsection (b)(7) of this section. Such fees shall be limited to reasonable standard charges for document searches and duplication and provide for recovery of only the direct costs of such searches and duplication."

(c) Section 502 of such Act is amended by striking out "and" at the end of paragraph (3) by striking out the period at the end of paragraph (4) and inserting in lieu thereof "; and", and by adding at the end thereof the following new paragraph:

"(5) 'employe organization' means any organization, union, association, agency, committee, council, or group of any kind in which State and local government employees participate, a primary purpose of which is to represent State and local government employees in matters concerning wages, hours, or other terms and conditions of employment."

—Page 361, after line 19, insert the following:

TITLE IX—POLITICAL ACTIVITIES

FEDERAL EMPLOYEES' POLITICAL ACTIVITIES

SEC. 901. (a) Subchapter III of chapter 73 of title 5, United States Code, is amended to read as follows:

"Subchapter III—Political Activities

"§ 7321. Political participation

"It is the policy of the Congress that employees shou'd be encouraged to fully exercise, freely and without fear of penalty or reprisal, and to the extent not expressly prohibited by law—

"(1) their rights to participate or to refrain from participating in the political processes of our Nation, and

"(2) their rights to form, join, or assist, or to refrain from forming, joining, or assisting, any organization, political party, committee, association, or other group which advocates or encourages political activities,

and that employees should be protected in the exercise of these rights.

"§ 7322. Definitions

"For the purpose of this subchapter—

"(1) 'employee' means any individual, other than the President and the Vice President, employed or holding office in—

"(A) an Executive agency;

"(B) the government of the District of Columbia; or

"(C) a position within the competitive service, or within the Senior Executive Service as a career appointee (as defined in section 3132(a)(4) of this title), which is not in an entity referred to in subparagraphs (A) through (C);

but does not include a member of the uniformed services;

"(2) 'candidate' means any individual who seeks nomination for election, or election, to any elective office, whether or not such individual is elected, and, for the purpose of this paragraph, an individual shall be considered to seek nomination for election, or election, to an elective office, if such individual has—

"(A) taken the action required to qualify for nomination for election, or election; or

"(B) received political contributions or made expenditures, or has given consent for any other person to receive political contributions or make expenditures, with a view to bringing about such individual's nomination for election, or election, to such office;

"(3) 'political contribution'—

"(A) means a gift, subscription, loan, advance, or deposit of money or anything of value, made for any political purpose;

"(B) includes a contract, promise, or agreement, expressed or implied, whether or not legally enforceable, to make a political contribution for any political purpose;

"(C) includes the payment by any person, other than a candidate or a political party or affiliated organization, of compensation for the personal services of another person which are rendered to such candidate or political party or affiliated organization without charge for any political purpose; and

"(D) includes the provision of personal service for any political purpose;

"(4) 'superior' means an employee who exercises supervision of, or control or administrative direction over, another employee;

"(5) 'elective office' means any elective public office and any elective office of any political party or affiliated organization;

"(6) 'State' means each of the several States and the District of Columbia;

"(7) 'person' means any individual, corporation, trust, association, any State, local, or foreign government, any territory or possession of the United States, or any agency or instrumentality of any of the foregoing; and

"(8) 'restricted position' means any position with respect to which there is in effect a determination by the Office of Personnel Management, by regulation, that—

"(A) the duties and responsibilities of such position require such employee—

"(i) as a substantial part of his official activities, to engage in foreign intelligence activities relating to national security;

"(ii) in the normal course of carrying out such duties and responsibilities—

"(I) to make decisions binding on employees with respect to whom he is a superior with regard to who shall be the subject of any action which is to be taken by any such employee in connection with the enforcement of any civil or criminal law (including any inspection or audit under any such law);

"(II) to actually carry out any such action; or

"(III) to make a final determination with respect to any such action; or

"(iii) in the normal course of carrying out such duties and responsibilities—

"(I) to make binding decisions on who shall be awarded contracts which are for the procurement of goods or services for the Government and which have substantial monetary value, or who shall be awarded licenses, grants, subsidies, or other benefits, which involve funds or other interests having a substantial monetary value; or

"(II) to supervise individuals engaged in the awarding, administering, or monitoring of such contracts, licenses, grants, subsidies, or benefits; and

"(B) the restrictions on political activity imposed on such employee in such position are justified in order to insure the integrity of the Government or the public's confidence in the integrity of the Government.

"§ 7323. Use of official influence or official information; prohibition

"(a) An employee may not directly or indirectly use or attempt to use the official authority or influence of such employee for the purpose of—

"(1) interfering with or affecting the result of any election; or

"(2) intimidating, threatening, coercing, commanding, influencing, or attempting to intimidate, threaten, coerce, command, or influence—

"(A) any individual for the purpose of interfering with the right of any individual to vote as such individual may choose, or of causing any individual to vote, or not to vote, for any candidate or measure in any election;

"(B) any person to give or withhold any political contribution; or

"(C) any person to engage, or not to engage, in any form of political activity whether or not such activity is prohibited by law.

"(b) An employee may not directly or indirectly use or attempt to use, or permit the use of, any official information obtained through or in connection with his employment for any political purpose, unless such official information is available to the general public.

"(c) For the purpose of subsection (a) of this section, 'use of official authority or influence' includes—

"(1) promising to confer or conferring any benefit (such as any compensation, grant, contract, license, or ruling) or effecting or threatening to effect any reprisal (such as deprivation of any compensation, grant, contract, license, or ruling); or

"(2) taking, directing others to take, recommending, processing, or approving any personnel action (as defined in section 2302(a)(2)(A) of this title).

"§ 7324. Solicitation; prohibition

"(a) An employee may not—

"(1) give or offer to give a political contribution to any individual either to vote or refrain from voting, or to vote for or against any candidate or measure, in any election;

"(2) solicit, accept, or receive a political contribution to vote or refrain from voting, or to vote for or against any candidate or measure, in any election;

"(3) knowingly give or hand over a political contribution to a superior of such employee; or

"(4) knowingly solicit, accept, or receive, or be in any manner concerned with soliciting, accepting, or receiving, a political contribution—

"(A) from another employee (or a member of another employee's immediate family) with respect to whom such employee is a superior; or

"(B) in any room or building occupied in the discharge of official duties by—

"(i) an individual employed or holding office in the Government of the United States, in the government of the District of Columbia, or in any agency or instrumentality of the foregoing; or

"(ii) an individual receiving any salary or compensation for services from money derived from the Treasury of the United States.

"(b) In addition to the prohibitions of subsection (a) of this section, an employee holding a restricted position may not solicit, accept, or receive a political contribution from, or give a political contribution to, any individual who is an employee, a Member of Congress (or a candidate for such office), or a member of a uniformed service, or any agent of any such individual. The preceding sentence shall not be construed to prohibit an employee from giving a political contribution to a political committee.

"(c)(1) In addition to the prohibitions of subsection (a) of this section, an employee may not solicit, accept, or receive a political contribution from, or give a political contribution to, any person who—

"(A) has, or is seeking to obtain, contractual or other business or financial relations with the agency in which the employee is employed;

"(B) conducts operations or activities which are regulated by such agency; or

"(C) has interests which may be substantially affected by the performance or non-

performance of such employee's official duties.

"(2) The Office of Personnel Management shall prescribe regulations which exempt an employee from the application of paragraph (1) of this subsection with respect to any political contribution to or from an individual who has a family or personal relationship with the employee if the employee complies with such requirements as the Office shall so prescribe which relate to the disqualification of such employee from engaging in any official activity involving such individual.

"(3) The Office of Personnel Management shall prescribe regulations which exempt the application of paragraph (1) of this subsection with respect to any political contribution from a person in situations in which the facts and circumstances indicate there would not be any adverse effect on the integrity of the Government or the public's confidence in the integrity of the Government.

"§ 7325. Political activities on duty, etc.; prohibition

"(a) An employee may not engage in political activity—

"(1) while such employee is on duty;

"(2) in any room or building occupied in the discharge of official duties by an individual employed or holding office in the Government of the United States, in the government of the District of Columbia, or in any agency or instrumentality of the foregoing; or

"(3) while wearing a uniform or official insignia identifying the office or position of such employee.

"(b) The provisions of subsection (a) of this section shall not apply to—

"(1) an employee—

"(A) paid from the appropriation for the White House Office;

"(B) paid from funds to enable the Vice President to provide assistance to the President; or

"(C) on special assignment to the White House Office;

"(2) the Mayor of the District of Columbia, the Chairman or a member of the Council of the District of Columbia; or

"(3) any activity of an employee which is not otherwise prohibited by or under law and which is part of such individual's official duties.

"(c) Nothing in this section shall be construed to authorize an employee designated in subsection (b) of this section to engage in political activity otherwise prohibited by or under law.

"(d)(1) In addition to the prohibitions of subsection (a) of this section, an employee holding a restricted position may not take an active part in political management or political campaigns unless such part—

"(A) is in connection with—

"(i) an election and preceding campaign if none of the candidates is to be nominated or elected at that election as representing a party any of whose candidates for Presidential elector received votes in the last preceding election at which Presidential electors were selected; or

"(ii) a question which is not specifically identified with a National or State political party or political party of a territory or possession of the United States; or

"(B) is permitted by regulations prescribed by the Office of Personnel Management and involves the municipality or political subdivision in which such employee resides, when—

"(i) the municipality or political subdivision is in Maryland or Virginia and in the immediate vicinity of the District of Columbia or is a municipality in which a majority of voters are employed by the Government of the United States; and

"(ii) the Office determines that because of special or unusual circumstances which exist in the municipality or political subdivision it is in the domestic interest of the employees to permit political participation.

"(2) For the purpose of this subsection, 'an active part in political management or in political campaigns' means those acts of political management or political campaigning which were prohibited on the part of employees in the competitive service before July 19, 1940, by the determinations of the Civil Service Commission under the rules prescribed by the President.

"§ 7326. Candidates for elective office; leave, notification by employees

"(a) An employee shall promptly notify the agency in which he is employed upon becoming a candidate for elective office and upon the termination of such candidacy.

"(b) An employee who is a candidate for elective office shall, upon the request of such employee, be granted leave without pay for the purpose of allowing such employee to engage in activities relating to such candidacy.

"(c) Notwithstanding section 6302(d) of this title, an employee who is a candidate for elective office shall, upon the request of such employee, be granted accrued annual leave for the purpose of allowing such employee to engage in activities relating to such candidacy. Such leave shall be in addition to leave without pay to which such employee may be entitled under subsection (b) of this section.

"(d) The foregoing provisions of this section shall not apply in the case of an individual who is an employee by reason of holding an elective public office.

"§ 7327. Penalties

"(a) An employee who is found by the Merit Systems Protection Board under section 1207 of this title to have violated any provision of—

"(1) section 7323 of this title shall, upon a final order of the Board, be suspended without pay from such employee's position for a period of not less than 30 days, or shall be removed in which event that employee may not thereafter hold any position (other than an elected position) as an employee (as defined in section 7322(1) of this title);

"(2) section 7324 or 7325 of this title shall, upon a final order of the Board, be—

"(A) removed from such employee's position, in which event that employee may not thereafter hold any position (other than an elected position) as an employee (as defined in section 7322(1) of this title) for such period as the Board may prescribe;

"(B) suspended without pay from such employee's position for such period as the Board may prescribe; or

"(C) disciplined in such other manner as the Board shall deem appropriate.

"(b) The Merit Systems Protection Board shall notify the Special Counsel, the employee, and the employing agency of any penalty imposed under this section. The employing agency shall certify to the Board the measures undertaken to implement the penalty.

"§ 7328. Regulations

"(a) The Office of Personnel Management and the Merit Systems Protection Board shall prescribe rules and regulations to carry out their respective responsibilities under this subchapter.

"(b) The regulations referred to in section 7322(8) of this title be prescribed not later than 90 days after the effective date of such section. Thereafter any revision of such regulations shall be prescribed not later than March 1 of the calendar year in which such revision is to take effect. Any employee holding any position with respect to which any such regulation is prescribed may institute an action for judicial review of such regulation by filing a petition in the United States Court of Appeals for the District of Columbia Circuit, or in the United States court of appeals for the judicial circuit in which such employee resides or is employed, except that no such action may be instituted more than 30 days after the effective date of such regulation.".

(b)(1) Section 3302(2) of title 5, United States Code, is amended by striking out "7321, and 7322" and inserting "and" before "7203" (as added in section 703(d)(2) of this Act).

(2) Section 1308(a) of title 5, United States Code, is amended—

(A) by inserting "and" at the end of paragraph (2);

(B) by striking out paragraph (3); and

(C) by redesignating paragraph (4) as paragraph (3).

(3) The second sentence of section 8332(k)(1) of title 5, United States Code, is amended by striking out "second" and inserting "last" in lieu thereof.

(4) The section analysis for subchapter III of chapter 73 of title 5, United States Code, is amended to read as follows:

"Subchapter III—Political Activities

"7321. Political participation.
"7322. Definitions.
"7323. Use of official influence or official information; prohibition.
"7324. Solicitation; prohibition.
"7325. Political activities on duty, etc.; prohibition.
"7326. Candidates for elective office; leave, notification by employees.
"7327. Penalties.
"7328. Regulations.".

(c) Sections 602 and 607 of title 18, United States Code, relating to solicitations and making of political contributions, are each amended by adding at the end thereof the following new sentence: "This section does not apply to any activity of an employee, as defined in section 7322(1) of title 5, unless such activity is prohibited by section 7324 of that title.".

(d) Section 6 of the Voting Rights Act of 1965 (42 U.S.C. 1973d) is amended by striking out "the provisions of section 9 of the Act of August 2, 1939, as amended (5 U.S.C. 118i), prohibiting partisan political activity" and by inserting in lieu thereof "the provisions of subchapter III of chapter 73 of title 5, United States Code, relating to political activities, as enforced under section 1206 and 1207 of such title,".

(e) Sections 103(a)(4)(D) and 203(a)(4)(D) of the District of Columbia Public Education Act are each amended by striking out "sections 7324 through 7327 of title 5" and inserting in lieu thereof "section 7325 of title 5".

(f) Sections 8332(k)(1), 8706(e), and 8906(e)(2) of title 5, United States Code, are each amended by inserting immediately after "who enters on" the following: "leave without pay granted under section 7326(b) of this title, or who enters on".

EFFECTIVE DATE

SEC. 902. (a) The amendments made by this title shall take effect 120 days after the date of the enactment of this Act, except that the authority to prescribe regulations granted under section 7328 of title 5, United States Code (as added by section 901 of this title), shall take effect on the date of the enactment of this Act.

(b) Any repeal or amendment made by this title of any provision of law shall not release or extinguish any penalty, forfeiture, or liability incurred under such provision,

and such provision shall be treated as remaining in force for the purpose of sustaining any proper proceeding or action for the enforcement of such penalty, forfeiture, or liability.

(c) No provision of this title shall affect any proceedings with respect to which the charges were filed on or before the effective date of the amendments made by this title. Orders shall be issued in such proceedings and appeals shall be taken therefrom as if this title had not been enacted.

(d) If—

(1) subchapter III of chapter 73 of title 5, United States Code, applied to any category of individuals employed by any Federal agency or instrumentality immediately before the effective date of the amendments made by this title; and

(2) such subchapter, as amended by this title, does not apply to such category of individuals; then such subchapter, as in effect immediately before the effective date of the amendments made by this ttile, shall continue to apply to such category of individuals, notwithstanding section 901(a) or any other provision of law.

STUDY CONCERNING POLITICAL PARTICIPATION BY FEDERAL EMPLOYEES

SEC. 903. The Office of Personnel Management shall study and review the effects of the amendments made by this title on—

(1) the level of participation by Federal employees in activities relating to Federal, State, and local elections;

(2) the merit system particularly the hiring, termination, or advancement of Federal employees; and

(3) matters generally affecting and contributing to the improper use of official influence or official information by Federal employees as prohibited under subchapter III of chapter 73 of title 5, United States Code (as amended by this title).

The Office shall report to the Congress not later than March 31, 1980, and March 31, 1982, the results of such study and review any findings therefrom together with such legislative or administrative recommendations as the Office considers appropriate.

Conform the table of contents accordingly.

—On page 383, after line 14, insert the following:

APPLICATION OF LOCAL WITHHOLDING TAXES

That (a) the second sentence of section 5520(a) of title 5, United States Code, is amended to read as follows: "The agreement shall provide that the head of each agency of the United States shall comply with the requirements of the city or county ordinance in the case of any employee of the agency who is subject to the tax and (i) whose regular place of Federal employment is within the jurisdiction of the city or county with which the agreement is made or (ii) is a resident of such city or county.".

(b) The last sentence of section 5520(a) of title 5, United States Code, is amended by striking out "not a resident of the State" and inserting in lieu thereof "not a resident of, or whose regular place of Federal employment is not within, the State".

SEC. 2. The amendments made by the first section of this Act shall take effect on the 90th day after the date of the enactment of this Act.

H.R. 11280

By Mr. GILMAN:

—Page 215, strike out lines 4 through 11 and insert in lieu thereof the following:

"(8) 'career reserved position' means a Senior Executive Service position which is designated under subsection (b) of this section as a position to which a career appointee may be appointed;

"(9) 'general position' means any Senior Executive Service position which is not a career reserved position.

Page 256, line 7, strike out "position." and insert in lieu thereof "position, and such position shall be considered a career reserved position.".

Page 256, line 19, strike out "appointment;" and insert in lieu thereof "appointment, and such position shall be considered a general position.".

Page 227, line 6, insert after "qualified" the following: ", except that a reassignment to a position with lesser responsibilities shall only be for such cause as will promote the efficiency of the Senior Executive Service".

Page 227, line 3, insert "(1)" after "(a)".

Page 227, line 4, strike out "(1)" and insert in lieu thereof "(A)" and insert ", subject to paragraph (2) of this subsection," after "may".

Page 227, line 7, strike out "(2)" and insert in lieu thereof "(B)".

Page 227, after line 10, insert the following:

"(2) A career appointee may be reassigned to any Senior Executive Service position of less responsibility under paragraph (1)(A) of this subsection only—

"(A) for such cause as will promote the efficiency of the service; and

"(B) after 15 days' advance written notice to such appointee, containing a complete statement of all the reasons for such reassignment.".

Page 228, strike out lines 10 through 12 and insert in lieu thereof the following:

"(e)(1) Except as provided in paragraph (2) of this subsection, a career appointee in an agency may not be involuntarily reassigned—

"(A) within 120 days after an appointment of the head of such agency; or

"(B) within 120 days after the appointment in such agency of such career appointee's most immediate supervisor who—

"(i) is a noncareer appointee; and

"(ii) has the authority to reassign such career appointee.

"(2) Paragraph (1) of this subsection does not apply with respect to any reassignment under section 4314(b)(3) of this title.

Page 232, line 12, strike out "A career appointee" and insert in lieu thereof "Except as provided in subsection (b) of this section, a career appointee".

Page 232, after line 19, insert the following:

"(b)(1) Except as provided in paragraph (2) of this subsection, a career appointee in an agency may not be involuntarily removed—

"(A) within 120 days after an appointment of the head of such agency; or

"(B) within 120 days after the appointment in such agency of such career appointee's most immediate supervisor who—

"(i) is a noncareer appointee; and

"(ii) has the authority to remove such career appointee.

"(2) Paragraph (1) of this subsection does not apply with respect to any removal under section 4314(b)(3) of this title.

Page 232, line 20, strike out "(b)" and insert in lieu thereof "(c)".

Page 245, insert after line 15 the following:

"(d) The rate of pay of a senior executive shall be reduced only for such cause as will promote the efficiency of the service.

Page 245, after line 15, insert the following:

"(d) The rate of basic pay for any career appointee may be reduced from any rate of basic pay to any lower rate of basic pay only—

"(1) for such cause as will promote the efficiency of the service; and

"(2) after 15 days' advance written notice to such appointee, containing a complete statement of all the reasons for such reduction.

Any such reduction shall be considered a personnel action for the purpose of section 2302 of this title.

Page 228, insert after the line 16 the following:

"(e) Except in cases where a reassignment is the result of an action initiated under section 4313(b)(3) of this title, a career appointee may be reassigned under subsection (a)(1) only if—

"(1) he consents to the reassignment; and

"(2) the reassignment is part of a program designed to enlarge the responsibilities of the career appointee and to advance his career in the Senior Executive Service.

No adverse personnel action shall be taken against a career appointee who exercises his right under this subsection to not consent to such a reassignment.

H.R. 11280

By Mr. HARRIS:

—Page 136, line 4, after "(b)" insert "or (c)".

Page 138, strike out paragraph (2) beginning on line 13 and ending on line 23 and redesignate the following paragraphs accordingly.

Page 141, after line 19 insert the following:

"(c)(1) No employee may accept or consider, or influence or direct, or attempt to influence or direct any other employee to accept or consider, with respect to any personnel action, any recommendations unless—

"(A) the recommendation is furnished pursuant to a request made by an authorized representative of the United States solely to determine whether the individual involved in the personnel action meets the loyalty, suitability, and character requirements for employment; or

"(B) the recommendation—

"(i) is furnished pursuant to a request of an employee who is responsible for taking (or directing others to take), recommending, processing, or approving the personnel action; and

"(ii) consists solely of an evaluation of the work performance, ability, aptitude, character, or general qualifications of the individual involved in the personnel action.

"(2) Any employee who receives a written recommendation prohibited by paragraph (1) of this subsection shall return such recommendation to the person who provided it, with an appropriate indication that the acceptance or consideration of such recommendation would be in violation of this subsection.

"(3) Any employee who receives an oral recommendation which is prohibited by paragraph (1) of this subsection shall advise, in an appropriate manner, the person providing such recommendation that the acceptance or consideration of such recommendation would be in violation of this subsection.

"(4) For the purpose of this subsection—

"(A) 'recommendation' means any communication, oral or written, made directly or indirectly by—

"(i) a Member of Congress or a candidate for such office;

"(ii) a Congressional employee, as defined in section 2107 of this title (determined without regard to whether or not the employee's pay is paid by the Secretary of the Senate or the Clerk of the House of Representatives);

"(iii) an employee appointed by the President; or

"(iv) an employee in a position which is excepted from the competitive service because of its confidential or policymaking character;

"(B) 'recommendation' does not include an inquiry which is limited solely to a request—

"(i) for a statement on the status of any personnel action; or

"(ii) for an explanation of the basis on which a personnel action has been taken.

Page 141, line 20, strike out "(c)" and insert in lieu thereof "(d)".

Page 142, line 4, strike out "(d)" and insert in lieu thereof "(e)".

—Page 141, line 20, insert "(1)" after "(c)".

Page 142, after line 3, insert the following:

"(2)(A) The head of each agency shall establish a personnel office and appoint an individual to be the head of such office.

"(B) The position to which any individual is appointed under subparagraph (A) of this paragraph shall, notwithstanding any other provision of law, be a position within the competitive service or a career reserved position within the Senior Executive Service. The requirement of the preceding sentence shall not apply if a majority of the civil service positions within such agency are excepted from the competitive service by or under any law (other than this title).

—Page 150, line 2, after "United States." insert the following "One member of the Board shall be selected from among individuals who have served in the competitive service.".

—Page 150, line 24, strike out "President shall from time to time designate" and insert in lieu thereof "Board shall, every 2 years, elect".

Page 151, line 3, strike out "President shall from time to time designate" and insert in lieu thereof "Board shall, every 2 years, elect".

Page 151, line 8, after "Chairman." insert the following: "Any vacancy in the Office of Vice Chairman shall be filled by a special election for the balance of the term in which the vacancy occurred.".

—Page 150, line 17, strike out "inefficiency,".

—Page 151, line 19, insert "and" after "Special Counsel,".

Page 151, beginning on line 20, strike out "and any employee of the Board".

—Page 190, after the matter following line 6, insert the following new section:

Exceptions from the Competitive Service

Sec. 301A. (a) Section 2103 of title 5, United States Code, is amended by adding at the end thereof the following new subsection:

"(c)(1) The President may, by Executive order, except any position from the competitive service if the President determines that—

"(A) the duties of such position—

"(i) require significant involvement in the advocacy of Presidential administration programs and support of their controversial aspects,

"(ii) require significant participation in the determination of major policies of such administration or

"(iii) principally involve serving as a personal assistant to or advisor of a Presidential appointee, or serving in a confidential relationship directly under such a personal assistant or advisor; or

"(B) it would be impracticable to apply competitive examination procedures in the filling of such position because of—

"(i) national security,

"(ii) statutory or other significant requirements establishing special employment conditions,

"(iii) the unusual nature of the duties of such position,

"(iv) duration and frequency of service,

"(v) work location, or

"(vi) inadequate number of applicants.

"(2) Periodically (but not less often than 2 years), the President shall review exceptions from the competitive service under Presidential authority, and shall revoke an exception if the President determines that, because of changed circumstances, the exception is no longer appropriate under the provisions of paragraph (1) of this subsection.

"(3) The President shall periodically review exceptions from the competitive service in the Executive agencies made by or under statute, and shall prepare and transmit a report on each such review to each House of the Congress containing such legislative and administrative changes as the President considers appropriate.".

(b) Section 3302(1) of title 5, United States Code, is amended by inserting ", to the extent authorized under section 2103(c) of this title," after "necessary exceptions".

—Page 209, strike out line 21 and all that follows down through line 13 on page 263, and insert in lieu thereof the following new title:

TITLE IV—SENIOR EXECUTIVE SERVICE

GENERAL PROVISIONS

Sec. 401. (a) Chapter 21 of title 5, United States Code, is amended by inserting after section 2101 the following new section:

"§ 2101a. The Senior Executive Service

"The 'Senior Executive Service' consists of Senior Executive Service positions (as defined in section 3132(a)(2) of this title).".

(b) Section 2102(a)(1) of title 5, United States Code, is amended—

(1) by striking out "and" at the end of subparagraph (A);

(2) by adding "and" at the end of subparagraph (B); and

(3) by adding at the end thereof the following new subparagraph:

(C) positions in the Senior Executive Service;".

(c) Section 2103(a) of title 5, United States Code, is amended by inserting before the period at the end thereof the following: "or the Senior Executive Service".

(d) Section 2108(3) of title 5, United States Code is, amended—

(1) by striking out the period at the end thereof and inserting in lieu thereof a semicolon; and

(2) by adding at the end thereof the following: "but does not include applicants for, or members of the Senior Executive Service.".

(e) The analysis for chapter 21 of title 5, United States Code, is amended by inserting after the item relating to section 2101 the following new item:

"2101a. The Senior Executive Service.".

AUTHORITY FOR EMPLOYMENT

Sec. 402. (a) Chapter 31 of title 5, United States Code, is amended by inserting after section 3112, as added by this Act, the following new subchapter:

"Subchapter II—The Senior Executive Service

"§ 3131. The Senior Executive Service

"(a) It is the purpose of this chapter to establish a Senior Executive Service in order to ensure that the management of the Government of the United States is responsive to the needs, policies, and goals of the Nation and otherwise is of the highest quality. The Senior Executive Service shall be administered so as to—

"(1) provide for a compensation system, including salaries, benefits, and incentives, and for other conditions of employment, designed to attract and retain highly competent career senior executives;

"(2) ensure that compensation, retention, and tenure are contingent on managerial success which is to be measured on the basis of individual and organizational performance (including such factors as improvements in quality of work or service, cost efficiency, and timeliness of performance);

"(3) recognize exceptional accomplishment;

"(4) enable the head of an agency to reassign senior executives to best accomplish the agency's mission;

"(5) provide for severance pay, retirement benefits, and placement assistance for career senior executives who are removed from the Senior Executive Service for nondisciplinary reasons;

"(6) protect career senior executives from arbitrary or capricious actions;

"(7) provide for both program continuity and policy advocacy in the management of public programs;

"(8) maintain a merit personnel system free of improper political interference;

"(9) ensure accountability for honest, economical, and efficient Government;

"(10) ensure compliance with all applicable civil service laws, rules, and regulations including those relating to equal employment opportunity, political activity, and conflicts of interest; and

"(11) provide for the initial and continuing systematic development of highly competent career senior executives.

§ 3132. Definitions and exclusions

"(a) For the purpose of this subchapter—

"(1) 'agency' means an Executive agency, the Administrative Office of the United States Courts, and the Government Printing Office, except that such term does not include—

"(A) a Government corporation;

"(B) the Central Intelligence Agency, the Defense Intelligence Agency, the National Security Agency, and any Executive agency or unit thereof which is designated by the President and which conducts foreign intelligence or counterintelligence activities; and

"(C) the General Accounting Office;

"(2) 'Senior Executive Service position' means any position in an agency which is in GS–16, 17, or 18 of the General Schedule or in level IV or V of the Executive Schedule, or an equivalent position, which (other than a position in the Foreign Service of the United States) is not required to be filled by an appointment by the President, by and with the advice and consent of the Senate, and in which an employee—

"(A) directs the work of an organizational unit;

"(B) is held accountable for the success of one or more specific programs or projects; or

"(C) supervises the work of employees other than personal assistants;

"(3) 'career senior executive' means an individual in a Senior Executive Service position whose appointment to such position or previous appointment to another Senior Executive Service position was based on—

"(A) approval by the Office of Personnel Management of the managerial qualifications of such individual; and

"(B) selection through a competitive staffing process consistent with Office of Personnel Management regulations;

"(b) An agency may file an application with the Office of Personnel Management, setting forth reasons why it, or a unit thereof, should be excluded from any provision or requirement of this subchapter. The Office of Personnel Management shall—

"(1) review such application and stated reasons,

"(2) undertake such other investigation as it considers appropriate to determine whether the agency or unit should be excluded from any provision or requirement of this subchapter, and

"(3) upon completion of its review, recommend to the President whether the agency or unit should be so excluded from any provision or requirement of this subchapter.

If the Office recommends that an agency or unit thereof be excluded from any provision or requirement of this subchapter, the President may, on written determination, make such exclusion to such extent and for such period as the President determines appropriate.

"(c) The Office of Personnel Management may at any time recommend to the President that any exclusion previously granted to an agency or unit under subsection (c) of this section be revoked. Upon recommendation of the Office, the President may revoke, by written determination, any exclusion made under subsection (c) of this section.

"(d) If—

"(1) any agency is excluded under subsection (c) of this section, or

"(2) any exclusion is revoked under subsection (d) of this section,

the Office of Personnel Management, shall within 30 days after such action, transmit to the Congress a report concerning the exclusion or revocation.

"§ 3133. Authorization of positions; authority for appointment

"(a) On or before December 31 of each odd-numbered calendar year, each agency shall—

"(1) examine its needs for Senior Executive Service positions for each of the two fiscal years beginning after such calendar year; and

"(2) submit to the Office of Personnel Management a written request for a specific number of Senior Executive Service positions for each of such fiscal years.

"(b) Each agency request submitted under subsection (a) of this section shall be based on—

"(1) the anticipated type and extent of program activities of the agency for each of the two fiscal years involved;

"(2) such other factors as may be prescribed from time to time by the Office of Personnel Management.

"(c) The Office of Personnel Management, upon consultation with the Office of Management and Budget shall review the request of each agency and shall authorize, for each of the two fiscal years covered by requests required under subsection (b) of this section, a specific number of Senior Executive positions for each agency.

"(d)(1) The Office may, on a written request of an agency or on its own initiative, make an adjustment in the number of positions authorized for any agency. Each agency request under this paragraph shall be submitted in such form, and shall be based on such factors, as the Office of Personnel Management shall prescribe.

"(2) The total number of positions in the Senior Executive Service may not at any time during any fiscal year exceed the total number of positions authorized under subsection (c) of this section for such fiscal year plus 5 percent of such total number.

"(e) Appointments to the Senior Executive Service may be made by appropriate appointing authorities of agencies subject to the requirements and limitations of this title.

"§ 3134. Biennial report

"(a) The Office of Personnel Management shall submit to each House of the Congress, at the time the budget is submitted by the President to the Congress during each even-numbered calendar year, a report on the Senior Executive Service. The report shall include—

"(1) the number of Senior Executive Service positions authorized for the then current fiscal year, in the aggregate and by agency, and the projected number of Senior Executive Service positions to be authorized for the next two fiscal years, in the aggregate and by agency;

"(2) a description of each exclusion in effect during the then current fiscal year under section 3132(c) of this title;

"(3) the percentage of career senior executives at each pay rate and the distribution and amount of performance awards, in the aggregate and by agency; and

"(4) such other information regarding the Senior Executive Service as the Office of Personnel Management considers appropriate.

"(b) The Office of Personnel Management shall submit to each House of the Congress, at the time the budget is submitted to the Congress each odd-numbered year, an interim report showing changes in matters required to be reported under subsection (a) of this section.

"§ 3135. Regulations

"The Office of Personnel Management shall prescribe such regulations as may be necessary to carry out the purpose of this subchapter.".

(b) Section 3109 of title 5, United States Code, is amended by inserting at the end thereof the following new subsection:

"(c) Positions in the Senior Executive Service may not be filled under the authority of subsection (b) of this section.".

(c) The chapter analysis of chapter 31 of title 5, United States Code, is amended—

(1) by striking out the heading for chapter 31 and inserting in lieu thereof the following:

"Chapter 31—AUTHORITY FOR EMPLOYMENT

"Subchapter I—Employment Authorities"; and

(2) by inserting at the end thereof the following:

"Subchapter II—The Senior Executive Service

"Sec.
"3131. The Senior Executive Service.
"3132. Definitions and exclusions.
"3133. Authorization of positions; authority for appointment.
"3134. Biennial report.
"3135. Regulations.".

EXAMINATION, CERTIFICATION, AND APPOINTMENT

SEC. 403. (a) Chapter 33 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"Subchapter VIII—Appointment, Reassignment, Transfer, and Development in the Senior Executive Service

"§ 3391. Definitions

"For the purpose of this subchapter, 'agency,' 'Senior Executive Service position', and 'career senior executive' have the meanings given such terms under section 3132(a) of this title.

"§ 3392. General appointment provisions

"(a) Qualification standards shall be established by the head of each agency for each Senior Executive Service position in such agency and shall be in accordance with requirements established by the Office of Personnel Management.

"(b) An individual may be appointed to a Senior Executive Service position only if the appointing authority has determined in writing that the individual meets the qualification requirements of such position.

"(c) If a career senior executive is appointed by the President, by and with the advice and consent of the Senate, to a civilian position in the executive branch which is not in the Senior Executive Service, and the rate of basic pay payable for which is equal to or greater than the rate payable for level V of the Executive Schedule such executive may elect (at such time and in such manner as the Office of Personnel Management may prescribe) to continue to have the provisions of this title relating to basic pay, performance awards, awarding of ranks, severance pay, and retirement apply as if such executive remained in the Senior Executive Service position from which he was appointed. Such provisions shall apply in lieu of the provisions which would otherwise apply—

"(1) to the extent provided under regulations prescribed by the Office, and

"(2) so long as such executive continues to serve under such Presidential appointment.

"§ 3393. Career senior executive appointments

"(a) Each agency shall establish a recruitment program, in accordance with guidelines which shall be issued by the Office of Personnel Management, which provides for recruitment of career senior executives from—

"(1) all groups of qualified individual applicants within the civil service; or

"(2) all groups of qualified individual applicants whether or not within the civil service.

"(b) Each agency shall establish one or more executive resources boards, as appropriate, the members of which shall be appointed by the head of such agency from among employees of such agency. It is the function of such boards, in accordance with competitive staffing requirements established by the Office of Personnel Management, to—

"(1) review the qualifications of candidates for appointment as career senior executives; and

"(2) make written recommendations concerning such applicants to the appropriate appointing authorities.

"(c)(1) The Office of Personnel Management shall establish one or more qualifications review boards, as appropriate, the members of which shall be appointed by the Director from within and outside the civil service on the basis of their knowledge of public management and other appropriate occupational fields. It is the function of such boards to certify the managerial qualifications of candidates for entry as career senior executives into the Senior Executive Service in accordance with regulations prescribed by the Office of Personnel Management.

"(2) The Office of Personnel Management shall, in consultation with the various qualification review boards, prescribe criteria for establishing managerial qualifications for appointment to the Senior Executive Service. Such criteria shall provide for—

"(A) consideration of demonstrated managerial experience;

"(B) consideration of successful participation in a career executive development program which is approved by the Office of Personnel Management; and

"(C) sufficient flexibility to allow for the appointment of individuals who have special or unique qualities which indicate a likelihood of managerial success and who would not otherwise be eligible for appointment.

"(d) An individual's initial appointment as a career senior executive shall become final only after such individual has served a 1-year probationary period as a career appointee.

"§ 3394. Reassignment and transfer within the Senior Executive Service

"(a) A career senior executive in an agency—

"(1) may be reassigned to any Senior Executive Service position in the same agency for which the executive is qualified; and

"(2) may transfer to a Senior Executive Service position in another agency for which the executive is qualified, with the approval of that agency.

"(b) A career senior executive in an agency may not be involuntarily reassigned within 120 days after an appointment of the head of such agency.

"§ 3395. Development for and within the Senior Executive Service

"(a) The Office of Personnel Management shall establish programs for the systematic development of candidates for the Senior Executive Service and for the continuing development of career senior executives or require agencies to establish such programs, which meet criteria prescribed by the Office of Personnel Management.

"(b) The Office of Personnel Management shall assist agencies in the establishment of programs required under subsection (a) of this section and shall monitor the implementation of such programs. If the Office of Personnel Management finds that any agency's program under subsection (a) is not in compliance with the criteria prescribed under such subsection, it shall require such agency to take such corrective action as may be necessary to bring such program into compliance with such criteria.

"(c)(1) An agency head may grant a sabbatical leave to a career senior executive for not to exceed 11 months in order to permit such executive to engage in study or uncompensated work experience which will contribute to the executive's development and effectiveness. Such leave shall not result in loss of, or reduction in, pay, leave to which the executive is otherwise entitled, credit for time or service, or performance or efficiency rating. The agency head may authorize in accordance with chapter 57 of this title such travel and per diem costs as such agency head may determine to be essential for such study or experience.

"(2) Sabbatical leave under this subsection may not be granted to any career senior executive—

"(A) more than once in any ten-year period;

"(B) unless such executive has completed 7 years of service—

"(i) in one or more positions in the Senior Executive Service;

"(ii) in one or more other positions in the civil service the level of duties and responsibilities of which are equivalent to the level of duties and responsibilities of positions in the Senior Executive Service; or

"(iii) in any combination of such positions;

except that not less than 2 years of such 7 years of service must be in the Senior Executive Service; and

"(C) if such executive is eligible for voluntary retirement with a right to an immediate annuity under section 8336 of this title.

Any period of assignment under section 3373 of this title, relating to assignments of employees to State and local governments, shall not be considered a period of service for the purpose of subparagraph (B) of this paragraph.

"(3)(A) Any career senior executive in an agency may be granted sabbatical leave under this subsection only if such executive agrees, as a condition of accepting such sabbatical leave, to serve with such agency upon the completion of such leave, for a period of two consecutive years.

"(B) Each agreement required under subparagraph (A) of this paragraph shall provide that in the event the career senior executive fails to carry out such agreement (except for good and sufficient reason as determined by the head of the agency involved) such executive shall be liable to the United States for payment of all expenses (including salary) of such sabbatical leave. Such amount shall be treated as a debt due the United States.

"§ 3396. Regulations

The Office of Personnel Management shall prescribe such regulations as may be necessary to carry out the purpose of this subchapter.".

(b) The chapter analysis for chapter 33 of title 5, United States Code, is amended by inserting after the item relating to section 3385 the following:

"Subchapter VIII—Appointment, Reassignment, Transfer, and Development in the Senior Executive Service

"Sec.
"§ 3591. Definitions
"3392. General appointment provisions.
"3393. Career appointments.
"3394. Reassignment and transfer within the Senior Executive Service.
"3395. Development for and within the Senior Executive Service.
"3396. Regulations.".

RETENTION PREFERENCE

SEC. 404. (a) Section 3501(b) of title 5, United States Code, is amended by striking out the period at the end thereof and inserting in lieu thereof: "or a member of the Senior Executive Service.".

(b) Chapter 35 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"Subchapter V—Removal, Reinstatement, and Guaranteed Placement Provisions in the Senior Executive Service

"§ 3591 Definitions

"For purposes of this subchapter, 'agency', 'Senior Executive Service position', 'and career senior executive' have the meanings given such terms under section 3132(a) of this title.

"§ 3592. Removal from the Senior Executive Service

"(a) A career senior executive may be removed from the Senior Executive Service to a civil service position outside of the Senior Executive Service—

"(1) during the one year period of probation under section 3393(d) of this title; or

"(2) at any time for less than fully successful managerial performance as determined under subchapter II of chapter 43 of this title.

"§ 3593. Reinstatement in the Senior Executive Service

"(a) A former career senior executive may be reinstated, without regard to section 3393 (b) and (c) of this title to any Senior Executive Service position for which such executive is qualified if—

"(1) such executive has successfully completed the probationary period established under section 3393(d) of this title; and

"(2) such executive left the Senior Executive Service for reasons other than misconduct, neglect of duty, or malfeasance, or less than fully successful managerial performance by such executive as determined under subchapter II of chapter 43 of this title.

"(b) A career senior executive who is appointed by the President to any civil service position outside the Senior Executive Service and who leaves such position for reasons other than misconduct, neglect of duty, or malfeasance shall be entitled to be placed in the Senior Executive Service if the executive applies to the Office of Personnel Managment within 90 days after separation from the Presidential appointment.

"§ 3594. Guaranteed placement in other personnel systems

"(a) A career senior executive who was appointed from a civil service position under a career or career-conditional appointment (or an appointment of equivalent tenure), as determined by the Office of Personnel Management, and who, for reasons other than misconduct, neglect of duty, or malfeasance, is removed from the Senior Executive Service during the probationary period under section 3393(d) of this title, shall be entitled to be placed in a civil service position in any agency other than a Senior Executive Service position.

"(b) A career senior executive—

"(1) who has completed the probationary period under section 3393(d) of this title;

"(2) who had not completed in the agreegate, 5 years of service in the Senior Executive Service; and

"(3) who is removed from the Senior Executive Service for less than fully successful

managerial performance as determined under subchapter II of chapter 43 of this title;

shall be entitled to be placed in a civil service position in any agency other than a Senior Executive Service position.

"(c)(1) For purposes of subsection (a) and (b) of this section—

"(A) the position in which any career senior executive is placed under such subsections shall be a permanent, full-time position at GS–15 or above of the General Schedule, or an equivalent position;

(B) any career senior executive placed under subsection (a) or (b) shall be entitled to receive basic pay at the higher of—

"(i) the maximum rate of basic pay in effect for the position in which placed;

"(ii) the rate of basic pay in effect at the time of such placement for the position such executive held in the civil service immediately before being appointed to the Senior Executive Service; or

"(iii) the rate of basic pay in effect for such executive immediately before being placed under subsection (a) or (b); and

"(C) the placement of any career senior executive under subsection (a) or (b) may not be made to a position which would cause the separation or reduction in grade of any other employee.

"(2) An employee who is receiving basic pay under paragraph (1)(B)(ii) or (iii) of this subsection is entitled to have such basic pay rate increased by 50 percent of the amount of each increase in the maximum rate of basic pay for the grade of the position to which such employee is placed under subsection (a) or (b) until such rate is equal to the rate in effect under paragraph (1)(B)(i) for the position to which such employee is placed.

"§ 3595. Regulations

"The Office of Personnel Management shall prescribe such regulations as may be necessary to carry out the purpose of this subchapter."

(b) The chapter analysis for chapter 35 of title 5, United States Code, is amended by inserting the following new item:

"SUBCHAPTER V—REMOVAL, REINSTATEMENT, AND GUARANTEED PLACEMENT PROVISIONS IN THE SENIOR EXECUTIVE SERVICE

"Sec.
"3591. Definitions.
"3592. Removal from the Senior Executive Service.
"3593. Reinstatement in the Senior Executive Service.
"3594. Guaranteed placement in other personnel systems.

PERFORMANCE RATING

SEC. 405. Chapter 43 of title 5, United States Code, is amended by adding at the end thereof the following:

"Subchapter II—Performance Appraisal in the Senior Executive Service

"§ 4311. Definitions

"For the purpose of this subchapter, 'agency' and 'career senior executive' have the meanings given such terms under section 3132(a) of this title.

"§ 4312. Senior Executive Service performance appraisal systems

"(a) Each agency shall, in accordance with standards established by the Office of Personnel Management, develop one or more performance appraisal systems designed to—

"(1) provide for systematic appraisals of performance of career senior executives;

"(2) encourage excellence in performance by career senior executives; and

"(3) provide a basis for making eligibility determinations for Senior Executive Service retention and performance awards.

"(b) Each performance appraisal system established by an agency under subsection (a) of this section shall provide—

"(1) that, on or before the beginning of each rating period, performance requirements for each career senior executive in such agency are established in consultation with such executive and communicated to such executive;

"(2) that written appraisals of performance are based on the individual and organizational performance requirements established for the rating period involved, and

"(3) that each career senior executive in such agency is provided a copy of the appraisal and rating under section 4314 of this title and is given an opportunity to respond in writing to such appraisal and rating and have such appraisal and rating reviewed by an employee in a higher managerial level in such agency before such appraisal and rating becomes final.

"(c) If the Office of Personnel Management determines that an agency performance appraisal system does not comply with the requirements of this subchapter or regulations under this subchapter, the Office of Personnel Management shall order the agency to take such corrective action as may be necessary to bring such system into compliance.

"§ 4313. Criteria for performance appraisals

"Appraisals of performance in the Senior Executive Service shall be based on both individual and organizational performers, taking into account such factors as—

"(1) improvements in quality of work or service;

"(2) cost efficiency; and

"(3) timeliness of performance.

"§ 4314. Ratings for performance appraisals

"(a) Each performance appraisal system shall provide for annual summary ratings of levels of performance as follows:

"(1) one or more fully successful levels,

"(2) a minimally satisfactory level, and

"(3) an unsatisfactory level.

"(b) Each performance appraisal system shall provide that—

(1) any appraisal and rating under such system—

"(A) is made only after review and evaluation by a performance review board established under subsection (c) of this section;

"(B) is conducted at least annually, subject to the limitation of paragraph (3) of this subsection;

"(C) may not be made within 120 days after the beginning of a new Presidential administration; and

"(D) is based on performance during a performance appraisal period the duration of which shall be determined under guidelines established by the Office of Personnel Management, but which may be terminated in any case in which the agency conducting such appraisal determines that an adequate basis exists on which to appraise and rate the executive's performance;

"(2) any career senior executive receiving a rating at any of the fully successful levels under subsection (a)(1) of this section may be given a performance award as prescribed in section 5384 of this title;

"(3) any career senior executive receiving an unsatisfactory rating under subsection (a)(3) of this section shall be reassigned or transferred within the Senior Executive Service, or separated from the Senior Executive Service, except that any executive who receives 2 such unsatisfactory ratings in any period of 5 consecutive years shall be separated from the Senior Executive Service, and

"(4) any career senior executive who twice in any period of 3 consecutive years receives less than fully successful ratings shall be separated from the Senior Executive Service.

"(c) Each agency shall establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more performance review boards, as appropriate. It is the function of such boards to make recommendations to the appropriate appointing authority of such agency relating to the performance of career senior executives in such agency. The members of such a board shall be appointed by the head of such agency from among employees of such agency other than career senior executives with respect to which recommendations are being made by such board. In making any such recommendation with respect to a career senior executive, such a board shall include at least 1 career senior executive.

"§ 4315. Regulations

"The Office of Personnel Management shall prescribe such regulations as may be necessary to carry out the purposes of this subchapter.".

(b) The chapter analysis for chapter 43 of title 5, United States Code, is amended by inserting at the end of the chapter analysis the following:

"Subchapter II—Performance Appraisal in the Senior Executive Service

"Sec.
"4311. Definitions.
"4312. Senior Executive Service performance appraisal systems.
"4313. Criteria for performance appraisals.
"4314. Ratings for performance appraisals.
"4315. Regulations.".

AWARDING OF RANKS

SEC. 406. (a) Chapter 45 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 4507. Awarding of ranks in the Senior Executive Service

"(a) For the purpose of this section, 'agency' and 'career senior executive' have the meanings given such terms under section 3132(a) of this title.

"(b) Each agency shall forward annually to the Office of Personnel Management any recommendation of career senior executives in such agency to be awarded the rank of Meritorious Executive or Distinguished Executive. The Office of Personnel Management shall review such recommendations and provide to the President recommendations as to which of the agency recommended executives should receive such rank.

"(c) During any fiscal year, the President may, subject to subsection (d), award to any career senior executive recommended by the Office of Personnel Management the rank of—

"(1) Meritorious Executive, for sustained accomplishment, or

"(2) Distinguished Executive, for sustained extraordinary accomplishment.

"(d) During any fiscal year—

"(1) the number of career senior executives awarded the rank of Meritorious Executive may not exceed 5 percent of the Senior Executive Service; and

"(2) the number of career senior executives awarded the rank of Distinguished Executive may not exceed 1 percent of the Senior Executive Service.

"(e)(1) Receipt by a career senior executive of the rank of Meritorious Executive entitles such individual to a lump-sum payment of $2,500.

"(2) Receipt by a career senior executive of the rank of Distinguished Executive en-

titles such individual to a lump-sum payment of $5,000.".

(b) The analysis for chapter 45 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"4507. Awarding of ranks in the Senior Executive Service.".

PAY RATES AND SYSTEMS

SEC. 407. (a) Chapter 53 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"Subchapter VII—Pay for the Senior Executive Service

"§ 5381. Definitions

"For the purpose of this subchapter, 'agency', 'Senior Executive Service position', and 'career senior executive' have the meanings given such terms under section 3132 (a) of this title.

"§ 5382. Establishment and adjustment of rates of pay for the Senior Executive Service

"(a) There shall be 5 or more rates of basic pay for the Senior Executive Service, and each career senior executive shall be paid at one of such rates. Such rates of basic pay shall be initially established and thereafter adjusted by the President subject to subsection (b) of this section.

"(b) In setting rates of basic pay, the lowest rate for the Senior Executive Service shall not be less than the minimum rate of basic pay payable for GS–16 of the General Schedule and the highest rate shall not exceed the rate for level IV of the Executive Schedule. The payment of such rates shall not be subject to the pay limitation of section 5308 of this title.

"(c) Subject to subsection (b) of this section, effective at the beginning of the first applicable pay period commencing on or after the first day of the month in which an adjustment takes effect under section 5305 of this title in the rates of pay under the General Schedule, each rate of basic pay for the Senior Executive Service shall be adjusted by an amount, rounded to the nearest multiple of $100 (or if midway between multiples of $100, to the next higher multiple of $100), equal to the percentage of such rate of basic pay which corresponds to the overall average percentage (as set forth in the report transmitted to the Congress under such section 5305) of the adjustment in the rates of pay under the General Schedules. The adjusted rates of basic pay for the Senior Executive Service shall be included in the report transmitted to the Congress by the President under section 5305(a)(3) or (c)(1) of this title.

"(d) The rates of basic pay that are established and adjusted under this section shall be printed in the Federal Register and shall supersede any prior rates of basic pay for the Senior Executive Service.

"§ 5383. Setting individual executive pay

"(a) Each appointing authority shall determine, in accordance with criteria established by the Office of Personnel Management, which of the rates established under section 5382 of this title shall be paid to each career senior executive under such appointing authority.

"(b) In no event may the aggregate amount paid to a career senior executive for any fiscal year under sections 4507, 5382, and 5384 of this title exceed 95 percent of the annual rate payable for positions at level II of the Executive Schedule in effect at the end of such fiscal year.

"(c) Except for any pay adustment under section 5382 of this title, the rate of basic pay for any career senior executive may not be adjusted more than once during any 12-month period.

"§ 5384. Performance awards for the Senior Executive Service

"(a)(1) To encourage excellence in performance by career senior executive performance awards shall be paid to career senior executive in accordance with the provisions of this section.

"(2) Such awards shall be paid in a lump sum and shall be in addition to the basic pay paid under section 5382 of this title or any award paid under section 4507 of this title.

"(b)(1) No performance award under this section shall be paid to any career senior executive whose performance was determined to be less than fully successful at the time of such executive's most recent performance appraisal and rating under subchapter II of chapter 43 of this title.

"(2) The amount of a performance award under this section shall be determined by the agency head but may not exceed 20 percent of the career senior executive's rate of basic pay.

"(3) The number of career senior executives in any agency paid performance awards under this section during any fiscal year may not exceed 50 percent of the number of Senior Executive Service positions in such agency. This subsection shall not apply in the case of any agency which has less than 4 Senior Executive Service positions.

"(c) Performance awards paid by any agency under this section shall be based on recommendations by performance review boards established by such agency under section 4314 of this title.

"§ 5385. Regulations

"The Office of Personnel Management shall prescribe such regulations as are necessary to carry out the purpose of this subchapter and may provide guidance to agencies concerning the proportion of funds available for Senior Executive Service salary expenses which may be used for performance awards.".

(c) The analysis of chapter 53 of title 5, United States Code, is amended by adding at the end thereof the following new items:

"Subchapter VII—Pay for the Senior Executive Service

"Sec.
"5381. Purpose; definitions.
"5382. Establishment and adjustment of rates of pay for the Senior Executive Service.
"5383. Setting individual executive pay.
"5384. Performance awards for the Senior Executive Service.
"5385. Regulations.".

PAY ADMINISTRATION

SEC. 408. Chapter 55 of title 5, United States Code, is amended—

(1) by inserting "other than an employee or individual excluded by section 5541(2)(xvi) of this section" immediately before the period at the end of section 5504(a)(B);

(2) by amending section 5541(2) by striking out "or" after paragraph (xiv), by striking out the period after paragraph (xv) and inserting "; or" in lieu thereof, and by adding the following paragraph at the end thereof:

"(xvi) member of the Senior Executive Service."; and

(3) by inserting "other than a member of the Senior Executive Service" after "employee" in section 5595(a)(2)(i).

TRAVEL, TRANSPORTATION, AND SUBSISTENCE

SEC. 409. (a) Section 5723(a)(1) of title 5, United States Code, is amended by striking out "; and" and inserting in lieu thereof "or of a new appointee to the Senior Executive Service; and".

(b) Subchapter IV of chapter 57 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 5752. Travel expenses of Senior Executive Service candidates

"Employing agencies may pay candidates for Senior Executive Service positions travel expenses incurred incident to preemployment interviews requested by the employing agency.".

(c) The analysis for chapter 57 of title 5, United States Code, is amended by inserting after the item relating to section 5751 the following new item:

"5752. Travel expenses of Senior Executive Service candidates.".

LEAVE

SEC. 410. Chapter 63 of title 5, United States Code, is amended by inserting in subsection (a) of section 6304 "(e), and (f)" in lieu of "and (c)," and by adding at the end of such section the following new subsection:

"(f) Annual leave accrued by an individual while serving in a position in the Senior Executive Service shall not be subject to the limitation on accumulation otherwise imposed by this section.".

DISCIPLINARY ACTIONS

SEC. 411. Chapter 75 of title 5, United States Code, is amended—

(1) by inserting the following in the chapter analysis after subchapter IV:

"Subchapter V—Senior Executive Service

"Sec.
"7541. Definitions.
"7542. Actions covered.
"7543. Cause and procedure."; and

(2) by adding the following after subchapter IV:

"Subchapter V—Senior Executive Service

"§ 7541. Definitions

"For the purpose of this subchapter—

"(1) 'employee' means an individual in the Senior Executive Service who—

"(A) has completed the probationary period prescribed under section 3393(d) of this title; or

"(B) was covered by the provisions of subchapter II of this chapter immediately before appointment to the Senior Executive Service; and

"(2) 'suspension' has the meaning set forth in section 7501 of this title.

"§ 7542. Actions covered

"This subchapter applies to a removal from the civil service or suspension for more than 14 days, but does not apply to a suspension or removal under section 7532 of this title or to a removal under section 3592 of this title.

"§ 7543. Cause and procedure

"(a) Under regulations prescribed by the Office of Personnel Management, an agency may take an action covered by this subchapter against an employee only for such cause as will promote the efficiency of the service.

"(b) An employee against whom an action covered by this subchapter is proposed is entitled to—

"(1) at least 30 days advance written notice unless there is reasonable cause to believe that the employee has committed a crime for which a sentence of imprisonment can be imposed, stating specific reasons for the proposed action;

"(2) a reasonable time, but not less than 7 days, to answer orally and in writing and to furnish affidavits and other documentary evidence in support of the answer;

"(3) be represented by an attorney or other representative; and

"(4) a written decision and specific reasons therefore at the earliest practicable date.

"(c) An agency may provide, by regulation, for a hearing which may be in lieu of or in addition to the opportunity to answer provided under subsection (b)(2) of this section.

"(d) An employee against whom an action is taken under this section is entitled to appeal to the Merit Systems Protection Board under section 7701 of this title.

"(e) Copies of the notice of proposed action, the answer of the employee when written, and a summary thereof when made orally, the notice of decision and reasons therefor, and any order effecting an action covered by this subchapter, together with supporting material shall be maintained by the agency and shall be furnished to the Merit Systems Protection Board upon its request and to the individual affected upon such individual's request.

RETIREMENT

SEC. 412. (a) Section 8336 of title 5, United States Code, is amended by redesignating subsection (h) as subsection (i) and inserting immediately after subsection (g) the following new subsection:

"(h) A member of the Senior Executive Service who is separated from the Senior Executive Service for less than fully successful performance (as determined under subchapter II of chapter 43 of this title) after completing 25 years of service or after becoming 50 years of age and completing 20 years of service is entitled to an annuity.".

(b) Section 8339(h) of title 5, United States Code, is amended by striking out "section 8336(d)" and inserting in lieu thereof "section 8336 (d) or (h)".

CONVERSION TO THE EXECUTIVE SERVICE

SEC. 413. (a) During the period beginning on the date of the enactment of this title and ending on the effective date of this title, each agency under the guidance and review of the Office of Personnel Management and the definitions in chapter 31 of title 5, United States Code, as amended by this title, shall designate those positions which are to be incorporated into the Senior Executive Service.

(b) Each agency shall also submit a request for total Senior Executive Service position allocations. The Office of Personnel Management shall establish interim authorizations in accordance with section 3133 of title 5, United States Code, as amended by this Act.

(c)(1) Each employee serving in a position at the time it is designated as a position in the Senior Executive Service may elect to—

(A) decline conversion and remain in a position under such employee's current appointment and pay system, retaining the grade, seniority, and other rights and benefits associated with career and career-conditional appointment; or

(B) convert to a Senior Executive Service appointment according to the automatic appointment conversion provisions of subsection (d) of this section.

The placement of an employee because of an election under subparagraph (A) shall not cause the separation or reduction in grade of any other employee.

(2) The employee shall be notified in writing that such employee's position has been brought into the Senior Executive Service and what the employee's options are under subsection (d) of this section. The employee shall be given 90 days from the date of such notification to elect one of the options.

(d) Each employee who has elected an automatic appointment conversion, is serving immediately before the effective date in a position designated as a Senior Executive Service position, and is currently under—

(1) a career or career-conditional appointment; or

(2) a similar type of appointment in an excepted service as determined by the Office of Personnel Management;

shall receive an appointment to that position in the Senior Executive Service not subject to section 3393 (c) and (d) of title 5, United States Code.

(e) Employees whose actual base pay at the time of conversion exceeds the pay of the rate to which they are converted shall retain their pay. If there are comparability increases under section 5305 of title 5, United States Code, these employees will receive half of each comparability increase until the base pay equals the established Senior Executive Service rate.

(f) The Office of Personnel Management shall prescribe regulations to carry out the purpose of this section. The regulations shall provide a right of appeal to the Merit Systems Protection Board for an employee who believes such employee's agency has violated the employee's rights under this section. An agency shall take the corrective action that the Merit Systems Protection Board orders in its decision on an appeal under this subsection.

LIMITATION OF EXECUTIVE POSITIONS

SEC. 414. (a)(1)(A) Subsections (b) through (g) of section 5108 of title 5, United States Code, relating to special authority to place positions at GS–16, GS–17, and GS–18 of the General Schedule, are hereby repealed.

(B) Notwithstanding the provisions of any law (other than section 5108 of such title 5), the authority granted to an agency (within the meaning of section 5102(a)(1) of such one or more positions in GS–16, GS–17, or GS–18 of the General Schedule, is hereby terminated.

(C) Subsection (a) of section 5108 of title 5, United States Code, is amended to read as follows: "The Director of the Office of Personnel Management may establish, and from time to time revise, the maximum numbers of positions (not to exceed an aggregate of) which may at any one time be placed in—

(i) GS–16, GS–17, and GS–18 of the General Schedule; and

(ii) the Senior Executive Service, in accordance with section 3133 of title 5, United States Code (as added by this Act).

A position may be placed in GS–16, GS–17, or GS–18 of the General Schedule, only by action of the Director of the Office of Personnel Management.

(2)(A) Notwithstanding the provisions of any other provision of law (other than section 3104 of title 5, United States Code), the authority granted to an agency (within the meaning of section 5102(a)(1) of such title 5) to establish scientific or professional positions outside of the General Schedule is hererby terminated.

(B) Section 3104 of title 5, United States Code, is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a)(1) The Director of the Office of Personnel Management may establish, and from time to time revise, the maximum number of scientific or professional positions (not to exceed) for carrying out research and development functions which require the services of specially qualified personnel which may be established outside of the General Schedule. Any such position may be established only by action of the Director of the Office of Personnel Management.

"(2) The provisions of paragraph (1) of this subsection shall not apply to any Senior Executive Service position (as defined in section 3132(a) of this title)."

(C) Subsection (c) of such section 3104 is amended—

(i) by striking out "(c)" and inserting in lieu thereof "(b)"; and

(ii) by striking out "to establish and fix the pay of positions under this section and" and inserting in lieu thereof "to fix under section 5361 of this title the pay for positions established under this section".

(3)(A) The provisions of paragraphs (1) and (2) of this subsection shall not apply with respect to any position so long as the individual occupying such position on the day before the date of the enactment of this Act continues to occupy such position.

(B) The Director of the Office of Personnel Management—

(i) in establishing under section 5108 of title 5, United States Code, the maximum number of provisions which may be placed in GS–16, GS–17, and GS–18, and

(ii) in establishing under section 3104 of such title 5 the maximum number of scientific or professional positions which may be established,

shall take into account positions to which subparagraph (A) of this paragraph applies.

(b)(1) Section 5311 of title 5, United States Code, is amended by inserting "(a)" before "The Executive Schedule," and by adding at the end thereof the following new subsection:

"(b)(1) Not later than 180 days after the date of the enactment of the Civil Service Reform Act of 1978, the Director of the Office of Personnel Management shall determine the number and classification of executive level positions in existence in the executive branch on such date of enactment, and shall publish such determination in the Federal Register. Effective beginning on the date of such publication, the number of executive level positions within the executive branch may not exceed the number published under this subsection.

"(2) For the purpose of this subsection, 'executive level position' means—

"(A) any office or position in the civil service the rate of pay for which is equal to or greater than the rate of basic pay payable for positions under section 5316 of this title, or

"(B) any such office or position the rate of pay for which may be fixed by administrative action at a rate equal to or greater than the rate of basic pay payable for positions under section 5316 of this title;

except that such position does not include any Senior Executive Service position, as defined in section 3132(a) of this title.".

(2) The President shall transmit to Congress by January 1, 1980, a plan for authorizing executive level positions in the executive branch which shall include the maximum number of executive level positions necessary by level and a justification for the positions.

CRITERIA FOR EXCEPTED POSITIONS

SEC. 415. (a) Section 3302 of title 5, United States Code, is amended to read as follows:

"§ 3302. Competitive service; rules

"The President may prescribe rules governing the competitive service. The rules shall provide, as nearly as conditions of good administration warrant, for necessary exceptions from the provisions of sections 2951, 3304(a), 3321, 7152, 7153, 7321, and 7322 of this title. Each officer and individual employed in an agency to which the rules apply shall aid in carrying out the rules.".

(b) Subchapter I of chapter 33 of title 5, United States Code, is amended by inserting after section 3302 the following new section:

"§ 3302a. Positions excepted from the competitive service

"(a) The President may by regulation, ex-

cept any position from the competitive service if he determines that—

"(1) the duties of such position—

"(A) require significant involvement in the advocacy of Presidential administration programs and support of their controversial aspects,

"(B) require significant participation in the determination of major policies of such administration, or

"(C) principally involve serving as a personal assistant to or advisor of a Presidential appointee, or serving in a confidential relationship directly under such a personal assistant or advisor; or

"(2) it would be impracticable to apply competitive examination procedures in the filling of such position because of—

"(A) national security,

"(B) statutory or other significant requirements establishing special employment conditions,

"(C) the unusual nature of the duties of such position,

"(D) duration and frequency of service,

"(E) work location, or

"(F) inadequate number of applicants.".

(c) The table of sections for chapter 33 of title 5, United States Code, is amended by inserting after the item relating to section 3302 the following new item:

"3302a. Positions excepted from the competitive service.".

EFFECTIVE DATE

SEC. 416. The provisions of this title shall take effect 9 months after the date of the enactment of this title with the exception of section 413, regarding conversion procedures, which shall take effect immediately upon enactment.

Page 2, revise the table of sections accordingly.

—Page 390, after line 18, insert the following new title:

TITLE XII—PAY COMPARABILITY

PAY COMPARABILITY

SEC. 1201. Section 5305(c)(1) of title 5, United States Code, is amended by striking out "or economic conditions".

Revise the table of contents accordingly.

H.R. 11280

By Mr. LEACH:

—Page 209, after line 12, insert the following new section:

TEMPORARY EMPLOYMENT LIMITATION

SEC. 313. Effective one year after the date of the enactment of this Act the number of individuals employed in or under an Executive agency shall not exceed the number of individuals so employed on January 1, 1977.

(b) The President shall prescribe regulations to carry out the purpose of this section, including regulations to ensure that no increase in the procurement of personal services by contract occurs by reason of the enactment of this section.

(c) In administering this section, an individual employed on a part-time career employment basis shall be counted as a fraction which is determined by dividing 40 hours into the average number of hours of such individual's regularly scheduled workweek.

(d) For the purpose of this section, "Executive agency" has the meaning set forth in section 105 of title 5, United States Code.

(e) The provisions of this section shall not apply during a time of war or during a period of national emergency declared by the Congress or the President.

(f) The provisions of this section shall terminate at noon on January 20, 1981.

Page 209, line 14, strike out "313." and insert in lieu thereof "314."

Page 129, in the table of contents, strike out the item relating to section 313 and insert in lieu thereof the following:

Sec. 313. Temporary employment limitation.

Sec. 314. Effective date.

Page 300, line 10, insert "except as provided in section 7124 of this title," before "file".

Page 302, line 13, insert "or its authority to make determinations under section 7124 of this title" after "practice".

Page 337, after line 2, insert the following:

"§ 7124. Air traffic controllers; complaints against

"(a)(1) An air traffic controller shall not—

"(A) willfully hinder or impede his own work performance, productivity, or discharge of duties or that of any other employee; or

"(B) engage in a strike, work stoppage, or slowdown.

"(2) An air traffic controller who violates paragraph (1) of this subsection shall be removed or suspended without pay in accordance with the provisions of this section.

"(b) If the most immediate supervisor of any air traffic controller believes that such air traffic controller has violated subsection (a)(1) of this section, such supervisor shall immediately—

"(1) suspend such controller with pay until termination of such suspension under subsection (c) of this section or removal or suspension without pay of such controller under subsection (f) of this section;

"(2) file a written charge describing such violation with the Secretary of Transportation or any employee of the Department of Transportation designated by the Secretary for such purpose; and

"(3) furnish a copy of such written charge to such controller.

"(c) The Secretary of Transportation, or any employee designated by the Secretary pursuant to subsection (b)(2) of this section, shall, on the filing of a written charge with respect to any air traffic controller under such subsection (b)(2), conduct an investigation as to whether such controller has violated subsection (a)(1) of this section. If the Secretary, or such employee, determines based on the investigation that there are reasonable grounds to believe that such air traffic controller has violated such subsection (a)(1), he shall issue, within 21 days after such filing, a complaint to such controller and to the Authority alleging each such violation. In any case in which the Secretary, or such employee, does not issue a complaint after an investigation under this paragraph, he shall, within 21 days after such filing, furnish to such controller and to the supervisor who filed such charges a written statement of the reasons for not issuing the complaint, at which time the suspension of such controller shall terminate.

"(d) An air traffic controller to whom a complaint is issued under this section shall be entitled to—

"(1) an advance written notice from the Authority of possible removal or suspension without pay under this section;

"(2) a copy of the complaint from the Authority containing specific allegations;

"(3) a reasonable time, not to exceed 14 days, for filing with the Authority a written answer to the allegations in the complaint, together with affidavits and other documentary evidence in support of the answer;

"(4) be represented by an attorney or other representative; and

"(5) a written decision by the Authority and specific reasons therefor within 30 days after the issuance of such complaint.

"(e) The Authority may provide, by regulation, for a hearing which may be in lieu of or in addition to the opportunity to answer provided under subsection (d)(3) of this section.

"(f) If the Authority determines after an opportunity to answer under subsection (d)(3) of this section or after a hearing under subsection (e) of this section that such air traffic controller has violated subsection (a)(1) of this section, the Authority shall immediately transmit such determination to the Secretary of Transportation, who shall then immediately remove such air traffic controller or suspend him without pay for a period not to exceed 60 days.

"(g) Copies of the advance written notice, the answer of such air traffic controller if written, a summary thereof if made orally, the notice of decision and reasons therefor, and any order effecting the removal or suspension, together with any supporting material, shall be maintained by the Authority and the Secretary of Transportation, or any employee designated by the Secretary pursuant to subsection (b)(2) of this section, and shall be furnished by the Authority, on request, to such controller.

"(h) An air traffic controller adversely affected or aggrieved by any final decision or order under this section may obtain judicial review of such decision or order in the same manner and to the same extent as employees may obtain judicial review under section 7702 of this title.

"(i) This section does not apply to the suspension or removal of an employee under section 1207, section 4303, subchapter III of chapter 73, or chapter 75 of this title or a reduction in force action under section 3502 of this title.

Page 331, line 1, strike out "GRIEVANCES" and insert in lieu thereof "GRIEVANCES, APPEALS, REVIEW, AND PENALTIES".

EXTENSIONS OF REMARKS

NEA CAUGHT WITH HAND IN COOKIE JAR

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. McDONALD. Mr. Speaker, the National Education Association some years ago dropped all pretense of having a primary interest in the education of children and teaching. It is now a raw political machine doing street battles over trade union matters. In this capacity, the NEA injects itself in political contests around the Nation against those who do not endorse its outlook. However, the NEA recently got its hand caught in the "cookie jar". As the result of a complaint filed by the National Right to Work Committee, it has found that the NEA was automatically deducting political contributions from teacher's payrolls without the teachers' consent. The further legal question that needs to be decided is whether or not the candidates receiving this money should be forced to return it? The press release from the National Right to Work Committee on this matter is included at this point for those who would like to know more of the NEA and this incident. The release follows:

POLITICIANS RECEIVE ILLEGAL CAMPAIGN CONTRIBUTIONS FROM NEA; NATIONAL RIGHT TO WORK COMMITTEE SAYS: GIVE IT BACK

WASHINGTON, D.C., July 26, 1978.—Scores of politicians in the 1976 and 1978 elections—including now-U.N. Ambassador Andrew Young and other prominent figures—took illegal campaign contributions from the Na-

tional Education Association (NEA) union, the National Right to Work Committee charged today.

In a case stemming from a 1976 Right to Work Committee complaint, a federal judge ruled last week that the NEA-union's "reverse-checkoff" system—in operation from 1974 through 1977—is by its very nature illegal. According to the system, the NEA-union automatically deducted political "contributions" from teachers' paychecks without the teachers' consent. To get their money back, teachers were forced to go through a cumbersome process of filing a written request for a refund.

LARSON CALLS ON CANDIDATES TO RETURN TAINTED FUNDS

Reed Larson, president of the National Right to Work Committee, said, "Now that the court has confirmed that the NEA-unions' 'reverse-checkoff' schemes are illegal—its incumbent upon the candidates who took any of the illegally collected money to promptly return it."

Larson said an estimated two-thirds of the money in the NEA-union's bulging political warchest each year came from the illegal "reverse-check-off" scheme.

"There's a strong moral—and possibly legal—obligation upon the beneficiary candidate to return the NEA-union's contributions," said Larson, "all of which could be money taken illegally from people who didn't want to contribute.

"No candidate should have been unaware of the cloud over the NEA-union check-off at the time he took the money," said Larson. "Since its inception, its illegality has been recognized by the FEC and even by union lawyer Tom Harris."

The NEA-union counsel's own testimony in the case dramatically substantiates Larson's point. In the court order, District Judge Oliver Gasch quoted the NEA-union counsel as stating:

". . . (I)t is well recognized that if you take away the mechanism of payroll deduction you won't collect a penny from these people, and it has nothing to do with voluntary or involuntary. I think it has to do with the nature of the beast, and the beasts who are our teachers who are dispersed all over cities who simply don't come up with money regardless of the purpose."

Citing the Supreme Court's decision in *Pipefitters Local 562* v. *United States* (1972), Judge Gasch responded that a "knowing free-choice" has to be made by anyone who gives a political donation.

NATIONAL RIGHT TO WORK COMMITTEE FORCED FEC TO ACT

The National Right to Work Committee originally filed a complaint with the Federal Election Commission (FEC) back in October, 1976, when after more than two years of illegal NEA-union payroll deductions, the FEC had failed to act against the NEA-union. When the FEC still refused to enforce the law and prosecute the NEA-union, the Right to Work Committee obtained a court order forcing the FEC to perform its duty on behalf of thousands of teachers across the country.

In September, 1977, despite the clear case of massive violation, the FEC initiated the weakest possible suit against the NEA-union. (Had the FEC still not acted within 30 days of the court order, the Right to Work Committee would have been allowed to sue the NEA-union directly.) Moreover, the FEC misled the court by withholding two important facts: (1) that the NEA-union required the political "contributions" as a condition of employment; (2) and the NEA-union was taking political "contributions" from nonmembers as well. The misleading FEC suit resulted in Friday's judgment of no fine or civil penalty—a wrist-slap—against the country's largest union.

FEC SLAPS MASSIVE FINE ON BIG LABOR'S "ENEMY"

By contrast, the FEC is demanding close to $400,000 from the National Right to Work Committee for allegedy committing a technical violation concerning the Commission's definition of "membership"—a term the FEC refuses to define!

"The FEC's harassment of the Committee is outrageous," said Larson. "But it's not surprising, considering the inordinate influence of Tom Harris on the Commission."

Thomas Harris, former chairman and now commissioner of the FEC, served for many years as counsel to the CIO-union and subsequently the AFL–CIO.

"But it's revealing," Larson continued, "that Commissioner Harris knew the NEA-union scheme was illegal right along, and yet he did nothing on his own initiative to stop it."

The fact that Harris knew the "reverse" or "negative check-off" was illegal is substantiated by his own testimony, as FEC chairman, before the House Administration Committee last year:

". . . I am not hostile to the concept of union political action nor am I hostile to the notion that their political funds should be well funded . . .
(however)

"The particular device here proposed (negative check-off by NEA) or here used by the NEA is, in fact, one that has been familiar to union lawyers for some thirty years. No other union has conceived that it was permissible either under the 1947 Taft-Hartley Act or under the subsequent revisions."

NEA-UNION TO MAKE REFUNDS AVAILABLE—QUESTION IS: HOW?

Although no fine or penalty was assessed against the NEA-union—Judge Gasch ordered it to make refund payments to the bilked union members. However, the question still remains as to whether non-union members forced to pay "agency shop" fees, will receive refunds of the political contributions extorted from them.

While the NEA-union reportedly has some $400,000 in escrow to cover the refunds, several times that amount was raised by the illegal "reverse-checkoff" method.

Close observers of the scandal are questioning where the $400,000 and other monies will come from to reimburse the teachers. Larson commented, "We want to be sure that the union officials won't be using 'agency shop' fees and other compulsory dues to pay back the money they unlawfully took.

"The NEA illegally took money from thousands of educators to subsidize the campaigns of more than a hundred politicians across the country," said Larson. "If the money isn't promptly and legally returned, it's bound to become an issue in the upcoming elections."

The National Right to Work Committee is a 1.25 million member citizens' lobby that opposes compulsory unionism in any form.●

YOUTH ART MONTH

HON. TENO RONCALIO

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. RONCALIO. Mr. Speaker, Children's Art Month was initiated in 1961 by the Crayon, Watercolor, and Craft Institute, Inc. The purpose was to "Emphasize the value of participating art for the development of all children". In 1969, teenagers were included in the designation, and "Youth Art Month" is now cosponsored by the National Art Education Association, Nation PTA, and the General Federation of Women's Clubs, along with other national organizations. Support has continued to grow, and several Governors have issued special proclamations to recognize the month of March as Youth Art Month.

Since 1973, a Presidential proclamation to recognize the month has been sought. I introduced a resolution urging such a proclamation in the last two Congresses, and am introducing a similar resolution today. The resolution would designate March 1979, as Youth Art Month; and I am pleased with the interest this resolution has prompted.

Today's young people are searching for values. Participation in the arts will help develop self-discipline, self-expression, and appreciation for beauty. We can take part in the development of these values by recognizing youth's involvement in the arts. Knowing that their efforts will be recognized just might provide sufficient incentive for youngsters to try their hand at art. I would like to help our young people become interested in something beyond the TV set; and I see this as an opportunity to encourage involvement in a worthy activity.

Although little time remains in this session, I hope my colleagues will stand behind this effort, and perhaps we will be successful in conveying our wishes to the President.●

REAFFIRM SUPPORT FOR TAIWAN

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. WINN. Mr. Speaker, in July, I was privileged to travel to the People's Republic of China with my distinguished colleague, LESTER WOLFF.

During our stay, we met with many Chinese leaders including Vice Premier Teng Hsaio-ping. One of the main points we stressed to him was that Congress is not in the mood to dump our allies in the Republic of China on Taiwan, just so that we might normalize our relations with the People's Republic. We have a strong moral commitment to the Republic of China, and we told Teng that the United States does not want to give the world the impression that we lack credibility in our commitments.

With that background, I would like to submit for the RECORD a copy of a recent proclamation issued by the Board of County Commissioners of Sedgwick County, Kans. It reaffirms our friendship with and commitment to the Republic of China, and I urge my colleagues to join me in subscribing to this resolution of support.

PROCLAMATION OF SEDGWICK COUNTY, KANS.

Whereas, The Republic of China has been a friend and ally of the United States through the years; and

Whereas, The Republic of China was a founding member of the United Nations and has always been a law-abiding member of the community of nations; and

Whereas, The Republic of China have built a successful, prosperous, free economy out of the ashes of a half-century of revolutions, invasion and civil war and now serve as an important trading partner of the American people; and

Whereas, The Republic of China is of great strategic importance in the defense of East Asia and the Pacific and has always utilized its military power in the interest of the free world; and

Whereas, The Republic of China is important to the economy of the United States and of the State of Kansas and Sedgwick County, through its use of wheat, soybeans and other agricultural products:

Now, therefore be it resolved by the Board of County Commissioners of Sedgwick County, Kansas:

That the Congress of the United States is hereby urged to promote continued friendship, freedom and security of our friend and ally, the Republic of China, and its people; and

Be it further resolved: That the County Clerk of Sedgwick County, Kansas, transmit copies of this proclamation to the President and the Secretary of State of the United States, each member of the Kansas delegation in the Congress of the United States, and the Ambassador of the Republic of China to the United States.●

HOPE FOR A FREE CZECHOSLOVAKIA

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. YATRON. Mr. Speaker, August 21 marks the 10th anniversary of the Soviet-led invasion and occupation of Czechoslovakia. I wish to express the fervent hope that one day Czechoslovakia will again be a free and autonomous nation, and that her heritage of heroism, bravery and dedication to the cause of freedom will continue to be a source of inspiration to all the oppressed peoples of the world.

Sixty years ago, after World War I, an independent Czechoslovakia emerged from the ruins to begin rebuilding her land, establishing a model of democracy and giving her people hope for a future blessed with freedom and peace. Forty years ago, these hopes were crushed when in the Munich Pact, Czechoslovakia was sacrificed in a futile attempt to halt Hitler's aggressive movements. After the Second World War, democracy again flourished in Czechoslovakia. This renewed promise of freedom was to be short-lived, however, for 30 years ago Czechoslovakia was seized by the Stalinist Soviets.

Under the leadership of Alexander Dubcek, 10 years ago, the end of repression and restriction seemed within the grasp of the Czech people. Unfortunately, this hope was destroyed by the Soviet Union. On August 21, 1968, troops from the Soviet Union and four other Warsaw Pact countries invaded Czechoslovakia. Dubcek and other Czechoslovak leaders were arrested and taken to Moscow. This occupation marked the third time in this century that hope for a free and autonomous Czechoslovakia was thwarted.

After 10 years, this occupation by Russian troops is still in effect, bringing with it continued oppression, extensive violations of human and civil rights, and unprovoked incarcerations. The indignation of Czechoslovak citizens aroused by the Soviet occupation as well as by sadistic methods of repression gave birth to a document known as petition 1978. This document manifests the popular discontent of the Czech people and appeals to the Soviet Union to cease its policy of inhumane persecution and to adhere to the Helsinki Final Act, the U.N. covenants, and the Czechoslovak Constitution.

The lesson of Czechoslovakia must be heeded by all the free peoples of the world. Czechoslovakia reminds us of how essential and how precious freedom truly is, and what its loss can signify. Let us pray that one day soon the Czechoslovak people will again achieve the independence that is the natural right of all men, and that by their example the world will realize a universal understanding of the need for all people to be allowed to exercise their inherent right of self-determination.●

REDUCTION OF CAPITAL GAINS RATES AND SMALL BUSINESS

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. McCLOSKEY. Mr. Speaker, we are debating today a very fundamental question: whether a reduction in capital gains rates, admittedly a benefit to those who are relatively wealthy, is justified by the benefits to the Nation of stimulating new investments in high-risk small business enterprises.

This is fundamental because it goes to the heart of our confrontation as a capitalist-free enterprise economy versus the Communist-controlled economy system.

I suggest that it is a necessary ingredient of our system that we have capitalists. Bluntly stated, this means people of wealth who are encouraged to invest that wealth in risky business enterprises.

To accept risk requires the incentive of reward. This, I take it, was the reasoning which, from the earliest days of our progressive income tax, dating from adoption of the 16th amendment in 1913, impelled the Congress to tax capital gains at a maximum of one-half of earned income rates.

Ideally, also, our free enterprise system would encourage a nation of thriving competitive small businesses, constantly striving to outdo, outinnovate and outproduce large companies.

To achieve this goal also requires risk capital. The small business community, acting through the West Coast Regional Small Business Investment Associations, has submitted a well-considered resolution on this subject, and I am pleased to insert it in the RECORD at this point for reference of the Members of the House.

RESOLUTION ADOPTED BY THE WEST COAST REGIONAL ASSOCIATIONS OF THE NATIONAL ASSOCIATION OF SMALL BUSINESS INVESTMENT COMPANIES

Whereas, a healthy investment climate encourages the formation of capital so necessary to assure the long-run economic health and vitality of the free enterprise system, and

Whereas, the benefits of such an investment climate include not only increased jobs and other economic opportunities for the American people, but also increased revenues to the government from an expanded tax base, and,

Whereas, Federal tax policies, which are capable of severely altering the risk/reward ratio of the investor, have in recent years excessively impacted the venture capital industry which provides the high-risk investment dollars needed to nurture young, growing business enterprises, and

Whereas, the principal reward to the entrepreneurial driving forces behind such enterprises, as well as to their outside venture capital investors, comes in the form of long-term capital appreciation, be it

Resolved, That the Southern Pacific and Pacific Northwest Regional Associations of Small Business Investment Companies support to the fullest extent possible the Steiger-Hansen Investment Incentive Act of 1978.●

MAJOR VETERANS' PENSION REFORM THIS YEAR

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mrs. MEYNER. Mr. Speaker, I think the Congress can point with pride to the major veterans' legislation completed during this past year. We will recall the much-needed 6.6-percent increase in veterans' educational benefits, signed into law last November. This legislation particularly helped a relatively neglected group of veterans, those who had served in the unpopular Vietnam war. Until 1972, educational benefits for these veterans were relatively low, and, since then, inflating tuition costs had made the increase in educational benefits imperative. In addition to the 6.6-percent increase in educational benefits, the new law increased the maximum Veterans' Administration education loan from $1,500 to $2,500.

I was particularly gratified that this new law included a provision for which I had actively campaigned: the conferring of veterans' status and benefits on members of WASP, the courageous women of my own generation who ferried planes during World War II.

Now, Mr. Speaker, we can offer additional good news to veterans. New legislation, the product of a 5-year effort by the Veterans' Administration and Congress, will reform and restructure the

existing pension program for veterans and their survivors. Changes could be made prior to final enactment of the pension reform legislation, which has now passed both Houses of Congress with certain differences to be reconciled in conference. I am, however, pleased to note important characteristics of this landmark veterans' legislation.

During the 20 years since the enactment of the last major pension legislation, the system had developed such serious flaws that it could not be fixed piecemeal. In recent times, it had been ineffective in meeting the needs of many veterans and their survivors. Under the new law, however, a guaranteed annual income will be provided to all eligible veterans and their survivors, based on their need. It at long last assures needy veterans who are disabled or over 65 an income above the poverty level.

One of the most urgently needed changes, which I have been working to bring about since my election to Congress 4 years ago, was the elimination of that unhappy, annual discovery of many veterans that their pensions had been reduced because of social security cost-of-living increases. Under this important new legislation, when cost-of-living increases occur in social security benefits, the veterans' pension rates will be increased by a like percentage. For example, for the veteran under 80 with no dependents who had a social security income of $3,000 and a pension of $1,000, a 5-percent cost-of-living increase in the social security payment would trigger a corresponding increase to $1,050 in the pension.

A second advance for veterans in the new bill is particularly commendable. It provides an $804 annual increase—or a 25-percent add-on—for pensioners over 80, reflecting recognition of the increased needs of the elderly veteran, most of whom are World War I veterans. As a member of the Select Committee on Aging, I applaud this step in helping elderly veterans to meet the high cost of living in these inflationary times.

Mr. Speaker, though the 95th Congress has, as indicated above, achieved major legislation for veterans, much remains to be done. For example, we need to find ways to open more and better employment opportunities for Vietnam war veterans, and we need to open more doors to civil service employment for women veterans. I feel that many of our colleagues in the House of Representatives share the hope that these and other significant improvements in the laws for veterans will be completed prior to the adjournment of Congress this fall.●

BICENTENNIAL SERVICE IN LOUISVILLE, ILL.

HON. GEORGE E. SHIPLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. SHIPLEY. Mr. Speaker, at the request of one of my constituents, Rev. Joseph Williams of Vandalia, Ill., I would like to insert an article and excerpts of a speech given in Louisville, Ill., 1976.

LOUISVILLE PASTOR AND CHURCH IN BICENTENNIAL SERVICE

On Sunday afternoon June 27th, 1976, an area wide city, county Bicentennial church service was held on the courthouse square in downtown Louisville, Illinois. This service, a community project involved many denominations. The mayor and Chamber of Commerce of Louisville asked Brother J. Williams, pastor of the Louisville United Pentecostal Church to be the main speaker and their choir to sing.

Brother Williams spoke on the subject of "Preserving Our Heritage." Emphasis was placed on preserving our freedom and rights to education, free speech, freedom of press, freedom to think for ourselves and religious freedom.

Time and space would not permit a complete outline of the message but it is noteworthy that in speaking of education, Brother Williams pointed out that one's education is not complete until he learns that the fear of the Lord is the beginning of knowledge. One's education is not complete in botany until he knows the true vine of John 15:1, in geology until he knows the rock of Deut. 32:4, in astronomy until he knows the bright and morning star in Rev. 22:16, in geography until he knows how to get to Bethlehem and then to Calvary and from Calvary to the upper room.

The crowd included many city and county officials, lawyers and other business people. Brother Williams and the Louisville church is well respected and influential in the community and need your prayers that God will continue to use them there.●

YOUNG'S TERMINAL CANDOR WAS ENTIRELY PREDICTABLE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. McDONALD. Mr. Speaker, the recent column by John Lofton, appearing in the Washington Weekly for Thursday, August 3, 1978, summed up very nicely why American nerves are getting somewhat rubbed raw by the repeated blundering and anti-American statements by Andrew Young. Every public official is allowed a gaff now and then, but Andrew Young used up his quota a long time ago. The column by Mr. Lofton follows:

[From the Washington Weekly, Aug. 3, 1978]

YOUNG'S TERMINABLE CANDOR WAS ENTIRELY PREDICTABLE

(By John D. Lofton, Jr.)

WASHINGTON.—On Jan. 30, 1977, in the East Room of the White House, swearing in the "best" public servant he has ever known, President Carter hailed Andrew Young, his new ambassador to the United Nations, as a man who has "a way to assess a complicated question and divulge his accurate but sensitive and simple analysis to other people. . . ." Praising Young for his willingness to serve his country, Carter said that he looked forward to "greater things from him in the future."

Well, the president didn't have to wait long. Within a week of assuming his U.N. post, Young was repudiated three times by the State Department, twice by Secretary of State Cyrus Vance personally—for his remarks concerning Vietnam, Rhodesia and Cubans in Africa. The ambassador urged U.N. membership for communist Vietnam, said the white minority regime in Rhodesia had to negotiate with black leaders if South Africa told them to, and said that Cuban troops in Angola brought "a certain stability and order" to that country.

Vance said that Young's statement about Rhodesia was "not quite that simple," and he said that Cuban forces in Angola were "not helpful to a peaceful solution" to the conflict in that country.

But these were only the earliest symptoms of Young's chronic verbal diarrhea. His public fight against terminal candor had just begun. Following these gaffes, he has:

In a CBS interview, pooh-poohed the dangers of communism because it has "never been a threat to me."

Slandered a whole nation and an entire New York borough, calling the Swedes "terrible racists" who treat blacks as they are treated in Queens.

In a Playboy interview, labeled Presidents Nixon and Ford "racists," a charge that Carter was forced to disagree with through a White House spokesman. Young later said he meant nothing "derogatory" by his remark.

Accused former Secretary of State Kissinger of having put a "burden on the back of the British and then abandoned them" as regards a Rhodesian settlement. Once again, this time at an impromptu press conference after church in Plains, Ga., the president had to explain that Young's comments were "taken out of context." Young subsequently called Kissinger and apologized, but the apology was fuzzed up when the U.N. ambassador delcared: "I don't say anything that I don't want to say. I know exactly the effect I want to produce."

In a London TV interview, called Great Britain "a little chicken" on race, saying that sometimes he almost thought this country had "invented racism."

Categorically declared as innocent the so-called "Wilmington 10," a group serving time in North Carolina for arson and conspiracy. Young said the Wilmington 10's lawyers were unprepared, which is why they were convicted. The group's attorney, James Ferguson, says Young is "absolutely off base" and "obviously doesn't know all the legal ramifications of the case if he's making that claim."

—From Geneva, Switzerland, excused the looters who rioted during last year's New York City blackout, observing: "If you turn out the light, folks will steal . . . especially if they're hungry."

—Nonchalantly answered "yeah" when asked by a member of the press if he thought the government of South Africa was illegitimate. For the umpteenth time, a State Department spokesman "corrected" this statement, making clear that it was not the view of the U.S. government.

Now we have Andrew Young's latest recent flap. In an interview with a Paris paper, when asked about the trials of two Soviet dissidents, he noted that "after all, in our prisons, too, there are hundreds, maybe thousands of people whom I would call political prisoners." Carter, Vance, Senate Majority Leader Robert Byrd, and most of the rest of the civilized world have attacked this statement. The Soviet news agency, Tass, and Uganda's Idi Amin support it, however. Even Young himself has backed off his remark, sort of, yet he vows to tell us later just exactly what a political prisoner in the United States is.

Young's rhetorical recklessness was entirely predictable. In a 1970 ABC-TV interview, he said, in a special on the Black Panther Party, that he "probably would" support the destruction of Western civilization if it was necessary to "liberate" the rest of the world.

When President Carter swore him in as ambassador, he noted that Young was reluctant to take the job because he believed "that he wasn't quite ready for it."

Amen. This is the only feeling Andrew Young has ever had with which I am in total agreement.●

PRESS FREEDOM UNDER SEIGE

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mrs. MEYNER. Mr. Speaker, last June 15, I was moved to address my colleagues in the House of Representatives on a matter of critical importance: The protection of the fundamental freedom of expression. I do so again today.

The occasion last June was provoked by the rather frightening U.S. Supreme Court decision, Zurcher against Stanford Daily, which allowed law enforcement officials to enter and search the premises of a newspaper armed only with a warrant issued upon probable cause that the newspaper may have in its possession evidence of a crime. This decision opened the door to the possibility of law enforcement officials raiding newsrooms for background research, outtakes, and drafts of articles simply because some public official dislikes a reporter or publisher.

The occasion today is prompted by the fact that a reporter for the New York Times is in jail for doing his job. A New Jersey court ordered his jailing because he refused to turn over his investigative files. He refused, in effect, to name his sources.

Last June I called upon my colleagues to give immediate consideration to legislation, H.R. 12952, that would prohibit any search of the premises or any seizure of documents controlled by a news organization or a reporter unless there was first a court hearing at which the newspaper or reporter could contest the search and possible seizure of materials.

Today, I am calling upon my colleagues once again to act on this legislation. The urgency of immediate action is even more manifest with the recent developments in New Jersey. I will not belabor the point in my remarks today. Instead, I direct my colleagues to an editorial that appeared in the August 4, 1978 edition of the Dover, N.J., Daily Advance.

The Daily Advance editorial clearly and succinctly discusses the issue, especially when it points out that "The very foundation of freedom and the free dissemination of news is at the core of what is turning into a continuing battle over reporter files."

Thomas Jefferson once said: "The basis of our government being the opinion of the people, the very first object should be to keep that right; and were it left to me to decide whether we should have a government without newspapers or newspapers without a government, I should not hesitate a moment to prefer the latter."

Upon reviewing the Daily Advance editorial, I am sure my colleagues will realize the need for taking quick action on the legislation that would help reverse the chilling effect of recent court decisions by helping to secure the freedom of the press, and in doing so, heeding Jefferson's advice that "the very first object should be to keep that right."

[From the Daily Advance, Aug. 4, 1978]

A FREE PRESS

Another reporter has been ordered to jail for withholding investigative research files of the "Dr. X" case from the defense.

There has been a continuing series in the past few years of such cases with those involved in the prosecution or defense in criminal cases out on fishing trips for clues by putting reporters and newspapers on the line.

It is an endangering and inhibiting act against a free press which prints what it conclusively knows and discovers by its own investigation. There would be no other purpose to such probes if the facts turned up were not printed.

So, the continuing demands for the turnover of reporter notes and files with no specifics falls into the category of a hunting expedition without a definite purpose—one that serves as a direct threat to a newspaper's ability to find ways and means to investigate what is going on.

Reporters rely on sources for tips. The major deterrent in turning over notes is that those sources will be publicly divulged.

And once that happens, reportorial credibility has to evaporate. Without that one, single ingredient, there is no protection for those who may not be involved but are able to guide a reporter to places, people and information about what is going on and what has happened.

Reporters have gone to jail in the past and will continue to do so to protect the right of a free press to gather news without being fettered and forced to divulge the processes through which information was obtained.

There is much at stake in the issue. The very foundation of freedom and the free dissemination of news is at the core of what is turning into a continuing battle over reporter files.

The New York Times reporter in this most recent case has notes and files which are wanted to reportedly used in the questioning of witnesses.

Trial Judge William Arnold ordered them turned over to him so that he could decide whether the defense should have them.

They were not turned over.

Turning them over—whether they were used to not—would be a beginning of what only could turn out to be an erosion of the ability of the press to gather information and put it before the people who not only have a right to know but who can be hurt if they don't know.●

TERRY JOYCE DRIVER OF THE MONTH

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. LUKEN. Mr. Speaker, I would like to draw my colleagues' attention to the accomplishments of Mr. Terry Joyce of Cincinnati, Ohio.

Mr. Joyce has in the last 2 months been honored as the "driver of the month" by his employer, the Hudepohl Brewing Co. of Cincinnati.

Mr. Joyce works as a driver-salesman—a vocation which requires both the affability of the salesman in providing services and information, and the expertise, reliability, and even brawn of the driver who delivers his product to the buyer.

In June and July of this year Mr. Joyce distinguished himself among his coworkers by exceeding his sales quota for more days than any other driver. This achievement is the result of the drive and enterprise which most characterize the driver-salesmen of this country.

Mr. Joyce, a 1964 graduate of Elder High School in Price Hill, has not only put in the long hours necessary for him to excel at his job, but has also found time to work with the young people in his neighborhood as a volunteer football coach. His St. Teresa teams have won three championships—the city championship in 1973 and 1975, and the CYO championship in 1970.

Terry Joyce exemplifies the American virtues of hard work and service to others, I am very glad to have this opportunity to pay tribute to his contributions both on and off the job.●

TITLE VII OF CIVIL SERVICE REFORM BILL

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. CLAY. Mr. Speaker, H.R. 11280, the President's civil service reform bill will soon be debated on the House floor.

Several of my colleagues and I fought for a fair, balanced, effective and strong labor-management relations program which is encompassed in title VII of H.R. 11280.

The committee considered and rejected several proposals put forth by the administration which would have essentially gutted our efforts and left the labor-management relations program totally management-oriented with little attention focused on Federal employees.

In the final analysis, the committee struck a middle ground on the issue of collective bargaining for Federal employees.

I want to share with my colleagues the point by point actions taken by the committee during consideration of title VII. The areas include: Coverage, removability, union security, scope of bargaining and management rights, scope of grievance/arbitration procedures, judicial involvement, and official time.

Coverage.—The committee print provided that exceptions to the bill's coverage may be made only by the FLRA and only on an individual basis. The FBI, CIA, NSA, Foreign Service, and other agencies were specifically excluded from coverage in the Administration's proposal. The Administration proposal

further provided the agency head with the unilateral discretion to suspend the program for national security, investigative, internal audit purposes, or when non-domestic activities would serve the national interest. By voice vote, the committee adopted a compromise amendment which excluded intelligence and national security agencies from the bill's coverage and which provided that the FLRA, upon application of agency heads, could grant additional exceptions from the bill's coverage for internal security and intelligence units.

Removability.—The committee print restricted the President's authority to remove the members of the FLRA and the Impasses Panel, and the General Counsel of the FLRA. The Administration proposal originally placed no restrictions on the President's authority to remove these persons from office. During committee consideration, the Administration agreed to the removal of members of the FLRA only for cause. The committee adopted by voice vote a compromise amendment which provided that members of the FLRA and Impasses Panel may be removed by the President only for cause and that the General Counsel of the FLRA serves at the pleasure of the President. This provision is consistent with the provisions of the National Labor Relations Board. The Administration proposal was rejected by the committee on a voice vote.

Union security.—The committee print provided for an agency shop if, after the election of an exclusive representative, a majority of employees voting in a special authorization election, voted for one. The Administration proposal prohibited involuntary contributions to employee organizations, but authorized the negotiation of free, voluntary dues withholding by agencies. By a roll call vote of 16–9, the committee adopted a compromise amendment which deleted the agency shop provision but retained the authorization of voluntary dues withholding at no cost to the union. The Administration proposal was rejected by the committee on a roll call vote of 15–10.

Scope of bargaining and management rights.—The committee print included within the scope of bargaining all personnel policies, practices and matters affecting working conditions of employees. These regulations would also be subject to collective bargaining, unless the FLRA determined that a "compelling need" existed to remove these matters from negotiation.

Presently, regulations issued by agencies (Civil Service Commission, Office of Management and Budget, Department of State, for example) which apply to other agencies, take away the authority of these affected agencies to negotiate matters which are otherwise subject to collective bargaining.

The "compelling need" test that President Ford made applicable to agency regulations in 1975 is thus moved up to Government-wide regulations. This provision on the one hand insures management the flexibility to issue uniform regulations covering terms and conditions of employment on Government-wide levels. On the other hand, it would ensure that employees are not deprived of their legitimate right to bargain over the terms and conditions of their employment, except where a genuine or "compelling" need to do so exists.

The Administration proposal retained virtually the same scope of bargaining as the Executive Order; it is retained a strong management rights clause; Government-wide regulations and personnel policies were barred from negotiations; and agency regulations were not subject to negotiations if a "compelling need" was proven to the FLRA by the agency.

The committee adopted, by a roll call vote of 14–10, a compromise amendment expanding the management rights clause to include as nonbargainable issues the number of employees in an agency, and agency authority to direct employees and to determine the methods, means and personnel by which agency operations will be conducted. Agencies could not, as at present, unilaterally remove issues from bargaining by merely issuing agency regulations.

The Administration proposal was rejected by the committee on a roll call vote of 16–9.

Scope of grievance/arbitration procedures.—The committee print provided for negotiated grievance/arbitration procedures on virtually all matters except discrimination and political activity issues. Employees could choose between the negotiated and statutory grievances procedures and could be awarded attorneys' fees and interest on back pay awards.

Under the Administration's proposal, grievance procedures would include statutory appeals but would not cover "examination, certification and appointment, suitability, classification, political activities, retirement, life and health insurance, national security, or the Fair Labor Standards Act"; and, back pay awards would not include attorneys' fees.

The committee adopted by voice vote a compromise amendment which narrowed the scope of the negotiated grievance arbitration procedure in the committee print to exclude retirement, and life and health insurance, and to include discrimination complaints. An aggrieved employee in a discrimination complaint may pursue his or her complaint under the applicable provisions of the Civil Rights Act of 1964 as amended and regulations which may be issued by the Equal Employment Opportunity Commission. The Administration proposal was rejected by the committee by a roll call vote of 16–9.

Judicial involvement.—The committee adopted the language contained in the committee print which provided that most decisions and orders of the FLRA are subject to judicial review and enforcement. The Administration proposal, which was rejected by the committee on a voice vote, would limit judicial review to only those issues in which there is a Constitutional question, and made no provision for judicial enforcement of FLRA actions.

Official time.—The committee print provided for unlimited official time for the processing of grievances and the preparation and actual negotiation of contracts. The committee adopted by voice vote a compromise amendment which provided unlimited official time only for the preparation and actual negotiation of contracts. The Administration proposal was to retain existing practice. This proposal was defeated on a voice vote.

Mr. Speaker, title VII, as approved by the Committee on Post Office and Civil Service, represents a realistic approach to the issue of collective bargaining in the Federal sector.

I urge my colleagues to uphold title VII and reject any weakening amendments which would only serve to gut this title.●

THE ROAD TO PROSPERITY—PART XIX—WHAT IS GOOD FOR TURKEY IS GOOD FOR THE TAXPAYERS

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. STEIGER. Mr. Speaker, opponents of capital gains tax reform have sought to make the tax legislation currently pending before Congress, the Revenue Act of 1978, a partisan issue. White House strategists argue that this tax bill, which they do not like, should be rejected because Republicans have supported it. What they are saying is that legislation should be judged, not on its merits, but on the basis of the Republican Party's position. In this instance, we are asked to ignore the problems of capital formation, the disincentives to invest in our tax code, and related problems of economic growth. All that matters is party membership.

It is a philosophy of desperation coming from a beleagured administration which cannot sell its domestic programs. What would happen if we Republicans reciprocated? A recent Congressional Quarterly study of key votes in the Senate showed that GOP support was essential for passage of four key Carter foreign policy issues—the Panama Canal Treaty; sale of fighter planes to Saudi Arabia; resuming arms sales to Turkey; and continuing the conditional sanctions against Rhodesia. What if HOWARD BAKER had decided to follow the negative philosphy of the White House, and voted against the Panama Canal Treaty because it was proposed by a Democratic President?

A recent Time magazine article explained the crucial vote in the House of Representatives on Carter's proposal to lift the Turkish arms embargo. The proposal passed only because of Republican support. In fact, the crucial vote came from a Republican member of the Ways and Means Committee, DICK SCHULZE. Former President Ford, following in the tradition of the great Republican Senator from Michigan, Arthur Vandenberg, actively worked on behalf of the proposal at the request of Mr. Carter.

There are certain members of the Democratic Party who want to make tax policy a partisan issue. Where will their negative opportunism stop? This country has serious economic problems, and they will not be resolved by petty partisan politics. The Time article follows:

THE RIGHT THING FOR AMERICA

It was one of the most momentous votes in this session of Congress, and the outcome was excruciatingly uncertain until the very last minute. Nearly every member—413 out of 435—turned up to cast a vote on President Carter's request to end the 42-month-old U.S. embargo on arms for Turkey. The ban had infuriated the Turks and weakened the southern flank of NATO. Whether or not Carter would succeed in persuading Congress to lift the embargo was seen as a major test for his Administration.

As the House vote began, the cumulative tally flashed electronically on two of the chamber's walls. Soon the legislators were on their feet, shouting, jeering, laughing. The Count was almost a tie: 203 for maintaining the arms ban and 202 for lifting it.

The balloting was not over, however. Both Democrats and Republicans surged into the well of the House, trying to get the attention of the presiding officer, Don Fuqua of Florida. A key handful of them had not yet voted, and others were ready to change their votes. Roars greeted a sudden change in the wall tally; it was now 204 to 202 against Carter's request. But then four more members voted and the count shifted dramatically: 205 to 205.

Republican backbenchers started chant-

ing: "Tip! Tip! Tip! Tip!" They were daring Speaker of the House Thomas ("Tip") O'Neill to break the tie and rescue the President, his fellow Democrat. But O'Neill remained silent, doing nothing. Not only was he deeply committed to the embargo but also he was furious at the Administration for the dismissal of his old friend, Robert T. Griffin, from the General Services Administration. Other Democratic leaders, however, were frantically mobilizing support—for opposite sides. Indiana's John Brademas, the Democratic whip and a leader of the pro-Greek lobby, was fighting to keep the embargo. At this point, he had a lone vote in reserve. Opposing him was Democratic Floor Leader James Wright of Texas, who had already used up most of the "sleepers" he could call on to vote for the resumption of arms sales to Turkey. Brademas played his last card and Wright matched him; the tally was now 206 to 206.

Now G.O.P. chiefs swung reluctantly back into action. They resented the idea that they would have to rescue Carter, but they were acting at the request of a rather extraordinary Carter ally: none other than Gerald R. Ford, their onetime House comrade and President for 29 months, who lost to Carter by only 3 percent in the 1976 election. Responding to the G.O.P. leaders' promptings, Republican Richard Schulze of Pennsylvania signaled that he was changing his vote. The clerk of the House then cried, "Off no, on aye." To jeers, laughter and applause, the tally shifted again: 207 to 205. The pro-Carter forces finally had taken the lead, and after one more member's aye, the chairman brought down his gavel with a whack and declared the final vote: 208 in favor of lifting the embargo, 205 against.

Despite the narrow margin, it was clearly a major victory for President Carter's foreign policy. Since the Senate had voted one week earlier to lift the embargo, full-scale arms transfers to Turkey can resume shortly. The embargo originally had been imposed to pressure the Turks to withdraw their troops from Cyprus, which they had invaded in 1974 to protect the island's Turks from the Greek majority. But the arms ban accomplished little except to damage Turkey's ties to NATO and aggravate the country's domestic political instability.

In a statement following the House's action, Carter praised the "bipartisan, statesmanlike recognition that the time has come to turn a new page in our relations with the countries of the eastern Mediterranean . . . [It] is a crucial step toward strengthening the vital southern flank of NATO." Washington expects that the Turks will reciprocate soon by allowing the U.S. to resume electronic monitoring of Soviet military activity from Turkish bases, which the Turks close down three years ago.

The victory, reports TIME Congressional Correspondent Neil MacNeil, came only after some important private maneuvering by Jim Wright. Although he personally favored keeping the embargo against Turkey, he felt that as Democratic leader he must back the Administration's pro-Turkey policy. First he tried to draft a compromise acceptable to Brademas and others who favored Greece rather than Turkey. Brademas agreed to a one-year suspension of the embargo if Turkey would take positive steps to end the Cyprus stalemate. The President rejected that, however, arguing that it "would be like putting the Turks on parole. It would offend them."

Wright then started searching for some formula that could satisfy both the President and a House majority. The result was the bill passed last week. Similar to the Senate version, it allows the President to end the embargo if he certifies that Turkey "is acting in good faith to achieve a just and peaceful settlement of the Cyprus problem." The President must report to Congress every 60 days on progress toward a Cyprus solution.

Wright began calling several dozen Democratic Congressmen to enlist their support. He said later, "A lot of them wanted the lifting of the embargo to pass, but they didn't want to vote for it." With an election only three months away, most Congressmen preferred not to antagonize the influential Greek lobby. But by the time the issue hit the House floor, Wright had a list of 16 Democrats whom he could call on if necessary to back the President.

Carter, meanwhile, had been doing some phoning of his own and was startled by what he found. Of the 30 backbenchers with whom he talked, ten said their vote depended upon what Wright did. This persuaded Carter to endorse the Texan's new compromise.

Undoubtedly, the most important call Carter made was to Gerald Ford. "I'm in trouble on lifting the embargo. Can you help?" asked the President. "Yes I will," replied Ford, whose defeat in the 1976 election was partly owing to Carter's attacks on him for opposing the Turkish embargo. Ford went to work on G.O.P. Congressmen, and he got an earful when he told them why he was calling. Exclaimed Michigan's Guy Vander Jagt: "Do you realize that Carter knifed you unmercifully in the campaign for your stand on lifting the embargo? The Greeks voted against you 87 percent?" Replied Ford: "I know, Guy. But it's the right thing for America."

Vander Jagt and half a dozen other Congressmen from Michigan, Illinois and Ohio were so impressed by Ford's appeal and his lack of partisanship that they voted aye. Their action moved a State Department aide to concede: "Ford was crucial in delivering a few Republicans." The G.O.P., in fact, helped Carter on the Turkish question, just as it had on the Panama Canal treaties and the Middle East aircraft package. A minority of Republicans (78 to 64 voted to lift the arms ban on Turkey, while a minority of Carter's own Democrats (130 to 141) did so.

With all the political arm-twisting, the day-long debate on the issue probably changed few votes. Still it demonstrated the bitterness of the anti-Administration forces. Brademas, for example, tried to embarrass the President by quoting liberally from his 1976 campaign speeches denouncing Ford for opposing the embargo. The Indiana Congressman then tore into the President, charging that Carter's readiness to give Turkey something without getting anything in return shows that he may not be able to deal with Moscow. Said Brademas: "I am a little nervous about the President sitting down to talk with the Soviet Union in the SALT talks and giving action for a promise. Who would trust such a President? Not I."

After lifting the Turkish embargo, the House turned to a number of other foreign policy matters. It supported the Administration by blocking attempts to cut off military aid to South Korea and Chile. But it then rebuffed Carter by calling for an end to economic sanctions on Rhodesia. Going beyond the Senate's move of the previous week, the House voted, 229 to 180, to abolish those sanctions if a new Rhodesian government chosen in free elections takes office by Dec. 31. The current regime, headed by Prime Minister Ian Smith and three moderate black leaders, has promised to hold such elections in early December. Unlike the Senate action, the House did not require Rhodesia to try to negotiate with the radical Patriotic Front guerrillas before any lifting of sanctions. The Administration feels that this is a mistake and argues that the participation of the Front is necessary for the success of any settlement. It hopes to re-establish that point during a Senate-House conference.

When the House turned to the $7.3 billion foreign aid bill, it was unexpectedly sympathetic to some of the Administration's arguments. Defeated, for example, was an attempt to attach strings on aid to international organizations, like the World Bank, to prohibit them from using U.S. contributions to assist Viet Nam, Laos, Cambodia and Uganda. State Department lobbyists successfully argued that these agencies could not accept money with such conditions. Voting the restrictions, therefore, could force the U.S. to quit the organizations. Heartened by its victory on this issue, the Administration is more optimistic about the prospects for the rest of the foreign aid program. But it faces a major test later this month when key Congressmen are expected to propose slashing more than half a billion dollars from the White House's requests.●

A LOCAL PERSPECTIVE ON CETA

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. DOWNEY. Mr. Speaker, many problems with the CETA program, particularly those associated with the "substitution" of CETA workers for career public employees and abuses in the expenditure of CETA funds, were brought to the attention of the House during yesterday's consideration of the 1978 CETA amendments.

As reported by the Education and Labor Committee, the CETA bill, which we will consider again at a later date, takes many needed steps in dealing with these issues. For example, the committee creates stringent guidelines to address the substitution question, especially by limiting CETA employment to 18 months. The establishment of an Office of Investigations to monitor the CETA program also will greatly strengthen our ability to deal with CETA abuse. Yesterday's overwhelming adoption of an amendment to cut off CETA funds to local programs found in violation of CETA guidelines will provide teeth to this new CETA monitoring provisions.

To provide a local perspective as to why these provisions are necessary, I would like to include for the record several of a series of reports prepared for me about the CETA program in my home county.

These reports stem from a March 1978 meeting held by Local 852 of the Civil Service Employees Union. They point out that there is widespread misunderstanding, suspicion, and unease with the implementation of the CETA program on the local level.

When we again take up this bill, we must continue to clarify and adjust the CETA program. The following material, prepared by an organization with firsthand knowledge of CETA's operation on the local level, should help in that process:

SUFFOLK LOCAL 852, COMMITTEE ON CETA, REPORT TO CONGRESSMAN DOWNEY: MARCH 11, 1978

REPORT NO. 1

Over the past few years this Union has been inundated with complaints on the way the CETA program is being administered by the Suffolk County Department of Labor. The total number of permanent County employees has diminished, while the number of CETA (Federally Funded) employees has been increasing.

Not only has the indiscriminate hiring of CETA personnel placed a burden upon the employees of Suffolk County, but should the funding cease, an even bigger burden will be placed upon the taxpayers of this County. The services that these CETA employees are furnishing would now have to be funded through the yearly budget, and the effect upon the tax rate would prove to be disastrous. If these Federal funds were providing services that were new and innovative, the loss would not be so great, however, we will try to show today that the services being performed are services that should be provided through normal budgeting.

The Suffolk County Legislative and the County Executive have been advised of the pitfalls of depending too heavily on these Federal funds in the Budget Review of the proposed County Executive 1978 budget. The Director of the Budget Review Office of the Suffolk County Legislature make specific reference to the CETA program and its affect upon County Government and spending.

Listed below are excerpts from the Budget Review document:

The increase use of CETA personnel to staff County programs is noted. Caution is urged in the use of this program to prevent sudden dislocation of County services should the program be cancelled . .

The County Executive and the Legislature must decide the degree of outside dependency they desire, and they must decide over how many years the County should maintain no property tax rate increase policy. . . .

The implications were clear last year as they are clear this year. Comparatively (as supported by Budget Review Office data last year and County Executive data this year), the school and special districts in Suffolk County place an excessive drain on the property tax base. If they continue to do so and the County Government continues a policy of a no property tax rate increase, it is evident that County Government will become increasingly dependent upon various forms of Federal aid and Manpower programs (CETA). When and if that aid is substantively decreased, the County may find itself in a severe financial crisis. . . .

However accurate the facts stated in the Budget Review document are, the County Executive and the Legislature have not heeded the Budget Review Directors warnings, and in fact have stepped up the placing of CETA personnel in County Government with no thought to the future.

The facts are clear, the County Executive has laid off permanent employees, the abolishing of permanent vacant budgeted positions happens every year, and still we see an even greater influx of CETA employees on the County payroll.

Section S09.24 of the Federal Guidelines concerning Maintenace of Effort it states:

(a) Public Service Employment funded under the Act shall only be in addition to employment which would otherwise be financed by the eligible applicant without assistance under this ACT.

There will be evidence presented today that will show that the County of Suffolk is in fact using these Federally funded programs to supplement the County Budget.

During 1977 there were CETA employees in staff in over forty (40) County Departments, and their combine Federal payroll approximated at ($10,000,000.00) ten million dollars.

Clearly the County of Suffolk under present leadership is lulling the taxpayers into a false sense of security. In 1977 there were 1,078 CETA personnel performing services to the taxpayers which should have been handled by permanent personnel paid with normally budgeted County funds. The services performed were not new, but merely the routine services that are performed on a daily basis by permanent personnel. Again I say, by using these Federal funds for regular services that should be budgeted, are our leaders not bilking the Federal Government? Are they not deceiving the taxpayers of this County by not raising the tax rate when in all probability for County Government to run efficiently the tax rate may have to be raised? Is the County of Suffolk mismanaging the Federal funds? These are some of the questions that we as Union members and taxpayers have been asking. We now turn to the Federal Government in hopes that they may have the answers that we seek.

The CETA program though well intentioned at its inception, may well prove to be a harbinger of greater problems in the future. This too is also noted in the Budget Review document.

"While all these positive points would indicate a blanket policy of acceptance, it is meaningful to always remember the possibility of termination of Federal funding and its potentially catastrophic effect on County finances. The inclusion of CETA personnel on a program or project basis may solve certain short-term operating problems but can also create the need for increases in future staffing requirements. The prolonged inclusion of persons in certain CETA programs as departmental employees has already created the long term operating need for the continued filling of those positions."

"While we in no way mean to imply that this program should be changed, or modified, we stress caution in the utilization of CETA persons and recommend a concerned view towards future staffing and financial problems that could be created by the acceptance of a project or the possible future termination of the CETA program."

On January 18, 1978, a seminar on CETA held by Local 852, (Suffolk Chapter, Civil Service Employees Association) was held in the County Executive building.

At the Seminar were Union officials and the Commissioner of Labor and his Deputy. The Commissioner and his Deputy were there to speak about CETA and to answer any questions that the audience would pose. Many questions were in fact answered, but there are still many that are unanswered.

After the seminar, a CETA committee of union members was formed to help the membership of the union to better understand the program, and to seek out abuses and to serve as a watch dog over the program.

One of the most interesting things that the committee came upon was the way that the program is supposed to be monitored. The prime sponsor is the agency doling out the jobs under the program, and at the same time they are the monitoring agency. If a person directs a complaint to the Federal Department of Labor, the complaint is directed to the Prime Sponsor. The absurdity of this is if the Prime Sponsor is willfully entering into CETA abuses, then how can that Prime Sponsor objectively monitor itself, and even worse, is the fact that how can a responsible labor organization expect to have their questions and complaints answered?

What is contained in the accompanying documentation are facts that have been gathered over the past few weeks concerning alleged CETA abuses. All that we ask is that the information presented be reviewed, and if, and I emphasize if, there exists as much doubt in the mind of you our Congressman as there exists in the minds of this committee and all union members of Local 852, that Congress act in a positive manner and create a vehicle for monitoring this program. A monitoring agency above politics, a vehicle that will effectively meet the needs of all members of the community.

REPORT NO. 2

Suffolk County Department of Buildings and Grounds; Grounds Maintenance Division:

In 1973 which was the start of many CETA employees being hired, there were in the Grounds Maintenance division fifty nine (59) permanent employees. Now in 1978, some five (5) years later, there are still 59 employees in the division. At first look there doesn't appear to be anything wrong. However, when checking the figures with the department, it was learned by the committee on CETA that of the 59 employees in the division, 37 are permanent, and 22 are CETA workers. Clearly what we have here is a supplementation of permanent positions by Federally funded employees. The County has over the years through attrition and the abolishment of vacant positions supplemented the division's budget with Federal funds. Under the maintenance of effort section of the CETA guidelines this is not to be done by the agency receiving the funding.

In the Budget Review document previously referred to, there is reference to the Department of Buildings and Grounds assuming the responsibility for many new facilities, and a portion of snow removal work previously done by private contractors. Surely if the division is going to perform all of these additional duties there should be an increase in permanent staffing. Snow removal will not be a short-term project, nor will the taking over of new buildings. Therefore the CETA personnel performing these duties are not performing new or innovative services to the taxpayers, but rather routine work that must be provided to the public. Was this the intent of CETA?

Custodial Division of the Department of Buildings and Grounds:

In the 1976 budget there were 104 permanent positions, 43 proposed positions, and 21 CETA positions. Had these positions been filled, there would have been 147 permanent positions and 21 CETA positions. However the 43 proposed positions were not approved. Upon an investigation by the Committee on CETA, it was learned that the number of CETA positions in 1977 was doubled. What had happened, was instead of hiring permanent employees, the department hired an additional 21 CETA workers to help make up for the lost permanent positions that were requested in the budget.

This too seems to be a case where the County is supplementng its budget with Federal funds.

This same division also encompasses the watchmen. There are 25 permanent positions, 3 CETA II positions, 20 CETA VI employees, and the department is still hiring CETA workers. The question this brings to mind is, Does the patroling of County facilities stop if the CETA funding is stopped, or do we need these services all the time? Would these services exist without the help of the Federal Government. Shouldn't the personnel be hired on a permanent basis?

REPORT NO. 3

Department of Public Works, Suffolk County:

Much of the Federal money coming into Suffolk County is being channeled through Special Projects, (see enclosed copy). These projects are for no longer than 1 years duration, and the employees are eligible under title VI funding. In addition, these projects are for projects that would not be done through regular County funding.

The department of Public Works had in its 1978 budget a request for sixteen (16) new permanent employees.

Of the above mentioned vacancies two (2) are for Engineering Aide. The department has requested four (4) Engineering Aides under a "Special Project", the goals of the project being to provide more efficient and immediate service to the use of Suffolk County highways.

One (1) vacancy exists for the position of Draftsman. A request filed under a "Special Project" has been submitted for the hiring of two (2) CETA Draftsmen. The goal of the project is to update all County highway grid maps and to provide better service to the public.

Vacancies exist for Principal Clerk, Senior Clerk, Senior Account Clerk, Senior Stenographer, Stenographer, and; a request has been made for two (2) Clerk Typists, one (1) Account Clerk, one (1) Laborer and one (1) Project Coordinator to reorganize the filing system, to eliminate backlog and re-catalog office files.

Additional vacancies exist in the department for Engineering positions, i.e. Civil Engineer, Principal Aide, Senior Engineering Aides, etc. Yet the department seems to be holding off on hiring permanent employees, and rather than expend budgeted funds, request CETA funding for "Special Projects".

The Committee on CETA recommends a stricter monitoring of these "Special Projects." Are these projects really to be considered "SPECIAL"? Or are in fact these projects part of the ongoing tasks that the regular permanent staff has been unable to accomplish due to unfilled vacancies in already budgeted positions?

REPORT NO. 4

Town of Babylon:

In addition to abuses in the County of Suffolk, abuses exist in the other Municipalities that are receiving CETA funds. One such municipality is the Town of Babylon. What one must know, is that many abuses that exist are left unreported due to fear of repraisal.

A CETA II participant was hired as a clerk typist in February of 1975, and was subsequently promoted to Senior clerk typist in August 1977. This CETA employee worked over 18 months in one position, in fact worked a total of 30 months. . . .

An eligible list was established in August of 1977 as a result of an exam given for the position of Senior clerk typist in January of 1977. A letter was sent to the Labor Department stating that this was in violation of Section 96.23 of the Federal Guidelines.

The Guidelines stated that: No job will be filled in other than an entry level position in each promotional line until applicable personnel procedures and collective Bargaining procedures have been complied with.

The reply from the Labor Department was that the Commissioner did not feel the appointment violated the section that had been cited, and that he thanked the person inquiring for bringing the matter to his attention and to continue to do so as the CETA program in Suffolk County is very big.

However, if the Commissioner, being the prime sponsor, had bothered to look further, he would have found that Section 96.23–11 of the guidelines had also been violated. This section reads:

"Jobs in each promotional line shall in no way infringe upon the promotional opportunities which would have otherwise been available to persons currently employed, etc. And in researching the matter further, the committee finds again in section 96.24 article G–2 under Maintenance of Effort," The promotional opportunities of regular employees are not to be infringed upon, etc. . . .

If there is an existing list for Senior Clerk Typist, and a CETA clerk typist is promoted to the Senior position, it appears that this worker is definitely infringing upon the rights to promotion of a permanent employee.●

MR. ROY INNIS, DIRECTOR OF CORE, PRESENTS PERSUASIVE ARGUMENT FOR ELEMENTARY AND SECONDARY SCHOOL TUITION TAX CREDITS

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. ASHBROOK. Mr. Speaker, it is not often that I find myself in complete agreement with Mr. Roy Innis, director of the Congress of Racial Equality, on a controversy involving a major national issue. But I am happy to find that we are on the same side in favoring tuition tax credits for private elementary and secondary education. We are on the same side for essentially the same reason—the need to preserve freedom of choice in education.

On the floor of the House on May 31, 1978, I argued for such credits on both constitutional and public policy grounds. At that time, I stated, in part:

I also believe that such legislation is sound public policy, in that it would benefit all American education by helping preserve freedom of choice and diversity in our total system . . . inflation and the ever-increasing burden of taxation threaten to eleminate freedom of choice in education for the average American family. . . .

In an article in the August 10, 1978, issue of the Washington Post Mr. Innis makes much the same points and relates them to the special needs of black children. He elaborates upon the need for diversity in education by pointing out that healthy competition is good for both public and private education, and results in more power for the consumer of education, the American family. He is really saying that the principle which has built and sustained the American free enterprise system to the benefit of both producer and consumer—competition in the marketplace—is equally applicable to education. I agree, and am led to believe that perhaps Mr. Innis and I could agree on a good many other issues if we had the opportunity to sit down and discuss them in terms of fundamental principle.

His thoughtful article follows:

A TAX BREAK FOR BETTER EDUCATION

(By Roy Innis)

CORE is an organization that has gone through many battles for educational quality and that today is rooted in major black communities throughout the nation. We believe the passage of tuition tax credits at the elementary and secondary levels will have a tremendous potential impact on poor and minority youngsters throughout this country by giving them what they desperately need: options.

The arguments advanced against tuition tax credits fall into three categories: constitutional, fiscal and philosophical. To those who say, as Sen. Ernest F. Hollings (D-S.C.) did in a Washington Post op-ed column Aug. 7, "The scheme is blatantly unconstitutional. Every Supreme Court decision and all the constitutional scholars agree on that score," we would reply: wrong. Respected constitutional scholars have weighed in on both sides of the issue. Moreover, we are willing to take our chances on the constitutionality of this bill, which has an expedited court hearing provision. We shouldn't forget that there were those who said *Plessy* v. *Ferguson* was the law of the land and shouldn't be challenged.

Much has been said about the fiscal implications of the bill. Those objections have been met by the Senate Finance Committee, which on Aug. 3 changed the bill to make the cost comparable to the administration's alternative. Those who vote against it are not voting on the basis of cost. They are voting against the revolutionary philosophy that the bill embodies.

And make no mistake. This bill will indeed have a revolutionary effect on millions of poor parents and children in this country. Those are the parents and children who until now have had no choice—and with no choice, no power. What is revolution, after all but a shift of power? We are proposing that we shift the power from those who controlled (i.e., the educational establishment) to those they controlled (parents and kids).

Now we have come to what the fight is really all about. Black people have had to rely in the past on the public schools of this country to educate our children and enable our people to better their conditions. Those schools have often failed us. They have been sadly wanting not only in the efficacy of their teaching but even in their inability to guarantee the safety of our children. It is for that reason that CORE has established community schools and supports the efforts of parents who seek a better education for their children in private and parochial schools. Those parents who are willing to make an investment in their children's future deserve a credit.

But this bill is not just for the parents who exercise their option. We at CORE have not given up on the public schools; we recognize that whatever legislation is passed, the majority of American children—and the vast majority of minority children—will be educated in public schools. We know we must find a way to make the public schools better, to make them responsive to their constituency.

To us, it is perhaps most important that this legislation would provide a competitive stimulus to the public schools. The presence of even the comparatively small number of alternatives, even just the potential of parents' being able to reject a school that is not doing its job, can work great changes in

the public schools. Innovation in both public and private education would be stimulated by a tuition tax credit.

This measure, to borrow the words of an earlier time, would empower the people—and that's the question of philosophy. We believe it is time that the laws of this country give more than lip service to freedom of choice and quality education.●

ALICE M. RIVLIN SUMMARIZES THE DIALOGS ON AMERICA'S FUTURE SERIES—PART II

HON. CHARLES ROSE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. ROSE. Mr. Speaker, recently Alice Rivlin, Director of the Congressional Budget Office, gave a summary of the "Dialogs on America's Future" series sponsored by the Congressional Clearinghouse on the Future.

Over the past 2 years 15 well-known thinkers have spoken with us about the future. Dr. Rivlin's summary of their remarks was enlightening and provocative, and it is my pleasure to include her remarks in the RECORD today:

THEME 6

At Present, National Discussion and Decision-Making too Fragmented—We Should Focus More on the Future of Society as a Whole.

One aspect of this theme is that intellectual disciplines are too separate and more interdisciplinary research and communication is needed. In this connection, Robert Solow in a recent article in Challenge quotes a Forrester remark about the composition of a desirable planning group:

We should take care to keep out representatives of the social sciences. Such people always want to go to the bottom of a particular problem. What we want to look at are the problems caused by interactions.

At this, Solow observes:

I don't know what you call people who believe they can be wrong about everything in particular, but expect to be lucky enough somehow to get it right on the interactions. They may be descendents of the famous merchant Lapidus, who said he lost money on every item he sold, but made it up on the volume.

Federal agencies, Congressional committees, and other institutions were also alleged to be too fragmented and hence unable to deal adequately with policy for the future. Personally, I believe we need both a much greater effort to look at alternative futures in particular areas—medicine, transportation, education, and the like—and greater efforts to put the pieces together and look at alternative futures for the society as a whole. Neither experts nor generalists are thinking ahead enough. In the Congress, the budget process provides a possible forum for looking ahead on a global basis that does not reduce the usefulness of forward thinking by committees with more specific responsibilities.

Let me summarize briefly what I thought were the lessons of this series of dialogues for the Congress and for the Clearinghouse on the Future:

First, I would advise you not to worry about the sky falling or the end of the world coming. In any case, no one told you what to do if the sky did fall.

Second, it seems possible that economic growth will slow down in the future. I believe we should try to prevent this slow down, because it will be easier to preserve the environment and to have more equitable national and international income distribution if our economies are growing than if they are not. The specific lessons here certainly include encouraging research and development, new technologies, and new energy sources.

Third, we should conserve scarce materials and fuel by charging their full replacement cost, and we should discourage pollution by passing on its cost to the consumer. This does not imply that regulatory or other collective actions are not needed on both fronts, but we ought to use the market mechanism where we can.

Fourth, we should encourage concrete medium-term planning (five to ten years), but should be flexible enough to review our plans every year and change them when necessary. In the Congress, the budget process is certainly a vehicle for articulating future plans and I, for one would like to see budget targets set five years in advance. These targets should not be binding and should be debated anew each year, but they would serve as a framework for evaluating more specific budget decisions. It would also be useful to have somewhat longer-term options, say five to twenty years, spelled out and discussed. The Clearinghouse might serve as one forum for debating such options. Perhaps a future series of speakers should be asked to spell out some more specific alternatives and discuss the pro's and con's of each.

Fifth, there should be more national debate on alternative futures and new mechanisms for citizens to express their views on the future. If the Congress were actively debating alternative futures, it would be easier to get groups and individuals arguing with each other. It was my hope that the budget process would generate a national debate on budget priorities. This has not happened yet, but it would certainly be encouraged by a move to multiyear budget targeting.

One can imagine various devices for getting citizens and citizen groups involved in an active debate about futures—such as television courses accompanied by sequential polls of viewers—but such mechanisms should involve interaction between decision-makers and the public and should be based on increasing information.

For what it is worth, that is my view of what this stimulating series of dialogues said to the Congress.

CLEARINGHOUSE ON THE FUTURE, JUNE 14, 1978, ALICE M. RIVLIN

QUESTIONS AND ANSWERS

Question: How would you see these forums taking place? Under what auspices?

Answer: The forums would be of many kinds. For example, Members of Congress could sponsor them; so could local or national organizations. If you could get the media interested and involved, they could become national media events.

Question: How do you see the budget function in the futures programs?

Answer: (A) The budget process is one vehicle for debating future alternatives. At the present, Congress passes a concurrent budget resolution with one year goals in mind. If Congress would pass a budget with 3–5 year goals in mind, the Congress could bring in bigger options that can't be discussed with the one year budget. Many important issues, including both major new programs and major spending reductions, drop out of the budget discussion because they can't be accomplished in one year.

There have been positive moves in this direction. The Senate Budget Committee has adopted the five year decision-making process. Many people fear that if we think ahead we get locked in: they do not realize that *not* thinking ahead locks us in even more.

(B) The Clearinghouse could also be a forum for discussion of alternative solutions. Perhaps in a future series we could get the experts to do home work on particular options and get them to debate on alternative futures. We could get interest groups and constituents arguing. The reason why this doesn't happen in the country is because it doesn't happen in Congress. The Clearinghouse could provide a process of discussions.

(C) The use of polls and TV courses would be an interactive way of dealing with the future. This would allow participants to learn something.

Question: How does zero-based budgeting affect planning?

Answer: Any sensible planning must be based on thorough review of how current programs are working and how to make them more effective. "Zero-based" reviews fit in well with planning, although it is impractical to review every program in detail every year.

Question: Is it fair to make planning cycles go with election cycles?

Answer: Most Presidents take about two years to get acquainted with the office and figure out what they want to do. After that point, he begins planning for the next election. The incoming president would be better off with some kind of plan which he or she could change, rather than no plan at all.

Question: Productivity is falling by 1% each year. If this large decrease continues, what does it do for the future of our economic growth and optimism?

Answer: Productivity growth may be slowing down: whether or not this is good or bad depends on your point of view. In the 1950s the gloom and doom people saw productivity increasing too fast. They felt automation would be putting people out of work. Now the gloom and doom people are worrying that we will have a slow down in economic growth. It is true that the unemployment rate went down faster this year than it would have if productivity growth had been faster, but on balance I think we are all better off if productivity increases.

Question: What are your views of the implications of planning?

Answer: On a regular basis people should consider alternative futures. Current decisions should be made in the light of which alternative future you feel is best and your decision will reflect your current values. But it is important to consider the alternatives.

Question: What do you think of plans for the future that have more than one alternative?

Answer: The point is to get all the alternatives in the open and discuss them. Reviews of the budget may be done in terms of these tentative plans. We should think of planning in terms of targeted goals or reference points. If Congress comes up with a bill that is not in line with targeted goals, you may remind them of this. A long-range plan may be used as a reference to some bills. There are no reference points at the moment.

Question: What is your view of future energy choices?

Answer: There are many sources of energy, i.e. solar, space, and nuclear, all of which are too expensive right now. If fossil fuels were priced at their replacement cost we might move more quickly to other sources of energy. As alternative technologies become more efficient, they become more viable. We seem to be continuing a pattern of exploring new technologies to meet our needs.

Question: What do you think of Proposition 13?

Answer: First let me explain what it is: it can be divided into three parts.

(A) It limits property taxes to 1% of the assessed evaluation.

(B) It limits the assessed evaluation increases to 2% of the 1975–76 level.

(C) It prohibits new taxes unless passed by ⅔ majority. It is likely that State surpluses will be distributed to local governments and that service cuts will be largely postponed. Proposition 13 is part of a more general protest against high taxes and big government.

Question: Government perhaps has gotten big. Proposition 13 is a rebellion against big government. There is not enough talk about psychology. People want separation. Their world is too big. We don't talk enough about bigness and its effect on human psychology. How do we adapt to the way we live? People are trying to cope with technology. Now we have come to a base line—how do we come to ourselves and how do we deal with each other? What are the human values one should seek? What is right should be what is felt are the best values and they should be put forth. Morals have been too oppressive in the past. We have come to a point now where we ask "What are the moral values?" Do you detect a deprivation syndrome, like Kahn talked about? Do you detect a need for therapy to commensurate for not thinking as clearly as we could?

Answer: Actually it may be a matter of laziness. It is easy to say "the question is too difficult," or "nothing helps." It is much easier to say this than to tackle a hard problem and hammer out a compromise.

Question: There is an inability of speakers to relate on the day-to-day issues of Congress. Perhaps we could have experts tell us what has been done most recently in different fields. This would give insight in what we don't usually hear about. It would also give us the latest field developments.

Answer: I agree that the next round for the Clearinghouse should be for concrete, nearer term, immediate alternatives.

Question: Perhaps the Congressional Clearinghouse on the Future is good because we get the opportunity to get thoughts on things we don't think about. For next year's program perhaps we could get several historians to comment on America's future in light of the past. The future from the past would be a useful lens.

There has been some good discussion here. Sometimes the poorer speaker, the better the discussion.

Answer: Seminars on medicine, energy, morale issues; we need direction on this. I hope we wouldn't get too far from where the Clearinghouse has been.●

UNEXPECTED PROBLEMS WITH TRUTH IN LENDING

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. BINGHAM. Mr. Speaker, as one of those who had a hand in the passage of the original truth-in-lending legislation in the late 1960's, I am dismayed by some of the unanticipated consequences of that legislation.

I commend to my colleagues and especially to the chairman, members, and staff of the Committee on Banking, Finance and Urban Affairs a disturbing article by Timothy W. Bingham, a partner in the New Haven law firm of Tyler, Cooper, Grant, Bowerman & Keefe and a specialist in the problems of compliance with the truth-in-lending law. The article, which appeared in the July 14 issue of the Commercial Record, Connecticut's Business Weekly, follows:

[From the Commercial Record, July 14, 1978]

It Costs More Than You Know To Know More Than You Want To Know

A. THE THEORY OF CONSUMER CREDIT LAW

The federal Truth-in-Lending Act ("TIL")[1] which became effective in 1969, requires creditors, such as banks, loan companies, credit unions, hospitals and department stores, to disclose certain terms with regard to consumer credit, the most notable being "annual percentage rate," "finance charge," number of payments and type of collateral securing the loan. The expressed theory of TIL is that the disclosure of credit terms fosters a more efficient market for consumer credit. The Act has grown from this concept, initially espoused by the late Senator Paul Douglas and then by Senator William Proxmire, into what is now a morass of highly complex credit disclosure requirements. Even honest, careful and diligent creditors find 100% compliance with these requirements practically impossible. Congress appears to be aware that it has created a bit of a monster, and now is attempting to wrestle with the concept of TIL "simplification." From all indications, there is no agreement on what "simplification" means and many of the so-called simplification proposals would in fact add more complexity.

TIL appears to have spawned other disclosure laws on both the federal and the state levels, dealing variously with closing costs on houses, warranties for consumer goods, car repair estimates, holder in due course notices, flood insurance notices, credit life insurance disclosures and debt collection notices, just to name a few.

As a matter of abstract theory, the concept of consumer disclosure is difficult to fault. Can the requirement of "full disclosure" to consumers who are requesting credit be wrong? Even accepting the premise (which has been proved to me in working with my clients) that most of the terms set forth on TIL disclosure forms are in fact not actually read by consumers, it is still difficult to argue with the precept that disclosure to consumers about their debt obligations should be encouraged. Disclosure may lead to increased consumer awareness and may cause creditors to be more careful. What is distressing, however, is that the cost of their disclosure has now risen so high.

B. COSTS TO SOCIETY OF TIL

The cost to society of TIL is deceptive. No federal or state budgetary items are required in order to enact or enforce the law other than the ongoing budgets of existing federal and state agencies which are charged with enforcing the law. Aside from these rather small direct costs, however, there are many indirect costs which are large and growing.

Creditors incur mounting costs (many of which are ultimately passed on to consumers) in designing, redesigning, studying and restudying forms which they use in the hope that the forms will slip carefully through the numerous legal shoals of the disclosure requirements. (One form that I designed recently, required a knowledge, at a minimum, of four federal statutes, five federal regulations, perhaps twenty official staff interpretations of the Federal Reserve Board, five Connecticut statutes, several Connecticut regulations and numerous court decisions.)

2,183 truth-in-lending lawsuits were filed in United States district courts in the year ending June 30, 1977, with 283 in Connecticut alone during that twelve month period. The great majority of these cases involved "nit-pick" disclosure violations, such as: how to disclose the bank's right to a credit life insurance premium rebate, or whether the "acceleration" rights constitute a "pre-payment penalty," or whether a bank must disclose that an "after-acquired property clause" within a consumer security agreement only applies to goods obtained within ten days after the date of the contract. There is a cost to society of clogging up our court system with so many cases on "nit-pick" questions whose society importance approaches zero. Even the judges and federal magistrates in Connecticut have begun to express dismay in their written opinions at the number of these cases.

Perhaps 2,000 to 8,000 cases were settled out of court in the last twelve months, many of them without even being put into suit, because creditors found it economically wiser to settle than to fight even though they may have attempted to comply with the disclosure requirements.

Repeated form revisions due to changes in statutory interpretation by courts and regulatory agencies mean large printing and legal costs, which are often passed along to consumers.

Education costs grow as creditors and regulators attend training programs designed to help them work through the maze of the legal requirements. (Several federal regulators to whom I talked, privately admit that they cannot begin to master the requirements which they are charged to enforce.)

New credit programs are blocked or hindered because creditors fear disclosure difficulties. For example, some banks in Connecticut have shied away from a state-sponsored student loan program because of the TIL difficulties.

The terms which consumers seem to care about are the annual percentage rate, and the number and amount of the payments, yet, these are not the disclosures, which are creating the inordinate costs that I have discussed above. It is the other, more technical disclosure requirements, almost none of which seem to be of significant concern to consumers, which are leading to these high costs.

C. A STRUCTURAL DEFECT IN TIL

The cause of this unduly high cost, is, in my opinion, a fundamental defect in the TIL statutory scheme which is in the nature of a contradiction. On the one hand, TIL requires 100 percent perfect disclosure with no margin of error allowed—a creditor can make 99 disclosures accurately and make one mistake on the least important disclosure item, and the liability is the same as if all 100 disclosures were incorrect. On the other hand, however, TIL sets forth its disclosure requirements in vague terms, such as "type of security interest" or "clear and meaningful sequence." As one recent 9th Circuit opinion said, "Congress traced very few lines on a new large canvas." St. Germain v. Bank of Hawaii (9th Cir. 1977).

Courts attempting to interpret the vague requirements disagree among themselves on interpretations of the statute and regulations. The issue of whether or not a creditor's right to accelerate upon default constitutes a prepayment penalty, for example, has led to three distinct camps of court opinions, the so-called "never" camp, the "always" camp, and the "sometimes" camp, involving, in the aggregate, over 15 district court opinions and 10 courts of appeals decisions and an indeterminate number of cases settled out of court. To add insult to injury, the issue is still undecided, and one court of appeals court has just changed camps.

These absolute, but vaguely worded, disclosure requirements are applied to the credit process which, unbeknownst to many, is, in fact, a surprisingly complex process. Consider the following facts that affect the credit process: our calendar has varying

---

Footnotes at end of article.

days in different months, rebate calculations on the "Rule of 78's" are still the norm, credit insurance premiums often involve rebates according to schedules which have no formal names, monthly payment calculations and rebates can be mathematically calculated any number of ways, all aspects of a creditor's rights and remedies with regard to collateral are often difficult to describe simply. Considering these facts, it is no wonder that the "nitty-gritty" details of many consumer credit systems are complex and difficult to describe with 100 percent accuracy.

Perhaps an example of the difficulty of drafting would be helpful at this point. TIL requires disclosure of "a description or identification of the type of security interest held or to be retained or acquired by the creditor." Does this require banks to disclose its right to offset deposits upon default? Does it include the right of the bank to receive rebates on unearned credit life or property insurance premiums if the balance is paid before maturity? What is meant by the "type" of security interest? Does the creditor have to identify the statute under which the security interest arises such as the Uniform Commercial Code or the Connecticut Retail Installment Sales Financing Act? If a creditor includes the disclosure of all aspects of the security agreement is the resulting disclosure "clear and meaningful"?

Adding to the confusion is the fact that lawyers are encouraged to bring TIL lawsuits because the law mandates that the creditor shall pay the consumer's legal fees if the consumer can find any error whatsoever, however minuscule and TIL provides for mandatory civil penalties, even where the creditor can prove that the customer did not read the disclosure in question.

D. CONSEQUENCES OF THIS DEFECT

(*1*) *Exposure of Creditors.* One result of this defect in TIL is that credit forms of perhaps a majority of creditors in this country contain probable "nit-pick" TIL violations. With the right of the consumer to assert these violations as an offset in a collection action whenever that action might occur, it is fair to say that (with the exception of contracts written by creditors who have gone to the time and expense of having their forms carefully drafted by specialists in this area) perhaps the majority of consumer credit contracts in the United States could prove to be uncollectible either in whole or in part in a court of law, if at the time of collection the customer is represented by a lawyer knowledgeable in TIL.

There is also the possibility of class actions for violations with the possibility of generous awards as exemplified by a $100,000 award against a bank for sending out monthly statements a few days late. The uncollectibility of debts plus the threat of class actions means that TIL taken to its extreme but logical conclusion could cripple many creditors. This potential exposure is an issue with which knowledgeable accountants for creditors are understandably concerned.

(*2*) *Cost thrust on Consumer.* The advisability of TIL as compared to the cost of such a law could perhaps be tested to some degree by asking loan customers of a creditor whether they would like to have a detailed sheet of credit disclosures or a cash rebate of $.50 to $5.00[2] depending on the type of TIL disclosure involved. I suspect that a majority of consumers would opt for the cash. A great majority of consumers that I or my clients have talked to about TIL seem to derive practically no benefit from the disclosures and in many cases are more confused now than they were before TIL because of the number of forms and the variety of disclosures which they encounter. For example, mortgage loan disclosures now appear on a scroll-like form in fine print on one side of one sheet of paper. Even bankers who have spent a career in mortgage lending have a difficult time following the complexity of these disclosures.

(*3*) *Anticipated and Unanticipated Benefits.* Some good seems to have come from TIL. A recent study, sponsored by the Federal Reserve Board has indicated a growing awareness among consumers of annual percentage rate, which due to TIL, has become a required and widely-used term of art. There has also been a growing standardization of both credit terminology and, inevitably, credit terms. Some of the more glaring abuses, such as misquoting a rate by using an add-on rate rather than an actuarial rate, seem to have been curbed. In addition, responsible creditors have been forced to analyze and reanalyze all of the terms of the credit, thereby "cleaning up their act."

Some consumer groups would argue that an incidental good derived from truth-in-lending has been its "Robin Hood" effect. A consumer in debt, if he gets to a knowledgeable lawyer, can often get out of part of the debt (or even get a civil penalty back from a creditor) by means of finding a TIL "nit-pik" error on any one of the number of forms which the debtor has been lucky enough to have in his or her possession when conferring with the lawyer. In some instances, a consumer can use TIL as a lever to help him or her out of a situation where relief must seem equitable, for example, when goods not under warranty are defective. On the other hand, TIL is often used by consumers who have no apparent cause for complaint and may be in fact continuing to make regular payments and express no dissatisfaction with the creditor.

I recently had a lawyer tell me that he had scrutinized one of the forms I had drafted, had found no error on the form, but still wanted $1,000 for his client because, in effect, he would keep looking until he found an error. Due to the morass of consumer credit statutes, and the confusion of case law and the cost of defending such a legal action, it may be economically rational for a creditor at times to give into this type of legal extortion. My client and I chose not to give in.

This "Robin Hood" benefit, I believe is an unintended use of TIL which creates accidental windfalls depending upon whether a consumer happens to find a lawyer who knows about TIL.

E. REMEDY TO THE DEFECT

The more legitimate benefits which have come from TIL could be accomplished at a smaller cost if the structural defect in TIL were remedied. One remedy which in my opinion would cut down the costs significantly, would be to amend TIL to provide that a creditor is not liable for a "nit-pick" error. This could be accomplished by setting forth in the statute and regulations a provision that only a significant or substantial error likely to mislead a consumer (such as a grossly inaccurate annual percentage rate), would lead to civil penalties or an award of legal fees. This would serve to cut back greatly the number of lawsuits and, if combined with a mortarium on tinkering to TIL, would lead to bringing the hidden costs back down to a reasonable figure. (Repeated technical violations could be dealt with by the regulatory agencies charged with enforcement of the law such as the FDIC for some banks.)

The proposed, federal Truth-in-Lending Simplification Act, recently passed by the Senate (but not likely to pass the House this session), recognizes the existence of this structural defect in TIL. The Senate Committee on Banking noted that many creditors have sincerely tried to comply with the act but due to its increasing complexity and frequent changes, have nonetheless found themselves in violation and subject to litigation. The proposed Simplification Act proposes some important and necessary reforms in order to ease the burdens on creditors and, yet, make required disclosures clearer and more meaningful to consumers. This is especially true in the area of "closed-end" (e.g., one shot loan) credit disclosures.

The problem with the proposed act is that it does not go far enough. While it purports to narrow a creditor's civil liability for statutory penalties to "only those disclosures which are of central importance" in understanding a credit transaction's costs and terms, it leaves the specific disclosures required in open end credit transactions undisturbed. I believe that the only disclosures of "central importance" to consumers in open and closed end cases are the annual percentage rate and the number and amount of payments due. It is to these terms only that Congress must direct the sword of statutory penalties, if it is to accomplish its announced purpose of significantly reducing the scope of creditor liability.

Congress and state legislatures now appear to be on a disclosure "bandwagon." There is talk of legislation involving disclosure of uses of information that is given on credit applications, insurance disclosures, disclosures with regard to electronic funds transfer systems and deposit disclosures.

Before we have any more disclosure laws foisted upon us, I think that the structural defect in TIL, which is the grandfather of these consumer credit laws, should be remedied. I realize that such a suggestion is against my best economic interest as a lawyer, because a large part of my law practice involves understanding the complexities of this "bleak house" of disclosure law. As an officer of the court and a participant in our legal system, however, I believe that TIL, and the growing number of other disclosure laws, need to have this defect remedied before the costs mount any higher.

FOOTNOTES

[1] Connecticut enacted a state Truth-in-Lending Act which, except for some notable exceptions, tracks almost exactly the federal act. Because of the similar laws, Connecticut received an exemption from most of the federal act. Because of the great similarity of the Connecticut and federal statute and regulations, I will refer to them both interchangeably as "TIL."

[2] I have arbitrarily chosen $0.50 to $5.00 as an estimated, approximate range of the added cost per completed disclosure to creditors of TIL which the customers indirectly pay. The actual costs per disclosure would have to be determined by careful studies.●

REPORTS ON CAMBODIA

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker, I place the following materials in the RECORD, which further describe what the situation has been like in Cambodia since April 1975:

INTERVIEW WITH CAMBODIAN REFUGEE IN BURIWRAM, THAILAND, CONDUCTED BY AMERICAN EMBASSY OFFICER IN JUNE, 1978

ACCOUNT OF MAT YUK KLIN*

Mat Yuk Klin 33, from Oddar Meanchey province was a soldier in the GKR army for five years, becoming a sergeant. In April, 1975, he was told to become a farmer. He fled to Thailand on March 18, 1978. His account follows:

*(The refuge agreed to use of his name in a public document.)

CONDITIONS OF LIFE IN DEMOCRATIC KAMPUCHEA

For 800 persons in our village, we received 18 tins of rice per day. This was extremely inadequate. We had only traditional medicines which were worthless.

Although we lived 65 kilometers from the Thai border the border patrol was headquartered in our village. Only a few remained in the village while most patrolled the border The soldiers were very menacing to the people, even though the people worked very hard for them. You were killed for the least fault. I never actually saw anyone killed, but heard about it. The first time you were given a warning the second time you were killed, for small faults."

EXECUTIONS

Three days before I fled to Thaiand, near my own home, 25 families with 60–70 people, were led away and killed. All had been associated with the former government.

In 1975–77 former soldiers and government officials in my village were told not to worry just to work. But starting in November and December 1977, the Khmer Rouge produced lists and began eliminating the former soldiers and government officials.

Eighteen families of 40 persons from the next collective, were on March 14, 1978, taken away and killed. I heard that the same thing was going to happen in my own collective. I fled to Thailand.

Former students and teachers have not yet been singled out for execution in my village.

HUMAN, CIVIL AND POLITICAL RIGHTS

There was no such thing as human rights or a system of justice in my village. There were only two rights in my village—the right to work and the right to be assassinated.

LIFE IN CAMBODIA'S MONGKOL BOREY AREA—EXTRACTS FROM AN AIRGRAM REPORT BY AN OFFICER OF THE AMERICAN EMBASSY AT BANGKOK

SUMMARY

Cambodians are becoming physically weaker as they continue to work non-stop under the forced regime dictated by the Khmer Communists (KC). They are cultivating less land, according to refugees newly arrived from the Mongkol Borey area. Executions are periodic, in small groups of those in targeted categories, involving persons considered to be troublesome.

INTRODUCTION

On October 17 the reporting officer met fifteen Cambodians in Aranyaprathet who had arrived in Thailand the previous day after a five-day walk from their village/cooperative in Battambang province. All but one of the new arrivals were former Khmer Republican Army (FANK) enlisted men, the exception being a school teacher. Located in the Battambang area at the time of the takeover, they were moved southward in the late summer of 1975, where they remained until they fled. The group appeared to be in adequate health, lean, and wearing rather frayed, dark clothing. Their story is illustrative of present-day Cambodia.

VILLAGE SITUATION

The group said that their village of 700 people was composed of peasants, former civil servants, former FANK enlisted men and even some officers, and some persons with technical training. They formed one cooperative. The village was administered by local people, apparently long-time KC villagers. There were no KC soldiers in the village but approximately thirty were based at a camp outside it, out of which they supervised the people's activity and provided security for the area.

Study sessions were organized once a week for adults and twice a week for young children. Those for adults consisted of a harangue to work harder to develop the country. Amidst the haranguing was an occasional poke at the enemy, the U.S. To the amusement of the refugee camp, the group recounted how the KC explained that they had already defeated the U.S. in Cambodia and how, when Cambodia is stronger, they will go on and fight and defeat the U.S. on its own territory, as well. Concerning the young children, the new refugees said that no effort has been made to teach them how to read and write. Instead, the emphasis has been on meaningless political indoctrination.

One member of the group said that the village has been surviving for months on weak rice gruel two times a day which provides little energy. He opined that food was in even shorter supply than it was a year ago and claimed that people were once again dying from starvation in his area.

THE WORK

Like all refugees, the newcomers were tired of the constant work in the rice fields and irrigation dikes and canals. The rice is growing adequately this year, but the group predicted that production would be lower than last year's. Interestingly, they said that their village/cooperative was cultivating in 1976 only fifty percent of the rice fields ultilized in 1975. One said that the KC were not at all happy with this state of affairs, but the people had become so weakened from working long hours, a poor diet over such an extended period of time, and complete lack of medicines (except for ineffective, KC-produced herbal medicines) that they simply become unable to accomplish all work the KC set out for them to do.

It was the consensus of the group that deaths among this population, which has become sluggish, were greater now than in the past. Over and over they said something akin to "People are dropping off like flies". They could only see the situation becoming worse unless the KC change their fundamental approach toward the population, currently treated like animals.

EXECUTIONS

The KC were aware of the backgrounds of the people in the village. It was known who had been a FANK officer or a schoolteacher, etc. It is noteworthy that there were no mass executions or the elimination over a limited period of time of an entire category of people. What has occurred ever since the people were moved into this particular village was that, periodically, some four to five persons have been eliminated at a time. Persons chosen for execution would be those members of a targeted group, such as enlisted men, who were considered most likely to make trouble. The group claimed that the rate of executions, which occurred most recently in August, has remained constant since they arrived in the village.

Executions were carried out by special soldiers or yotia piseh who came presumably from the district or sector level for the purpose. All took place at the same location some three kilometers from the village.●

ELIMINATION OF SEX-BIAS IN THE CIVIL SERVICE LAWS

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mrs. SCHROEDER. Mr. Speaker, I today, have placed in the amendments section of the RECORD an amendment to H.R. 11280, the Civil Service Reform Act, which will remove the bias contained in certain sections of the civil service laws in title 5, United States Code.

The amendment makes only changes which are necessary because the rules for construction of the United States Code contained in title 1, section 1, of the Code do not cover them. That section is as follows:

SECTION 1. Words importing singular number, masculine gender, etc.; extended application. In determining the meaning of any Act or resolution of Congress, words importing the singular number may extend and gender may be applied to females; the words importing the plural number may include the singular; words importing the masculine gender may be applied to females; the words "insane person" and "lunatic" shall include every idiot, non compos, lunatic, and insane person; the word "person" may extend and be applied to partnerships and corporations, and the reference to any officer shall include any person authorized by law to perform the duties of such office, unless the context shows that such words were intended to be used in a more limited sense; and a requirement of an "oath" shall be deemed complied with by making affirmation in judicial form. (R. S. § 1.)

Thus, my amendment makes changes, such as changing the words "husband" or "wife" to "spouse," and "mother" or "father" to "parent," and "widow" or "widower" to "surviving spouse," and "National Guardsman" to "member of the National Guard," which reflect the fact that citizens of both sexes are to be equally treated. I believe that many of these changes either reflect the law as interpreted by the courts or would reflect the law if an appropriate case were brought. In addition, many of the changes are as beneficial to men as to women.

These modifications were suggested in a report of the U.S. Commission on Civil Rights which came out in April 1977, entitled, "Sex Bias in the U.S. Code."

Mr. Speaker, I urge my colleague's support of this reform.●

DISTINGUISHED ATOMIC SCIENTIST SCORES U.S. TIMIDITY ON BREEDER DEVELOPMENT

HON. JOHN W. WYDLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. WYDLER. Mr. Speaker, as you know the debate continues in the Congress on the administration's refusal to commit a nuclear fast breeder demonstration plant. Our Science and Technology Committee position on the Clinch River project was vindicated on the House floor by 45 votes on July 14 and again more decisively by 81 votes in the July 17 session.

I think it is refreshing as this debate continues to explore arguments that surface outside the pro and anticonstituency already identified with this issue in the Congress. Prof. Milton Burton is a most distinguished scientist and native

New Yorker who has devoted most of his professional life to understanding the effects of nuclear radiation on chemical species from the simplest type, that is, hydrogen atoms, to complex living systems.

Dr. Burton, professor emeritus of chemistry, was a member of the ultra secret scientific team which designed the world's first nuclear reactor and ultimately its first atomic bomb. Invited in May 1942 to participate in the Government project at the University of Chicago laboratory, Burton's team studied the problem of whether the proposed nuclear reactor would be able to withstand the radiation it produced. The research gave rise to a new field which Burton dubbed "radiation chemistry." Burton came to Notre Dame in 1945 and was the founder and director of its radiation laboratory from 1946 to 1971. A Guggenheim fellow, he was also awarded a gold medal by the U.S. Atomic Energy Commission for his contributions.

Professor Burton has "no axe to grind" on nuclear power and in fact since the Manhattan project, he has been concerned about radiation effects and ultimately their impact on man rather than simply encouraging nuclear technology development.

Professor Burton has some provocative things to say about the breeder debate in an article which was published in the July issue of Notre Dame Alumni magazine. He was one of the four experts that the magazine consulted on energy matters and I recommend his views to my colleagues:

In Florida, a respectable person is presumed to be an environmentalist, and in the town where I spend the winter, the local newspaper is very much concerned. It is one of my minor joys to discover what is "anti" each day in the city newspaper. Recently, the front page carried a UPI dispatch with a five-column headline: "Nuclear Plant Emits Radiation." It wasn't much of a story. It was weak on facts except for those indicating a high degree of perturbation in the Colorado town involved.

The next day the paper ran a follow-up article. No trace of radioactivity was found in the helium gas which had escaped from the plant. But this report amounted to a three-inch single column of copy buried on page nine. There was no editorial comment. No nothing!

Such news reporting is, in my not-so-humble view, characteristic of a small group which seems to think it has proprietary rights to morality. It is also an indication that where the weather is always warm, one can fail to appreciate the almost overwhelming energy problem which confronts us.

What are the facts? Man is running out of fuel. Wood and other vegetation are limited and clearly exhaustible. The last days of gas and oil are hard upon us, as is the next glacial age, and there is a supply of coal which may be good for another hundred years or so. There are other power sources, including wind, geothermal and solar power. But their total amount threatens to be inadequate in a world where thirst for useful energy increases more rapidly than population. Fortunately, nuclear power has become available just as the energy crisis begins.

The energy crisis is not alleviated, indeed is made more intense, by that group of presumably well-intentioned people who raise the warning cry: "Let us be cautious. Delay may be costly, but think of the possibility of accident!"

What in the name of all reason do environmentalists imagine nuclear scientists have been thinking about since 1942? If ever in world history there has been a technology developed in an atmosphere of informed and intelligent caution, this is it! If ever high moral sense has pervaded a development (i.e., the nuclear bomb) and has made sin ghastly apparent, this is it! If ever the young people involved in a development have been adequately concerned and informed, this is the time! Where would nuclear scientists propose to live and work if they were not cautious?

This is not the place to prove my points. I make them flatly (note the stance of disastrously uninformed environmentalists) because the facts, the theory, the evidence, the experience are just too vast to be covered in a short review and because all the information at hand indicates that the nuclear technology so far developed is the safest technology developed in the history of the world. And it is going to become better! And, strangely enough, it is only a standby.

Our energy supply problems are here today. We had better get together, examine and understand them, and solve them as they develop. Let's clear up a few points about nuclear power.

We live and work in a universal radiation field, a constant shower of neutrons. Each day our bodies experience and accumulate the insult of newly synthesized radioactive atoms and strangely altered molecules which, for all we know, may be the cause of aging and of our ultimate deaths. Operation of a nuclear reactor does not spread radioactivity. In dramatic contrast, however, the effluent smoke from a coal-powered plant does because of radioactive elements in the coal.

Another point: It is physically impossible for a nuclear reactor to explode like an atomic bomb. In any steampowered plant, a boiler explosion can occur, and because the nuclear reactions' heat is used to make steam to drive the electricity-producing turbines, a boiler explosion in a nuclear power plant is possible. But that kind of explosion does not scatter radioactivity. A nuclear reactor is not like a bomb at all. A bomb can be started, but not stopped. In contrast, a nuclear reactor is a controlled and heavily shielded device. If the reactor were to malfunction, the entire system would be automatically shut down by neutron-absorbing rods or liquids depending upon the design of the plant.

Accidents should not be kept secret, nor should they be misread. In developmental facilities, experts test aspects of design that might be incorporated in future power plants. And because these engineers and scientists are not working with real thing—an operating power plant—but with stimulated conditions, they accept a greater risk. There are essential safeguards, but they are not the elaborate ones built into a functioning plant, and there is more human manipulation of the processes. In such developmental facilities, a few employee fatalities have occurred, tragic indeed but certainly not an uncommon experience in industry generally. No one, however, has died in an operating nuclear power plant. The process is highly automatic, and it is fail-safe; safety controls resist the human element.

Consider, for example, the highly publized construction of the Enrico Fermi No. 2 plant near Detroit. An engineer made an unapproved, clearly unauthorized, and seemingly minor change in detail during construction. He made no record of that change. When inevitable trouble occurred, the plant shut down. The investors ultimately tore it apart and the problem was discovered at considerable hazard, but there was no disaster, although the expense has been great.

There are several kinds of nuclear power plants. In this country, all operating plants are slow breeders. Uranium 235 atoms split, giving energy, neutrons, and radioactive elements which, for the operation of a nuclear reactor, are useless and pose radioactive waste problems. One of these elements, plutonium 239, is a potential nuclear fuel, but the slow breeder does not produce enough of it effectively to replace the U–235 consumed. Another kind of reactor, the fast breeder, produces enough plutonium to refuel itself or to be employed in other power plants.

Ultimately, fast breeders will replace slow breeders in this country as notions of economy suggest they should. They were the original concept of a nuclear power plant as envisaged by Leo Szilard, Enrico Fermi, and other World War II scientists. France and the USSR are building fast breeders but in the United States, construction is stalled. The fast breeder proposed and authorized for the Clinch River site in Tennessee is held up by a group who fear it, perhaps largely on the basis of the Fermi No. 2 experience[1] . . .

It is the national policy of the U.S. to discourage construction of fast breeders in the "developing" countries. We assist them with the construction of slow breeders and remove and replace the spent fuel from those reactors. The logic of such policy is: if we can prevent or delay construction of fast breeder reactors in such countries, we can prevent or cut back the production of nuclear bombs. Enforcement will be difficult. Restraint may be impossible. Any small nation with delusions of grandeur wants its own atomic bomb, which it hopefully can make from plutonium 239 recovered from its own operating nuclear reactor whether it be a slow or fast breeder, provided some other nation like ours provides replacement fuel.

Let us turn to matters of a remoter future. Lighter atoms—like hydrogen and deuterium recovered from water, lithium from certain salt deposits, and boron from borax mined in the desert—can in principle be made to fuse, to build larger atoms and to release energy without producing radioactive wastes or potentially lethal radiation. Fusion power plants built on such a principle are an immediate goal of nuclear physicists. The principle is clearly understood. The technique eludes the nuclear scientist at the present moment (use of a laser beam in some not-too-well-defined process is frequently invoked in this connection) but it can be expected that ultimately success will be achieved. Then, on this earth, we will have a source of power free of radioactive hazard. Then even environmentalists can relax and proclaim, "See, we told you it could be done, if we were only insistent and patient."

One thing about nuclear power is certain. We will make no progress at all if we bow to the views of people who would impose unreasoning fear on the aspirations of the most brilliant of their fellow men. Neither can we accept the dangerous view that progress must not be attempted by the brilliant because the less gifted cannot understand. Nor may progress be delayed interminably by the frightened and the ultracautious. Such delay is much too dangerous. It may really lead to a world energy disaster.●

STATEMENT OF DSG CHAIRMAN MIKVA REGARDING THE CHAMBER OF COMMERCE POSITION ON KEMP-ROTH

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. MIKVA. Mr. Speaker, in a memo to all Members today, the U.S. Chamber of Commerce suggests that the Democratic Study Group erred in listing the

[1] Fermi No. 2 was an experimental breeder reactor operated in Idaho and significant problems were encountered with it. (Mr. Wydler's footnote.)

chamber as opposed to the Kemp-Roth tax cut proposal.

The facts, however, suggest that the chamber has changed its position—which they have every right to do—not that DSG erred.

DSG's statement that the chamber opposed Kemp-Roth was based on the testimony of Dr. Jack Carlson, vice president and chief economist of the chamber, before the Senate Finance Committee on July 14, 1979. In his testimony, which the chamber subsequently distributed to Members, Dr. Carlson set forth the chamber's position as follows:

Unless limitations are placed on growth of federal spending, the National Chamber does not support the Roth-Kemp bill.

The National Chamber supports an across-the-board tax relief of the size proposed by the Roth-Kemp bill, only if: (1) Federal spending increases no faster than the rate of inflation during the next 3 years (7 percent); and (2) One-third of the tax relief is targeted to stimulate job-creating and capacity-expanding investment . . .

Roth-Kemp tax relief alone is inflationary and unwise policy at this time. Only a recession or prolonged slow growth in the economy could justify such a large stimulus to the economy.

Now the chamber says it is supporting Kemp-Roth because of "a more responsible 7 percent limitation on the growth of Federal spending in the second concurrent budget resolution."

Their position is not, however, consistent with the facts. Based on chamber of commerce figures, fiscal year 1979 outlays under the second budget resolution would be 9 percent, not 7 percent, greater than fiscal year 1978. Also, the chamber said it could support Kemp-Roth only if there was a limit on Federal spending for the next 3 years. Yet even if the budget resolution provided for a spending increase at the limit supported by the chamber, which it does not, it would be for next year only, not the next 3 years.

I am taking the liberty of inserting into the RECORD Dr. Carlson's testimony on the Kemp-Roth bill. It is one of the best analyses of this ill-considered proposal that I have seen.

STATEMENT OF THE CHAMBER OF COMMERCE OF THE UNITED STATES

(By Dr. Jack Carlson)

I am Jack Carlson, Vice President and Chief Economist for the Chamber of Commerce of the United States and I am accompanied by Tax Attorney, Christine Vaughn, Acting Director of the National Chamber Tax Policy Center. We welcome this opportunity on behalf of the National Chamber's 75,000 members to comment on the Roth-Kemp Tax Reduction bill.

POSITION

The National Chamber commends this Committee for considering a significant across-the-board tax relief, the Roth-Kemp Tax Reduction bill (S. 1860). But this bill represents only one-half of an acceptable national policy. The other half must consist of limitations on the growth of federal spending. Unless limitations are placed on the growth of federal spending, the National Chamber does not support the Roth-Kemp bill.

Currently the President and the Congress propose to accelerate federal spending, from the $38 billion increase in spending recommended by the President in January to the President's latest estimate of $44 billion and the Congress' First Concurrent Budget Resolution total of $46 billion.

The Administration and the Congress propose to accelerate taxes from the $39 billion for FY 1979, proposed by the President in January, to the $47 billion recently proposed by the President and also contained in the Congress' First Budget Resolution, by delaying the enactment of and reducing the size of the tax cut. The $47 billion increase in taxes is equivalent to $800 additional taxes for the average American family. The tax increase from January to June is equivalent to $135 for the average family.

Clearly, the Administration and the Congress have not heard or do not believe the message from the California experience with Proposition 13 and the efforts underway in over 30 other States to limit the growth of both taxes and spending.

CHAMBER RECOMMENDATION

Specifically, the National Chamber supports an across-the-board tax relief of the size proposed by the Roth-Kemp bill, only if:

(1) Federal spending increases no faster than the rate of inflation during the next 3 years (7%); and

(2) One-third of the tax relief is targeted to stimulate job-creating and capacity-expanding investment. Such tax relief for investment should include capital gains tax relief (e.g. Steiger bill), investment tax credit extended to structures (expansion of Administration's proposal), liberalized depreciation, and an increase in the corporate surtax exemption for small businesses.

So amended, a Roth-Kept Tax Relief, Investment Stimulus, and Spending Limitation bill should be made part of the Second Concurrent Budget Resolution by September 15, 1978. If this measure is enacted, the following can be expected after three years:

Modest consumer price increase (less than 1 percent);

1 million additional jobs;

Unemployment down by 13 percent;

Investment up by $13 billion;

After tax family income up by $1,055;

The federal deficit roughly unchanged;

Individual choice and personal freedom improve by reducing the total government tax burden on the average American family from 40 percent to 37 percent of personal income, the first significant reversal of trend in decades.

TAX RELIEF WITHOUT SPENDING LIMITATION

The size of the Roth-Kemp tax relief is equivalent in relative size to California's Proposition 13 and larger than previous federal tax relief.

Even though total taxes continue to increase, the Roth-Kemp bill would provide large initial tax relief.

INITIAL ROTH-KEMP FISCAL RESULTS

[Billions of current dollars under static conditions]

	1979	1980	1981
Federal taxes	434	466	498
Federal spending	512	560	620
Federal deficit	−78	−94	−122
State and local taxes	354	389	427
State and local spending	327	362	401
State and local deficit	27	27	26
Total, government deficit	−51	−67	−96

However, the initial tax relief would result in the recipients increasing consumer spending which in turn provides jobs for those who produce the new consumer products. The new jobs add to people's wages and salaries which are in turn taxed.

FINAL ROTH-KEMP FISCAL RESULTS

[Billions of current dollars under dynamic conditions]

	1979	1980	1981
Federal taxes	440	482	528
Federal spending	512	562	628
Federal deficit	−72	−80	−100
State and local taxes	357	397	442
State and local spending	328	365	409
State and local deficit	29	32	33
Total, Government deficit	−43	−48	−67

The increase in the deficit will overload the existing plant and equipment capacity and cause higher costs which will be passed along in higher prices.

MANUFACTURING CAPACITY

[In percent]

	1979	1980	1981
Full utilization (highest at peak of last business cycle)	88	88	88
Roth-Kemp	86	89	92

The unemployment rate will decline and cause a shortage of skilled laborers which will result in bidding up wages.

UNEMPLOYMENT RATES

	1979	1980	1981
Roth-Kemp	5.6	4.5	3.5
Full employment	4.9–5.5	4.9–5.5	4.9–5.5

The only way to overcome this inflationary result from Roth-Kemp is to expand capacity. Unfortunately the time delays are long in key industries, such as 5 years for a coal-fired or 10 years for a nuclear-fired electric power-plant for additional electricity. Also, during peacetime, savings and investment have never grown as rapidly as would be required to obtain the needed capacity without inflation.

The only way to overcome labor shortages is to lengthen the workweek, reduce holidays, retire later and enter upon a working career sooner. However, the trend during the last century has been to reduce the workweek, work year, and retire earlier and enter upon a working career later in life. Since 1900, as workers' incomes increased, workers chose more leisure time for one-fourth of their increased output and chose more income for three-fourths of their productivity. There is no reason to believe currently working people will reverse this century-old trend.

However, new workers, particularly women entering into employment outside of their homes more frequently, are more than offsetting the decline in work hours elsewhere.

Nonetheless, it is unlikely that this source of labor hours would expand fast enough nor match the skills required in the economy to keep wage inflation from occurring from enactment of Roth-Kemp tax relief.

Therefore, Roth-Kemp tax relief alone is inflationary and unwise policy at this time. Only a recession or prolonged slow growth in the economy could justify such a large stimulus to the economy.

TAX RELIEF WITH SPENDING LIMITATION

Roth-Kemp must be tied to a modest limitation on the growth of federal spending to prevent accelerating inflation.

The National Chamber is committed to the objective of slowing down the growth of both taxes and spending to less than the growth in people's income. This requires a

limitation on the recent growth of federal spending.

Roth-Kemp tax relief requires spending growing no faster than about 7% for each of the next 3 years. Even this modest limitation allows federal spending to increase by $35 billion or equivalent to a $585 increase in taxes for each American family. Moreover, this spending limitation is only $3 billion below President Carter's budget recommendation submitted to the Congress last January and only $9 billion below the Administration's current estimate for FY 1979. It exceeds the current services budget and thus allows for flexible priority setting. Such a modest limitation should be relatively easy to obtain, if there is a will.

FINAL ROTH-KEMP TAX RELIEF AND SPENDING LIMITATION FISCAL RESULTS

[Billions of current dollars under dynamic conditions]

	1979	1980	1981	1982
Federal tax	435	474	525	575
Federal spending	497	531	571	613
Federal deficit	−62	−57	−46	−38

If spending increases at a faster pace, tax relief must be sacrificed dollar for dollar. If the $10 billion of accelerated spending contained in the First Budget Resolution remains, then the average American family will have to sacrifice and suffer a tax increase of $165.

GREATER TAX RELIEF FOR JOB-CREATING INVESTMENT

Any tax relief should encourage investment. While jobs have increased dramatically during the last few years, modern tools and equipment have not expanded and consequently productivity has declined and real wages have declined.

GROWTH IN INVESTMENT IN PLANT AND EQUIPMENT PRODUCTIVITY AND REAL WAGES

[In percent]

	Investment growth after adjusting for inflation	Capital per labor hour	Productivity growth	Real wages[1]
1948 to 1966	3.4	3.1	3.3	2.7
1966 to 1973	3.0	2.8	2.1	1.0
1973 to 1978 1st quarter	−.2	1.7	1.3	−1.0

[1] Average weekly earnings in nonagricultural industries.

Source: Economic Report of the President, January 1978, p. 2990

The Roth-Kemp bill only indirectly helps to overcome this serious economic problem. Only about one-tenth of tax relief is earmarked for corporations, who account for more than two-thirds of American business output.

PROPORTION OF TAX RELIEF FOR INDIVIDUALS AND CORPORATIONS

[In percent]

	1979	1980	1981
Individuals	86	90	91
Corporations	14	10	9
Total	100	100	100

CHAMBER RECOMMENDATIONS TO STIMULATE INVESTMENT

The Chamber recommends that tax relief for encouraging investment should be increased to one-third, and should include:

(1) Capital gains tax relief (e.g. Hansen-Steiger bill);

(2) Investment tax credit permanently increased to 12% and extended to structures;

(3) Reduction in the corporate tax rate;

(4) Increase in the corporate surtax exemption to $200,000 with a 15% normal tax on the first $50,000 and 22% on the next $150,000;

(5) Liberalized depreciation as a first step from 20% ADR to 40% ADR; and

(6) Steps to eliminate the double taxation of corporate income.

ECONOMIC IMPACT OF ROTH-KEMP TAX RELIEF AND SPENDING LIMITATION BILL

The combination of tax relief for both consumption and investment and modest spending limitation will provide generally favorable economic conditions.

ECONOMIC IMPACT OF ROTH-KEMP TAX RELIEF AMENDED TO ENCOURAGE INVESTMENT AND GROWTH WITH SPENDING LIMITATION (7 PERCENT)

[Change in levels]

	1979	1980	1981	1982
Gross national product (billions of 1978 dollars)	7	23	44	33
Consumption (billions of 1978 dollars)	9	21	36	34
Business fixed investment (billions of 1978 dollars)	2	7	14	17
After tax family income (1978 dollars)	288	670	1,055	879
Employment (millions)	0.1	0.5	1.0	1.0
Unemployment rate (percent level)	6.0	5.6	5.2	5.1
Consumer Price Index (percent level)	0	0.1	0.4	0.9
Capacity utilization (percent level)	84	87	89	86
Federal deficit (billions of dollars—NIA)	−9	−17	−16	1.0

The favorable economic consequences of tax relief for consumption and investment and spending limitation will benefit all 50 States.

ECONOMIC IMPACT OF ROTH-KEMP TAX RELIEF FOR BOTH CONSUMPTION AND INVESTMENT AND MODEST SPENDING LIMITATION

[1981 change in levels]

	New jobs	Aftertax family income (1978 dollars per family)	Personal tax relief (1978 dollars per family)	New investment (millions 1978 dollars)
United States	981,822	1,055	−892	13,502
Alabama	15,060	815	−689	324
Alaska	1,702	1,744	−1,475	20

SOVIET STRATEGY IN THE MIDDLE EAST

HON. MICKEY EDWARDS

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. EDWARDS of Oklahoma. Mr. Speaker, Dr. Miles Costick, president of the Institute on Strategic Trade and a frequent congressional consultant on foreign affairs recently presented a thoughtful and disturbing analysis of the pressures behind the Soviet Union's Middle Eastern strategies.

Dr. Costick believes that those who ignore the impact of the global environment on the Soviet economy cannot possibly appreciate the motivations of Soviet strategic behavior. Dr. Costick contends, for example, that with the U.S.S.R. presently outspending the United States on military programs by approximately 50 percent, the Soviet economy is under great strain. He contends that Soviet petroleum production is about to peak out and that the U.S.S.R. will become a net importer of both oil and gas by 1980.

Dr. Costick believes the consequences of this projected Soviet dependence on outside oil are clear. The Soviet leadership has made this impending shortage a prime concern in its strategic planning and has decided to meet the problem by consolidating Russian control over Middle Eastern sources of energy. Dr. Costick cites the recent pro-Soviet coup in Afghanistan and the aborted coup in Iraq as two proofs of this newly adopted aggressive strategy. Afghanistan has been providing the Soviets with natural gas and Iraq has been a supplies of petroleum.

Dr. Costick also notes that this heightened Soviet activity in the Middle East is occurring at precisely the moment the U.S. Navy is undergoing a serious reduction in size. He warns that our continued failure to react to this new threat could have disastrous consequences.

I strongly recommend Dr. Costick's article, which appeared in the June issue of Defense and Foreign Affairs Digest and reprint it here for my colleagues:

Failure to realistically evaluate the *global* environment represents a serious danger in the strategic thinking of any country. Thus, a failure to perceive the factors shaping the change of one of the two superpowers—in this instance the USSR—could have dramatic consequences.

The factors shaping the dynamics of the Soviet Union have a great deal to do with the Middle East, which is as pivotal to Soviet as it is to Western and Japanese policy.

Consider the following points:

According to intelligence estimates, the USSR outspends the United States on military programs by some 40 to 50 percent. At the same time, the Soviet GNP is less than half that of the United States. It must be deduced that military power is at the top of the Soviet Politburo's priority list, and it must also reflect on the Soviet attitude toward the U.S., its chief rival.

The tremendous Soviet resource commitment to worldwide political, strategic and economic objectives raises the central question: is the Soviet economy strained by the current level of military and other expenditures related to their objectives? And can the current rate be continued?

What counts as a strain in an economy is dependent upon the perceptions and objectives of those who decide *how* the economy is to be managed. In the USSR that decision process comes from the Politburo. To decide what is a "strain", one must ask what is the principal task of the Soviet economy.

The main task of that economy is to provide support for Soviet global objectives; to support all forms of protracted conflict, on various levels, against non-communist societies.

In this case, "strain" on the Soviet economy could continue unless there is a serious breakdown in the economic equation.

The "breakdown" in the Soviet economic equation is the growing evidence of an impending energy shortage, and the realization of this coming danger by the Soviet leadership. It is a crisis which the USSR cannot afford.

Soviet petroleum production is about to peak out and, at the same time, the demand for oil and gas is increasing at a rapid rate. Petroleum is essential to sustain Soviet economic growth, to maintain a close affiliation with its satellites in Eastern Europe, to obtain hard currency needed to acquire Western technology (which is the mainstay of its military growth in strategic systems), and to directly sustain military and strategic industrialization.

The earlier instance of dramatic outline of the coming of the Soviet energy crisis appeared in the October/November 1974 edition of Technology Review. Marianna Slocum, in her article, "Soviet Energy: An Internal Assessment", documents beyond any doubt that the coming of the Soviet energy crisis is imminent.

A leading West German authority on energy, Professor Werner Gumpel, only two years earlier in a not widely noticed study, presented the conclusion that the Soviet Union will find itself a net importer of both oil and gas by 1980.

Soviet economist, L. Zevin, in his study published in Moscow, predicted the Soviets would need to import 60- to 90-million tons of oil and 40- to 50-billion cubic meters of gas annually from the Middle East by 1985.

My study, "The Economics of Détente," published in February 1976 and based on independent research and analyses of Soviet energy prospects, presented the evidence that the time was rapidly approaching when the USSR would become a net importer of energy.

In a complete break with earlier studies, the Central Intelligence Agency projected last year that the Soviet bloc would become increasingly dependent on imported oil after the early 1980s.

Previously, the scant information available from Soviet and Western intelligence sources had indicated that the Soviet Union had met the targets of its five-year plans. During the 1950s and 1960s, oil production increased rapidly at average annual growth rates of 12 percent. It was not until the 1971–75 five-year plan that oil production growth rates were only half as high as during the preceding two decades and that only the lower end of the production targets were met.

While oil production in the USSR is still increasing, the growth rates have slowed down even further, and the CIA maintains that Soviet oil production will peak not later than 1980 at between 11- and 12-million barrels per day. As demand for oil continues to grow to support economic growth targets of the bloc, the 1977 CIA report suggested that the Soviet bloc might have to import between 3.5- and 4.5-million b/d.

The principal reason for the pessimistic CIA analysis of Soviet oil production is the significant decline in Soviet oil production in the older European fields, and the failure to find sufficient new oilfields in Siberia to make up for the projected production fall in the European part of the USSR. There are often technical, economic and social problems which contribute to the projected Soviet failure to meet its oil demands in the future.

Soviet exploration and production technology is far behind Western oil development practices, slowing down both the exploration and development program.

Investment decisions may have been made too late to allocate needed resources away from other industries to the oil industry. Shortfalls of drilling, transportation and other equipment; low productivity of personnel and personnel shortages in Siberia; application of techniques which damage long-term oil recovery; endless delay in construction, and other problems, have compounded the failure to find large new fields.

While some Soviet energy analysts have suggested that the Soviets can force conservation and speed-up interfuel substitution, the rate of decline in production from the European oilfields is not likely to be made up by energy savings and interfuel substitution during the next five to 10 years.

The consequences of the pending Soviet energy crisis are very serious to the USSR and to the Western world. The Soviet Union now depends on energy exports for more than 30 percent of its export earnings. While natural gas exports are likely to continue to increase in the future, the projected failure to meet the Soviet bloc's oil demand will result in reduced import earnings.

If, as the CIA projected in its 1977 study on Soviet energy prospects, the Soviet bloc would have to import between 3.5- and 4.5-million b/d of oil by the mid-1980s, the constraints on the balance of payments of the Comecon nations will become unbearable. Recognizing that, the bloc cannot possibly finance oil imports in 1985 to 2.5-million barrels per day.

The Agency did not change its Soviet energy production outlook, but suggested that balance of payments constraints would reduce imports to this lower level. At the same time, reduced domestic production of energy in the Soviet bloc will contribute to lower energy growth rates for the bloc as a whole.

The consequences of the projected Soviet dependence on outside oil are clear. Most recent energy forecasts by government and industrial organizations show a growing tightness of oil supply in the non-Communist world during the 1980s. More than 60 percent of Western oil demands of the 1980s will have to come from OPEC countries; most of it from the Middle East and North Africa. Even without the Soviet bloc entering the world oil market, tightening of supply is likely to raise prices in the 1980s. Soviet bloc imports of 2.5-million b/d would accelerate the size trend timing of the projected price increases.

Reduced economic growth rates are likely to cause internal problems in the Soviet bloc. In order to increase labor productivity, the Soviets have to improve the consumer sector of the economy, but global strategic considerations will make it difficult to reallocate resources away from the heavy industry to the consumer sector. Serious divisions between *Archnocrats* favoring growth in the consumer sector and the military could result.

Even with reduced economic growth rates, the Soviet bloc would have to import 2.5-million b/d of oil by the mid-1980s. Balance of payments problems, already critical at a time of major energy exports, are likely to grow with the increase. OPEC nations, on the other hand, will have the option to sell (in a tight supply market) their oil for hard currency in the West or settle for increased barter trade with the Soviet bloc.

Growing dependence on OPEC, and in particular Middle Eastern oil, will result in growing Soviet interests in the Middle East at a time when the U.S. Navy is undergoing a serious reduction in size.

If Mackinder lived today, he might have rephrased his famous dictum that those who control the rimlands will control the heartland into: "Those who control the Middle East will control Western Europe and Japan, and those who control Europe and Japan will control the world."

I am convinced that the CIA is correct in its unique analysis of the Soviet energy crisis (an analysis now supported by the Shell Oil Company, the only major oil company which had conducted intensive research in this area) and that energy shortcomings will have major ramifications in Soviet foreign policy, particularly with respect to Soviet policy toward the Middle East.

In the past the Kremlin has lent considerable support to some Arab states, vociferously supporting the 1973 embargo and supplying several states with advanced armaments. The rationale for this activity has generally been explained in the West in terms of perceived requirements for the Kremlin to support "National Liberation Movements," to secure naval and air facilities, or to have the potential to harass Western shipping in times of crisis.

This argument ignores the policy of the U.S.S.R. to be in a position to interdict oil supply lines in wartime, to secure its own access to petroleum supplies, and more importantly, to effect a change in the governments of the energy rich countries of the Middle East.

Specifically, the Kremlin views these countries as vulnerable to internal subversion by local Communist Parties (as was the case in the recent attempt by the Soviets via the local Communist Party to overthrow the Ba'athist Government of Iraq) and to insurgencies by Marxist revolutionaries, national front, or Marxist-controlled guerrilla movements. Should a seizure of power occur, or be attempted, Moscow will be in a position to back the insurgents, project influence over the new régime, and thereby secure access to the energy.

Two recent events are quite instructive in this respect. The first was the successful communist overthrow of the Government in Afghanistan, and the second, the thwarted attempt by the pro-Soviet Communist Party of Iraq to overthrow the Government of President Ahmed Hassan al-Bakr.

Both governments—Iraq's and the former Government of Afghanistan—were not considered unfriendly to the U.S.S.R. and in a geopolitical sense were described by some analysts as being marginally in the Soviet orbit. In spite of this, and in spite of the fact that Afghanistan had been providing the U.S.S.R.'s economy with badly needed natural gas, and that Iraq was a dependable petroleum supplier to the Soviet Union and its satellites in Eastern Europe, the Soviets must have decided the time had come for the removal of the Moslem Government of Afghanistan and the Ba'athist Government of Iraq.

The dramatic nature of the Soviet actions, particularly against Iraq, help confirm the fact that the Soviet leadership perceives there to be an impending energy shortage within the U.S.S.R., and that the shortage can only be met by consolidating its control over Middle Eastern sources of energy.

Debate in the United States has raged over the actualities of an impending Soviet oil shortfall; however, what cannot be overlooked is the belief by the Soviet leadership that an energy crunch is coming. *(See also:* "The Fact and Future of the Middle East," in this edition—*ed.*)

Among the principal targets of Soviet adventures in the Middle East are the two richest oil kingdoms: Saudi Arabia and Iran. They are the two great powers of the Persian Gulf, and two of its greatest oil exporters. Two-thirds of the oil reserves available to the non-Communist industrial world are in the Persian Gulf region. Production runs to 22-million barrels a day, a major part of the total OPEC output. The Gulf states' productivity matches NATO's and Japan's needs: the United States imported more than 45 percent of the total oil it used last year.

1. The USSR faces a severe energy shortage which will affect the country's ability to acquire advanced Western technology and foodstuffs, and therefore hamper its military-strategic growth;

2. The USSR seeks to acquire greater control over the major oil-producing states around the Persian Gulf, although not necessarily by direct military intervention, but rather by internal subversion;

3. Soviet control of Persian Gulf oil would have a dramatic impact not only on its own (ie: Soviet) strategic growth and stability, but would severely curtail Western and Japanese access to energy thereby further widening the Soviet advantage in obtaining the oil;

4. Soviet hegemony in the Persian Gulf and Arabian Peninsula region would enhance Soviet access to Africa and other strategic resources. as well as helping secure littoral control for the Cape of Good Hope sea route, which is vital to Soviet European and Soviet Far Eastern trade.●

FEDERAL LABOR-MANAGEMENT RELATIONS

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. CLAY. Mr. Speaker, the House will soon consider H.R. 11280, the President's civil service reform bill.

Title VII of H.R. 11280 establishes a statutory labor-management relations program for Federal employees. It provides for the right to collective bargaining for Federal employees, an independent Federal Labor Relations Authority (FLRA), the resolution of disputes by the intervention of neutral, independent, third parties, and judicial review and enforcement of the decisions and orders of the FLRA.

During full committee markup on H.R. 11280, the committee overwhelmingly rejected proposals, sponsored by the administration. The reason for this was that the administration's proposals would have merely preserved the status quo in labor-management relations. The administration sought only to codify the Executive order under which the existing labor-management program has operated. The committee did not believe that these proposals went far enough—they would only serve to continue a program which is management-oriented, narrow in its scope, and ineffective in meeting the needs of agency managers and employees alike.

In summary, title VII as approved by the committee establishes and provides for the following:

It is in the public interest for federal employees to bargain collectively, to organize a labor organization, and to participate in its management.

A presidentially-appointed three-member Federal Labor Relations Authority (FLRA) with responsibility for administering the law, and for the appointment of a General Counsel within the FLRA whose responsibilities include investigation of allegations of unfair labor practices.

A labor organization may secure exclusive representation by a majority vote of those voting within an appropriate bargaining unit and for voluntary dues withholding at no cost to the union upon election of an exclusive representative.

The scope of bargaining includes, consistent with Federal law, matters which are subject to Government-wide rules or regulations unless the FLRA determines otherwise on the basis of a "compelling need" for uniformity of such rules or regulations. A management rights clause retains certain managerial prerogatives for the Government.

The negotiation of grievance procedures (except retirement, life and health insurance and political rights), with the employee entitled to representation, binding arbitration and judicial review. An employee may choose between the negotiated or the statutory appeals procedure.

The resolution of impasses through the intervention of neutral, independent third parties—Federal Services Impasses Panel, binding arbitration, and the Federal Mediation and Conciliation Service.

Judicial review and enforcement of final decisions and orders of the FLRA involving unfair labor practices, awards by an arbitrator, or appropriate unit determinations.

Official time for contract negotiations.

The prevention and resolution of unfair labor practices and standards of conduct for labor and management.

In approving title VII of H.R. 11280, the committee adopted an evolutionary, balanced approach to the improvement of the Federal labor-management relations program. When the National Labor Relations Act was enacted in 1935, Federal employees were excluded from its coverage. In 1962 however, the late President John F. Kennedy, in recognition of the growing need, established a formal labor relations program for the Federal work force. That program was refined by President Nixon's Executive Order 11491 which, as amended, has been the foundation of the Federal labor-management relations program.

Executive Order 11491 was a milestone in its time. Today almost 60 percent or 1.2 million of all Federal employees are represented by 86 different employee organizations in over 3,500 bargaining units.

The committee believes that the growth of the Federal work force and changes in our time dictate that labor-management relations in the Federal sector must become more in step with the 1970's—recognizing that there are nevertheless differences between the public and the private sector.

During 1977, the Subcommittee on Civil Service, which I am privileged to chair, conducted exhaustive public hearings on labor-management relations—receiving testimony from over 40 witnesses in the course of 5 days of public hearings. Testimony was overwhelmingly in support of the thrust of the committee's legislation because the existing program was susceptible to the whims of an incumbent President, limited in its scope, management-oriented, and lacking in the opportunity for judicial review of decisions of the Federal Labor Relations Council.

Although the administration belatedly came forth with a statutory labor-management proposal, their program would have done little more than codify the Executive order. The committee's efforts to reconcile some of the differences between its position and the viewpoint of the administration were exhaustive but—notwithstanding long and involved efforts—the administration's concessions to the committee were so insignificant as to render them virtually meaningless.

Title VII, as approved by the committee, is based upon H.R. 9094, for which public hearings were held on September 15, 1977 (Serial No. 95–31). Earlier, public hearings were held on related labor-management legislation on April 21, 1977 and May 3, 5, 10, 1977 (Serial No. 95–30).

A committee print of title VII was used for markup purposes. That print was similar to H.R. 9094 except that it first, did not grant agency shop automatically upon election of an exclusive representative; a second election was required for

agency shop; second, contained no provision for an "alternative labor organization;" third, a management rights clause was added; and fourth, there was no provision for the negotiation of pay and other major money related fringe benefits.

The administration's labor-management proposal was similar to Executive Order No. 11491, under which the existing labor-management relations program is operated, with two exceptions: First, it established an independent full-time Federal Labor Relations Authority as the successor to the Federal Labor Relations Council; and second, it permitted agencies and unions to negotiate most grievance and arbitration matters which may now be appealed only under statutory procedures.

Title VII, as approved by the committee, represents a balanced, impartial approach to resolving the principle differences between two points of view—the print which, in some respects, would adopt in the Federal sector many practices which are prevalent in the private sector and the administration proposal which, for all practical purposes, would simply codify Executive Order No. 11491 with its confused, management-oriented, duplicative, antiquated approach to labor-management relations.

I urge my colleagues to support the committee version and reject any weakening amendments which may be offered during the House's consideration of title VII of the bill.●

CURRENT PROFITABILITY EASES AIRLINE NEED FOR EQUIPMENT FINANCING

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. GEPHARDT. Mr. Speaker, the Noisy Aircraft Revenue and Credit Act, H.R. 11986, may soon reach the floor of the House of Representatives. The main issue surrounding this legislation is whether or not the airlines really need part of the airline passenger's tax (2 percent) to underwrite the cost of complying with FAA's noise regulations.

Hans J. Plickert, first vice president of Blyth Eastman Dillon & Co., Inc., and a former consultant to the Department of Transportation, writing in the August 1978 issue of Airline Executive, indicates they may not. I commend the article written by this expert on international airline financing and reproduced below for your reference.

[From Airline Executive, August 1978]

CURRENT PROFITABILITY EASES AIRLINE NEED FOR EQUIPMENT FINANCING

(By Hans J. Plickert)

A Senate/House Conference Committee will probably convene later this summer to reconcile different bills relating to the financing of a portion of the airlines' cost of meeting the Federal Aviation Administration's noise rules which will be implemented in stages over a four-year period ending December 31, 1984.

While it has been tempting to characterize the proposed funding as "federal financing", neither the Senate nor the House versions represent such financing in the true sense of the word. Rather, the funding will take the user tax route. Both approaches call for a reduction of the current 8 percent passenger transportation excise tax to 6 percent and a cut in the existing 5 percent cargo waybill tax to 3 percent.

The airlines would then continue to collect the old amounts, with the differential slated to go toward modification, retrofitting or replacement of aircraft. Under the House bill, this funding would continue for 5 years. The Senate version envisions a mandatory noise abatement charge for 12 months. Subsequently, the Department of Transportation must report on the results to the Civil Aeronautics Board which in turn will decide whether to keep the charge or vary its level.

The latter feature has already drawn some opposition from airlines which believe that such an annual review injects sufficient uncertainty into the program to make longer-term planning difficult, if not impossible. Certainly the prospect of collecting funds under a "temporary rate" while first the Department of Transportation and then the CAB evaluate the program is not a happy one for financial managers.

The bills also differ importantly in another regard with significant financial implications. The Senate version contains a waiver provision which permits airlines to continue operating non-complying two- and three-engine aircraft past 1985 if the airline has signed a contract for a replacement jet by 1983. This waiver provision raises the question of enforced compliance regardless of cost versus the possible public benefit in a more flexible deadline approach. The more flexible deadlines would allow carriers to take full advantage of new engine or airframe designs that could be developed in the early 1980s to assume the functions now performed by McDonnell Douglas DC–9s, Boeing 737s and, to some extent, the Boeing 727–100s. It is in relation to these aircraft that the noise rules have generated the greatest controversy.

While the aircraft manufacturers are now developing the new 160–200 seat passenger aircraft to replace the present four-engine jets in the early 1980s, there are no concrete plans to design follow-on aircraft for the smaller jets that are still doing Herculean duties in short-haul service and should be able to do so efficiently for some time to come. While retrofit of their engine nacelles appears technologically feasible, such kits have yet to be fully designed and priced.

The extent of this problem is significant. American Airlines, for instance, estimates that 99 of the 127 Boeing 727s it operated at the end of last year will have to be modified or retrofitted. The cost is not yet known. For that matter, several observers feel unsure that the noise reduction from a retrofitted jet can be discerned by human ears even though it can be shown on a meter. Thus, the real public benefits are not yet known.

The magnitude of the capital expenditures necessary to comply with the FAA noise rules is still uncertain. It will depend on the combination retrofit, modification or replacement program each airline adopts when it knows the costs involved. One current estimate is that as much as $7.5 billion will have to be spent by the U.S. airlines by 1985 for these programs in addition to normal replacement and expansion demands.

Various projections of airline capital needs over the next several years have been made by manufacturers and others, but they do not break out noise-rule-mandated costs. Nor does this appear totally practical. In the case of the older 707s and DC–8s, for instance, retirement in the 1980s could take place as part of the noise rule program but would be dictated by reasons of economy and operational efficiency and cost in any case.

Indeed, some airlines believe that even partial funding of a replacement program for aging aircraft discriminates against those carriers that have continually upgraded their aircraft inventory at their stockholders' risk with the use of internally generated funds and debt. These carriers thus attack the principle of public funding even while conceding that the $2 billion that might be generated by the 2 percent noise tax over a 5-year period would cover only a small portion of the necessary funds. One should also note the ever-present possibility that later revision of a noise financing bill could result in a diversion of funds from a carrier in full compliance with Federal Aviation Regulations Part 36 to one that is not, thus forcing companies to help finance their competitors.

Could the airlines in fact finance their noise-rule related capital needs without government help? The real key to the answer is whether the airlines can sustain their present profitability which has seen the system trunks' corporate rate of return on investment reach 11.6 percent in the 12 months ended March 31, 1978 while the return on stockholder equity reached 15.5 percent. There is little in the historical record to suggest that continuation of this performance can be considered a reasonable assumption. For that matter, even the more conservative 9.6 percent corporate return on investment and 11.8 percent return on equity achieved for the calendar year 1977 does not represent a level of profitability that has been sustained in the past.

It appears that the airline prospects for more stable future earnings trends are more favorable now than they have been in the decade-plus since the benefits of the conversion to jet aircraft formed the base for a significant profit expansion. Yet one must take notice of the fact that the present regulatory environment has had a major beneficial impact on airline profits. Its full success cannot be proclaimed until it has stood the test of an economic slowdown.

It is also appropriate to note that the airlines have some claim on a publicly-designed financing scheme for three reasons. First, major changes in environmental rules are being introduced and made applicable to aircraft which met all regulations not only at the time of purchase but for many years thereafter. Second, in contrast to other industries which can use the pricing mechanism to pass the cost of environmental modifications on to the user or buyer, the airlines are prevented from doing so on a timely basis because of the regulatory mechanism.

Indeed, the industry might want to trade the necessity to finance their noise-related capital needs for the ability to fully control their pricing. The present CAB has encouraged pricing freedom only below the normal rates while moving slowly if at all toward greater managerial flexibility on the upside. Perhaps the simplest help in financing airline capital needs would be a pass-through of the 2 percent noise abatement charge without federal controls or review. Finally, the lead times necessary for aircraft commitments are such that corrective action in regard to regulatory policies might come too late to ensure the availability of financing if current CAB policies do not meet the test of time.

Table 1. U.S. trunk airlines cash and short-term investments [1]

	Million
American Airlines	$447.6
Braniff International	30.8
Continental Air Lines	30.6
Delta Air Lines	107.5

Eastern Air Lines	103.6
National Airlines	12.3
Northwest Airlines	111.8
Pan American World Airways	178.0
Trans World Airlines	123.9
UAL, Inc.	529.0
Western Airlines	29.7
Total	1,704.8

[1] As of Mar. 31, 1978.

To cite the moral claim of the airlines on the government's help in setting up a partial financing mechanism to increase their equity base is not to deny the efficiency of the private capital market if it is allowed to operate unhampered. Airlines have generally been able to obtain adequate financing for their needs. Costs have been high at times, but this reflects the lender's or investor's perception of the risk involved.

Certainly a reduction in the perception of risk in the past two years has permitted a number of airlines to tap the private capital market, starting in early 1977 with American Airline's $125-million preferred stock financing. Interestingly, even during the difficult years of the early 1970s, the credit and equity markets were not closed to the airlines. This is evidenced by the risk financing of Southwest Airlines and the placement of lease financing with the help of forms of equipment trust certificates.

One also notes with interest the raising of $100 million of equity funds last year by Trans World Airlines only a few months after its former chairman Charles Tillinghast decried the fact that the capital markets were closed to his company. All told, the ten trunks and Pan American raised about $403 million in public financing last year.

There is little doubt that the airlines are not the most preferred credit risks today. Insurance companies in particular lose no opportunity to inform regulators and legislators of their reluctance of investing in airlines (while they do assume specific aircraft risks). Still, insurance companies do lend money to profitable airline companies, as they did last year in the case of Braniff International, a company that was able to arrange a $60 million private placement with insurance companies. A prominent banking official told a securities analysts' forum a couple of years ago that banks were prepared to lend funds to airlines as long as debt/equity ratios were maintained, preferably on a 1:1 basis, but perhaps as high as 1.5:1 under certain conditions.

The ability of the airlines to raise money in the capital markets last year and the stated capability of a major bank to lend money takes on added significance when one realizes that the nation's trunk airlines and Pan American are approaching a 1:1 debt/equity ratio as a group and have improved on it in several individual instances.

Table 2 shows that the total debt, noncurrent obligations under capital leases and the equity of the ten trunk carriers and Pan American as of March 31, 1978. One should note that the totals are modestly distorted because Braniff, Western and Delta (the latter being insignificant in this respect) had not yet restated their balance sheets in conformance with the requirements of the Financial Accounting Standard Board Statement 13. FASB 13 requires the capitalization and inclusion in the balance sheet of all capital lease obligations essentially by the end of this year.

TABLE 2.—*Capital structures of U.S. trunk airlines* [1]

[In millions]

	Long-term debt	Noncurrent obligations under capital leases	Equity
American Airlines	$558.8	$436.5	$703.6
Braniff International	270.7	------	227.3
Continental Air Lines	234.7	------	202.6
Delta Air Lines	202.8	------	697.6
Eastern Air Lines	429.5	452.8	348.1
National Airlines	61.3	------	198.8
Northwest Airlines	100.0	------	760.2
Pan American	741.2	335.4	336.5
Trans World Airlines	614.4	446.5	439.5
UAL, Inc.	825.4	423.8	887.3
Western Airlines	110.7	------	179.6
Total	4,139.4	2,059.0	4,981.1

NOTE.—Braniff, Delta, and Western balance sheets had not yet been reclassified to capitalize all noncurrent obligations under capital leases, pursuant to FASB No. 13.

[1] As of March 31, 1978.

However, the basic conclusions remain. At the end of the first quarter, the major airlines had total long-term obligations of $4.139 billion and capital leases capitalized at $2.095 billion. Relative to the total investment base of $11.215 billion, this represented 55.6 percent of capitalization. Five of the carriers will have debt ratios of less than 50 percent by the end of this year, even after adjustment of Western's debt for an estimate of lease capitalizations.

Moreover, seven of the airlines have significant ($1.209 billion) amounts of convertible securities outstanding. Reclassification of these as equity would add $1.209 billion to the equity base and lower the debt rate to 44.8 percent. It would also add American and, surprisingly, Pan Am to the list of companies with an adjusted debt rate of less than 50 percent. Since the trunk airlines may earn as much as $750 million this year, this suggests an over-all debt ratio of about 51 percent by the end of the year before adjustment for convertible debentures and about 41 percent after such adjustment. It should also be noted that banks typically make other adjustments for borrowing purposes which tend to increase the equity base.

Clearly, then, the airlines are in a position where they can attract new financing. It is also obvious that the present financing ability is still limited and can be increased only with a sustained profit trend. A series of studies have been undertaken in the past couple of years to determine the airlines' capital needs and the likelihood of their meeting these needs.

Given certain reasonable assumptions of traffic growth and aircraft service life a 1977 Boeing study concluded that the 1976–85 capital requirements of the trunks and Pan Am were $47 billion. An upward variation in the assumed service life of aircraft from 16 to 20 years led two other studies to conclude that $21 billion were needed. An ATA study of all U.S. airlines (based on a 5 percent traffic growth rate) estimated total capital needs at $26 billion for the 1976–85 period and $65 billion for the 1976–89 period.

A more recent Boeing study puts the value of aircraft to be delivered to U.S. airlines in the 1978–87 period at $32 billion in 1977 dollars. About $18 billion of this can be assumed to be growth-related while the remainder represents replacement aircraft. Presumably, this includes a large portion of noise-related capital expenditures except for retrofits and modifications. The studies appear to indicate that the airlines would be able to fully finance these needs at a 9–10 percent annual return on investment.

FAR 36 Feet noise rule

Aircraft type	Percent completion	Completion date
B–747		
B–727	50	January 1, 1981
B–737	100	January 1, 1983
DC–9		
B–720	25	January 1, 1981
B–707	50	January 1, 1983
DC–8	100	January 1, 1985

The current year will probably be the third in succession in which the return is in that general area (the 1976 return on corporate investment of the trunks and Pan Am was 8.5 percent). One can be hopeful that the recently emerged conservatism of airline managements plus an enlightened regulatory environment could combine to keep rates of return at a relatively satisfactory level.

Belief in the airlines' general ability to meet their financial needs does not guarantee that each trunk carrier will obtain all the funds it wants at the price it wants to pay. Far from it. It is obvious from Table 2 that carriers like Delta and Northwest will have no difficulty arranging for reasonable financing.

One should also note that even Eastern Airlines has drawn up a five-year budget which envisions capital expenditures of $615 million in addition to the recent Airbus order. Given a modest profit, Eastern is in balance with the addition of about $312 million in new funds.

One other aspect of the airline's financial standing needs mention. At the end of 1977, the trunk carriers and Pan Am had cash assets and short-term investments of $1.787 billion. At the end of March, 1978, the total was $1.705 billion. Equipment commitments at about the end of January were $2.2 billion, of which $1.4 billion became payable this year and should be largely met with cash on hand and internally generated funds. Since that time, about $1.6 billion have been added to these commitments.

As of now, the carriers have not committed themselves to significant purchases of "new generation" equipment. The industry's cash generated from operations last year was about $1.880 billion and may come close to $2 billion this year. Less than $100 million a year is currently needed to meet debt retirement obligations. Thus, even after paying for new equipment, the industry should be able to keep its cash horde largely intact in 1978.

Assuming a more moderate earnings level on average than the current, it still appears possible for the trunks to show a net cash flow (after debt retirement) of as much as $14 billion in the aggregate between now and 1985. This would provide an adequate base to finance the contemplated additions to the aircraft fleet forecast in all available major studies. The key will be the maintenance of a reasonable level of profitability.●

SENATE—*Friday, August 11, 1978*

(Legislative day of Wednesday, May 17, 1978)

The Senate met at 9:45 a.m., on the expiration of the recess, and was called to order by Hon. EDWARD ZORINSKY, a Senator from the State of Nebraska.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

"O Thou by whom we come to God,
The Life, the Truth, the Way;
The path of prayer Thyself hast trod:
Lord, teach us how to pray."
—JAMES MONTGOMERY, 1818.

Before we talk to one another, we would be still and know that Thou art God. Into Thy hands we commit ourselves, our cause, and our country. Amid the things that are seen and temporal, keep us aware of the unseen and the eternal.

We pray in the name of the One who walks by our side, shares our burdens, and gives us peace. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 11, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable EDWARD ZORINSKY, a Senator from the State of Nebraska, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. ZORINSKY thereupon assumed the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(Routine morning business transacted and additional statements submitted are printed later in today's RECORD.)

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar beginning on page 11, with the Department of State, and going through page 12.

Mr. BAKER. Reserving the right to object, and I will not object, I rise only to advise the majority leader that the items he identifies on the Executive Calendar, including those through nominations placed on the Secretary's desk, are cleared on our Executive Calendar, and we have no objection to proceeding to the consideration of their confirmation.

Mr. ROBERT C. BYRD. I thank the minority leader.

There being no objection, the Senate proceeded to the consideration of executive business.

The ACTING PRESIDENT pro tempore. The nominations will be stated.

DEPARTMENT OF STATE

The second assistant legislative clerk read the nomination of George M. Lane, of Massachusetts, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Yemen Arab Republic.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Harold E. Horan, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Malawi.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

AGENCY FOR INTERNATIONAL DEVELOPMENT

The second assistant legislative clerk read the nomination of Calvin H. Raullerson, of Texas, to be an assistant administrator.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

THE JUDICIARY

The second assistant legislative clerk read the nomination of James Dickson Phillips, Jr., of North Carolina, to be U.S. circuit judge for the fourth district.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Harry E. Claiborne, of Nevada, to be U.S. district judge for the district of Nevada.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Thomas A. Wiseman, Jr., of Tennessee, to be U.S. district judge for the middle district of Tennessee.

Mr. BAKER. Mr. President, I should like to take this opportunity to extend my congratulations to Mr. Thomas A. Wiseman, Jr., of Tennessee, whose nomination is about to be confirmed, I judge, to be a U.S. district judge for the middle district of Tennessee, to succeed a distinguished jurist, Frank Gray, Jr., who served for many years and shed great credit and honor on his profession.

Mr. President, I would like to note my approval of the confirmation by the Senate today of Mr. Thomas A. Wiseman, Jr. to serve as district judge in the middle district of Tennessee.

I have known Tom Wiseman for many years, as an attorney practing in the State and Federal courts, in politics and as an elected official in Tennessee. I am confident that he will make an outstanding member of the Federal judiciary.

Tom Wiseman has deep roots in middle Tennessee. He grew up in Tullahoma, graduated from Vanderbilt University and Vanderbilt Law School in Nashville and practicied law in Tullahoma from 1966 until the present time.

He served two terms in the Tennessee General Assembly and was elected by the legislature to the constitutional office of treasurer.

He has served his State with intelligence and diligence, and his wide experience and analytical ability auger well for his career on the Federal bench. His exposure as a candidate for Governor will be invaluable to him also.

Tom Wiseman has been recommended by his peers as being well-qualified for his new responsibilities. I would like to join in the commendations he has received and to add my personal wish for him that his years on the bench will be productive ones. He will be the kind of hard-working, compassionate, and sensitive judge that the people of middle Tennessee deserve.

Mr. SASSER. Mr. President, I am pleased that the Senate has today confirmed Tom Wiseman to be district judge for the middle district of Tennessee.

The nominee just confirmed was one of three candidates recommended by a nonpartisan selection committee. I can say, in all candor, that any of the three

persons chosen by the selection committee would make a fine Federal judge. Each was well qualified.

Therefore, it is especially significant that Tom Wiseman was recommended and is now confirmed as district court judge. He is the first nominee for a district judgeship in Tennessee selected by his peers after careful and thorough scrutiny of his credentials. I think that this fact is important and attests to his qualifications.

Tom Wiseman will bring to the Federal bench a sensitivity to the need for evenhanded justice. He is known as a dedicated lawyer, citizen and public servant. He has a judicial temperament. He has the ability to reason rather than react emotionally to controversy.

Tom Wiseman is a public servant in the finest sense of the words. He served a distinguished career in the Tennessee House of Representatives before being elected by his colleagues in the general assembly to the position of treasurer of Tennessee. He served in that position from 1971 to 1974, when he resigned to run for Governor.

Since his race for Governor, Tom has successfully resumed his law practice. He is a member of the Nashville firm of Chambers and Wiseman. Tom's legal career began in Tullahoma, Tenn., in 1956 and continued until the present time except for his term as State treasurer.

He is widely experienced in the Federal court system and has tried an impressive number of major lawsuits. In his years of law practice, he has earned the highest respect of the courts, the Bar and the public. Tom Wiseman's experience in the legal profession is the key to an outstanding judicial career. That is my prediction and expectation.

I congratulate him on his confirmation and wish him every success in his judicial career.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Norma Levy Shapiro, of Pennsylvania, to be U.S. district judge for the eastern district of Pennsylvania.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF JUSTICE

The second assistant legislative clerk read the nomination of Sidney I. Lezak, of Oregon, to be U.S. attorney for the district of Oregon.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Edward R. Korman, of New York, to be U.S. attorney for the eastern district fo New York.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

NATIONAL TRANSPORTATION SAFETY BOARD

The second assistant legislative clerk read the nomination of Francis H. McAdams, of the District of Columbia, to be a member of the National Transportation Safety Board.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

FEDERAL MARITIME COMMISSION

The second assistant legislative clerk read the nomination of Thomas F. Moakley, of Massachusetts, to be a Federal Maritime Commissioner.

The ACTING PRESIDENT pro tempore. Without objection the nomination is considered and confirmed.

NOMINATIONS PLACED ON THE SECRETARY'S DESK—COAST GUARD

The second assistant legislative clerk proceeded to read sundry nominations in the Coast Guard which had been placed on the Secretary's desk.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move en bloc to reconsider the vote by which all of the nominees were confirmed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I make that motion.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask that the President be immediately notified of the confirmation of the nominees.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

PROCEDURAL PROBLEMS OF THE LEADERSHIP

D. C. APPROPRIATION BILL

Mr. ROBERT C. BYRD. Mr. President, I express appreciation to my distinguished friend, the distinguished Senator from Tennessee (Mr. BAKER) who has done what he can do to get the 3-day rule waived on his side of the aisle on the District of Columbia appropriation bill. He twice tried to do this yesterday. I appreciate his efforts to cooperate in this fashion.

I merely express the hope at this time that Senators who are insisting on the 3-day rule on the District of Columbia appropriation bill allow us to bring up that bill today.

We have enacted six appropriations bills this week in the Senate, and there is no reason why the District of Columbia appropriation bill should not be taken up and acted upon today.

I can understand, Mr. President, the necessity for invoking the 3-day rule on some of the large appropriations bills—the HEW appropriations bill, the Department of Defense appropriations bill, and others. But it seems to me that to insist on invoking that rule in a blanket fashion on every bill that comes out, on every measure that is on the calendar, is going a little too far. Perhaps I should not refer to it as a blanket invoking of the rule because I have to say that the distinguished minority leader has upon several occasions been able to get through a waiver.

But I do think that the situation has gone too far this year. The 3-day rule is a good rule, but it should not be abused. I think that, from my impressions, it has been pretty much invoked on a regular and routine fashion by a single Senator or a small group of Senators.

I do not mean to be critical of any Senator in saying this. I must say this, however, on my side of the aisle the rule is seldom invoked. Once in a while a Senator on this side will ask that the 3-day rule not be waived. It was done on the tuition tax credit bill, for example. Such a request came from over here. But normally there are only a few such requests on my side of the aisle in the run of a session.

But so often when I go to the distinguished minority leader and talk about taking up a bill he tells me that someone on his side will not waive the 3-day rule, and at all times—I have to say this—at all times that I have ever asked him to go back and see if he could possibly get that rule waiver he has done so. He did it yesterday twice on the D.C. appropriation bill.

So I have no complaint, but only gratitude as to the minority leader. He is a victim of circumstances just as the majority leader is often a victim of circumstances beyond his control.

They call us leaders, the majority leader and the minority leader. Mr. President, we cannot lead. We are prisoners of those on our respective sides of the aisle, sometimes those on both sides of the aisle, who utilize the Senate rules, and that is what the Senate rules are for, to be utilized when utilization is necessary and can be justified.

THE 3-DAY RULE

But I just think that this constant invocation of the 3-day rule has gone too far, and it is becoming an abuse of the rule.

I hope that the Senator or Senators who are insisting on the 3-day rule on this poor little old District of Columbia appropriation bill will let us pass that bill today.

I used to be the chairman of this Subcommittee on the District of Columbia. I was chairman for 7 years, and I know there is no more onerous chore—Mr. President, may we have order in the Senate?

The ACTING PRESIDENT pro tempore. The Senate will be in order. Conversations will please cease or be taken to the cloakroom.

Mr. ROBERT C. BYRD. There is no more onerous chore than to have to chair hearings on the District of Columbia appropriation bill and act as ranking member, and sometimes I think that a Senator who is chairman of that committee is worthy of the Congressional Medal of Honor.

Here is this poor little old bill, 68 pages in the conference report. I could memorize ever number in that book in 24 hours.

I used to bring the District of Columbia appropriation bill to the floor and, without notes and without clerks, recite every figure in the bill. I daresay there are not a half dozen Senators outside those on the District Committee who have any interest whatsoever in this District of Columbia appropriation—not any interest whatsoever. They merely want to be here to vote on final passage if there is a rollcall vote.

I will make it clear. I do not say this in criticism of any particular Senator. I do not know who the Senator is or who the Senators are who consistently, consistently say, "We don't want the 3-day rule waived."

I am all for the 3-day rule. I respect the rights of Senators to invoke it. But I must tell you it has become a fetish apparently with a Senator or some Senators to invoke that 3-day rule on every little old bill that comes in here that is reported.

Mr. SCHMITT. Mr. President, will the distinguished majority leader yield for a question?

Mr. ROBERT C. BYRD. I yield first to the distinguished minority leader.

Mr. BAKER. Mr. President, let me say just a word, if I may, before I yield to my colleague from New Mexico.

The majority leader is most kind and generous in his remarks, and I appreciate them, and he is entirely correct. We are captives of our membership, and we have only that authority and initiative which they are willing to give us. And I agree with the majority leader that anyone who handles the D.C. appropriation bill or for that matter the D.C. Committee when we had a D.C. Committee should have some sort of special citation.

Mr. President, I must say, as I have said privately to my good friend and colleague, the majority leader, that there is a difference. There is a difference in the mind set and the attitude of the majority which, after all, has the initiative in going forward with legislation, chairing the committees and subcommittees, staffing those committees that write the reports, and reporting them to the Senate by the majority, on the one hand, and the minority, on the other, because we have to respond to that. We do not have the initiative, and the 3-day rule then becomes a treasured adjunct of Senate procedure which permits us as a minority to examine and to analyze, even to understand what has been reported to the Senate before we try to take a position on it or before we must act on it.

In this particular case, the majority leader, as usual, is right once again when he says that on yesterday we tried twice to see if we could remove the several objections to the waiving of the 3-day rule, and we were not able to do that.

But, Mr. President, it is a mark of the effectiveness of the majority leader's leadership that he would present these things and that we would have an opportunity in good faith to reply to them, and a mark of the efficiency of the rules that we are able to negotiate the schedule of the Senate within the framework of the rules in this way, to protect his initiative and our minority status to respond.

The majority leader speaks of his poor little bill, and I am sympathetic to that. I remember the days when he used to handle this bill on the floor of the Senate, and I was always astonished at the depth of his knowledge of the subject. But while this is a poor little bill, we are a poor little band. We are a poor little group of 38 Senators who are just trying to do our best to see that we have an opportunity to compete with the awesome power of the majority, that we have an opportunity to understand what the majority has done, and in most cases what they have done has been good.

But, Mr. President, we owe the obligation to examine it because that is the function and role of the minority.

Mr. President, I share the majority leader's frustration in a sense because it is our responsibility to try to order the affairs of the Senate, to arrange the calendar—his far more than mine—and I pledge to him that I will continue from time to time to try to accommodate his requests. He makes them infrequently. In the majority of the bills we do not even inquire about the waiver of the 3-day rule, and in most cases we will succeed. I rather suspect we have succeeded already in many more than we have failed.

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that each leader may have an additional 5 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. But I think the policy of invoking the 3-day rule has not been abused. I think it is a necessary adjunct to the responsibility of the minority, and I pledge to the majority leader that I will do my very best to accommodate his reasonable requests, and to help arrange the schedule of the Senate.

I expressed my regrets that we could not go forward on this, as he puts it so poetically, "poor little bill." I will try a third time, and we will see if it is possible to do that.

As he so often says, I am an eternal optimist, and I would not doubt for a moment that that is at least possible.

So I conclude these remarks, Mr. President, by saying he is a good leader; he has been considerate of the rights of the minority. I understand his frustration in this respect for his poor little bill, and I am appreciative of his understanding of the minority and our responsibility to act in the discharge of our responsibility.

Mr. ROBERT C. BYRD. Mr. President, I do appreciate and have a very deep understanding of the responsibilities of the minority. I have been a member of the minority party once during my 26 years on Capitol Hill, and I do not intend to engage in an argumentative discussion with the distinguished Republican leader.

He has taken in good spirit what I have had to say, but I want to address myself to two or three points that he made. He spoke of a mind-set—a mind-set. Mr. President, I have been in the Senate 20 years, and I have not seen that mind-set until this year on the 3-day rule. I have seen it invoked from time to time, as I think it ought to be invoked from time to time, and I understand a Senator who wants the 3-day rule invoked on a measure like the tuition tax credit bill or the DOD appropriation bill or the HEW appropriation bill. But there should be no mind-set on the invoking of the 3-day rule. That is the problem. Apparently it has become a mind-set on the part of a Senator or some Senators.

I cannot see that mind-set as a responsibility of any Senator on either side of the aisle or of either party—that it has to be a mind-set that we have to invoke the 3-day rule without exception.

THE JOINT FUNCTION OF LEADERSHIP

Also the distinguished Senator, the Republican leader, speaks of the responsibility of the initiative as being on my side of the aisle. That is true. But leadership is a joint function. Both parties are in this thing together. If we are not able to proceed with legislation and dispose of it in a reasonable length of time, all too often Congress looks bad, and that makes both parties look bad. Congress cannot look bad with only the brush tarnishing the leadership party.

It is natural, I suppose, to blame the leadership party if Congress is criticized. But we are all in this together, and the distinguished Republican leader appropriately shares with me the responsibility of moving the legislation forward.

He has been a fine teammate. We have differed on a few little occasions, but he has been pleasant to work with, and most cooperative.

But again he cannot always do what he would like to do. I would simply hope that Senators will think about this, and

those who apparently make a fetish out of utilizing this rule would desist from doing so. What it is doing is slowing the Senate and it is not performing the function which it should perform. It is merely throwing up a roadblock. It is not serving any good purpose when it is automatically resorted to without good and sufficient reason.

Mr. President, I ask unanimous consent that the leaders may have an additional 5 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. It is not serving any good purpose when it is automatically resorted to.

THE SCHEDULE AHEAD

Let me just point out to the Members of the Senate what we have confronting us here. We have left, remaining, until October 7, 36 working days—not counting Saturdays, not counting the legislative holiday, the Labor Day holiday—36 working days.

Mr. President, we are just going to have to forget October 7 as a date on which we may be able to adjourn sine die. I do not think we can do it unless we work Saturdays, unless we work long days, unless we get cooperation from all Senators on both sides of the aisle in working out time agreements, and waiving 3-day rules from time to time, at least.

Senators who are not running ought to stay in town on Saturdays from here on out and carry the burden. On that score so many times I will say, "Let us bring up this bill." And I will be told, "Well, so and so, who is the ranking manager, and so and so who has an amendment, and so and so who is managing the bill will be out of town." So we cannot take up that bill.

With 36 working days left, what are we going to do? We have remaining the Labor, HEW appropriations bill; the District of Columbia appropriations bill, that poor little old D.C. appropriations bill; the Department of Defense appropriations bill; the foreign operations appropriations bill.

We have numerous authorization bills that deal with expiring authorizations. We have the energy legislation. We have some very heavy stuff left to do. Senators want to get out at 6 o'clock, they want to be out on Saturdays, and they want the holiday adhered to, the one that was calendared, and it will be adhered to. They want to leave on October 7. They do not want to come back after election, and mark me in the last category. I do not want to come back after the election either.

But, Mr. President, we had better realistically face up to the problems that confront this Senate in the few remaining days left to us. In the final analysis we are going to have to do our work. The people expect that. If this means we have to come back after the election, that is what we will have to do.

I would rather avoid that. But if we do avoid it, it is going to take more cooperation than I have been getting. It is going to take more recognition of the realistic circumstances that confront us. It is going to take a willingness to reach time agreements, a willingness to call up bills and dispose of them. Otherwise, we may just as well forget sine die adjournment before the election. So far as I am concerned, I have now about forgotten October 7 as a possible sine die date.

If the Senate has to have Saturday sessions, I would trust we can reach some time agreements, so that we could guarantee there would be action on Saturdays, and not just quorum calls by a few disgruntled Senators who come in while others are out of town. I cannot blame them for being disgruntled. I would certainly hope we could accomplish something, if we must have Saturday sessions.

But we cannot have our cake and eat it, too. We are going to have to have better cooperation. We are going to have to have some Saturday work. We are going to have to have some long evenings, if we make sine die on any date in October—any date.

I say what I have said because I think I realize perhaps as much as any other Senator, or more than some, what the true outlook is. I know what is on this calendar. And yet committees continue to report bills, without any possible hope of those bills being acted on this year.

I would hope that committees would take a good look at the measures they report from here on out. They grind out bills that have no more chance of being passed than a snowball has in Hades.

So I hope we will all stop and look at the clock and the calendar—and the compass, to see the direction in which we are going.

Mr. President, I yield the floor.

Mr. BAKER. Mr. President, I am reminded a little of the young man who was flying in an airplane through a thunderstorm. We are being bounced around and jostled. I used to fly a little, and I was sitting in the right seat of the airplane, watching the radar. My young friend saw I was nervous and frightened, and he finally tapped me on the shoulder and said, "Senator, why don't you turn off that radar before we scare ourselves?"

That is sort of the way I think we are about this conversation this morning. I think we had better turn off that radar before we scare ourselves, because I do not want Saturday sessions and I do not want to have to rearrange schedules post-October 7, but I think facts are just facts.

I have previously told the majority leader, and I will reiterate now, that I will do my best to accommodate his reasonable requests on waiver of the 3-day rule, on unanimous-consent requests, and in other respects on scheduling. I daresay the percentage of 3-day rule waiver requests he has made that we have agreed to would run 75 or 80 percent as against those we have declined to agree to. I do not have any count, but that is my feeling.

I will do my best to see if we can do something for the D.C. appropriation bill, and as he knows without my telling him, I will continue to participate in the job of trying to arrange the schedule of the Senate so that we can accommodate all members of the majority and, of course, of the minority as well.

Mr. ROBERT C. BYRD. I thank my dear friend, the minority leader.

RETIREMENT OF SALVADO MASGORET

Mr. BAKER. Mr. President, today is a sad day for us, because it is time to say goodby to a fine person who has served us long and faithfully. Mr. Salvado J. "Joe" Masgoret retires today after serving us for 10 years in our private, "inner sanctum" dining room.

Mr. Masgoret is 77 years old, and for the last 49 years, he has been in Washington, whipping up wonderful things to eat. He was born in Fulleda, Spain, and was a baker and pastry chef, who came to this country in 1920. He is now an American citizen.

Among his inventions in the kitchen is rum bun, a culinary advance that has kept me on a diet for most of my adult life.

I want to thank Mr. Masgoret for his rum buns, for his other special desserts and diversions and for his discretion, his good humor and prompt, polite service to the U.S. Senate.

I understand he plans a trip to Spain and other travels in the United States. I am sure my colleagues join me in wishing him every possible happiness in his retirement. We hope he will look in on us from time to time.

TUITION TAX RELIEF ACT OF 1978

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume the consideration of H.R. 12050, which the clerk will report.

The legislative clerk read as follows:

Calendar No. 989, a bill (H.R. 12050) to amend the Internal Revenue Code of 1954 to provide a Federal Income Tax credit for tuition.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc, and that the bill as thus amended be considered as original text for the purpose of further amendments.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. HODGES. Mr. President, I object.

The ACTING PRESIDENT pro tempore. Objection is heard.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that Mr. Lary Phillips and Miss Sally Bertness of the staff of Senator JACKSON be given the privilege of the floor for the duration of the consideration of this measure.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. RIBICOFF. Mr. President, I make

the same request for Susan Irving of my staff.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. PACKWOOD. I make the same request on behalf of John Colvin and Terry Kay of my staff.

The ACTING FRESIDENT pro tempore. Wtihout objection, it is so ordered.

Mr. SCHMITT. I make the same request on behalf of Eugene Iwanciw of my staff.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. RIBICOFF. Mr. President, before discussing this bill, I should like to pay special tribute to Senators MOYNIHAN, PACKWOOD, and ROTH for their dedication to this most important cause. Each has spent long hours and contributed greatly to this piece of legislation.

Senator ROTH has never given up in his determination to make college tuition tax credits a reality for many thousands of middle-income families. His steadfastness has had a great deal to do with the fact that this year for the first time the House of Representatives finally acted on a tuition tax credit bill.

Senator PACKWOOD has given greatly of his time and energy in the attempt to aid parents who choose nonpublic schools for their children. Senator PACKWOOD is noted as one of the most innovative members of the Finance Committee. He can always be counted on for a fresh approach to a difficult problem.

Mr. President, my old and dear friend the Senator from New York (Mr. MOYNIHAN) has made substantial and invaluable contributions. It is especially good to have a professor and an intellectual in the Senate. Senator MOYNIHAN combines these talents with an extensive knowledge of our educational system and a subtle wit. This makes him a formidable ally in any fight we may have in this body.

It has been a pleasure to work with these three Senators. Their staffs have cooperated with each other and with my staff. Checker Finn of Senator MOYNIHAN's office has a reputation as an educational expert in his own right. His aid has been invaluable. Bruce Thompson of Senator ROTH's staff and John Colvin of Senator PACKWOOD's staff have brought knowledge of the Tax Code and strong efforts to this cause. Susan Irving of my staff has been superb and her help has been invaluable to all of us.

Mr. President, I am pleased to join with my colleagues in supporting the Tuition Tax Relief Act of 1978. I have long felt that those who bear the burden of paying for their children's education should receive some tax relief. This body has agreed. In fact, the Senate has considered and approved legislation providing tax credits for college tuition more than six times in the past decade.

Education has always held a special place in American society. For many it has been seen as the path upward. People have worked hard. Parents have worked hard that their children might obtain a decent education. In the United States we have always believed that education benefits not only the individual, but also the society as a whole. Thus, we have encouraged spending on education.

In the decade since this body first approved tuition tax credits, however, college costs have skyrocketed. Tuition and fees at our Nation's colleges increased more than 90 percent between 1967 and 1976.

The disposable income of American families has not grown anywhere near as fast. Today, many families who had always planned to send their children to college are finding it much harder than they ever expected. And all too often these families feel forgotten. They, like we, have supported financial aid for less fortunate students. Now they are asking that we recognize their problems and their efforts.

In the sixties we created programs to make equal access to education more of a reality. And we spawned a whole new alphabet soup of student aid programs—BEOGs (basic educational opportunity grants), SEOGs (supplemental educational opportunity grants), SSIGs (state student incentive grants)—and loans. The sponsors of the tuition tax bill remain committed to funding these aid programs for our poorest students. Family income should not be a barrier to higher education.

These Federal grant programs are focused on families with less than the median income—and rightfully so. Only 6 percent of the funds from the basic grants program go to students in families with income over $15,000. Today we have a whole group of families who are "too rich" for need-based grants but find college tuition a major burden. I would suggest that given today's college costs an income of $20,000 or $30,000 is not so great—especially in a family with more than one child.

The Tuition Tax Relief Act offers a tax credit to these families. It provides tax relief to those who do not qualify for Federal grant aid—or who receive a very small amount of grant aid. The bill is designed to prevent "double-dipping." Because the credit is reduced by the amount of any Federal grant, no one with a Federal grant of $500 will receive a tax credit.

H.R. 12050 offers parents a tax credit equal to 50 percent of tuition and required fees. From 1978 to 1980 the maximum credit is $250 and is available only for full-time postsecondary undergraduate study. Beginning October 1, 1980, the college credit is increased to $500 and is also available to half-time undergraduates. This percentage formula was chosen so we do not further worsen the disparity between public and private tuitions at the college level.

Tuition tax credits for college benefit the middle class. It is true. But we must always keep in mind that these middle-class families are critical to the strength of our country and our system of government. Government and any tax system operate by the voluntary consent of the people affected. But the people must feel that Government is fair and that everyone gets an even chance. I believe that we have a confidence gap today. Too many families who perceive themselves as middle class also see themselves as left out. They feel Government is only concerned with the rich and the poor. The tuition tax credit provides some sign that Government has not forgotten them.

There is another part to this bill which deserves discussion. H.R. 12050 also provides a tax credit for tuition paid to private primary and secondary schools. This is a question of diversity and freedom of choice.

Throughout American history parents have cared that their children receive an education which meets their needs. Over great odds these parents have created and molded schools to meet their needs and philosophy.

Today most parents find the public schools responsive to their needs. Others feel that the public schools fail both them and their children. These parents face a growing financial burden. They pay the rapidly-increasing taxes to support the public schools. And at the same time they pay the rising cost of non-State education.

This financial squeeze has taken its toll. In 1963 when I first proposed a tax credit for elementary and secondary school tuition, over 14 percent of our Nation's students were enrolled in nonpublic schools. Today that figure is less than 10 percent. Enrollment in nonpublic schools has dropped from 6.3 million students in 1965 to 5.3 million in 1976—a fall of 16 percent. Now, some are not troubled by this trend, but I personally believe that it threatens the diversity of our educational system. In the United States three educational systems—public, independent, and parochial—have grown and existed side by side. There are many faces to education in our Nation: many kinds of schools. This diversity is a tremendous strength for our country. As a country we have come to value the diversity of our people. We must also protect the existence of institutions which represent that diversity.

Decline in private school enrollments threatens not only the varied nature of our education system, but also the public school system itself. If all of this Nation's nonpublic schools closed it would cause a major dislocation in the public school system. Could our public schools absorb an additional 5.3 million students? Could we manage the cost of doing so? This burden would not fall evenly—much of it would be in our already struggling city school systems. In 1976 the average expenditure per pupil in the public schools was $1,600 per year. If 5.3 million students were suddenly transferred to the public school system the increased cost to taxpayers would be some $8½ billion! In comparison, a tax credit of less than $1 billion is a small investment.

This legislation will not tip the balance to favor nonpublic schools over public schools. During the 1978–79 school year the Federal Government will spend—in direct outlays and tax expenditures—an average of $352 for every public school student in the United States. During this same year the com-

parable figures for private school students will be just $98.

In fiscal year 1983, when our bill is fully effective, the Federal Government will spend an average of $268 for every private school student. This is just three-quarters of the amount now going to their public school counterparts.

I and the other sponsors of this legislation strongly support aid to our public schools. As Secretary of Health, Education, and Welfare under President Kennedy, I fought for his proposals to provide aid to education. We failed to get favorable action on his program. When I came to the Senate I continued to advocate aid to education and finally we were successful. Much of the debate at the time swirled around the question of aid to parochial schools. Aid to public education is not inconsistent with assistance for those parents who choose nonpublic schools for their children. Aid to private colleges has not destroyed the public college system. Our public schools should be as good as they possibly can be. Nonpublic schools should exist as an alternative.

The right of parents to direct their children's education is a valued right—and it has been so recognized by our Supreme Court. This right will be meaningless if the only schools we have in our Nation are State schools.

Further, the last 10 to 15 years have seen an advancement in our definition of a "right." Increasingly we have come to see that a "right" is an empty promise if you cannot afford to exercise it. This legislation is designed to make freedom of choice a reality for more of our citizens.

Mr. President, this legislation does not provide massive tuition relief. The $250 credit may be worth little to the upper-income parent paying for Choate or Loomis; that is not the parent I am worried about. But to the parent who has been denied choice; to the parent on the margin, this aid may make a difference. This is not a rich man's credit. For 64 percent of the students in nonpublic schools come from families with incomes under $20,000 a year.

Some of my colleagues fear that this is a "white flight" tax credit. The legislation requires that only tuition paid to schools with 501(c)3 tax-exempt, tax-deductible status under the tax code is eligible for the credit. This status is denied to schools which discriminate on the basis of race, color, national or ethnic origin. The IRS regulations on this are quite specific. A school must actively demonstrate its nondiscriminatory standards. We have asked the Secretaries of HEW and Treasury and the Attorney General to report to us on the adequacy of IRS enforcement of these requirements. We want strong enforcement.

I would further urge my colleagues who are worried about segregation to take a look at who is served by these nonpublic schools. Our public neighborhood schools, by and large, serve homogeneous ethnic and economic groups. Private schools have a broader reach. Look at the efforts of our parochial schools in opening opportunity to all. Look at the minority population in a big-city parochial school. Some examples from my own State of Connecticut may be illustrative.

In our three largest cities, the minority student population at the Catholic elementary schools is as high as or higher than that in the public schools. In West Hartford, the Northwest Catholic High School has more minority students enrolled in it than any other high school in that city. And I would urge my colleagues to look at the integration record at our top private schools and compare it with the record of public schools in a wealthy suburb in this country.

The rich have always been able to choose the education they want for their children. We seek to expand that freedom of choice to middle- and lower-income Americans.

There is one more issue concerning the elementary and secondary portion of this legislation which must be addressed—the constitutional question. If I thought that this bill clearly failed the tests used by the Supreme Court in striking down aid programs designed by the States, I would not support it. I am not interested in dramatic but futile gestures. However, our Supreme Court has never ruled on a Federal law in this area. The Congress does have the right to pass laws about which there exists a constitutional question. The Supreme Court does not issue advisory opinions; it only rules on actual controversies. We can only discover if this is a constitutional form of aid to parents who pay nonpublic school tuition if we try.

Mr. President, this is not a new idea. Over the last 15 years, both Democratic and Republican Presidential candidates have endorsed aid to parents of private school students.

The tuition tax credit says to the American taxpayer, "Yes, we know you struggle for your children. We recognize your efforts." I think it is time to do something about it. Let us pass this bill.

There will be a full debate. It is time that we faced up to it in this country. The time has come to recognize the rights and the burdens and the opportunities for middle America in this Nation of ours.

Mr. MOYNIHAN. Mr. President, before I respond to the extraordinarily generous remarks of the senior Senator from Connecticut, our revered colleague, ABRAHAM RIBICOFF, and continue with the debate, I first ask unanimous consent that the committee amendment be agreed to and that the bill as thus amended be considered as original text for the purpose of further amendment.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. HOLLINGS. As I understand the request, it is just to replace the committee amendment to the bill.

Mr. MOYNIHAN. That is correct.

The ACTING PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I think perhaps it will not be taken amiss if I use this occasion to remark that the original request which I made on behalf of the sponsors of this legislation and the Committee on Finance was objected to, not on clear grounds, but on grounds of certain suspicions. These suspicions must be clearly addressed and resolved. In fact, it might be useful to suggest that this whole matter is, in a sense, being approached by persons who wonder what exactly is happening here, and suggest something verging on the sinister and the occult. That is why it was so important that this debate should have been begun by the most distinguished spokesman in this Chamber, perhaps the most distinguished spokesman for education ever to serve in this Chamber, the senior Senator from Connecticut, who has given us a beginning, a context in which to address this matter. There have been few men of his generation, who are not only as distinguished, but whose distinction has been so well recognized, so luminous, and so manifest—not only in the positions he has held but also in the deeds he has done.

He was John F. Kennedy's Secretary of Health, Education, and Welfare, the first man of my party to come to that position, when, at long last, the United States began to recognize its responsibilities in this area at the national level. I was a young assistant to a Cabinet officer in those times. I had known then-Secretary RIBICOFF from his time as Governor of Connecticut, when I was assistant to his neighbor in New York. I recall fondly how we would look to him for guidance and support. I can well remember those moments of my youth and would like to recall them for some of the Members in this Chamber. I ask my colleagues across the aisle to forgive me if I address my own party at this moment, but ours is the party that first addressed these issues.

Seventeen years ago, in this city, ABRAHAM RIBICOFF assumed the responsibilty for the President of the United States in the field of education with respect to three matters. First, the schools of a large section of this country were frozen into a hateful, anomalous and illegal system of segregation by race. The Supreme Court had ruled otherwise; nothing had happened. But the commitment to the good of the country had to be made and finally, through President Kennedy, it was made.

Second, in the face of a huge expansion in the cohort of young people attending school, State and local governments found it increasingly beyond their capacity to pay for the extraordinary expansion necessary. A national commitment to education was necessary and ABRAHAM RIBICOFF undertook that task, too. We simply called it Federal aid to education.

Third, there was the task of resolving the longstanding, vexing, and most challenging issue of achieving the ideal balance between the Government and the non-Government sectors of education. There is a certain semantic advantage in distinguishing between "public" and "private," based upon the presumption that somehow, what is public is more appropriate to public support. It was beyond question that all these schools were, and remain, essentially public. The

question was: Are they substantially supported by Government or are they not? That was in many ways the most difficult of the triad, because it touched upon alarms and concerns of the American people which ran far deeper than either of the original two—which addressed the question of race in American life and the role of the Federal Government in American life.

ABRAHAM RIBICOFF addressed himself to these. He told you a moment ago that when he came to the Senate in 1963, he first proposed an elementary and secondary tuition tax credit. This is, then, not a measure that simply appears before us *de novo*. Instead, it was part of a triad of responses to a triad of fundamental issues that faced this Nation, and lay at the core of our sensibility concerning the role of race, of religion, and finally, the role of the national Government in our society; it was a challenge to overcome fear and prejudice. In two of those matters, we have acted so decisively and done so admirably that we have broken the hold of segregation upon this society. We have also broken through to a point where the national Government now accepts some responsibility in matters of education. In both cases, we owe a debt of gratitude, and our tributes, to ABRAHAM RIBICOFF.

One thing we have not done disturbs me greatly, and comes to this Senate today as part of the Nation's unfinished agenda——

Mr. HOLLINGS. Will the Senator yield?

Mr. MOYNIHAN. If the Senator will have the kindness, I would like to speak for another 10 minutes, and then, of course, I will yield.

Mr. HOLLINGS. I just wanted to ask a question.

Mr. MOYNIHAN. I will yield for a question.

Mr. HOLLINGS. Does the Senator know that President John F. Kennedy said, "I believe in an America where no church is granted any public funds or political preference"?

Since we are talking about John F. Kennedy, I thought we ought to get this record straight.

Mr. MOYNIHAN. I believe in the same America. I would not have any church receive any public funds.

There is no instance of that at this time. In the early constitutional history it may have been a different matter.

But are we here talking about churches receiving funds? We are talking about parents receiving tax relief for tuition.

I see the Senator from Connecticut is on his feet.

Mr. RIBICOFF. Will the Senator yield for a question?

Mr. MOYNIHAN. Yes, I yield for a question.

Mr. RIBICOFF. I suppose there are not many people in this country today who knew President Kennedy better than I did. I know what a loyal supporter the distinguished Senator from South Carolina was. Memory goes back to the great support that he gave in South Carolina, around the country, and also at the Democratic Convention in 1960 which nominated President Kennedy.

But I think that in many ways the committee is not properly addressed to the Senator from New York because in no way are we advocating the contribution to or the granting of funds to any church-related school. We are talking about a credit to parents for tuition that they pay for a private or parochial school. We make a definite distinction in this legislation that these funds are not going directly to a parochial or church school, but to the parents to reimburse them for their children's education.

Mr. MOYNIHAN. Exactly.

Mr. HOLLINGS. Will the Senator yield?

Mr. MOYNIHAN. I will yield for one more question.

Mr. HOLLINGS. Has the Senator read the New York Supreme Court decision?

Mr. MOYNIHAN. We will have days to discuss that.

Mr. HOLLINGS. Yes, but that goes to the parent or the school, and the court found it went to the school.

Mr. MOYNIHAN. If the Senator will allow me to continue, I am still only in the process of thanking the Senator from Connecticut.

Mr. RIBICOFF. One more point, if these tax credits for tuition paid to parochial schools are public funds, then so are tax deductions for charitable contributions that we make to churches or church-related schools or colleges.

So I think we are talking about something invidious here. I do not think this bill in any way can be imputed as a grant to a church school.

Mr. MOYNIHAN. Does the Senator from Rhode Island wish the floor for a statement?

Mr. PELL. No, for a unanimous consent.

Mr. MOYNIHAN. I will yield for a unanimous consent.

Mr. PELL. I thank my colleague from New York.

Mr. President, I ask unanimous consent that the following staff members of the Human Resources Committee have the privilege of the floor during the debate and votes on H.R. 12050, the tuition tax credit bill: Stephen Paradise, Franklin Zweig, Mrs. Jean Frohlicher, and Richard Jerue.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MOYNIHAN. As I stated, I have only in mind at this point to respond with an expression of gratitude to the Senator from Connecticut for making the point which he makes with such quiet authority.

I would hope I might not raise my voice during this debate. It seems to me inappropriate to the subject. We will all be forgiven for a lapse or two, but not, perhaps, for many.

I wish to make the point that early in the modern history of this issue, my party embraced this approach. Senator RIBICOFF spoke of it first in 1963, and I believe he was the first to do. To my knowledge of the matter, his initiative was first—as the first Cabinet officer of the Democratic party to be responsible for education.

And then in 1964, when the efforts to obtain Federal aid to education had failed because we were not able to resolve this third matter, it fell to me to play a small part in drafting the Democratic platform, which reaffirmed our commitments in this third area. That action followed by a complete endorsement of the principle of Federal aid to education by those persons most interested in nongovernment schools and nonpublic schools.

As a result, the Elementary and Secondary Education Act of 1965 was enacted promptly. If it was a tribute to any one man, it is that man who stands on this floor today, ABRAHAM RIBICOFF.

But, Mr. President, the Democratic Party did not leave the matter at that. We went on to espouse the tax credit approach in the most explicit way.

In the course of his campaign for the Presidency, Senator Hubert H. Humphrey issued a position paper on parochial and private schools in response to numerous inquiries.

He said:

> I favor the creation of a system where parents would be able to receive a tax credit when their children attend approved private schools.

By "approved private schools," he meant, with absolute insistence, that there be no racial, ethnic, or economic discrimination:

> The tax credit would not amount to more than the tuition paid. A system of tax credits for tuition, books, fees and supplies would provide substantial financial relief to millions of American families within the proper bounds of the Constitution.

He went on to speak of an essentially similar arrangement already in place in his home State of Minnesota.

Mr. President, I ask unanimous consent that the position paper of Senator Humphrey be printed in the RECORD.

There being no objection, the paper was ordered to be printed in the RECORD, as follows:

HUMPHREY CALLS FOR TAX CREDITS FOR PARENTS OF NON-PUBLIC SCHOOL CHILDREN

CLEVELAND, April 28.—Senator Hubert H. Humphrey today called for a system of tax credits for parents of parochial and private school children and "creative and constructive methods of assistance to ease the financial crisis facing non-public education."

Senator Humphrey issued a position paper on parochial and private schools in response to numerous inquiries on the subject. Following is the text of the Senator's statement:

"Our public schools are the foundation of our educational system. I was educated in public schools and I will always be a vigorous supporter of the American public school system.

"At the same time. I appreciate that public schools have benefited academically from the challenge and competition presented by thousands of non-public schools throughout the nation.

"Today in Ohio more than 330,000 students are attending non-public schools. These schools are making a significant contribution to American education. Private and parochial schools throughout this state and the United States have played an important role in assuring children the equal opportunity to obtain a quality education.

"I am concerned that the American traditions of cultural and educational pluralism are endangered by the financial crisis facing non-public education. When non-public

schools are in trouble all schools in America share in these hardships. The closing of one private or parochial school places additional burdens on the public school system. And the continued closing of non-public schools places an extraordinary financial burden on local school districts where property tax rates for education have already reached the saturation point.

"In Ohio and elsewhere, non-public schools are caught in the same sort of cost squeeze experienced by millions of American working families. And like the families of this nation, non-public educational systems have received nothing more than election-year promises from the Nixon Administration.

"There is a growing tide of opinion in America which recognizes that we must encourage greater sharing of public and private resources within the framework of proper and responsible Constitutional safeguards. I believe the aim of this sentiment should be to promote educational reform among public and private schools and to make all educational systems in America truly responsible to the needs of our communities.

"I favor the creation of a system where parents would be able to receive a tax credit when their children attend approved private schools. The tax credit would not amount to more than the tuition paid. A system of tax credits for tuition, books, fees and supplies would provide substantial financial relief to millions of American families within the proper bounds of the Constitution.

"In my home state of Minnesota we have had the foresight and the practical good sense to tell the parents of non-public students by granting partial income tax credits for tuition paid to such schools. The Minnesota plan provides that a parent receive a direct credit not to exceed 80 percent of paid tuition, effectively limiting the program's application to secular instruction. The amount of the tax credit is also limited by a ceiling of $100 annually for an elementary school child and $150 for one in a secondary school. We have been assured of the Constitutionality of that approach.

"I will urge passage of similar legislation by the Congress of the United States.

"I recognize that it would not provide a total solution to the problems faced by non-public schools. But it could be a significant beginning to preserve the right of every American child to know his or her own heritage through non-public education.

"There are other creative and constructive methods of assistance in the secular areas of private and parochial education.

"Along with public schools, these schools need improved testing and counseling and better health services. They need good textbooks and instructional materials on secular subjects. And the children attending these schools deserve daily nutritious meals and safe transportation services. All of our schools require the latest scientific equipment of non-discrimination based on race, creed, color, or national origin.

"By taking the steps now to provide for a rich diversity and constructive competition in our educational system we can meet the demand not only for a more informed and skilled nation, but also for a better and more humane society."

(EDITOR'S NOTE.—In 1963, as Assistant Majority Leader in the U.S. Senate, Senator Hubert H. Humphrey proposed that the Congress adopt a sliding tax schedule to help finance higher education in America.

(He observed on the Senate Floor:

("The sliding tax credit schedule provides a sensible and workable system of federal assistance that helps every student, indirectly helps both public and private institutions and does so in a manner that in no way interferes with individual or institutional freedom or policies. . . . While this tax credit proposal would not solve all the financial problems related to higher education, it would represent a significant contribution well within our national means. It would provide this assistance in a manner that avoids any argument about federal control of education and also the nagging question of church-state relations. Moreover it would provide this aid without having to expand the Federal bureaucracy to administer the program.")

Mr. MOYNIHAN. Then in 1972, when our colleague, Senator MCGOVERN, was running for the Presidency, he issued a statement on aid to parents of children in parochial and bona fide nonpublic schools.

Again, his emphasis was on the first of the three large issues of which I spoke, and he could not have been more explicit in this matter. In a passage which was intended to make news, and which was news, he said:

I am today announcing my support of the tax credit approach to aid the parents of children atending parochial and other bona fide nonpublic schools.

Mr. President, I ask unanimous consent that the MCGOVERN statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR GEORGE MCGOVERN

As I have traveled around this country during a two-year campaign, I have again and again witnessed sights that have heartened me. In New Hampshire, in Wisconsin, in Michigan—in state after state—I have gone into neighborhoods and met marvelous families.

At the center of many of these neighborhoods—and at the center of the attention of the parents—was, not infrequently, a church or a synagogue and a religious school.

Most Americans, of course, send their children to public schools. Our public schools deserve our thanks and they desperately need our help.

That is why I have pledged aggressive leadership to bring more financial aid to public schools than they have ever received before.

And that is why I have pledged to release $15 billion in Federal funds for property tax relief to local neighborhoods. These funds came from local neighborhoods. They should go back to local neighborhoods.

Nine out of ten American students are in public schools. There's simply no question but that's where our highest priority lies.

But neither can we neglect the other one out of ten students who are not in public schools—but who are also citizens and children of America. In defending majorities, we cannot neglect minorities.

The importance of this minority number of children becomes strikingly visible when we recall that 83% of them are concentrated in key metropolitan areas.

In the twenty largest cities of this nation, two out of every five children are enrolled in parochial or religious oriented schools.

In Chicago, there are 410 elementary schools and 78 high schools in the parochial system, serving over 260,000 students or 27% of all students in Chicago. The total investment in the Chicago parochial school system approaches $100 million annually.

One out of every four students in New York City is in a Catholic school. In some cities in New York State, 50% of all students are in parochial schools. In Philadelphia and Buffalo the figure is 33%. In Boston, Cincinnati, and New Orleans, it is 27%.

We cannot abandon the children in these schools. We cannot allow the inflation caused by the present administration's mismanagement of the economy to become a coercive force, depriving parents of a constitutional right.

If the cost of sending children to these schools goes up exorbitantly, as it has been going up, parents are in effect coerced into withdrawing them—coerced indirectly into sending their children to public schools.

I believe deeply in the values of diversity in American life, especially in education. For education is not merely a matter of skills in reading and computation—not merely a matter of technical skills.

Education is a matter of moral vision. Education forms the character, the imagination, the sensibility. And in these things, America desperately needs diversity.

Moral vision is not acquired in the classroom merely. It is acquired in the home, from one's relatives, from one's friends, from one's neighbors.

Moral vision springs from a whole culture—it is embedded, even, in a language. That is why Polish schools sacrificed for so long to keep Polish alive. That is why Spanish-speaking families are demanding, quite properly, that part of the education of their children be in Spanish. That is why Jewish day schools teach not only Jewish traditions but the ancient, beautiful language of Israel.

Parochial schools are chiefly cultural agencies. They are thoroughly American—but they are especially American in keeping alive America's diversity. They help to supply the pluribus in our nation's motto, E Pluribus Unum, "out of many, one."

That is why, in many towns and cities of America, sometimes even in small communities like Glen Cove, Long Island, there is not one Catholic school but two or three: one Italian Catholic, one Polish Catholic, one Irish Catholic.

As David Riesman and Christopher Jencks write in The Academic Revolution, the contribution of these diverse Catholic schools in nourishing generations of immigrants, of many tongues and many cultures—and at the same time forging from this rich diversity a truly astonishing American unity—is an achievement not yet fully studied or praised.

Nor have our official histories of education appreciated fully yet the growing contribution of Jewish day schools around this nation; nor the contribution of the Lutheran grammer schools, high schools, and colleges, especially in the middle west—or the colleges of the Methodists, Presbyterians, Congregationalists or others—or the splendid Episcopal schools in many cities.

Only in reflecting on the cultural richness of the full range of such schools do we come to realize what would be lost in losing them.

But there is more to this issue. In many of our cities, church or synagogue with adjacent school are centers of cultural continuity for entire neighborhoods. Often, gathered around their house of worship and proud of their local schools, American citizens of varied cultures establish their own identity and nourish the values dear to them. They live, quite voluntarily, in the midst of relatives and friends. They resist the flight to the suburbs. Their parochial schools are, with the nearby public schools, vital sources of stability, continuity and civic loyalty.

Moreover, the Catholic schools in particular have an impressive record in serving the needy children of our metropolitan areas.

In Chicago, the Archdiocese spends from $3–4 million annually subsidizing children in schools that are not self-supporting. The Archdiocese provides scholarships to 150,000 high school students.

The parochial schools in Chicago also serve 25,000 black and 10,000 Spanish surnamed children. And the Archdiocese, under federal contract, administers the largest privately run Head Start program in the coun-

try, as well as a Neighborhood Youth Corps programs for needy youngsters.

In New York City, there are 300,000 children in parochial schools. 87% of the parents of these children earn less than $10,000 per year. One third of these earn less than $5,000. One in ten of these parents lives below the poverty level.

More than sixty percent of the parochial elementary school students in Manhattan are Black or Spanish-speaking; in the Bronx, the number is 30%.

As Terence Cardinal Cook has recently pointed out, the Catholic schools are not "exclusive private schools." He added: "It is not now, and never will be, the policy of the Catholic schools of America to create havens for segregation of any kind and our adherence to the civil rights requirements stems from the conviction of moral principles and not just from legal necessity."

The record of Catholic schools, in the North and in the South, has been, in respect to integration and civil rights, most impressive. In Alabama, the Catholic Church has been sued for refusing admission to white students where there was cause to believe the reason for admission was flight from integration.

The Civil Rights Commission, ably chaired by the Reverend Theodore M. Hesburg, has been vigilant in monitoring the integration of non-public schools. In 1967, the Civil Rights Commission developed criteria for distinguishing genuinely religious non-public schools from spurious "segregated academies."

The courts, particularly in *Green* vs. *Connally* and *Greer* vs. *Kennedy*, have followed these criteria. The Internal Revenue Service has the clear authority and duty to reject the claims of "seregated academies" to tax-exempt status.

Sadly, the Nixon Administration has been deficient in enforcing these clear laws and precedents, and has thereby injured the otherwise solid record of the vast majority of parochial and bona fide non-public schools.

To my mind, the enforcement of these laws and precedents is of maximum importance. This must be clear: I support aid to parochial and other bona fide private schools. I will never support the use of federal aid to advance segregation or any other affront to civil rights, through schools or otherwise.

As President, I would demand that the Department of Health, Education, and Welfare, as well as the Internal Revenue Service, use their powers to the full to ensure that no "segregated academy," South or North, receives any form of federal assistance.

Parochial school enrollments are concentrated in eight states—New York, Pennsylvania, Illinois, California, Ohio, New Jersey, Michigan and Massachusetts—and within those states enrollments are especially heavy in major cities. These are states and cities where both the general treasuries and the individual taxpayers are being taxed to the limit.

It is essential to good government and justice that tax relief be brought in a constitutional way to both the general treasuries and the parents of children in parochial and other bona fide private schools.

As we are moving to strengthen the nation's public school system, we can and must move to assist parents and children participating in parochial and other bona fide non-public schools which have historically complemented the public system. I firmly believe we move to strengthen both without weakening one or the other—that we can afford to help all our chidlren without sacrificing the needs of any of our children.

We can especially afford to do this in the context of a healthy and vital economy, operating at the full employment level, and producing increased revenues through a fair and equitable system of taxation.

I have said previously that I was exploring the means by which the federal government can help achieve the goal of further aiding the parents and children participating in parochial and other bona fide non-public schools either directly or through the tax structure. I have also said that I was convinced that a way should be found to provide such aid within the framework of the Constitution.

The Supreme Court in finding that parochial and other bona fide non-public school students are entitled to the use of public school textbooks stated: "Private education has played and is playing a significant and valuable role in raising national levels of knowledge, competence and experience . . . Considering this attitude, the continued willingness to rely on private school systems strongly suggests that wide segment of informed opinion, legislative and otherwise, has found that these schools do an acceptable job of providing secular education to their students."

I share this position of the court. And there is reason to believe that further aid to the parents and children participating in parochial and other bona fide non-public schools will be upheld by the court.

On that basis, I am today announcing my support of the tax credit approach to aid the parents and children attending parochial and other bona fide non-public schools.

I am writing Wilbur Mills, Chairman of the House Committee on Ways and Means, that I full endorse the principle of tax credits which is currently being considered before his committee, and that I hope the committee, will find it possible to report legislation to the floor of the House for consideration before this session of Congress ends.

I am also informing Senator Russell Long, Chairman of the Senate Finance Committee, of my support for tax credit legislation and requesting that he call Finance Committee hearings on such proposals at the earliest possible moment.

Tax credits of the magnitude proposed by Congressman Mills and other Democrats, including Congressmen Pucinski and Rostenkowski, can provide significant financial relief to hard-pressed parents but by no means cover the full cost of the education of a child in parochial and other bona fide non-public schools.

And, that is as it should be. For the parents and the educators of children in parochial and other bona fide non-public schools are not seeking a total federal subsidy. They are only asking for a fair shake, for the chance to continue providing this kind of education for the children at a personal cost they can afford.

Tax credits, of course, will only directly assist parents who are taxpayers. They do not directly assist parents with children in other than public schools who do not pay taxes.

For those parents, I believe tax credits will provide an important form of indirect assistance by permitting the parochial and other private schools to continue to provide, and perhaps even increase, the substantial subsidies that are now provided to children whose parents cannot afford to pay for the cost of their education.

Additionally, I believe further assistance to those children can be provided through such legislation as has been offered in the Senate by Senators Mondale and Stevenson to broaden and improve the provision of services, materials, equipment and facilities through the Elementary-Secondary Education Act.

The need for improved services to poor children in inner-city public schools has long been urgent. The need of equally poor children in inner-city parochial schools is equally urgent.

Major federal benefits to parochial and other bona fide non-public schools flow from Titles I, II and III of the Elementary and Secondary Education Act, and the National School Lunch Program.

ESEA was the first significant federal program for elementary and secondary education, including parochial schools. It was designed and passed by a Democratic Congress under the leadership of a Democratic Administration.

The other major program assisting parochial and other bona fide private schools is the National School Lunch Program. As Chairman of the Senate Select Committee on Nutrition and Human Needs, I was personally involved, along with Congressman Pucinski, in passing amendments to the School Lunch Act in 1970 permitting parochial schools to increase their participation in this vital nutrition program.

A major school lunch program in parochial schools operating this legislation is in Chicago under the personal leadership of Cardinal John Patrick Cody and Superintendent of Parochial Schools, Father Robert Clark. Last year, 15,000 youngsters received lunches in Chicago parochial schools, this year the number will rise to 30,000 and, eventually 65,000.

In recent years, however, federal benefits have not kept pace with the needs of parochial and other bona fide private schools. The record under the current administration has been to reduce the level of services by these programs.

Administration budgets for the past four years have kept the funding at the previous year's level which actually results, because of inflationary pressures, in reduced services. The President actually vetoed, along with other educational funds, Title II of ESEA which provides the most equitable benefits, in the form of library services to parochial schools. We also attempted to eliminate funding for the program when the legislation was repassed but under vigorous pressure from the Catholic community and Democrats in Congress, finally agreed to funding the program at a 50% level.

Fifty percent, a half-hearted effort, isn't good enough for education in America. A McGovern-Shriver Administration will do better than that.

If we can now move, as one nation, to meet the educational needs of all our children, in public, parochial and other bona fide private schools then we will have taken another step in the direction of fulfilling the genuine hopes of the framers of our Constitution in their desire to encourage the diversity of intellectual, cultural and religious belief which has contributed so much to America's greatness.

Mr. MOYNIHAN. Mr. President, again there is a consistent, coherent sequence from Senator RIBICOFF to Senator Humphrey to Senator MCGOVERN in 1972, and finally to President Jimmy Carter as a candidate for President in 1976. It is a statement on the matter put it perhaps less explicitly—I will not argue that—but still with a clear intention of doing something very similar to that which we propose:

I am firmly committed to finding constitutionally acceptable methods of providing aid to parents whose children attend parochial schools. I am firmly committed to seeing that children attending parochial schools benefit fully from Federal education programs.

Mr. President, I ask unanimous consent that the Carter statement be printed in the RECORD.

There being no objection, the state-

ment was ordered to be printed in the RECORD, as follows:

FOR AMERICA'S THIRD CENTURY, WHY NOT OUR BEST?

On the occasion of the fall meeting of the Chief Administrators of Catholic Education I send sincere good wishes.

Throughout our nation's history, Catholic Educational Institutions have played a significant and positive role in the education of our children. Millions of Americans of every income level, race, background and region have reaped the benefits. Indeed, in many areas of the country parochial schools provide the best education available. Recognition of these facts must be part and parcel of the consciousness of any American President.

Therefore, I am firmly committed to finding constitutionally acceptable methods of providing aid to parents whose children attend parochial schools. I am firmly committed to seeing that children attending parochial schools benefit fully from federal education programs.

During my years as Governor I supported, and the voters authorized, annual grants for students attending non-public colleges. We must develop similar supportive programs at the national level for non-public elementary and secondary schools if we are to maintain a healthy diversity of educational opportunity for all our children.

My personal commitment to education is reflected in my career as a public official. My first public office was the Chairmanship of a local school board. As a State Senator, I successfully sponsored the first overhaul of education financing in Georgia, and during my term as Governor a second, even broader reform in education financing was successfully completed.

As President, I will remain committed to quality education for all our citizens.

As President, I would create a separate department of education, the result of which would be a strong voice for education at the federal level.

As President, I would make sure that the interests and concerns of non-public education are represented in all government education agencies and commissions. Personnel sensitive to the interests and concerns of private and parochial institutions would be appointed to positions within my administration.

The right of millions of Americans to choose a religious education for their children lies at the core of America's diversity and strength. It is a right we dare not lose.

Mr. HODGES. Will the Senator yield for a question?

Mr. MOYNIHAN. I am happy to yield for a question.

Mr. HODGES. Does the Senator happen to know whether or not the Attorney General has declared his opinion, by the Office of the Attorney General, as to the constitutionality of the approach the Senator is taking?

Mr. MOYNIHAN. I do. Although I would like to discuss it a little later on, I will do so briefly now.

The Assistant Attorney General, Office of Legal Counsel, in the present administration, has offered a judgment that the present legislation does not meet the Nyquist test. His immediate predecessor, Prof. Antonin Scalia, now at the University of Chicago Law School——

Mr. HODGES. Was he an employee under President Carter?

Mr. MOYNIHAN. The Senator will have to try to let me answer him.

His immediate predecessor has provided a statement of just the opposite judgment.

It will be argued by us, in the clearest way, that it would take an impenetrable prejudice on the issue not to accept the fact that competent legal opinion is divided on this matter, and that if it is ever to be resolved—the Supreme Court does not issue advisory opinions—it will have to be put to the court.

That is precisely why this measure provides for it to go directly to the court and precisely why we would say that if anyone feels that this legislation would not meet a Federal court's scrutiny, then what fear have they? That scrutiny will be forthcoming within a half year, and the matter will be resolved.

Mr. HODGES. May I distill from the Senator's remarks that the answer to my question is that the President has been advised by his legal counsel that the bill proposed by the Senator from New York is unconstitutional?

Mr. MOYNIHAN. That is correct.

Mr. HODGES. So that he has not violated the pledge he made.

I thank the Senator.

Mr. MOYNIHAN. The President obtained that judgment well in the aftermath of having rejected this proposal. Ours would be a more difficult case with respect to that pledge of Jimmy Carter if he had been so informed before he rejected this proposal. This would not be the first time a President found that an Assistant Attorney General chose to agree with him.

Mr. PACKWOOD. Mr. President, will the Senator yield for a moment?

Mr. MOYNIHAN. I yield.

Mr. PACKWOOD. In fairness, I believe the answer to the question of the Senator from Arkansas is, "No." Will the Senator from Arkansas repeat the question, so that I can be sure?

Mr. HODGES. The question I had propounded was this: Had the President received advice from his legal counsel, the Attorney General, as to whether or not this bill was constitutional or unconstitutional?

Mr. PACKWOOD. The answer to that is, "No," he has not.

This bill, in its entirety, applies to primary, secondary, vocational, higher education—in its entirety.

The question asked of the Attorney General in a letter from Joe Califano is as follows:

I am writing to request your opinion regarding the constitutionality of the Packwood-Moynihan bill on the assumption that the bill applies only to elementary and secondary education.

The answer is no, he has not been advised that the bill we are considering is constitutional.

Mr. HODGES. That portion of the bill.

Mr. MOYNIHAN. I am happy the Senator from Oregon made that point, since it is an essential element of the Nyquist test that the particular form of aid is crucial, and that one of the questions asked is how large a proportion of a given program goes to this sector or to that sector. If you wish to present an attorney with a question to which he most likely would give you the answer you desire, you would phrase it exactly the way it was phrased by Mr. Califano. If not, you would not.

Let us address ourselves to that point in due course, for this is not an opening statement. This is an extended expression of gratitude to the Senator from Connecticut. In that man, you see the embodiment of the integrity of the Democratic Party on this issue. He was, as I said, the first member of our party to assume responsibilities in the field of education at a national level.

It was he who provided insistent and adamant opposition to the de facto and de jure segregation of schools based on race in many parts of this country. It is he who said that there must be a commitment at the national level to providing aid to elementary and secondary schools.

It is he who said the time has come to put behind us the fears of the 19th century, to put behind us the alarms that were characteristic of that time but are scarcely credible to a modern sensibility; to put behind us the fear of race; to put behind us the fear of a national government intruding in some objectionable way; to put behind us the fear of religious division.

All those commitments were symbolized in the election of President Kennedy, whom he served so well; and two of them were brought profoundly to fruition in his time at HEW or immediately thereafter.

Now there is the third item on the agenda of the Democratic Party, a commitment of honor and prudence and patriotism—if I may use that term—to be kept.

So I ask the Senator from Connecticut if he will forgive what is perhaps too extended a statement and perhaps, on occasion, even an overly extravagant one. But I would have to be very extravagant indeed to express the level of regard I truly hold for him. I cannot imagine it being too much so, because it is as near limitless as it can possibly be.

Mr. RIBICOFF. Mr. President, I am embarrassed by the lavishness of the praise expressed by the Senator from New York, but I confess that I rather like it. [Laughter.]

I do thank the distinguished Senator from New York for his kind and gracious comments. I do not deserve such abundant praise.

As I said in the beginning, the force behind this bill has been the extremely hard work, the commitment, and the responsibility of the Senator from New York, the Senator from Oregon (Mr. PACKWOOD), and the Senator from Delaware (Mr. ROTH), who have worked closely together to bring this matter to the floor.

I do not know whether this bill will pass or fail, but I predict that what has been started here today in the U.S. Senate will come to fruition. There is no question but that if this bill does not pass, it will become one of the key issues in the 1980 Presidential campaign—and rightly so.

My feeling is that what has been started on this floor today will allow no evasion; that the candidates and the platforms of both major parties will tell the American people where they stand on this issue, clearly and precisely. So

the work that is being done here is most important.

Mr. President, I hope our colleagues will see it our way and will vote for this proposal by a sound majority. But if they do not, my prediction, again, is that in 1980 it will be a major part of the Presidential campaign of that year.

Mr. MOYNIHAN. Mr. President, I yield the floor.

Mr. PACKWOOD. Mr. President, I join in the accolades expressed for Senator RIBICOFF. I have served with him for 10 years; I have served with him on the Finance Committee for almost 6 years. He is a man of extraordinary courage, a man not unwilling to change his opinion when new facts present themselves.

I express my appreciation to Senator MOYNIHAN, when I have known closely only the last 2 years; but I have worked more closely with him on this bill than I ever have worked with any other Senator on any other subject. I also express my appreciation to Chester Finn, of his staff, who has been a godsend in this matter, and to Senator ROTH, with whom I have shared many issues and whom I have supported many times.

My guess is—I have not checked the record—that if one were to add up among the four of us all the votes on the so-called right and wrong records compiled by the National Education Association or compiled by any other association for higher education, cumulatively we would be close to 80 or 90 percent in support; and if one were to add up our votes on the right and wrong records of the various civil rights organizations, it would be 80 or 90 percent or more.

The four principal sponsors of this bill do not harbor a grudge against public education. We have supported it, and we will continue to support it. We have been in the forefront of support for every significant civil rights issue since we have been in Congress.

The debate we have started today already bodes well for this topic—not whether the bill passes or loses. Senator RIBICOFF has put it very well: It is a major, fundamental, specific issue that I think is going to be debated well on both sides here. The number of Senators we see on the floor already, the caliber of the discussion that already has started—all this indicates that this is going to be a debate of which the Senate can be proud, on all sides.

And before we are done or we vote, the philosophical issues represented by both sides will have been fully aired.

Mr. President, this bill is enormously important to millions of Americans who are struggling to educate themselves and their children. This debate will not focus on whether Americans need help. We can all agree that help is needed. The debate is rather: How to provide that help. The question is: What is the best way to encourage education? The answer is: Give the people the widest freedom of choice, the greatest number of options; and, perhaps, most important, the least Government interference.

This bill is a direct, effective measure, designed to respond to the problems of rapidly rising tuition costs. But its significance lies not just in the fact that it will be easier for millions of Americans to pay their tuition bills. The debate over this bill is rooted in a crucial question of philosophy.

The values by which a nation lives ultimately determine its survival. Those values must be nourished and encouraged in policy and practice. Education is a critical value in a free society and the survival of a strong educational system depends upon the vitality and diversity of that system. This bill is based on a political philosophy that individual decisions about individual educational needs are best made by individuals. The Tuition Tax Relief Act of 1978 is enabling legislation to help individuals make these choices. Freedom of choice is valueless without the financial means to exercise that choice.

We cannot put a price tag on what education has meant in our history or what it means in the life of even one citizen. We can cite tangible economic benefits to the individual.

We can cite hopes for a better life. We can point to understanding and knowledge, and we can say education brings individuals to fulfilling the dreams that they hold for themselves and their children. This legislation will help Americans keep those dreams, not on the Government's terms, but on their own terms through their individual, independent efforts.

Pluralism is a profound and fundamental fact of the American experience. Up until now, pluralism has been more than mere happenstance, more than a condition in which we find ourselves and tolerate as one might a spell of bad weather. Until recently, pluralism was considered our strength—it was celebrated. Whether that still applies is in doubt. Educational pluralism, at least, is in danger. Rising costs limit choice. Parents are less free, not by law, but by condition of inflation and cost, to choose for their children the education they think is best. Congress is now being called upon to provide the remedy. The Tuition Tax Relief Act of 1978 is not merely tax relief or tax reform, important as that is. Nor is it merely another educational aid program, as if to see one were to see them all.

This legislation preserves the element of choice, specifically educational choice and specifically the maintenance of educational pluralism.

I believe we will ultimately win the philosophial battle because the American people support us. They truly understand what is at stake here.

Some of the talk in the Senate will be about dollars and cents, and I think recent changes in the bill have met the cost objections. Our bill is comparable in costs to the administration's alternative.

Others will talk here of constitutionality. That determination must ultimately be made by the courts, not by the Senate. I am confident that we can meet and have met the constitutional objections.

What we must finally decide is what role Government can best play in improving our schools and helping our citizens get an education. The days of Government monopoly are running out. That is what the people want and that is what we must give them.

Mr. President, I ask unanimous consent that Sven Greening, of the Human Resources Committee staff, be accorded the privilege of the floor during the pendency of debate and votes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that Mike Smith be granted the privilege of the floor during consideration of this bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, prior to any opening statement, I would not want my silence to be interpreted. The tone of your voice has already been interpreted, and the proponents of the particular measure already find suspicion and something sinister and occult, so I actually would be afraid to sit quiet while we join in the praise for Senator RIBICOFF.

Perhaps the reason that we are sinister and occult is that every trick in the book has been employed.

Mr. MOYNIHAN. Mr. President, will the Senator yield for a question?

Mr. HOLLINGS. Can I get one thought completed? I mean the Senator had about an hour, and I want to praise ABE. I love him. I have known him perhaps longer than both of the speakers and have worked with him, and if I can complete that thought—let me yield for the question.

Mr. MOYNIHAN. Does the Senator recall the observation being made that there was actually something sinister and occult or that the impression seemed to be that there was something sinister and occult? How does he remember that statement?

Mr. HOLLINGS. I have not been to Harvard and it is hard for me to make these differentiations. I will tell the Senator we are going to have a tough 2 or 3 days around this Chamber. I can tell him that right now, if we are going to start with what seems to be and what was or has been in past tense.

But be that as it may, when you come in and you start with the opening argument or trump card, the distinguished senior Senator from Connecticut, the former Secretary of HEW, and then say he is the integrity on this issue, he just about gave all the rest of us Senators lockjaw. I am not going to argue that. He is of integrity and he has been a leader and is a leader.

Senator RIBICOFF and I served as Governors together when President Eisenhower—can the Senator imagine being appointed by a Republican? I guess he can.

Well, we were appointed by President Eisenhower to the Intergovernmental Relations Advisory Commission when two Governors would be selected. It was Senator RIBICOFF and myself who were the two Governors chosen by President Eisenhower, and we met in those days, not just as Governors but as Commission members. When I tried to institute a technical training program in South Carolina, the distinguished Governor

Ribicoff invited me to come and study his in Connecticut, and I know of no better way to compliment a man than to plagiarize him. We emulated in large measure the successful technical training program that Senator RIBICOFF had instituted and had in being in his great State.

And, of course, it has been one of the real pleasures to work in the vineyards with him on various scores.

I do not think by way of accuracy that we want to allude to educational leadership in the years 1961–62—we can argue about various points as we move along, because I think the definite emphasis given by President John F. Kennedy was in pursuance of his because if we are going to talk about Presidential candidate Humphrey, Presidential candidate MCGOVERN, let us talk about one who was elected on a platform, John F. Kennedy:

I believe in an America where the separation of Church and State is absolute; where no Catholic prelate will tell the President, should he be Catholic, how to act and no Protestant minister will tell his parishioners for whom to vote; where no Church or Church school is granted any public funds or political preference; where no man is denied public office merely because his religion differs from the President who might appoint him or the people who might elect him.

Let us go back to those days because I was talking to one of the gentlemen about a little help on this particular score, and he said:

Fritz, you don't understand.

I said:

What do you mean?

He said:

As a presidential candidate, the first place you start is in New Hampshire. You do not want to strike out before you get a good start, since you do not know the State too well or anything else. But you get into a quick situation in the initial State—New Hampshire—with the first primary up there. One of the first things they will ask you about is your position on aid to parochial schools, and since you do not have Supreme Court constitutional lawyers running around on the campaign staff, and you do not want to strike out in the very first try, and you commit to it.

He said:

Unfortunately, my hands are tied on that issue in this particular State.

I go back to President Kennedy's campaign. This particular address by our great John Fitzgerald Kennedy was run in my State over and over and over again, Senator. I can tell you here and now we carried South Carolina by 8,000 votes. Why? Because of this statement. There is no doubt in my mind. We had all the racial prejudice. When we are going to begin now the particular debate by crowning statements, then I will join in the crowning, as I say, in all sincerity to the distinguished senior Senator from Connecticut (Mr. RIBICOFF), but if we are going to begin the debate on the meaning of statements and significance and talk about religious prejudice, talk about integrity on this particular issue, there was not any question about Jack Kennedy's integrity on this issue. He meant it.

He bearded the lion in his den. He went down to the Baptist convention in Houston, Tex., and he said:

I am tired of nasty rumors, vilification and acrimony which is breaking America apart in one of its great fundamentals, and if you want to know how I stand on this particular fundamental issue, here I stand, and here is my position.

He took this position. It was a half-hour program produced in the early TV days then, and we found that if we could possibly overcome this kind of prejudice in my own State and in my own section, then our candidate, Jack Kennedy, had a chance.

We ended up not by getting out the vote and not by getting car pools and telephone banks and all the other paraphernalia and signs and everything else, but every red cent I could get I took and put this half-hour program on TV, and we bicycled the tape from Greenville to Spartanburg, to Columbia, back to Greenville, back to Charleston, over and over again.

I am confident if you look at the record in 1961 and 1962, that period of a thousand days, you will see a loyalty to this particular belief.

(Mr. RIEGLE assumed the chair.)

Mr. HOLLINGS. When we are talking about integrity on this particular score, and the people, distinguished Senator from Oregon. as we are talking about the people, the best and most informative and the most recent and authoritative measure of the people—because we as Senators love it, oh, we love it, and we get up and say "The people, I am here for the people," well, we are all for the people. But the best objective, impartial measure I know is a Roper survey of last week. The people of America, 64 percent, by over 2 to 1 opposed tuition tax credits.

The Catholics, when asked this particular question about tuition tax credits, came out 48 to 43, 43 percent of those Catholics interviewed said, "Yes, we understand all of what is being said and what is being stated for the parochial schools of America. We need that relief and we need that assistance, and we would desire tuition tax credit."

But 48 percent, by jove, the majority of the Catholics interviewed said, "No, it is not good for our schools. The primary mission of the parochial school is the tenets, principles and edicts and integrity," if we are going to use that word, "of our church." That is why those schools are there. "We do not want that fettered, we do not want that entangled, we do not want that involved. We oppose tuition tax credits for elementary and secondary parochial schools in America."

I think, Mr. President, we should appreciate a little bit of what my distinguished colleague calls a fair reading of history, because in all candor I had hoped that the informative committee, namely, Human Resources, would have come forward on this particular score. After all—I do not serve on the Human Resources Committee nor do our colleagues proposing this—all the educational measures that have come down the line have come through the Education Subcommittee where they are staffed and where talent exists and where they are given a fair hearing in the light of a fair reading of history, particularly legislative history.

But when my distinguished friend from New York referred in his graduation speech, his Harper's article, his Outlook article, and many of the others, about a fair reading of history, I said:

Look, there is no way that I could ever match this distinguished educator. He has been in education for many, many years. But I ought to have some cursory knowledge of where we were, from whence we came, and where we are headed.

Yes, if you want to take the first amendment ipso facto as of its adoption by the original Colonies and the Constitution you cannot obtain a categorical finding of prohibitions in the amendment. Other than the establishment of a church and the support of any church is forbidden and a further reading, of course, indicates that any kind of religious test for public office—down the line—is prohibited. Various actions taken from the very beginning days when, yes, we had a state church, the original 13 Colonies all had their own churches and education in those days was church schools, but if you come right on down into Jefferson, the Constitutional Convention, the Bill of Rights, and, particularly, Madison and Jefferson, and the bill for religious liberty, our distinguished friend quoted Jefferson. I want to make this quote from Mr. Jefferson:

To compel a man to furnish contributions for the propagation of opinions which he disbelieves and abhors, it is sinful and tyrannical and it is also wrong to force him to support this or that teacher of his own religious persuasion—a wall of separation of church and state was intended.

Now, there is nothing antireligious in that particular pronouncement by Jefferson, and certainly nothing antireligious in my comments. I have the greatest respect and reverence for the Catholic Church and all churches. I have served on a national church board—board of adjudication. I have tried to do a little work. I am not the best church worker. But the fact of the matter is I have served on the boards of a Catholic hospital, and worked very intimately with them, and if someone wanted to go even further—I do not want to go to personal reference—but I find the best service, if you want to understand it and know it, the best Sunday morning service that I know is given by Father English at Trinity Catholic Church. I have been there the last three Sundays, been going there for several years, and I get a better Sunday school lesson out of this priest than any I know, and I have seen the best of all of them. He is just magnificent. So I do not want anybody running around as if they are trying to interpret what is sinister or occult or what is suspicious, any comments that we might make about church and state, as being anti any particular religion.

It is just that wall, that wall that Judge Powell found, if I can find the de-

cision. Well, it was not Judge Powell. In the Everson case, in 1947. It was Justice Black. If I can find the particular citation, in the Everson case, it has been followed down the years. It is beautiful language, if I can get the exact language.

Let me go a little bit further on the founding days, on the issue of religious liberty. Before ratifying the Constitution, North Carolina said, "Unless you have religious liberty there, that wall, we are not going to ratify the Constitution."

Throughout the 1800's, there was much activity with respect to State support of parochial and private schools. The distinguished Senator from New York is eminently correct; but the intent of Congress, the policy of this country, has jelled down into a constitutional principle and finding.

Let us go to the congressional findings as the States were coming in. We started right at the late 1700's, with the Northwest Ordinance. At that particular time, when we divided up the territories in the Midwest and Northwest, as they called it at that time, into 6 mile by 6 mile sections, they held the middle block, block 16, for free public education. As every State came in—we are all going to argue here, perhaps, shortly, about Alaska and its lands, and 100 million or so acres, and whether that is too much or too little for public purposes.

But do you know that by congressional policy, over the last 150 to 200 years, Congress gave—not the original colonies, not Connecticut, New York, and Rhode Island, no gift of land there for public education—but Congress gave land and required, mandated, that when a State was admitted into this Union, and that the State have in its State constitution a provision for free public education. In order to carry that out, they said to Montana, "Here are the education lands for your particular State."

We gave out over 147 million acres in lands for free public education as a matter of congressional policy.

We said to Hawaii and Senator INOUYE, we said to Alaska and Senator Gruening and Senator BARTLETT, "Before your territory comes in as a State, you must have this in your Constitution."

So there was no question about how the people felt about free public education, coming right on down to the early 1940's, and then the 1950's, and I would think the high point was reached when the three parties now, the Senator from Connecticut, the Senator from New York, and myself were campaigning for our hero, Jack Kennedy, because that was a real national debate on separation of church and State, and on whether or not there was going to be Federal assistance for parochial schools in America.

Mr. PACKWOOD. Mr. President, will the Senator yield for a question?

Mr. HOLLINGS. Yes.

Mr. PACKWOOD. I have lost a little bit of the thread of your emphasis. Are you saying that the founders of this country, our constitutional fathers, intended that public funds should not support church primary and secondary schools?

Mr. HOLLINGS. There was a mix, Senator. I will get back to that farther on down. There was a mix. As pointed out in referring to the Moynihan article, there were places where churches continued to receive certain assistance, and they continued to receive some up until the early 1950's.

Mr. PACKWOOD. But what——

Mr. HOLLINGS. I want to complete this thought. What is acknowledged to be, by the Senator from Oregon and the Senator from New York—here is the bill, H.R. 12050. Now, read this committee amendment, if you please. We will have a good bit to say on how that came about.

Now I will read what the committee found, when they put it out last year, when they introduced it, and it was discussed and debated in editorials, magazine articles, and everything else like that. Here is my point, Senator. Here is my point:

> The Congress further finds that the provision of such assistance in this manner fully complies with all provisions of the Constitution; that it does not constitute excessive governmental entanglement with religion; that is wholly secular in purpose and that such assistance will neither advance nor hinder religion.

Well, now, under the Lemon against Kurtzman decision, as lawyers we know this is false. Right here, the three-part test of Lemon asks, No. 1, is it secular in intent? They now write it in, and say, "Yes, that is our intent."

Does it advance or inhibit religion? That is the second part. They say, "Yes, that is what it does, it does neither." So they say that.

Finally then, does it involve governmental entanglement in religion? And they say, "No, we have looked at that, and it does not. It does not constitute excessive Government entanglement."

So we have, finally, the proponents and the opponents on a common ground. They are writing in this bill constitutional findings.

Now, that does not mean anything. I never heard of trying to be the judge, I mean right here, writing as the last paragraph in any bill, "This bill is found to be constitutional by Congress." I would hope that would sort of be in everyone's mind in connection with every bill, indirectly assumed, that we are not passing an unconstitutional bill.

But they knew what the test was, and they know today, and they are trying to go back on that history, and use the court decisions. They have tried to follow that Nyquist decision, and they have tried to follow that Wolman decision, and we have to discuss that in depth, and we will get to that, so there will be no doubt about it.

But there is no doubt in the proponents' minds about the findings that they intend for Congress and its policy. It is word for word down the court's decision.

I have just talked with some associates about that. This means—I hesitate to say that it means nothing—but it irritates the court for Congress to try to assume its duties and responsibilities; and the court would probably lean in the other direction if they were trying to get a decision as an assist or a boost for a constitutional finding, should it be passed. It has the opposite effect, because justices resist the idea of taking their decisions and congressionally saying all those things when the facts do not support it.

Why do not the facts support it? They know, I know, and the Senator from Connecticut should know that the private schools primarily benefit, at the elementary and secondary level under this particular measure, religiously affiliated schools; 85 percent of the students attend church schools, 75 percent of them Catholic, of the Catholic faith, and another 10 percent from various Baptist, Lutheran, Episcopalian, Jewish schools, and many others. So all the religious schools are listed. When the principal effect is to further the establishment of religion, as they say in Nyquist, then when you measure it you cannot go about it in an obscure fashion and try to give the aid to the parents rather than directly to the schools. We are not going to just look at the machinations of Congress and how they did this.

We are going to look at its effect with respect to constitutionality. If the principal effect is upon religion, and it is since 85 percent of the students enrolled in elementary and secondary schools are enrolled in religious schools, primarily organized for religious tenets, then that is religion, in effect. It does aid religion or the schools. Additionally, they may find out it may inhibit them because with this kind of a system comes certain kinds of controls. Either way you look upon it, it does have that effect. Then in order to audit it, when you look at the school records and everything, it is bound to involve entanglement.

There is no question but that this particular measure has been found unconstitutional, and I have no better authority, Mr. President, then the Senator from New York himself.

Let us look at last year. We did not find it in this particular measure, nor in the Finance Committee measure of last year, or the Finance Committee measure this year. We have a finding on the face of the bill this year.

He said on September 26, last fall, and I quote the distinguished Senator:

> Now, I would say to you that this bill is constitutional, by which I do not mean that I predict the court tomorrow would hold it so. I mean, instead, a fair reading of our Nation's history demonstrates that the first amendment was never meant, until recently never understood, to bar the sort of aid which we propose.

I understand the distinguished Senator's hope that this could be a watershed action on behalf of the Congress, and that the court could change its mind as in Plessy against Ferguson, that it was changed in the decision of Brown against the Board of Education, and that he would hope for that.

But there is no question now at this particular sitting. We cannot just ask the Senator from New York or the Senator from South Carolina, or any other Senator, as we have only one authority.

Mr. MOYNIHAN. Will the Senator yield for a question?

Mr. HOLLINGS. I yield.

Mr. MOYNIHAN. The Senator correctly read my statement of last fall, that although I would not predict that the Court would hold this one way or another, a fair reading of the history would support the view that it is constitutional.

The Senator from South Carolina referred to the experience following Plessy against Ferguson where for most of a century we lived under a constitutional finding which many people found odious and incorrect in its interpretation of the 14th amendment. It was a view which was finally confirmed by the Supreme Court—that Plessy against Ferguson is wrong.

During the long period in which the separate but equal doctrine was the law of the land, however, surely the Senator from South Carolina would not have felt that those persons who thought it wrong and unconstitutional should have remained silent. Surely he would have wished them to speak out and to test the case in the courts as, indeed, was done until the time the Court finally ruled, and it turned out that Plessy against Ferguson was indeed wrong.

Surely the Senator from South Carolina would think it an important aspect of responsible citizenship to provide the Court the opportunity to reverse itself when it is felt that the Court has ruled wrongly in the first place.

Mr. HOLLINGS. Mr. President, the Senator from South Carolina would observe, of course, that the same Court that found Plessy against Ferguson as unconstitutional and a new doctrine, separate but equal, was unconstitutional, has reaffirmed, and ensuing Courts have reaffirmed, and had the opportunity to do as the Senator indicated. Every ensuing Court, not only the Warren Court but the Court since that particular time, have had this proposed to them in every fashion and form.

In 1973, in the State of New York, they had a tuition tax credit going to the parent and not directly to the school and not directly to the church and everything else. They analvzed that case and they reaffirmed finding it unconstitutional in 1973. And the Wolman decision in 1977 reiterated, in Wolman against Walter, the point in June of last year. The Supreme Court reaffirmed it. So they have had the opportunity.

Mr. MOYNIHAN. Will the Senator yield for a brief question?

Mr. HOLLINGS. Yes.

Mr. MOYNIHAN. Is the Senator aware, as I am sure he is, that whatever my personal views might be as to the larger question, the position of the sponsors of this amendment, and the Committee on Finance, is that this legislation conforms to the test? That is our position. We are presenting a bill which we have drafted with the specific three point rule or standard of the court in mind—as best it can be understood—and we submit this bill to the Senate as one that conforms to existing rulings of the Supreme Court, as best they can be fathomed.

Mr. HOLLINGS. In responding to that, it takes me to another point which I want to cover more fully, if everyone will wait a moment. Did the Senator from Rhode Island want me to yield for just a moment?

Mr. PELL. I wanted about 5 minutes.

Mr. HOLLINGS. I will yield in a few minutes. The Senator from Arkansas will be presiding shortly and I want to give him the chance to make an opening statement.

Mr. HATCH. Will the Senator yield for a unanimous-consent request?

Mr. HOLLINGS. Yes.

Mr. HATCH. I ask unanimous consent that Ron Docksai and Kanyon Keeney, of my staff, be granted the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. At this point I should emphasize, Mr. President, the difficulty in this kind of an approach to legislation, and I elaborate that this kind of approach emphasizes that educational measures, 99 percent of the time, go to the Educational Committee, and judicial and constitutional questions, 99 percent of the time, go to the Judiciary Committee. What we have here is an outrage in that context in that the Education Committee has not reviewed this on the one hand, and certainly the Judiciary Committee has not had a chance to review this for constitutionality. In fact, it has been pointed out that a point of order could be in order, that they provide for a new judicial procedure of an expedited appeal to the Supreme Court.

Suffice it to say when you run across all other committee jurisdictions and come in the back door with the Finance Committee interest group with none of those responsibilities, and none of those particular staff members being steeped in these kind of things, I do not know in the Finance Committee any real constitutional authority on public education, quite frankly—when you come in that way you just run across everything. The Appropriations Committee had to take this measure and report it out unfavorably. It was turned down in the Appropriations Committee. It was turned down in the Budget Committee. I am confident that if it is put in the Judiciary Committee, the Subcommittee on Constitutionality, it will be turned down there.

Let me yield the floor at this point to the Senator from Rhode Island and the Senator from Arkansas.

The PRESIDING OFFICER. Does the Senator from Arkansas seek recognition?

Mr. HODGES. Yes; I had earlier sought recognition. I shall be very brief. I will not give a full opening statement. I know that the Senator from Rhode Island wishes to speak, and I know the Senator from Delaware wishes to speak.

Mr. ROTH. Will the Senator yield?

Mr. HODGES. For a question.

Mr. ROTH. I would like to ask the Senator from New York a question without the Senator from Arkansas losing his right to the floor.

Mr. HODGES. I yield for that purpose.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROTH. As a principal sponsor of the Roth-Moynihan-Packwood bill, I had hoped I would have the opportunity to make an opening statement prior to the beginning of the debate. I wonder at what time this is going to be possible?

Mr. MOYNIHAN. The Senator may find some difficulty locating that precise point when the opening statements conclude and the debate begins. There is a serpentine wall of separation which has never been fully established. The Senator from Arkansas wishes to make a brief statement, since he has to take the chair; the Senator from Rhode Island also has a brief statement—it seems to me we might agree, then, that the Senator from Delaware might speak thereafter. His would be the third opening statement on our side, the first two having been given by our colleagues, Mr. PACKWOOD and Mr. RIBICOFF. Whenever the time comes, I, too, shall speak. I am in no hurry at all to do that.

Is it agreeable that this be the sequence?

If that is agreeable, I should like to suggest we proceed on that basis.

Mr. HODGES. Mr. President, that is agreeable with me, that the Senator from Rhode Island have 5 minutes. Then, if it is agreeable to the Senator from Delaware, I might have 5 minutes. Then I shall yield to the Senator from Delaware.

Mr. STAFFORD. Mr. President, I should like to ask the manager of the bill: I have enough leisure so that I am in no hurry but if, at the end of the sequence the manager of the bill has mentioned and after the manager has had a chance to speak himself, if Senator MOYNIHAN would like to, I should like some time.

Mr. MOYNIHAN. If he would speak after the Senator from Delaware.

The PRESIDING OFFICER. So the Chair may be clear, is it the unanimous-consent request of the Senator from New York that, following the Senator from Arkansas, the Senator from Rhode Island be recognized, to be followed by the Senator from Delaware, then the Senator from Vermont? Is that the order?

Mr. MOYNIHAN. Yes.

Mr. HODGES. I should suggest, in changing that, that the Senator from Rhode Island has to leave at 12 o'clock to catch a plane. In deference to him, let him proceed first, then I might follow, then the Senator from Delaware and the Senator from Vermont.

Mr. MOYNIHAN. That is acceptable.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The Senator from Rhode Island is recognized.

Mr. PELL. Mr. President, I thank the Senator from Arkansas, very much, for extending that courtesy.

Mr. President, I have immense sympathy for the plight of middle-income families in meeting the cost of educating their children. At the same time, I believe strongly that parents should not be faced with a single system of education, but that a viable alternative or choice should be open to them if they desire to send their children to other than a public school. The question becomes what is the best way for the Federal Government to help parents meet the high costs of col-

lege and also maintain the viability of private education at the elementary and high school level.

My own view is that the best way to help parents educate their youngsters at the college level is embodied in S. 2539, the College Opportunity Act, which will be taken up immediately following this bill. S. 2539, which I have the honor of reporting out of the Education Subcommittee and the Human Resources Committee, would expand the basic educational opportunity grant program so that a family of four with an income of $25,000 and one child in college, would be eligible for a basic grant of $250. Currently, the cut off point for the program is approximately $13,000. Under S. 2539, families with incomes between $15,000 and $25,000 would become eligible for basic grants ranging from approximately $1,000 to $250.

This, I believe, is the correct approach. This approach would cost the taxpayers $1.2 billion, and would focus aid where it is needed the most—on middle-income families. Under S. 2539, 89 percent of the assistance it provides would go to families with incomes less than $25,000. Sixty-four percent of the benefits of this bill would go to families in the middle-income range of $15,000-$25,000. I think it is extremely important to point out that under the tax credit bill, 55 percent of the funds would go to families with incomes in excess of $25,000. At full funding, the higher education portion of the tax credit bill would cost over $2 billion. In other words, the tax credit bill would cost significantly more on the higher education level than S. 2539, and would give the largest share of its benefits to people with incomes in excess of $25,000.

I believe this is wrong. S. 2539 focuses its assistance on middle-income America which needs our help the most—not on rich America, at this point not on poor America, but on middle-income America. I think that is the correct approach.

I also have tremendous personal sympathy for helping youngsters in nonpublic schools. My own State of Rhode Island has, I believe, one of the highest percentages of parochial schools in the Nation. Specifically, about 12 percent of Rhode Island youngsters are attending parochial schools. When you add to that figure enrollments at other nonpublic schools in my State, approximately 15 percent of the elementary and secondary school population attend nonpublic schools.

However, again, I think the best way to help these schools is to increase the amount of Federal aid which the Government gives them through programs, and this is proposed under S. 1753, under the Elementary and Secondary Education Act, which may be taken up this following week, as I understand it.

I sponsored an increase in title XII of this bill, which amounts to a half billion dollars to the nonpublic schools, and we shall have an opportunity to vote on this bill very shortly. This, I believe, is the correct approach, as it would mean that direct aid would be given to private schools. That is, I believe, where it is needed.

I should also like to add that the tax credit approach under discussion today would give to each child at a private school $250, while the present law only subsidizes the education of a public school youngster by $128.

In other words, this bill would give double the amount of money to youngsters going to private schools that is presently going to youngsters attending public schools.

Mr. PACKWOOD. Will the Senator yield?

Mr. PELL. I should like to finish my statement before I do. Then I shall yield.

In other words, on a per capita basis, under a tax credit, the Federal Government would be contributing more to the education of a private school youngster than it would toward public school youngsters.

Because of these facts and because of the fact that we shall have other opportunities open to us in the next few days to help middle-income America and to help the nonpublic schools, I believe that, if S. 2539 and S. 1753 are passed. this would be the preferable approach. Then I should be inclined to vote against the tax-credit approach.

On the other hand, if it seems that the parliamentary situation is such that the bills that I have mentioned would not be passed, then one would be left with no alternative but to support the tax-credit approach. There is no question in my mind that middle-income America needs help, that the nonpublic schools need help. The question is how.

I like the bills that we reported from my Subcommittee on Education and believe that is the way to go. But if that is not the way to go, tax credits are the second-best route.

I believe that, also, the President has indicated that he will veto this bill. Then we shall be left, unless we pass the bills that are subsequently to be taken up, without any way of helping middle income America.

My hope is that my colleagues will glance through these words and see the opportunity that will arise within the week following to skin the cat a different way and to help resolve the problems with which we are faced.

Mr. PACKWOOD. Will the Senator yield for a question?

Mr. PELL. Yes.

Mr. PACKWOOD. The Senator made reference to $128 as the Federal expenditure for public school students. What is the source of that statement?

Mr. PELL. I am informed that these are the direct Federal aid programs. I believe these figures come from HEW.

Mr. PACKWOOD. Does the Senator count as an expenditure by the Federal Government the foregoing of the collection of taxes for a public purpose?

Mr. PELL. No.

Mr. PACKWOOD. He does not? That does not count as a public expenditure?

Mr. PELL. As I understand these figures, they are not included.

Mr. PACKWOOD. No, they are not included in that figure. I am asking if the Senator himself counts as an expenditure the Federal Government's foregoing the collection of revenues which in turn are used for a public purpose?

To put it more specifically, the Federal Government allows the deduction from the Federal income tax of real property taxes and State income taxes.

Mr. PELL. Right.

Mr. PACKWOOD. A fair proportion of those goes directly to the support of public education.

Mr. PELL. About a third.

Mr. PACKWOOD. Well, it depends on the State. It is a little more than that of property taxes. Would the Senator count that as a public expenditure for public education?

Mr. PELL. I had not, but it is a good argument and maybe should be counted.

Mr. PACKWOOD. Not only a good argument can be made, but I have heard member after member of the Budget Committee tell us, every time a bill comes here with a tax credit in it, that is an expenditure of public funds; the fact that it is not an appropriation should not obscure the fact that it is an expenditure of public funds.

Mr. PELL. Does the Senator for one moment think the local property taxes will be reduced as a result of this measure? I think he is optimistic.

Mr. PACKWOOD. No, but I am saying that if you count the deduction that is allowed for real property taxes and State income taxes and factor in only the proportion of those taxes that goes for the support of public education, the actual Federal expenditure for public school students, primary and secondary public school students, is $325 per pupil Federal support, as opposed to, if our bill passes, $268 for private schools.

Mr. MOYNIHAN. Will the Senator yield for a question?

Mr. PELL. Certainly.

Mr. MOYNIHAN. I precede my question with a brief statement of appreciation. As a sponsor of this legislation, I would like to thank him for his statement, which was open-minded and large-spirited.

There is not anyone who has carried forward the question of aid to students going to colleges and universities more effectively in this Congress than the senior Senator from Rhode Island. It is for good reason that they are known as Pell grants.

Mr. PELL. I thank the Senator.

Mr. MOYNIHAN. It is the Pell grants which have added so enormously to the culture of higher education in America, and they must be continued. This junior Senator will vote for them as long as he is on this floor.

The Senator raises the question of a spending ratio with respect to elementary and secondary. If there were a lesser ratio, would that seem appropriate? Is it the Senator's concern that somehow the public ought to have the primacy of the attention of public authorities? It is a persuasive argument to me; it is certainly understandable.

Mr. PELL. The thing that bothers me is going down the tax credit route. That is why I went down the direct grant route of title 12 in my bill.

The question of amount is not all that

significant. It is a question of whether we will open the door to tax credits.

Mr. MOYNIHAN. It is a legitimate and understandable concern.

I would like to say that even if we cannot always agree in this debate, the author of the Pell grants is deserving of the high regard and respect of every Member of this Chamber, as well as that of every parent in every low-income, middle-income, and upper-income family in this country, whose colleges and universities will be enriched by the opportunity for enlargement which he has brought about.

Mr. PELL. I thank the Senator very much, indeed.

Mr. HODGES addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas (Mr. HODGES) is recognized.

Mr. HODGES. Mr. President, I rise with considerable trepidation and trembling. I look at the four principal sponsors of this bill and they begin with the Senator from Connecticut, who was Secretary of HEW, a distinguished Senator, a national figure for many years; the Senator from New York, who has filled innumerable positions of honor; the Senator from Oregon, who they tell me any number of times is one of the most articulate men in the Senate, one of the most skilled debaters; and the Senator from Delaware, whose name is on the page of papers every day, it seems, with what I think are some very interesting and unique ideas.

I would like to remind the Senate, in the face of that, and also in that the discussion this morning of continuously mentioned President Kennedy and the sponsors' long association with him, and with just one name dropped after another, that 8 months ago I was in Newport, Ark., a town of 8,000, practicing law, and my big day was in municipal court.

So, it is a long way from there to here. It is a rather frightening thought to be a symbol over against heavyweights like that.

It was Shakespeare who said that: "A good cause makes a strong arm, and God befriend us as our cause is just."

As this debate proceeds, I do not think the bill before us will stand the light of day. I think it is an academic hothouse plant, and that once it is looked at by anyone, it will wilt.

It is not the intentions of the bill which I question and not the problems which it is intended to address, because the problems are real and need to be addressed. But I suggest to this body that what is in this bill is a revolutionary idea and we should make no mistake about that. It is to knock a substantial hole in the wall of separation between church and state.

I am a country lawyer, but I can read a case. Anyone that reads Nyquist can reach only one conclusion, and that is that this bill is unconstitutional. There is no other conclusion to reach.

Senator MOYNIHAN relies on a professor from the University of Chicago Law School, who essentially said this:

> Perhaps we should not focus on what the law is, but what the law ought to be.

Senator MOYNIHAN suggests the same thing. Senator MOYNIHAN is no lawyer, but he would make an excellent criminal lawyer because a rule of thumb among criminal lawyers is that if we have the facts on our side, we argue the facts; if we have the law on our side, we argue the law; if we have neither, try the police officer.

Senator MOYNIHAN is trying the court. That is a perfectly acceptable approach. He is agile enough so that if we are not very careful, particularly those of us who do not have the background he does or those of us not as skilled in speaking, he will run it right by us.

But I suggest we are going to look at it closely. We will look at Nyquist and we will look at this bill. Then the conclusion of unconstitutionality will be unassailable and there is not a single constitutional scholar that will tell us anything other than that.

I have read very carefully, and we will go into it at length, the testimony before their committee. But I want to mention just one or two other things in this opening statement.

I think this bill needs to be looked at, not only closely, but in terms of the direction it which this country should go.

The sponsors have laid before us some editorials and those editorials indicate that we should not look at the racial implications of this bill. I do not question their intent with respect to the racial implications. But the bill is like so many things I see emanating out of Washington. It sounds good in theory, but the side effects can be disastrous.

It is like marrying a chorus girl. They always look great, but it is living with them that is hard. [Laughter.]

We can paint this bill to make it look wonderful, but there are terrible side consequences. I speak not as someone going through statistics, but as someone speaking of what this bill will do in Arkansas, and I will go into that at great length.

If I seem somewhat exercised by this amendment, I am, because it is the single worst bill of this session in its effect and longrange implications, and make no mistake about it.

Mr. President, I will be speaking at length about various provisions of the bill as it relates to elementary and secondary education, but not college, and we must separate that out in our arguments.

I conclude these opening remarks by again expressing my respect for the sponsors of this measure. When I criticize the legislation, I hope there is no import in my statements, or that it is taken that way, that my criticism relates either to the intentions of the bill or to the sponsors. It is because I feel so strongly about the effects of this bill and its final erosion of the public school system.

I yield the floor.

(Mr. Stone assumed the chair.)

Mr. PACKWOOD. Mr. President, will the Senator yield for a question?

Mr. HODGES. With all due respect, I think I took slightly more than 5 minutes. I apologize to the Senator from Delaware. We somehow got out of order, and he probably should have been allowed to speak much earlier.

Mr. PACKWOOD. If the Senator from Delaware will permit, I should like to ask a few questions.

The Senator from Arkansas used the expression "revolutionary ideas" to knock a hole in the wall of separation between church and State. Does he think this is a new or revolutionary idea in this society?

Mr. HODGES. I say to the Senator from Oregon——

Mr. PACKWOOD. I did not get the Senator's answer.

Mr. HODGES. I have not answered yet. I told the Senator 8 months ago that I am not up to this level. It takes me a while to get to this speed.

I say this: In light of the total integration of our public school system, in light of the fact that women have the vote, in light of the fact that slavery has been abolished, in light of the world in which we live right now—not Revolutionary War times, when they had slavery, when women could not vote—in light of where we are right now, yes, it is revolutionary.

Mr. PACKWOOD. Let us set one thing straight in this regard at this time. The argument has been used over and over about Tom Jefferson's letter in 1801 about the wall, when he was writing specifically about public support of churches.

I inquired numerous times of the Library of Congress, and I have to confess that this came as news to me, about what the educational system of this country was at the time we started and what it continued to be until about 1825 to 1830, until it finally finished in 1850, when we had a public school system.

I read from a memorandum dated January 31, 1978, sent to me by Peter B. Sheridan, of the Government Division of the Library of Congress:

> In response to your request of January 30, 1978, for a memo regarding the status of schools in America from 1770 to 1820, the following generalization can be made: all, or almost all, the schools during this period were private, were religious, and were publicly supported, that is, denominational schools received public school funds.
>
> As one educational historian wrote describing the period from 1775 to 1820, "Public provision for religion and public support for private and church schools, in some form or other, direct or indirect, explicit or implicit, were either embodied in Constitutions, or granted by law, or carried out in custom or practice."

I was not satisfied with that answer, so I wrote him again. He said:

> Reference is made to your inquiry of August 10, 1977, requesting information on the above matter. Specifically, you ask (1) whether state aid to private church-related schools was a fairly common practice in the United States at least during the first half of the 19th Century, and (2) whether such aid violated relevant federal constitutional safeguards.
>
> The answer to these questions is yes and no, respectively.

At the time this country was founded, every member of the Constitutional Convention probably sat on a local city council that granted public funds to church schools. There were no public

schools in this country in the sense we know them—none at the time this country was founded. It would come as a totally foreign idea to the people who wrote this Constitution and who wrote the first amendment that you could not use public funds and give them to a church school—not to the parent, give it to the school—for the education of the citizens of the township.

We are going to argue a little later about what the Court said in Nyquist and a number of other cases. I want the RECORD to show that the founders of this country intended and practiced and voted for public funds for church schools and thought there was nothing unconstitutional about it.

Mr. HODGES. Mr. President, will the Senator yield?

Mr. PACKWOOD. I yield.

Mr. HODGES. Has the Senator written to find out whether slavery was permissible under the Constitution at the time he wrote about that? Has the Senator written to see if the right of women to vote was permissible under the Constitution at the time he wrote about that?

Let me say one final thing to the Senator from Oregon. I am not concerned about the effect of this bill on Thomas Jefferson. He is gone. I am concerned about the effect of this bill on our American society, the fabric of it, and on where we are going from here.

Mr. PACKWOOD. That is fine. I want this record to be clear on one thing: The founders of this country practiced and preached and supported the public funding of church schools.

Mr. HODGES. Which does not make it any more right than it makes slavery right or makes right the fact that women could not vote.

Mr. PACKWOOD. It merely means that they did not think it violated the Constitution. As we go on with this debate, there will be reference to the Founding Fathers, and their idea of the wall was not that public funds could not be used for church schools.

Mr. LONG. Mr. President, will the Senator yield?

Mr. PACKWOOD. I yield.

Mr LONG. This is a matter I have always remembered, because my father, as a lawyer, was pleading a lawsuit when he was Governor of Louisiana. He appeared before the Supreme Court and argued that the State had a right to provide schoolbooks to children regardless of where the child went to school.

The argument was made that it was unconstitutional to provide school books to children who went to parochial schools. The Supreme Court upheld my father's argument that you have a right to provide a book to a child to go to school, no matter where the child goes to school.

Mr. PACKWOOD. You can also provide buses to take the children to the schools, private schools.

Mr. LONG. In that light, would it not seem that if Congress wishes to do so, it could provide a tax deduction, or a credit against taxes, to a citizen in order to pay expenses to educate his child, regardless of what school the child might attend?

Mr. PACKWOOD. I think we can, clearly and constitutionally.

If we constitutionally allow people to make a $500 contribution to their church and take it off their income tax, and if we allow them to make a $500 contribution to the school that the church runs and take it off their income tax, I think we clearly can say, "You can make a $500 education payment to the school and take it off your income tax."

Mr. LONG. It concerns me to hear some argue that by doing what the Senator is proposing—that is, providing a tax credit to help educate children—somehow that would hurt public schools.

I would call as a witness on the other side of the argument a young lady who I proudly claim as a cousin. She teaches in an all-black school These are disadvantaged black children. Only a few of them have had adequate educational opportunity. There are about 36 children in the classroom.

The experience in the State in which she is teaching indicates that if she did not have so many children on her hands, she could give better individual attention and thereby provide better education to these children. If she had only 20 children, she could give them a great deal more attention than she can give 36.

Inasmuch as some parents might move some of their children into a private school because of a tax credit available to them, and this would reduce the classroom population pressed upon this little lady who is teaching those young black people, she would be able to do a better job for the remainder.

With an overcrowded classroom, with almost twice as many children as that teacher should be expected to handle, considering the fact that those young people have been disadvantaged and have not had the education they should have had up to this point, and considering that they need additional help, one would think it would help all of them by providing more money for education and by providing less congestion in any of these classrooms.

Can the Senator see how it hurts those who remain in the classroom if the crowding in the classroom is reduced?

Mr. PACKWOOD. Obviously, it helps.

I say to the Senator that if this bill does not pass, give or take 100,000 children of parents who can afford to send them to Andover or Exeter, there will be another 500,000 students—students who go to private schools—who will go to public schools because the private schools will be closed.

Mr. RIEGLE. Mr. President, will the Senator yield at that point? I wish for someone to yield so that I may engage the Senator from Louisiana on his point.

Mr. HODGES. Mr. President, regular order. The Senator from Delaware has been here for 45 minutes, and I think I principally was the problem with his not getting immediately on. I believe as the order reads, he should be recognized. I apologize to the other Senators, but he has been waiting 30 minutes.

Mr. LONG. Mr. President, I came in relaxed and happy. Any procedure we follow is all right with me.

Mr. RIEGLE. I say I do not want to delay the Senator either. I was presiding for the last half hour, and I had a chance to listen to the debate. I will not unduly delay the Senator from Delaware. I appreciate it if he will yield a minute or so so that I might just raise one point with the Senator from Louisiana.

The PRESIDING OFFICER. The Senator from Delaware has the floor by order.

Mr. ROTH. I am happy to yield to the Senator from Michigan for the purpose of asking a question without losing my rights to the floor.

Mr. RIEGLE. I appreciate that.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. RIEGLE. I shall endeavor to be brief.

I appreciate the illustration that the Senator made about his cousin who teaches in the public school and has a class size of 35 students. She obviously has difficulty as most public school teachers do with these overly large class sizes and responding to the needs of these youngsters, be these disadvantaged youngsters or whatever.

Let me tell the Senator the concern that I have and I think others of us who have who are opposed to a tax credit. We are concerned that if we go this route and we give this tax credit for tuition paid for these grades 1 through 12 that money is right out of the Treasury, as the Senator knows probably better than anyone else here. It is a tax giveaway, in other words, in the first instance. It will increase the deficit in other things, because it is giving revenue out from the Federal Government, in effect.

But here is the concern that I have. I am concerned as to what will happen. Then with the money that remains in the Federal Government to spend on public education, and all other things, competing interests that also need Federal support, we will start cutting down on the money that is available to education and will do so in such a fashion that after a period of time the Senator's cousin instead of having 34 students because there will be less money for public education—sure, maybe two or three children will get drawn out of that classroom and sent to a private school—that we do not have enough money to run the public school system is my concern, and I am afraid what will happen is they will start folding these classes together and the Senator's cousin, instead of 34 students, she will have 50 students or 55 students. I am not talking about tomorrow, but I am talking about 2, 3, 4, or 5 years down the road. That is the concern I have which I have not heard anyone allay yet. There is this question about whether we are really punching a hole in the public school system because clearly people like the Senator's cousin, whom he mentioned—and I have relatives in my family who are also teaching in public education—are stretched so thin today that I do not see how they can be stretched any thinner. The problem is they are making appeals for more public funds, and we tell them we do not have it.

As the Senator well knows, as well as I do, when we are approached and the requests come for education we are scal-

ing them down. Here we are coming essentially through the side door because we are not coming through the committees here that deal with the education process directly, and we are going to take a big chunk of Federal tax money, as the Senator guards as jealously as anyone I know around here, and we are going to say we are going to give it away for this particular purpose.

I must say I am as much concerned about the Senator's cousin as he is, but I ask him to think about the fact as to whether we are doing her a favor. If she is going to end up with 50 students 3 or 4 years down the road I do not think she is going to come back and thank the Senator.

Mr. LONG. If the Senator will permit me to respond to that, let me say that I for one do not look upon it as an expenditure of public funds when we give someone a reduction in his taxes, whether we do it by way of a tax credit or whether we do it by way of a tax deduction. I just do not buy the argument that anything a working man is permitted to keep of his own money is a gratuity from the Federal Government or any other government. We can draw our tax laws however we want to draw them, and one of the ways we ought to draw them is to raise the amount of money we want to raise, whatever that happens to be. So far, we fellows on the Finance Committee have done a good job of raising the amount of money we are supposed to raise in taxes and cutting the amount we are asked to cut in tax cuts.

For my part, I have no intention of voting to reduce the amount of money available for the education of young people in this country. Insofar as the private education system takes care of children and does a good job, that would ease the burden on the public education system.

I only ask that people do the best job they can with the money available to them. The evidence that I have from schoolteachers with whom I have discussed the matter is that they could do a lot more good with the Federal money we are spending on education, if we did not have so blame many guidelines and so many people up here in Washington trying to tie their hands and constantly looking over their shoulder and trying to do the teaching job for them. If they had a little more discretion to teach the way the teachers and the principals think they should do it, they could do a more effective job.

But I am not seeking to reduce the funds for education by one nickel. If they can do a better job, I will be willing to vote for still more funds for education.

Mr. RIEGLE. Mr. President, let me briefly say why in fact it is a tax giveaway. Take two people living next door to one another side by side, two wage earners with exactly the same income each year, with exactly the same number of dependents, and so forth. Under the tax rates they would normally have they would pay the same amount of tax if everything were the same. What the Senator is going to do now is he is going to identify the one fellow who may send his children to a private school and who pays for that, and he is going to give him an extra tax benefit. So he is going to pay less tax, is he not, than the fellow next door? And he is going to pay less tax next year if everything else stays the same than he paid this year if the proposal the Senator is supporting passes.

So it is a tax giveaway. There is no question about it.

Mr. LONG. I do not read it that way, may I say to the Senator. We are all paying taxes. In fact, I really think that those parents whose children are in parochial schools in New Orleans, for example, have a right to complain because they are paying their taxes to educate children in the public schools. They are paying for the education of those who go to public schools, and their children are not in those schools. In addition to that, they are also paying, and at this moment with no help from the State, to educate their own children in parochial or private schools.

The suggestion here is that we allow some tax consideration to help ease the burden on the taxpayer who is paying to educate his own children in addition to paying to educate those in the public schools. To me, that is simply a consideration of equity and justice. That citizen is paying to educate all children with his tax money generally. He is not benefiting from that. He is also paying at this moment wtihout any consideration whatever, one might say, to educate his own child, and in that respect he is saving money for the Government. So, in effect, we give him back some of the tax savings that he is saving for the Government by educating his own child by giving him a tax credit to help pay the expense of educating his child in a private school.

I for one just look upon him as a taxpayer who is helping to educate his neighbor's child and who is getting a little help in trying to help pay the expense of educating his own child. I do not regard it as a tax giveaway. If I did, I would vote the other way, but I do not.

(Mr. STONE assumed the chair.)

Mr. RIEGLE. I would just conclude by saying to the Senator when we make Federal expenditures we are talking about education. We spend on defense and we spend money for crop subsidies and a lot of other things, and we are not just doing it for ourselves. We may be protecting somebody's interest who lives in another State. And if some problem strikes it does not necessarily hit us. In other words, the idea of the Federal Government in the range of Federal spending does not always come back one-for-one. In my State, for example, we find that we send $1 to the Federal Government and we get back less than $1. There are other States that do much better. Texas sends $1 and gets back $1.50.

I do not think you can equate this just on a one-for-one basis. I think if we set up an educational system and make it available to everybody we are offering education to the country as a whole whether people do or do not take advantage of it. I think it has to be viewed that way. I do not think you have to view it in the light of whether you have one or more children in that school at that time. People who do not have children pay taxes, and those taxes are used to finance an educational system, but it is so we can provide an educational opportunity and have the chance to develop our citizenry.

That is really what is at issue here. I think if you narrow it down to the question of "Well, am I going to get back everything I put in on a 1-to-1 basis" that really minaturizes the debate as to what is at stake in terms of why we have public education in this country. A lot of nations do not have it, and that is why a lot of nations are way behind us.

I have great regard for private schools, and I appreciate the fact that the Senator from Delaware is letting us discuss this matter, but I hope to have a chance later to discuss it without impinging on his time.

Mr. LONG. I hope the Senator from Michigan shares with me the thought that no matter what the State does, for better or for worse, that sometimes the States does some noble things and sometimes it does things which are absolutely asinine. But no matter what the State does, for better or worse, the ultimate responsibility is not on that State but it is on that parent to see that his child gets a good education, and that parent should conscientiously do his duty for his child to educate that child, to develop his talents to the best of the parent's ability, using the best judgment he can.

I know it conflicts sometimes with one's zeal to build a public education system for all, and everything that goes with it.

I find myself thinking of a man who is a well-regarded and well-respected Federal judge who signed all these integration orders and put his child in a private school all at the same time.

Someone challenged him about that matter, about having been the leader in integrating the schools in his area and then getting very severe criticism from his neighbors, and putting his child into a private school. He said, "Well now, keep in mind my duty as a Federal judge is one thing and my duty as a parent is something else." His duty as a parent he felt was to see that his child got the best education that child's talents deserved.

It seems to me that the final responsibility is not on the Government to see that the children are well-educated, even though it has a duty and I want it to do that. The final responsibility is on the parent, even if he has to do it in his own home, to see that the child receives the best education that parent can provide for his child.

Mr. ROTH. Mr. President, I had hoped in all candor that the four principal sponsors of the Roth-Ribicoff-Packwood-Moynihan legislation would have the opportunity of making their opening remarks on this very important piece of legislation prior to the debate.

I do not want to extend the debate, but I do want to make two observations: I would have to strongly agree with the distinguished chairman of the Committee on Finance by saving it seems to me that the discussion, the dialog, between him and the distinguished Senator from Michigan shows very clearly the differ-

ence in philosophy of Members of this Congress.

There are those who believe that all income belongs to the Government and that what the individual retains is only by the right of Government; and there are those of us who believe that what one earns belongs to the individual. When we talk about tax credits we are not giving something, the Government is not giving something, to the individual. We are merely permitting him to retain what he already has earned. It is his or hers, as the case may be.

I am also concerned about the allegation, the claim, that the elementary and secondary tuition credit is revolutionary. I would just like the record to show that the VA veterans' educational benefits, which have had strong support down through the years, provide benefits, college benefits—I mean funds—to both public and private schools, to both public and private elementary and secondary schools.

As a matter of fact, according to the VA it has paid tuition for about 3,500 schools, private elementary and secondary schools, since World War II.

Mr. President, there will be sufficient time to debate the merits, but I would at this time like to congratulate the other Members who are sponsoring this legislation because I think it demonstrates the timeliness of this proposal.

I have been pleased to work with the distinguished senior Senator from Connecticut (Mr. RIBICOFF) who, down through the years, has been a leader in trying to provide some relief in the area of college tax credits.

The fact that we are here where we are is due in great part to what he has done not only during the current year but for many years in the past.

I would like to congratulate the distinguished Senator from Oregon (Mr. PACKWOOD) as well as the distinguished Senator from New York (Mr. MOYNIHAN) for the strong leadership they are providing in attempting to obtain some relief at the elementary and secondary school level. I think the fact that we have a proposal here that has a real chance of becoming law is the reflection of the sound thinking and work they have done in this area.

Mr. President, I appeared before the Senate last year, at which time I said, with respect to college tax credits, that this is an idea whose time has come. I must confess to you today that in my judgment it is not an idea whose time has come but it is overdue, it is too late. We are penalizing middle Americans.

In all candor, much of this legislation would be on the books today, would be in the law, would be helping our children go to college, if it had not been for the parliamentary maneuvering on the House side. For 2 years, 1976 and 1977, I proposed a college tax credit that was overwhelmingly adopted by the Senate. That legislation was taken to conference where we got a promise in 1976 from the distinguished chairman of the House Ways and Means Committee that if we agreed to its being taken off that particular bill, there would be an up and down vote that year.

The distinguished Congressman from Oregon (Mr. ULLMAN) is an honorable man, and it was his intention to carry out that pledge. But the House leadership refused to permit that promise, that pledge, to be carried out for one reason, and one reason only, which was because they knew if there was an up and down vote on the House side it would be enacted into law, it would become law, and the only way they could prevent that from occurring was by preventing it from coming up on the House floor.

Again last year I brought this legislation up late in the year. It was adopted. It became part of the social security amendments, at which time the House conferees again fought so that they would not and could not permit it to come up for a vote, so we agreed we would withdraw it from that legislation, but with a clear understanding that this legislation would come up for a vote this year.

But I am happy to say that that pledge, that informal promise, has been carried out, and the House of Representatives has adopted legislation which provides tuition tax credits for the American people.

Mr. President, those of us who are sponsoring this legislation are basically seeking to achieve two things. That is why we will succeed. We are seeking the pursuit of excellence in education, which means plurality, choice, and we are seeking to help the American people provide the best education possible for their children.

Mr. President, the Tuition Tax Relief Act of 1978 provides tax credits to help offset the rising costs of education. The primary purpose of this act is to enhance the equality of educational opportunity for all Americans at the schools and colleges of their choice.

With the adoption of this legislation, Congress will be recognizing the heavy financial burden now borne by those who must pay tuition to obtain the education that best serves their needs and aspirations—whether at the primary, secondary, or postsecondary level. And by enacting tuition tax credits, Congress will be providing relief through the income tax structure with a minimum of complexity and Government interference in the lives of individuals and taxpayers.

The Tuition Tax Relief Act will be phased in over two stages.

Effective August 1, 1978, a tax credit equal to 50 percent of tuition and fees, with a maximum credit of $250 per student, will be available for full-time students in universities, colleges, junior and community colleges, and postsecondary vocational schools.

Effective October 1, 1980, tuition paid for elementary and secondary schools will become eligible, up to a maximum credit of $250. In addition, the maximum credit for college and vocational school tuition will be increased to $500. Also, tuition paid for students attending less than full time, but at least half time, will become eligible for the credit.

This bill is a modified version of our earlier tax credit bill, and the modifications substantially reduce the overall cost of the bill. The modified bill, which was approved by the Senate Finance Committee by a 15 to 1 vote, reduces the total cost of the bill when fully effective from $5.2 billion to $2.8 billion, a savings of $2.4 billion. The main features of the committee modifications are as follows:

First. The maximum credit for elementary and secondary school tuition was reduced from $500 to $250.

Second. Graduate students will no longer be eligible for the tuition tax credit;

Third. The refundability aspect of the tuition tax credit was deleted;

Fourth. Part-time students who study less than half time will no longer be eligible for the tuition tax credit; and

Fifth. The effective date for elementary, secondary, half-time, and the increase in the postsecondary credit was changed to October 1, 1980.

Under this compromise amendment, the fiscal 1979 cost of the tuition tax credit will be considerably less than the administration's grant and loan program. According to the Joint Committee on Taxation, the fiscal 1979 cost of the tuition tax credit will be $578 million, approximately $600 million less than the $1.2 billion cost of the President's program.

By reducing the total cost of the bill by 45 percent, we are making a good faith effort to meet President Carter's principal objection to the bill. We believe our modifications meet the President's objections halfway, and I hope he will reconsider his veto threat.

COST OF THE BILL

As I mentioned, the modifications we have made will cut the total cost of the bill almost in half. According to the Joint Committee on Taxation, the total tax savings and a comparison of the cost of the original bill are as set out in the table which follows.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a table showing the revenue impact as well as the figures by the Congressional Budget Office as to their estimates of the cost of the bill.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Revenue impact

[Dollars in millions]

Fiscal year	Original bill	Modified bill
1978	$39	$25
1979	916	578
1980	1,418	997
1981	2,835	1,848
1982	4,479	2,820
1983	5,290	2,888

The Congressional Budget Office has also supplied cost estimates of the bill. These estimates, which are similar but slightly smaller, are as follows:

CBO revenue impact

[Dollars in millions]

Fiscal year	Revenue impact
1978	$21
1979	491
1980	804
1981	1,895
1982	2,646
1983	2,761

Mr. ROTH. Mr. President, despite the claims by opponents of the bill, tuition tax credits will not primarily benefit the wealthy.

According to the Joint Committee on Taxation, 78 percent of the benefits of tuition tax credits would go to families earning less than $30,000 a year. The bulk of the benefits would go to middle-income families earning between $10,000 and $30,000 a year.

I ask unanimous consent to have printed in the RECORD at this point a table showing the breakdown of the benefits to the various income classes.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Income	Percent of benefits	Cumulative percent
$0–$5,000	3	3
$5,000–$10,000	6	9
$10,000–$15,000	16	25
$15,000–$20,000	23	48
$20,000–$25,000	16	64
$25,000–$30,000	14	78
$30,000–$40,000	11	89
$40,000–$50,000	6	95
$50,000 and above	5	100

Source: Joint Committee on Taxation, July 31, 1978.

Mr. ROTH. Mr. President, I believe there is an urgent need for the adoption of tuition tax credits.

Increasing costs, higher prices, and a growing tax burden are making it more and more difficult for students to attend college.

There is no doubt in my mind that a growing number of young Americans are being prevented from obtaining a college education because of the increasing costs.

In addition to the rising costs of post-secondary education, the cost of nonpublic elementary and secondary education has increased substantially in recent years, and enrollment in nonpublic schools has dropped sharply from 6.3 million private school students in 1965 to 5.3 million in 1976, a decrease of 16 percent, while public school enrollment has increased 5 percent. At the same time, the cost of public schools is rising substantially, and taxes keep increasing to meet this cost. I believe that nonpublic school parents who must pay for the increased costs of both public and nonpublic schools, even though they relieve the public schools of the cost of educating their children, also should receive tax relief for their children's educational expenses.

In the past few years, the cost of a college education has skyrocketed.

According to the Congressional Budget Office, total annual college costs increased approximately 75 percent between 1967 and 1976. However, tuition and required fees, the only expenses which will be eligible for the tuition tax credit, have increased at a much faster rate.

According to the National Center for Education Statistics, the average tuition and fees at a private university increased 93 percent between 1967 and 1976, from $1,297 to $2,505. For a public university, tuition and fees also increased 93 percent during the same 10-year period, from $283 to $549.

These tuition costs will continue to increase. According to the College Entrance Examination Board, the average annual total cost of a private university for the upcoming school year will be $5,110. For a public university, the average annual cost will be $3,054 for the 1978–79 school year. For a student entering college this fall, the total 4-year cost will be an estimated $17,500 for a public university and $30,000 for a private college. It is important to recognize if a parent has a 1-year-old child today, it has been estimated that it will cost $47,000 to send the child to a public university and $82,000 for a private university in the 1990's. These costs are after taxes.

The administration and the Congressional Budget Office have argued that a tuition tax credit is not necessary because total college costs have not risen as fast as median income. According to a recent CBO report, total college costs increased 75 percent and median family income increased 78 percent between 1967 and 1976. The administration has seized upon these figures as "proof" that the average family is no worse off today than it was 10 years ago. I might just say that I for one am not satisfied that the average family is no worse off. That is not the American dream. The dream is to move up.

But the administration and CBO are totally ignoring an extremely important fact—that the tax burden on the average family has increased substantially during this same period and middle-income families have less disposable income to spend on a college education for their children.

According to a study by the Library of Congress' Congressional Research Service, the tax burden on median income families with college age children increased 135.4 percent between 1967 and 1976, as the following chart shows. I ask unanimous consent that the chart be printed in the RECORD at this point.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

AVERAGE TAXES AND MEDIAN INCOME, 1967 AND 1976

	Median income	Federal income tax	Social security tax	Average state and local taxes	Total taxes	After tax income
1967	$7,923	$684	$290	$404	$1,378	$6,545
1976	14,164	1,395	829	1,020	3,244	10,920
Percent change from 1967 to 1976	78.8	103.9	185.9	152.5	135.4	66.8

Mr. ROTH. As this study shows, the after-tax income of median income families increased only 66.8 percent, and did not keep pace with the 75 percent increase in total college costs or the 93 percent increase in tuition and fees.

In addition, the percentage of after-tax median income required for tuition and fees has increased 16.3 percent at public colleges and 15.7 percent at private colleges over the last 10 years, as the following chart shows, which I ask unanimous consent to have printed at this point in the RECORD.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

MEDIAN FAMILY INCOME, AFTER TAX MEDIAN FAMILY INCOME, AND COLLEGE TUITIONS

Year	Median family income (families with 18-to-24-yr olds)	After tax median family income	Tuition and required fees		Tuition and fees as percent of aftertax MFI	
			Public	Private	Public	Private
1967	$7,923	$6,545	$283	$1,297	4.3	19.8
1976	14,164	10,920	549	2,505	5.0	22.9
Percent change, 1967–76	78.86	66.80	93.9	93.1	16.3	15.7

Sources: Congressional Budget Office, Federal Assistance for Postsecondary Education: Options for Fiscal Year 1979; Congressional Research Service, "Selected Statistics Regarding Income and College Costs" (John Karr, June 1978); National Center for Education Statistics, Digest of Education Statistics, 1976 edition.

Mr. ROTH. These figures clearly show the Federal Government is taking more money away from the average families of this country through higher taxes and inflation. The tuition tax credit is designed to reduce the average tax burden and allow taxpayers to keep more of their own money to spend on a college education for their children.

These increasing costs have had a considerable impact on the ability of middle-income students to attend college. According to Census Bureau figures, the enrollment rate of middle-income students has declined in the last 10 years. In fact, while the enrollment rate at the lowest income level has increased slightly, the enrollment rates of all other income levels have declined in the last 10 years.

I ask unanimous consent that a chart on college enrollment rates be printed at this point in the RECORD.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

COLLEGE ENROLLMENT RATES

[In percent]

Income	1967	1976	Rate change	Percentage change
0 to $5,000 (constant dollars), 0 to $8,050 (current dollars)	20.0	22.4	+2.4	+12
$5,000 to $10,000 (constant dollars), $8,500 to $17,000 (current dollars)	37.9	36.3	−1.6	−4
$10,000 to $15,000 (constant dollars), $17,000 to $25,500 (current dollars)	51.9	47.5	−4.4	−8
$15,000 plus (constant dollars), $25,000 plus (current dollars)	68.3	58.2	−10.1	−15

Source: Bureau of the Census, "Current Population Reports," Series P-20, No. 319, Issued February 1978

Mr. ROTH. Mr. President, there are millions of families today who are neither affluent enough to afford the high cost of college nor considered poor enough to qualify for the many different Government assistance programs their taxes make possible.

We are rapidly approaching a situation in this country where only the very affluent and the very poor will be able to attend college. The group in the middle—the very taxed—will be unable to afford it.

Mr. President, a tuition tax credit is simplest and most equitable way to provide middle-income families relief from mounting college costs. A tuition tax credit will allow people to keep more of their own hard-earned money rather than send it to Washington. With a tuition tax credit, there is no administrative overhead, no forms to fill out, and no need to beg, plead poverty, or apply to the big bureaucrat on the banks of the Potomac.

Working Americans, caught in the middle, do not want a Government handout. They merely want to keep more of what they earn to spend on something as basic as the right to send their own children to college.

TUITION TAX CREDIT MYTHS

Mr. President, while I believe the support for tuition tax credits is overwhelming, the opponents of tax credit is overwhelming, the opponents of tax credits have generated a great deal of misconceptions about the impact and need for tuition tax credits. I would like to respond briefly to a number of these tuition tax credit myths and objections.

Myth No. 1: Tuition tax credits have not been adequately considered.

Fact: In the past 2 years, the Senate has debated and approved my college tuition tax credit by overwhelming margins three times.

In August 1976, the Senate adopted a $250 college tax credit as an amendment to the tax reform bill by a 68 to 20 vote. As I mentioned earlier, the House conferees refused to accept the tax credit as an amendment to the tax reform bill, and committee leaders gave their commitment they would allow a House vote on a separate bill.

Subsequently, the Senate approved the college tax credit in September 1976 by a 62 to 21 vote, but once again the House refused to consider it.

Finally, last year the Senate approved the tax credit by a 61 to 11 vote as an amendment to the social security bill, but once again the House refused to allow it to come to a vote.

This year, the House, by a 237 to 158 vote, approved a tuition tax credit for colleges and elementary and secondary schools.

Myth No. 2: Tax credits will only benefit the rich.

Fact: According to the Joint Committee on Taxation 78 percent of the benefits of the tuition tax credit will go to those earning less than $30,000; 69 percent of the benefits from the bill will go to middle-income families earning between $10,000 and $30,000 a year.

Myth No. 3: Schools will increase their tuitions if a tax credit is adopted.

Fact: Competition for students is the biggest factor restraining schools from increasing their tuitions. According to recent studies college enrollment drops by 1 to 3 percent for every $100 increase in tuition and college administrators are extremely conscious about this fact.

If a college does raise its tuition to capture the tuition tax credit, it will lose enrollment to colleges which do not increase tuition.

Myth No. 4: A tax credit will not help families paying $5,000 in tuition.

Fact: A $500 tax credit will be of significant help to families struggling to send their children to college. It will be of particular benefit to families who are facing the difficult task of sending more than one child to college. According to studies, college enrollment will increase by 1 to 3 percent for every $100 reduction in tuition costs.

Mr. President, the tuition tax credit is simple, direct, and easy to administer. It is far more preferable than the administrations' grant and loan program, which would only add more red tape and more problems to programs which HEW cannot even administer now.

I hasten to add that I have been a strong supporter of grant and loan programs to help those on the lower end of the economic scale to go to college.

According to HEW Secretary Califano, 30 percent of the basic educational opportunity grant applications for the 1978–79 academic year have been rejected because they are incomplete or contain errors.

A Congressional Budget Office study said an expanded grant program "would involve a greater administrative burden" than the tuition tax credit.

A recent HEW study of the existing student aid programs found they were plagued with "managerial problems which have contributed to inefficiencies, inequities, abuse, and fraud." The president of Syracuse University testified before the Senate Finance Committee that the existing student aid programs "are bewildering to potential applicants, have defied the ability of bureaucracies to administer them, and have resulted in a labyrinth of disconnected, overlapping, and uncoordinated parts."

The existing student loan program is in complete dissarray. One out of every six loan recipients defaulted on their loans, including 316 in HEW and 6,783 Federal employees in all.

Mr. President, we need a program that complements, not complicates, the existing student aid program.

The tuition tax credit is an idea whose time is long overdue. I urge the Senate to enact this legislation to provide the taxpayers relief from a financial burden no other generation has ever experienced.

I yield the floor.

Mr. STAFFORD. Mr. President, I ask unanimous consent that Nancy Barrow, of Senator CHAFEE's staff, may have the privilege of the floor during debate and votes upon the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STAFFORD. Mr. President, I wish to express in some detail the reasons for my opposition to the Tuition Tax Relief Act. In the most recent, scaled-down revision of August 3, it would provide a credit of up to $250 for private elementary and secondary school expenses, rather than the $500 which had been in the original. The new version, as I understand it, retains the higher figure for the postsecondary level.

The previous version disturbed me because it would have been the most expensive Federal educational program in the Nation's history and a departure, in my opinion, from the principles underlying our Federal educational policies. Some possible consequences were also troubling. The revised bill will be less expensive, but still almost certainly a commitment of steadily increasing cost. The tax credits would constitute a new category of Federal educational program. It would be doubly new at the primary-secondary levels, because the Federal Government would be providing general support for the private sector in schooling. Except for federally impacted schools, we do not provide general support for public schooling.

As we consider this proposal, we are necessarily involved in analysis across two levels, collegiate and precollegiate. This complicates our deliberations, because the consequences of the proposal are different at these two levels. For higher education, our analysis additionally must include comparison with the College Opportunity Act, S. 2539, which is the alternative approach to relieving the financial strain upon middle-income families with children in college. The country cannot afford both ap-

proaches. I wish that it might, but it is my judgment that at this point in history, it cannot; therefore, we must select the one which will best focus our resources to meet our educational objectives.

OVERALL COST

We also need to consider the overall cost and how it may develop, especially in a situation of enormous Federal deficits and a very high rate of inflation. Proponents of this measure state that tuition tax credits, when fully in effect, would cause the Treasury to lose only slightly less than $3 billion per year rather than the more than $5 billion contemplated previously. That estimate might be low: if all 3 million primary-secondary private school children and only 7 million of the 12 million vocational and higher education students were fully eligible, and if the other 5 million were to get nothing, the Treasury would lose $4.25 billion, and do so in a situation in which the tuitions and fees which are basic to the calculation of tax credits will surely be increasing.

The losses to the Treasury could increase rapidly. The tax credits would provide the greatest financial incentive in the Nation's history to leave public schooling and "go private". While I know of no surveys concerning the impact of tax credits upon the demand for private schooling, it is not farfetched to assume that a million children might "go private", as that would be less than 3 percent of the 43 million attending public schools and as, presumably, the blessings of tax credits would be reflected in advertising and there would be an occasional slight bandwagon effect. The tax cost would be $250 million for each million children making the move. In parallel, at the higher education level, there would be an incentive for more students to take more courses. While that would be a positive development, it would also add to the cost of tuition tax credits.

I am also concerned about the possible tuition-inflationary impact and its consequences. Tax credits, because they are a nearly universal reward, are far more likely than S. 2539 programs to be tuition-inflationary. The toughest problem facing college administrators is increasing costs, which range from heating bills to social security payments for the faculty and all expenses in between.

(Mr. BURDICK assumed the chair.)

Mr. STAFFORD. There is powerful pressure to increase fees. It would surely be very tempting for hard-pressed administrators, who know that their students soon will have an extra $500—or at least their parents—to adapt to their difficult circumstances by passing their bills along to those students in the form of higher tuitions.

If that happens, the tuition tax credits will have provided little net help for students, complaints will follow, and the problem of relieving middle-income college costs will be back to haunt us with pressure for other forms of tax relief or more generous tuition tax credits. It would be painful to discontinue tax credits once granted because institutions as well as individuals would be adversely affected. The prospect would be for ever-growing demand for tax credits.

HIGHER EDUCATION

It is obvious that college costs have become so great that middle-income famies are experiencing great strain in paying the bills. The main issue before us is one of principle. It is whether the system of assistance should scale the awards on the basis of the extent of the difficulty in meeting expenses.

The historic, principled reason for Federal student assistance has been to relieve economic hardship in order to assure equal opportunity in accordance with one's abilities. Thus the criteria for aid to students have been the family's ability to pay and the cost of the chosen college or institution. Tax credits are not based on these criteria. They would provide the same benefit to the wealthy parent whose child is attending his hometown inexpensive college and the poorer family whose child attends a high-cost institution away from home. The tax credit would allow no benefit to students who win tuition scholarships yet still must meet high overall expenses, with the incidental consequence that colleges would find it sensible to discontinue these rewards for excellence.

In contrast, the approach embodied in S. 2539 is based on the principle that assistance should be related to need. I believe that is the right principle upon which to base our public policy.

From the standpoint of the student who needs assistance, there are three important differences in effect between the tuition tax credit approach and the approach advanced by S. 2539.

First, by comparison, tax credits have the effect of restricting freedom of student choice in selecting institutions. A student is better able to attend the institution of his choice if he can obtain assistance reflecting cost and need.

Second, by comparison to S. 2539 programs, tax credits are inflexible instruments for helping the student. Many students would best be helped by S. 2539 potential for combining grants, work study, and loans. Tax credits do not meet the needs of many families who would prefer subsidized loans which would enable them to pay a large share of their educational costs over time.

Third, a tax credit would follow the payment of tuition by 6 to 10 months, whereas the S. 2539 approach provides the money when needed. Also, the tax credit typically would be paid to the parent, whereas S. 2539 money would be paid to the student.

At the higher education level we have a choice between tuition tax credits and S. 2539. It seems to be clear that S. 2539 is the superior choice in terms of principle as well as the benefits provided to students who need assistance and the promise of relieving the burdens upon middle-income families.

PRIMARY-SECONDARY EDUCATION

The considerations pertinent to our deliberations about awarding tax credits at the primary and secondary levels are quite different. I wish to underscore that I appreciate the qualities of private education and value the competition it represents. I have been concerned that private schools have not shared in the benefits of the Elementary and Secondary Education Act to the extent possible. One of our objectives in rewriting that legislation has been to remedy this situation.

Very clearly, tax credits do promote freedom of choice at this level. The more generous the credits are, the greater is the incentive to "go private," at least if the reward is not consumed by higher tuition.

In contemplating the effects of tuition tax credits at the primary-secondary levels, four concerns have emerged as being of uppermost importance. One is the cost, already mentioned.

The second is the effect upon our public schools. Across the country, public schools are experiencing declining enrollments and are grappling with the management of decline in the face of increasing costs. Tuition tax credits would stimulate further decline in public school enrollments, in the opinion of this Senator. While the latest version of the tax credit bill provides only half of its predecessor's financial incentive to leave these schools, it still provides a significant tax benefit for "going private". It cannot be said that tax credits would bring us the blessing of relieving our public schools of burgeoning enrollments. To the contrary, they would compound the problem by reducing the numbers of pupils and thereby also eroding the base for public school budgets.

Tax credits also would have some effect on the social composition of the public schools, as especially middle and upper income groups would best be able to take advantage of the tax credits and depart the public schools. Those parents tend disproportionately to be the backbone of support for the schools, lobbying for quality and funding and giving their time. The public schools need these people. It would not be wise public policy to induce their departure.

There is a very closely related problem. To the extent that we create an incentive for parents to move their children to private schools, the resulting action would involve whites very disproportionately. This is not to anticipate the return of "freedom schools," because we are past that phase in our history, yet I am wary that tax credits will tend to be resegregative in their effect. It would be very inconsistent of our Government to demand public school integration in the pursuit of equal opportunity and at the same time create financial incentives to any degree which would work against that objective. I remain mindful that the public schools have been the best tools for providing equal opportunity to all in our society.

We have some excellent recent data presented in the Survey of Income and Education conducted by the Department of Commerce, which provide some perspective on these considerations. One-fourth of the children from families with incomes above $50,000 were in private schools, as were 17 percent of all children from families with incomes above $25,000, but only 4 percent of all children from families with incomes below $5,000. While

17 percent of all white children attend private schools, only 5 percent of all minority children do.

The economic standing of the recipients of tax credits is my third major concern. While all income groups are included in private schools, a very high proportion of the recipients would not be very needy. The previous version of the tax credit bill would have made the Federal spending per private school child greater than the amount per public school child, and that would have been unfair. The revised bill is an improvement in that these figures would be much closer to one another.

A fourth major concern is the constitutionality of the tax credits, a matter which I understand can be debated and will be. They obviously would have the effect of providing relief to sectarian schools. Numerous constitutional authorities, citing especially the Supreme Court's 1973 decision in Committee for Public Education against Nyquist, have stated that tax credits are unconstitutional. I am aware that the tax credit bill contains speed-up provisions for determination of constitutionality by the courts. Nonetheless, the prospect that the courts may well rule them unconstitutional adds to my wariness concerning tuition tax credits.

Overall, there are a lot of reasons to be concerned about tuition tax credits, among them some administrative considerations to which I will turn next.

ADMINISTRATIVE CONSIDERATIONS

Very soon, Mr. President, I think I will have to say we may be considering the merits of S. 991, which would create a Department of Education. One of the purposes of S. 991 is to bring together the Government's widely dispersed educational authorities. It is interesting, in this perspective, that the tax credits bill, which in terms of dollars would constitute one of the largest Federal educational programs in the Nation's history, would have the contrary effect of further dispersing control over educational policy in both the executive and legislative branches of Government.

IRS would write the regulations, rather than HEW or the new Department of Education. It would have responsibility for insuring both student and institutional eligibility for the credit and safeguarding against such fraudulent behavior as paying tuition in order to gain the tuition receipt and then dropping out within the college's refund grace period. There would be many complexities of definition and complex instructions to assure one's eligibility for a tax credit. Tax credits would not be a simple matter of a one-line entry on a tax form, and the management of the tax credit program would require an increase in IRS personnel. The point is that the tax credit program would not be administratively simple or inexpensive. Indeed, it would complicate the Federal tax structure when what it really needs now is a basic overhaul.

There is one more basic administrative consideration. We already have an administrative structure in Office of Education to administer student assistance under the Higher Education Act. It has the relevant experience. It makes sense to utilize the present mechanism to fulfill the objective of providing assistance to middle-income students. Doing so would require no new types of forms and no new data items on existing forms, and it would not work against our purposes in proposing a Department of Education.

Finally I would like to point out that tuition tax credits are opposed by the overwhelming majority of those serving in the Nation's higher education community, by the National Student Association, by the National Education Association, by the National Advisory Committee on Black Higher Education, by the Education Commission of the States chaired by Indiana Governor Otis Bowen, and by numerous civil rights organizations. They all prefer S. 2539. The tuition tax credit concept has been opposed by the Departments of the Treasury and HEW in both Republican and Democratic administrations, and for good reasons.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that Allison Wiley, of Senator STONE's staff, and Elliott Abrams, of my staff, have the privilege of the floor for the duration of the debate on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr President, I ask unanimous consent that James Lockemy, of Senator THURMOND's staff, have the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, the Senator from Vermont and others have made reference to the fact that the passage of this bill is more likely to cause middle income and higher income students to leave the public school system, leaving the public school system with the poorest—with the dregs of society, as they have been referred to by more than one speaker.

Prof. Vitullo-Martin has done what I believe is the most profound study on this matter that can be found. He testified in January of this year, and his full work was not published until March, but it can be found in "Parents, Policies, and Political Structures," completed in March of 1978. It is a paper done under a grant for the National Institute of Education, in which he studied the income levels of the different people who go to private schools and public schools. This is what he discovered:

> If we take as a standard of low income the level at which the federal government ceases to tax a family of four (given standard deductions, $7,200), private schools enroll more than half as many low-income students as public schools do. About 13 percent of the private school population has a family income of under $7,500 vs. 23 percent of the public school population. A greater proportion of the public school population has an income of under $10,000 (35 percent vs. 20 percent). Once we look above the lowest-income groups, however, we find the greatest difference in enrollment occurs in the $10,000 to $15,000 group. Private schools find 6 percent more of their total population in this group than public schools do. Significantly for our question, the least difference in the two groups is found in the wealthiest portion of the population. Private schools enroll only 2.5 percent more wealthy students than public schools do.

What Dr. Vitullo Martin is saying is that the poorest segment of our society cannot afford to go to private schools. He concludes as follows:

> As we look at family income statistics for private school patrons, we see what is common sense: Market forces seem to limit attendance by the lowest-income families. We will discuss later the fact that the lowest-income families spend as much as 10 percent of this gross income for tuition at private schools. The proposed $500 per child refund to this group will be likely to have a greater effect on increasing their attendance.

Mr. President, witness after witness that we had before the committee—black, Latin, and otherwise—were people making $8,000, $9,000, $10,000, $12,000, or $15,000 a year and trying to send their children to private schools—normally, Catholic, innercity, parochial schools where the tuition may vary from $350 to $500. In the Washington diocese, it is $400, on the average, for the parochial Catholic schools.

One mother testified that she had five children. She had two in a private school and three in public schools because she could not afford to send the other three to private schools. If that woman could take $200 for each child off her income tax, she could afford to send the other three to a private school.

This bill is not going to cause the wealthy to leave the public school system if they want to leave it. The wealthy, if they want to leave the public school system, are going to leave it whether or not this bill is passed. The very wealthy, who can afford the tuitions of $4,000, $5,000, or more at the very expensive private preparatory schools of our country, have no interest in this bill at all. If there is any continuing interest expressed in this bill among any income class, it is the lowest income class, to whom $100, $200, or $300 is a significant amount of money. If given the opportunity, they may try to shift to a private school.

However, let no one assume that it is going to be the middle-income people and just the wealthy who leave, leaving the public schools with nothing but the poorer elements.

Ten years ago, we had 87 percent of the students in this country in public schools, 13 percent in private schools. Today that figure is 91 percent public, 9 percent private, and there is no reason to assume that that change in ratio will not continue.

There has been strong lobbying opposition against this bill by the National Education Association, and the argument has been used that it will be the demise of the public schools. When each witness who propounded this theory was asked why and how much and how many are going to leave, no one knew.

One of the supporters of this bill propounded the idea that maybe at the outside with this type of a bill one day we might get back to the place where 15 percent of the students attended private schools and the remainder attended public schools. Most of those who attend the

private schools attend religious schools. There is no question about that. People send their child to a religious school for whatever personal reasons they want, but I have yet to hear anyone argue that those who go to the religious schools are the intellectual elite of the Nation. They are a cross-section just like the public schools. They are certainly not the economic elite of the Nation. They are close to a cross-section like the public schools. So if the public schools, left with 85 percent of all the students in this country and a cross-section intellectually and economically, cannot make it, then there is something wrong with the public schools that will not be cured if they have 100 percent of the students.

Let me respond finally to the Senator from Vermont in his argument about the constitutionality which we are apparently going to hear over and over. The constitutional scholars do disagree on this bill. Constitutional scholars, men and women who have written, spent the better part of their lives in the academic world studying the first amendment and the religious clause, differ as to whether this bill is constitutional. That is why we have taken the provision, that was once offered by Senator Ervin in 1965 and also by Senator Morse on an education bill, to test whether or not we could make appropriations to private schools for certain types of services and placed an expedited court test in the bill, and have placed a similar expedited court test in the bill to make sure that the Supreme Court makes a decision as to whether or not the tax credit provisions for private schools are constitutional, to make that decision before $1 of tax credit is ever allowed.

I would not be so foolish as to stand here and say irrevocably that this is constitutional. I have studied law long enough and watched the Supreme Court long enough that I am never going to try to second guess what they might do. But I think in fairness and honesty it is almost impossible for anyone to say this bill is clearly unconstitutional or clearly constitutional.

If we want to argue it on the basis of philosophy, if we want to argue it on the basis of should we give tax credits to parents of those who send their children to private schools, let us argue it on that basis. If in addition we must argue it as we would argue a case to the Supreme Court and consider Wolman and Nyquist, I am prepared to distinguish those cases. I am prepared to do what I would do if I were writing a brief for the Supreme Court arguing the constitutionality.

All I am saying is that I think any of us would be presumptious to make any kind of a statement that all constitutional scholars say this bill is unconstitutional or that this bill is so clearly unconstitutional that we should not pass it.

I guess all I would say in that case, if that were true, then those who object to this bill on constitutional grounds should have no fear that it is ever going to go into effect because if that is true the court will clearly strike it down.

So, as we go on with our arguments let us talk about policy, philosophy, costs, and if necessary constitutionality. But I would hope we would hear no more of the argument that this bill is so clearly unconstitutional that no rational constitutional scholar will say otherwise today.

I yield the floor.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that at the end of the opening statements presented in person by the different Senators an opening statement by the Senator from New York (Mr. JAVITS) be included in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR JAVITS

Today we are beginning debate on two measures which will profoundly affect the future of Federal participation in education. We are beginning with a discussion of the Tuition Tax Relief bill. Following the disposition of this bill we will also review S-2539, the College Opportunity Act.

This issue has been of great interest to the people of my State and the people throughout our Nation. Both the advocates and the opponents have contacted me in great numbers. I am pleased that both points of view are receiving such attention and that the Senate will carefully consider all of these views before reaching its decision. I believe this is a fine example of how our democratic government works best. I hope that all observers will recognize that this is not a debate between people who are for education and people who are against it. Rather, the debate is between proponents with competing views; but each is attempting to aid education as he sees best. For many years I have labored to advance the Federal role in education. It is therefore with some regret that I must oppose the enactment of tuition tax credits.

Mr. President, my opposition is based on four major elements. I believe the costs associated with the bill are simply excessive given the benefits which are anticipated. I am impressed by the number and diversity of opponents of this bill, who have put forward very sound reasons for not enacting tuition tax credits. As a policy matter, I believe this approach raises serious constitutional difficulties and is a poor use of limited Federal resources. Finally, and perhaps most importantly, there are available alternatives in both the postsecondary sector and in the elementary and secondary sector which meet the needs which the proponents of tuition tax credits have identified and stressed.

Under the new proposal for tuition tax credits reported by the Senate Finance Committee on August 3, the tuition tax credit measure would have the following costs (in millions of dollars):

Fiscal year:	
1978	$30
1979	667
1980	1,081
1981	2,238
1982	2,820
1983	2,888

These figures represent an almost 50 percent reduction in the total cost when compared with the earlier Finance Committee reported measure. However, they remain substantially above the cost of superior alternatives.

If the Senate version of H.R. 12050 is enacted, this single law will produce a $10 billion loss of taxable revenue, with an annual cost of about $2.9 billion in 1983. Our Nation cannot afford it and I am convinced we should have the opportunity to review such a distribution of resources on an annual basis. Absent that kind of consideration, we may tie ourselves to a policy which is totally out of step with our situation in 1983. I recognize Congress can always change a law. But I believe that once set in place, there would be little likelihood of repeal of a tuition tax credit and it would become in effect an entitlement program. Furthermore, it would be likely to expand far beyond its currently proposed size.

On the other hand, the annual cost of the College Opportunity Act is estimated by the Congressional Budget Office to be $1,464 million in fiscal year 1979, rising to $1,630 million in fiscal year 1983. Unlike the tuition tax credit proposal, all of these estimates are subject to the annual budget and appropriations process and to annual adjustments. At the elementary and secondary level, nonpublic schools make up approximately 9% of the enrollment. If students in these schools were to receive their full fair share of services, they would receive a proportion approximately equivalent to their enrollment. While no precise estimates exist, this amount would be approximately 300 to 400 million dollars per year. This roughly doubles the amount currently estimated by HEW Secretary Califano to be $175 million per year

It is obvious that the tuition tax credit approach is significantly more costly than the alternatives. I believe the principal reason for this disparity is no longer the level of benefits. Under the new Finance Committee proposal, H.R. 12050, even a smaller proportion of the funds go to needy families. Although less expensive, the new approach is even more poorly targeted as to true need.

Mr. President, I urge my colleagues to reject tuition tax credits because they are too costly and because they are allowing too great a proportion of funds to go to persons without true need.

OPPOSITION TO TUITION TAX CREDITS

Mr. President, I am impressed by the wide variety of groups which have expressed their strong opposition to the tuition tax credit approach. I believe it is significant that virtually all the leading education associations and organizations oppose this measure. I believe their views should be compelling on this issue. However, it is more compelling to review the position taken by individuals and organizations who are not professional educators. Over the last several months, I have received communications in opposition to tuition tax credits from the following: The Americans for Democratic Action, Reverend Jesse Jackson of Operation PUSH, the American Jewish Committee, M. Carl Holman, Chairman of the National Urban Coalition, Vernon E. Jordan, Executive Director of the Urban League, Bayard Rustin, President of the A. Phillip Randolph Institute, and the AFL/CIO.

Editorial opinion has been raised against this measure. On October 11, 1977, the New York Times ran a lead editorial entitled "How Not to Ease the Tuition Squeeze". On February 27, 1978, the Washington Post ran a lead editorial entitled "A Threat to Public Schools". Mr. President, I ask unanimous consent that these two editorials be printed at the conclusion of my remarks.

The Administration has expressed its total opposition to this approach. President Carter has stated on numerous occasions his opposition to tuition tax credits and his firm commitment to veto such legislation if it is sent to him. Three departments of government have also stated their opposition for specific reasons. On March 17, 1978, Attorney General Griffin Bell wrote HEW Secretary Califano expresing his opinion of the constitutionality of the tuition tax approach. This letter is supported by ten pages of legal analysis by John M. Harmon, Assistant Attorney General, Office of Legal Counsel, Department of Justice. Attorney Gen-

eral Bell's letter to Secretary Califano concludes with the following:

"In light of existing Supreme Court precedents, it is my opinion that tax pograms of the sort contemplated here would be held unconstitutional insofar as they would provide aid at the elementary and secondary school levels. However, I am of the opinion that similar aid at the college level would be constitutional."

Both HEW and the Treasury Department have been strongly opposed to tax credits for tuition. On July 19, 1978, Assistant Secretaries from these two Departments testified before the Senate Finance Committee detailing their opposition to tuition tax credits. Mr. President, I ask unanimous consent that pertinent excerpts from this testimony may be printed at the conclusion of my remarks.

This bill has broad based opposition in the education community. It is opposed by the following organizations which represent the varied perspectives of policy planning, school boards, teachers organizations, parent organizations, and student organizations. The Carnegie Council on Policy Studies in Higher Education, the National Advisory Committee on Black Higher Education, the American Council on Education, the American Association of State Colleges and Universities, the National Association of State Universities and Land-Grant Colleges, the Association of American Universities, the American Association of University Professors, the National PTA, the New York State PTA, the United Parents Association of New York City, the American Federation of Teachers, the National Education Association, the National School Boards Association, the National Student Association, and the National Student Lobby.

The Senate Appropriations Committee, which reviewed H.R. 3946 under a provision of the Budget Control Act, has expressed its opposition in a 14 to 7 vote by reporting this measure unfavorably. Rather than recommending amendments to those portions it found objectionable, the Committee elected to report H.R. 3946 unfavorably and thus give its members opportunity to express separately their various concerns.

Strong evidence of public opposition has just become available. A public opinion poll released late in July reports that the public turns "thumbs down" on college tax credits and gives a "resounding no" to credits for non-public elementary and secondary schools. The survey conducted by the Roper Organization shows 54 percent of the public opposing college tax credits, and 64 percent rejecting tax credits for non-public schools. When asked to select a preference among alternatives for Federal aid to postsecondary institutions, only 9 percent favored a tax credit such as that provided in the bill before us today.

Mr. President, this approach to aiding our non-public schools has generated opposition from a wide variety of individuals and organizations in our society who are devoted to advancing education.

LEGAL AND POLICY PROBLEMS

Mr. President, we must not ignore the fact that the Attorney General has carefully reviewed this legislation and determined that he believes it is unconstitutional in the elementary and secondary provisions. In a March 27, 1978 letter to the Budget Committee, Paul A. Freund and several other notable legal scholars take the same view regarding the constitutionality of the provisions originally in S. 2142 and now contained in the present bill. Dr. Freund is one of our Nation's leading constitutional law experts. He and his distinguished colleagues conclude:

"The conclusion seems inescapable that the provisions of S–2142 regarding elementary and secondary school expenses would be held inconsistent with the Establishment Clause of the First Amendment and thus violative of the Fourteenth Amendment to the United States Constitution."

The letter goes on to detail the primary cases in this area, in particular the Nyquist case. The Nyquist case involved a New York State law which was struck down by a U.S. Supreme Court decision in 1973. Mr. President, I ask unanimous consent that the full text of this letter be printed in the RECORD at the conclusion of my remarks.

If enacted, the tuition tax credit would certainly be immediately the subject of litigation which could take several years. During that period, it is unlikely that the proposed benefits would flow to the hopeful recipients. If this scenario were to take place, it would embitter millions of students and families who aspire to aid under a tuition tax credit.

Mr. President, it is the duty of the Congress to avoid passage of an unconstitutional measure and the tuition tax credit certainly as to elementary and secondary education is unconstitutional.

The central role of the Federal Government is to assist all our citizens in obtaining equal access to high quality educational programs which suit their needs. This theme has prevailed throughout the Federal activities. Title I of ESEA provides significant subsidy to children with economic disadvantages. Federal student aid provides a range of grants, work and loans for students who choose their own postsecondary education institution. Other disadvantages such as limited English speaking ability or physical handicaps are reached by special education programs. Absence of a sufficient local tax base is compensated by the impact aid program. Desegregation problems are eased by the Emergency School Aid Act. Civil rights and equal employment opportunities in the educational sector are enforced by Federal law. Each of these major Federal activities relates to the theme of equal access to educational opportunity. The provisions of the tuition tax credit would distort this structure. They would for the first time provide Federal financial support where no proven need exists, as in the case of wealthy families whose children attend private schools. The tuition tax credit could produce an unintended boost to private segregation academies established to avoid the constitutional guarantees for equal education. It could erode support for public schools at a critical time in their development. It could encourage tuition hikes which would totally neutralize its effects on families. It is subject to considerable fraud and abuse, as no viable means exists to cross check claims for a tax credit.

It is not a simple one line entry on a form 1040 tax return. Rather it involves a series of calculations and some proof of attendance at an eligible educational institution. At a time when many members of Congress favor a Department of Education, it could fragment educational policy between educators and tax experts at the Treasury Department. It could result in a new regulatory structure provided by the Treasury Department over what constitutes full attendance, eligible institutions, part-time attendance, etc. Finally, and most importantly, it treats wealthy families the same as poorer ones once the cost of attendance exceeds $500. This is simply not a wise way to expend such a large amount of public monies.

Mr. President, the constitutional problems inherent in the tuition tax credit proposal are so enormous that I believe we must seek another means of providing relief. Such a means is readily available to us.

ALTERNATIVES TO TAX CREDITS

Following the disposition of the tuition tax credits bill, the Senate will immediately turn to the College Opportunity Act, S–2539. This approach was unanimously reported from the Human Resources Committee. It expands the existing Basic Educational Opportunity Grants program to families with incomes up to approximately $25,000, based on the family resources and the choice of educational institution. For families who do not meet a needs test for grant support, S–2539 provides expanded access to a Federally guaranteed and subsidized loan. The income test for subsidized loans currently in Federal law is removed by S–2539. A family with substantial means, but without available liquid assets to support the heavy cost of college, particularly a private college, would have government assistance to overcome this difficulty. S–2539 also anticipates greater participation in the highly successful college work-study program, which allows a student an on-campus job which has 80% of the wages paid by the Federal government. The College Opportunity Act provides some relief for all levels of family income. It maintains the present Federal student aid philosophy of greater aid to students attending high cost, private institutions while maintaining disincentives for schools simply to raise tuition. I believe S–2539, the College Opportunity Act, represents a sound Federal policy, and should be enacted.

Regarding elementary and secondary education, the Senate will shortly take up the Education Amendments of 1978, S–1753, which reauthorize and modify the Elementary and Secondary Education Act of 1965. Throughout the consideration of S–1753, the Human Resources Committee carefully reviewed the participation in existing programs of non-public schools. In some instances, we found that existing provisions of law to assure non-public school participation had been poorly enforced and administered or were deficient in their statutory scope. I and other members of the Human Resources Committee undertook to assure that the guarantee of equitable participation was maintained for non-public school children. This is an approach which has an existing delivery system. This approach is within the constitutional framework as interpreted by the Federal Courts. This approach remains targeted on selected Federal needs, not given as general aid to education.

The continued viability of non-public schools is a critically important element of our school system in the United States. I am for maintaining choice of parents who choose a private education for their children. But I cannot accept the total distortion of the Federal efforts by providing two or three times as much aid to each private school child as is presently provided to a child in the public schools with specifically identified Federal interests. I am referring here, for example, to economically disadvantaged children served by Title I, children with bilingual difficulties as in Title VII, and problems of desegregation as addressed by Emergency School Aid. Other smaller Federal programs will have expanded guarantees for non-public school participation. In the State of New York, and many others, the private elementary and secondary schools have provided a unique educational opportunity for many students. I want to insist that these students receive their fair share of Federal assistance. The Human Resources Committee staff has prepared a full explanation of the provisions of S–1753 which strengthen the participation in existing Federal programs of non-public school children.

CONCLUSION

In conclusion, Mr. President, I cannot support the proposal for tuition tax credits. I believe it is the wrong way to go for reasons which I have discussed. It promises relief while stimulating tuition increases which would eliminate the relief within a few years. It ignores the necessary targeting of limited Federal resources on children who need help.

It ignores differences in cost between any but the lowest cost institutions. The Attorney General and others have concluded that the elementary and secondary education provisions are unconstitutional. A workable solution to meet the needs of non-public education exists in S-1753, the Education Amendments of 1978. A workable solution for college tuition relief for middle income families exists in S-2539, the College Opportunity Act. I urge the rejection of tuition tax credits.

Attachments are as follows:

Hon. JOSEPH A. CALIFANO, Jr.,
Secretary, Health, Education, and Welfare, Washington, D.C.

DEAR MR. SECRETARY: By letter dated February 8, 1978, you asked for my views on several questions which have arisen with respect to the constitutionality of legislation to provide tax credits to parents who pay tuition for their elementary and secondary schoolchildren. Shortly thereafter, Senator Eagleton asked for my views both on the constitutionality of legislation providing such credits and on a related question, the constitutionality of extending the Basic Educational Opportunity Grant Program to elementary and secondary schoolchildren.

I have asked for advice on these questions from the Office of Legal Counsel, and I am pleased to provide that Office's conclusions to you. I have also provided a copy of those conclusions to Senator Eagleton for his information.

I am in accord with the conclusions expressed by the Office of Legal Counsel. In light of existing Supreme Court precedents, it is my opinion that tax programs of the sort contemplated here would be held unconstitutional insofar as they would provide aid at the elementary and secondary school levels. However, I am of the opinion that similar aid at the college level would be constitutional.

Sincerely yours,

GRIFFIN B. BELL,
Attorney General.

HARVARD LAW SCHOOL,
Cambridge, Mass., March 27, 1978.

Hon. EDMUND MUSKIE,
Chairman, Budget Committee,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MUSKIE: This letter concerns S. 2142, the Packwood-Moynihan bill, which provides for federal income tax credits for tuition and fees paid for the education of students in colleges and in elementary and secondary schools. Under the terms of the bill, the credit applies only to expenses "required for enrollment or attendance" of students; thus the benefit to elementary and secondary school children is essentially confined to those enrolled in nonpublic schools, of whom an overwhelming majority—approximately 85%—are parochial school students. This effect is evidently welcomed by the authors of the bill, at least one of whom has explicitly observed that public subsidization of parochial schools is a purpose of the proposed legislation and is likely to pose constitutional problems. See Sept. 26, 1977, Statement by Senator Daniel Patrick Moynihan on Tuition Tax Credit Act of 1977. The character and extent of such constitutional problems is the subject of this letter, which is written in the belief that an appraisal of the likelihood of successful constitutional attack on S. 2142 might be helpful to the Budget Committee in rationalizing federal educational expenditures.

The conclusion seems inescapable that the provisions of S. 2142 regarding elementary and secondary school expenses would be held inconsistent with the Establishment Clause of the First Amendment and thus violative of the Fourteenth Amendment to the United States Constitution. As recently as 1973, the Supreme Court struck down a similar tax relief program enacted by New York State. The Court in *Committee for Public Education* v. *Nyquist*, 413 U.S. 756 (1973), noted that parochial school children comprised over 80% of the benefitted class and reasoned that, although cast as a direct grant or tax benefit to the families of school children rather than to parochial schools as such, "[t]he effect of the aid [was] unmistakably to provide support for nonpublic sectarian education." 413 U.S. at 783. The state grant of this benefit accruing only to nonpublic school children was accordingly held unconstitutional, as was a nearly identical Pennsylvania program. See *Sloan* v. *Lemon*, 413 U.S. 825 (1973). The *Nyquist* Court expressly distinguished *Everson* v. *Board of Education*, 330 U.S. 1 (1947) (permitting publicly funded transportation of parochial school children) and *Board of Education* v. *Allen*, 392 U.S. 236 (1963) (permitting publicly funded text book loans to parochial school children), on the ground that in "both [*Everson* and *Allen*] the class of beneficiaries included *all* school children, those in public as well as those in private schools." 413 U.S. at 782 n. 38 (emphasis in original).

The provisions of S. 2142 regarding elementary and secondary education closely parallel those struck down in *Nyquist* and *Sloan*. The plans invalidated in those two cases included systems of graduated reimbursements and credits constitutionally indistinguishable from the tax credits of S. 2142. The invalidated state plans, though neutral in their terms, benefitted only families of nonpublic school children, the vast majority of whom were enrolled in sectarian schools. Exactly the same is true of S. 2142.

Given the reasoning of the *Nyquist* Court, however, the proposed federal program seems even more constitutionally offensive than the New York and Pennsylvania programs invalidated in 1973. Beyond condemning the impermissibly non-secular effects of the state programs before it, the Court in *Nyquist* and *Sloan* criticized those programs for creating undue risks of impermissible entanglement between church and state: "assistance of the sort here involved carries grave potential for entanglement in the broader sense of continuing political strife over aid to religion." 413 U.S. at 794. Whereas the New York and Pennsylvania programs provided aid of up to $50 and $75 per elementary school student, respectively, and double that level per high school student, the proposed federal program provides a tax credit with a far higher limit—$500. Whatever political strife along religious lines would accompany the small state programs struck down in *Nyquist* and *Sloan* would be greatly magnified by the more expensive and expansive federal program proposed in S. 2142.

Finally, it is inconceivable that the federal tax relief program would be any more favorably received than New York's or Pennsylvania's simply because the federal government would also simultaneously enact a similar tax credit for college (and post-secondary vocational) students. That these are two separate programs is clear from the bill itself, which would enact the elementary and secondary school provisions separately from the provision relating to the college credit, would begin them in different years, and would provide for severability and expedited judicial review—the latter to resolve more swiftly the "validity of any provision." See Senate Finance Committee Report, p. 7. Moreover, the Supreme Court's Establishment Clause analyses have long been sensitive to the distinction between college education, on the one hand, and elementary and secondary education, on the other, searching aid to the latter far more strictly in order to discern non-secular purposes or effects and risks of administrative or political church-state entanglement. Contrast, e.g., *Roemer* v. *Board of Public Works of Maryland*, 426 U.S. 736 (1976) (permitting noncategorical grants to qualifying colleges and universities, including sectarian institutions, providing that the beneficiaries prepare reports detailing secular uses), with *Wolman* v. *Walter*, 433 U.S. 229 (1977) (applying stricter test for provisions aiding elementary and secondary schools). Clearly, these cases must be read as indicative of the Supreme Court's special concern with insulating early education from any suggestion of government support of religion as such—a concern consistent with isolating, and invalidating, the tax credit for elementary and secondary school tuition in S. 2142.

The converse proposition also seems correct: the Supreme Court would be likely to uphold the validity of the proposed tax credit for college tuition and fees. As indicated above, the Court has been far more tolerant of public support to sectarian colleges. Moreover, since free public education is far from universally offered at the college level, the college tuition tax credit would have the obvious secular effect of subsidizing higher education for a broad class of citizens rather than for a class most of whose members attend religious schools. For a fuller discussion, see L. Tribe, *American Constitutional Law* §§14-9, 14-12 (1978).

We hope these views will be of some help to you.

Yours truly,

[From the Washington Post, Feb. 27, 1978]

A THREAT TO THE PUBLIC SCHOOLS

The tuition tax-credit bill, reported last week by the Senate Finance Committee, threatens to do incalculable damage to this country's public schools. It would provide huge tax subsidies to private and religious elementary and secondary schools, without restriction. It promises a multibillion-dollar bonanza to schools serving every kind of ethnic and social separatism—by race, by class, by national background. These credits would, for the first time in the nation's history, swing enough tax money into the private schools to change fundamentally the balance between them and the public schools. Heedlessly and irresponsibly the Finance Committee has voted out a bill that would erode one of the central institutions of American life.

Who's responsible? It started with Sen. William V. Roth (R-Del.) and his bill to give a $250 tax credit for college tuition. The idea had a lot of appeal in Congress. The lawmakers have belatedly begun to sense the wave of resentment from their middle-income constituents, on whom they have loaded a disproportionate share of the current increases in the Social Security tax. The tuition credit seemed like a nice way to tell the middle classes that their friends in Congress haven't althogether forgotten them.

It was a bum bill, but it didn't touch any basic principles. The American tradition in college education has been pluralistic from the beginning. Federal aid goes, in great quantities, to public and private colleges alike. By the time students reach college age, they are inevitably going in many diverse directions, and there is a public interest in helping them along. The question is how to do it, and the Roth bill was objectionable merely because it would have wasted a lot of money.

But the Finance Committee's tax credit is altogether another matter. Sen. Daniel Pat-

rick Moynihan (D-N.Y.), with the assistance of Sen. Bob Packwood (R-Ore.), devised language extending the credit by 1980 to the elementary and secondary schools—doubling it. On Thursday the expanded version whipped through the committee, 14 votes to 1, under the always efficient chairmanship of Sen. Russell Long (D-La.). It was a piously bipartisan assault.

American law and usage have always treated schools differently from colleges. Most Americans understand that it takes a strong sense of national community to hold this huge and heterogeneous country together. That sense of community arises, above all, from the public schools—the experience that a child shares with others of widely differing backgrounds and conditions for 12 years or so while growing up. Subsidies that encourage parents to take their children out of public schools will inevitably diminish this strength.

We shall doubtless hear from people who argue that it is unfair to make them pay through taxes for public schools and then pay again through tuition for a private one. We disagree. If parents use a private school, that is a voluntary choice. But if they get tax subsidies for it, then it is other taxpayers who have to pay twice. They have to pay once for the public schools and again through the subsidy for the private one—and that is involuntary. If you don't like swimming in the neighborhood pool, that's up to you. But don't ask the federal government to help pay for the private pool that you want to build in your back yard.

The Finance Committee would give parents a tax credit of half the tuition they pay, up to $1,000. That's $500, and a tax credit is the same thing as a cash grant. The subsidy is big enough to start a rapid growth of every kind of private school. The Carter administration points out that by contrast, federal aid to public schools comes only to $128 per pupil. The administration adamantly opposes the whole idea of this credit, and so will anyone else who values the public schools.

[From the New York Times, Oct. 11, 1977]

HOW NOT TO EASE THE TUITION SQUEEZE

It is called the Tuition Tax Credit Plan and at first glance it looks socially just and politically irresistible. Steadily mounting school bills now face millions of middle-income taxpayers who lack the means of the rich and the access to scholarship aid of the poor. Private education is hard-pressed and needs financial help. What, then, could be more welcome than the new proposal to give tuition-paying taxpayers a tax credit of up to $500 per student? That approach, say its advocates, Oregon's Republican Senator Packwood and New York's Democratic Senator Moynihan, would not only help families; it would permit consumers to choose freely from "the supermarket" of educational institutions. It would apply to every full or part-time student who pays tuition in an accredited elementary or high school, college, university, trade or vocational school.

The Senators' analysis is sound. Galloping tuition inflation has indeed begun to squeeze middle-income families. But despite the clear evidence of trouble, the tax credit seems to us the wrong route to a worthy goal. Yet more tampering with the tax system is ill-timed; it flies in the face of current efforts to simplify the system. But an analysis of the tuition tax credit suggests even more fundamental flaws in the plan as it affects higher, let alone secondary education.

One is practical. Even present high tuition fails to meet the operating costs of reputable schools and colleges. Hence, merely providing more students will not solve—and may even intensify—their long-term financial problems. Many schools and colleges would view tax credits for students merely as an opportunity to raise tuition even further to close their budget gaps. Unless tax credits also were to escalate, the students' relief would prove short-lived. A tax credit, more likely, would produce a windfall for low-quality institutions that profit from enrollees by using a bargain-basement approach.

A second flaw is more fundamental. Senators Moynihan and Packwood have won the support of 41 Senate colleagues with the tantalizing argument that it is unfair to ask those who choose private schools and colleges to pay tuition as well as taxes to support public institutions. This reimbursement of people who do not use public services is a dangerous idea. Should there be a tax break for the citizen who prefers to ride in a taxi or limousine rather than on public transportation? Should people with spacious backyards be reimbursed for their support of the public parks they do not frequent?

Fortunately, the Packwood-Moynihan approach is not the only alternative to the educational disenfranchisement of the middle class. There is an existing system of basic opportunity grants, entitling students to subsidies based on family income, and it need only be raised to bring instant relief to middle-income families whose plight rightly worries the Senators. At the same time, the institutions' budgetary dilemma could be eased by paying them the "cost-of-education" grants which originally were to accompany every federally subsidized student. The Higher Education Act of 1972 authorized such payments, but Congress, short-sightedly, has never funded them although they seem well designed to halt the tuition spiral by shoring up institutional budgets.

The annual cost of the tax credit plan is estimated at $4.7 billion. That is a figure sufficient to inspire finding alternatives to the flawed Senate proposal.

[Excerpts from Senate Finance Committee Hearing, Jan. 19, 1978]

STATEMENT OF DONALD C. LUBICK, ACTING ASSISTANT SECRETARY OF THE TREASURY FOR TAX POLICY

COLLEGE TUITION TAX CREDITS

The Treasury Department supports the use of Federal moneys for assisting students in meeting the costs of post-secondary education. However, the Department maintains its opposition to a tax credit because a credit is an improperly targeted and inefficient method of providing such assistance. We note that we are joined in this opposition by such groups as the National Education Association, Parent Teachers Association, and the AFL–CIO. The specific reasons for our opposition, are compelling:

(1) Contrary to popular belief—a belief that lies at the heart of the support for the measures—increases in student charges in recent years have *not* outpaced the rate of growth of family income;

(2) Relief in the form of a credit would operate to the disadvantage of private institutions of higher education;

(3) The benefits of the credit would go largely to families with incomes well above the median family income, thus having an adverse distribution effect;

(4) A credit is not an efficient means of encouraging investment in higher education;

(5) A credit would make current educational policy—already a maze—even more complex;

(6) A credit would increase the costs of higher education.

The Federal Government has substantially increased its investment in higher education over the last few years and, doubtless, will increase that investment over the coming years. However, that increased investment should be responsible to the greatest needs of our educational system, and not to an illusory need that focuses solely on price increases and does not take into account corresponding increases in income.

ELEMENTARY AND SECONDARY EDUCATION

Extending a tuition tax credit for tuition charges paid by families for the cost of elementary and secondary education raises a number of problems that are different from those bearing on a tuition tax credit for higher education. At this time, Treasury opposes extending a credit to tuition costs of primary and secondary education. Again, we note that we are joined in this opposition by such groups as the National Education Association, the National School Boards Association, and the Parents-Teachers Association. The reasons for Treasury's opposition are as follows:

(1) The credit initially would be expensive and revenue costs would rise over time even without an increase in the basic credit amount;

(2) A credit raises a number of serious issues related to the nation's historical commitment to public school education.

Let me briefly review these points:

Revenue cost.—There is additional revenue cost in extending the credit beyond higher education. For instance, in S. 2142, extending a nonrefundable maximum credit of $500 or 50 percent of tuition charges to elementary and secondary education raises the cost of the bill by about $1 billion to $4.7 billion at 1980 levels of income. However, there are at least two reasons why this revenue loss would increase over the years even without an increase in the maximum credit amount. First, as with the tuition tax credit for higher education, schools could be expected to increase their tuition charges in order to share in the benefits of the credit. Second, the number of students attending private elementary and secondary schools could also be expected to increase, and thus the cost to Federal taxpayers would rise further.

Effects on public school education.—Any increase in private school attendance would also have serious repercussions on public schools.

First, an increase in private school attendance would correspond to a decline in the number of students attending public schools. A number of public school systems recently have undergone dramatic changes because of declines in birth rates, and a further decline would place further strains on those systems.

Second, a credit might be interpreted as an incentive for State and localities to charge tuition for public education at the primary and secondary level. Certainly, in the short run, it is doubtful that there would be any dramatic effects of the credit on charges by public schools. Institutionally, tuition charges currently are not allowed in most States and localities. However, in the long run, it is not clear what the incentive of a tax credit may do. Perhaps a small charge for books or other fees would be allowed, or some minimal tuition charge in place of a minimal fee schedule. Whatever the eventual reaction, the bill clearly reverses past practices by offering an incentive to charge such tuition or fees.

Third, substantial progress has been made over the last 15 years in the desegregation of both public and private schools. The effect of a tuition tax credit in this area is an unknown factor, and I hope that this Subcommittee would examine all possible ramifications of a credit in this area before taking action. At a minimum, it is clear that the credit would make it easier and cheaper for a student to attend a private school if his family wished to avoid an integrated public school.

I realize that most bills limit the credit to expenses of tuition and fees at tax-exempt institutions in order to prevent the credit from going to schools that have had discriminatory racial policies. Even here there is a difficulty, however, because some non-tax-exempt institutions, particularly voca-

tional schools, have not foregone tax exemption because of segregation, but because they are profit-making.

Fourth, without a phase-out of benefits for higher income taxpayers, some of the credit would certainly go to families with substantial income and which sent their students to elite private schools. Given our commitment to providing equality of opportunity through our public school systems, I seriously question whether public monies given to those families would be well spent.

STATEMENT BY DICK WARDEN, ASSISTANT SECRETARY FOR LEGISLATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Mr Chairman, it is a pleasure to be here today to share with you our views on proposals which would provide tax credits for educational expenses.

We agree with the Treasury Department that proposals for education tax credits or allowances should be considered by the Congress in the context of direct education assistance programs. The presence or absence of education tax credit measures obviously affects Federal educational policy, not just tax policy.

We recognize the financial pressures facing middle income families, especially families with children in college. But we believe that education tax credits are not the answer from either an education or a tax standpoint.

It is true that college costs are rising and many families must still make hard choices to finance college educations for their children. In some cases, meeting these financial demands may even result in a reduction of the family's standard of living or require the family to borrow A tax credit does not answer this need. We believe it is possible to deal with the problem of cash liquidity more equitably through combinations of grant and loan programs which distribute the assistance according to the severity of a particular family's need.

It is in this context that HEW is currently formulating proposals which will provide more assistance to middle income families and students through grant, loan and work programs. I will discuss some of the options under consideration later in my testimony.

At the elementary and secondary level, the Federal government does provide assistance to children attending private schools by enabling those students to participate in Federal education programs. We are endeavoring to increase the access of eligible private school children to Federally financed or subsidized educational services.

I would like now to turn to a discussion of the reasons for our opposition to tuition tax credits as they would relate to higher education, and elementary and secondary education.

TAX CREDITS GENERALLY

Tax credits provide the fewest benefits to those who need them the most.

Tuition tax credit proposals are generally unrelated to student need, family income, or the varying cost of attending different types of educational institutions. Most postsecondary students, even those attending low-tuition public institutions, incur sufficient expenses to be eligible for the maximum credit under most proposals.

Clearly, a tuition tax credit program, especially a nonrefundable credit, would not target funds to those who need assistance the most.

POSTSECONDARY TAX CREDITS

Tax credits would probably have little effect on postsecondary choice.

At the postsecondary level, the amounts of the tuition tax credits under consideration (generally $250 to $500) would provide only minimal help for families that may face college costs of several thousand dollars. For many people, such a credit would not affect either the decision of whether to go to college, or the type of institutions to attend. In fact for a family which invests the same amount of money in higher education regardless of the credit (as, indeed, many families will do), the credit becomes general middle income relief for some parents. If Congress decides that the burden on middle income taxpayers is so great that they require some form of general relief, we contend that the tuition tax credit is an improper vehicle for such relief since it applies only to families with children in college (or, under some proposals, in private elementary or secondary schools, as well).

ELEMENTARY-SECONDARY TAX CREDITS

Elementary-secondary tax credits could weaken public education.

An elementary-secondary tuition tax credit could undermine the principle of public education in this country. It might encourage relatively more affluent families to enroll their children in private schools, leaving the public schools for the poor. While a $250 (or even a $500) tax credit is generally a relatively low percent of the cost of postsecondary education, it is often a substantial portion of the cost of a private elementary or secondary school. Hence, parents who might otherwise have kept their children in public school might be more likely to place their children in private schools. This could accelerate the enrollment decline already underway in our public schools.

Tax credits might dry up local and state money for education.

If more middle income parents were to enroll their children in private schools, the ramifications for financing public education at the elementary and secondary levels could be severe. The number of families with children in school is decreasing anyway. A further decrease in public school attendance could only make raising education funds through bond issues or taxes even more difficult.

Parents and families who use the public schools would receive little or no benefits from the credit.

Parents with children in public schools would not benefit from an elementary-secondary tax credit. In fact, their taxes would constitute a large percentage of the tax credit money going to parents with children in private schools.

CONCLUSION

Mr. Chairman, there are no easy answers to the financial problems facing middle income families, especially middle income families with one or more children in college. But we believe a tuition tax credit proposal would be less effective and less equitable than other alternatives. Direct and targeted programs are a much more desirable way of distributing education-based aid.

We urge you to postpone any action on the proposal pending before your Subcommittee until we have had an opportunity to fully develop our alternatives for dealing with the problem of the high cost of higher education.

Mr. Chairman, I appreciate the opportunity to have been here to present HEW's views on education tax credit measures.

[Human Resource Committee Staff Paper]

PROVISIONS FOR PARTICIPATION OF CHILDREN IN PRIVATE, NON-PROFIT SCHOOLS IN FEDERAL ELEMENTARY AND SECONDARY EDUCATION PROGRAMS AS AMENDED BY S. 1753, THE EDUCATION AMENDMENTS OF 1978

TITLE I: SPECIAL EDUCATIONAL PROGRAMS AND PROJECTS FOR EDUCATIONALLY DEPRIVED CHILDREN

The largest single program of aid to elementary and secondary schools, Title I will provide well over $2 billion to local school districts for the 1978–79 school year. School districts receive aid according to their numbers of children in low-income families. Within the districts, aid goes to the schools with the greatest numbers or proportions of such children. The aid is used for special compensatory programs designed to contribute to the cognitive, emotional, social, or physical development of educationally disadvantaged children.

Current law

The Title I legislation currently enacted requires that local public schools which receive Title I funds extend the services provided from those funds to children in non-public schools who live within the attendance area served by the public school. Non-public school children must participate on an equitable basis with the public school children. When a public scohol system fails to include such children as the law requires, or is prohibited from doing so by state law, then the U.S. Commissioner of Education must by-pass the public agency and arrange for appropriate services to the non-public school children. Funds for this purpose are to be derived from the local school system's allocation.

Additional provisions in S. 1753

S. 1753 supplements the existing law with the following provisions:

Where a public school provides compensatory services to its own students from state or local funds and therefore is excluded from the Title I program, Title I services must be made available to eligible non-public school students who otherwise would have participated in that school's Title I services.

When the Commissioner of Education arranges for a by-pass and deducts funds from the public school system's allocation to provide services to non-public school children, he must deduct the administrative costs as well as the actual costs of the services.

If a complaint has been filed or an investigation is underway regarding insufficient participation of non-public school children, the Commissioner of Education may withhold from the public school system in question the amounts of Title I funds necessary to fund appropriate non-public school services pending final resolution of the complaint or investigation.

The Commissioner's determination that a by-pass of services is necessary will remain in effect until the Commissioner determines that the local education agency will properly meet the requirements for serving non-public school students.

When a complaint has been filed against a state or local education agency regarding inadequate participation of non-public school children, the amount of time allowed for the agency to show cause before the Commissioner makes a determination is reduced from sixty to forty-five days.

The state education agency must have a plan for monitoring and enforcing local school systems' compliance with Title I requirements. This plan must describe how the state education agency will determine whether local school systems are serving non-public school children as required. It must also contain procedures for resolving complaints that non-public school children are not receiving services for which they are eligible.

The Commissioner of Education must develop and implement written procedures both for resolving appeals of state complaint resolutions, and for conducting independent onsite investigations. These procedures must include the following elements:

specific time limits for resolving a complaint or for completing a review and any necessary independent investigation within sixty days;

opportunity for the complainant to present evidence;

requirement that the complainant and others involved be notified in writing within ten days after the resolution of the appeal of the nature of the resolution, the reasons

therefor, and the right to an administrative appeal;

dissemination of information concerning the procedures.

TITLE II: BASIC SKILLS AND EDUCATIONAL PROFICIENCY

This is a new program of aid proposed to help state and local education agencies improve the skills of children in reading, mathematics, and written and oral communication.

In order to receive funds, state and local education agencies must consult with non-public school officials and design their funding proposal to take into account the needs of children in non-public schools and provide an opportunity for them to participate on an equitable basis with public school children.

TITLE III: SPECIAL PROJECTS ACT

This Act provides funds to state and local education agencies, other public and private agencies, organizations and institutions, and to individuals, to carry out projects which meet special educational needs or place particular emphasis on national education priorities, or to disseminate information to state and local education agencies. The Act is an umbrella for a number of specific program areas, including separate funds for metric, arts, consumers, law-related, environmental, health, correction, and population education, plus funds for preparing disadvantaged youth to pursue training in the biomedical sciences, and for preparing young people for jobs.

S. 1753 adds the following new provision which is applicable to all programs under the Special Projects Act:

In order to receive funds, state and local education agencies must consult with non-public school officials and design their funding proposals to take into account the needs of children in non-public schools and provide an opportunity for them to participate on an equitable basis with public school children.

TITLE IV: EDUCATIONAL IMPROVEMENT, RESOURCES, AND SUPPORT

Title IV provides funds to state and local education agencies for a number of different purposes, including acquisition of instructional materials and library resources; improvement of educational practices (such as meeting special local educational needs, or involving parents more in the education of their children); guidance, counseling, and testing; and special programs for gifted and talented children.

Current law

Existing law for Title IV mandates the equitable participation of non-public school children in programs operated by public school systems. When the local school system is prohibited by state law from providing, or has substantially failed or is unwilling to extend its Title IV programs to non-public school children on an equitable and comparable basis, the Commissioner of Education is authorized to by-pass the public school system and pay for the cost of services to these children from the state's allotment of Title IV funds. The findings of the Commissioner with respect to proper participation of non-public school children are to be conclusive, except that the courts may remand a case to the Commissioner for further action if deemed appropriate. In addition, the guidance and counseling programs newly incorporated under Title IV by S. 1753 contain provision for institutes, workshops, and seminars to improve the qualifications of teachers and counselors in non-public schools as well as in public schools.

Additional provisions in S. 1753

S. 1753 retains the above provisions of existing law and adds the following new provisions:

Pending final resolution of an investigation or complaint, the Commissioner may withhold from the state or local education agency the amount of their Title IV funds necessary to pay the cost of appropriate services to non-public school children.

The Commissioner's determination that a by-pass of funds to serve non-public school children is necessary is to remain in effect until the Commissioner determines that there will no longer be a failure of the state or local education agency to meet the requirements of equitable and comparable participation of non-public school children.

The amount of time allowed for a local or state education agency to show cause or submit objections before the Commissioner makes a determination in response to an allegation of insufficient non-public school participation is reduced from sixty to forty-five days.

When a local school district receives no Title IV funds for acquisition of library and learning resources, the state education agency is to arrange for services to non-public school children in that district when such services are requested.

Title IV funds for "improvement in local educational practices" can be used to meet the need of children in non-public schools for improved educational services, and to diagnose learning problems and assess educational problems of children in such schools.

In order to qualify for funds for acquiring library and learning resource materials and for programs for gifted and talented children, local education agencies must consult with private school officials in order to take into account the needs of non-public school children in the design of their proposal.

TITLE V: STATE LEADERSHIP

This is a new title which provides funds to state education agencies for administering ESEA* programs and for strengthening education agency management. The title contains the following provisions with respect to participation of non-public school children in ESEA programs:

A state education agency may withhold ESEA funds from local education agencies which do not comply with requirements for participation of non-public school children.

A state education agency may use Title V funds for strengthening management for:

Assessing the educational progress of children in non-public as well as in public schools;

Coordinating public school programs with non-public school programs;

Monitoring participation of non-public school children in Federal education programs.

States must make information and technical assistance available to private school officials who desire to arrange for children in their schools to participate in Federal education programs.

State Advisory Councils on Quality Education must include representatives of non-public elementary and secondary schools.

TITLE VI: EMERGENCY SCHOOL AID ACT

This Act provides assistance to local school systems and certain organizations for instructional services, human relations efforts and other activities related to the purposes of preventing, reducing and eliminating minority group isolation and the resulting educational disadvantagement.

Current law

S. 1753 extends the provisions currently in the law regarding participation of non-public school children and staff in ESAA programs. The law requires that there be equitable participation of children, teachers, and other educational staff in non-public schools when such schools meet certain non-discrimination criteria and when their participation would help achieve the purposes of ESAA.

Current law provisions continued by S. 1753 also require that there be a by-pass of the local public school system and direct provision of services to non-public school children and education staff when the local education agency fails to provide for their appropriate participation or when the agency is prohibited by state law from doing so.

TITLE VII: BILINGUAL EDUCATION ACT

The Bilingual Education Act supports programs in local school systems which demonstrate effective ways of helping children with limited English proficiency progress through the educational system.

Current law

The law currently requires that services funded under this act must be extended to non-public school children whose educational needs are of the type the program is intended to serve and who attend schools in the area to be included in the public school program.

Additional provisions in S. 1753

S. 1753 retains the requirements of existing law and adds the following new provisions.

When a public school system which applies for funds is unable or unwilling to provide for the required participation of non-public school children, the Commissioner of Education may either withhold approval of the application until the school system demonstrates compliance with the requirements, or reduce the amount of the grant by the amount required to assess the needs of the non-public school children and to carry out a program for them.

● Mr. HATHAWAY. Mr. President, educating all of our children to their full potential is critically important to their own future, and to the future of our society as a whole.

Economic progress requires that workers receive the skills and training necessary to adjust to a rapidly changing technology. In our democratic system of government, an educated electorate is vital to insuring that sound leadership is encouraged and simplistic appeals ignored.

Throughout my career in Congress I have been privileged to serve on the committees responsible for education legislation and to have participated in the shaping of the major Federal efforts in this area. It has always been my view that education represents a sound investment on the part of government and of society as a whole. It is an investment which pays handsome dividends—direct and indirect.

One of the best examples of this of which I am aware is the GI bill. This allowed veterans returning from World War II and subsequent wars to also return to school to complete their education or acquire new skills. It required an outlay of over $12 billion on the part of the Federal Government. But, by 1970, this investment of $12 billion had yielded approximately $100 billion in increased Federal tax revenues directly attributable to the education and skills veterans gained under the GI bill.

At the same time, education represents an investment in new ideas—ideas to meet our energy needs, ideas to provide quality, accessible, and cost-effective health care, and ideas to promote sound economic development, with decent jobs and housing for all our citizens. The ideas leading to solutions to these and many other very difficult problems will only come to us through education provided equitably to all our citizens.

Our society as a whole, and our demo-

*Elementary and Secondary Education Act.

cratic system of government, is founded on equality of opportunity with special emphasis on equal opportunity through education to pursue any occupation or activity for which an individual is qualified. This notion is at the heart of the so-called American dream.

But without swift and decisive action by Congress this dream will become only a dream, with no realistic possibility of fulfillment. And for many of our citizens it could become a nightmare, holding out false promise and futile hope.

The rising costs of public and private institutions of postsecondary education are well-documented and if help is not forthcoming it will mean doors will be increasingly closed to students from low- and middle-income families. The college board has shown that over the past 5 years tuition and fees at private 4-year institutions have increased by 54 percent, at public 4-year institutions by 57 percent. At private 2-year institutions the costs have gone up 52 percent, and at public 2-year institutions the increase has been a staggering 130 percent.

Accompanying these increased costs has been a steady decline in participation in postsecondary education by students from lower and middle income families—a decline amounting to 20 percent according to one source.

IMPACT ON PRIVATE ELEMENTARY AND SECONDARY

These same phenomena are at work with regard to our Nation's private elementary and secondary school system. Approximately 10 percent of our Nation's schoolchildren attend these schools on the basis of free choice and considerable family sacrifice. These schools which in many parts of the country form an integral part of community cultural, religious, and ethnic traditions are in grave financial trouble.

Though in many minds the idea of a private school conjures up images of exclusivity and elitism, the facts by and large do not fit this image.

In fact, in many instances the so-called private school plays a very large public role, and the distinctions to be drawn between public and private schools are blurred in many communities, with private schools serving as critically important and open resources utilized by the surrounding communities.

In this regard I refer my colleagues to the excellent study prepared by the New England Association of Schools and Colleges, entitled "A Study of the New England Academy, a Private School in a Public Role." Examples of these sorts of educational institutions which over many years have played a key role in meeting the educational needs of students from surrounding communities are Foxcroft Academy in Dover-Foxcroft, Maine; Fryeburg Academy in Fryeburg, Maine; George Stevens Academy in Blue Hill, Maine; Lee Academy in Lee, Maine; Lincoln Academy in Lincoln, Maine; Maine Central Institute in Pittsfield, Maine; Oak Grove-Coburn in Vassalboro, Maine; Thornton Academy in Saco, Maine; North Yarmouth Academy in Yarmouth, Maine; and Washington Academy in East Machias, Maine, to name just a few. Over time some of these schools have become fully a part of the public school system. But others have valued and retained their independence, but in so doing have been no less important to meeting the needs of all their community's citizens.

Overall, private schools offer a more economical education. In 1974, the last year for which complete data is available, private elementary and secondary school students were educated at a per pupil cost of $1,191 versus $1,281 at public schools.

At parochial schools the difference in cost was more sharply drawn. In 1973, the per pupil cost of elementary parochial education was $310, and in secondary parochial schools it was $700.

The continued existence and vitality of these schools contributes toward increased accountability on the part of our public school system. And when sought out by families who must at the same time shoulder the burdens of rising property taxes and rising State and Federal taxes which in combination provide approximately $100 billion in aid to public educational institutions, these private schools stand as a strong example of pluralistic independence and quality.

In the last 10 years, though, enrollment at private schools has declined by 35 percent at the elementary school level, and by 13 percent at the secondary school level. This latter figure is particularly disturbing when viewed alongside a nationwide increase in secondary enrollment of 18 percent.

In the State of Maine, enrollment figures for parochial schools have demonstrated an even more dramatic decline. In the 1968–69 academic year, there were approximately 15,000 students attending 50 parochial elementary schools, and an additional 2,700 students in 5 parochial schools.

For the 1977–78 school year, there were 6,448 students in 23 parochial elementary schools, and 1,300 students in 4 parochial secondary schools.

Thus in 10 years the number of schools and the number of students attending those schools have been more than cut in half.

It is important that these and other nonpublic schools continue to exist in order to insure competition and promote excellence among all schools—public and private.

These declining enrollments are clearly a symptom of overly strained family budgets, which find it increasingly difficult despite preferences and traditions to endure outlays for elementary and secondary tuition payments with public schools available as an economical alternative.

But individual families who are increasingly forced to make this agonizing decision on economic grounds may in the long run create even greater economic problems for every taxpayer.

If the 7.7 million students who are currently enrolled in private elementary, secondary, and postsecondary institutions were to instead enroll in tax supported schools, the increased education bill to the taxpayer would be $17 billion every year.

In Maine, the increased cost to the taxpayers for providing public education to those currently enrolled in parochial elementary and secondary schools could be as high as $10 million per year.

FREE CHOICE

This tax credit proposal will provide a much needed boost to families, particularly lower and middle income families to provide for the educational needs of their children. It will not solve family budgetary problems nor will it offer an instant panacea to the financial difficulties of all our private schools.

But it will stand as an example of commitment on the part of our Federal Government to provide much needed assistance in this vital area, while at the same time preserving the fundamental values of independence and free choice.●

Mr. GOLDWATER. Mr. President, I wish to get the attention of the managers of the bill.

Mr. President, I propose to call up my amendment 3445, but I do not want it voted on today with so many absentees.

I would wonder if there would be any objection to my asking that the vote be withheld until the leadership decides when the votes will be on either Monday or Tuesday. I have not heard.

Mr. PACKWOOD. I have no objection to that. I think all of us are hoping we can finish this bill Monday afternoon, Monday night or certainly no later than Tuesday. I have no objection to that suggestion.

Mr. HOLLINGS. I wonder, Mr. President, if the distinguished Senator from Oregon will agree to a time on my amendment.

Mr. PACKWOOD. What?

Mr. HOLLINGS. As to my amendment also, I wish to get that same courtesy for our amendment.

Mr. PACKWOOD. He did not ask for a particular time. He said he did not want it voted on today, that he would be happy to work out with the leadership a time for it to be voted on. I said that was fine. I hope we finish the bill by Monday night or Tuesday, anyway.

Mr. HOLLINGS. I see.

We previously tried to negotiate a time before Tuesday, and that is the only idea I had in mind. I withhold, and I am perfectly agreeable, and we will call up our amendment later.

Mr. GOLDWATER. I think it would be wise, I support to both leaders on the floor, that we withhold votes until the troops are all back. This is a very important piece of legislation and the absentees are gaining by the moment, and I think within another hour we will have trouble getting a quorum. So I appreciate the attitude of both Senators.

AMENDMENT NO. 3445

(Purpose: To Provide a Credit for Residential Property Taxes Paid for the Support of Public Schools)

Mr. GOLDWATER. Mr. President, I call up my amendment No. 3445 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arizona (Mr. GOLDWATER) for himself, Mr. HATCH, and Mr. MCINTYRE, proposes amendment numbered 3445.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 13, line 21, strike out "Tuition Tax" and insert in lieu thereof "Education Expense".

On page 15, line 2, strike out "section" the second time it appears and insert in lieu thereof "sections".

On page 18, between lines 4 and 5, insert the following:

"(3) CREDIT NOT ALLOWED TO TAXPAYER CLAIMING SECTION 44D CREDIT.—The credit allowable by subsection (a) for any taxable year shall not be allowed in the case of a taxpayer who claims the credit allowable by section 44D for the taxable year.".

On page 18, line 5, strike out "(3)" and insert in lieu thereof "(4)".

On page 23, line 2, strike out the closing quotation marks and the second period.

On page 23, between lines 2 and 3, insert the following:

"SEC. 44D. RESIDENTIAL PROPERTY TAXES PAID FOR SUPPORT OF PUBLIC EDUCATION.

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the State and local residential property taxes paid or accrued during the taxable year which are imposed for the support of public elementary and secondary education, but only to the extent that such taxes do not exceed $150 ($75 in the case of a married individual filing a separate return) for the taxable year.

"(b) STATE AND LOCAL RESIDENTIAL PROPERTY TAXES.—For purposes of this section, the term 'State and local residential property taxes' means—

"(1) State and local real property taxes (within the meaning of section 164) on property which is comprised primarily of one or more dwelling units, including mobile homes, and the land on which the dwelling unit or units are situated.

"(2) State and local taxes (other than real property taxes) or license fees on mobile homes, and

"(3) in the case of a State or locality in which taxes or fees described in paragraph (1) or (2) are not a substantial source of revenues raised for the support of public education, any other State or local taxes imposed for the support of public education.

"(c) DETERMINATION OF AMOUNTS OF RESIDENTIAL PROPERTY TAX PAID FOR SUPPORT OF PUBLIC EDUCATION.—For purposes of subsection (a) the amount of any State or local residential or real property tax which is imposed for the support of public elementary and secondary education shall be—

"(1) with respect to any residential real property tax imposed solely for such support, the amount of such tax; and

"(2) with respect to any residential property tax imposed in part for such support, the portion of such tax—

"(A) designated in the bill for such tax submitted to the taxpayer by the taxing jurisdiction in imposing such tax; or

"(B) determined from information set forth in such bill or from information furnished to the taxpayer by the taxing jurisdiction,

as the amount of such tax which is imposed for the support of public elementary and secondary education.

"(d) TAXES CONSTRUCTIVELY PAID.—Under regulations prescribed by the Secretary the provisions of subsections (d) and (e) of section 164 shall apply to real property taxes with respect to which a credit is allowable under subsection (a).

"(e) APPLICATION WITH OTHER CREDITS.—

"(1) CREDIT APPLIED AFTER PRECEDING CREDITS.—The credit allowed by subsection (a) shall not exceed the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under a section of this part having a lower number or letter designation than this section, other than the credits allowable by sections 31 and 39.

"(2) CREDIT NOT ALLOWED TO TAXPAYER CLAIMING SECTION 44C CREDIT.—The credit allowable by subsection (a) for any taxable year shall not be allowed in the case of a taxpayer who claims the credit allowable by section 44C for the taxable year.".

On page 25, line 7, before "shall" insert "or section 44D of such Code (relating to residential property taxes paid for support of public education)".

On page 26, strike out the matter appearing before line 1 and insert in lieu thereof the following:

"Sec. 44C. Educational expenses.
"Sec. 44D. Residential property taxes paid for support of public education.".

On page 26, between lines 6 and 7, insert the following:

"(3) Subsection (a) of section 642 of such Code (relating to special rules for credit against tax for estates and trusts) is amended by adding at the end thereof the following new paragraph:

"'(3) RESIDENTIAL PROPERTY TAXES PAID FOR SUPPORT OF PUBLIC EDUCATION.—An estate or trust shall not be allowed the credit against tax for residential property taxes paid for support of public education provided by section 44D.'.

"(4) DEDUCTION FOR TAXES TO BE REDUCED BY TAX FOR WHICH CREDIT IS TO BE CLAIMED.—Subsection (c) of section 164 of such Code (relating to deduction denied in case of certain taxes) is amended by adding at the end thereof the following new paragraph:

"'(3) Taxes described in section 44D(b), to the extent that the taxpayer is allowed a credit for the taxable year for residential property taxes paid for the support of public education under section 44D.' ".

On page 27, line 4, before the period insert the following:

"and for amounts paid or incurred after such date for residential property taxes paid for support of public education".

Mr. GOLDWATER. Mr. President, this amendment is cosponsored by Senators HATCH and MCINTYRE, and Senator MCINTYRE particularly wanted to be here but he is absent campaigning up North.

Mr. President, let me preface my remarks by saying that I have no objection to H.R. 12050, the tuition tax credit bill.

I support it. I am a cosponsor and, in fact, I introduced one of the very first school tax bills, both for public and private schools, back in 1961, which bill was S. 991. That bill, the Educational Opportunity Act, included a public school tax credit similar to the one we are proposing today.

(Mr. HODGES assumed the chair.)

Mr. GOLDWATER. I believe the pending bill can be improved. It will be fairer if it applies across the board to public school taxpayers as well as to taxpayers who pay private school tuition at the primary or secondary level.

I might say, Mr. President, I did not have a lot of luck with this back in 1961. I think I got 10 votes. But there are some Senators still here who voted for it, Senators CURTIS, EASTLAND, STENNIS, and THURMOND, so at least I do have some support lingering around.

As it stands now, the elementary and secondary school provisions of H.R. 12050 direct 100 percent of the relief to taxpayers whose children attend private schools. These children represent around 10 percent—I think that figure would be closer to 9 if the leadership statement is correct—of the total elementary and secondary enrollment in the country. But, Mr. President, what about the parents of the other 90 percent of schoolchildren? Why does the bill not include any relief for their educational expense?

Mr. President, I believe it is logical, since we are addressing a heavy financial burden of persons who are paying educational expenses, to expand the bill by adding a public school tax credit for taxpayers who would otherwise be omitted from the relief provided by H.R. 12050.

I personally do not have trouble with the bill on constitutional grounds. In fact, Mr. President, if we go back into the history of the first amendment, the separation of church and State, our history is replete with examples of the Federal Government helping private schools. I think of Princeton, the University of Chicago, Harvard, and many other schools that are now considered private schools, but which were at one time helped by the Federal Government. I have never been able to understand any argument that it would be unconstitutional to help the schools. I can cite examples even in modern times, as recently as a few years ago, where very large amounts of Government property were transferred to churches without any clamor having been raised by Congress.

But to help ease the concern of any of my colleagues who see constitutional problems in the tuition tax credit, I suggest that by treating the subject as general tax legislation offering relief to all taxpayers, rather than as special legislation in aid primarily of parochial and other private school students, there will be far less basis for arguing that the effect of the elementary and secondary provisions of the bill is to advance religion.

But, Mr. President, that is not my only reason for offering the amendment. Property tax relief is needed in its own right. No other major tax in our public finance system bears down so harshly on low-income households. No other tax is so clearly an antihousing levy and a threat to homeownership. No other major tax imposes a levy on unrealized capital gains, and no other tax falls more heavily on the elderly than the property tax.

Mr. President, we are hearing a lot today about suggested reductions in the income tax. The highest figure I have seen is something around $160. Now, $160 is not going to make or break the average person who pays income taxes. But the great burden of taxation, the great percentage, in my opinion, falls on the homeowner whose home taxes have increased in a terrible way. I do not like to cite my own example, and I should not, but my taxes have gone up from $400 to $7,000 in just a matter of about 15 years, and major portion of that goes to the schools in my district.

If I am in that fix people who live in this country with smaller homes are in

even worse shape. So I think the relief that is offered in both of these approaches, the relief offered in H.R. 12050 and the relief offered in my amendment, would do more for the average American than the paltry little income tax cut the President is offering and that the House is sending over to us.

If you want to talk about saving $1,000 a year, my ears will go up. But I cannot get excited about saving $100 or $150 a year for an income taxpayer.

Mr. President, at Senate hearings on property tax relief held in 1973, the American Association of Retired Persons presented testimony clearly depicting the plight of elderly homeowners. Letter after letter was introduced into the hearing from older persons who complained that due to the property tax they were paying more for taxes in their retirement, than they were when they were working. Some of the elderly had to give up their homes because they could no longer afford living in them. Therefore, I believe, the amendment can stand on its own merits, independent of the tuition tax credit which it would balance.

Mr. President, according to the latest available housing survey made by the Bureau of the Census, there are 48 million owner-occupied single-family households in our country. This includes 4.6 million mobile home units that are used for year-round living. It is these 48 million one-family households that are covered by my amendment.

The taxpayer with a commercial apartment house or with business realty is not eligible for a tax credit under the amendment. It is only private individuals, Mr. President, not businesses, who can qualify.

If approved, my amendment will do the following:

First. Grant a Federal income tax credit of $150 for residential property taxes paid for the support of public schools, or for other State or local taxes paid for the support of public education in those few States, such as Hawaii and Alaska, where property taxes are not a substantial source of education revenues.

Second. It will treat mobile homeowner's as first-class citizens by qualifying the license fees and other taxes they pay on their mobile homes as being eligible for the residential property tax credit.

Third. It will prevent double-dipping by disallowing a property tax credit in any tax year to any person who claims the tuition tax credit for that same year.

Fourth. It will require that a taxpayer who itemizes deductions must subtract from those deductions the amount of tax credit claimed for property taxes.

Mr. President, homeownership is increasing at the highest rate ever. Official Census Bureau data show that 65 percent of all American households now own their own dwellings and within 5 years this will be up to the 70 percent level. I think it is high time that we provide Federal tax relief to this growing class of citizens who are up against the mounting pressure of higher residential assessments.

Mr. President, I urge the adoption of my amendment.

Mr. HATCH. Mr. President, as always, I am honored to join with my friend and our esteemed statesman, the senior Senator from Arizona (Mr. GOLDWATER), in offering an amendment to this tuition tax credit legislation; an amendment which provides a tax credit for residential property taxes paid for the support of public schools.

I am especially pleased to do so, because our amendment represents a first. It will be the first genuine property tax relief this legislative Chamber will be giving to the working, productive middle of our country. It will be the first substantive tax break property owners will be getting, but it will be more than this. It will be a legislative signal to be transmitted to the people back home, communicating to them our solidarity and sympathy and understanding of the oppressive property tax spiral which is a continuing cause of misery for millions of Americans.

Individual Americans owning homes or condominiums, and especially those burdened with property taxes in support of educational expenses, deserve a break. Our amendment giving a Federal income tax credit of $150 to these families will provide this needed relief. It will also include mobile homeowners as eligible by qualifying license fees and other taxes on mobile homes as eligible. This amendment is not intended to replace or in any way contravene the tuition tax credit legislation, legislation to which I am a cosponsor. No, it complements the bill, and it does so by expending the provisions of the bill to give relief to all taxpayers carrying the special burdens of educational expenses. To be very clear, our amendment cannot be used by a taxpayer who has already chosen to claim a tuition tax credit in his or her respective income tax form. Either one or the other must be used, not both. In this way, Senator GOLDWATER and I believe that abuse will be prevented, and that the genuine and immediate needs of citizens will be met.

Mr. President, this amendment belongs in the tuition tax credit bill. To contend that it is merely an afterthought or that it is tangential to the purpose of the tuition tax credit legislation is to misunderstand the whole problem that many of us in this Chamber recognize and are trying to solve. This problem is the total, mounting and unreasonable tax pressure which is making our country less productive and driving our citizens to despair. The quality and availability of education, both private and public; the chances a struggling family have to buy and keep a home; and the very decision to start and maintain a family against the mounting costs of homeowning and education. These all have a common denominator.

They are all linked to a prevailing problem, one which is all the more urgent for us as a legislative body to solve, because the people back home know full well that it can be solved. It can be solved by placing the implicit limit our amendment establishes, a limit on the power of government at all levels to confiscate the property and wealth of every individual American.

We are presented with a signal opportunity to serve the pursuit of happiness for the millions of Americans in question, and to do so in support of an improved, more diversified and competitive educational system at all levels. I commend Senator GOLDWATER for once again performing a valuable service to our country, and I solicit the support of my fellow Senators in voting for our amendment to the tuition tax credit bill.

I thank the Chair.

Mr. GOLDWATER. Mr. President, to make it formal, I ask unanimous consent that the vote on this amendment be held on the day that the leadership decides votes will be held on other amendments.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, what is the request?

Mr. GOLDWATER. I made a statement before the majority leader came on the floor that I would like to have this vote occur on whatever day or time the leadership decides other votes will be held, because there are not many Senators present and I would like to have Senators be able to vote on this amendment who are not here, and in fact I have had a specific request. Had I not had assurance from both sides that they would not object to this request, I would not have offered the amendment at this time.

Mr. ROBERT C. BYRD. I am very amenable to trying to work out a time as to votes on amendments. There is a good attendance on this side of the aisle. However, I would not expect to have a vote on an amendment dealing with this subject today; but as to other votes, we have a good attendance. The Senator is addressing himself to a time for a vote on his amendment, and I will be very happy to speak with Senator HOLLINGS, Senator MOYNIHAN, and the Senator from Arizona to see if we can possibly work out a time.

Mr. GOLDWATER. Whatever time the leadership decides on. If it is a matter of my preference, I would suggest Monday afternoon or Tuesday afternoon, but just so we are not required to have a vote on it today, because of not many people being here.

Mr. ROBERT C. BYRD. Yes. Well, there are many people here, but I know Senators want to vote on this issue, and they should have an opportunity to know when a vote will occur, because it is an issue that they feel bound to take a position on.

It will not be a surprise vote; I think Senators ought to be alerted as to the time for a vote on this particular issue.

Mr. GOLDWATER. I appreciate the usual courtesy of the majority leader. He is very fair in this matter, and I will accept any time except today, just so it is before midnight and after 6 o'clock in the morning.

The PRESIDING OFFICER. Does the Senator from Arizona withdraw his unanimous-consent request?

Mr. GOLDWATER. Yes, I withdraw that request.

I ask unanimous consent to have printed in the RECORD with my remarks an article published in the CONGRESSIONAL RECORD of July 20, 1961, listing the Government properties—this list came from HEW—that had been given to parochial schools in different States in the country.

This list, which was given to me in 1961, contains 79 cases. In all, there are hundreds of these gifts to religious schools and I will provide the Senate with an updated, complete list on Monday. The program is still continuing today.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FEDERAL AID TO EDUCATION

Mr. GOLDWATER. Mr. President, since the beginning of the efforts to pass Federal aid to education legislation in this Congress the subject of parochial schools has constantly been before us. Fear has been expressed that direct contributions to these schools would constitute a violation of constitutional intent, but I would direct my colleagues' attention to the fact that this Government has for many years been giving property to parochial schools and up to this time no one has raised the constitutional issue over these actions.

It has not been possible for me to gather a complete inventory of these gifts, but I do have 79 cases at this time, and before we begin debate on the NDEA I will offer a complete list to the Senate. HEW tabulated 299 cases of property released to church schools broken down by denomination as follows:

Denomination participating:	Number of cases
Catholic	140
Seventh-day Adventist	54
Baptist	26
Methodist	20
Others	59

I offer this listing to show that we have been at this business of aiding parochial schools for a good many years, and that the activity is not confined to one church group, but to at least five and, in all probability, the next list will show more.

I ask unanimous consent that a partial list of religious affiliated schools which have been granted land and buildings under the Surplus Property Act of 1944 be printed at this point in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

A PARTIAL LIST OF RELIGIOUS AFFILIATED SCHOOLS WHICH HAVE BEEN GRANTED LAND AND BUILDINGS UNDER THE SURPLUS PROPERTY ACT OF 1944

State	Property received	Acquisition cost in dollars	Fair value in dollars	Public benefit allowance in percent discount off fair value or actual cash paid in dollars
Alabama: Assumption of Our Lady School	Craig Air Force Base	30,243	1,000	$50.
Alaska:				
Alaska Mission of Seventh-day Adventists	Elmendorf Air Force Base property	22,372	700	$35.
Catholic Bishop of North Alaska	FAA Repeater Station	117,000	11,700	$585.
Alaska Methodist University	Fort Richardson Military Reservation	23,160	2,100	$105.
Alaska Mission of Seventh-day Adventists	Elmendorf Air Force Base property	22,892	500	$25.
Moravian Children's Home and School	Federal Aviation	68,400	6,800	$340.
Arizona: Arizona Conference Corp. of Seventh-day Adventists	Thunderbird Field No. 2	743,000	240,784	60 percent.
Arkansas: Southern Baptist College	Walnut Ridge Air Base	1,493,552	436,351	100 percent.
California:				
Monterey Bay Academy of the Seventh-day Adventists	Camp McQuaide	1,619,888	349,189	Do.
St. Thomas School	Sherman Institute Bureau of Indian Affairs	225	2,200	60 percent.
St. Joachim School	Air Force Rocket Engine Facility	810	12,960	$5,184.
Beaumont Elementary School of the Seventh-day Adventists	March Air Force Base properties	15,963	2,400	$120.
Monterey Peninsula Seventh-day Adventist Church School	Fort Ord Military Reservation	9,576	1,110	$55.
Beaumont Elementary and Junior High School of Seventh-day Adventists	March Air Force Base properties	28,968	3,900	$195.
Colorado: Western Bible Institute	Lowry Air Force Base properties	85,056	57,000	$2,850.
Connecticut:				
St. Bridget's Church School	Elmwood Acres housing project	50,536	24,550	80 percent.
St. Maurice Roman Catholic Church School	White Oaks housing project	40,347	28,043	Do.
Florida: John B. Stetson University (Baptist)	Deland Naval Air Station	704,501	218,116	100 percent.
Georgia:				
Redemptorist Fathers Parochial School	Fort Oglethorpe	99,876	18,500	Do.
Sacred Heart School	Wherry housing area	500	8,700	$2,610.
Hawaii: Grace Chapel Elementary School	USO recreation center	108,963	70,200	80 percent.
Idaho. (None reported as of Dec. 31, 1960.)				
Illinois: (None reported as of Dec. 31, 1960.)				
Indiana. (None reported as of Dec. 31, 1960.)				
Iowa. (None reported as of Dec. 31, 1950.)				
Kansas. (None reported as of Dec. 31, 1960.)				
Kentucky: St. Catherine's School	Fort Knox Military Reservation properties	17,245	500	$25.
Louisiana. (None reported as of Dec. 31, 1960.)				
Maine. (None reported as of Dec. 31, 1960.)				
Maryland:				
St. Stephen School	North Severn housing area properties	18,064	1,000	$50.
Waldorf Seventh-day Adventist School Board	U.S. naval air station	9,389	500	$15.
Good Shepherd School	North Severn housing area properties	8,096	500	$25.
Woodstock College, a Roman Catholic theological seminary	do	16,193	1,000	$50.
Massachusetts:				
Immaculate Conception Church School	Nitre depot	44,400	40,000	100 percent.
Congregation of Sacred Heart School	Otis Air Force base	16,738	400	$10.
Michigan: St. Francis of Assisi Congregation School	National Guard training reservation	694	2,420	80 percent.
Mississippi. (None reported as of Dec. 31, 1960.)				
Missouri:				
College of the General Council of the Assembly of God	O'Reilly General Hospital properties	1,576,025	991,985	100 percent.
St. Agnes High School	do	34,001	45,900	40 percent.
St. Bernadette Elementary School	Jefferson Barracks	224,066	193,115	100 percent.
Montana. (None reported as of Dec. 31, 1960.)				
Nebraska:				
St. John Vianney Seminary	Omaha District Service Base	4,000	600	$30.
St. Mary's School	Nebraska Ordnance Plant	726	300	$15.
Nevada. (None reported as of Dec. 31, 1960.)				
New Jersey: Central Jersey Christ School, Inc.	Shark River Hills Hotel	200,482	32,000	80 percent.
New Mexico:				
St. Michael's College	Burns General Hospital	1,324,455	330,301	100 percent.
Berean Mission Navajo School	Kirtland Air Force Base properties	8,000	672	$33.60.
Brethren Navajo Mission Board School	do	12,000	1,050	$52.50.
New York:				
Bishop Duffy High School	Niagara Falls Public Housing Authority project	169,076	72,076	60 percent.
Buffalo Academy of the Sacred Heart	Lake Ontario Ordinance Works	7,500	Leased	
New York Protestant-Episcopal Public School	Department of the Army facilities	3,000	1,521	100 percent.
School of the Mill Hill Fathers, Inc	Schenectady General Depot	3,515	1,000	$50.
North Carolina: Presbyterian Junior College for Men	Laurinburg-Maxton AAB	440,940	113,406	100 percent.
North Dakota. (None reported as of Dec. 31, 1960.)				
Ohio:				
School of the Ohio Conference Association of the Seventh-day Adventists	Properties of the Veterans' Administration	15,075	11,733	Do.
Pontifical College, a Roman Catholic theology seminary	Department of Agriculture	14,806	300	$15.
St. Helen School	Clinton County Air Force Base	2,200	500	$25.
Oklahoma: St. Gregory's College	Old Shawnee Agency	325	300	$15.
Oregon:				
Lebanon Seventh-day Adventist School	John Day lock and dam project	1,200	900	$45.
St. Therese School	U.S. naval station	2,650	1,000	$50.
Pennsylvania:				
Elementary school of the Catholic Diocese of Harrisburg	Veterans' Administration hospital site	26,008	38,129	80 percent.
St. John Bosco School	Lacey Park housing project	9,375	9,375	Do.
Mercyhurst Catholic College	Antiaircraft artillery site, 70 properties	7,500	1,500	$75.
School of the Benedictine Sisters of Erie	Antiaircraft artillery site, 90 properties	5,500	1,000	$50.

A PARTIAL LIST OF RELIGIOUS AFFILIATED SCHOOLS WHICH HAVE BEEN GRANTED LAND AND BUILDINGS UNDER THE SURPLUS PROPERTY ACT OF 1944—Continued

State	Property received	Acquisition cost in dollars	Fair value in dollars	Public benefit allowance in percent discount off fair value or actual cash paid in dollars
Pennsylvania—Continued				
School of the Diocese of Erie Blessed Sacrament	do	5,500	1,000	$50.
Villa Maria Catholic College	do	8,250	1,500	$57.

Mr. GOLDWATER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I believe it is agreeable with Mr. MOYNIHAN, Mr. HOLLINGS, Mr. GOLDWATER, and the minority leader that a vote occur on the amendment by Mr. GOLDWATER at 6 o'clock p.m. on Monday.

Mr. GOLDWATER. Fine with me.

Mr. ROBERT C. BYRD. I therefore make that request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. That means that the vote will be an up or down vote.

Mr. GOLDWATER. I will ask for the yeas and nays at that time.

Mr. ROBERT C. BYRD. I ask for them now, and ask unanimous consent that it be in order.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATCH. Mr. President, if the Senator will yield, do I understand there will not be a motion to table?

Mr. ROBERT C. BYRD. There can be no motion to table on that amendment.

I would hope that it might be possible sometime during the remainder of this day or on Monday to reach an agreement to vote on the amendment by Mr. HOLLINGS, likewise up or down, perhaps on Tuesday afternoon, or after 6 o'clock on Monday, perhaps, or Tuesday at a given time. I am open to suggestions whenever Senators wish to make them.

Mr. DECONCINI. Mr. President, I ask unanimous consent that Romano Romani and John Mulkey of my staff be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The distinguished Senator from West Virginia.

D.C. APPROPRIATIONS BILL

Mr. ROBERT C. BYRD. May I ask the distinguished minority leader if he has been successful in getting away from the 3-day rule on the D.C. appropriations bill?

Mr. BAKER. Will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. BAKER. Mr. President, it is with some reluctance that I must rise to tell my friend, the majority leader, that since our previous colloquy we have renewed our efforts to obtain a waiver of the 3-day rule. While we have made a good bit of success in that respect there are still objections to it and I am not able to accede to his request.

Mr. MATHIAS. Could I inquire of the majority leader when he anticipates under these circumstances the D.C. appropriations might come before the Senate?

Mr. ROBERT C. BYRD. I wanted to bring it up today. Mr. President, the rule would not run its course until when?

The PRESIDING OFFICER. Tuesday.

Mr. ROBERT C. BYRD. Not until Tuesday. We are bound hand and foot, gagged, but still kicking and screaming until Tuesday.

Mr. MATHIAS. I will tell the majority leader that as far as I am concerned I am prepared to do it today or on Tuesday or any other day.

Mr. ROBERT C. BYRD. The Senator is prepared and I am aware of that. The chairman of the subcommittee (Mr. LEAHY) is prepared. I understand it can be done in almost nothing flat, but we cannot go ahead.

Mr. MATHIAS. We will have to abide the time with patience.

Mr. ROBERT C. BYRD. With the patience of Job.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL TRADE COMMISSION AMENDMENTS OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 3816.

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the bill (H.R. 3816) to amend the Federal Trade Commission Act to expedite the enforcement of Federal Trade Commission cease and desist orders and compulsory process orders; to increase

the independence of the Federal Trade Commission in legislative, budgetary, and personnel matters; and for other purposes; and requesting a further conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. ROBERT C. BYRD. I move that the Senate insist upon its amendment and agree to the request of the House for a further conference on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. CANNON, Mr. FORD, Mr. DURKIN, Mr. SCHMITT, and Mr. DANFORTH conferees on the part of the Senate.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

OLIN E. TEAGUE VETERANS' CENTER

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 11579.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 11579) to designate the Veterans' Administration center located at 1901 South First Street, Temple, Tex., as the "Olin E. Teague Veterans' Center."

Mr. CRANSTON. Are we ready now to proceed to H.R. 11579?

The PRESIDING OFFICER (Mr. MOYNIHAN). Without objection, the bill will be read a second time by title.

The bill was read a second time by title.

Mr. CRANSTON. Mr. President, H.R. 11579 would name the VA center in Temple, Tex., after a great American, OLIN E. "TIGER" TEAGUE.

Similar legislation, S. 2842, was introduced on April 6, 1978 by my distinguished colleague, the Senator from Texas (Mr. BENTSEN) and is cosponsored by the senior Senator from Texas (Mr. TOWER).

"TIGER" TEAGUE, one of the most decorated combat veterans of World War II ever to serve in the Congress, has announced he will retire after 32 years in the House of Representatives. He will be ending a long, dedicated, and illustrious career as a fighter for veterans.

The young "TIGER" TEAGUE spent 2 years recovering from combat wounds at the hospital which became the Temple, Tex., VA hospital and is now part of the VA center there. Immediately upon coming to the Congress in 1946, "TIGER" TEAGUE began to fight for benefits to aid veterans and their families to return to civilian life. He chaired an inquiry into GI bill abuses which led to corrective legislation for veterans returning from the Korean conflict. This concern for veterans' educational benefits has always been a matter of special emphasis for him. It has been my pleasure and privilege to work very closely with "TIGER" TEAGUE for the past 9 years on GI bill matters and I have always been impressed with his knowledge of the program. From time to time, we have had honest disagreements, but we have always reasoned together to resolve those differences. Whenever the Senate has approached "TIGER" TEAGUE on GI bill issues, he has always been willing to examine and discuss changes to improve the program.

He has also had a tremendous influence on the medical program of the Veterans' Administration and on other veterans benefits programs. He led the way in preserving an independent VA Department of Medicine and Surgery in the 1973–1974 period of great travail and controversy arising out of the disagreements between the then Administrator of Veterans' Affairs and the then Chief Medical Director; he then went on to pledge and provide consistent support to each of their successors in the agency. He began a campaign—still moving forward today—which has, since fiscal year 1972, already resulted in adding new hospital workers to bring VA hospital staffing ratios into line with those in community hospitals.

As testimony to his dedicated career, "TIGER" TEAGUE recently received the Veterans' Administration's Exceptional Service Award, the VA's highest commendation to an individual. In closing, I would like to read part of the citation to that award:

While his congressional leadership has been manifest for many years in a variety of activities that serve our country, it is in the field of Veterans' Affairs that he is remembered with particular appreciation and devotion.

For 31 years he has served on the House Committee on Veterans' Affairs, and for 18 of those years he was its distinguished chairman, tenures without parallel in the annals of the Committee.

No person in the history of America has had such a salutory effect on the lives of veterans and their families.

No member of Congress has ever exerted as much leadership or has been so successful in producing fair, enlightened and helpful legislation for America's veterans.

His extraordinary contributions are recognized with admiration and gratitude as we grant—for the first time to a person outside the agency—this highest honor the Veterans Administration can bestow.

I can add no more except to note that, although I have not generally been enthusiastic about legislation to name Veterans' Administration Hospitals, I wholeheartedly support the House-passed measure in honor of OLIN E. TEAGUE.

Mr. President, I ask unanimous consent that Garner Shriver may have the privilege of the floor throughout consideration of this measure; and Janice Orr and John Pressly also.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT 1649

(Purpose: To provide for the naming of a Veterans' Administration hospital)

Mr. CRANSTON. Mr. President, I now send to the desk an amendment on behalf of myself and the Senators from Florida (Mr. STONE and Mr. CHILES). This amendment would name the hospital in Tampa, Fla., after the former Congressman James A. Haley. This has been twice approved by the Senate, and the House has passed a measure with a similar purpose.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON), for himself, Mr. STONE, and Mr. CHILES, proposes an unprinted amendment numbered 1649.

Mr. CRANSTON. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

TITLE I—NAMING OF THE TEMPLE, TEXAS, VETERANS' ADMINISTRATION CENTER FOR OLIN E. TEAGUE

SEC. 101. The Veterans' Administration center located at 1901 South First Street, Temple, Texas, shall hereafter be known and designated as the "Olin E. Teague Veterans' Center". Any reference to such center in any law, regulation, document, map, record, or other paper of the United States shall be deemed to be a reference to the Olin E. Teague Veterans' Center.

SEC. 102. The provisions of this title shall take effect on January 4, 1979.

TITLE II—NAMING OF CERTAIN VETERANS' ADMINISTRATION HOSPITALS

SEC. 201. The Veterans' Administration hospital in Tampa, Florida, shall hereafter be known and designated as the "James A. Haley Veterans' Hospital". Any reference to such hospital in any law, regulation, document, map, record, or other paper of the United States shall be deemed to be a reference to the James A. Haley Veterans' Hospital.

SEC. 202. The provisions of this title shall be effective on the date of enactment of this Act.

● Mr. CHILES. Mr. President, I join today with Senator STONE in submitting an amendment to H.R. 11579 to pay tribute to a man who has worked unselfishly for many years on behalf of veterans in the State of Florida. This legislation will designate the Veterans' Administration Hospital in Tampa, Fla. the "James A. Haley Veterans' Hospital." Mr. Haley has a long and distinguished record of public service. During the First World War, Mr. Haley was a member of the 1st Division which saw action in every major battle which the U.S. Army Expeditionary Force participated. Since his discharge Mr. Haley has actively advocated the rights of veterans. As a member of the Florida Legislature, he served on the Committee on Military and Veterans' Affairs and during his stay in the State legislature, the State of Florida's Division of Veterans' Affairs was established.

Mr Haley was first elected to Congress in 1953. In 1955 he became a member of the House Committee on Veterans' Affairs and served 18 distinguished years on the Subcommittee on Hospitals. He served as chairman of the subcommittee for 8 years.

The veterans of the State of Florida were well-served during his years on the

Subcommittee on Hospitals. During this period, three new Florida Veterans' Administration hospitals were constructed in Gainesville, Tampa, and Miami. He was also a key figure in the modernization of the facilities at Lake City and Bay Pines.

Mr. Haley's service to veterans has not gone unnoticed. He has received commendations from the American Legion, the Veterans of Foreign Wars of the United States, the Disabled American Veterans, and the Veterans of World War I, USA.

It is my pleasure to join with Senator STONE in offering this amendment to designate the Tampa Veterans' Administration facility as the "James A. Haley Veterans' Hospital." ●

● Mr. STONE. Mr. President, it is my pleasure to join with my senior colleague from Florida (Senator CHILES) in offering this amendment to name the veterans' hospital in Tampa, Fla., the "James A. Haley Veterans' Hospital."

This amendment is identical to a bill, H.R. 1678, which passed the House of Representatives unanimously on June 20, 1977. It has the support of the entire Florida congressional delegation.

As a member of the U.S. House of Representatives for 24 years from 1953 until 1977, Representative James Haley not only effectively represented Florida's large and fast-growing veteran population, but also became the spokesman for veterans' rights on a nationwide scale. In 1955, he accepted assignment to the House Committee on Military and Veterans' Affairs. For 18 years, Representative Haley served on the Hospital Subcommittee and was chairman of the subcommittee for 8 years.

Mr. Haley is a true believer in the concept of the Veterans' Administration as an agency devoted to the special needs of persons who distinguished themselves by serving their country during wartime. His efforts were instrumental in preventing the elimination of Veterans' Administration hospitals and regional offices where they were needed. Mr. Haley helped to expand the VA medical program to make it more responsive to the ever-increasing veteran population all over the country.

Mr. President, James Haley's lifelong devotion to the welfare of those who risked their lives for our country should not go unrecognized. The Veterans' Hospital in Tampa that Mr. Haley worked so hard to obtain is an example of America's commitment to her veterans. There could be no more fitting tribute to a man whose major goal in life is to assure that that commitment is upheld.●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California.

The amendment was agreed to.

Mr. CRANSTON. Mr. President, I believe that both Senators from South Carolina (Mr. THURMOND and Mr. HOLLINGS) have amendments to my amendment.

UP AMENDMENT 1650

(Purpose: To provide for the naming of certain Veterans Administration hospitals)

Mr. THURMOND. Mr. President. I am sending to the desk an amendment which will name the Veterans Administration hospital at Columbia, S.C., the "Wm. Jennings Bryan Dorn Veterans' Hospital."

I might say this is practically the same amendment that I introduced some time ago, in which Senator HOLLINGS of South Carolina joined me.

The PRESIDING OFFICER. Is there objection to the amendment being in order?

Mr. CRANSTON. I ask unanimous consent that the amendment may be in order.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. THURMOND. Mr. President, this amendment also would name the VA hospital in Bedford, Mass., the "Edith Nourse Rogers Memorial Veterans Hospital." These two former Members of the House of Representatives distinguished themselves, when chairmen of the House Committee on Veterans' Affairs, in their untiring efforts on behalf of our Nation's veterans.

Mr. President, Wm. Jennings Bryan Dorn is a native of Greenwood County, S.C., where he has resided since his birth in 1916. At the age of 22 he was elected to the South Carolina House of Representatives, and became a State Senator at the age of 24. He served in the Army Air Corps and was one of seven brothers in service during World War II.

Mr. Dorn was elected to the U.S. House of Representatives in 1946 and served 26 years. He was chairman of the House Committee on Veterans Affairs during the 93rd Congress and served a total of 23 years as a member of that committee. Without the resourcefulness and industry that characterized Mr. Dorn's many contributions to the development and improvement of the VA hospital system, health care for veterans would not be what it is today.

Mr. President, I do not know of any person who deserves this honor more than former Congressman Dorn. I am very pleased to offer the amendment. As I say, it is similar to the amendment I offered previously, in which Senator HOLLINGS of South Carolina joined.

Edith Nourse Rogers, former Congresswoman from the Commonwealth of Massachusetts, was first elected to the 69th Congress. During her outstanding tenure as Congresswoman, one of her most auspicious accomplishments was as chairman of the House Committee on Veterans' Affairs, which position she held during the 80th and 83rd Congresses. Mrs. Rogers was noted for her desire to serve disabled veterans. Such service originated when she worked for the Red Cross during the First World War in 1917.

Representative Rogers passed away September 10, 1960, at the age of 79. She spent 35 of those years in outstanding service as a Member of the Congress of the United States, the majority of which time was spent benefiting our Nation's veterans.

Mr. President, in view of the history of Mr. Dorn's lasting contributions and Mrs. Rogers' dedicated service, I believe it is exceedingly appropriate that these VA hospitals bear their names. I urge that this measure receive the full support of my colleagues.

Mr. President, I ask unanimous consent to have printed in the RECORD, following my remarks, certain letters by veterans' organizations endorsing the naming of the veterans' hospital in Columbia after former Congressman William Jennings Bryan Dorn.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

VETERANS OF FOREIGN WARS,
Columbia, S.C., April 26, 1978.

Hon. RAY ROBERTS,
Committee Chairman, House Veterans Affairs Committee, Washington, D.C.

DEAR CHAIRMAN ROBERTS: The Department of South Carolina, Veterans of Foreign Wars of the United States, at its Council of Administration meeting on April 23, 1978, voted unanimously to name the new Veterans Administration Hospital in Columbia, South Carolina, The William Jennings Bryan Dorn Veterans Administration Memorial Hospital.

We request your support in getting this bill out of Committee and reported to the House of Representatives for passage.

This tribute to former Congressman Dorn is in appreciation for his long tenure of service and dedication to the veterans of America.

Sincerely yours,

DAVID L. HUTTO,
Adjutant, Department of South Carolina V.F.W.

RESOLUTION NO. 315

To name the Veterans Administration Hospotal in Columbia, S.C., the William Jennings Bryan Dorn Veterans Administration Memorial Hospital

Whereas, former Representative William Jennings Bryan Dorn served in the Congress of the United States for twenty-six years and introduced or co-sponsored considerable legislation beneficial to veterans, their dependents and survivors; and

Whereas, Mr. Dorn, by his own request, was a member of the House Committee on Veterans Affairs for twenty-three years; and

Whereas, during the 93rd Congress Mr. Dorn was elected Chairman of the House Committee on Veterans Affairs by the Democratic caucus of the United States House of Representatives by an overwhelming vote of 149 to 4; and

Whereas, Congressman Dorn was instrumental in seeing that a new Veterans Administration hospital was constructed in Columbia, South Carolina; now, therefore

Be it resolved, by the 78th National Convention of the Veterans of Foreign Wars of the United States. that we support the introduction and passage of legislation to the Congress of the United States to name the Veterans Administration hospital in Columbia, South Carolina the William Jennings Bryan Dorn Veterans Administration Memorial Hospital.

THE AMERICAN LEGION,
Washington, D.C., August 10, 1978.

Hon. RAY ROBERTS,
Chairman, Committee on Veterans Affairs, Washington, D.C.

DEAR CONGRESSMAN ROBERTS: The House Veterans Affairs Committee has before it for consideration H.R. 13229, a bill to provide that the Veterans Administration Hospital at Columbia, South Carolina, shall be named in honor of former Congressman William Jennings Bryan Dorn.

The American Legion has no active mandate with regard to H.R. 13229. However, this organization has a great and fond regard for former Congressman Dorn. We recall his service on the Veterans Affairs Committee, and as its Chairman. Congressman Dorn's interest in and concern for the nation's veterans manifested itself in the devoted work he did in veterans legislation during his service in the House.

The American Legion considers that it would be a suitable honor to his record of service to veterans, to name in his honor the VA Hospital at Columbia.

Sincerely,

R. E. LYNGH,
Director, National Veterans Affairs and Rehabilitation Commission.

APRIL 26, 1978.

Hon. RAY ROBERTS,
Committee Chairman, House Veterans Affairs Committee, Washington, D.C.

DEAR CHAIRMAN ROBERTS: The Department of South Carolina Veterans of Foreign Wars of the United States at its Council of Administration meeting on April 23, 1978 voted unanimously to name the new Veterans Administration Hospital at Columbia, South Carolina, the William Jennings Bryan Dorn Memorial Hospital.

On behalf of the Swansea Ladies Auxiliary to Veterans of Foreign Wars Post No. 6829, we request your support in getting this bill out of committee and reported to the House of Representatives for passage. The former Congressman Dorn spent many, many years in Congress which were dedicated to the Veterans of America.

Sincerely yours,

ALICE B. HUTTO,
Secretary.

Mr. THURMOND. At this time, I yield to my distinguished colleague from South Carolina (Mr. HOLLINGS).

Mr. HOLLINGS. Mr. President, I thank my distinguished colleague.

As we move away from war toward peace and the years intervene, we should always have a positive and clear memory of the contribution of the veterans. This, Mr. President, was the kind of leadership and thought given by our former colleague, William Jennings Bryan Dorn. He left the chairmanship of the Veterans Committee after years of distinguished service up here, particularly in behalf of the veteran, to run for Governor of South Carolina. He first took on a general. The general asked about a certain thing and Mr. Dorn said, "Well, I believe I would rather have the votes of all the privates."

He was not successful in that race but, in the minds of many, the way he conducted himself in the campaign and stood strong and tall for veterans and has continued since that time has won the admiration of everyone. As a former veteran of the war and as a member of the American Legion and the Veterans of Foreign Wars, this is a fitting tribute. Bryan has worked not only in South Carolina but all over the United States and the world in behalf of our American veterans. I am glad to join in this tribute to him and ask that a hospital be named the William Jennings Bryan Dorn Hospital in Columbia, S.C.

Mr. THURMOND. I thank the distinguished, able Senator from South Carolina.

I send to the desk the amendment, which I ask the clerk to state.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Carolina (Mr. THURMOND), for himself and Mr. HOLLINGS, proposes an unprinted amendment numbered 1650.

(1) redesignate section 202 as section 204; and

(2) insert the following new sections:

SEC. 202. The Veterans' Administration hospital in Bedford, Massachusetts, shall hereafter be known and designated as the "Edith Nourse Rogers Memorial Veterans' Hospital". Any reference to such hospital in any law, regulation, document, map, record, or other paper of the United States shall be deemed to be a reference to the Edith Nourse Rogers Memorial Veterans' Hospital.

SEC. 203. The Veterans' Administration hospital in Columbia, South Carolina, shall hereafter be known and designated as the "Wm. Jennings Bryan Dorn Veterans' Hospital". Any reference to such hospital in any law, regulation, document, or other paper of the United States shall be deemed to be a reference to the Wm. Jennings Bryan Dorn Veterans' Hospital.

Mr. TOWER. Mr. President, I would like to say a brief word on H.R. 11579, an act to designate the Veterans' Administration center in Temple, Tex., as the Olin E. Teague Veterans' Center.

I think that no one in the Congress of the United States has a greater reputation for being a man of conviction and honor and of great personal courage than "TIGER" TEAGUE.

A much decorated veteran of World War II, he has served his country well in the Congress of the United States, a man widely respected by Members on both sides of the aisle in the House of Representatives, a man who is an institution in his own State of Texas, and a man who is universally respected, a distinguished graduate of Texas A. & M. He is sometimes called Mr. A. & M.

I think this is really rather a small honor that we pay to honor a colleague in the Congress who served his country so well, in so many ways. He is retiring this year. He is not standing for reelection and we hate to see him go.

I know the people of Texas will applaud the action of the Congress in conferring on him this small honor of naming the veterans' center after him.

I can say that there is no honor more richly deserved. Of course, I urge the favorable action on this measure by my colleagues in the Senate.

Mr. JACKSON. Mr. President, I had the great privilege of serving in the House with OLIN "TIGER" TEAGUE.

I must say that few have served in that body with greater distinction than "TIGER" TEAGUE. He has been an outstanding Congressman.

What has already been said here has been said better than anything I can say regarding his service to his country, especially in World War II.

Mr. President, more recently he has chaired the Committee on Science and Technology where I worked very closely with him. He has taken a very keen interest in that subject. He has been a fine, distinguished and outstanding in every way chairman of that committee.

I cannot think of a more fitting tribute to "TIGER" TEAGUE than the naming of the Veterans' Administration center in Texas for "TIGER" TEAGUE.

Mr. THURMOND. Mr. President, I would like to say, in addition to the remarks I have already made, just a word about the other two gentlemen.

I have known TIGER TEAGUE since 1954 as one of the foremost Members of Congress. TIGER TEAGUE is one of the men who has impressed me as being a courageous man of capacity who loves his country and has served it well, not only in time of war, but in time of peace. In time of war, he developed the name of Tiger because he was considered such an outstanding fighter, and he has been a fighter for the good things of life in peacetime as well as he fought for his country in wartime.

I am very pleased that this hospital in Texas will be named for him.

With regard to Mr. Haley, I say that he was in the Congress when I came here, too, and he is an outstanding, able man.

He retired from the House several years ago. He was a very popular man. I am sure he could have been elected again if he had cared to. But he was considered a statesman and a scholar.

I feel it is altogether fitting that this veterans' hospital in Florida be named for this outstanding, great American.

Mr. GOLDWATER. Mr. President, I would like to ask the Senator from California a question, but before I say that, because my remarks might be misconstrued, I can back up everything that has been said about TIGER TEAGUE. I served with him. I have tremendous respect for him.

The question I have comes because of this reason. When we seek to name geographic points in this country after a person, that person cannot be living.

Now, has the Committee on Veterans' Affairs established any rule—that may not be the word—but any requirements for the recognition of living people by naming the different hospitals, bases, et cetera, after them? Is there a rule, or can anybody be suggested?

Mr. CRANSTON. I would like to respond in this way. First, let me say that because TIGER TEAGUE will be a Member of the Congress until the end of this session, the naming of the hospital for him will be in a separate title that will not take effect until January 4 next year, when he will no longer be a Member of Congress.

The others will take effect, immediately, if the bill is enacted.

Second, the Veterans' Affairs Committee does not have a rule on the topic that the Senator from Arizona, quite appropriately, asked about. We have had a policy that I have supported of generally not naming hospitals after living people. It is for that reason, because we did not want to change that policy, and taking into account the very strong support that was behind the Tiger Teague bill which came over from the House, and that was the first to reach here, I asked it be held at the desk so it could be dealt with in the wisdom of the Senate without establishing a precedent on policy by the Veterans' Affairs Committee that would vary from our present policy of generally not doing this.

Mr. DURKIN. Will the Senator yield?

Mr. GOLDWATER. I will yield in just a moment.

I would like to suggest, as a veteran, that the Veterans' Committee look into this—with no disrespect to TIGER TEAGUE, I think if there is any man living entitled to it that he is—but I can see a great proliferation in the number of people in each State that we might like to honor that way. It is rather staggering.

I like the national parks system of waiting. I am waiting for three. I do not like to wait for people to pass on, but I have suggested three different geographic names, and they will not be applied until after they have passed on.

Mr. CRANSTON. May I say that I concur with the recommendation. I accept it wholeheartedly. I will see to it the Veterans' Committee takes up this policy discussion.

Mr. DURKIN. Mr. President, in answer to the Senator's question to the Senator from California, a precedent was established last year with the Federal office building in Manchester, N.H., wherein it was named after my predecessor, Mr. Cotton, who is not in the best of health, but still a very valuable citizen in the State of New Hampshire.

Mr. GOLDWATER. I am just worried about the exactness of it and the great proliferation that might come, again, with no disrespect to anybody, and it is a matter for the future.

Mr. CRANSTON. Mr. President, these amendments would add to H.R. 11579 provisions to name the VA hospitals in Tampa, Fla., and Bedford, Mass., after James A. Haley and the late Edith Nourse Rogers, respectively. James A. Haley's 24 years of distinguished service in the House of Representatives included 18 years as the chairman of the House Veterans' Affairs Committee's Subcommittee on Medical Facilities and Benefits, a position in which he provided effective leadership to bring about significant improvements in VA health and hospital care. The late Edith Nourse Rogers, after working with the Red Cross on behalf of disabled World War I veterans, served 18 terms in the House of Representatives, was chairman of the House Veterans' Affairs Committee for two Congresses, and worked tirelessly to insure fair treatment for veterans. Legislation to accomplish the naming of those VA hospitals has twice passed the Senate—the first time on September 9, 1977, as sections 401 and 501 of H.R. 5027, and the second time on July 31, 1978, as sections 401 and 402 of H.R. 10173. However, the House has not acted on those bills as amended by the Senate.

Mr. President, the bill as amended would also incorporate the provisions of S. 3341, as introduced by the Senators from South Carolina, to provide for the naming of the Veterans' Administration hospital in Columbia, S.C., after William Jennings Bryan Dorn. Mr. Dorn, who resigned his seat in the Senate of the State of South Carolina after the bombing of Pearl Harbor in order to volunteer for military service and who then served for 3½ years in the Army Air Corps, was elected to the House of Representatives in 1946. He served there for 26 years and retired from the Congress in 1974. Mr. Dorn served on the House Committee on Veterans' Affairs for 23 years and was its chairman during the 93d Congress. His long, distinguished, and productive service on behalf of the Nation's veterans were especially notable in the area of the VA's hospital and medical system and the GI bill, which he worked so hard to improve.

Mr. President, the other body has indicated that it is agreeable to this amendment so that, upon passage of the bill as amended by the Senate, the House of Representatives can be expected to agree to this amendment and send the bill on to the President for signature.

In view of the need to move forward at this time on this legislation, I have agreed to proceed with the naming of the South Carolina hospital because I have been assured by the Senators from South Carolina and the House Committee on Veterans' Affairs that the full South Carolina delegation is in support of this measure and that the veterans' organization in that State likewise support it. However, I believe that normally a measure like this should originate in the other body.

Mr. President, I have discussed the amendment with the two Senators from South Carolina and the two Senators from Florida, and I am prepared to accept it.

Mr. THURMOND. Mr. President, I ask for a vote on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Carolina.

The amendment was agreed to.

Mr. CRANSTON. Mr. President, I know of no other amendments except an amendment to the title, which I will bring up later. So I suggest we proceed to passage.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 11579) was passed.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CRANSTON. Mr. President, I send to the desk an amendment to the title.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

Amend the title so as to read: "An Act to designate the Veterans' Administration center located at 1901 South First Street, Temple, Texas, as the 'Olin E. Teague Veterans' Center'; and for other purposes.".

The PRESIDING OFFICER. The question is on agreeing to the title amendment.

The amendment was agreed to.

THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 994, on page 23 of the calendar; No. 1008 and No. 1011, on page 25 of the calendar; No. 1012, on page 26; No. 1014, on that page, through No. 1023, on page 27.

Mr. BAKER. Mr. President, before the Chair grants that unanimous-consent request, I advise the majority leader that these items are cleared on our calendar.

Also, I say to the majority leader that each of these items requires a waiver of the 3-day rule, and I waive the 3-day rule as an accommodation to the majority leader.

Mr. ROBERT C. BYRD. Mr. President, the distinguished minority leader engages in a friendly twit of my nose.

May I say that all these measures together are not worth one regular appropriation bill. I would not care if the 3-day rule were not waived on any of these. By the way, one of them is mine. S. 2366 is mine. That is one I passed over, and it will not pass today.

Therefore, so far as I am concerned, the minority leader has not really shed any blood for the Republic by waiving the 3-day rule on these items. But I do want to say that he tried diligently again to get the 3-day rule waived on the District of Columbia appropriation bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I included No. 1023 in my list. I understand that one is not ready yet, so I remove that from the list.

The PRESIDING OFFICER. Without objection, it is so ordered.

AGRICULTURE FOREIGN INVESTMENT INFORMATION ACT OF 1978

The bill (S. 3384) to require foreign persons who acquire, transfer, or hold interests in U.S. agricultural land to report such transactions and holdings to the Secretary of Agriculture, and to direct the Secretary to assess and report the effects of such transactions and holdings, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 3384

Be it enacted by the Senate and House of Representaives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Foreign Investment Information Act of 1978".

DEFINITIONS

SEC. 2. For purposes of this Act, the term—

(1) "agricultural land" means any land located in the United States that is generally used for producing agricultural commodities (including forest products), raising livestock or poultry, or other agricultural purposes as defined in regulations to be prescribed by the Secretary;

(2) "foreign nation" means any nation other than the United States;

(3) "United States" means the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, and the territories and possessions of the United States;

(4) "foreign person" means—

(A) an individual who is not a citizen of the United States and who has not been lawfully admitted to the United States for permanent residence under the Immigration and Nationality Act;

(B) a person, other than an individual or a government, that is created or organized under the laws of a foreign nation or that has its principal place of business in a foreign nation;

(C) a person, other than an individual or a government, that is created or organized under the laws of a State of the United States, the District of Columbia, or a territory, possession, or Commonwealth of the United States and that, as defined in regulations to be prescribed by the Secretary, is substantially controlled by individuals referred to in subparagraph (A) of this paragraph, persons referred to in subparagraph (B) of this paragraph, governments of foreign nations, or any combination of such individuals, persons, or governments; and

(D) a government of a foreign nation;

(5) "person" includes any individual, corporation, company, association, firm, partnership, society, joint stock company, trust, estate, and any other similar entity; and

(6) "Secretary" means the Secretary of Agriculture.

REPORTING REQUIREMENTS

SEC. 3. (a) Any foreign person who holds any interest (including leaseholds of five or more years and beneficial interests in the land under contracts of sale or similar arrangements), other than a security interest, in agricultural land on the day before the effective date of this Act shall submit, or have a designated agent submit, a report to the Secretary not later than one hundred and eighty days after the effective date of this Act. Such report shall be submitted in such manner as the Secretary shall prescribe by regulation and shall contain—

(1) the legal name and address of the foreign person;

(2) in any case in which the foreign person is an individual, the citizenship of the foreign person;

(3) in any case in which the foreign person is not an individual or a government—

(A) the nation in which the foreign person is created or organized;

(B) the principal place of business of the foreign person;

(C) the legal name and address of each person who holds a substantial interest (as defined in regulations to be prescribed by the Secretary) in the foreign person and, in any case in which the holder of such an interest is an individual, the citizenship of the holder and, in any case in which the holder of such an interest is not an individual or a government, the nation in which the holder is created or organized and the principal place of business of the holder;

(4) the type of interest in the agricultural land that is held by the foreign person;

(5) a legal description of the agricultural land, including the State and county in which the land is located and the total acreage involved;

(6) the date of acquisition of the interest and the purchase price paid for, or any other consideration given for, the interest; and

(7) such other information as the Secretary may require by regulation.

(b) Any foreign person who acquires or transfers any interest (including leaseholds of five or more years and beneficial interests in the land under contracts of sale or similar arrangements), other than a security interest, in agricultural land shall submit, or have a designated agent submit, a report to the Secretary not later than thirty days after the date of such acquisition or transfer, except that the reporting of any such transaction occurring during the first one hundred and eighty days after the effective date of this Act may be deferred until thirty days after expiration of the one-hundred-and-eighty-day period. Such report shall be submitted in such manner as the Secretary shall prescribe by regulation and shall contain—

(1) the legal name and address of the foreign person;

(2) in any case in which the foreign person is an individual, the citizenship of the foreign person;

(3) in any case in which the foreign person is not an individual or a government—

(A) the nation in which the foreign person is created or organized;

(B) the principal place of business of the foreign person;

(C) the legal name and address of each person who hold a substantial interest (as defined in regulations to be prescribed by the Secretary) in the foreign person and, in any case in which the holder of such an interest is an individual, the citizenship of the holder and, in any case in which the holder of such an interest is not an individual or a government, the nation in which the holder is created or organized and the principal place of business of the holder;

(4) the type of interest in the agricultural land that is acquired or transferred by the foreign person;

(5) a legal description of the agricultural land including the State and county in which the land is located and the total acreage involved;

(6) the purchase price paid or received for, or any other consideration given or received for, the interest;

(7) in any case in which the foreign person transfers the interest, the legal name and the address of the person to whom the interest is transferred and—

(A) in any case in which the transferee is an individual, the citizenship of the transferee; and

(B) in any case in which the transferee is not an individual or a government, the nation in which the transferee is created or organized and the principal place of business of the transferee; and

(8) such other information as the Secretary may require by regulation.

(c) With respect to any person whose legal name is contained in any report submitted under subsection (a) or (b) of this section, the Secretary may take such actions as the Secretary considers necessary to determine—the legal name and address of any person who holds any interest in the person whose legal name is contained in the report and—

(1) in any case in which the holder of such interest is an individual, the citizenship of the holder; and

(2) in any case in which the holder of such interest is not an individual or a government, the nation in which the holder is created or organized and the principal place of business of the holder.

REPORTS AND MONITORING

SEC. 4. (a) The Secretary shall—

(1) develop and distribute within sixty days after the effective date of this Act a standard report form (and related instructions) that will facilitate automated data processing, analysis, and reporting of the information collected under section 3 of this Act;

(2) seek the cooperation and assistance of States and county governments, make maximum effective use of Department of Agriculture field offices, and use such other means as may be necessary, to make wide distribution of the standard report forms and instructions, publicize the reporting requirements and procedures established under section 3 of this Act, and collect the reports required under section 3 of this Act;

(3) analyze information obtained by the Secretary under section 3 of this Act and determine the trends with respect to ownership or control of United States agricultural land by foreign persons and the actual and potential effects that the acquisition, transferring, and holding of United States agricultural lands by foreign persons have or will have on the agricultural industry of the United States, on the economy of the United States, on the foreign relations of the United States, and on such other matters as the Secretary determines of interest or concern to the President or Congress; and

(4) transmit, as prescribed in subsection (b) of this section, to the President, the Committee on Agriculture of the House of Representatives, and the Committee on Agriculture, Nutrition, and Forestry of the Senate, reports on the Secretary's findings and conclusions regarding analyses and determinations made under paragraph (3) of this subsection.

(b) The Secretary's findings and conclusions regarding the analyses and determinations required under subsection (a) of this section shall be transmitted—

(1) with respect to information obtained by the Secretary under section 3(a) of this Act, within ten months after the effective date of this Act; and

(2) with respect to information obtained by the Secretary under section 3(b) of this Act, on an annual basis, beginning with calendar year 1979, within three months after the end of each calendar year.

(c) The Inspector General of the Department of Agriculture shall conduct periodic studies to determine the reliability of the information reported under section 3 of this Act and the effectiveness of the Secretary's procedures for obtaining, analyzing, and reporting information under this section.

CIVIL PENALTY

SEC. 5. (a) Whoever violates any provision of section 3(a) or 3(b) of this Act or any regulation issued thereunder shall be subject to a civil penalty imposed by the Secretary. The civil penalty for any such violation may not exceed an amount equal to 25 percent of the fair market value, as determined by the Secretary, on the date of the assessment of the penalty, of the interest in agricultural land with respect to which the violation occurred.

(b) The Attorney General shall recover the amount of any civil penalty assessed under subsection (a) of this section in a civil action in an appropriate district court of the United States unless the person pays the penalty to the Secretary. In such action, the validity and appropriateness of the penalty shall not be subject to review.

EFFECTIVE PERIOD

SEC. 6. The provisions of this Act shall become effective October 1, 1978, and shall be effective through September 30, 1981.

● Mr. TALMADGE. Mr. President, the Agricultural Foreign Investment Information Act of 1978 is necessary legislation that merits favorable consideration by the Senate. This bill would require foreign nationals who acquire, transfer, or hold interest in U.S. agricultural land—including leasehold interests of 5 years or more—to report their transactions or holdings to the Secretary of Agriculture. The Secretary would be required to analyze information gained from the reports and submit annual reports to the President and Congress on the effects of such foreign investment.

A few months ago we in Congress heard from a number of hard-pressed farmers who were seeking better prices for their crops and livestock. Some farmers also expressed their concern over a high level of activity by foreign investors in purchasing U.S. agricultural land within their local areas. These farmers reported several instances in

which foreign interests were buying up large acreages of prime farmland and rangeland, often at prices far out of reach of our own farmers.

Unfortunately, reliable data on the extent of foreign investment in agricultural land are not available.

Because of the intense concern expressed by many people about this issue, and the serious questions of public policy involved, I felt it was imperative that more facts and statistics be obtained. Accordingly, I asked the Comptroller General in January to have the General Accounting Office conduct a study of the acquisition of agricultural land by foreign investors.

Specifically, I asked the GAO to provide the Committee on Agriculture, Nutrition, and Forestry with information on various State laws that place restraints on, or require reporting of, alien land ownership, and on the general availability of reliable data on the subject.

The GAO study was completed in June of this year, the results of which I reported to the Senate. The GAO study confirmed sufficient foreign investment activity to justify some of the concerns that have been expressed. A spot check by GAO investigators revealed, for example, that foreign investors have acquired 6.3 percent of all farmland in a single county of my State in the past year and a half.

GAO recommended that the Federal Government, to get a better handle on his problem, establish some type of comprehensive reporting system.

Following up the initial GAO report, the Committee on Agriculture, Nutrition, and Forestry is now conducting, with the assistance of several Federal agencies, a much broader investigation of the entire issue and of its effect on national and international policy. On the basis of this further investigation, the Committee will be in a better position to determine if there is a need for legislation to regulate or limit alien farmland ownership.

In the meantime, there is a clear need for a nationwide, reliable system for monitoring farmland acquisition by foreigners, as recommended by GAO.

Consequently, the Committee on Agriculture, Nutrition, and Forestry recently considered and unanimously reported S. 3384, the Agricultural Foreign Act of 1978, that would respond to this need.

Mr. President, this bill would require that foreign persons who acquire, transfer, lease on a long-term basis, or hold interests in agricultural land report such transactions and holdings to the Secretary of Agriculture. This bill also calls for the Secretary of Agriculture to compile and analyze such information collected and make annual reports to the President and to the Congress.

This bill makes no attempt to regulate or limit the foreign investment in U.S. agricultural land. It would require, however, foreign investors—whether individuals, partnerships, corporations, syndicates, governments, or other entities—to make full and complete public disclosure of their agricultural land holdings, purchases, and transfers.

The real estate transactions covered would include direct sales, leaseholds of 5 years or longer, land sales contracts, and options to buy. Security interests would not be included. They would not have to be reported. However, given the wide range of legal mechanisms available to potential investors in land, I would expect the Secretary of Agriculture to distinguish between true security interests and transfers of land ownership that are disguised as the creation of a security interest, and require the latter to be reported under the bill.

The bill defines agricultural land very broadly and includes any land located in the United States that is generally used in production of agricultural commodities—including forestry products—and for raising livestock or poultry.

Specifically, the bill would require foreign persons who presently own U.S. agricultural land to report to the Secretary of Agriculture within 180 days of the effective date of the law—October 1, 1978—all existing land holdings, the location and size of the holdings, the purchase or lease price, and full identity of the owner or owners. The same information would, in the future, have to be reported with respect to purchases, sales, transfers, or long-term leases of agricultural lands by foreigners. Such reports would have to be made within 30 days after the transaction, and the requirement would apply to all transactions through September 30, 1978.

The disclosure information would be compiled and analyzed by the Secretary of Agriculture, who would make annual reports to the President and to the Congress, with an initial report due 10 months after the effective date of the law. The Secretary's reports would include an assessment of the trends in foreign ownership of farmland and the effects of such ownership on American agriculture, the Nation's economy, and on foreign relations.

To make sure that these reporting requirements are not a time consuming or a costly burden to anyone, the Secretary of Agriculture is required to develop and distribute a standard form—and related instructions—that will facilitate the collection and analysis of the data reported. Also, the Secretary of Agriculture must seek the cooperation and assistance of States and county governments, make maximum effective use of Department of Agriculture field offices, such as local extension and ASCS offices, and use such other means as may be necessary to make wide distribution of the standard report forms and instructions and to publicize the reporting requirements and procedures established.

Foreign investors who fail to comply or otherwise violate the reporting requirements would be subject to penalties of up to one-fourth of the fair market value of the land involved as determined by the Secretary of Agriculture. The Office of the Inspector General of the Department of Agriculture would be required to make periodic studies to determine the reliability of the information reported to the Secretary and general compliance with the law.

Mr. President, the key to the success of American agriculture lies in our productive land. Because of rapidly appreciating land prices, special tax breaks, political instability and a weakening dollar abroad, we presently have an environment that could lead to very high levels of foreign investment in agricultural land. This could have a great effect on the small family farm system of this Nation and in our rural communities.

I urge my colleagues to approve this necessary legislation.●

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-1072), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

SHORT EXPLANATION

The bill being reported by the committee would require foreign nationals who acquire, transfer, or hold interests in U.S. agricultural land (including leasehold interests of 5 years or more) to report their transactions or holdings to the Secretary of Agriculture. The Secretary would be required to analyze information gained from the reports and submit annual reports to the President and Congress on the effects of such foreign investment.

SUMMARY OF MAJOR PROVISIONS

The bill being reported by the committee would—

(1) require all foreign nationals who hold interests in U.S. agricultural land as of the effective date of the bill (including leasehold interests of 5 years or more) to submit a report to the Secretary of Agriculture within 180 days detailing their nationality, the type of interest they hold, the location of the land, the acreage involved, the date of acquisition of the interest, and the purchase price or other consideration (sec. 3(a));

(2) require foreign nationals who acquire or transfer U.S. agricultural land in the future (including leasehold interests of 5 years or more) to submit a report to the Secretary within 30 days after the transaction detailing their nationality, the nationality of the person to whom they transferred the land, the type of interest they acquired or transferred, the location of the land, the acreage involved, and the purchase price or other consideration (sec. 3(b));

(3) require the Secretary of Agriculture to—

(a) develop, and distribute within 60 days after the effective date of the bill, a standard form for reporting foreign land investments;

(b) analyze information obtained through the reporting requirements and determine the effect that such foreign investment in U.S. agricultural land is having on U.S. agriculture, the economy, and our foreign relations; and

(c) transmit reports of his analyses and determinations to the President and the agriculture committees of Congress (the first report—on the extent of foreign holdings as of the effective date of the bill—would be due by July 31, 1979; subsequent reports would be submitted on an annual basis) (sec. 4);

(4) authorize the Secretary to assess civil penalties against persons who violate the reporting requirements of the bill. A penalty

could be assessed at any amount up to 25 percent of their fair market value of the agricultural land with respect to which the violation occurred (sec. 5); and

(5) be effective for the period October 1, 1978, through September 30, 1981 (sec. 6).

Few investment opportunities have been as lucrative and safe as U.S. farmland in the past decade. From 1965 to 1977 the farm real estate index more than tripled, while the GNP deflator did not quite double, and the Standard and Poors 500 stock average is essentially unchanged.

Besides recent increases in the price of agricultural land, other reasons appear just as important in making these investments attractive to foreign investors. One is that many foreigners enjoy tax advantages when they invest abroad. Another reason is the huge U.S. balance-of-payments deficit that has resulted in a devaluation of the dollar, making the price of American farmland even cheaper, in real terms, for foreign investors.

In addition, political instability in their home countries is encouraging many foreigners into U.S. investments.

VI.

A number of undesirable consequences have been attributed to foreign investments in U.S. farmland. It has been suggested that foreign investors frequently pay more than the prevailing market price for land. This could inflate land prices beyond the reach of small family farmers and endanger our entire system of agriculture.

"NATIONAL PORT WEEK"

The joint resolution (S.J. Res. 148) authorizing and requesting the President of the United States to issue a proclamation designating the seven calendar days beginning September 17, 1978, as "National Port Week", was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, is as follows:

S.J. RES. 148

Whereas United States coastal and inland ports make a direct and significant contribution to our national economic well-being; and

Whereas much of the history of the United States has been shaped by its ports and interconnecting inland waterways and greatly influenced the growth of various communities; and

Whereas ports, in serving United States waterborne commerce, generate significant employment and direct dollar income to the local and regional economies they serve, as well as have a major impact on employment and production in areas far distant from their location; and

Whereas United States ports provide a wide variety of services and activities essential to the smooth and efficient conduct of foreign trade and have a direct impact on our balance of payments; and

Whereas American ports are a vital asset in maintaining a strong posture in national security: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation designating the seven-day period beginning September 17, 1978, as "National Port Week" and to invite the Governors of the several States, the chief officials of local governments, and the people of the United States to observe such week with appropriate ceremonies and activities.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1087), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXCERPT

PURPOSE

The purpose of the joint resolution is to authorize and request the President to issue a proclamation designating the week beginning on September 17, 1978, as "National Port Week."

STATEMENT

This resolution would bring to the attention of the American people the contributions that our ocean and inland ports have had in expanding our development as a great trading nation.

COST

No cost would result from the enactment of the Senate Joint Resolution 148.

ROLAND L. AND CAROLYN H. OUTLAW

The Senate proceeded to consider the bill (S. 1680) for the relief of Roland L. Outlaw and his wife Carolyn H. Outlaw of Lee County, S.C., which had been reported from the Committee on the Judiciary with an amendment to strike all after the enacting clause and insert the following:

That the time limitation contained in section 2401(b) of 28 United States Code, is not applicable in the case of any claim for damages presented in writing to the Federal agency in accordance with the applicable statute under which relief may be available, within six months after the date of enactment of this Act by Mr. Roland L. Outlaw and his wife, Carolyn H. Outlaw, of Lee County, South Carolina, for compensation for damage to their home located in Lee County, South Carolina, resulting from low flights over their home by United States Air Force aircraft between 1968 and July 26, 1973.

SEC. 2. Nothing in this Act shall be construed as an inference of liability on the part of the United States.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DR. TIMOTHY KAM-HUNG CHUNG

The bill (S. 153) for the relief of Dr. Timothy Kam-Hung Chung, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Doctor Timothy Kam-Hung Chung shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by one number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under paragraphs (1) through (8) of section 203(a) of the Immigration and Nationality Act.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SOO YUNG KIM

The bill (S. 2547) for the relief of Soo Yung Kim, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Soo Yung Kim may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Mr. and Mrs. Kermit F. Horn, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

SEC. 2. Section 204(c) of the Immigration and Nationality Act, relating to the number of petitions which may be approved, shall be inapplicable in this case.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RENUKA PAVLA

The bill (S. 2977) for the relief of Renuka Pavla, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Renuka Pavla may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed on her behalf by Mr. and Mrs. Kenneth L. Lucas, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

SEC. 2. Section 204(c) of the Immigration and Nationality Act, relating to the number of petitions which may be approved, shall be inapplicable in this case.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

KIRTHI CHANDHER

The bill (S. 3001) for the relief of Kirthi Chandher was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Kirthi Chandher may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in his behalf by Mr. and Mrs. Morris Holes, citizens of the United States, pursuant to section 204 of this Act: *Provided,* That the natural parents or brothers or sisters of the beneficiaries shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

SEC. 2. Section 204(c) of the Immigration and Nationality Act, relating to the number of petitions which may be approved, shall be inapplicable in this case.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DR. MANUEL JAVIER AND LILIA ZAPANTA MARIANO

The Senate proceeded to consider the bill (S. 399) for the relief of Dr. Manuel Javier Mariano and his wife, Lilia Zapanta Mariano, which had been reported from the Committee on the Judiciary with amendments as follows:

On page 1, line 4, strike "and section 2(e) of the Act of October 3, 1965,";

On page 2, line 2, strike "which are made available to special immigrants defined in section 101(a)(27)(A) of the Immigration and Nationality Act: and insert "and conditional entries which are made available to natives of the country of the aliens' birth under paragraphs (1) through (8) of section 203(a) of the Immigration and Nationality Act";

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Doctor Manuel Javier Mariano and his wife, Lilia Zapanta Mariano, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by the required numbers, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the aliens' birth under paragraphs (1) through (8) of section 203(a) of the Immigration and Nationality Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

JAMES EDWARD SLOWEY, CAROLE ANNE SLOWEY, CHRISTOPHER JAMES SLOWEY, ELAINE MARGARET SLOWEY, AND CAROLE-ANN SLOWEY

The Senate proceeded to consider the bill (S. 2333) for the relief of James Edward Slowey, Carole Anne Slowey, Christopher James Slowey, Elaine Margaret Slowey, and Carole-Ann Slowey, which had been reported from the Committee on the Judiciary with amendments as follows:

On page 1, line 9, strike "fee" and insert "fees";

On page 2, line 2, strike "three" and insert "the required";

On page 2, line 5, strike "of the aliens' birth" and insert "to which each alien is chargeable";

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purposes of the Immigration and Nationality Act, James Edward Slowey, his wife Carole Ann, and son Christopher James, and daughters Elaine Margaret and Carole-Ann, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act and upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by the required numbers, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country to which each alien is chargeable under paragraphs (1) through (8) of section 203(a) of the Immigration and Nationality Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL POW-MIA RECOGNITION DAY

The joint resolution (H.J. Res. 963) designating July 18, 1979, as "National POW-MIA Recognition Day," was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-1099), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXCERPT

PURPOSE

House Joint Resolution 963 would designate July 18, 1979, at "National P.O.W.-M.I.A. Recognition Day."

STATEMENT

This resolution is to honor those Americans who have been prisoners of war, and those listed as missing in action. It seeks to rekindle the memory of the sacrifices these individuals have made for their country and our indebtedness to them.

COST

The enactment of this legislation involves no direct additional expenditure to the Government.

EAZOR EXPRESS, INC. AGAINST THE UNITED STATES

The bill (S. 3382) to waive the statute of limitation with regard to the tort claim of Eazor Express, Inc., of Pittsburgh, Pa., against the United States, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the time limitation contained in section 2401 (b) of title 28, United States Code, is not applicable in the case of any claim for damages presented in writing to the appropriate Federal agency in accordance with section 2675(a) of title 28, United States Code, within six months after the date of enactment of this Act by Eazor Express, Inc. for property damage at the Maspeth Terminal Yard. Brooklyn, New York, sustained as a result of the dredging of Newtown Creek, Queens County, New York, by the United States Army Corps of Engineers in April 1974. Nothwithstanding the provisions of section 2401 of title 28, United States Code, an action may be commenced against the United States with respect to the tort claim described in the preceding sentence if such action is commenced within six months of final denial of any claim filed under such sentence.

SEC. 2. Nothing in this Act shall be construed as an inference of liability on the part of the United States.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL LUPUS WEEK

The joint resolution (H.J. Res. 682) to provide for the designation of a week as "National Lupus Week," was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL GUARD DAY

The joint resolution (H.J. Res. 946) to designate October 7, 1978, as "National Guard Day," was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. THURMOND. Mr. President, today I join a bipartisan group of my colleagues in supporting legislation to designate October 7, 1978 as "National Guard Day." October 7, 1636 is recognized as the day when the first militia units were organized by the Minutemen of Massachusetts Bay Colony. The National Guard and the Army National Guard came in to being with the formation of these units, which are the oldest color-bearing units in the United States.

The distinction of being the oldest military unit in the history of our Nation is shared by two units. The Massachusetts ARNG's 101st Engineer Battalion and the 182d Infantry Battalion were both organized on October 7, 1636. The Virginia ARNG's 176th Infantry is another historic Army Guard. This unit is a descendant of the Charles City-Henrico Counties Militia Regiment, first organized in 1652. Many of these militiamen, under the command of General Washington, fought against the British as our Nation sought its independence.

Many of today's Army National Guard units carry battle streamers on their unit colors embroidered with the names of the campaigns of 1776–1780: Virginia, Long Island, Trenton, New York, Princeton, Brandywine, Germantown, Monmouth, South Carolina, Saratoga, Connecticut, and Boston. Our past Guardsmen helped win the independence that Guardsmen of today are pledged to defend.

The term "National Guard" was first used in America by a New York militia unit on August 25, 1824. The name came about as the result of a visit to New York by the famous French officer, Marquis de Lafayette. The honor guard for the French hero who had made great contributions to America's winning her independence, was made up of men from the 2d Battalion, 11th Regiment of New York.

For the event, the battalion was renamed the "Battalion of Nationale Guards" in tribute to Lafayette's command of the Garde Nationale French Army in Paris, during 1789. In 1916, with the National Defense Act, the term "National Guard" became the official name for America's organized militia.

The modern image of today's National Guard began to emerge in 1903, when congressional legislation (the Dick Act) thrust the Federal Government into the picture by establishing procedures for a more direct and active role in organizing, training, and equipping the National Guard, in line with the standards established for the Regular Army.

On June 15, 1933, by congressional act, a new Army component, the National Guard of the United States was created. This new component, while identical in personnel and organization to the National Guard of the several States, was a part of the Army at all times, and as such could be ordered into active Federal service by the President whenever Congress declared a national emergency.

Today, the Army National Guard and the Air National Guard totals some 448,282 men and women, serving in 5,907 units located in nearly 3,000 communities in all 50 States, the Commonwealth of Puerto Rico, the Virgin Islands, and the District of Columbia.

By act of the Congress, the Guard is the primary backup force of the Army and the Air Force. In peacetime, it is commanded by the State Governors and serves in State emergencies, natural disasters, and civil disturbances. For example, during fiscal year 1970, more than 60,000 National Guardsmen provided assistance during 103 civil disturbances in 31 States, and battled the forces of nature in 21 States and 54 different occasions; during fiscal year 1972, 17,577 guardsmen provided major help in flood and other natural disasters, while another 15,103 assisted in civil disturbances.

An additional 989 guardsmen were called to State active duty for other State emergencies. A total of 132 separate callups to State active duty were made during that period; during fiscal year 1974, 18,552 guardsmen and women provided assistance during the aftermath of natural disasters having been called 181 times. A total of 21,121 guardsmen and women served after having been called 24 times for civil disturbances. During fiscal year 1975, 15,945 guardsmen were called to State active duty to assist civil authorities during 216 emergency conditions, 203 times for natural disasters and other emergencies, 13 times for civil disturbance control operations. During fiscal year 1976 and 1977, 21,619 guardsmen were called to State active duty to assist civil authorities during 232 emergency conditions, 216 times for natural disasters and other emergencies, 16 times for civil disturbance control operations. During fiscal year 1977, 19,857 guardmen were called to State active duty to assist civil authorities during 219 emergency conditions, 212 times for natural disasters and other emergencies, 7 times for civil disturbance control operations. During fiscal year 1978—October 1, 1977–April 24, 1978—21,718 guardsmen were called to State active duty to assist civil authorities during 157 emergency conditions; 147 times for natural disasters and other emergencies and 10 times for civil disorders.

Although not a direct Federal or State mission, the National Guard performs a unique third role in service to the Nation—its ability to provide local communities with community service programs. Unique in the fact that its members are part of the local community it serves, the Guard participates in almost every conceivable way; from helping the handicapped to working with youth groups. Its bulldozers transform Boy Scout trails into serviceable roads, its aircraft fly mercy missions to help the seriously injured and sick. Although some of the expended man-hours are performed on a "drill status," most of the time and energy devoted to these programs are accomplished on the guardsmen's own time. The number of youths and adults being reached by this program is averaging in the hundreds of thousands annually.

Mr. President, I take great pride in the past accomplishments, patriotism, and devoted service of our National Guard and endorse wholeheartedly this joint Senate and House resolution to establish October 7, 1978 as National Guard Day.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1102), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

House Joint Resolution 946 would authorize and request the President to issue a proclamation declaring October 7, 1978, as "National Guard Day," and calling upon the people of the United States and interested groups to observe such day with appropriate ceremonies.

STATEMENT

The National Guard has served in every major military conflict involving the United States during its 342 years. This resolution brings to the attention of the American people the contributions of the National Guard to the security of the United States.

COST

The enactment of this legislation would involve no direct additional expenditure to the Government.

VITIATION OF ORDER FOR SESSION OF THE SENATE TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the convening of the Senate on tomorrow be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE OUTLOOK FOR SATURDAY SESSIONS

Mr. ROBERT C. BYRD. Mr. President, the order has been vitiated for a session tomorrow. I will have to say that, in my judgment, the Senate will have to be in session most of the remaining Saturdays of this session, unless we can get the 3-day rule waived. Unless we can get the work done, get time agreements on bills that will allow the Senate to move forward and do its work, and be prepared to wind up sometime in October, I cannot see any hope other than to have Saturday sessions.

So at this moment I say to my friends in the Senate, on both sides of the aisle, that I expect, fully expect, a session next Saturday. This gives everybody 1 week's notice. I think I am reasonable in this. I am just trying to be realistic.

We have not had any Saturday sessions this year. I do not like Saturday session. I do not want them. I will not resort to them except when I feel that the situation is in extremis.

So I feel constrained to say that in lifting the order for tomorrow, it is far better than a 50–50 chance that the Senate will be in session next Saturday. So Senators will leave next Saturday at their own risk.

By the way, I think I misstated something a moment ago. The Senator from Tennessee was "tweaking" my nose.

The PRESIDING OFFICER. The majority leader is correct.

Mr. BAKER. I must say that whatever it was, it produced a result.

Mr. ROBERT C. BYRD. The result of having us come in next Saturday?

Mr. BAKER. The result was a stern admonition that we may be in next Saturday.

Mr. ROBERT C. BYRD. I thank my good friend, who always is in the best of humor.

TUITION TAX RELIEF ACT OF 1978

The Senate continued with the consideration of the bill.

Mr. ROBERT C. BYRD. Mr. President, are we now back on the tuition tax credit bill?

The PRESIDING OFFICER. The majority leader is correct.

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The pending question is on the amendment of the Senator from Arizona.

The Senator from Oregon.

Mr. PACKWOOD. I simply wish to make a request of the Senator from New Hampshire. Is he going to request by unanimous consent changing of the Goldwater vote?

Mr. DURKIN. I am if I clear it with the Senator from South Carolina. It does not seem to be any problem.

Mr. HOLLINGS. I was talking with the leader about the frustrations we have trying to cooperate with the leadership to get our amendment up. I do not want to be put in the position where Senators get tired with the work on Tuesday morning. If we put it off until Tuesday then I cannot call my amendment and debate it. If we have a little bit of consideration of each other and discuss generally the merits, I am confident we will do this on Monday. I wish we could have this vote on Monday.

Mr. PACKWOOD. What I am going to suggest, if I might, is to ask unanimous consent that despite the fact we set a time certain for this at 10 o'clock that other amendments be in order that we be allowed to continue voting, even though we set a time certain on the Goldwater amendment. Perhaps this will solve the problem.

Mr. HOLLINGS. Could we get an up and down vote on our amendment?

Mr. PACKWOOD. I am not prepared to agree yet on a time certain on the Senator's amendment. Other amendments are expected. I do not want to put everything beyond 10 o'clock, if I agree to 10 o'clock Tuesday morning.

Mr. DURKIN. Nor do I.

Mr. HOLLINGS. What the Senator has done is bring up a substitute, and I looked at my amendment. If I try to call it up this particular moment, then the property tax one is a substitute. It is a questionable. catchy parliamentary situation, and then we will be all arguing parliamentary rules and not educational issues.

So I am afraid other amendments are also going to find themselves in a similar situation. That is what I am thinking about.

Mr. PACKWOOD. Unless by unanimous consent we can alleviate that situation.

Mr. HOLLINGS. I understand.

Mr. DURKIN. That would solve my problem. I think it would solve theirs.

Mr. HOLLINGS. Does it solve the majority leader's problem?

Mr. ROBERT C. BYRD. Whatever is agreeable with Senators is fine with me. I wish to see the Senate complete action on this bill Tuesday.

Mr. HOLLINGS. I would agree if they want to change it from 6 p.m. Monday to 10 a.m. on Tuesday morning on the Goldwater amendment. Is that cleared with Senator GOLDWATER.

Mr. DURKIN. Yes. He told me that was perfectly all right.

Mr. PACKWOOD. Where does that leave us with any other possible amendment? Not including the Hollings' amendment, where does that leave us with any other amendment someone may bring up and wish to have voted on prior to Tuesday at 10 o'clock?

Mr. ROBERT C. BYRD. By unanimous consent the Goldwater amendment will be set aside, as the Senator noted earlier, and the Senate could act on other amendments in the meantime, I would hope.

Mr. PACKWOOD. That is fine with me.

I said the Senator from Arizona, and I do not want to speak for him, would have no objection. He wants a vote. I do not think he cares when the vote is. I do not sense he is trying to hold up the Senate from taking other votes pending the outcome of his.

Mr. HOLLINGS. I think that is correct.

Mr. SCOTT. If the Senator will yield, I have very strong feelings on this bill myself and would want to talk long enough to explain my views. I am not talking about filibustering the bill. But I would want to discuss it for several hours, and I do not want to commit myself in any way that would prevent me from doing that. I have offered an amendment. I have a printed amendment that I would want to discuss about it and about the bill generally and the whole constitutional question. I believe the Senate should be informed of the implications because I read in the findings the wording that is written to meet a Supreme Court decision to decide in advance by the Senate that this bill is constitutional when, in fact, I think it is as unconstitutional as any measure that we have ever considered during my time in Congress.

I am not going to debate it right now. But I do want to reserve sufficient time and would not want to agree at this time on any final vote.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. SCOTT. I am speaking literally of perhaps 3 or 4 hours.

Mr. ROBERT C. BYRD. Would the Senator wish to speak this afternoon?

Mr. SCOTT. No. I am not prepared to speak this afternoon because I am examining some law books, and I wish to speak in an authoritative way and now part of it would be things that I know and other parts would be things that I believe to be true but would want to verify, so I am not prepared to speak this afteroon.

Mr. ROBERT C. BYRD. All right.

I will have to say, Mr. President, that I wish I had not vitiated the order for tomorrow so that Senators could come in tomorrow and speak on the bill with the understanding there would not be any rollcall votes tomorrow.

Will the Senator come in tomorrow?

Mr. SCOTT. Mr. President, I would like to think that I could speak when someone is listening.

Mr. ROBERT C. BYRD. I will be here.

Mr. SCOTT. Yes, but I doubt that I would be persuasive enough to change the mind of the distinguished majority leader, and I would not want to speak tomorrow.

Mr. ROBERT C. BYRD. The Senator really does not want to say that. He really does not mean that. I may be in accord with him.

Mr. SCOTT. I would hope the Senator would be, in all candor, and I have a number of reasons for thinking that the Senator may be. But nevertheless Saturday is not a good time to persuade the Senate to one point of view or the other.

Mr. ROBERT C. BYRD. Mr. President, I remain hopeful that we can complete action on this measure Tuesday at some point, so I suggest Senators plan for a long session on Monday.

We just passed the point where we can take 3 or 4 days on this bill, and yet it is of vital importance. It involves constitutional issues, and I think Senators should have sufficient time to debate it. But I hope we can complete it sometime Tuesday evening which would give us the rest of the day. Senators may talk as long as they wish the remainder of today and Monday. The Senate is coming in at what time Monday, may I ask the Chair?

The PRESIDING OFFICER. The Senate comes in at 9:30 on Monday morning.

Mr. ROBERT C. BYRD. Nine-thirty on Monday morning, and I should think that if we stayed in until 10 o'clock on Monday evening and then had a long day on Tuesday, wrapped the bill up Tuesday evening, that would seem to be a reasonable expectation.

Mr. HOLLINGS. That can be done.

Mr. ROBERT C. BYRD. So I may suggest to the cloakrooms that Senators be alerted to the fact that Monday will be a long day.

Mr. PACKWOOD. Has the Goldwater vote been put off?

Mr. ROBERT C. BYRD. No. The Goldwater vote has not been put off. I thought there was an objection.

Mr. DURKIN. There was no objection; just a discussion. Should I propound that?

The PRESIDING OFFICER. The vote is still scheduled for 6 p.m. Monday at this moment.

Mr. ROBERT C. BYRD. I personally have no objection to putting that vote over until Tuesday. I am not directly involved in this issue or these amendments in any way.

Mr. DURKIN. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. DURKIN. Mr. President, I ask unanimous consent that the vote on the Goldwater amendment be put off until 10 o'clock on Tuesday morning.

Mr. ROBERT C. BYRD. Mr. President,

reserving the right to object, may I ask the distinguished Senator from South Carolina, by putting this vote off until 10 o'clock on Tuesday morning does he feel that this would likely result in a delay until Wednesday of final passage of this bill?

Mr. HOLLINGS. I cannot answer that with any accuracy in that I have tried to talk with our leading friend, the Senator from Oregon, about it, about an up-and-down vote. I think he is going to give me that courtesy, and then the question is the time and if we can have that that would be the main thing. We could debate it all day Monday and late Monday evening, as the majority leader suggests, and I hope sometime Monday morning the two Senators could get together and agree on a time on Tuesday perhaps.

Mr. PACKWOOD. Mr. President, there may be a possibility we can vote on this on Monday night. I did not want to agree to a time certain now. If we do agree to the unanimous-consent request of the Senator from New Hampshire I know the majority leader will try to get that measure temporarily set aside so a vote on the Hollings amendment or any other amendment might be in order to be taken up. With that understanding, I have no objection.

Mr. HOLLINGS. If we agreed on Monday night, I would have to agree on Tuesday morning. I have to follow this particular amendment.

Mr. PACKWOOD. Does the Senator have to follow this particular amendment?

Mr. HOLLINGS. That is right, because this also relates to elementary and secondary, am I am trying in a capsule to knock out all reference to elementary and secondary education in the bill.

Mr. PACKWOOD. Do I understand the Senator does not want a vote on his amendment prior to the vote on the Goldwater amendment?

Mr. HOLLINGS. I cannot because if my amendment is successful then the Goldwater amendment comes in and reinstitutes another tuition tax credit for elementary and secondary education, which is contrary to the whole purpose of my amendment to strike from the bill any reference to elementary and secondary education.

Mr. PACKWOOD. Let us assume that we get to a 6 or 7 o'clock vote.

Mr. HOLLINGS. That is the issue with the Senator.

Mr. PACKWOOD. I understand.

Mr. HOLLINGS. The higher education one has passed the Senate six times.

Mr. PACKWOOD. Assuming we get to it at 6 or 7 o'clock on Monday night and it is obvious Senator SCOTT wishes 2 or 3 hours, and we had debate and are ready to vote on the Senator's amendment, if the Goldwater amendment can then be put aside, will the Senator be prepared to vote on his amendment?

Mr. HOLLINGS. I will be prepared to vote then if we waited until 10 o'clock on Tuesday morning and we vitiate what we did on Monday night on mine.

Mr. PACKWOOD. We would if we passed the Goldwater amendment.

Mr. HOLLINGS. That is right.

Mr. PACKWOOD. I do not know where that leaves us.

Mr. HOLLINGS. With that, Mr. President, then I am going to object because I am beginning to see a situation I did not see so clearly.

Mr. ABOUREZK. Mr. President, while the leader is here I wonder if I might ask just a question or two on the scheduling of legislation?

Mr. ROBERT C. BYRD. Yes.

Mr. ABOUREZK. As the leader knows the resolution that came out of the Rules Committee which would extend the life of the Indian Affairs Committee for 2 years has been on the calendar for more than a week now and I wonder if the leader might have an idea when he would schedule that for action on the floor.

Mr. ROBERT C. BYRD. No, I do not, I must say to my friend. I am in no position to say at this time. I wish I could answer his question, but I cannot.

Mr. ABOUREZK. The other question I would like to ask the leader, does he have any idea when the natural gas conference report might be scheduled for action?

Mr. ROBERT C. BYRD. When it is signed and the manager will call it up. Again I do not know when that will be.

Mr. ABOUREZK. I thank the leader.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. SCOTT. Mr. President, I have a printed amendment numbered 3461, and what my amendment would do would be to strike out section 1(b), the declaration of policy portion of the bill.

Mr. President, I want to discuss this proposed amendment at a later time in greater detail, but while we are just at the beginning of our discussion I would like to say that I feel that this declaration of policy is ill founded because in the declaration of policy it states, "The Congress hereby declares it to be the policy of the United States to foster educational opportunity, diversity, and choice for all Americans."

Well, this country of ours was founded on the idea that we were the melting pot of the world. The public school system has a whole lot to do with the concept of blending people from various cultural and religious and racial backgrounds into one Nation, a Nation which I believe is the envy of the entire world.

Our public schools, open to all children without tuition, without payment, do contribute to the unity and, I believe, to the welfare of the people of the entire country. So this word "diversity" is a word with which I have some difficulty.

Then it goes on further and talks about "The Congress finds that without such assistance the diversity and pluralism that constitute important strengths of the American education system will be diminished." I do not believe that the strength of the country or the strength of our school system is founded on diversity. I believe it is founded on quality education. It just seems to me that to say that the diversity rather than unity is the strength of our Nation, in my judgment, is wrong.

Then it goes further——

Mr. DURKIN. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. SCOTT. Not until I finish my statement and then I would be glad to yield. I am not going to be very long.

"The Congress further finds that the provision of such assistance in this manner fully complies with all provisions of the Constitution;" and here Congress is finding that an act of Congress is constitutional. To me that is a function of our courts.

Of course, Congress should not pass legislation knowing it to be unconstitutional. That is one objection I have to this bill.

Then it goes on "complies with all provisions of the Constitution; that it does not constitute excessive governmental entanglement with religion."

Well, that wording has come out of decisions of the Supreme Court which say that when you did anything that provides excessive Government entanglement with religion, where Congress passes an act that does that, it is contrary to the Constitution.

So here we in Congress are trying to meet the objections of the Supreme Court of the United States by finding that this very act does not do it.

In the Pennsylvania and New York case we know that language was used, and we are trying to anticipate in advance the objections that might be raised. I know at the end of the bill we provide a way to get an expeditious decision on this matter by the Supreme Court. But we are laying the foundation for a favorable decision by the court holding that this bill is constitutional.

It goes further among the findings of the Senate and it says "is wholly secular in purpose." I wonder if anybody in this Chamber believes that this bill to grant aid to parochial schools is wholly secular in nature? I do not believe the proponents of the bill intended that it be wholly secular in nature.

I believe we must admit, if we are true to ourselves and true to the Senate that this is a bill to help parochial schools. Parochial schools have difficulties, and if we admit that it is to help parochial schools then we are afraid it will be declared unconstitutional.

I still believe with Thomas Jefferson in the wall of separation between church and state. Gradually that has been chipped away. Even the courts have chipped at it from time to time. But if we are going to continue to have religious freedom in this country we should have, in my judgment, and others may disagree, a great wall of separation between church and State. I am rather proud of our statute of religious freedom that we have in the State of Virginia in which we say that all men shall be free with regard to their beliefs between themselves and their Maker, and that no man shall be compelled to frequent an establishment of religion. He has the right by argument to maintain his belief. That is still part of the statutory law of the State of Virginia. It does express the thoughts of Jefferson, Monroe, and others.

That this bill is wholly secular in pur-

pose, and that "such assistance will neither advance nor hinder religion," if you give a tax credit to an individual and give him an opportunity to send his child to a religious school when he might not otherwise be able to afford it, is helping that religious school, and the religious school does teach religion, and so it does advance religion.

"The primary purpose of this act is to enhance equality of educational opportunity for all Americans at the schools and colleges of their choice."

Mr. President, I believe that a person should have the freedom to send his child to a school of his choice, but at his own expense.

I received a letter today signed by the distinguished chairman of the Budget Committee, the Senator from Maine (Mr. MUSKIE) in which he discussed the cost, and I assume each Member of the Senate received a similar letter. If we look at the cost of this having three systems of schools all financed by the Government, that is much more costly than the Government financing only one school system.

Mr. DURKIN. Mr. President, I ask unanimous consent that Tina Daigle and Marge Kessler of my staff be given floor privileges.

The PRESIDING OFFICER. Will the Senator state more fully his request?

Mr. DURKIN. A unanimous consent request that Tina Daigle and Marge Kessler of my staff be given floor privileges.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ABOUREZK. The same request for Mimi Mager of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Same request on behalf of Jim Brady of Senator Roth's staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCOTT. Mr. President, I ask unanimous consent to have Neil McDonald of the Senate Judiciary Committee staff present of the floor throughout the consideration of this measure.

The PRESIDING OFFICER. Without objection. it is so ordered.

Mr. DURKIN. Mr. President, I have no further need for the floor. I yield the floor.

Mr. PACKWOOD. Mr. President, will the Senator from Virginia respond to my question?

Mr. SCOTT. Mr. President, what I had hoped to do was go back to the office to prepare my comments to make later on the floor. I know the distinguished Senator from Oregon has spent considerable time, being one of the principal authors of this bill, and I have been working on other things and have not had the opportunity to review the scope of this bill and the decisions of the courts to the extent that I would like to do.

I think there might be a better exchange of views if the distinguished Senator would permit me to have more detail, and then I believe we could have a little more learned discussion, and I might not be at a disadvantage in responding to whatever questions the distinguished Senator has to pose. But I would be glad, in an initial way, just off the cuff, to respond if he wants to pursue the matter at this time. I would, however, prefer that we do it at a later time.

Mr. PACKWOOD. Mr. President, I have never known the Senator from Virginia to be at a loss for words or logic, but I will defer to his request and withhold my question.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. MOYNIHAN. Mr. President, I regret that it does not appear that any of those who——

The PRESIDING OFFICER (Mr. PACKWOOD). The Chair would remind the Senator that a quorum call is in progress.

Mr. MOYNIHAN. The Chair is correct.

Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HODGES). Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, my inattention to that procedural detail was brought about by an effort to discover whether the junior Senator from Arkansas was in the Chamber, and now I find he is in the chair.

I do not know what is the appropriate manner, at this point, by which to proceed, inasmuch as I wish to address not so much a question to him as to take advantage of his presence—though I hope not excessive advantage of his presence in the chair—to address a point to him, because he has raised with fair-minded and persistent inquiries the question of the state of Supreme Court decisions in this matter, and his associates in this debate have on several occasions suggested that the state of constitutional findings was sufficiently precise and settled so as to preclude any necessity for further questioning, and even to bring into question the appropriateness of further questioning.

I would suggest not. I make the suggestion, not as a lawyer with a fine sense of the legal issues involved here, but simply as a layman reading the language of the decisions. I can say to you that in the testimony which we have heard in the Senate Finance Committee on this matter, any number of genuinely distinguished scholars have come before us to say that the state of these opinions is appalling in its confusion and its contradictions.

One justice of the court, referring to the "wall of separation," an image taken from Jefferson's language and writings and incorporated in the Everson decision, observed that the wall more nearly resembles the serpentine wall of the University of Virginia, of which Jefferson was also the architect.

Here is a statement by Antonin Scalia, a professor of law at the University of Chicago, and immediate past assistant attorney general at the Justice Department's Office of Legal Counsel. In the parlance of those matters, he is fairly described as "the Attorney General's lawyer." This is Professor Scalia's statement before the committee; he says:

> It is impossible, within the time allotted, to describe with any completeness the utter confusion of Supreme Court pronouncements in the church-state area.

My own favorite example was handed down in June a year ago, when the Court, by an almost incomprehensible 5 to 4 decision, said it was constitutional to provide a book to a student in a parochial school, but not to provide a teaching aid. In other words, we would be led to believe that a book was constitutional and a map was not, but a book of maps, an atlas, was—or was it?—and so on in that manner.

The Senator from Virginia made a point referring to the preamble to our legislation, in which we cite the case of Lemon against Kurtzman, which set forth the three-pronged conditions of constitutionality.

The key line is, "While some involvement and entanglement are inevitable, lines must be drawn."

In the summary of the case, the Court also refers to "the relationship arising under the statutes involves excessive entanglement between Government and religion."

What does the word "entanglement" mean? I have here Webster's second edition which is not the only authority which might be brought to bear, but it is the closest authority, the better of the two current Webster's in my view, anyway. It resides with solemn, and imposing dignity in the U.S. Senate, and is the book most often consulted by the Senators.

I perhaps first should state that "entanglement, is a noun meaning the act of entangling, or state of being entangled."

What is "entangle?" To twist or interweave in such a manner as not to be easily separated. To involve so as to render extrication difficult."

Are we to understand that entanglement is agreeable to the Constitution but excessive entanglement is not?

Just what is the hardness of vocabulary, the precision of language, in which the Court could say in a sequence of doctrines that begins with a wall of separation, to suggest by modifying the word "entanglement," that some entanglement is all right but excessive entanglement is not all right?

I would be against any entanglement. I am alarmed that the Supreme Court would think some entanglement between church and State is an agreeable or permissible condition and only when this becomes excessive that some restraints are imposed by the Judiciary.

It seems to me that what the Court has been doing in the last 30 years is moving back in an increasingly confused way from an historically indefensible premise which it laid down in 1947.

Mr. PACKWOOD. Will the Senator yield?

Mr. MOYNIHAN. I am happy to yield.

Mr. PACKWOOD. It is a very thin line between entanglement and excessive entanglement, and I do not know how we can draw it between a donation of $500 to a church which can be taken off one's income tax, the donation of $500 to the church school which can be taken off one's income tax, constitutionally,

and the payment of a $500 tuition to the school to educate a child, which the opponents would say is unconstitutional.

If we look at the history, what our Founding Fathers were frightened of was an established church. They had just broken free from a country that had an established church. What the constitutional cases hold, which have been decided by the courts, in my estimation, since 1947, is that there cannot be a Government appropriation, or maybe even a tax deduction, where the overwhelming beneficiaries in both cases, 95 percent or more, were of one sect. What they are saying is that that violates what our forefathers were trying to avoid; namely, an established church.

That is not the situation with this bill. That is not the situation with this bill if we limited the consideration to primary and secondary schools.

I do not know how anyone can draw such a fine line as to say, "You can send your child to the school and give them a $500 contribution and that is all right, but you cannot send your child to that school and pay $500 tuition and take that off your income tax."

Mr. MOYNIHAN. I very much agree with the Senator from Oregon. There is a relationship there, but the word "entanglement" reflects near to inextricable involvement, which it is not at all.

Mr. PACKWOOD. If that is entanglement, we are all strangling and will not live long. If that is entanglement, just the very line on the income tax that allows someone to take some money off, Lord protect us from the rest of the entanglement in the Federal Government.

Mr. MOYNIHAN. Even if it were entanglement, it might be all right because it is not excessive entanglement.

This reduces language to the point where meaning begins to disappear.

The Senator has raised the question of the original intention of the first amendment, which is historically not disputed.

I want to say that the Senator from South Carolina very generously has acknowledge the early meaning, and the Senator from Arkansas is in the Chair and will not for a few moments have a chance to respond. But, if he wishes to, I will be happy to hear his position.

I would like to use this opportunity to read for a moment from the annals of the Congress of the United States, the first Congress, which were published in 1834 on the basis of notes taken by a responsible person who was present on that occasion. It is interesting to recall that the Senate proceedings at that time were secret but the House proceedings were open.

There is a very nice passage where we can observe the point at which the difficulty we have with the intepretation of the present first amendment begins.

I would like to remind a not exactly tumultuous or yet overcrowded Chamber that the House of Representatives debated the first amendment for 1 day. Madison originally put forward the proposition in which, to say it very simply, the key clause, what we now call the establishment clause, was and I shall quote it, that "No national religion shall be established by law."

The proposition had first been put forward that no religion should be established by law, and then Madison said, "Would the gentleman be satisfied if the word 'national' were inserted before 'religion'?" He believed that the people feared one sect might obtain a preeminence or that two combined together might establish a religion to which they would compel others to conform.

He thought if the word "national" were introduced it would point the amendment directly to the object it was intended to prevent.

"Congress shall make no law to establish a national religion."

What happened to that clarifying word "national"? Mr. Gerry, of Massachusetts, objected.

Mr. Gerry's role in the First Congress is confusing to historians as it was confusing to his colleagues, because he objected to almost everything, and it was widely said that he objected to anything he did not propose. In this instance, he objected to the word "national" and entered upon a not inelegant if somewhat obscure point that the anti-Federalists had opposed the Constitution on the grounds that it was establishing a national government.

The Federalists said, no, it was establishing a federal government. But here, having won their way, what are they, first of all, doing? They are introducing the word "national" right into the Constitution, and Gerry was against it. He proceeded them to a line which was not less obscure, if indeed, also less elegant. He said, and I offer this to the Senator from Arkansas, who may rightly fear that our discourses might rise to the level of intemperate comparisons of one with the other. I offer him Elbridge Gerry's observation in that first Congress. He said, with respect to the question of having differing sides on this matter, "Their names then ought not to have been distinguished by Federalists and anti-Federalists, but rats and anti-rats."

Such were the views of Elbridge Gerry at the point, in the course of debate at which the word "national" disappeared from the first amendment, leaving a problem that, I think, has pursued us since. There is not the least question of the intentions of the framers of the amendment but over a very long time, that intention inevitably became more remote. There is only the one reason it became remote: Because the time came when no one much longer knew, or few much longer knew what an established church was, still less that anyone very much wanted to establish one. It is just a phenomenon that disappeared in the course of the 19th century.

I suppose the only established church left, in that sense, is probably the Church of England. The Church of Ireland was disestablished, the Church of Scotland was disestablished, the Church of Canada was disestablished. State churches that were established by State governments in the 18th century—and at the time the first amendment was adopted, 9 of the first 13 States had established churches—they, too, in time, disappeared.

Mr. President, I am going to take this moment in the course of the debate to bring to the beginning an end, which is to say to make the opening statement which I have prepared for this occasion. My colleagues in this matter have been generous enough to refer to the work of my old friend and associate, Dr. Chester Finn, who has worked on this matter. I should like to express a similar respect and gratitude to John Colvin of Senator PACKWOOD's staff, to Susan Irving of Senator RIBICOFF's staff, and to Bruce Thompson of Senator ROTH's staff, who have served spectacularly in this matter. Together we have tried, as the record will show—I see Mr. Colvin is on the floor now—to present a serious proposition to the Senate, one already approved, of course, by the House, and one that we hope will be judged, as is clear so far from this debate today, on its merits as public policy. It is not merely the right but the responsibility of the Senate to speak its mind to issues of constitutional law when they are raised with respect to legislation, as regularly they are, and to leave the matter to the ultimate decision by the Court, which always, in its deliberations, asks, What was the judgment of Congress? It is a novel doctrine altogether that Congress ought not to have any views of its own, a doctrine that is certainly not historically supportable.

The central issue before the Senate this week is whether it is to be the policy of the United States to foster State monopoly in the field of education or to help to enable individuals to obtain for themselves and their children the education they prefer at the schools and colleges they select.

The issue is not the future of the public schools. They now enroll more than 90 percent of all primary and secondary students, more than 75 percent of all postsecondary students. Although they do not lack for problems, their future is secure and is not the least threatened by our proposal.

In no small part, this security is due to two decades of Federal provision for public education. In the fiscal year about to begin, Federal expenditures will average $352 per public school student and $1,227 per college student. These sums are the product of literally hundreds of laws and provisions, including aid to institutions, aid to individual students, and tax expenditures. For let no one be misled by the claim that tuition tax credits represent the first involvement of the Internal Revenue Code—or the Committee on Finance—with Federal education policy. Existing tax expenditures for education will total $7.7 billion in fiscal 1979.

The sponsors of tuition tax credits have been steadfast and ardent supporters of these measures. Many of us have participated in their inception. As a member of the Kennedy and Johnson administrations, I took part in the creation of the college work-study program in 1963. In 1964, I helped negotiate the agreements that broke the deadlock over Federal aid to education and led directly to passage of the Elementary and Secondary Education Act of 1965. In 1970 I drafted the Presidential message to Congress that led to the basic educational opportunity grants program, the Na-

tional Institute of Education, and the Fund for Improvement of Postsecondary Education. In the Senate I have voted for every major eduction authorizataion and appropriation bill that has come before us.

I have done this—and my colleagues have similar records—because of an absolute conviction that the Federal Government should support education, and that its first responsibility is to the public institutions in which the vast majority of students receive their education.

Let there be no mistake about it. The public schools come first. We have provided for them, and we shall continue to provide for them and for their students. There is no conflict whatsoever between continued Federal support for public education and the proposal now before us. And there is no truth to the accusation that in providing limited aid through the tax system to families who patronize non-Government schools we will do any harm whatsoever to government schools.

Far the more important policy question before the Senate is whether nonpublic schools are to have a future or whether the National Government is to aid and abet those who would not mind in the least if they were to shut down entirely.

For let there be no mistake about this either: in the field of education, the public sector is slowly but inexorably vanquishing the private.

A quarter century ago, private colleges and universities enrolled half the postsecondary students. Today, they account for just 22 percent.

In 1959–60, 14 out of every 100 American schoolchildren attended private and parochial schools. By 1975–76, this had declined to 9 percent. Between 1965 and 1975, nonpublic schools lost 1.8 million students, some 28 percent of their enrollments. In 1976 there were 2,246 fewer private schools in existence than there had been one decade earlier.

This decline has been especially acute among schools affiliated with the Roman Catholic Church. They lost 39 percent of their students—some 2.16 million pupils—between 1965 and 1975.

The public schools gained almost the same number of students—2.66 million—during this period.

The question cannot be avoided: Is the National Government to ignore these unmistakable trends? Is it to feign neutrality, all the while providing significant amounts of aid only to public schools as the schools of the nongovernment sector decline and crumble?

The administration says yes. Despite solemn promises by the President and pious pronouncements by the U.S. Commissioner of Education. the executive branch remains the property of a public bureaucracy that abhors that which it does not control. At the policymaking level, it is dominated by persons who have succumbed to a form of statism which they still, unaccountably, equate with liberalism. They have striven mightily to brand our proposal as illiberal but have succeeded only in further distorting public discourse in this area. For their arguments reduce to a single essential: The argument for State monopoly in the education of American children.

An element of liberty is at stake in this debate. An historic manifestation of American pluralism and diversity is at stake. The civil rights of the American people are involved. Not just of those who happen to favor nongovernment schools for their own children, but also of those millions more who would defend the right of their neighbors to make such a choice.

It has been said that this is a Catholic issue, and insofar as Catholic schools still comprise the largest single part of the nongovernment education system, that is true. But it is also a serious oversimplification that fails to take account of the 166,000 students in schools run by the Missouri Lutheran Synod, the 76,000 in Seventh-day Adventist schools, the 241,000 in Evangelical Christian schools, the 90,000 in Jewish day schools, the 77,000 in Episcopal schools, the 14,000 in Quaker schools, or the 277,000 in independent private schools, as well as the many other religious and nonsectarian groups enrolling significant numbers in their schools.

It has also been said that our proposal would benefit only the middle class. This is untrue. No less an authority than Prof. Thomas Sowell, the distinguished black economist, has said that—

> Few groups have so much at stake in the fate of this bill as ghetto blacks.

Four hundred thousand black and other minority group members now attend nongovernment schools. Many more would be able to do so with the assistance of tuition tax credits. Sowell writes that:

> One of the great untold success stories of contemporary American education is the extent to which Catholic schools, left behind in ghettoes by the departure of their original white clientele, are successfully educating black youngsters there at low cost.

In one State and city after another, a distinguishing characteristic of nonpublic schools is their high degree of racial integration. In the archdiocese of New York—which extends up the Hudson Valley and into the Catskill Mountains—37 percent of elementary school students are black, Hispanic or Asian. In Chicago, 55 percent of the students in the 82 Catholic schools are black. In Philadelphia, 45 percent are black or Spanish surnamed; in New Orleans, the figure is 38 percent. In the Roman Catholic schools of South Carolina, 28 percent of the students are black, and two-thirds of those are not even Catholic.

At our hearings last January, the Finance Committee heard eloquent pleas for tuition tax credits by black parents whose children attend the Our Lady of Perpetual Help School in Anacostia, D.C., just a few miles from this Chamber. The Reverend George Clements sent an urgent letter from the Holy Angels Parish of Chicago, which operates the largest black Catholic school in the Nation, enrolling 1,300 students. "Our school," he writes, "has a very long waiting list because of its high academic quality. This school is located in the lowest socioeconomic area of the city of Chicago. We have an extremely difficult time raising the necessary funds to keep our school alive."

To deny this reality is worse than oversight. It verges on willful blindness on the part of those who have decided that to aid such persons and, indirectly, such schools is illiberal. I submit that the opposite is true: To deny aid to such persons and thereby make it more difficult for them to obtain the education they seek for their families is to submit to paternalism and to statism.

It has been said that our proposal would result in support for segregated private schools. In order to believe this, one must believe that the Internal Revenue Service is not willing to enforce the tax code or not competent to do so. For under our proposal no elementary or secondary student may receive a tax credit unless the IRS has certified the school that the student attends is nondiscriminatory. Our committee report explains these provisions and procedures in some detail. Commissioner Kurtz has personally assured me that the IRS is determined scrupulously to enforce these standards, and that within a few weeks will promulgate even more stringent standards and procedures. He has also made clear that the IRS will investigate any and every private school about which a complaint or allegation of discrimination is brought. To insure the adequacy of these procedures, our bill directs the Attorney General, the Secretary of HEW and the Secretary of the Treasury jointly to monitor the enforcement of civil rights provisions by the Internal Revenue Service, and to report to the Congress, with the first such report due well before the elementary and secondary tax credit takes effect. Should any shortcomings be found, we pledge ourselves to direct the attention of the Congress to them and to propose the necessary remedies.

It has been said that our proposal would be struck down by the Supreme Court. If so, that will be the end of it. We seek only our day in court and think of it as a matter of right that we should be given such a hearing. It is after all the task of the Supreme Court of the United States to make such determinations.

The constitutional issue will be discussed at length in the course of this debate, and I shall have more to say about it. For now. I would simply cite the opinion of Prof. Antonin Scalia of the University of Chicago, immediate past Assistant Attorney General, Office of Legal Counsel that:

> It is impossible, within the time allotted, to describe with any completeness the utter confusion of Supreme Court pronouncements in the church-state area. . . . I urge you, then, to approach this issue as a question of what the constitutional law "should be" rather than vainly seeking to determine what it "is" under the decisions of the Court.

I believe that is an appropriate charge to the Congress and that it sets the proper context for this debate. I would note that Professor Scalia was the immediate predecessor at the Department of Justice of Mr. John M. Harmon, on whose memorandum to the Attorney

General the opponents of tuition tax credits have relied so heavily. I think it is of more than passing significance that two successive occupants of the subcabinet position with primary responsibility for constitutional opinions within the executive branch should have come to opposite conclusions. That would, at the very least, seem to call for the attention of the Supreme Court.

It is apparent by now that the principal controversy surrounding our proposal relates to its elementary and secondary school provisions. But it is essential to recall that three-quarters of the benefit from the bill before the Senate would accrue to college and university students and their families.

Tuition tax credits at the postsecondary level are by now a familiar concept in this Chamber. Time and again, we have overwhelmingly endorsed that concept, only to meet with a chilly response from the other body. This time, the situation is entirely different. The House has given tuition tax credits a powerful vote of support, and the time would seem to be at hand to complete action.

By now the case for Federal aid to middle income college students has been exhaustively made. I will rely on a single pair of statistics: between 1967 and 1976, college tuitions rose more than 93 percent, while the median aftertax income of families with college age children rose 66.8 percent.

Once the problem has been recognized, the issue is what solution to select. And at the postsecondary level, we have in fact been presented with various alternatives: an expansion of need-based grant aid to include some middle-income students; a massive federally sponsored tuition advance or loan program, possibly one repaid through the income tax system; or tax credits for college tuitions.

In favoring tax credits, I do not reject the other ideas. I shall continue to support the basic grants program and favor its expansion. Although 10 years old, the tuition advance idea bears renewed scrutiny when the 96th Congress reexamines the Higher Education Act. But that is no reason to delay another day in adopting the tax credit proposal, which would provide a modest amount of urgently needed aid to practically every postsecondary student in the land, and would do so in a manner that does not conflict or overlap at all with existing programs.

In fact, we have tailored our proposal to insure that every dollar of basic grant or supplementary grant aid a student receives is actually subtracted from the tax credit for which he or she would otherwise be eligible. For some students, this will permit a choice between two forms of assistance. For some, particularly those with very low incomes, the grant programs will be more useful. But for millions ineligible for grant aid the tax credit will be available.

Tax credits are a particularly appealing form of financial assistance, for they do not require an individual to come as an applicant to the Federal bureaucracy asking to be declared suitably needy. All that tax credits do is allow individuals and families to retain a bit more of their own income during that period of their lives when they are singularly oppressed by college costs. No complex procedures are involved and no new forms. It is simple; it is direct; it is reasonable; and it maintains an exemplary relationship between the citizen and his Government.

It has been charged that students and families will not retain the benefit of these tax credits, the theory apparently being that colleges and universities will boost their tuition charges so as to "capture" the additional resources.

Apart from the fact that practically every campus in the land is forced to raise its tuition almost every year simply in order to keep its books balanced in an inflationary era—this without tax credits or other middle-income student aid—this allegation betrays scant understanding of the market economics of higher education. With the 18-year-old population shrinking by 25 percent between 1979 and 1992, all but the most selective colleges are already finding it necessary to work to attract enough students to remain in operation. Institutions that seek to exploit tuition tax credits by boosting their tuitions will find it that much more difficult to locate enough students willing to pay those tuitions, whereas colleges shrewd enough to hold down the "net price" they charge their customers will improve their competitive position. I have confidence in the workings of this competitive marketplace as the surest possible safeguard against widespread "passing through" of tax credits to the institution. But there is a further safeguard built into our proposal: The fact that the credits are calculated at a 50-percent rate means that the student must still pay half of any tuition increases out of his own pocket. This will sharply inhibit enrollment-conscious administrators and trustees from untold increases in their tuition and fees.

In conclusion, let me say that our proposition has been fully heard and exhaustively examined. In response to the major practical objections that were brought to our attention, the Finance Committee has modified its original proposal: Sharply cutting the cost and making a number of important changes and improvements. The bill now before us, which the committee reported by a vote of 15 to 1, is one that deserves the support of every Member of the Senate.

The first remarks I made today were addressed in gratitude for and appreciation of the opening statement of the Senator from Connecticut (Mr. RIBICOFF), who began, for our party, that period of Federal provision for elementary, primary, and secondary schools. In his statement, he had occasion to review the succession, a noble one, of enactments by the Congress providing for the public schools—primary, secondary, college and university. Over and over again, as this issue has developed, we, and our party, have stated our purpose and conviction: public schools come first. It is precisely our sense that provision has been made that enables us now to turn to the nonpublic schools.

Let us be clear that this matter began in a joint collaboration between the administration of President Eisenhower and the Congress. I think it has to be said that if we want to ascribe responsibility for the present era of Federal support for education, we have no historical choice but to acknowledge the indispensable role of the Soviet Union and the engineers who produced Sputnik. That led to the NDEA. The Elementary and Secondary Education Act was a response to what we judged to be responsibilities imposed upon us by our sense of what ought to be done rather than what had to be done.

Mr. President, I interject there to say it will sometimes appear awkward for us in finding words, alternatives to the terms "public" and "private," it being inevitable in this age that some presumption attaches to the word "private," that if something is private it ought not have public support.

The schools of which we speak are not private. They are as public as any school, but simply have not had public moneys available to them. They preceded the existing public schools as the source of education for the public.

The public schools in my part of the Nation began, roughly, in the 1820's and consolidated in the 1840's. In the South, there was no public education prior to the 1870's. There are States so recent in their founding, such as Oregon, that schools are perhaps not even that old.

In every case, the non-Government schools were coequal with or preceded, in most cases the public schools.

We now see, at this moment, perhaps the most conspicuous instance of the general phenomena about which Schumpeter wrote at the end of the Second World War when he explained how the society which the West has created in the course of three centuries would come to an end.

He said that the end of liberal society would come with the steady conquest of the private sector by the public sector. There would be no place where this conquest would be more significant in its long-range impact, as well as in its immediate context, as in the disappearance of non-Government education, or private education, in the context of tax advantage, on the one hand, and cost burdens, on the other, that made it possible to sustain.

That is what the senior Senator from Connecticut spoke about this morning. He said that when he began as Secretary of Health, Education, and Welfare, 15 percent of the primary and secondary school students in the United States were in nonpublic schools, and today 9 percent are.

We know that the Roman Catholic Church has been prominent in this sequence. It is no historical mystery.

At a time in the 1830s, basically, when it commenced to be agreed that large sums of public moneys would be made available for education, a portion of the church-related school systems transferred themselves into the public school system, and they did it in a most open way, because of the practices of a general protestant sensibility, the choice of

Bible, things like that in the public school systems would conform to Protestant practice and, therefore, were acceptable to it.

It was the judgment of the Catholics that in that case they would not join and, therefore, at that point, one sector of the church-related school system remained private and the other became public.

This persisted in a remarkably stable pattern for a century and a half. Only in the last several decades has the church-related system commenced to lose its viability in economic terms. The Roman Catholic schools lost 39 percent of their students between 1965 and 1975.

Mr. HODGES. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I am happy to yield.

Mr. HODGES. The Senator was part of a committee of four, basically four Senators, who heard testimony for some 3 days. A considerable amount of additional material was submitted and has been bound in two volumes. These were hearings before the Subcommittee on Taxation and Debt Management of the Committee on Finance of the U.S. Senate. Is that correct?

Mr. MOYNIHAN. The Senator is not in a witness chair. The Senator from Arkansas knows full well that I had the honor to take part in the hearings of the subcommittee involved.

Mr. HODGES. The Senator was very active in the questioning of the witnesses, I notice from reading those hearings.

I call the Senator's attention to page 114 and ask if he recalls the explanation that was given for the decline in the number of children enrolled in Catholic schools. Does the Senator recall this, for example? It says:

> The attrition is generally attributed to a variety of factors, including a lower birthrate.

The Senator seems to feel there was some implied oppression of the private schools. The Federal Government had nothing to do with that, did it? What about inflation, a second factor? It has something to do with the movement of many Catholics to suburban areas where schools had not been built, and changing attitudes toward the church.

That, I point out to the Senator, is the reason for the drop in Roman Catholic children in Roman Catholic schools from 5.6 million to 3.4 million. That occurred in the decade 1965 to 1975.

I ask the Senator, is that not correct?

The Senator, in his prepared remarks, and consistently in his speeches and articles, goes not beyond 1965. Is it not correct that the Catholic schools have gained 200,000 students, and appear to be increasing, in the last 2 years? Is that correct?

Mr. MOYNIHAN. If the Senator has such data it has never been shown us. I do not believe it has been collected for such recent years, or, in the event not published yet.

May I say that I do not think the Senator from Arkansas will find the Senator from New York having used the term "oppression" by the Federal Government.

Mr. HODGES. I did not say "oppression." I said "implied oppression."

Mr. MOYNIHAN. I hope the Senator never has implied oppression.

What I would suggest is that a system in which public resources are available to one sector of the school system and not available to another will more or less inexorably work to the advantage of the one that has access to public funds. It is a pattern scarcely unknown.

Mr. HODGES. May I propound an additional question to the Senator?

The Senator also has implied—and if he has not, Senator PACKWOOD has—that if this pattern of failing to give this aid to parents who send their children to parochial schools continues—or I think he said private schools—we would see the death of the private school system.

In light of those dire predictions, I call the Senator's attention to the same page. His witnesses, those in favor of his proposal, say:

> Five years ago it was doubtful whether the Catholic parochial school system in general would survive, much less those in inner city areas requiring subsidies.

It goes on to mention the loss through 1975. But I think the gist of this article and the gist of the facts is that the Catholic parochial school system today, 1978, is doing quite well, thank you, in terms of numbers.

The same dire predictions about the death of the Catholic parochial system were made to the court in Nyquist, the case which I will mention at further length on Monday.

That was in Nyquist, in 1973, the key case—critical, and on all four squares, as they say in law school. In that case, the argument was made by proponents of the tuition tax credits in New York State that if this was not done, the Catholic school system would go under. One of the strong arguments that got the court's attention was how disastrous that would be on the public schools, because they would have to take in these children.

I say to the Senator that, in truth and in fact, since those dire predictions were made in 1972 and 1973, that has not taken place in New York, has it?

Mr. MOYNIHAN. I have to answer that I fear the answer is yes, it has. A third of the Catholic high schools in New York State have closed in the last decade.

Mr. HODGES. How many through merger?

Mr. MOYNIHAN. I do not know. I think the Senator will find that, in the main, they have in fact closed. Public schools merge, private schools close.

Mr. HODGES. What of the number of students?

Mr. MOYNIHAN. In one decade, the number of students in Catholic schools dropped by 40 percent.

Mr. HODGES. What of the last 3 years?

Mr. MOYNIHAN. I do not think we have figures for more than 1976, and through that date there is no increase visible.

Mr. HODGES. But enrollment has increased. In other words, the decline has stopped, has it not? Is it not also true that the decline has stopped without tax credits, either those given by the unconstitutional approach of New York State or by the aid of Federal Government? Does the Senator agree with that?

Mr. MOYNIHAN. The Senator does not. The Senator does not say it is not possible.

But I share with the Senator a respect for data, and I do not see it. The data I have here, which are from the National Catholic Education Association, shows that enrollment 1965–66, in round numbers, was 4.5 million; in 1975–76, 2.5 million. That is elementary.

Mr. HODGES. What about elementary and secondary?

Mr. MOYNIHAN. Secondary dropped from 1.1 million to 0.9 million.

But I can tell the Senator with some confidence that the kinds of schools described in the article to which the Senator has referred—it is an article by Mr. Fisk, in the New York Times—those schools will go, because they have such little parish support. They have been kept open as a deliberate policy by the archdiocese involved, in order to make such schools available to people who are not Catholics. I read a paragraph:

> In individual schools, though, the presence of non-Catholics is often striking. At St. Aloysius School in central Harlem, for example, a substantial majority of students, 194 out of 235, are Protestants.

The point is made that these are the only alternatives to the local schools.

Mr. HODGES. I call the Senator's attention to the very next page. We are talking about the New York Diocese. We are talking about the Brooklyn Diocese.

Mr. MOYNIHAN. Yes.

Mr. HODGES. It reads:

> The Catholic Church's commitment to inner city schools has often been controversial, in part because of many of the students served are non-Catholic. The Archdiocese reported in New York that last year 40 percent of its 57,086 students in inner city schools were non-Catholic. For Brooklyn, the figure was 2 percent.

So let us not quote statistics of some isolated school that does have a higher percentage of non-Catholics.

Again, it is your article, not mine. I do not want to be misunderstood. I applaud the decision of the Catholic Church to continue the inner-city schools.

The same article indicates that the New York Diocese took $12 million in contributions from Westchester, which is a very rich area, and put it into the inner city, and I applaud them for it. That, I suggest, is the way to do it. That is the way churches should prosper, that is the way they should deal with human needs and problems, and not by coming to the Federal Government.

I do not want to interrupt the Senator, except that he propounded two questions to me while I was in the chair, and I would like to respond to those two questions.

Mr. MOYNIHAN. May I respond?

Mr. HODGES. Yes.

Mr. MOYNIHAN. I think the Senator will find that the non-Catholic proportion is considerably higher than those numbers.

Mr. HODGES. It is the Senator's own committee.

Mr. MOYNIHAN. Then I would make

the distinction. The Senator said, "It is your article, not mine." It is neither of our articles. I believe it is an article by Mr. Robert G. White.

Mr. HODGES. Did the Senator, when the article was introduced, quiz or examine him on that?

Mr. MOYNIHAN. No. He was not present at the hearing.

Mr. HODGES. It struck me as low also.

Mr. MOYNIHAN. No. We have this data. The point had not struck me as especially important.

In the last 10 years—let me be very precise—between 1965 and 1975 nonpublic schools lost 1.8 million students while public schools gained 2.7 million. The overall, or global statistics are not in question. If they were in question I hope I would be the first to question them.

I see the Senator from Oregon is on his feet. I wonder if he wishes to ask a question. I know the Senator from Arkansas has two responses he wishes to give to questions I addressed to him when he was in the uncomfortable position of not being able to answer back.

The Senator from Oregon.

Mr. PACKWOOD. I know the figures the Senator from Arkansas is citing are the same figures that would show that in New Orleans 21 percent of those attending are non-Catholic; in Chicago 39 percent, and I might add in Chicago 82 percent minority, black, Spanish surname, or other, 39 percent.

In Washington, D.C., 20 percent non-Catholic in the Catholic schools. These are all from the same source the Senator was citing. The interesting thing is, though, and thank the Lord for the Catholics, they made a commitment to that inner-city school system when many others were leaving it. Many other private schools could not afford it, and the Catholic Church long ago ceased to be able to afford it on a parish-by-parish basis, and the archdiocese in many of these areas made a decision to run these schools at a perpetual loss, and that is not a decision that they can afford to live with forever. At some stage, with churches losing money on these schools and losing money and losing money, they are going to be faced with the hard choice of, "Can we keep them open?"

Mr. MOYNIHAN. They will close down.

I am sure the Senator, my dear friend, will not mind if I say they did not make a choice about perpetual loss but about prospective loss. Perpetual extends beyond the normal range of our decision-making, because they will close down. They have to. I mean it is just that there are necessities in the world and one of them is that when there is such a persistent drain of income it is used up. That is all, and other things take even a higher claim. Education is not the primary function of these churches. They will do it as they can, but if they have to choose, it is on the periphery of the things they feel they have to do.

The Senator from Arkansas had two questions to which he wished me to respond.

Mr. HODGES. I think the Senator from New York, while I was in the chair, had mentioned Mr. Scalia. How does the Senator pronounce his name?

Mr. MOYNIHAN. Scalia.

Mr. HODGES. Now he is a professor of law at the University of Chicago. Quoting his approach, and using him as a basis on which you would raise the issue—as perhaps Senator Packwood did also—where you would raise the proposition that there was a very unanimous thought with respect to the constitutionality of the approach that you take, particularly with reference to the decision in Nyquist, which will be discussed at considerable length I think on Monday.

I ask this question, and I think in holding him up to our edification and giving him some substance—as we call it in law, when a lawyer puts a witness on he makes him an expert witness, he puffs him up as much as he can to the jury—the Senator did so in a very fine and distinguished fashion by saying he is, in effect, though he was only a deputy attorney general, the lawyer to the Attorney General.

Does the Senator have any idea what years Mr. Scalia was there?

Mr. MOYNIHAN. I said he was the immediate preceding Assistant Attorney General.

Mr. HODGES. Perhaps an assistant?

Mr. MOYNIHAN. I said assistant. The head of the Office of Legal Counsel. He is properly described as the Attorney General's lawyer. He handles these things.

Mr. HODGES. Was the Senator aware that he was the Attorney General's lawyer and one of the Attorney Generals for whom he was the lawyer was John Mitchell?

Mr. MOYNIHAN. He may have been. I do not know how long he was an incumbent. How long was he an incumbent?

Mr. PACKWOOD. I am not quite sure.

Mr. MOYNIHAN. What is the suggestion there?

Mr. HODGES. I am curious about whether during this period of time he was serving the Justice Department, he was also the lawyer to John Mitchell, who happens now to be in a Federal penitentiary.

Mr. MOYNIHAN. I will say this, sir, that I am a little surprised at the Senator from Arkansas. I do not know whether he was the Attorney General's lawyer for John Mitchell. He was, and he may have been, for all I know, the lawyer for Elliot Richardson. I do not know that either. But I do know at the end of Scalia's period in the Justice Department who the Attorney General was and had been for some time. Edward Levi. It occurs to me that Edward Levi was the president of the University of Chicago. In fact Mr. Scalia is now at Chicago. Perhaps he went back to Chicago. He was Edward Levi's lawyer, and that is good enough for me to establish that this is a man of standing in the profession.

Mr. HODGES. Let me just ask the Senator. He concluded his written statement on page 297. He discusses at length, and, in my opinion, not very thoroughly or accurately, Nyquist and Sloan, the pivotal 1973 cases. He finishes with what I find to be an astonishing assertion, and I, knowing the answer to this, know that the Senator from New York does not share my astonishment at it. But I think it should at least be in the RECORD. He concludes by saying, and there is a man purporting to give constitutional authority:

> I urge you, then, to approach this issue as a question of what the constitutional law "should be" rather than vainly seeking to determine what it "is" under the decisions of the court.

I find that astonishing.

Mr. MOYNIHAN. If I may interrupt the Senator I have a biographical statement of Mr. Scalia. He became assistant attorney general, Office of Legal Counsel, in 1974, and served until 1977. He did not, in 1974, and served until 1977. He did not, however, come there from the University of Chicago. He came from the University then went in 1977 to become professor of law at the University of Chicago.

Mr. HODGES. I ask, though, if this man is a prominent constitutional scholar, why he could not give a definitive answer, and instead said "Why don't we talk about what it should be." I find that rather incredible.

Mr. PACKWOOD. If I might respond to that, if the Senator has read the full transcript of the hearing in which Professor Scalia was present, I asked him specifically the question—I cannot remember whether it was Wolman or Nyquist—and he said he will respond to that and he said, "I do not think that is a relevant question." I do not think Professor Scalia ever said "I know that this is constitutional." What he did say is that the decisions are in such doubt that for anybody to presume we could say——

Mr. MOYNIHAN. In disarray.

Mr. PACKWOOD. In disarray, and presume what the court would do would be foolish, and he continued in that vein in his statement.

Mr. MOYNIHAN. I would like to just emphasize that the great weight of testimony before us is that these decisions are in disarray. They no longer are coherent. The man who would say, "I have read the relevant cases and will tell you with a degree of confidence that we would like to tender to the profession what the court will say," that they will say yes or they will say no, that is simply not the state of the law in this area yet.

Mr. HODGES. Particularly for those listening here and for the record so that we can understand the context in which Professor Scalia and others testified, as I read the transcript I never found anyone present questioning witnesses other than the cosponsors of the bill. Is that correct.

Mr. PACKWOOD. That in my recollection is correct.

Mr. MOYNIHAN. But I think it would also be the case that you found witnesses asked by us, invited by us, who were for and against our proposals, and whose objections ranged across all manner of points. Our hearings were more than public, and if we did not attract a large number of Senators, which is not unusual, we certainly had a large number of witnesses, and we went out of our way, I think the record is very clear, to hear every point of view.

Mr. PACKWOOD. As a matter of fact, we had 3 days of hearings and, as I recall, fully 7 to 8 to 9 hours a day on a Wednesday, a Thursday, and a Friday.

Mr. HODGES. I agree it takes a long time to read through it. But there were witnesses, were there not, who were unequivocal in their statement that based upon Nyquist and Sloan, on the basis of those two cases, your bill was clearly unconstitutional?

Mr. MOYNIHAN. There certainly were.

We introduced Mr. Leo Pyeffer, who was the best example of that; we also introduced into the record an opinion of Prof. Paul Freund of the Harvard Law School.

Mr. HODGES. The premier constitutional scholar in this country.

Mr. MOYNIHAN. A very dear friend of mine, and I would like to think of him as such.

Mr. HODGES. He was unequivocal.

Mr. MOYNIHAN. He is almost always unequivocal. I believe he was invited and could not come but submitted a statement.

Mr. HODGES. So those to whom you would turn for constitutional comfort say it is an open question, but the majority, or let us say there were many, appearing on their own behalf, and not necessarily invited by the committee, were very clear that it is unconstitutional.

Mr. PACKWOOD. Mr. President, will the Senator from New York let me respond? If the Senator wants to persist, then let me read, because I know what he is trying to do—he is trying to discourage——

Mr. MOYNIHAN. I have the feeling I have been apprehended for exceeding the speed limit, and that the immediate previous circumstances to my arrest are being gone over in great detail, and at any moment I might end up with a $30 fine, so I turn to my attorney, Mr. PACKWOOD.

Mr. PACKWOOD. Let me read a telegram of April 3, 1978, to Senator HAYAKAWA signed by Robert H. Bork, Yale Law School; Gerhard Casper, University of Chicago Law School; Wilber G. Katz, University of Wisconsin Law School; Philip B. Kurland, University of Chicago Law School; Victor G. Rosenblum, Northwestern University Law School; Antonio Scalia, University of Chicago Law School; and Ralph K. Winter, Jr., Yale Law School.

> The undersigned are of the opinion that the Supreme Court cases to date do not establish that S. 2142.

Which was the immediate predecessor and had the same questions as the bill we have before us:

> is unconstitutional; and in light of the inconsistent and conflicting character of those opinions it would be inappropriate for the Congress to alter or reject the bill for such a reason. In our view S. 2142 is fully in accord with the original principles and the best traditions of the first amendment.

Let me say that again. They did not say maybe yes or maybe no. These are not people we invited to speak. This was a telegram sent for whatever reason in their own instance.

So far as credentials are concerned, let us take one, Philip B. Kurland.

> Professor of Law University of Chicago Law School.
>
> Graducate of University of Pennsylvania, Harvard Law School, Phd. University of Notre Dame.
>

Now I ask you, is there anyone who can have any better credentials than Mr. Kurland, who irrevocably says this is constitutional?

Mr. HODGES. What bill did they have reference to?

Mr. PACKWOOD. 2412, which was the tuition tax credit bill introduced by four sponsors. It is the legislation's predecessor, it is the predecessor of this. It was substituted for the House bill, but it had primary, secondary school, and college tuition tax credits. There is no significant departure except for a changed income level of the amount of the credit from the present bill.

Mr. MOYNIHAN. May I say in that list you will find, and I refer particularly, to a distinguished person, Prof. Ralph K. Winter, who is a professor at the Yale Law School and formerly a law clerk to Justice Thurgood Marshall. I do not know of a man who has been more involved with these issues than Professor Winter.

He was for many years a consultant to the U.S. Commission on Civil Rights. As I say, he was a clerk to Justice Marshall. These are distinguished men and they gave us their views.

Mr. PACKWOOD. Again, we say unsolicited. We did not ask them to be witnesses, we did not ask for their opinions.

Mr. CHAFEE. Mr. President, I wonder if I might—who has the floor, Mr. President?

Mr. MOYNIHAN. The Senator from New York has the floor.

The PRESIDING OFFICER. The Senator from New York.

Mr. CHAFEE. I wonder if I could ask a question? This constitutional discussion, I know it is going to go on for quite a while, but I wonder if I could break in, if I might, and I am not trying to cut off the Senator from Arkansas, but I wonder if I could break in with a question that it would be helpful to me to have answered. Would that be all right?

Mr. MOYNIHAN. If I may say——

Mr. HODGES. I would like to make one response.

Mr. MOYNIHAN. Would the Senator allow the Senator from Arkansas to respond at this point and then we will hear his question, and we will respond.

Mr. CHAFEE. I understand the constitutional argument can be on for some hours. Mine is just a brief point I would like to have clarified if I might, so I will await my turn in line—not too long, I hope.

Mr. HODGES. That is all the response I will have if I get another diversion. I want an answer to a specific question. What are the differences between the bill that these men responded to and the bill the Senator has now? I ask, have you added anything to it?

Mr. PACKWOOD. We have cut elementary and secondary school tax credit from a maximum credit of $500 to $250. We have cut the higher education credit to $250 now although it goes to $500 in 1980.

Mr. HODGES. Did the earlier Senate bill have any elementary and secondary education in it?

Mr. PACKWOOD. Oh, yes.

Mr. HODGES. Did it also include the public schools at that time?

Mr. MOYNIHAN. Yes, it did.

Mr. HODGES. Then I suggest that is a tremendously significant point because having the public schools included does not single out the religious schools.

Mr. MOYNIHAN. May I ask if we include, if we put public schools back in, would we have some prospect of obtaining the support of the Senator from Arkansas?

Mr. HODGES. I suggest to the Senator that you would have a much sounder bill in terms of the constitutionality of it if you had the public schools back in.

Mr. MOYNIHAN. I suggest that the Senator has not responded to my direct question. He does not have to do it.

Mr. HODGES. I will cross that bridge when I get to it. Is the Senator putting it back in now?

Mr. MOYNIHAN. Well, frankly, we took it out in the hopes of attracting some support from the Senator from Arkansas.

Mr. HODGES. Well, I think what you have done has jeopardized the constitutionality of it severely.

Mr. PACKWOOD. As a matter of fact, it was taken out in response to the argument that the ability to claim a credit for tuition in public schools would encourage white flight to the suburbs.

Mr. HODGES. The Senators are arguing among themselves. That is not fair.

Mr. MOYNIHAN. This bill is expanding educational opportunity and absolute equality.

Mr. PACKWOOD. Well, we were responding to the argument that if people could pay public school tuition and receive a tax credit, they would live in one town and send their children to school in another, and that argument was raised to us several times.

Mr. MOYNIHAN. We cannot positively predict such things; we can only conjecture.

Mr. HODGES. Now that you two are in agreement again, I will not pursue it further, and yield the floor to the Senator from Rhode Island.

Mr. CHAFEE. I am grateful to the Senator from Arkansas.

Not debating the bill or the constitu-

tionality, I would like to see if we could get agreement on some facts. One of the statements made by the Senator from New York is:

Let there be no mistake about this, either: In the field of education, the public sector is slowly but inexorably vanquishing the private.

Now, this is my question. The statistics which I have obtained from the National Center for Educational Statistics, which is in the Office of Education of HEW, show the following: After World War II, nonpublic schools took a very dramatic growth. That reached its peak in about 1965. There then followed a very dramatic decline until 1970. Since 1970, the percentage of youngsters in nonpublic schools in the United States of America has remained constant, and indeed slightly grown. The percentage.

Now, in his statement the Senator from New York bewails the fact that there were 2,246 fewer private schools in existence in 1976 than there had been a decade earlier.

Mr. MOYNIHAN. That is right.

Mr. CHAFEE. Now, of course, the Senator is very much aware that the total number of youngsters in the elementary and secondary educational pool—that is, the numbers of that age—declined very dramatically, as he knows, and so, over that period——

Mr. MOYNIHAN. Oh——

Mr. CHAFEE. No "oh" about it. The statistics show it.

Mr. MOYNIHAN. Oh, come—there is sometimes——

Mr. CHAFEE. If I may continue——

Mr. MOYNIHAN. Well, I want you to continue, but I did not want to be misquoted.

Mr. CHAFEE. The peak was reached, in the public schools, of 46 million youngsters—and these are statistics from the Federal Government—in 1971, of 46 million youngsters in elementary and secondary education in the public schools.

Since that time it has declined until in 1977 it was 43 million. And there is no question about this; everybody knows the number of youngsters at the elementary and secondary levels has declined. We have all had elementary and secondary public schools closed in our neighborhoods.

So the public sector has declined, and the private sector obviously has declined, too. You would not expect it to be markedly different than it was.

But the fact is that since the stabilization in 1970, the percentage in nonpublic schools of the total pool, the total number of youngsters, has remained constant. Does the Senator from New York agree with that, or does he disagree with the Department of HEW statistics?

Mr. MOYNIHAN. From what point is the Senator speaking?

Mr. CHAFEE. Starting in 1971.

Mr. MOYNIHAN. In 1971?

Mr. CHAFEE. That is correct. I use that as——

Mr. MOYNIHAN. I do think I have the answer—that the private sector enrollment data published by HEW are recent enough or firm enough to support that hypothesis.

Mr. CHAFEE. Well, I have the answer, and I will be glad to give you the figures if you would like, and I think it is only right for you to have them, because, regardless of how anyone votes on this bill, I think we should be working to accommodate the facts as much as possible.

The facts over the last 8 years do not bear out the points that you have been making in that particular area.

Mr. MOYNIHAN. Why I have been a little bit hesitant in responding is not because I do not know the figures you are talking about, but because I do not know exactly how to deal with some of the vagaries in the nonpublic school data that are collected by the Federal Government.

The problem which you will find in the basic data is that the statistics collected on nonpublic schools are just estimates.

Mr. CHAFEE. I am very conscious of that, because I am working with the same statistics. I have found that they admit in their own statements that the figures on the nonpublic schools are estimates.

However, in my own State we have more exact figures, and I have followed those through in my own State and found that the statistics I came up with correlate exactly with the statistics on the national level, even using the estimates for the nonpublic sector.

Mr. MOYNIHAN. Has the Senator followed that through? The word "correlate" means something in statistics.

Mr. CHAFEE. Let us have that one again.

Mr. MOYNIHAN. I say, have you actually done the statistical correlation?

Mr. CHAFEE. I took the figures from public and nonpublic in my State, and traced them, worked out the percentage, knowing the percentage there would be more meaningful, more accurate than the national figures. I took the figures from the National Center for Educational Statistics, the public being exact, the nonpublic being their best estimate—which I take it is more than a wild guess, that it is taken from surveys that they follow.

I am not getting into the merits of the bill that the Senator is espousing, but I do think it is important that a couple of things be brought forward first, when the lament goes out that private, nonpublic schools have closed. Indeed they have. They have closed in very large numbers, but so have public schools closed in large numbers, either through consolidation or through a mere lack of pupils.

The next point I think we ought to work from is that despite the decrease in the number of students both in public and nonpublic schools, the percentage in nonpublic schools has remained constant since 1971, and indeed has grown slightly, based on the best projections we can make, the best estimates we can make. That is the only point I want to make here this afternoon; and if there is dispute on behalf of the proponents of the bill, I would like to hear it, because your statement has some pretty strong claims within it which the facts just do not bear out.

Mr. MOYNIHAN. Let me explain as best I can for a moment. Perhaps we have to get additional information on this. If I ever sound a hesitant tone, it is because statistics are difficult and if one has lived with them a lot, as I have done, we find they never seem to be finally resolved.

Mr. CHAFEE. Can I ask one thing?

Mr. MOYNIHAN. Will the Senator have the kindness to listen to me?

Mr. CHAFEE. All right.

Mr. MOYNIHAN. I have here the last report of the NCES, the 1978 edition, "The Condition of Education."

The Senator knows I have spent a fair amount of time working with these data trying to make the point that about the only thing we know about the country in the next 5 or 10 years is how many people will be alive and how old they are going to be. You hold onto that because you then know something. The best data is that public school enrollment peaked at 45,744,000 in 1972 and has dropped about 3 percent to the last figures, which is 1976.

Mr. CHAFEE. What figure does the Senator have for 1976?

Mr. MOYNIHAN. 44,335,000.

Mr. CHAFEE. What figure do you have for 1971?

Mr. MOYNIHAN. I do not have a 1971 in this series. It is only every other year.

Mr. CHAFEE. The figure for 1971 is 46,081,000.

Mr. MOYNIHAN. It went up between 1970 and 1972 to 46 million?

Mr. CHAFEE. Yes.

Mr. MOYNIHAN. Forty-six what?

Mr. CHAFEE. 46,081,000.

Mr. MOYNIHAN. It is 3.78 percent. We will use round figures of 4 percent. The figure for the nonpublic peaked in 1964.

Mr. CHAFEE. In all fairness, if the Senator is responding to my question, I conceded that the nonpublic enrollment went up on a steady line after the war, peaking in 1965. I then conceded it went through a dramatic drop between 1965 and 1970.

Mr. MOYNIHAN. Will the Senator forgive me? I was conversing with the majority leader. What was the last point the Senator made?

Mr. CHAFEE. I said nothing is served here in going back to the nonpublic figures for 1965 because in my remarks I pointed out that the nonpublic peak in 1965 went through a precipitous decline to 1970 or 1971.

Mr. MOYNIHAN. Yes.

Mr. CHAFEE. The point I was making is that since 1971 the percentage of youngsters in nonpublic schools has remained constant or slightly growing. That is the point. That is for the last 6 years.

Mr. MOYNIHAN. That is one point. Can I just say there are some other points? There is a question of the mix within that total figure. There is a question of the type of school. It seems to me that the concerns to which I address myself on the floor today, and to which this legislation addresses itself, are the concerns that led to that precipitous drop in the second half of the 1960's.

From their peak the nonpublic schools have declined 21 percent; from their peak the public schools have declined 4 percent. There is a difference.

Mr. CHAFEE. The only point I am trying to make, and I urge that the Senator either agree or disagree, is that since the great, what we might call, shakeout, for reasons that we do not exactly know—Senator HODGES mentioned a move to the suburbs and perhaps it might have been the Federal infusion of funds into the public schools and they were improved, but whatever they were—there was a precipitous decline in the nonpublic schools from 1965 to 1970. Since then, and here is what I am asking the Senator to agree with or disagree with because the statistics make it pretty clear, the percentage of youngsters in nonpublic schools has remained constant. It has not been an instance where they have been squeezed in the last 6 years. They have not only held their own but slightly increased. If the Senator agrees, I will give the statistics, and if he disagrees, we will proceed next week with the figure.

Mr. MOYNIHAN. I would like to see the series for the last 5 years, yes.

Again let me say to the Senator, I have spent a lot of my time with these statistics. One would think they would be simple but they always turn out to have troubles in them.

In my State of New York, where I believe the data are good, since the school year 1968–69, to the school year of 1976–77, the Catholic schools, which are the most important ones numerically, have lost 39 percent of their enrollment. If I have any feeling about what happened in those schools and private schools generally, it is that we had a sharp dropoff from about 1965 to 1970 and then some consolidation. I think they have just about held even but as a sharply diminished proportion. They are now 9 percent as against 15 percent 2 decades earlier. I would anticipate another equally sharp response until they get down to about the 5-percent level and there in fact will cease to be any parochial schools left in this country.

I would think we are always going to have 5 percent of the middle- and upper-class schools and special schools of various sorts. But the kind of urban parochial schools that the Lutherans run, Hebrew schools in places like Brookline, the Catholic schools, they are the ones that seem to be in jeopardy. They have lost about half of their enrollment, as such, in the last 10 years, and if they lose another half they will cease to be that part of a plural school system where, as a neghborhood, there was available in ordinary circumstances to a family a school of this kind. They will persist, I should think, with 5 or 6 percent. It has been the pattern in private higher education. We have 22 percent in colleges and universities now, down from half. I would imagine they would go down to 15 and hold. But at that point the nongovernment schools are elite schools.

The Senator from Rhode Island might want to make a last remark.

Mr. ROBERT C. BYRD. Mr. President, before the Senator from Rhode Island responds, may I ask as to whether or not there is any intention to have any rollcall votes today?

Mr. MOYNIHAN. Well, I see—here is our chance. We have the Senator from Arkansas outnumbered three to one, with a probable in the Senator from Virginia, who is in the chair. This may be an opportune moment, but it would not be an honorable one.

Mr. ROBERT C. BYRD. The Senator from Arkansas says he has God on his side, though.

Mr. MOYNIHAN. It is a curious thing that the Senator from Arkansas is so much alarmed about excessive entanglement. What did the leader say?

Mr. ROBERT C. BYRD. He feels he has God on his side, which gives him a majority.

Mr. MOYNIHAN. This alarms me as a strict constructionist. Madison and Jefferson would be alarmed as well.

Mr. ROBERT C. BYRD. I am sure the Senator from New York feels he has God on his side, also.

Mr. MOYNIHAN. No, the Senator from New York feels he has the Constitution on his side.

Mr. ROBERT C. BYRD. Either is good. I think I would prefer God.

Mr. MOYNIHAN. It depends on which forum we are in.

Mr. ROBERT C. BYRD. Either forum.

So much for that. Are we going to have any rollcall votes today?

Mr. MOYNIHAN. I think not.

Mr. ROBERT C. BYRD. Then we shall get the word out from the cloakrooms.

Can the Senator from New York indicate how much longer he wishes to speak and by this question, I do not mean to imply that there is any hurry on it. There has been an exceptionally good debate today. It has been full of substance on both sides.

Mr. MOYNIHAN. Mr. President, I understand that the Senator from Arkansas would like to proceed with the second of the two questions which he felt were addressed to him while he was in the chair.

Mr. HODGES. I thank the Senator from New York. This will be a brief response. I think the question was asked, and it will be addressed at length on Monday morning, as to how one could distinguish charitable gifts that are deductible on the income tax from tuition tax credits. I think it is a valid question, but I think it is one to which there is an answer, an answer that has been given by the U.S. Supreme Court. It is one that, in my opinion, is persuasive. But it is not a simple proposition to answer, because the first amendment provides that "Congress shall make no laws respecting an establishment of religion,"—that often gets much of our attention. But it also continues for prohibiting the free exercise thereof."

A number of years ago, when I was in law school, I wrote an article on religious exercises in the public schools. Any involvement, entanglement, or whatever word one wants to use, whether it is peeking over the wall of separation, reaching around it, or making an effort to go right through it, is not simply bumping against the establishment clause, as that first clause is called, but is also bumping against the prohibiting of free exercise thereof. It is balancing these two things that finally determines what the constitutional answer is with respect to any particular fact. We cannot discuss the one without discussing the other, and even the present issue before us, tax credits for elementary or secondary education, involves both clauses. It necessitates a somewhat extended basis on which to discuss it and put it into context.

The Senator from Missouri (Mr. EAGLETON), is going to speak on Monday morning at length, I think, or certainly in great depth on the constitutional issues involved in the bill before the Senate. I do not want to take up issues that he will address. If he does not address that issue, however, I shall be prepared and am prepared now, frankly, to address it. It is somewhat complex and requires an answer of some 20 or 30 minutes. But it is one that is easily answerable and there is a clear, cogent distinction between charitable deductions taken from your income tax and tax credits.

So if I may defer, I simply have said that, in my opinion, there is an aswer. It is persuasive, but it is involved and will require some length. Therefore, I shall not get it this afternoon.

(Mr. MELCHER assumed the chair.)

Mr. MOYNIHAN. Right. I hope the Senator will accept the position of the Senators here. We feel confident of our position, but we are aware that the opposition feels equally confident. That is why we have made great efforts to provide for an early determination by the Court.

Mr. HODGES. Would it be presumptuous to suggest that if you draft a bill in which you have great confidence as to its constitutionality, why, when, would you put off the tax credits involved for 2 years, insert a provision in the bill that it should be reviewed as soon as possible, and in the U.S. Supreme Court? I say that reflects shakiness in that belief. Otherwise, all bills are presumed constitutional.

Mr. MOYNIHAN. On the contrary, we invite you to test the true measure of your conviction. If you think that this measure is irredeemably unconstitutional, you have only to vote for it and have your views confirmed in the only way they ever can be confirmed—by the Supreme Court in a few months time.

As there is an open argument here, it would be presumption for us to say, "We are right and you are wrong and there is no question about it," we say we think we are right but we are aware that there is only one place in which the matter can finally be decided.

The Senator from Connecticut this morning said that the Supreme Court did not give advisory opinions. We are prepared to present our case to the Supreme Court and live with the outcome. Are the opponents of this legislation prepared to do as much?

I should like to read again from the Annals of the First Congress, the only information we really have about this subject. The amendment was adopted in

1 day. This is how it began. It was a Saturday session, too. August 15, in Philadelphia, remember. This is from the Library of Congress. It is the original volume.

Mr. HODGES. I might say to the Senator as to that Saturday, if they had been there longer than a Saturday in Philadelphia, I would suggest that is one reason why it was done so quickly.

Mr. MOYNIHAN. I see. That remark will be made known to certain other Members of the Senate.

Mr. HODGES. I believe that it was W. C. Fields who said he spent a month one Sunday afternoon in Philadelphia.

That is the first prize for the debate. The second is 2 months.

The House again went into a Committee of the Whole on the proposed amendments to the Constitution, Mr. Boudinot in the chair.

The fourth proposition being under consideration as follows:

Article 1, Section 9, between the paragraphs 2 and 3, insert "no religion shall be established by law, nor shall the equal rights of conscience be infringed."

Now, I ask the Senators to consider that we are not here interpreting the Dead Sea Scrolls. We are interpreting procedures in our bodies which have a continuous history.

The amendment is read by the clerk in exactly the manner today as it was then. The notes are taken in English. The discourse was perhaps in better English in those days, but nevertheless a recognizable one.

It says:

The amendment in the first proposition under consideration was as follows:

No religion shall be established by law nor shall the equal rights of conscience be infringed.

Now we go into a mode of early reporting, which is in the third person.

Congressman Sylvester was a New York Congressman. He practiced law in Tinterhook. He was a 50-year-old lawyer at the time and a distinguished New Yorker.

Mr. Sylvester had some doubts about the propriety of the mode of expression used in this paragraph. He apprehended that it was liable to a construction different from what had been made by the committee. He feared it might be thought to have a tendency to abolish religion altogether.

He was then reassured by Mr. Vining, Mr. Gerry, Mr. Sherman, Mr. Carroll, and finally of course, by Mr. Madison, that no such intention could ever be interpreted or be thought to be that of the framers, and reference has been made frequently in this matter to the immediate preceding enactment in 1787 in the Northwest ordinance in which Congress held that "religion, morality and knowledge being necessary to good government and the happiness of mankind, schools and the means of learning shall be ever encouraged."

The Senator from Arkansas suggests a superior knowledge of the matter. But I say that in our hearings we had a rather elegant case made that the insistence of the U.S. Government and the Supreme Court that Government must confine or concentrate its aid on schools which are not associated with the practice of religion and denying that aid and forbidding it to others in any substantial amount is, in fact, infringing the free exercise clause.

I make no judgment on it, but a responsible scholar came forward and said the free exercise clause almost mandates the enactment of some measure such as we propose today.

Such are the complexities, such that this Senator is willing to trust to the judgment of the Supreme Court. Some Senators may be uncertain in their faith, and might wish to prevent the court from this opportunity, although I cannot imagine that would be a description of the Senator from Arkansas.

Mr. HODGES. I would suggest that the Senator from New York full well knows that were he not to put that clause in this bill, and were it to become law, most certainly it would be challenged.

Mr. MOYNIHAN. Would be challenged—correct.

Mr. HODGES. So he suggests——

Mr. MOYNIHAN. To come quickly, so that no one need feel anything.

May I say to the Senator that we had a serious point here and that it had nothing to do with constitutional law, but we felt if we said, "Let this law be enacted, then we will go to Court and sooner or later it will find out,"——

Mr. PACKWOOD. Had we not put this in, immediately into effect, we would have had 5 million parents of schoolchildren taking deductions on income tax and many people saying, "Now it will go into effect."

We did not want to raise hopes if by chance the Court would rule against us. So we put it off 2 years deliberately for that reason, also.

I say, once more, none of us come into this on our side of this with the irrevocable, righteous conviction that we know the Supreme Court will hold on on our side.

I would hope that the opponents would not say, "We know that the Supreme Court will hold on our side, and has always held on our side, and will never change," assuming that, indeed, in the past they might have called that unconstitutional.

For any of us to foresee what the Court will do that indicates a prescience I cannot understand.

Mr. MOYNIHAN. I would ask the Senator from Arkansas to listen, and to take note of what my colleague has said.

I know he thinks this, but perhaps some do not. It is important to us that it be clear he does, that we have tried to be firm and in good faith here.

We know well enough the realities of any political phenomenon.

If we were to be successful, we could not in good faith say, "Pass this law and then sooner or later we will find out what the Supreme Court thinks," because we know that in the interval after the law came into effect, there would be enormous political pressure to retain it regardless of what the Court said—to influence the Court.

The next thing we know, some candidate would be running for office saying, "And when I appoint my first Supreme Court judge, he will be a judge who I know approves of this particular bill, and will vote that way when appointed."

We did not want that. We want a situation in which the Court, without being influenced by any changed circumstance whatsoever, can rule purely on the merits of the issue, with no influence from the President and with no pressures of the kind which are normal in any policy and particularly evident in a developed democratic society such as our own.

Mr. HODGES. I would suggest to the Senator, if he has followed the history of the United States Supreme Court, that it regularly has large numbers of people looking at it, that it regularly rules under enormous pressure, and that it has responded quite well.

The point I return to is simple. We pass legislation around here regularly, and do not put clauses like this in. It is because this bill is so suspect constitutionally that it was put in. That is my sole point.

Mr. MOYNIHAN. Well, the Senator and I may not agree, but we have had a good debate. I appreciate the opportunity.

Mr. President, I thank the Chair for its courtesy throughout the day. I see my colleague, the Senator from Oregon, is on his feet and I am happy to yield the floor.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. Mr. President, I think we are about to conclude.

First, part of the reason we put this clause in was not to raise any false hopes among the millions of people taking advantage of this credit and, if found unconstitutional, have it snatched away when they had the expectation.

Second, based upon the testimony and upon the obvious fact there would be a lawsuit on this no matter what happened, we thought it was simply better before roiling the waters to allow the Court to decide, so that if we went forward we would know what the law would be. There is no effort on our part to think, in trembling, in fear, that this is unconstitutional.

I would like to argue the case before the Court. I think they will find it constitutional.

I am reasonably positive—I am not 100 percent sure—but I think when the day is done and the Court has ruled, they will find it constitutional. We would be better off on this floor, therefore, to argue the policy decisions as to whether this is wise legislation, rather than the constitutional possibility of whether it is constitutional or unconstitutional.

Mr. MOYNIHAN. Mr. President, I should like to conclude by expressing the appreciation we have for the attention of the Senate and in particular of our colleagues from Arkansas and South Carolina, who have a view different from ours in this matter, but who have expressed it with vigor and with the acuity we all readily acknowledge.

Mr. HODGES. Mr. President, I thank the Senator from Oregon and the Senator from New York primarily for their indulgence. It is startling to have to attempt to withstand the intellectual as-

saults they make, particularly when the Senator from New York brings dictionaries and is holding us accountable for the results. That could be a terrible precedent to set on this floor, because most of us use words rather loosely.

I thank them for their indulgence and for the caliber of this discussion and debate. I think that there are genuine differences of opinion, but they are well intentioned and well held, which is perhaps not always the case in debate.

I thank the Senator for his kind remarks.

Mr. MOYNIHAN. I thank the Senator from Arkansas.

FAMILY IMPACT SEMINAR RELEASES THOUGHTFUL INTERIM REPORT

Mr. STAFFORD. Mr. President, I call the attention of my colleagues to the interim report recently released by the family impact seminar of the Institute for Educational Leadership at George Washington University.

As Senators know, the idea for the family impact seminar grew out of the 1973 hearings by the Senate Subcommittee on Children and Youth entitled "American Families: Trends and Pressures" during which then-Senator MONDALE was chairman of the subcommittee and I served as the ranking minority member. Many of the witnesses at those hearings suggested that we consider requiring a family impact statement on all legislation considered by the Congress. The subcommittee was very interested in that idea. But we determined that this new idea should be analyzed and tested before any legislation to establish a family impact mechanism was introduced.

Subsequent to this conclusion by the subcommittee, the family impact seminar was established at George Washington University in 1976 with the responsibility to test the administrative, substantive, and political feasibility of developing family impact statements. Mr. Sidney Johnson, who had served as the staff director of the Subcommittee on Children and Youth, is director of this seminar. The seminar is composed of 22 leading scholars and individuals experienced in policymaking affecting families.

The seminar is an independent, nonpartisan organization which during its first 3 years has been supported totally by foundation grants.

The seminar recently released its interim report which I believe is an extremely thoughtful, comprehensive and balanced review of the potential benefits of analyzing public policies in terms of their effects on American families.

Unlike many Commission reports, this one reflects an understanding of both the benefits and the costs of efforts to analyze how policies affect families. It acknowledges the fact that the field of family impact analysis is a new and developing one, and warns against overpromising. At the same time, it mentions many very encouraging developments, and underscores the fundamental importance of continuing and accelerating our efforts to learn how to assess policies in terms of their impact on families.

Mr. President, I commend this entire report to my colleagues and others who share my desire to make public policies more sensitive and responsive to the needs and aspirations of American families.

So that individuals interested in these findings can obtain a sense of the importance of this report, I ask unanimous consent that the first section of the report, entitled "Interim Conclusions of the Family Impact Seminar," and all the introductory and title pages leading into that chapter, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

INTERIM REPORT OF THE FAMILY IMPACT SEMINAR, APRIL 1978

Family Impact Seminar gratefully acknowledges support from the Foundation for Child Development, Lilly Endowment, Robert Sterling Clark Foundation, Mary Reynolds Babcock Foundation, Edna McConnell Clark Foundation, Chichester duPont Foundation, Ford Foundation, Carnegie Fund, Charles Stewart Mott Foundation, and Needmor Fund.

FAMILY IMPACT SEMINAR STAFF

A. Sidney Johnson III, Director; Theodora Ooms, Deputy Director; Ruth Hubbell, Associate Director for Research; Halcy Bohen, Consultant; Elizabeth Bode, Executive Assistant; Darlene Craddock and Mary Eng, Secretaries; Katrina Balmforth, Interim Report Editor.

FAMILY IMPACT SEMINAR MEMBERS

Walter Allen, Assistant Professor of Sociology; University of North Carolina.

Nancy Amidei, Deputy Assistant Secretary for Legislation; Department of Health, Education and Welfare; Washington, D.C.

Mary Jo Bane, Associate Professor of Education; Harvard University.

Terrel Bell, Commissioner; Utah System of Higher Education.

Urie Bronfenbrenner, Professor of Psychology; Cornell University.

Wilbur Cohen, Dean, School of Education; University of Michigan.

Beverly Crabtree, Dean, Division of Home Economics; Oklahoma State University.

William Daniel, Jr., Director, Adolescent Unit; University of Alabama Medical Center.

John Demos, Professor of History; Brandeis University.

Patricia Fleming, Special Assistant to the Secretary of Health, Education, and Welfare; Washington, D.C.

Nicholas Hobbs, Director, Center for the Study of Families and Children; Vanderbilt University.

A. Sidney Johnson III, Director, Family Impact Seminar; Washington, D.C.

Jerome Kagan, Professor of Human Development; Harvard University.

Sheila Kamerman, Co-Director, Cross-National Studies of Social Service Systems and Family Policy; Columbia University. Associate Professor of Social Policy, Hunter College; City University of New York.

Rosabeth Moss Kanter, Professor of Sociology; Yale University.

Luis Laosa, Research Psychologist, Educational Testing Service; Princeton, N.J.

Robert Leik, Director, Family Study Center; University of Minnesota.

Salvador Minuchin, Director, Family Therapy Training Center; Philadelphia Child Guidance Clinic.

Robert Mnookin, Professor of Law; University of California at Berkeley.

Martha Phillips, Assistant Minority Counsel, Ways and Means Committee; U.S. House of Representatives.

Chester Pierce, Professor of Psychiatry and Education; Harvard University.

Isabel Sawhill, Director, National Commission on Manpower Policy; Washington, D.C.

PREFACE

The Family Impact Seminar is an independently-financed, three-year project based at the Institute of Educational Leadership of George Washington University. Our purpose is to review—carefully and in depth—the substantive, administrative and political feasibility of developing a process for assessing the impact of public policies on families. We are cautiously developing and testing a "tool"—which might be called a family impact statement—to encourage government to be more aware of and sensitive to what it does to and for families.

The Seminar is composed of twenty-two leading scholars and policy makers with expertise in family research and public policies affecting families. They come together with our staff in ongoing seminars and work groups to help guide and strengthen our work. By bringing together scholars and policy makers to help in this effort, the Seminar deliberately stands mid-way between the often separate worlds of academe and policy. It specifically seeks to develop findings and recommendations which are considered relevant, important and understandable to individuals and organizations operating in both these contexts.

Our focus on governmental actions reflects my belief that public policies—which seek to represent the interests of all Americans, and which are financed by funds collected by all taxpayers—should be especially sensitive and responsive to American families. This focus does not mean, however, that all or even most of the important events or policies which influence families result from governmental actions. Technological changes such as the advent of television, or ideological changes such as those reflected in the civil rights movement, can have substantial and lasting impacts. These and many other examples demonstrate the profound effects that private actions or attitudes can have on families.

Thus we define family impact to include private as well as public actions or inactions. Our choice to limit the focus of our inquiries to public policies reflects our belief that the government has a special responsibility to be conscious of its impact on families.

Since our creation in February 1976 we have held five seminar meetings, completed our orientation to this new and largely unexplored area, reached some preliminary conclusions, and begun preparing pilot family impact statements on two policies: government as employer and foster care. In addition, we will be commissioning a set of papers to explore from a family perspective the programs and problems related to teenage pregnancy.

While we believe that our final recommendations will be shaped in large measure by what we learn preparing these pilot family impact statements, we want to present at this time an interim summary of the conclusions we have reached as a group, staff papers we have developed, and plans we have for pilot family impact statements. In addition, we are including an appendix of sources which have been especially helpful to us in our work to date.

The first chapter of this report, Interim Conclusions of the Family Impact Seminar, reflects the judgment of the Seminar as a whole. Each section of the chapter—working definitions, preliminary findings and values—was discussed in depth at our Seminar meeting in October 1977, revised, and circulated to Seminar members for further comment. While each Seminar member might prepare some portions differently if he or she were writing it independently, this chapter represents the interim conclusions of both Seminar members and staff. Of course, like any

interim conclusions, these will be the subject of further review, debate and refinement throughout the future work of the Seminar.

The remaining chapters and the appendix are primarily staff products. Chapter II describes our best thinking about our Ecological Perspective, Evolving Framework for Family Impact Analysis and an Approach to Data. While we received some very helpful reactions to these working papers from several Seminar members, they do not represent conclusions of the Seminar as a whole. We are sharing them as staff working papers because we believe they might be helpful to individuals and organizations who have asked us how we are approaching family impact analysis.

Chapter III is a description of our current activities and plans for developing pilot family impact statements on government as employer and foster care. The appendix includes a bibliography of books and articles, a list of family study centers which have a special focus on public policies and families, and a list of individuals in state or local government who are interested in or experimenting with the family impact idea. While none of these lists is complete, they do contain many of the relevant sources and references for information concerning family impact analysis.

In the months ahead, the Seminar will be primarily working on three specific pilot family impact studies in the areas of government as employer, foster care and teenage pregnancy. In the course of these studies we will be attempting to develop ways of translating the broad concepts and comprehensive framework discussed in this report into some specific tools to assess family impact—possibly checklists—which could serve as a guide for policy makers, local and community groups and family advocates at all levels of government.

We hope this report will be helpful to individuals and organizations who share our interest in the ways in which public policies affect families generally, and the concept of family impact analysis specifically. We would very much appreciate and benefit from any reactions, suggestions or questions that this report might stimulate.

A. SIDNEY JOHNSON III,
Director, Family Impact Seminar.
April 1978.

CHAPTER I: INTERIM CONCLUSIONS OF THE FAMILY IMPACT SEMINAR

A. WORKING DEFINITIONS

The Seminar has adopted a series of working definitions to guide its work. They include the following:

1. Family

The Family Impact Seminar uses the term "family" in a broad sense to include two different but related concepts or perspectives: the "household" family and the "kinship" family.

By "household" family we mean "a group of two or more persons residing together who are related by blood, marriage or adoption." This is the definition used by the U.S. Bureau of the Census.

By "kinship" family we mean "a group or two or more persons who are related by blood, marriage or adoption." We use this definition, which does not include the reference to sharing a household or residing together, to help underscore the importance of extended families and kinship networks to family impact analysis. Use of this definition encourages consideration of the ways in which public policies may affect relationships or shared responsibilities between a single person living alone and his/her relatives or between related family units of the same or different generations.

While neither of these working definitions requires inclusion of a child or children, the Seminar has a special interest in families with children and our pilot family impact statements will include a special focus on these families.

2. Impact

The Family Impact Seminar defines impact as "the effects, demonstrable or possible, of a policy."

This definition indicates that we are interested in identifying both policies which have proven effects on family functioning or behavior and policies which may affect families in their functioning or behavior. For example, it seems likely that the government's policy forbidding the use of Medicaid funds for most abortions will have the effect of increasing the size of some families. While other family impact questions could be raised about that policy, such as how it will affect the nurturant functions in those families, it appears that it will have a clear impact on family membership or size. But there are many other policies with direct relevance to families where the evidence of impact is less clear. Does the so-called marriage penalty for two earner families at some levels in the tax code actually discourage individuals from marrying or encourage divorce? This is an example of a possible effect or impact that could be explored. Indeed, one of the purposes of family impact analysis is to identify policies on which further research is necessary to determine actual effects.

Impact can be both short and long term, explicit or implicit, intended or unintended. It may lend itself partially or totally to quantitative measurement in terms such as dollars expended or received, persons served or divorces obtained. It may also be measured or described more qualitatively in such terms as improved parenting skills, greater family harmony, increased solidarity, or better mental health.

Impact can be both positive and negative. A single policy can have multiple impacts—positive, negative and mixed. And a single provision in a policy may have a positive effect on some families, but a neutral or negative effect on others. This may be especially true of programs which are available only to families at certain income levels. For example, the $750 personal exemption may have a very positive impact on families in the higher tax brackets but a neutral or negative impact on families too poor to pay taxes and thereby benefit from tax exemptions. Conversely, a program like Head Start may have a positive impact on families who participate but a neutral or perhaps negative impact on families whose neighbors participate when they themselves make slightly more money and are therefore ineligible.

3. Public policy

We define public policy as "government actions (or inactions) expressed in a variety of ways including legislation, resolutions, programs, regulations, appropriations, administrative practices, and court decisions."

Our definition of public policy includes government actions (or inactions) at the federal, state or local levels, and, as in the case of many federal grant-in-aid programs, government actions which involve all three levels of government. It includes not only social policy but economic, military and all other policies which result from government actions (or inactions).[1]

4. Family impact analysis

We define family impact analysis as "the process in which specific public or private policies are examined with regard to their specific effects on families."

For example, family impact analysis as we conceive it would seek to examine the effect of a policy on a number of family functions and structures, including membership, nurturance and economic support functions.[2]

Footnotes at end of article.

Family impact analysis can be conducted by a variety of different organizations and at a variety of levels. For example, a sophisticated research organization might undertake new research as part of a comprehensive family impact analysis of a particular policy. Or a local PTA or citizens' organization might raise questions about the degree to which schools or other community institutions are sensitive to the needs of families, and this could represent the beginning of a family impact analysis.

At this stage we propose that analysis should concentrate primarily on existing policies. Since family impact analysis is still in its infancy, it seems premature to attempt to predict the effects of proposed policies.

While our definition of family impact analysis includes the examination of public or private policies, the Family Impact Seminar is specifically concerned with the analysis of public policies.

5. Family impact statement

We define family impact statement as "the written summary product of a particular family impact analysis."

The family impact statement would be the final written document which presents the findings of the family impact analysis. It would include, as we view it at this point, a background statement describing the policy under review and the purposes for which it was adopted, an analysis of the ways in which it affects different families, and recommendations or options for policy makers to consider.

A family impact statement should be a document that public officials and members of the public will find easy to read and use. It need not be an exhaustive discussion of every conceivable family-related issue in a policy or program. Related technical background papers which may have been prepared should appear in an appendix. Certainly the statement itself should not approximate the environmental impact statements which sometimes totalled ten or more volumes. Instead, we believe a family impact statement should highlight the key family-related issues in a policy and analyze the two or three most important among them.[3]

B. PRELIMINARY FINDINGS

The Family Impact Seminar has reached agreement on a series of what might be called preliminary findings. While all are subject to further review and modification as our work progresses, the following statements reflect some of the key facts and conclusions which shape the direction of our work.

1. Families have been and are currently experiencing unprecedented changes. These include dramatic increases over the past 25 years in the proportion of mothers working outside the home, in the rates of divorce and remarriage, and in the number of single parent families. The steadily shrinking size of families coupled with a lengthened period of adult years following active childrearing is also significant as is the introduction of television into the home and many others. These profound and dramatic shifts have major effects on the capacities of families to care for their members.

2. There is substantial and growing interest in families and the ways in which public policies affect families among the public, policymakers, scholars, professionals, and public and private organizations at the federal, state and local levels.

3. Unlike some European countries, the United States does not have an official family policy. There is, however, a wide range of public policies and programs which affects families. Our preliminary reviews reveal that:

At least 268 programs (as listed in the Catalog of Federal Domestic Assistance) provide direct financial assistance or services to

individuals and families and have potential impact on families.[4]

Countless other federal policies have substantial impact on families, including tax policies, court decisions, government employment practices, general revenue sharing, policies of regulatory agencies, and macroeconomic policies.

These policies and programs can and do affect families at all economic levels, not just poor families.

4. The process of assessing the ways in which public policies affect families—which we call family impact analysis—should be explored in a variety of settings and on a broad range of policies.[5] This analysis has the potential to bring important new perspectives to policy making and policy analysis. Asking the question "what are the effects of this policy on families?" can potentially contribute to an understanding of some of the reasons families experience problems and opportunities, and contribute to suggestions for making public policies more responsive and sensitive to family needs.

5. Family impact analysis is a new concept involving complex and largely unexplored questions. There is little or no existing methodology for family impact analysis, and few guidelines for the development of one. While the process of family impact analysis is being tested at a growing number of universities and research organizations, this type of analysis is still in its formative stages.

There are many reasons why public policies have not been examined in terms of their impact on families. Three of the more important reasons appear to be the following:

First, our system of democratic government is based primarily on the recognition of the rights and responsibilities of individuals. Our constitution, for example, does not mention families. This emphasis has led to defining social problems and opportunities and the policies designed to address them in individualistic terms. Largely overlooked have been the "mediating structures" that stand between government and the individual, among which the family is paramount.[6]

We question whether public policies designed to respond to the needs of a particular family member have too often sought to deal with that person as an isolated individual, ignoring his or her inter-relatedness with other family members, and the degree to which the attitudes and activities of those other family members may enhance or limit the effectiveness of the policies being pursued.

Second, there is a tendency to attribute the problems that families experience to the inadequacies of the families or family members. Families have generally been considered to be solely responsible for most, if not all, the difficulties they experience.

This attitude has meant, in part, that there has been little effort to analyze the effects that public policies, the world of work, or other institutions have on families. We believe, however, that many problems experienced by families are the result of basic economic and social conditions, that family functioning must be understood in this "ecological context," and that one determinant of this context is public policy.

Third, there is a widespread belief that families are private units, and that government does not and should not intervene in their private affairs. Families have been considered to be largely out of bounds for public policy. As a result, even when public policies have had major effects on families, they are seldom described or analyzed in terms of their family impact. We believe that many public policies have direct effects on families, and that efforts should be made to determine and make known these effects so that the public and its elected representatives can debate and change those policies if they desire.

6. Much of the data necessary to describe and assess the impact of policies on families are not available or easily accessible.[7] For example, relevant family data are scattered among a variety of federal agencies, comparable definitions are seldom used in the collection or analysis of these data, and most importantly, these data are seldom analyzed with the family unit as prime consideration.

Assessment of family impact may require information about families, communities, institutions and programs which has not yet been collected and analyzed. For example, data is lacking on the number of children in foster care and the length of time in such care.

7. Any framework or checklist for family impact analysis should recognize that:

The impact of public policies on families may derive from a law as enacted, its regulations, the level at which it is funded, and the ways in which it is implemented.

Any single public policy may affect different families in quite different ways, given the diversity and pluralism of families (in terms of income level, structure, household composition, extended family networks, stages in the life cycle, and ethnic, racial and regional, and neighborhood factors).

Any single public policy may affect members of the same family in quite different or conflicting ways. The child abuse or child support enforcement laws are examples.

Efforts to assess the impact on families of a particular policy will involve value judgments and choices about trade-offs which should be made explicit.[8]

Family impact analysis should focus on more than just the membership of families. While it is important to explore whether public policies affect, for example, marriage or divorce, it is also important to explore their effect on the economic and nurturant functions of families. Families continue to have primary responsibility for providing the income necessary to house, feed and clothe their dependent members, and for nurturing and socializing them. Family impact analysis should assess the effect of public policies on at least three basic family functions, and perhaps others.

8. The analogy of family impact analysis to environmental impact analysis is useful in some respects but not in others. We believe it is important to encourage public discussion of and scholarly research into the way that public policies affect families, and the impact concept contributes to these objectives. A major contribution of the environmental impact concept has been heightened public consciousness of the possible effects of public projects on the environment. A similar development regarding public policies and families would be valuable.

We believe, however, that the concept of family impact differs in important ways from the concept and the process of environmental impact. We think that family impact analysis should focus primarily on existing policies, at least for the present, while environmental impact analysis focuses primarily on proposed policies or projects. In addition, for a variety of reasons, we consider the subject of family impact to be more complex, less easily defined and measured, more value-laden, more personal and more sensitive.

9. Family impact analysis is still in a developing stage. Thus, we believe it is inappropriate at this time for federal, state or local governments to establish government-wide processes for family impact analysis. In our judgment, government consideration of mechanisms for encouraging family impact analysis should await the results of pragmatic efforts to test the concept by producing pilot impact statements on selected public policies.

10. Because we respect the wide diversity of families and the sensitive and personal nature of family life, we oppose the idea of enacting a uniform, comprehensive national family policy. We propose, instead, that means are developed—such a family impact analysis and new legislative initiatives where necesary—to help make a variety of policies, in areas ranging from employment to taxes, more sensitive and responsive to the various needs of different families.

C. VALUES IN FAMILY IMPACT ANALYSIS

The effort to assess the ways in which public policies affect families is not a value-free exercise. The public policies being analyzed involve value judgments. They are based on the belief that they will be "good" for individuals, or the economy, or the environment, or whatever.

The basic decision to focus on how public policies affect families—rather than how they affect corporations, for example—is a value judgment. It indicates a concern for families and an interest in making public policies sensitive to family needs.

Even some aspects of the seemingly neutral tasks of collecting information involve value judgments. Some of the questions asked in family impact analysis appear to be totally or largely value-free. It is a matter of fact how many funds were expended on some program, or how many families received certain kinds of benefits or services from the program. But even the asking of such factual questions involves value judgments. Certain questions, and certain facts, are assumed to be more important than others.

At another level, any attempt to determine whether a particular policy or program "strengthens" or "weakens" families involves additional value judgments. For example, the same set of data about the effects of day care on children and families may lead some observers to conclude that day care strengthens families because it permits mothers to work and by doing so increases families' incomes or perhaps permits them to leave welfare. Others, looking at the same data, may conclude that day care weakens families because it permits shifting some of the responsibilities of child-rearing from the family.

Just as there can be disagreement about a single value judgment, there can be conflicts between different values. Some people favor the food stamp program for low income families because it helps to ensure that these families receive the food and nutrition that they need. Others believe that providing food stamps rather than the equivalent value in cash unnecessarily restricts the parents' freedom of choice about how to spend their income best to meet family needs (i.e. food versus health care versus rent), and stigmatizes them at the supermarket where they pay by food stamps rather than cash. Conflicts of value are shown even more acutely in the question whether Medicaid should cover the costs of abortion.

The values implicit in policy choices often receive too little discussion. As Alva Myrdal wrote over thirty years ago in a book on family policy, public officials have the tendency "to drive values underground . . . to make the analyses appear scientific by omitting certain basic assumptions from the discussion".[9] This observation could be applied as well to policy analysts, scholars, and indeed, all citizens. We all have a tendency to want to believe that difficult policy choices can be made on the basis of "neutral" computer printouts or by finding just a little more data, rather than by debating and seeking to resolve what may be fundamental value disagreements.

Footnotes at end of article.

Yet it would be a disservice to pretend that determinations about what "strengthens" or "weakens" families can be based purely on data and statistics.

For these reasons, the Family Impact Seminar is committed to stating as explicitly as possible the value assumptions and judgments which are involved in its work and its conclusions. We recognize that this will not always be an easy task; that there will be value judgments on which we as a group will not agree; that there will be cases in which general values as we hold may be in conflict; and that our efforts to be explicit may not be completely successful.

But we will make these efforts so that those who review our work, or conduct their own, will be reminded that this field involves both questions of value as well as questions of fact. We believe this is not only the most honest but also the most effective way to help generate public debate about and make the policy process aware of, the ways in which public policies affect families.

The work of the Family Impact Seminar is based on the following general values:

We have a mutual interest in the well-being of families and their ability to care for their members.

We believe that public policies affecting families should seek to support and supplement families in the exercise of their basic functions.

Where institutions share or have primary responsibility for functions which previously were the responsibility of families—such as the education of children—we believe families should be informed about and have real opportunities to influence the important institutional decisions which affect their family members.

As a general rule and consistent with the protection of constitutional rights, we believe government policies should provide families with broadened options and choices.

We believe that the diversity and pluralism of families must be recognized and respected. Public policies should not discriminate against or penalize family structures or roles—such as single-parent or two-earner families—which differ from the actual or perceived norm or traditional structure.

We believe that public policies designed to support families should give priority to those families and family members who have least access to the needed resources of society.

We recognize that this statement of general values is not complete and will need further clarifications. Other questions about values will arise when we examine particular policies, and trade-offs will need to be weighted and discussed. There will be a need to define more precisely what some of these statements mean in relation to specific policies. And some of these general values will be more relevant to some policies than to others. It is our hope, however, that this statement helps illustrate how family impact analysis involves value judgments, will encourage the discussion of values in this process, and provides a sense of the general values on which the work of the Family Impact Seminar is based.

As an additional means of assuring that the value questions are as explicit as possible in family impact analysis, we recommend that the description of policy options include a statement of the value to be furthered or supported by each option. For example, the Child Support Enforcement Act raises value questions about the relative responsibility of a remarried father to his first family and to his current family; these value questions should be spelled out in the discussion of policy options. Similarly, child abuse programs involve value judgments about the rights of children to a safe and healthy life; these judgments should be made explicit. Other programs addressed to family needs may value the collection of data more highly than family privacy or confidentiality (or vice versa), and these value considerations should be discussed.

Thus, in addition to attempting to identify the general values on which our work is based, when assessing a particular policy, the Family Impact Seminar will seek to state the values and value trade-offs involved in options we discuss or recommendations we propose. Specifically, we will attempt to do this in the development of the Family Impact Seminar's pilot family impact statements.[10]

FOOTNOTES

[4] See *Toward an Inventory of Federal Programs with Direct Impact on Families*. Family Impact Seminar Staff Report, February 1978.

[5] The Family Impact Seminar is exploring the utility of family impact analysis for the review of public policies. Family impact analysis refers more generally, however, to a process for assessing the impact of public and private activities or policies on families.

[6] The term "mediating structures" comes from *To Empower People*, by Peter L. Berger and Richard J. Neuhaus. The authors define mediating structures as "those institutions standing between the individual in his private life and the large institutions of public life." In addition to family, the authors consider neighborhood, church and voluntary associations to be mediating structures.

TUITION TAX RELIEF ACT OF 1978

Mr. STEVENS. Mr. President, the vote on the Goldwater amendment is set for 6 o'clock on Monday, and we have a problem of Senators who have gone West. I wonder whether we can have some understanding that there would not be any votes prior to 3:30.

Mr. ROBERT C. BYRD. I say to my good friend that I do not think we should do this any further during this session. I think this is fine ordinarily, and we want to do it when we can, in order to accommodate our colleagues. But we are now down to where we have only a few days of August remaining. We have the Labor Day holiday. I feel that we should be prepared to start early. That is why we are coming in early on Monday. We are nearing the end of the session—at least, the end of the year.

Mr. STEVENS. Could I modify the request to cover this bill? We know that the Goldwater amendment will come up at 6. There may be other business. The majority leader may determine to set this matter aside to take up other business, as I understand it.

However, some Senators have gone West, and I understand some Senators are at the Vatican. I do not know when that plane will return.

I agree with the majority leader about the remainder of the session. In fact, I am slightly—what is a good word for it? I do not think I should say "disturbed." Shall I say unglued?

Mr. ROBERT C. BYRD. Discombobulated.

Mr. STEVENS. About the majority leader's comments concerning the post-election session.

So I urge all my colleagues to cooperate with the distinguished majority leader and move these bills through, so that when we finish we will not have a post-election session.

I recall the last one. I was in the Chair on New Year's Eve. We were on a triple track, with three filibusters going on at the same time. The Senator from West Virginia will recall that. Those are not interesting experiences, to be here after elections.

So I will cooperate with the Senator in every way—Saturday sessions or whatever else is necessary—to avoid a post-election session.

However, in this one regard I have been asked to make the request because of Sentaors who already have gone West. We need to contact them and tell them to get back, if there is a substantial possibility of votes before the vote on the Goldwater amendment at 6 o'clock.

Mr. ROBERT C. BYRD. Does the Senator suggest that any votes in connection with the tuition tax credit issue not occur, if ordered, before 3:30 p.m. on Monday?

Mr. STEVENS. That is what I am asking.

Mr. ROBERT C. BYRD. Very well. In this instance, I will agree, and I make that request, with the understanding that rollcall votes may occur on other matters prior to 3:30.

Mr. STEVENS. I thank the distinguished Senator.

Mr. HODGES. Mr. President, reserving the right to object, the Senator from South Carolina, for reasons that I am not entirely sure of, is not here.

We had tried earlier to move around to various times and make commitments about votes. I can think of no votes that would occur before the vote on the Goldwater amendment on Monday. But in deference to the Senator from South Carolina, under my instructions—I am merely a spear-carrier in this war—I must object.

Mr. STEVENS. Is it because of the time or because of the agreement?

Mr. HODGES. Because of both—that is, either to lock ourselves in, or the time itself. I think there was some problem earlier with the time. I do not think there will be any votes then on the tuition tax credit. I cannot conceive what it would be. But we do not want to lock ourselves in, in a parliamentary sense, so I must object.

The PRESIDING OFFICER. Objection is heard.

Mr. STEVENS. I thank the Senator, and I thank the majority leader.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, for not to exceed 20 minutes, and that at the conclusion of routine morning business, the Chair recess the Senator until 9:30 on Monday morning next.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Marks, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the Committee on Armed Services.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 12:55 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House disagrees to the amendments of the Senate to H.R. 12928, an act making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1979, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. BEVILL, Mr. BOLAND, Mr. WHITTEN, Mr. SLACK, Mrs. BOGGS, Mr. DICKS, Mr. SHIPLEY, Mr. CHAPPELL, Mr. MAHON, Mr. JOHN T. MYERS, Mr. BURGENER, Mrs. SMITH of Nebraska, and Mr. CEDERBERG were appointed managers of the conference on the part of the House.

The message also announced that the House has passed the following bill in which it requests the concurrence of the Senate:

H.R. 13635. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes.

At 3:18 p.m., a message from the House of Representatives delivered by Mr. Berry, announced that the House insists upon its amendment to the bill (S. 2701) to amend the Water Resources Planning Act (79 Stat. 244, as amended), disagreed to by the Senate; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. MEEDS, Mr. UDALL, Mr. VENTO, and Mr. LUJAN were appointed managers of the conference on the part of the House.

HOUSE BILL REFERRED

The following bill was read twice by its title and referred as indicated:

H.R. 13635. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes; to the Committee on Appropriations.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions and memorials, which were referred as indicated:

POM-773. A resolution adopted by the Michigan Aeronautics Commission relating to airport aid; to the Committee on Commerce, Science, and Transportation.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ABOUREZK, from the Committee on the Judiciary, without amendment:

S. Res. 538. An original resolution authorizing the reprinting of the committee print entitled "Colonization of the West Bank Territories by Israel". Referred to the Committee on Rules and Administration.

By Mr. WALLOP, from the Committee on the Judiciary, without amendment:

S. 2793. A bill to provide for appellate review of decisions of the High Court of American Samoa (Rept. No. 95-1107).

By Mr. METZENBAUM, from the Committee on the Judiciary, with amendments:

H.R. 7819. An Act to complement the Vienna Convention on Diplomatic Relations (Rept. No. 95-1108).

By Mr. PAUL G. HATFIELD, from the Committee on the Judiciary, without amendment:

S. 1274. A bill to provide the Attorney General of the United States with authority to contract with State and local authorities for the safekeeping, care, and subsistence of all Federal prisoners (Rept. No. 95-1109).

S. 3336. A bill to enable the Department of Justice and the Administrative Office of the United States Courts to provide services and special supervision to drug dependent Federal offenders in an efficient and effective manner (Rept. No. 95-1110).

By Mr. LONG, from the Committee on Finance, with an amendment and an amendment to the title:

H.R. 5285. An Act to amend the Tariff Schedules of the United States with respect to the tariff treatment accorded to film, strips, sheets, and plates of certain plastic or rubber (Rept. No. 95-1111).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By MR. ABOUREZK (for himself and Mr. BURDICK):

S. 3398. A bill pertaining to the inheritance of trust or restricted land on the Standing Rock Sioux Reservation, North Dakota and South Dakota; to the Select Committee on Indian Affairs.

By MR. ABOUREZK:

S. 3399. A bill to repeal laws and provisions in Title 25 of the United States Code made obsolete by the President's Reorganization Plan No. 3 of 1950 and to repeal other obsolete laws and language in Title 25 to facilitate the Title 25 codification project of the United States Senate Select Committee on Indian Affairs; to the Select Committee on Indian Affairs.

By MR. STONE:

S. 3400. A bill to make storage space available for 1978 crop sugar; to the Committee on Agriculture, Nutrition, and Forestry.

By MR. DOLE:

S. 3401. A bill to revise, extend, and improve maternal and child health and crippled children's services under title V of the Social Security Act; to the Committee on Finance.

By Mr. BENTSEN:

S. 3402. A bill to amend the Internal Revenue Code of 1954 to make technical corrections in the provisions relating to individual retirement accounts; to the Committee on Finance.

By Mr. BELLMON:

S. 3403. A bill to establish a National Student Loan Bank; to the Committee on Human Resources and the Committee on Banking, Housing, and Urban Affairs, jointly, by unanimous consent.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ABOUREZK (for himself and Mr. BURDICK):

S. 3398. A bill pertaining to the inheritance of trust or restricted land on the Standing Rock Sioux Reservation, North Dakota and South Dakota; to the Select Committee on Indian Affairs.

● Mr. ABOUREZK. Mr. President, on behalf of myself and Mr. BURDICK, I am today introducing legislation to limit the right to receive by devise or descent any interest in trust or restricted land on the Standing Rock Sioux Reservation to persons first, who are enrolled members of the Standing Rock Sioux Tribe of North and South Dakota; second, who are members of a federally recognized Indian tribe; or third, who are otherwise recognized as Indians by the Secretary of the Interior.

The purpose of this legislation is: first, to deal with the fractionated heirship problem; second, to prevent the passing of Indian lands out of trust status; and third, to consolidate Indian and tribal land ownership.

Section 3 of this bill established uniform descent laws for the Standing Rock Sioux Tribe. Under existing Federal law (e.g., 25 U.S.C. § 348), North Dakota law applies to those parts of the reservation in North Dakota and South Dakota law applies to the remainder of the reservation. Since the present descent laws of North Dakota and South Dakota differ substantially, this bill will eliminate many of the inequities and confusion created by the current situation.

Section 4 of this bill provides for the non-Indian surviving spouse to take a life estate in one-half of any interest in trust or restricted land left by an Indian descendent.

This legislation was requested by the Tribal Council of the Standing Rock Sioux Tribe and it is similar to a number of laws which have been enacted to restrict the inheritance of trust or restricted lands. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3398

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That to the extent that the laws of descent and devise of the State in which trust or restricted land is located on the Standing Rock Indian Reservation in North Dakota and South Dakota (hereinafter the "Reservation") are inconsistent with this Act, the provisions of this Act shall govern the right to inherit such trust or restricted land.

SEC. 2. Only persons who are enrolled members of the Standing Rock Sioux Tribe of North and South Dakota (hereinafter the "Tribe"), who are members of a federally recognized Indian tribe, or who are otherwise recognized as Indians by the Secretary of the Interior (hereinafter the "Secretary"), shall be entitled to receive by devise or descent any interest in trust or restricted land within the exterior bounds of the Standing Rock Indian Reservation as defined by the Act of March 2, 1889, ch. 405, 25 Stat. 888, except as provided in section 4 of this Act.

SEC. 3. Notwithstanding the laws of descent of the State in which trust or restricted land is located on the Reservation, whenever any Indian dies leaving any interest in trust or restricted land within the Reservation, and the trust or restricted land has not been devised by an approved will consistent with the provisions of section 2 of this Act, such interest shall descend to the following persons, subject to their being enrolled members of the Tribe or otherwise eligible as heirs under section 2 of this Act:

(a) One-half of the interest shall descend to the surviving spouse. The other one-half of the interest shall descend in equal shares to the children of the decedent and to the issue of any deceased child of the decedent. by right of representation;

(b) If there is no surviving spouse, the interest shall descend in equal shares to the children of the decedent and to the issue of any deceased child of the decedent, by right of representation;

(c) If there are no surviving children or issue of any child, the interest shall descend to the surviving spouse;

(d) If there is no surviving spouse and no surviving children or issue of any child. the interest shall descend to the parents of the decedent;

(e) If there is no surviving spouse, no surviving children or issue of any child, no no surviving parents, the interest shall descend equally to the brothers and sisters of the decedent;

(f) If there is no surviving spouse, no surviving children or issue of any child, no surviving parents, and no surviving brothers or sisters, the interest shall escheat to the Tribe;

(g) Any interest which descends in accordance with this section shall be subject to the right of a non-Indian surviving spouse as provided in section 4 of this Act;

(h) As used in this Act, "children" and "issue" shall include adopted children and acknowledged illegitimate children

SEC. 4 Notwithstanding the provisions of section 2 of this Act, the non-Indian surviving spouse of an Indian decedent who leaves any interest in trust or restricted lands within the Reservation shall be entitled to take an undivided one-half interest in all such trust or restricted lands during his or her lifetime.

SEC. 5. The provisions of this Act shall apply to all estates pending before the Secretary on the date of this Act and to all future estates, but shall not apply to any estate heretofor closed.●

By Mr. ABOUREZK:

S. 3399. A bill to repeal laws and provisions in title 25 of the United States Code made obsolete by the President's Reorganization Plan No. 3 of 1950 and to repeal other obsolete laws and language in title 25 to facilitate the title 25 codification project of the U.S. Senate Select Committee on Indian Affairs; to the Select Committee on Indian Affairs.

● Mr. ABOUREZK. Mr. President, I am today introducing S. 3399 to repeal laws and language in title 25 (Indians) of the United States Code that are obsolete and inoperative.

Many of these provisions were made obsolete by the President's Reorganization Plan No. 3 of 1950 which transferred almost all of the delegated authority in the Department of the Interior to the Secretary of the Interior. Many other provisions were made obsolete by enactment of title 5 (Government Organization and Employees) United States Code, section 301 vesting general authority in executive offices of agencies to issue regulations and manage internal affairs of their agencies.

Other obsolete laws and language that will be repealed date back to the late 19th century and earlier and are completely superceded or unnecessary. Some of the obsolete sections are old appropriation acts that have been executed.

None of the laws or language to be repealed by this act will affect any laws or authority in use or relied upon today. No Indian claims, treaty, or any other right arising under the laws of the United States will be affected by this legislation.

The repeal of these obsolete laws and language will facilitate the ongoing title 25 codification project of the U.S. Senate Select Committee on Indian Affairs.

The Department of the Interior has been consulted on the repeal of these laws and language.●

By Mr. STONE:

S. 3400. A bill to make storage space available for 1978 crop sugar; to the Committee on Agriculture, Nutrition, and Forestry.

● Mr. STONE. Mr. President, I rise to offer a bill to compel the administration to carry out its responsibility under the Food and Agriculture Act of 1977 to sugar cane and beet producers. I regret having to take this course of action. I believe that when Congress passes a law and when the President signs that law, we should be able to expect that the executive branch will implement and fully administer that law.

Such has not been the case with respect to the sugar price support program that was established in section 902 of the Food and Agriculture Act of 1977. I will not fill the RECORD with all of the delays and administrative difficulties that have occurred in the sugar price support program. The purpose of the bill is to require the administration to make storage space available for 1978 crop sugar. This action is imperative if a disaster is to be averted in my own State of Florida.

The Food and Agriculture Act of 1977 requires the Secretary of Agriculture to support the price of 1977 and 1978 crops of sugar beets and sugar cane at a level of at least 52.5 percent of parity. When the conferees on the legislation were considering this provision, they made it quite clear that the Secretary should implement the program in a manner in which there would be no outlay of CCC funds required because the market price for sugar should be such that sugar could move freely into the marketplace.

However, millions of tons of foreign sugar have been dumped into this country since the passage of the Food and Agriculture Act of 1977 because of the faulty administration of the law. This has depressed the domestic price of sugar to such an extent that domestic sugar has gone under loan rather than move into the marketplace. As I pointed out to Secretary Bergland in my latest letter on this subject, four sugar processors, which represent over 70 percent of the Florida industry, presently have almost all of their sugar in storage under CCC loans. Their warehouses are full. It appears that, as of November 1978, when the new crop of sugar will come in, these four processors will have 250,000 tons of unsold sugar in warehouses. This represents 75 percent of their warehouse capacity. Unless these processors are able to build or lease additional storage space before harvest of the 1978 crop, the sugar industry in Florida will have to cease operation, with a resultant loss of crop, loss of employment and economic disaster.

Mr. President, I take this action of introducing legislation only after a series of unsuccessful pleas both by the Florida sugar industry and by me personally over the past few months. I find it incredible that in the face of this disaster to the sugar industry of my State, we have received no satisfactory response. I have here for the RECORD my May 26 and my July 31 letter on this subject. Also, I would like to have printed in the RECORD a July 13 letter from the president of the Sugar Cane Growers Cooperative of Florida, Mr. George Wedgworth, to Howard Hjort, Director, Economic Policy Analysis and Budget, U.S. Department of Agriculture.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MAY 26, 1978.

Hon. ROBERT BERGLAND,
Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C.

DEAR MR. SECRETARY: On a recent trip to Belle Glade, Florida, Senator Stone was shown an equipment warehouse for the Sugar Cane Growers Cooperative. This warehouse is now used to store sugar. It seems that the major customer for this sugar is able to purchase imported sugar at a lower price than 13½¢ per pound—the current price support level.

The Florida sugar growers have supplied us with a fact sheet on this serious problem which we are enclosing for your review.

We do not consider the Florida sugar storage inventory problem as a part of the long-term sugar policy situation that is now under review by the President and the Congress. Rather, this inventory issue is one that requires immediate action.

We are most hopeful that we will hear from you about this problem upon our return on June 5 after the Memorial Day recess.

Warm personal regards.

Most cordially,

RICHARD (DICK) STONE.

SUGAR STORAGE INVENTORY PROBLEM

THE PROBLEM

There is currently under CCC loan approximately 350,000 tons of raw sugar in Florida and 50,000 tons in Texas. Efforts are being made daily to sell this sugar at a price which will permit repayment of the loan and interest charges. The latest offer received for a quantity of sugar for movement before January 1 would net the seller 12.29 cents per pound or 1.21 cents per pound less than the current CCC loan rate. Florida produces approximately 900,000 tons of sugar annually which is moved into market channels during a ten month period beginning in November through the following August. Considering sugar now stored in Florida not under loan and the sugar under loan, there is approximately 550,000 tons of sugar to be moved before the next harvest season begins. Since we customarily move 90,000 tons per month and rail facilities and other transportation are geared to this figure it will be extremely difficult, if not impossible, to move an average of 110,000 tons per month between now and November 1.

ALTERNATIVE SOLUTIONS

(1) Take no immediate action and allow CCC to acquire the sugar under loan. Even though loans mature in 11 months, it has been customary that the loan commodity be moved if the farmer needs the storage space for safe housing of his next crop. Under this alternative, CCC would acquire ownership of the 400,000 tons of sugar and would make disposition in accordance with applicable laws and regulations. The processors and producers would have no further obligations. Public criticism would be enormous plus the fact that it would compound the problem of making future programs workable.

(2) Waive carrying charges and a portion of the principal to permit the sugar to be sold at levels below the loan guarantee. These distressed prices would cause a further disruption of the market and would probably lower world prices due to the world surplus and would cause enormous amounts of sugar from the 1978 crop to be placed under loan. Furthermore, such distressed sales would restrict imports the same as if import quotas were applied.

(3) Take action to achieve a demand and a domestic market price to move such sugar from under loan into normal market channels. As previously stated, this action must be taken immediately due to the tonnage involved. To create demand the flow of foreign sugar must be stopped. Evidence is already available that imports of foreign sugar are being stepped up in anticipation of an increased duty as a result of an increased loan rate for the 1978 crop. Average weekly imports since the first of January have been 30,000 tons. Imports for the week of May 13 were in excess of 70,000 tons. The increased duty necessary under the 1978 crop loan program must also be announced immediately. An increased duty alone will not do the job and would merely cause additional discounting by foreign shippers.

U.S. SENATE, COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY,
Washington, D.C., July 31, 1978.

Hon. BOB BERGLAND,
Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C.

DEAR MR. SECRETARY: Once again, I am writing you concerning the serious sugar storage shortage problem that is confronting the Florida sugar cane industry. Four Florida raw sugar processors, Atlantic Sugar Association, Gulf and Western Food Products Company, Osceola Farm Company and the Sugar Cane Growers Cooperative, face an emergency situation because they will not have sufficient storage for their 1978/79 crop sugars. The remaining two Florida processors have long-term contracts with refiners that have continued to receive normal volumes of sugar and do not have a storage problem.

As I view the situation, it has been created by failure of the U.S. Department of Agriculture to administer the current sugar program for the 1977/78 crop, so that crop sugars would move into normal channels of trade. Accentuating this problem is USDA's unwillingness to call CCC loans before maturity, by taking over sugar that is presently under loan and stored unsold in warehouses which are customarily used for the next crop.

The present administration of the sugar program is in such a sad state of affairs that the four processors, which represent over 70% of the Florida industry, presently have almost all of their sugar in storage under CCC loans. Their warehouses are full. Sales of Florida sugar have not progressed in the normal fashion, due to higher than normal importation of cheap foreign raw sugar that at least one Florida processor has alleged is being dumped in the U.S. market.

It has been predicted that as of November 1978, these four processors will have 250,000 tons of unsold sugar in warehouses representing 75 percent of the warehouse capacity. Unless additional storage is built or leased before harvest of the new October crop, the industry will have to cease operation with the resultant loss of crop, loss of employment and unrecoverable financial loss.

The critical Florida raw sugar storage situation has been continually brought to the attention of your Department for several months. In a telephone conversation one Florida sugar processor had with Dr. Howard Hjort on July 26, it is my understanding that Dr. Hjort said a decision had been made to wait until maturity of the CCC loans before USDA took over Florida raw sugar. Loans mature 11 months after the date of the loan, resulting in CCC take-over accruing from November 21, 1978 through May 1979. I have been advised that processors can still be required to store this sugar after CCC take-over. Unless USDA acts responsibly in this critical situation, the industry will face by itself a costly and possibly unachievable task of finding or building suitable warehousing in time for the next crop of sugar estimated to exceed 650,000 tons.

Finally, it is difficult to understand why USDA would treat sugar producers in a different manner than producers of other agricultural commodities. In the past, USDA has accelerated the maturity dates on crop loans for other commodities, taken ownership, and moved the commodities to accommodate growers and to make their space available for storage of the new crop. As you well know, during this current year the maturity date for wheat loans were changed for this specific purpose.

In the June 9 USDA response to my May 26 letter to you on this same subject, it was implied that the Florida sugar storage problem is part of the proposed sugar legislation which Congress is presently reviewing. Again, as I maintained in my May 26 letter, the sugar storage problem is a separate issue from any back-up domestic sweetener policy to the International Sugar Agreement. In fact, in reviewing USDA's current administration of the sugar program for 1977/78, I am being compelled to take the view that the only viable domestic back-up sweetener policy for the I.S.A. is S. 2990 or H.R. 12486.

But, in any event, I must urge your most careful personal consideration of this request.

Warm personal regards.

Most cordially,

RICHARD (DICK) STONE.

SUGAR CANE GROWERS COOPERATIVE OF FLORIDA,
Belle Glade, Fla., July 13, 1978.

Dr. HOWARD HJORT,
Director, Economic, Policy Analysis and Budget, U.S. Department of Agriculture, Washington, D.C.

DEAR DR. HJORT: You were out of your office when I called you July 11, 1978, however, your secretary assured me that you would return my call the following day. Since I did not receive your call yesterday or today, and because of the importance of immediate action by the U.S. Department of Agriculture on the emergency raw sugar storage situation in Florida. I am attempting to get this letter hand-delivered to you today.

We feel certain that you are familiar with the emergency situation that presently exists in the storage of raw sugar in Florida. I will not belabor that subject, but will merely point out that the following Florida producers in the Florida Sugar Marketing & Terminal Assn., Inc., namely, Atlantic Sugar Association, Gulf & Western Food Products Company, Oscoola Farms Company and Sugar Cane Growers Cooperative of Florida, as of this date, have their sugar warehouses, consisting of 332,000 ton capacity, full. The movement of sugar out of these warehouses from present sales contracts will leave 253,485 tons of old crop sugar in storage January 1, 1979, to say nothing of over two months production of new crop sugars. All processors will begin the 1978/79 crop season on October–November of 1978. Because of our inability to sell raw sugar at prices that equal the USDA loan program, we will not have storage for the 1978/79 crop.

The inability of storing or selling raw sugar will cause a close down of our industry. Thus, we have a dire emergency approaching and only prompt action at this time can avert a disastrous situation.

Our situation has been made known to the appropriate people in USDA many months ago. We have been informed that recommendations have been forwarded and may be in your hands. We need positive action now from the Department so we can begin to take action to alleviate the situation before it is too late.

The purpose of this letter is to remind you of our critical situation. Also to request your assistance in finding out where the holdup is on the announcement of what the U.S. Department of Agriculture is going to do for Florida producers holding sugar under Commodity Credit Corporation loan with no prospects of selling and moving their sugar out of storage prior to next crop startup in November and to ask you to assist in getting this announcement made as promptly as possible.

Sincerely,

GEORGE H. WEDGWORTH,
President.

Mr. STONE. Mr. President, the bill that I am introducing today would do two things. First, it would accelerate the maturity date on 1977 crop sugar to August 31, 1978, or the date of enactment of this bill, whichever is earlier. Second, it would require the Secretary to move this sugar out of the producing areas within 30 days so that producers will have a place to store the sugar that will be produced by the current crop of cane and beets.

Thus, my bill would do nothing more than to require the Department of Agriculture to take action that is necessary to avert a disaster in the Florida cane-growing areas—action that would not have been necessary had the intent of the law been carried out. This bill should

not be confused with the sugar legislation that is now being considered in the House of Representatives—legislation to establish a price support program for sugar producers. The intent of my bill is merely to have the administration to take the kind of action that they have a responsibility to do under existing law.

I am introducing this bill in the hope that we can get an immediate response from the administration, and I will request the Committee on Agriculture, Nutrition and Forestry to do everything possible to elicit such a comment.

I intend to offer this bill within the next few weeks as an amendment on other legislation that is moving through Congress. The urgency of the situation in Florida will probably not permit the delay of taking the normal legislative route.●

By Mr. DOLE:

S. 3401. A bill to revise, extend, and improve maternal and children's health and crippled children's services under title V of the Social Security Act; to the Committee on Finance.

1978 AMENDMENTS TO THE MATERNAL AND CHILD HEALTH AND CRIPPLED CHILDREN'S SERVICE ACT

● Mr. DOLE. Mr. President, in anticipation of the hearing scheduled by the Finance Subcommittee on Health to hear testimony on maternal and child health care services, I am today introducing a bill to revise, extend, and improve maternal and child health and crippled children's services under title V of the Social Security Act. As ranking minority member of the Finance Health Subcommittee, I have had a good deal of interest in this area and feel that, at the very least, the 43-year-old program is deserving of our consideration as a basis for any new attention which might be given to this category of beneficiaries.

I think most Senators are aware of the administration's objectives with respect to children, mothers, and prospective mothers in their proposed Child Health Assessment Act—introduced by my colleague from Connecticut, Senator RIBICOFF. My purpose in submitting this legislation to amend title V is not necessarily to suggest that we need an alternative to CHAP—or even that legislation at this time is desirable or affordable—but rather to point out that we have an established framework for assisting these special groups, and that maybe we should take a look at it.

This bill would provide the means for just such a review, Mr. President. It is the product of a very careful, objective, indepth, 3-year evaluation of the problems of our Nation's youth by the American Academy of Pediatrics. It has already been introduced in similar form on the House side by PAUL ROGERS and TIM LEE CARTER—and will, I hope, stimulate an appropriate response among all Senators who are concerned about our efforts to make health services available to those mothers, infants, and youth for whom both prevention and care may be a particular burden.

Mr. President, I ask unanimous consent that there be printed in the RECORD a brief summary of this proposal highlighting its goal, funding, State accountability requirements, national oversight role, organizational perspective, and effectiveness assurance mechanisms, together with the text of the bill.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 3401

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "1978 Amendments to the Maternal and Child Health and Crippled Children's Service Act."

FINDINGS AND DECLARATION OF PURPOSE

SEC. 2. (a) The Congress finds that—

(1) Each year, many mothers, infants, children, and adolescents suffer from preventable illness or from crippling illness as a result of the limited availability of health care services.

(2) The health programs for mothers and infants in title V of the Social Security Act are the base and establish the standards for most of the public health programs for mothers, infants, children, and adolescents in the Nation; the program for crippled children in title V of the Social Security Act is the major health system for providing special services unique to children with crippling diseases; and the programs for providing comprehensive services for high-risk pregnant women and children living in underserved areas has had an important part in improving the health of those served. Consequently, programs must be revised and expanded to assure all pregnant women, infants, children, and adolescents the promise of a healthy future.

(3) Steps should be taken to insure the national priority that all pregnant women and children have access to adequate health services, since—

(a) births to women under sixteen years increased 80 percent between 1960 and 1975;

(b) low birthweight infants are born to women under fifteen twice as often as those over twenty;

(c) twenty-eight percent of pregnant women begin prenatal care after the first trimester or have no care at all;

(d) low birthweight babies are more common among women who receive no care; and

(e) approximately three hundred thousand severely retarded people require total care at the average cost of $18,000 per year per person.

(4) The program authorized by this title should be extended and strengthened through improved organizational steps and through special grants to achieve such desirable objectives as providing health services for adolescents, special services for the unwed pregnant teenage, for neonates born at high risk, and for the coordination of health and education programs.

(5) In the provision of services for mothers, infants, children, and adolescents, maximum use should be made of the existing system of health care delivery and the participation of private providers, and new community arrangements should be created as needed to provide services for problems.

(6) Special grants should be made available on national, regional county, and local bases.

(b) The purpose of this Act is to make health services available to special groups (to pregnant women, to mothers and their infants, to crippled children who have need for special services, for underserved children and youth, for mothers and children who have disabling diseases and disorders) who are at greater health risk and social dependence, and for whom the cost of preventive care may be a particular burden. Furthermore, health services, including preventive services, shall be made available directly or through arrangements with physicians, or other health providers and medical entities, to mothers and children who, for economic reasons, have difficulty in obtaining the services they need, and special grants for projects for delivery of care to other identified groups of mothers and children shall be made available.

SEC. 3. Title V of the Social Security Act as amended is hereby further amended to read as follows:

"TABLE OF CONTENTS

"Sec. 501. Authorization of appropriations.
"Sec. 502. Allotments to States.
"Sec. 503. Approval of State plans.
"Sec. 504. Payments.
"Sec. 505. Operation of State plans.
"Sec. 506. Special grants for projects of regional or national significance.
"Sec. 507. Special grants for county and local projects.
"Sec. 508. Training of personnel.
"Sec. 509. Research projects.
"Sec. 510. Administration.
"Sec. 511. Definition.
"Sec. 512. Observance of religious beliefs.
"Sec. 513. National Office of Maternal and Child Health.
"Sec. 514. National Advisory Council on Maternal and Child Health.
"Sec. 515. Study on maternal and child health delivery.

"AUTHORIZATION OF APPROPRIATIONS

SEC. 501. (a) For the purpose of enabling each State to extend and improve—

"(1) services for reducing infant mortality and otherwise promoting the health of mothers, infants, children, and adolescents;

"(2) services to prevent disease and disability that cripple children and to locate, diagnose, treat, and provide followup services for children who have crippling conditions or who suffer conditions which may lead to crippling;

"(3) services for locating and identifying mothers, infants, children, adolescents, and crippled children under State plans;

there are provided special grants to States and subdivisions of States for new activities to address the provision of medical services for health problems; grants for training of personnel; and grants for research projects related to the delivery of health services for mothers, infants, children, and adolescents.

"(b) There are authorized to be appropriated for the purposes of this Act—

"(1) for the fiscal year ending September 30, 1979, and for each fiscal year thereafter, $350,000,000 for maternal and child health services for which provision is made for allotments under section 502;

"(2) for the fiscal year ending September 30, 1979, and for each fiscal year thereafter, $150,000,000 for crippled children's services for which provision is made for allotments under section 502;

"(3) for the fiscal year ending September 30, 1979, and for each fiscal year thereafter $125,000,000 for special grants for projects of regional or national significance for which provision is made in section 506;

"(4) for the fiscal year ending September 30, 1979, and for each fiscal year thereafter, $100,000,000, subject to the provision of section 503(a)(10), for special grants for county and local projects for which provision is made in section 507;

"(5) for the fiscal year ending September 30, 1979, and for each fiscal year thereafter, $50,000,000 for training of personnel under the provisions of section 508;

"(6) for the fiscal year ending September 30, 1979, and for each fiscal year thereafter, $25,000,000 for research projects under the provisions of section 509.

"(c) Notwithstanding the preceding provisions of this section, of the amount appropriated for any fiscal year pursuant to this section, not less than 6 percent of the amount appropriated shall be available for family planning services under projects under sections 506, 507, and 509.

"ALLOTMENTS TO STATES

"SEC. 502. (a) From the amounts determined to be available to States pursuant to section 501(b) allotments under this section shall be made on the following basis:

"(1) There shall be allotted to each State for maternal and child health services $200,000 plus such part of the remainder of the funds appropriated pursuant to section 501(b)(1) for maternal and child health services as the number of live births in such State bears to the total number of live births in the United States in the latest calendar year for which there are statistics.

"(2) There shall be allocated to each State for crippled children's services $100,000 plus such part of the remainder of the funds appropriated pursuant to section 501(b)(2) for crippled children's services as the number of persons in the State under the age of twenty-one bears to the total number of persons in the United States under the age of twenty-one in the latest calendar year for which there are statistics.

"(b) Within the limits of the amounts appropriated in this Act for any fiscal year, there shall be allocated to each State a sum not less than the sum allocated to the State for the fiscal year ending September 30, 1977.

"(c) Funds allotted to States which remain unused at the close of a fiscal year shall be available to the Secretary for reallocation to States in the following year for the purposes of this section on the basis of demonstrated need to carry out the State plan.

"(d) Payments to States from amounts appropriated pursuant to section 501(b)(1) and (2) and allotted pursuant to this section shall be subject to matching by States pursuant to section 504.

"APPROVAL OF STATE PLANS

"SEC. 503. (a) In order to be entitled to payments for allotments to a State under section 502 for maternal and child health services and for crippled children's services, a State must have a State plan which—

"(1) provides for financial participation by the State;

"(2) provides for the administration of the plan by the State health agency; except that in the case of those States which on July 1, 1967, provided for administration (or supervision thereof) of the State plan approved under section 510 (as in effect on such date) by a State agency other than the State health agency, the plan of such State may be approved under this section if it would meet the requirements of this subsection except for provisions of administration (or supervision thereof) by such other agency for the portion of the plan relating to services for crippled children, and, in each such case, the portion of such plan which each such agency supervises, shall be regarded as a separate plan for purposes of this title;

"(3) provides (A) such methods of administration (including methods relating to the establishment and maintenance of personnel standards on a merit basis, except that the Secretary shall exercise no authority with respect to the selection, tenure of office, and compensation of any individual employed in accordance with such methods) as are necessary for the proper and efficient operation of the plan and (B) provide for the training and effective use of paid subprofessional staff, with particular emphasis on the full-time or part-time employment of persons of low income, as community service aids, in the administration of the plan and for the use of nonpaid or partially paid volunteers in providing services and in assisting any advisory committees established by the State agency;

"(4)(A) provides for the establishment of a State advisory council to be appointed by the Governor of the State to advise the State agency administering the plan that is approved pursuant to subsection (b) of this section in matters of policy, consolidation of health care programs in the State, identification of mothers and children in need of care, bringing care to them, and

"(B) provides that the composition of the State advisory council shall consist of nine members at least four of whom are practicing doctors of medicine, one of whom is a doctor of osteopathy, and one of whom is a doctor of dentistry, all duly licensed by the State and recommended by appropriate professional organizations, and the remainder of whom are members of the general public qualified by education, experience or knowledge to serve on the council;

"(5) provides that the State agency will make such reports, in such form and containing such information, as the Secretary may from time to time find necessary to assure the correctness and verification of such reports;

"(6) provides for cooperation with medical, health, nursing, educational, and welfare groups and organizations and, with respect to the portion of the plan relating to services for crippled children, with any agency in such State charged with administering State laws providing for special education and vocational rehabilitation of physically handicapped children;

"(7) provides for payment of the reasonable cost of inpatient hospital services provided under the plan, as determined in accordance with methods and standards which shall be developed by the State and included in the plan, except that the reasonable cost of any such services as determined under such methods and standards shall not exceed the amount which would be determined under section 1861(v) as the reasonable cost of such services for purposes of title XVIII;

"(8) provides, with respect to the portion of the plan relating to services for crippled children, for early identification of children in need of health care and services, and for health care and treatment needed to correct or ameliorate defects or chronic conditions discovered thereby, through provision of such periodic screening and diagnostic services, and such treatment, care, and other measures to correct or ameliorate defects or chronic conditions as may be provided in regulations to the Secretary;

"(9) provides that when services are available in the community, the State health agency shall reimburse an individual practitioner or other private health entity to render the medical services under the State plan;

"(10) provides with respect to the amounts appropriated for special grants for programs of county or local significance pursuant to paragraph (4) of section 501(b), that priority shall be given in the award of grants to cities and counties, and other subdivisions of the State for projects to be conducted in such subdivision;

"(11) provides for carrying out the purposes specified in section 501;

"(12) provides for the development of services in needy areas and among groups in special need;

"(13) provides that acceptance of family planning services provided under the plan shall be voluntary on the part of the individual to whom such services are offered and shall not be a prerequisite to eligibility for or the receipt of any service under the plan;

"(14) provides—

"(A) that the State health agency, or other appropriate State medical agency shall be responsible for establishing a plan, consistent with regulations prescribed by the Secretary, for the review by the appropriate Professional Standard Review Organization of the appropriateness and quality of care and services furnished to recipients of services under the plan and, where applicable, for providing guidance with respect thereto to the other State agency referred to in paragraph (2), and

"(B) that the State or local agency utilized by the Secretary for the purpose specified in the first sentence of section 1864(a), or if such agency is not the State agency which is responsible for licensing health institutions, the State agency responsible for such licensing, will perform the function of determining whether institutions and agencies meet the requirements for participation in the program under the plan under this title;

"(15) provides for the development of a unified State plan for mothers, infants, children, and adolescents by the maternal and child health and crippled children program; the plan will: describe the health care needs of the mothers and children in all parts of the State and the resources available to meet such needs; describe the unmet health needs of the mothers and children in all parts of the State; describe the objectives and priorities as determined by the State agency responsible for administering the maternal and child health program and the crippled children program; describe the method used by the State maternal and child health program and the crippled children program to select their objectives and to determine their priorities; include common goals and objectives for the two programs including evidence of appropriate sharing of personnel in the provision of the same or similar services and of joint planning concerning selected programs of common concern to both programs;

"(16) provides that the State maternal and child health plan will include the basic programs and services as determined by the State advistory council taking into consideration the guidelines developed by the National Office; basic programs and services will include, but not be limited to, the basic health services for mothers, infants, children, and adolescents, family planning, and school and health programs; in addition, the maternal and child health plan will include a series of special programs and projects that are conducted to meet the needs of the State and to respond to the priorities in the State plan; the maternal and child health plan may include such special programs for mothers, infants, children, and youth as may be developed and may include sudden infant death syndrome programs, dental programs, expanded perinatal projects, genetic screening and counseling programs, programs for unwed adolescent mothers, or other programs;

"(17) provides that the State crippled children program will include the basic programs and services as determined by the State advisory council taking into consideration the guidelines developed by the National Office; basic programs and services will include, but not be limited to, programs to provide special services for handicapped children; in addition, the crippled children plan will include a series of special programs and projects that are conducted to meet the needs of the State and respond to the priorities in the State plan: the crippled children plan may include such special projects for crippled children and youth as may be developed and may include centers to provide multidisciplinary evaluation of children with severe developmental disabilities, special programs for hemophilia, and other programs;

"(18) provides that special projects for maternal and infant care, health of school and preschool children, newborn intensive

care, and dental care of children being conducted within the State with funds from this title during the fiscal year ending September 30, 1977, shall, consistent with the needs of the State, be maintained within the State plan; and

"(19) provides that the State agency will submit to the Director of the Office of Maternal and Child Care on or before April 1 of each year, a report of the fiscal year ending September 30 immediately preceding the report date that—

"(A) identifies the health care needs of mothers, infants, children, and adolescents in all parts of the State, and the resources available to meet such needs,

"(B) identifies the unmet health care needs of the mothers, infants, children, and adolescents in all parts of the State which will be addressed, respectively, by State plan and by other auspices, public and private,

"(C) delineates problems in providing maternal and child health care and priorities that will be assigned by the State agency in resolving those problems,

"(D) describes activities to be taken under the State plan for providing maternal and child health care and crippled children care pursuant to this title for the first fiscal year beginning after the due date of the report, and

"(E) identifies the outcomes as a result of providing the services authorized by this title.

"(b) The Secretary shall approve any plan which meets the requirements of subsection (a).

"PAYMENTS

"SEC. 504. (a) From the sums appropriated therefor and the allotment available under section 502, the Secretary shall pay to each State which has a plan approved under this title for each quarter beginning with the quarter commencing with October 1, 1978, a percentage of the total amount expended for programs pursuant to the State plan. The percentage referred to in the first sentence will range between 70 percent and 90 percent and will be determined on the basis of a simple formula to be promulgated annually by the Secretary taking into account only the average per capita income within the State as estimated by current statistics. States will be ranked by average per capita income within each State and the percentage payable shall be proportionately scaled so that the State or States within which the lowest average per capita income exists shall receive 90 percent and the State or States within which the highest average per capita income exists shall receive 70 percent. Any amounts paid under the percentage shall be used exclusively for carrying out the plan with respect to maternal and child health services and crippled children services.

"(b)(1) Prior to the beginning of each quarter, the Secretary shall estimate the amount to which a State will be entitled under subsection (a) for such quarter, such estimate to be based on (A) a report filed by the State containing its estimate of the total sum to be expended in such quarter in accordance with the provisions of such subsection, and stating the amount appropriated or made available by the State and its political subdivisions for such expenditures in such quarter, and if such amount is less than the State's proportionate share of the total sum of such estimated expenditures, the source from which the difference is expected to be derived, and (B) such other information as the Secretary may find necessary.

"(2) The Secretary shall then pay to the State, in such installments as he may determine, the amount so estimated, reduced or increased to the extent of any overpayment or underpayment which the Secretary determines was made under this section to such State for any prior quarter and with respect to which adjustment has not already been made under this subsection.

"(3) Upon the making of an estimate by the Secretary under this subsection, any appropriations available for payments under this section shall be deemed obligated.

"(c) Payments of grants awarded under sections 506, 507, and 508, and of grants, contracts, or other arrangements under section 509, may be made in advance or by way of reimbursement, and in such installments, as the Secretary may determine, and shall be made on such conditions as the Secretary finds necessary to carry out the purposes of the section involved.

"(d) The total amount determined for payment under subsection (a) of this section for any fiscal year ending after September 30, 1978, shall be reduced by the amount by which the sum expended (as determined by the Secretary) from non-Federal sources for maternal and child health services and services for crippled children for such year is less than the sum expended from such sources for such services for the fiscal year ending September 30, 1978. In the case of any such reduction, the Secretary shall determine the portion thereof which shall be applied, and the manner of applying such reduction, to the amounts otherwise payable from allotments under section 502.

"(e) Notwithstanding the preceding provisions of this section, no payment shall be made to any State thereunder from the allotments under section 502 for any period unless the State makes a satisfactory showing that it is making available to mothers, infants, children, and adolescents, and to crippled children in all parts of the State health care services for which provision is made in this title.

"(f) Notwithstanding the preceeding provisions of this section, no payments shall be made to any State thereunder—

"(1) with respect to any amount paid for items or services furnished by a practitioner under the plan to the extent that such amount exceeds, or is less than, the charge which is the usual, customary or reasonable charge by such practitioner for such items or services;

"(2) with respect to any amount expended for inpatient hospital services furnished under the plan to the extent that such amount exceeds the hospital's customary charges with respect to such services or (if such services are furnished under the plan by a public institution free of charge or at a nominal charge to the public) exceeds an amount determined on the basis of those items (specified in regulations prescribed by the Secretary) included in the determination of such payment which the Secretary finds will provide for fair compensation to such institution for such services;

"(3) with respect to any amount expended for services furnished under the plan by a hospital unless such hospital has in effect a utilization review plan which meets the requirement imposed by section 1861(k) for purposes of title XVIII, and if such a hospital has in effect such a utilization review plan for purposes of title XVIII, such plan shall serve as the plan required by this subsection (with the same standards and procedures and with the same review committee or group) as a condition for payment under this title; the Secretary is authorized to waive the requirements of this paragraph in any State if the State agency demonstrates to his satisfaction that it has in operation utilization review procedures which are superior in their effectiveness to the procedures required under section 1861(k); or

"(4) with respect to any amount expended for indirect costs or administrative expenses which exceeds 25 percent of the total of Federal funds and any matching funds for the conduct of activities under the State plan.

"OPERATION OF STATE PLANS

"SEC. 505. If the Secretary, after reasonable notice and opportunity for hearing to the State agency administering or supervising the administration of the State plan approved under this title, finds—

"(1) that the plan has been so changed that it no longer complies with the provisions of section 503; or

"(2) that in the administration of the plan there is a failure to comply substantially with any such provision;

the Secretary shall notify such State agency that further payments will not be made to the State (or, in his discretion, that payments will be limited to categories under or parts of the State plan not affected by such failure), until the Secretary is satisfied that there will no longer be any such failure to comply. Until he is so satisfied he shall make no further payments to such State (or shall limit payments to categories under or parts of the State plan not affected by such failure).

"SPECIAL PROJECT GRANTS FOR PROJECTS OF REGIONAL OR NATIONAL SIGNIFICANCE

"SEC. 506. (a) In order to provide special incentives in developing new initiatives to address problems of regional or national significance, to encourage the development of new techniques in resolving the problem of providing health and medical services in underserved areas, to stimulate new programs and activities which address current health problems and which focus upon long-standing problems which have not yet been satisfactorily resolved, the Secretary is authorized to make from sums available under paragraph (3) of section 501(b), grants to the State agencies (administering or supervising the administration of a State plan approved under section 503) and to public or any nonprofit private agency, institution, or organization to pay the cost (exclusive of general agency overhead) for projects or special programs of regional or national significance which may contribute to the advancement of maternal and child health. Programs supported under this section may include (but are not limited to) those which provide or cover the cost of the provision of services or otherwise address the organization or delivery of services—

"(1) necessary to the prospective mother and the developing fetus;

"(2) necessary to the infant during the first year of life;

"(3) necessary to the child during the years of growth and development;

"(4) necessary for the adolescent; and

"(5) necessary to otherwise promote the health and well-being of women, infants, children, and adolescents, including health education.

"(b) Priority of grants will be given to those which will provide health care services to persons who will not receive care otherwise because of being from a low-income family or for other reasons beyond their control. Acceptance of family planning services provided under this title shall be voluntary on the part of the individual to whom such services are offered and shall not be a prerequisite to the eligibility for, or the receipt of, any service under such project.

"(c) No project shall be eligible for a grant under this section unless it provides for payment of—

"(1) the reasonable cost of inpatient hospital services provided under the project;

"(2) the usual, customary, and reasonable charges of a practitioner with respect to services provided under the project; or

"(3) if such services are furnished under the project by a public institution free of charge or at nominal charges to the public, an amount determined on the basis of those items (specified in regulations prescribed by the secretary) included in the determination of such reasonable cost which the Secretary finds will provide fair compensation to such institution for such services.

"(d) No single grant under this section shall exceed $2,000,000 in any fiscal year.

"SPECIAL GRANTS FOR UNDERSERVED COUNTIES AND LOCAL AREAS

"SEC. 507. (a) In order to foster the development of strong programs at the local level which address the health care needs of women, infants, children, and youth, particularly in areas with concentration of low-income families, the Secretary is authorized to make, from the sums available under paragraph (4) of section 501(b), with the consent of the State health agency, grants to local municipal and county health agencies and any other political subdivision of the State administering programs consistent with the State plan approved under section 503, or to any public or nonprofit private agency, institution, or organization, not to exceed 75 percent of the cost of programs which provide, arrange for the provision of, or reimburse for services which contribute to the advancement of maternal and child health (exclusive of general agency overhead)—

"(1) which help to reduce the incidence of mental retardation and other handicapping conditions caused by complications associated with child bearing and to help reduce infant and maternal mortality;

"(2) which help to promote the health of preschool and school age children including (but not limited to) preventive services, immunizations, periodic health assessments, health education, as well as other physician services and hospitalization; or

"(3) which foster comprehensive health care for youth and otherwise provide for care, treatment and counseling for conditions associated with pregnancy, venereal disease, alcoholism, drug addiction, and mental health.

"(b) No project shall be eligible for a grant under this section unless it provides—

"(1) for the coordination of health care and services provided under it with, and utilization (to the extent feasible) of, other State or local health, welfare, and education programs for women, infants, children, and adolescents, and

"(2) for payment of—

"(A) the reasonable cost of inpatient hospital services provided under the project;

"(B) the usual, customary, and reasonable charges of a practitioner with respect to services provided under the project; or

"(C) if such services are furnished under the project by a public institution free of charge or at nominal charges to the public, an amount determined on the basis of those items (specified in regulations prescribed by the Secretary) included in the determination of such reasonable cost which the Secretary finds will provide fair compensation to such institution for such services;

"(3) that any treatment, correction of defects or aftercare provided under the project is available only to women, infants, children, and adolescents who would not otherwise receive such care because they are from low-income families or for other reasons beyond their control; and no such project shall be considered to be of a comprehensive nature for purposes of this section unless it includes (subject to the limitation in the proceeding provisions of this sentence) at least such screening, diagnosis, preventive services, treatment, correction of defects, and aftercare, both medical and dental, as may be provided for in regulations of the Secretary.

"(c) No single grant under this section shall exceed $1,000,000 in any fiscal year.

"TRAINING OF PERSONNEL

"SEC. 508. From the sums available under paragraph (4) of section 501(b), the Secretary is authorized to make grants to public or nonprofit private organizations or institutions of higher learning for training personnel for health care and related service for mothers and children. In making such grants the Secretary shall give special attention to programs providing training at the undergraduate level.

"RESEARCH PROJECTS

"SEC. 509. From the sums available under paragraph (5) of section 501(b), the Secretary is authorized to make grants to, or jointly finance cooperative arrangements with, public or other nonprofit institutions of higher learning and public or nonprofit private agencies or organizations engaged in research or in such programs, for research projects relating to matenal and child health services or crippled children's services which show promise of substantial contribution to the advancement thereof. Special emphasis shall be accorded to projects which will help in studying the need for, and the feasibility, cost, and effectiveness of, comprehensive health care programs. Grants under this section may also include funds for the training of health personnel for work in such projects.

"ADMINISTRATION

"SEC. 510. (a) The Secretary of Health, Education, and Welfare shall make such studies and investigations as will promote the efficient administration of this title.

"(b) Such portion of the appropriations for grants under section 501 as the Secretary may determine, but not exceeding one-half of 1 percent thereof, shall be available for evaluation by the Secretary (directly or by grants or contracts) of the programs for which such appropriations are made and, in the case of allotments from any such appropriation, the amount available for allotments shall be reduced accordingly.

"(c) Any agency, institution, or organization shall, if and to the extent prescribed by the Secretary, as a condition to receipt of grants under this title, cooperate with the State agency administering or supervising the administration of the State plan approved under title XIX in the provision of care and services, available under a plan or project under this title, for children eligible therefor under such plan approved under title XIX.

"DEFINITION

"SEC. 511. For purposes of this title, a crippled child is an individual under the age of twenty-one who has an organic disease, defect, or condition which may hinder the achievement of normal growth and development.

"OBSERVANCE OF RELIGIOUS BELIEFS

"SEC. 512. Nothing in this title shall be construed to require any State which has any plan or program approved under, or receiving financial support under, this title to compel any person to undergo any medical screening, examination, diagnosis, or treatment or to accept other health care or services provided under such plan or program for any purpose (other than for the purpose of discovering and preventing the spread of infection or contagious disease or for the purpose of protecting environmental health), if such person objects (or, in case such person is a child, his parent or guardian objects) thereto on religious grounds.

"NATIONAL OFFICE OF MATERNAL AND CHILD HEALTH

"SEC. 513. (a) There is hereby established in the Department of Health, Education, and Welfare an identifiable unit known as the National Office of Maternal and Child Health Services to carry out the following duties:

"(1) to monitor the operation of title V in the respective States and to evaluate the effectiveness of State programs in providing maternal and child health care services under that title;

"(2) to seek to improve maternal and child health care services through coordination of activities of the Federal health agencies in the operation of this title for maternal and child health and crippled children's services;

"(3) to develop, with the advice and assistance of the National Advisory Council on Maternal and Child Health, guidelines for use by States in the development of State plans pursuant to section 503;

"(4) to develop, with the advice and assistance of the National Advisory Council on Maternal and Child Health, an organized system of data collection and retrieval as a central source of information related to the health of mothers and children and to the health services available to them under this title for implementation at National and State levels coordinated to serve national, State and local areas;

"(5) to provide technical assistance to the State in carrying out its plan (that is, through consultation, conferences, demonstration, and evaluation); and

"(6) to develop a long-range program for carrying out the purpose of title V for implementation by the States on a voluntary basis, including in such program provision for comprehensive maternal, infant, child, and adolescent health care services and designation of priorities for program development.

"(b)(1) There shall be at the head of the Office a Director of Maternal and Child Health Services (to be known as the Director) who shall be appointed by the Secretary. The Director may employ and prescribe the functions of such staff as are necessary to perform the functions vested in him.

"(2) In carrying out any of his functions under this title, the Director is authorized to make grants to any public or nonprofit agency, organization, or institution, and to enter into contracts with any agency, organization, or institution, or with any individual.

"(c) There is authorized for the purpose of carrying out the provisions of this section such sums as are necessary for the fiscal year begining October 1, 1978 and each succeeding fiscal year.

"NATIONAL ADVISORY COUNCIL ON MATERNAL AND CHILD HEALTH

"SEC. 514. (a) The Secretary shall appoint a National Advisory Council on Maternal and Child Health Care Programs (hereinafter referred to as the 'National Council') which shall consist of fifteen persons including the Assistant Secretary of Health of the Department of Health, Education, and Welfare, who shall serve as Chairman. The remaining members, not otherwise in the employ of the United States, shall be appointed by the Secretary. The appointed members of the National Council shall be selected from persons who are specifically qualified to serve on such Council by virtue of their education, training, or experience, and shall include at least eight persons who are practicing doctors of medicine, one practicing doctor of osteopathy, and one practicing doctor of dentistry, each of whom shall be recommended by appropriate national professional organizations and licensed in a State as a practicing doctor of medicine, osteopathy, or dentistry, and the remaining members of the Council shall be members of the general public.

"(b) Each appointed member of the Committee shall be appointed for a term of four years, except that—

"(1) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and

"(2) of the members first appointed, two shall be appointed for a term of four years, two shall be appointed for a term of three years, and one shall be appointed for a term of one year, as designated by the Secretary at the time of appointment. Appointed mem-

bers may serve for the expiration of their terms or until their successors have taken office.

"(c) Appointed members of the Committee shall receive for each day they are engaged in the performance of the functions of the Committee compensation at rates not to exceed the daily equivalent of the annual rate in effect for grades GS–18 of the General Schedule, including traveltime; and all members while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence in the same manner as such expenses are authorized by sections 5703 of title V, United States Code, for persons in the Government employed intermittently.

"(d) The National Council shall—

"(1) advise and assist the Secretary in the preparation of regulations for, and on policy matters arising with respect to, the administration of this title;

"(2) consider all State plans developed for approval by the Secretary pursuant to section 503, and make recommendations to the Secretary with respect to such approval;

"(3) review the long-range program;

"(4) advise and assist the National Office of Maternal and Child Health in developing guidelines under section 513(a)(3) and data systems under section 513(a)(4); and

"(5) perform such other duties as are appropriate in advising and assisting States and the National Office of Maternal and Child Health.

"(e) The National Council shall meet as frequently as the Chairman deems necessary but not less than two times annually. Upon request of four or more members, it shall be the duty of the Chairman to call a meeting of the National Council.

"STUDY ON MATERNAL AND CHILD HEALTH DELIVERY

"SEC. 515. (a) The Secretary shall conduct a study of the Federal health programs for mothers, infants, children, and adolescents. This study will—

"(1) include the collection of information about cost, efficiency, and the effectiveness of the State maternal child health and the State crippled children programs—as well as the cost effectiveness and efficiency of all other Federal programs concerned with the health of mothers and children·

"(2) be charged to make suggestions on how the Federal health programs for mothers, infants, children, and adolescents can be coordinated if not consolidated;

"(3) evaluate the extent to which, and reasons that, title V has been unable to provide to eligible persons care for which they are eligible under that title;

"(4) make recommendations for improving the delivery of health care services made available under title V to eligible beneficiaries including any recommendations for bringing such care to individuals in shortage areas.

"(b) In carrying out these studies the Secretary shall invite the participation of other Federal departments and agencies having related responsibilities and interests, State governments, medical associations, and insurance carriers.

"(c) The Secretary shall make a report on this study and forward the report with such recommendations as he deems appropriate to the Congress and the President on or before January 1, 1980.".

PROPOSAL TO AMEND TITLE V OF THE SOCIAL SECURITY ACT MATERNAL AND CHILD HEALTH CARE

BACKGROUND

Title V is presently a program to promote the health of mothers and children and to prevent and treat disease and disability that lead to the crippling of children. The Title V program operates in large part under a federal grant mechanism for basic services. Under Title V, the State assumes wide latitude in determining how it will implement its program and set program policy.

Since its inception in 1935, Title V has played an important role in providing health care and improving the health of the population it has served. In the attainment of its objectives, however, it has operated with limited funding and outside the framework of a specific organizational structure. Still, the number of individuals and conditions eligible for coverage under Title V has continued to increase.

If the program is to continue to provide services in a meaningful manner it is necessary to revamp certain portions while retaining the useful, successful, and familiar basic structure.

PROPOSED CHANGES

The proposed changes would address three basic areas: funding, organization, and intended beneficiaries.

The first significant change would be the inclusion of the phrase "women, infants, children, and adolescents." This is necessary to make clear that the program is intended to cover conditions of all mothers and their children.

While the present program does not prohibit such care (and in fact in many instances state programs provide care to all eligible individuals) the expanded inclusion will remove any doubt as to the appropriateness of such coverage.

A second significant change pertains to federal funding.

Under the present law funding goes to each state on a formula basis, after a basic grant.

One change would provide added funding. While there would be alloted to each of the states at least as much federal funding for the purposes of Title V as is available to the state under present law, the law would be changed to align allotments more nearly with financial resources of the state.

A basic (but increased) allotment would be retained. The payments to states from further allotments would be subject to federal-state matching, with the federal share varying between 70% and 90%, depending on the state's most recent average per capita income.

In addition to grants to states for conducting statewide activities, funds would also be allocated for direct federal grants (a) for special projects of regional or national significance and (b) for special projects of a local nature.

For each of the service programs (maternal and child health, crippled children, and special regional and local programs) separate authorizations are provided, thus preventing a commingling of appropriations. Special authorizations would also be given to programs for training and research.

In order to assure broadest distribution of special project funds intended as "seed" money, special project grants would have annual dollar limitations.

The third significant change pertains to organization of the Title V program.

A National Office of Maternal and Child Health would be established in HEW to monitor Title V operations in the respective states and determine the effectiveness of state programs.

The Office would develop guidelines to assist in the implementation of state plans; develop an organized system of data collection and retrieval to serve national, state, and local areas; provide technical assistance to states; and develop a long-range Title V program.

Annual state reports to the National Office would be required to identify health needs and available resources in the state; unmet needs to be addressed; and outcomes resulting from the provision of services under the program.

A National Advisory Council of 15 members, including eight practicing professionals to be appointed by the Secretary, would advise and assist the National Office in program administration, policy and regulations, and would make recommendations for implementation of a long-range Title V program.

On the state level each state would continue to operate its Title V program. However, under revised conditions for plan approval, the Governor would appoint a 9-member State Advisory Council on Maternal and Child Health, a majority of which would be licensed practicing health professionals. Their responsibility would be to advise the state agency administering the plan in matters of policy, coordination, and identification of persons in need of basic care and services, taking into consideration guidelines developed by the National Office of Maternal and Child Health.

The State plan would utilize the services of individual practitioners (reimbursed at usual and customary levels) or other private health entities in the provision of services under Title V when such services are available in the community.

Each year the state agency administering the plan would submit a report to the National Office of Maternal and Child Care identifying outcomes of the services provided, health care needs in all parts of the state and unmet needs to be addressed. The state agency would also delineate problems and its approach in resolving such problems.

A special study on Maternal and Child Health delivery would be undertaken by the Secretary, directly or by contract, for the purposes of evaluating the effectiveness of the program, assessing the interrelationship between Title V and other titles of the Social Security Act; determining the extent to which there are deficiencies in providing care to eligible persons; and recommending improvements in the delivery of care to shortage areas.

A report would be prepared by the Secretary and submitted by him with such recommendations as he deems appropriate to the Congress and the President, on or before April 1, 1980.●

By Mr. BENTSEN:

S. 3402. A bill to amend the Internal Revenue Code of 1954 to make technical corrections in the provisions relating to individual retirement accounts; to the Committee on Finance.

INDIVIDUAL RETIREMENT ACCOUNT SIMPLIFICATION ACT

● Mr. BENTSEN. Mr. President, I am today introducing legislation to make some very technical changes in our tax laws to simplify the rules governing individual retirement accounts which are often referred to as IRA's. This bill should result in virtually no revenue loss to the Treasury Department. Individual retirement accounts were enacted 4 years ago as part of the Employee Retirement Income Security Act (ERISA). That law provided a tax deduction for certain contributions to individual retirement accounts for individuals who are not participants in employer-sponsored retirement plans.

Since the enactment of the IRA provisions, the Pension Subcommittee of the Senate Finance Committee which I chair has become aware of certain technical problems with IRA's which impose an unfair burden on taxpayers. The legislation that I am introducing today would resolve many of these problems.

It would help simplify IRA's for both the taxpayer and the Internal Revenue Service, provide greater flexibility for retirement savings and prevent the imposition of excessive tax penalties for inadvertent mistakes which are subsequently corrected.

This bill would supplement my ERISA simplification bill (S. 2352) which the Senate Finance Committee unanimously approved last year to reduce excessive paperwork and redtape under ERISA.

Under existing law, individuals who are not active participants in a qualified or Government pension plan or a section 403(b) contract are permitted to take a tax deduction of the lesser of 15 percent of compensation or $1,500 for contributions into an individual retirement account. (The maximum contribution is $1,750 for certain "spousal" individual retirement accounts.) This deduction is available whether or not the taxpayer itemizes his deductions.

The assets of an individual retirement account may be invested in a trusted or custodial account with a bank, savings and loan association, credit union, or in an annuity contract, or in a qualified retirement bond.

To facilitate the portability of pensions—or their transfer with the employee as he or she changes jobs—money or property may be distributed from a tax qualified pension plan or from an individual retirement account to the participant, on a tax-free basis in certain circumstances, if the money is reinvested within a specified time limit in an appropriate retirement fund. This is generally referred to as a "tax-free rollover."

The bill I am introducing today has a series of technical changes in the tax laws relating to four aspects of IRA's: First, the tax treatment of contributions into the account, second, the tax treatment of so-called rollovers, third, penalty provisions for excess accumulations or excess contributions, and fourth, simplified reporting.

Mr. President, I would like to briefly summarize these provisions.

TAX TREATMENT OF CONTRIBUTIONS

The bill extends the current deadline for making contributions to and for establishing an IRA until the individual's Federal tax filing date—including extensions—for the year involved. Thus the latest date for calendar year taxpayers to contribute to or establish IRA's generally would be April 15—plus any extensions—of the following year.

Under the bill, an individual whose contribution does not exceed $1,750 may avoid both the double taxation and the 10 percent premature distribution tax, and avoid the 6 percent excess contributions tax for future years, by withdrawing an excess contribution at any time.

If the individual is entitled to an IRA deduction for any year which follows a year in which an excess contribution is made, he is allowed, under the bill, to receive a deduction by applying the excess as a contribution for a later year.

The bill would prevent new individual retirement annuities which require fixed annuities. Current law may restrict both eligibility and the maximum amount of premium payments thus making a fixed annuity arrangement inappropriate.

TAX TREATMENT OF ROLLOVERS

Individuals are permitted to rollover less than the entire amount distributed from a qualified plan—and attributable to employer contributions—into an IRA or another qualified plan.

Individuals may rollover the proceeds from the sale of property distributed rather than rollover the property in kind.

A surviving spouse is permitted to rollover a plan distribution into an IRA on the same basis as a plan participant.

The 5-year plan participation rule for receiving a "lump sum distribution" is repealed insofar as it restricts eligibility for a rollover IRA.

The rule limiting the frequency of rollovers to once every 3 years is repealed.

CHANGES RELATING TO PENALTIES

The Treasury and IRS are given the authority, where the taxpayer makes a reasonable error and takes appropriate remedial steps, to waive the existing 50 percent tax on distribution shortfalls known as excess accumulations. This is a penalty which would be applied only in situations where a tax abuse exists.

Certain limitations on the amount of an "excess contribution" which may be corrected through a distribution prior to the tax filing date—for the year in which the contribution is made—are removed.

SIMPLIFIED REPORTING

The bill eliminates the separate individual reporting requirements for an IRA in certain circumstances. This provision should make it easier for individuals to establish and maintain IRA's without excessive paperwork.●

By Mr. BELLMON:

S. 3403. A bill to establish a National Student Loan Bank; to the Committee on Human Resources and the Committee on Banking, Housing, and Urban Affairs, jointly, by unanimous consent.

NATIONAL STUDENT LOAN BANK ACT

● Mr. BELLMON. Mr. President, as with other Members of the Senate, I have been distressed by the lack of financial support to young people who desire to seek training at institutions of higher education and, yet, who are unable to secure finances to defray the costs of such training. Many efforts have been made by Congress to meet this problem but, at the present time, there still exist a large number of students who are unable to secure either loans or grants under the programs which are presently in operation. To help fill this need, I am today introducing a bill which would create a National Student Loan Bank patterned after the plan used by the Farm Credit Administration in making credit available to American farmers.

The Farm Credit Administration was established in 1933 at a time when credit to America's food producers was scarce and costly. The bank has now operated more than 40 years with a singular record of success. Losses have been small and largely due to the financial support which has been available, America's farmers have come to be the most productive in the world. I believe the lesson which has been learned in the Farm Credit Administration can be applied in the creation of a National Student Loan Bank.

Let me now describe briefly the National Student Loan Bank proposal, Mr. President. In the first place, all college students and post-secondary vocational students would be qualified to apply for loans. It is not income tested; and it is not for people in any certain age group.

A student could borrow what he or she needed, up to the actual cost of tuition and related expenses at any qualified institution, at which the student had been accepted.

My proposal should cost the Federal Government a limited amount if, indeed, it costs anything at all in the long run. Under my bill, the Government would put up about $1 billion—estimated actual outlays—for initial capitalization and administrative costs during startup. In addition, an annual appropriation of about $250 million—estimated actual outlays—to cover deferred interest—would be necessary for several years, until earnings from repayments were sufficient to make the bank self-sustaining.

As the bank makes loans, it will sell certificates of participation, which will raise additional capital, from which, in turn, the bank can make additional loans.

The bank would raise the additional capital it needed by selling bonded obligations to the general public. These bonds would be supported by the full faith and credit of the United States. Over time, they would be paid off as student borrowers repay their loans.

Borrowers would pay interest at the Treasury bill rate plus 1 percent. This rate would vary each year, as the cost of money to the Government went up and down. This variable interest rate insures the Government against losses resulting from inflation. This interest rate, while substantially below the prime rate, still does not amount to an out-and-out intrust subsidy.

The interest would be deferred while the student was in school and added to the principal upon which payments begin 9 months to 1 year after leaving school.

In addition, my proposed bill would phase out all existing federally subsidized and federally guaranteed student loan programs. These programs will cost a total of $1.2 billion in fiscal year 1978, and the costs are rising every year. It should be clear, therefore, that, with the possible exception of our contribution to initial capitalization of the bank, the long-term result of my bill would be a substantial net savings to the Federal Treasury.

Under my proposal, moreover, borrowers would be required to purchase certificates of participation in the bank. This has at least two benefits. I think we learn from credit unions that people are more likely to repay institutions in which they have an ownership interest, however small—and there is a small earnings potential, for the bank if students borrow from the bank to purchase their shares—and this earnings potential could help to finance the bank.

Under my bank proposal, Mr. Presi-

dent, we would not have the collection problem we have in existing student loan programs. The bank would have available to it all the tools necessary to collect outstanding debts; and, as a last resort, delinquent loans could be turned over to IRS for collection—just as delinquent taxes are collected.

Finally, Mr. President, loans under my bank proposal would be affordable. There is no incentive to borrow a lot of money under my proposal—as is the case under some other loan proposals which have been put forth—as repayment is based on the amount borrowed. Repayment rate is based, on borrower earnings after college; few of the borrowers, if any, should face a situation in which they cannot afford to repay their loans. This combination of loan amount and income, as a base for repayment schedule, seems to me the most satisfactory answer to the difficult question on how to set loan payments for individuals, most of whom are starting out in life, and whose earnings will vary, but generally increase through time.

Let me close, Mr. President, by making an observation once put forth regarding a similar proposal—offered by the Carnegie Commission—the National Student Loan Bank proposal, makes it possible for students to "sell shares in their futures." This seems to me ultimately consistent with everything for which this country stands.

I urge my colleagues to support this bill.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3403

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this act may be cited as the "National Student Loan Bank Act".

BANK ESTABLISHED

SEC. 2. There is hereby established a nonprofit corporation of the District of Columbia to be known as the National Student Loan Bank. The bank, which shall not be an agency or instrumentality of the United States Government, shall maintain such offices as may be necessary or appropriate in the conduct of its business.

BOARD OF DIRECTORS

SEC. 3. (a) The bank shall have a board of directors consisting of fifteen individuals who are interested and experienced in higher education, banking and finance, or public affairs. Members of the board shall be appointed by the President, by and with the advice and consent of the Senate. At least three members shall be students, at the time of their appointments, at postsecondary or higher education institutions. Students appointed to the board shall be selected with a view of achieving the widest possible representation of geographic regions, fields of study, and undergraduate and graduate education. At least one of such students shall be participants in programs provided for by the Higher Education Act of 1965. The President shall select one of the members of the board to serve as chairman.

(b) The terms of office of persons appointed to the board of directors of the bank shall be five years, except that (1) the terms of persons first taking office shall expire, as designated by the appointing officer at the time of appointment, three at the end of one year, three at the end of two years, three at the end of three years, three at the end of four years, and three at the end of five years; and (2) any person appointed to fill a vacancy occurring before the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term. No person shall be eligible to serve more than two terms on the board.

(c) The board shall appoint a president of the bank and such other officers as it deems necessary to carry out the functions of the bank.

FUNCTIONS OF THE BANK

SEC. 4. (a) It shall be the function of the bank to extend loans to students at eligible institutions. Such loans shall—

(1) not exceed the cost of attendance (computed in accordance with section 428 (a)(2)(C) of the Higher Education Act of 1965);

(2) be available each year for a period not to exceed five years of undergraduate or other study at an eligible institution, or its equivalent in part-time study, and for a period of not to exceed eight years of graduate study including medical school and other professional graduate training, or its equivalent in part-time study;

(3) be available to any student who (A) has been accepted for enrollment at an eligible institution or, in the case of a student already attending such institution, is in good standing at such an institution as determined by the institution, (B) is carrying at least one-half the normal full-time workload as determined by the institution, and (C) has provided the bank with a statement of the institution which sets forth a schedule of the tuition and fees applicable to that student and its estimate of the cost of board, room, and books for such a statement; and

(4) be evidenced by a note or other written agreement which—

(A) is made without security and without endorsement;

(B) provides for disbursement of the proceeds of the advance by check, payable to the institution at which the advance recipient is in attendance, requiring endorsement by such recipient;

(C) provides that the portion of such proceeds allocable to nontuition expenses shall be paid by such institution to the advance recipient upon presentation of evidence satisfactory to the institution that such portion shall be used for such expenses;

(D) provides for repayment of the principal amount of the loan—

(i) at an interest rate (which may be variable) equal to the Treasury borrowing rate plus 1 per centum;

(ii) beginning not earlier than nine months nor later than one year after the date on which the borrower ceases to carry at an eligible institution at least one-half the normal full-time academic workload as determined by the institution;

(iii) at an annual rate, per thousand dollars (or fraction thereof) borrowed, equal to 1 per centum of the taxable income of the borrower (or of the borrower and his or her spouse in the case of a borrower filing a joint return) during the preceding taxable year;

(iv) ending at such time as the total principal and accrued interest are repaid; and

(v) entitles the borrower to repay the full amount of the loan plus accrued interest at any time and without penalty;

(E) provides that the borrower will provide to the bank a copy of all individual income tax returns filed by the borrower (jointly with the spouse of the borrower, or separately, as the case may be) on or after the date on which the borrower ceases to carry at an eligible institution at least one-half the normal full-time academic load as determined by the institution, or, in the alternative, will pay, during the twelve months following failure to timely provide such a copy, an amount equal to one-tenth of the total amount borrowed plus accrued interest, or equal to the unpaid principal amount of the loan plus accrued interest, whichever is less; and

(F) contains such other terms and conditions as the Board deems necessary.

(b)(1) Whenever the borrower fails to meet his obligations to the bank, delinquent amounts (principal plus accrued interest) may at the option of the bank be turned over to the Department of the Treasury for collection.

(2) Such delinquent accounts shall be treated in the same manner as delinquent Federal taxes. The Secretary of the Treasury, through the Internal Revenue Service, shall make every effort to collect such accounts. The Secretary, through the Internal Revenue Service, shall collect such delinquent accounts as if such accounts were delinquent tax liabilities, with all sanctions and remedies available to them to collect delinquent taxes also available to collect such delinquent loans.

(c) The bank shall establish offices easily accessible to students in all parts of the country. Such offices may be established in the facilities of other lenders whose operations are subject to review by an agency of the Federal Government or whose obligations are guaranteed by the Federal Government.

OBLIGATIONS OF BANK; FEDERAL GUARANTEE

SEC. 5. (a) To the extent provided in advance by appropriations Acts, the bank is authorized to issue and have outstanding obligations having such maturities and bearing such rate or rates of interest as may be determined by the bank with the approval of the Secretary of the Treasury. Such obligations may be redeemable at the option of the bank before maturity in such manner as may be stipulated therein. The aggregate amount of obligations of the bank outstanding at any one time shall not exceed $7,000,000,000 during fiscal years 1980 and 1981, nor exceed an amount determined by the bank with the approval of the Secretary of the Treasury during succeeding fiscal years. The bank may purchase in the open market any of its outstanding obligations.

(b) The Secretary of the Treasury shall, upon such terms and conditions as he may prescribe, guarantee obligations issued by the bank under this section. The Secretary may establish and collect fees for guarantees hereunder. Such fees shall, insofar as practicable having due regard for the purposes of this Act, be fixed with a view to providing income sufficient for a self-supporing guarantee program. The full faith and credit of the United States is pledged to the payment of guarantees made under this section with respect to both principal and interest.

(c) To provide for the payment of any liabilities incurred as a result of guarantees made under this section, the Secretary of the Treasury is authorized to establish a revolving fund which shall consist of (1) receipts from fees, (2) recoveries under security or subrogation rights or other rights, and any other receipts obtained in connection with such guarantees, and (3) such additional sums, which are hereby authorized to be appropriated, as may be required from time to time to make payments required under such guarantees. Any sums so appropriated shall remain available until expended.

(d) Notwithstanding any other provision of law, the Secretary of the Treasury shall have power to pursue to final collection by way of compromise or otherwise all claims acquired by him in connection with any security, subrogation, or other rights obtained by him in connection with guarantees made under this section.

(e) Any guarantee made by the Secretary of the Treasury under this section shall be conclusive evidence of the eligibility of the

obligations for such guarantee, and the validity of any guarantee so made shall be incontestable in the hands of a qualified holder of the guaranteed obligation except for fraud or material misrepresentation on the part of such holder.

REQUIREMENTS FOR PURCHASE OF CERTIFICATES OF PARTICIPATION AS A CONDITION TO RECEIVING A LOAN

SEC. 6. The bank shall require borrowers, as a condition of receiving a loan, to purchase certificates of participation in the bank equal to a minimum of 10 per centum of the principal amount of the loan. The bank shall make funds available to borrowers for this purpose on the same terms, and under the same conditions, as enumerated in section 4 of this Act.

GENERAL POWERS

SEC. 7. (a) The bank shall have power—

(1) to sue and be sued, complain and defend, in its corporate name and through its own counsel;

(2) to adopt, alter, and use a corporate seal, which shall be judicially noticed;

(3) to adopt, amend, and repeal by its board of directors such bylaws, rules, and regulations as may be necessary for the conduct of its business;

(4) to conduct its business, carry on its operations, and have offices and exercise the powers granted by this title in any State without regard to any qualification or similar statute in any State;

(5) to lease, purchase, or otherwise acquire, own, hold, improve, use, or otherwise deal in and with any property, real, personal, or mixed, or any interest therein, wherever situated;

(6) to accept gifts or donations of services, or of property, real, personal, or mixed, tangible or intangible, in aid of any of the purposes of the bank;

(7) to sell, convey, mortgage, pledge, lease, exchange, and otherwise dispose of its property and assets;

(8) to appoint such officers, attorneys, employees, and agents as may be required, to determine their qualifications, to define their duties, to fix their salaries, require bonds for them, and fix the penalty thereof; and

(9) to enter into contracts, to execute instruments, to incur liabilities, and to do all things as are necessary or incidental to the proper management of its affairs and the proper conduct of its business.

(b) The bank is authorized to utilize the services of financial institutions and postsecondary or higher education institutions in the initiation of loans and the certification of the eligibility of prospective borrowers.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 8. (a) The financial transactions of the bank shall be audited by the General Accounting Office in accordance with the principles and procedures applicable to commercial corporate transactions and under such rules and regulations as may be prescribed by the Comptroller General of the United States. The audit shall be conducted at the place or places where the accounts are normally kept. The representatives of the General Accounting Office shall have access to all books, accounts, financial records, reports, files, and all other papers, things, or property belonging to or in use by the bank and necessary to facilitate the audit and they shall be afforded full facilities for verifying transactions with the balances or securities held by depositories, fiscal agents, and custodians.

(b) The expenses of any audit performed under this section shall be borne out of appropriations to the General Accounting Office, and appropriations in such sums as may be necessary are authorized. The bank shall reimburse the General Accounting Office for the full cost of such audit as billed therefor by the Comptroller General, and the General Accounting Office shall deposit the sums so reimbursed into the Treasury as miscellaneous receipts.

AUDIT REPORT TO CONGRESS

SEC. 9. A report of each such audit for a fiscal year shall be made by the Comptroller General to the President and to the Congress not later than six months following the close of such fiscal year. The report shall set forth the scope of the audit and shall include a statement of assets and liabilities, capital and surplus or deficit; a statement of surplus or deficit analysis; a statement of income and expenses; a statement of sources and application of funds; and such comments and information as may be deemed necessary to keep Congress and the President informed of the operations and financial condition of the bank, together with such recommendations with respect thereto as the Comptroller General may deem advisable, including a report of any impairment of capital or lack of sufficient capital noted in the audit. A copy of each report shall be furnished to the Secretary of Health, Education, and Welfare, the Secretary of the Treasury, and to the bank.

TAX EXEMPTIONS

SEC. 10. The bank, its property, its franchise, capital, reserves, surplus, security holdings, and other funds and its income shall be exempt from all taxation now or hereafter imposed by the United States or by any State or local taxing authority; except that (1) any real property and any tangible personal property of the bank shall be subject to Federal, State, and local taxation to the same extent according to its value as other such property is taxed, and (2) any and all obligations issued by the bank shall be subjected both as to principal and interest to Federal, State, and local taxation to the same extent as the obligations of private corporations are taxed.

OBLIGATIONS AS LAWFUL INVESTMENTS, ACCEPTANCE AS SECURITY

SEC. 11. All obligations issued by the bank shall be lawful investments, and may be accepted as security for all fiduciary, trust, and public funds, the investment or deposit of which shall be under authority or control of the United States or of any officer or officers thereof. All obligations issued by the bank pursuant to this Act shall be deemed to be exempt securities within the meaning of laws administered by the Securities and Exchange Commission, to the same extent as securities which are direct obligations of the United States.

PREPARATION OF OBLIGATIONS

SEC. 12. In order to furnish obligations for delivery by the bank, the Secretary of the Treasury is authorized to prepare such obligations in such form as the Board of Directors may approve, such obligations when prepared to be held in the Treasury subject to delivery upon order by the bank. The engraved plates, dies, bed pieces, and so forth, executed in connection therewith shall remain in the custody of the Secretary of the Treasury. The bank shall reimburse the Secretary of the Treasury for any expenditures made in the preparation, custody, and delivery of such obligations.

ANNUAL REPORT

SEC. 13. The bank shall, as soon as practicable after the end of each fiscal year, transmit to the President and the Congress an annual report of its operations and activities.

AMENDMENTS RELATING TO FINANCIAL INSTITUTIONS

SEC. 14. (a) The sixth sentence of the seventh paragraph of section 5136 of the Revised Statutes, as amended (12 U.S.C. 24), is amended by inserting "or obligations of the National Student Loan Bank," immediately after "or obligations, participations, or other instruments of or issued by the Federal National Mortgage Association or the Government National Mortgage Association,".

(b) Section 5200 of the Revised Statutes, as amended (12 U.S.C. 84), is amended by adding at the end thereof the following new paragraph:

"(14) Obligations of the Higher Education Loan Bank shall not be subject to any limitation based upon such capital and surplus."

PHASING OUT OF STUDENT LOAN PROGRAMS

SEC. 15. (a) No loan may be made, insured, or guaranteed under part B or under part E of title IV of the Higher Education Act of 1965 after July 1, 1979, to any new applicant under any of these programs.

(b) The Commissioner of Education shall prepare and submit, not later than March 1, 1979, to the Congress such recommendations as he determines necessary to efficiently phase out loan programs under part B and part E of title IV of the Higher Education Act of 1965.

FEDERAL PAYMENTS FOR DEFERRED INTEREST CANCELLATION AND IN THE EVENT OF DEFAULT

SEC. 16. (a) In accordance with the agreements entered into by him, the Secretary of the Treasury is authorized to pay in any fiscal year to the bank such amounts as he determines to be necessary to reimburse the bank for nonpayments due to deferments of principal and interest, defaults by the borrower, the death of the borrower occurring in such year, or insufficiencies of payments of the end of term.

(b) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section.

DEFINITIONS

SEC. 17. As used in this title—

(1) The term "bank" means the National Student Loan Bank established under section 2.

(2) The term "eligible institution" means (A) an institution of higher education, (B) a vocational school, or (C) with respect to students who are nationals of the United States, an institution outside the United States which is comparable to an institution of higher education or to a vocational school and which has been approved by the Commissioner of Education for purposes of section 435 of the Higher Education Act of 1965.

(3) The term "vocational school" means a business or trade school, or technical institution or other technical or vocational school, in any State, which the Commissioner of Education has designated pursuant to section 435(c) of the Higher Education Act of 1965.

(4) The term "taxable income" has the meaning given it by section 63 of the Internal Revenue Code of 1954.

AUTHORIZATION OF APPROPRIATIONS

SEC. 18. (a) There are authorized to be appropriated $2,000,000,000 for the fiscal year 1980, $3,000,000,000 for the fiscal year 1981, $2,000,000,000 for the fiscal year 1982, and $1,000,000,000 for the fiscal year 1983 for the purpose of providing initial capitalization for the National Student Loan Bank.

(b) There are authorized to be appropriated $100,000,000 for the fiscal year 1980, $100,000,000 for the fiscal year 1981, $100,000,000 for the fiscal year 1982, and $100,000,000 for the fiscal year 1983 for administrative expenses.●

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the bill introduced by the Senator from Oklahoma (Mr. BELLMON), to establish a National Student Loan Bank, be jointly referred to the Committee on Human Resources and the Committee on Banking, Housing, and Urban Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL COSPONSORS

S. 2739

At the request of Mr. CHAFEE, the Senator from Iowa (Mr. CLARK), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Maryland (Mr. MATHIAS) were added as cosponsors of S. 2739, the Federal Buildings Artistic Enhancement Act.

S. 3087

At the request of Mr. DURKIN, the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 3087, a bill to amend the Bank Holding Company Act of 1956 to prohibit bank holding companies and their subsidiaries from selling property and casualty insurance as principals, agents, or brokers.

S. 3384

At the request of Mr. TALMADGE, the Senator from Iowa (Mr. CLARK), the Senator from Montana (Mr. MELCHER), the Senator from Alabama (Mrs. ALLEN), and the Senator from California (Mr. CRANSTON) were added as cosponsors of S. 3384, a bill to require foreign persons who acquire, transfer, or hold interests in U.S. agricultural land to report such transactions and holdings to the Secretary of Agriculture, and to direct the Secretary to assess and report the effects of such transactions and holdings.

SENATE JOINT RESOLUTION 148

At the request of Mr. BAKER, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of Senate Joint Resolution 148, authorizing and requesting the President of the United States to issue a proclamation designating the seven calendar days beginning September 17, 1978, as "National Port Week."

AMENDMENT NO. 3409

At the request of Mr. PERCY, the Senator from Hawaii (Mr. INOUYE) and the Senator from Nevada (Mr. CANNON) were added as cosponsors of amendment No. 3409, intended to be proposed to S. 991, a bill to establish a Department of Education, and for other purposes.

SENATE RESOLUTION 537—SUBMISSION OF A RESOLUTION OF DISAPPROVAL OF REORGANIZATION PLAN NO. 4 OF 1978

Mr. RIBICOFF submitted the following resolution, which was referred to the Committee on Government Affairs:

S. RES. 537

Resolved, That the Senate does not favor Reorganization Plan No. 4 of 1978, relating to the Employment Retirement Income Security Act of 1974, transmitted to the Congress on August 10, 1978.

Mr. RIBICOFF. Mr. President, I submit a resolution disapproving Reorganization Plan No. 4 of 1978. I ask unanimous consent that Reorganization Plan No. 4 be printed in the RECORD.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

REORGANIZATION PLAN NO. 4 OF 1978

Prepared by the President and transmitted to the Senate and the House of Representatives in Congress assembled, August 10, 1978, pursuant to the provisions of Chapter 9 of Ttitle 5 of the United States Code.

EMPLOYEE RETIREMENT INCOME SECURITY ACT TRANSFERS

Section 101. Transfer to the Secretary of the Treasury.

Except as otherwise provided in Sections 104 and 106 of this Plan, all authority of the Secretary of Labor to issue the following described documents pursuant to the statutes hereinafter specified is hereby transferred to the Secretary of the Treasury:

(a) regulations, rulings, opinions, variances and waivers under Parts 2 and 3 of Subtitle B of Title I and subsection 1012(c) of Title II of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1001 note) (hereinafter referred to as "ERISA"), except for sections and subsections 201, 203(a)(3)(B), 209, and 301(a) of ERISA;

(b) such regulations, rulings, and opinions which are granted to the Secretary of Labor under Sections 404, 410, 411, 412, and 413 of the Internal Revenue Code of 1954, as amended (hereinafter referred to as the "Code"), except for subsection 411(a)(3)(B) of the Code and the definitions of "collectively bargained plan" and "collective bargaining agreement" contained in subsections 404(a)(1)(B) and (a)(1)(C), 410(b)(2)(A) and (b)(2)(B), and 413(a)(1) of the Code; and

(c) regulations, rulings, and opinions under subsections 3(19), 3(22), 3(23), 3(24), 3(25), 3(27), 3(28), 3(29), 3(30), and 3(31) of Subtitle A of Title I of ERISA.

Section 102. Transfer to the Secretary of Labor.

Except as otherwise provided in Section 105 of this Plan, all authority of the Secretary of the Treasury to issue the following described documents pursuant to the statutes hereinafter specified is hereby transferred to the Secretary of Labor:

(a) regulations, rulings, opinions, and exemptions under section 4975 of the Code, except for (i) subsections 4975(a), (b), (c)(3), (d)(3), (e)(1), and (e)(7) of the Code; (ii) to the extent necessary for the continued enforcement of subsections 4975 (a) and (b) by the Secretary of the Treasury, subsections 4975(f)(1), (f)(2), (f)(4), (f)(5) and (f)(6) of the Code; and (iii) exemptions with respect to transactions that are exempted by subsection 404(c) of ERISA from the provisions of Part 4 of Subtitle B of Title I of ERISA; and

(b) regulations, rulings, and opinions under subsection 2003(c) of ERISA, except for subsection 2003(c)(1)(B).

Section 103. Coordination Concerning Certain Fiduciary Actions.

In the case of fiduciary actions which are subject to Part 4 of Subtitle B of Title I of ERISA, the Secretary of the Treasury shall notify the Secretary of Labor prior to the time of commencing any proceeding to determine whether the action violates the exclusive benefit rule of subsection 401(a) of the Code, but not later than prior to issuing a preliminary notice of intent to disqualify under that rule, and the Secretary of the Treasury shall not issue a determination that a plan or trust does not satisfy the requirements of subsection 401(a) by reason of the exclusive benefit rule of subsection 401(a), unless within 90 days after the date on which the Secretary of the Treasury notifies the Secretary of Labor of pending action, the Secretary of Labor certifies that he has no objection to the disqualification or the Secretary of Labor fails to respond to the Secretary of the Treasury. The requirements of this paragraph do not apply in the case of any termination or jeopardy assessment under sections 6851 or 6861 of the Code that has been approved in advance by the Commissioner of Internal Revenue, or, as delegated, the Assistant Commissioner for Employee Plans and Exempt Organizations.

Section 104. Enforcement by the Secretary of Labor.

The transfers provided for in Section 101 of this Plan shall not affect the ability of the Secretary of Labor, subject to the provisions of Title III of ERISA relating to jurisdiction, administration, and enforcement, to engage in enforcement under Section 502 of ERISA or to exercise the authority set forth under Title III of ERISA, including the ability to make interpretations necessary to engage in such enforcement or to exercise such authority. However, in bringing such actions and in exercising such authority with respect to Parts 2 and 3 of Subtitle B of Title I of ERISA and any definitions for which the authority of the Secretary of Labor is transferred to the Secretary of the Treasury as provided in Section 101 of this Plan, the Secretary of Labor shall be bound by the regulations, rulings, opinions, variances, and waivers issued by the Secretary of the Treasury.

Section 105. Enforcement by the Secretary of the Treasury.

The transfers provided for in Section 102 of this Plan shall not affect the ability of the Secretary of the Treasury, subject to the provisions of Title III of ERISA relating to jurisdiction, administration, and enforcement, (a) to audit plans and employers and to enforce the excise tax provisions of subsections 4975(a) and 4975(b) of the Code, to exercise the authority set forth in subsections 502(b)(1) and 502(h) of ERISA, or to exercise the authority set forth in Title III of ERISA, including the ability to make interpretations necessary to audit, to enforce such taxes, and to exercise such authority; and (b) consistent with the coordination requirements under Section 103 of this Plan, to disqualify, under section 401 of the Code, a plan subject to Part 4 of Subtitle B of Title I of ERISA, including the ability to make the interpretations necessary to make such disqualification. However, in enforcing such excise taxes and, to the extent applicable, in disqualifying such plans the Secretary of the Treasury shall be bound by the regulations, rulings, opinions, and exemptions issued by the Secretary of Labor pursuant to the authority transferred to the Secretary of Labor as provided in Section 102 of this Plan.

Section 106. Coordination for Section 101 Transfers.

(a) The Secretary of the Treasury shall not exercise the functions transferred pursuant to Section 101 of this Plan to issue in proposed or final form any of the documents described in subsection (b) of this Section in any case in which such documents would significantly impact on or substantially affect collectively bargained plans unless, within 100 calendar days after the Secretary of the Treasury notifies the Secretary of Labor of such proposed action, the Secretary of Labor certifies that he has no objection or he fails to respond to the Secretary of the Treasury. The fact of such a notification, except for such notification for documents described in subsection (b)(iv) of this Section, from the Secretary of the Treasury to the Secretary of Labor shall be announced by the Secretary of Labor to the public within ten days following the date of receipt of the notification by the Secretary of Labor.

(b) The documents to which this Section applies are:

(i) amendments to regulations issued pursuant to subsections 202(a)(3), 203(b)(2) and (3)(A), 204(b)(3)(A), (C), and (E), and 210(a)(2) of ERISA, and subsections 410(a)(3) and 411(a)(5), (6)(A), and (b)(3)(A), (C), and (E), 413 (b)(4) and (c)(3) and 414(f) of the Code;

(ii) regulations issued pursuant to subsections 204(b)(3)(D), 302(c)(8), and 304 (a) and (b)(2)(A) of ERISA, and subsec-

tions 411(b)(3)(D), 412(c)(8), (e), and (f)(2)(A) of the Code; and

(iii) revenue rulings (within the meaning of 26 CFR Section 601.201(a)(6)), revenue procedures, and similar publications, if the rulings, procedures and publications are issued under one of the statutory provisions listed in (i) and (ii) of this subsection; and

(iv) rulings (within the meaning of 26 CFR Section 601.201(a)(2)) issued prior to the issuance of a published regulation under one of the statutory provisions listed in (i) and (ii) of this subsection and not issued under a published Revenue Ruling.

(c) For those documents described in subsections (b)(i), (b)(ii) and (b)(iii) of this Section, the Secretary of Labor may request the Secretary of the Treasury to initiate the actions described in this Section 106 of this Plan.

Section 107. Evaluation.

On or before April 30, 1980, the President will submit to both Houses of the Congress an evaluation of the extent to which this Reorganization Plan has alleviated the problems associated with the present administrative structure under ERISA, accompanied by specific legislative recommendations for a long-term administrative structure under ERISA.

Section 108. Incidental Transfers.

So much of the personnel, property, records, and unexpended balances of appropriations, allocations and other funds employed, used, held, available, or to be made available in connection with the functions transferred under this Plan, as the Director of the Office of Management and Budget shall determine, shall be transferred to the appropriate agency, or component at such time or times as the Director of the Office of Management and Budget shall provide, except that no such unexpended balances transferred shall be used for purposes other than those for which the appropriation was originally made. The Director of the Office of Management and Budget shall provide for terminating the affairs of any agencies abolished herein and for such further measures and dispositions as such Director deems necessary to effectuate the purposes of this Reorganization Plan.

Section 109. Effective Date.

The provisions of this Reorganization Plan shall become effective at such time or times, on or before April 30, 1979, as the President shall specify, but not sooner than the earliest time allowable under Section 906 of Title 5, United States Code.

SENATE RESOLUTION 538—ORIGINAL RESOLUTION REPORTED AUTHORIZING PRINTING

Mr. ABOUREZK, from the Committee on the Judiciary, reported the following original resolution, which was referred to the Committee on Rules and Administration:

S. RES. 538

Resolved, That there be reprinted, with illustrations, for the use of the Committee on the Judiciary five hundred copies of its committee print of December 1977, entitled "Colonization of the West Bank Territories by Israel," a report to the committee by Senator James Abourezk.

SENATE RESOLUTION 539—SUBMISSION OF A RESOLUTION DESIGNATING "FAMILY CAMPING MONTH"

Mr. MELCHER submitted the following resolution, which was referred to the Committee on the Judiciary:

S. RES. 539

Whereas family camping encourages conservation of the Nation's beauty and wise use of natural resources for better outdoor recreation;

Whereas family camping stimulates public interest in, and enjoyment of, the Nation's great outdoors;

Whereas family camping is a wholesome and economical form of family recreation; and

Whereas approximately fourteen million American families go camping every year: Now therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That May 1979 is hereby designated as "Family Camping Month" and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such month with appropriate ceremonies and activities.

AMENDMENTS SUBMITTED FOR PRINTING

CIVIL SERVICE REFORM LAW—S. 2640

AMENDMENTS NOS. 3464 AND 3465

(Ordered to be printed and to lie on the table.)

Mr. PERCY submitted two amendments intended to be proposed by him to S. 2640, a bill to reform the civil service laws.

TUITION TAX RELIEF—H.R. 12050

AMENDMENT NO. 3466

(Ordered to be printed and to lie on the table.)

Mr. HOLLINGS (for himself, Mr. HODGES, Mr. ABOUREZK, Mr. BELLMON, Mr. DOMENICI, Mr. MARK O. HATFIELD, Mr. EAGLETON, and Mr. BENTSEN) submitted an amendment intended to be proposed by them, jointly, to H.R. 12050, an act to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition.

DISTRICT OF COLUMBIA REPRESENTATION—HOUSE JOINT RESOLUTION 554

AMENDMENTS NOS. 3467 AND 3468

(Ordered to be printed and to lie on the table.)

Mr. SCOTT submitted two amendments intended to be proposed by him to House Joint Resolution 554, proposing an amendment to the Constitution to provide for representation of the District of Columbia in the Congress.

NOTICES OF HEARINGS

SUBCOMMITTEE ON PARKS AND RECREATION

● Mr. JACKSON. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Subcommittee on Parks and Recreation, Committee on Energy and Natural Resources.

The hearing is scheduled for Thursday, August 17, 1978, beginning at 8 a.m. in room 3110, Dirksen Senate Office Building. The purpose of the hearing is to receive testimony from the Department of Agriculture on H.R. 12250 and S. 3242, two bills relating to the Boundary Waters Canoe Area.

For further information regarding the hearing you may wish to contact Mr. Tom Williams at 224–7145.

Those wishing to submit a written statement for the record should write to The Subcommittee on Parks and Recreation, room 3106 Dirksen Senate Office Building, Washington, D.C. 20510.●

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. PROXMIRE. Mr. President, the Committee on Banking, Housing and Urban Affairs will hold a hearing on Friday, August 25 on gold sales by the Department of the Treasury and on S. 2843, a bill to provide for the issuance of gold medallions.

Treasury announced on April 19, 1978, a decision to sell 300,000 ounces of gold per month for 6 months, a total of 1.8 million ounces from the 277.5-million-ounce U.S. gold stock. The first public auction was held on May 23 and monthly sales will continue through October. Minimum bids for 400 ounces are required.

Treasury stated last April that the gold sales would reduce the U.S. trade deficit "either by increasing exports of gold or by reducing the imports of this commodity," and would "further the U.S. desire to continue progress toward the elimination of the international monetary role of gold." The hearing will examine the purposes and effects of gold sales and consider alternatives.

Testimony will be received on S. 2843, a bill introduced by Senator HELMS, which would require Treasury to make a portion of any future gold sales in the form of 1-ounce and one-half-ounce gold medallions. Senator HELMS has stated that issuance of gold medallions would provide greater revenue to Treasury than bullion sales, reduce imports of bullion coins, and give the American public an opportunity to buy Treasury gold in small quantities.

The hearing will begin at 10 a.m. in room 5302 of the Dirksen Senate Office Building. Persons wishing to testify or submit statements for the record should call Robert W. Russell at 202–224–0819.

ADDITIONAL STATEMENTS

NATIONAL AVIATION DAY ON AUGUST 19 MARKS TRIBUTE TO WRIGHT BROTHERS AND THE PROGRESS OF POWERED FLIGHT

● Mr. RANDOLPH. Mr. President, on August 19, National Aviation Day will be celebrated throughout the United States. President Franklin D. Roosevelt proclaimed the day in 1939 when he signed into law a bill authored by Senator CLAUDE PEPPER, of Florida and this Senator, then a Member of the U.S. House of Representatives. August 19 of each year—the birthdate of Orville Wright is National Aviation Day.

It becomes an especially significant occasion this year, for 1978 also marks the

diamond anniversary year of powered flight. On December 17, 1903, Orville and Wilbur Wright achieved the first successful flight in a heavier-than-air powered aircraft at Kitty Hawk, N.C. Virtually unheralded at the time, this brief 12-second flight is recognized as one of history's most significant events.

In the 75 years since Kitty Hawk, the airplane has evolved into a safe, reliable and efficient means of travel. More than any other vehicle in the history of transportation, it has reshaped the world in which we live. Its impact on our political, social and economic systems almost defies definition.

Much of this progress has been achieved since the introduction of jet aircraft into U.S. commercial service just 20 short years ago. Traffic has increased nearly fivefold in that timespan, growing from 49 million in 1958 to 242 million in 1977 with 260 projected for the current year.

General aviation is doing equally well. In 1977, private, corporate and business aircraft moved some 100 million people to intercity and international points. General aviation aircraft sales have soared to unprecedented levels and show no signs of leveling off this year. Prospects for 1979 are as bright.

The large measure of success that our air transportation industry enjoys was the creation of men and women in the aviation industry who possesed foresight, a spirit of adventure and the will to succeed. It also was the result of the professionalism and dedication of those officials in Government charged with the promotion of aviation and the assurance of flight safety. Indeed, I mention that 1978 not only is the 20th anniversary of U.S. jet service but also the 20th anniversary of the Federal Aviation Act, which created a new governmental structure for meeting the challenges of the Jet Age. We look at the record of aviation over the past 20 years and are grateful for that particular piece of legislation.

It is important to bear in mind, I think, that aeronautical products, next to agricultural products, are this Nation's largest export item. Yet our international leadership in this area is meeting increasing competition from abroad. Any significant reduction in exports as a result would have a serious impact on our national economy and employment. In short, we cannot afford to let American aviation become "second best."

Langhorne Bond, Administrator of the Federal Aviation Administration, told me in a recent letter that the U.S. aviation industry—its manufacturing and airline elements combined—is the Nation's largest employer. He pointed out that their combined sales topped $52 billion last year and their salaries amounted to more than $22 billion.

Mr. President, Mr. Bond's constructive comments on aviation are worthy to be shared with my colleagues and the public. I ask that his letter be printed in the RECORD.

The letter follows:

FEDERAL AVIATION ADMINISTRATION,
Washington, D.C., Aug. 11, 1978.

Hon. JENNINGS RANDOLPH,
U.S. Senate,
Washington, D.C.

DEAR SENATOR RANDOLPH: Through your good efforts and those of Congressman Claude Pepper, the birthdate of Orville Wright—August 19, (1871)—was proclaimed by President Roosevelt in 1939 to be National Aviation Day.

This year, as we approach the 40th annual observance of National Aviation Day, we have a special incentive for celebrating the event. 1978 also marks the 75th anniversary of Orville and Wilbur Wright's epochal powered aircraft flight over the sandy dunes of Kitty Hawk, North Carolina, on December 17, 1903.

In the three-quarters of a century that has passed since their frail machine first flew, aviation has grown to become the giant among our transportation systems, the prime bulwark of our national defense, our largest employer, and a major contributor to the nation's economic and social well-being.

The United States aviation industry—its aerospace manufacturing and air transportation elements combined—is by far the nation's largest employer. Its one and-a-half million employees (about one-twentieth of the total U.S. labor force) earned salaries amounting to $22.8 billion in 1977. And in the same reporting period, aerospace manufacturing recorded sales of $32.4 billion, including the export of commercial transports, general aviation planes, helicopters and related aviation equipment amounting to more than $7.5 billion. Air transportation sales and freight revenues in 1977 amounted to $19.9 billion. In all, aircraft sales, passenger and freight revenues in 1977 amounted to more than $52.3 billion. It can readily be seen that aviation has become a highly significant factor in the national economy as well as in national employment.

The cultivation and regulation of this nation's highly complex air transportation industry are the responsibility of the Federal Aviation Administration, the largest operating administration of the Department of Transportation. Specifically, the agency has been charged by the Congress to provide for the orderly development of U.S. aviation; to develop and maintain a dependable air traffic control and air navigation system for the nearly three-quarters of a million pilots who use the nation's airways; to certify the safety and reliability of the nation's aeronautical products and the capability of the U.S. pilots and crewmen who use them; and to provide for the flight safety of all those who use American airspace or who, to some degree, depend upon air transportation for their economic, social and cultural well being. These directives also are the operational tenets by which the 58,000 employees of the agency conduct their daily professional routines.

Contributing to the phenomenal growth of the aviation industry in America has been steady, unstinting encouragement received from the Congress. The entire aviation community, I'm confident, is aware of this. Today Congressional encouragement in this industry is more important than ever. Because of the great impact, economic and social, that aerospace products and air transportation have on the world family of nations, foreign competition has become fiercely aggressive and politically dominated.

The trade practices of nations which countenance cartels, provide tax advantages for export, and engineer import/export strategies to the detriment of the United States have become formidable barriers. Strong government support of the aviation manufacturing and air transportation industries in England, France, West Germany and Japan has been firmly established and consortiums are active.

If the United States is to maintain a healthy aviation manufacturing and air transportation industry, keep its leadership in world aerospace affairs, we must all exhibit new dedication and vision to keep it so.

The 40th annual observance of National Aviation Day must not pass unheralded. The rich heritage of the Wright Brothers—their endowment in America's future—deserves our enthusiastic support.

Sincerely,

LANGHORNE BOND,
Administrator.

INDEXING—A COMPREHENSIVE APPROACH

● Mr. DOLE. Mr. President, much of the time remaining in the Senate will be devoted to considering taxes. The Senate is in a position to take significant steps for the American taxpayer. I hope this golden opportunity is not lost.

Mr. President, yesterday the House voted 249 to 167 to index the capital gains tax to compensate for inflation. The proposal which passed the House is similar to provisions in a bill I introduced, S. 2738, last spring. The support in the House shows the growing support and understanding of indexing. However, the House bill does not go far enough. We need to adopt comprehensive indexing in our tax laws and I intend to offer such a plan in the Senate Finance Committee and if necessary on the Senate floor.

TAXFLATION

Mr. President, our No. 1 tax problem is inflation.

Inflation creates a cruel paradox for the American taxpayer. As prices and income rise, a person is pushed into a higher tax bracket. The result is a larger Federal tax bite out of the taxpayer's pocketbook. When the increases become too large, the Congress "rescues" the taxpayer by modestly reducing taxes and usually enacting a host of unwanted reforms. Congress receives credit for such enlightened action; however, the taxpayer is in no better condition than if you eliminate the tax inflation. In effect, tax reduction enacted by Congress is nothing more than repealing the automatic tax increases caused by inflation.

Mr. President, to emphasize this point, I would cite a study conducted by the Joint Committee on Taxation, which showed that Government tax revenues rise at 1.65 times the rate of the cost of living. Translated to individual taxpayers, that means that for roughly every 10-percent rise in income, their taxes—on the average—go up by 16½ percent! The difference represents the windfall profit Government receives from the inflation it helps to generate.

PUBLIC FAVORS INDEXING

According to a recent poll released by the Roper Organization, by a fairly wide margin—57 to 32 percent—the public prefers an annual inflation adjustment factor built into the tax system to the

periodic tax cuts the Government has made for time to time to keep taxes in line with inflation. According to the poll released recently to the Senate Finance Committee, taxpayers favor the inflation indexing by even a wider margin than the public at large.

Mr. President, indexing the tax system is the way of the future. There is no tax reform that is more important to achieve, easier to accomplish, and fairer in its impact that income tax indexation. The concept is now new. Pension provisions, found in the tax code, imposing limits on the amount of employee contributions, are presently indexed. The energy tax bill, pending in conference, contains an index tax on the business use of oil and gas. According to a congressional budget office study, approximately 63 percent of all Federal expenditures are completely indexed or quasi-indexed. Tax indexing is used successfully in a number of Western countries, including Canada.

Mr. President, the American taxpayer has had enough. They have had enough of big government—inflation—and high taxes. Congress has enacted yearly tax reductions for the past 3 years, and still the Congressional Budget Office estimates that taxflation will rob Americans of $45 billion in 1983.

Mr. President, let me give an example to show how inflation taxes can be levied at higher marginal rates as income rises with inflation.

Based on the assumption that a family of four was earning $15,000 in 1955, and that increases in income match inflation, that family would be earning $32,900 in 1976, or a gain of 120 percent. Yet, this same family would have been moved from the tax bracket of 22 percent to 36 percent, increasing its tax bill from $1,540 to $6,600 for an increase of 330 percent. If you look at the entire situation, the family, in terms of real income, is 11 percent worse off in 1976 than it was in 1955.

DOLE PROPOSAL

The Tax Indexation Act is simple. It would periodically adjust the tax system to compensate for inflation. My proposal is comprehensive. It affects all three of our major Federal taxes—income, gift, and estate.

PERIODIC ADJUSTMENT

Mr. President, my indexing proposal would adjust for inflation the significant fixed dollar amount used in determining individual income tax rates, exemptions, deductions, and credits. Among these items to be adjusted are the tax rate brackets, the personal exemption, the zero bracket amount, retirement contribution levels, gift exclusion, and the unified estate tax credit.

Mr. President, indexing is the answer. Government must not be allowed to profit by the inflation it creates. Tax indexation would require the Congress to show the political courage to vote for the tax increases required to finance the new programs and expanded budget it authorizes, which no doubt is one of the unspoken reasons why the idea of indexation has met with such resistance.

Mr. President, the American people do not want any phony tax cuts. They want meaningful tax relief. I submit that indexing is an idea whose time has come.●

BLAIR T. HUNT

● Mr. SASSER. Mr. President, on July 26, 1978, Memphis lost one of its great civic leaders, Blair T. Hunt.

"Professor Hunt," as he was affectionately known throughout the Memphis area, served as principal of Booker T. Washington High School from 1935 to 1959. During his tenure, he had a profound effect on his students, many of whom moved into leadership roles in Memphis and around the Nation. Dr. Benjamin Hooks, executive director of the NAACP, is one of his many successful students.

Blair T. Hunt was truly a pioneer. He was born to former slaves in 1888. He attended the old Lemoyne Institute (now Lemoyne-Owen College) and received his bachelor of arts degree from Morehouse College. He completed his graduate work at Tennessee State University and Harvard University.

In 1913, Hunt began his teaching career in the Memphis school system, making him one of only three blacks in Memphis with a teaching degree at the time.

During the 1950's, Hunt met with Memphis city officials to promote a peaceful desegregation of public facilities. He commanded the respect of people of all races.

Blair T. Hunt was also a prominent minister, serving as pastor emeritus of the Mississippi Boulevard Christian Church for 51 years. As the first black speaker ever to address the Tennessee Association of Christian Churches, Hunt said that "racial prejudice and bigotry have been man's desire and not God's design."

Long after the normal retirement age, Hunt continued to work for the betterment of the Memphis community. Until his death at age 90, he served on the Shelby County Board of Education.

One prominent Memphis leader put it well, saying:

> We have lost a valuable citizen in the death of Mr. Hunt. Mr. Hunt used his time unsparingly to visit the sick, to pray with those who needed it, to inspire those with whom he came in contact. He was a wonderful man, a legend in his own time. Memphis has lost one of its greatest friends.

I am honored to have this opportunity to call to the attention of the U.S. Senate the legacy of good works left by this great American.●

NATURAL GAS PRICING

● Mr. ABOUREZK. Mr. President, while there has been little discussion of the natural gas pricing issue on the floor, I felt that an article which appeared in the Los Angeles Times of August 6, 1978, would contribute to the discussion that I feel certain is going on among my colleagues as they await the arrival of the conference report. I ask that Paul Davidson's article "Beware the Modern Tripoli Pirates of Natural Gas" be printed in the RECORD.

The article follows:

BEWARE THE MODERN TRIPOLI PIRATES OF NATURAL GAS

(By Paul Davidson)

Antagonists in the continuing energy drama will soon do battle on the floor of the U.S. Senate over a compromise natural-gas regulation bill. This promises to be a heated confrontation, to put it mildly.

The controversy of Congress centers on deregulating the price of natural gas, which is now controlled by federal law. Deregulation implies a phasing out of government rules affecting the maximum price that producers can charge for domestic natural gas at the wellhead. Its proponents advance two basic reasons to support their position.

Regulation has created an "artificially low price" for natural gas.

Higher wellhead prices will encourage significant additional exploration and production, thereby eliminating the nation's gas shortage.

But, in truth, is the price of natural gas artificially low? Under the pricing system first developed by the Federal Power Commission (since absorbed into the Federal Energy Regulatory Commission), producers of gas are permitted to earn a 15% to 18% rate of return on their investment after recovering all their production costs. Those who argue for deregulation to end artificially low prices do not claim that current regulation prohibits all profitable production, but that the proper price of natural gas should be—as President Carter said in his April 20, 1977 message to Congress—the price of "the equivalent energy value of crude oil."

Thus the Carter Administration supports the compromise gas-pricing bill now before Congress, which would raise wellhead prices and phase out regulation until by 1985 total deregulation is effectively achieved. Over time this legislation would bring the price of natural gas up to approximately the energy equivalent of crude-oil prices.

This objective is perplexing, however. In the absence of domestic oil-price regulation, prices in this country would actually be determined by the Organization of Petroleum Exporting Countries (OPEC) cartel. Is a natural-gas price equal to the cartel-regulated world oil price less artificial than intelligent U.S. government regulation of domestic wellhead prices?

Intelligent regulation means that both producers and consumers are treated fairly; consumers are required to pay an equitable price sufficient to provide an adequate, but not exorbitant," return to U.S. producers and royalty owners. But permitting the domestic natural-gas price to rise to the equivalent of the world's crude-oil price means that American producers would obtain even higher profits because of OPEC's "artificial" restraint on hydrocarbon production.

After all, our own government, the multinational oil companies and even the OPEC governments now admit that world crude-oil prices are not naturally determined in the marketplace.

Not long ago, the U.S. Internal Revenue Service ruled that Aramco (a producing company owned by Exxon, Texaco, Socal and Mobil) could not claim any future U.S. tax credits for payments to the Saudis based on the announced "posted price" for Saudi oil because that posted price "was an arbitrary value assigned to oil." Fearing the effect of this ruling on corporate after-tax profits, an Aramco spokesman informed the Senate subcommittee on foreign economic policy that since January Aramco has been authorized by the Saudis to sell Arab oil at "government-established market prices."

The OPEC governments realized they could establish energy market prices when multi-

national oil-producing companies, without charging all that the world energy markets could bear, still were seen making lucrative profits. By coordinating their efforts, the OPEC nations were able to force these companies to collect tremendous additional sums from consumers by raising prices and lowering output. Most, but not all, of this money was paid to the OPEC nations as taxes. Unfortunately, this example has not been lost on domestic hydrocarbon producers and property owners. For them, deregulation means charging what the natural gas market will bear and enjoying additional income.

The "artificial low price" rationale for deregulation of wellhead prices founders on the fact that *all* energy prices are government-regulated. Those who complain that current domestic gas prices are artificially low, are merely asserting that U.S. government regulation—which currently permits adequate profits and public discussion in determining prices—is artificial, while the secretly determined Saudi "government-established market price" is not.

As for the second reason given for supporting deregulation—namely, that higher prices will stimulate significant additional production of natural gas—this argument assumes two preconditions. One is *availability*, meaning that large quantities of natural gas lie underground that are retrievable at slightly higher production costs. The other precondition is *willingness*, meaning that if prices are just sufficient to cover higher costs of increased production, gas producers will eagerly bring forth natural gas in greater quantities.

Specialists point out, however, that only if *both*, availability and willingness exist will consumers benefit from what economists term a large "positive supply elasticity." If the supply is "positively elastic," consumers will pay higher prices, but will also benefit from an increasing gas supply.

On the other hand, if either availability or willingness are not present, then the "elasticity" is zero, or negative, and consumers will not only pay higher prices, but they will also receive no additional gas—perhaps even less gas than before.

For example, if additional gas is not available—if we are running out of gas as Energy Secretary James R. Schlesinger sometimes seems to suggest—then the elasticity is approximately zero and higher prices will merely increase profits, not production. At the same time, corporations will encourage "conservation" by exploiting consumers so that they cannot afford to buy as much gas to heat their homes as before.

Even with availability, however, if producers expect higher prices and realize that it is in their best economic interest to limit output (and are able to prevent any undercutting of OPEC's influence on energy markets), then the elasticity of supply will be negative. In this event, producers will realize they can make more profits with even less effort than before. Indeed, this has already happened. Between 1970 and 1977, wellhead prices of gas have increased over 450%, while domestic production declined by 9%—a result that is consistent with negative supply elasticity.

Current economic conditions encourage this negative supply behavior by gas producers. From the perspective of profit-oriented firms, any natural gas or oil sold at a regulated price means there will be that much less oil and gas that can be produced in the future at the more profitable deregulated price. As long as domestic producers expect the OPEC cartel to dominate energy markets when deregulation occurs, then producers will expect the value of the hydrocarbons left in the ground to rise rapidly over time.

The Administration-backed compromise gas bill would legalize the increased value of gas in the ground. Hence there is a strong economic incentive to delay production, for with the prospects of deregulation, gas left in the ground is better than money in the bank.

Even advocates of less government control recognize the benefits of regulation. Commissioner Alfred E. Kahn, chairman of the Civil Aeronautics Board, testified that higher natural-gas prices "imparted a negative elasticity of supply."

Of course, it is difficult to prove that producers would deliberately slow down exploration and production solely to force deregulation and higher prices. Consumers are always given "technical" explanations for supposedly desirable lower production rates—so technical, in fact, that they make little sense to the public.

While proponents of deregulation claim that removing price controls would aid the "energy crisis," the truth is that deregulating domestic energy prices does not get to the root of our difficulties. Until U.S. political leaders face up to the unpleasant fact that our energy problems are created by a foreign cartel, no effective natural-gas policy will be forthcoming. Indeed, consumers will continue to suffer unnecessarily in order to "solve" cartel-induced energy shortages.

What deregulation *will* do is legitimize the cartel-regulated world energy price as the "natural" price of energy. But as Prof. M. A. Adelman of the Massachusetts Institute of Technology has demonstrated in a recent study, the current world price of crude oil is strictly an arbitrary one that "has no possible relation to scarcity, present or future, known or feared."

Why, then, should domestic natural-gas prices be permitted to rise to the equivalent of the world crude-oil price? Consumers should require any senator or congressman voting for gas deregulation to answer that question.

Congress and the Carter Administration must face this question above all: Should policies be pursued which permit the cartel to extract tribute from consumers and subject them to the energy policies of energy-producing governments, or should we adopt an economic plan that will create market conditions encouraging the decline of OPEC's power? If adopted, deregulation would encourage the former and protect OPEC against the latter.

In earlier times, when the Tripoli pirates attempted to extort tribute from Americans, the U.S. motto was "millions for defense, but not one cent for tribute." Although President Carter indicated that the energy crisis required a national effort—one that is "the moral equivalent of war"—his energy program perpetuates the payment of tribute to modern-day pirates from the Middle East, North Africa and Latin America.

We are not engaged in an energy war with nature, we are not running out of energy sources. Ours is an economic war with a cartel and its unknowing supplicants in our midst.●

CZECHOSLOVAKIA: TENTH ANNIVERSARY OF THE SOVIET INVASION

● Mr. PERCY. Mr. President, it is now 10 years since Soviet and Warsaw Pact forces invaded Czechoslovakia to stifle the evolution of a freer society there. Yet the image still remains vivid of an unarmed and heroic people standing up to Soviet tanks in the streets of Prague. As we recall that brutal aggression, let us also be reminded of the continuing spirit and heroism of the Czechoslovak people as demonstrated by the Charter 77 movement.

The invasion of Czechoslovakia was a clear violation of the U.N. Charter and therefore the transparent rationalizations offered by the Soviet Union were condemned even by many Communists.

The invasion was also a repression of a people striving for self-direction and innovation. It was an affront to the principles of human dignity and to international standards of human rights endorsed by the Soviet Union itself. Not only did it lead to the imposition of a harsh new regime, it reversed the gradual liberalization and cultural flowering of a people striving to recover from the imposition of Communist rule 20 years earlier.

Yet somehow the spirit of the people survives. Despite the harsh repression of dissent, a group of Czechoslovak citizens came together last year to issue Charter 77, a human rights manifesto which has become a symbol of East European resistance to repression. It calls for the simple observance of rights guaranteed by the Czechoslovak constitution and by the Helsinki accords. In short, it asks the Government of Czechoslovakia to live up to its domestic and international obligations. We owe it to the people of Czechoslovakia and the cause of freedom to support the principles of the Charter 77 movement which is a testament to the continued strength of democratic ideals 10 years after the invasion of Czechoslovakia.●

BERT SEIDMAN SPEAKS OUT ON ISSUES AFFECTING OLDER AMERICANS

● Mr. CHURCH. Mr. President, the House and Senate have approved legislation to authorize a White House Conference on Aging in 1981 to chart out a national policy on aging.

As the sponsor of this legislation, I am especially pleased that the Congress has taken this action.

Two prior conferences—in 1961 and 1971—paved the way for important legislative developments, including medicare, the Older Americans Act, the nutrition program for the elderly, several social security increases, and others.

These actions have all helped to improve the well-being of older persons.

However, major problems still exist:

Nearly 3.3 million older Americans live in poverty;

The threat of a costly illness is still all too real for many older Americans and their families, despite the valuable protection of medicare.

Inflation continues to rob the pocketbooks of senior citizens, especially those living on limited incomes.

Older persons are frequently rebuffed in the job market because of negative stereotypes, despite the enactment of the anti-age discrimination law.

Consequently, the delegates to the 1981 White House Conference on Aging will have a full agenda, as they focus on the everyday concerns and challenges for aged and aging Americans.

Recently, Bert Seidman, the director of the AFL–CIO Department of Social Security, wrote an article describing

some of the major problems confronting elderly persons today.

In addition, he developed a blueprint for action to come to grips with these concerns.

I want to express my strong support for one of his priority recommendations: To abolish poverty for older Americans.

As chairman of the Senate Committee on Aging, I consider this to be my No. 1 goal.

A nation as rich and as humane as ours has the capacity to enable elderly persons to live in dignity and self-respect.

What is needed, though, is the commitment.

Mr. President, I commend Bert Seidman's article from the July edition of the AFL–CIO American Federationist to my colleagues, and ask that it be printed at this point in the RECORD.

The article follows:

THE INJUSTICES OF AGING

(By Bert Seidman and Lyndon Drew)

Retirement, once the privilege of a fortunate few, is now possible for virtually all workers—due in part to collective bargaining and the social security system. With the large growth in the retiree population, there is a new awareness of the need for national policy on aging as it relates to income, health, service, long-term care and other areas.

A national policy is especially needed for retired persons over 75, an increasingly larger group and most likely to be disabled and in need of long-term care. In 1950, only 32 percent of the population over 65 was 75 or older, by the year 2000, 45 percent will be 75 or over. Not only is the population generally aging, but the older population is growing older.

Poverty is still the number one problem of old age. Fifteen percent, or one out of seven people over 65, suffer from the degradation of poverty; one out of four are poor or "near poor" with incomes less than 25 percent over the poverty line. Women, minorities, and those who live alone are the subgroups of the poverty-stricken aged population which are growing in size most rapidly. They tend to have worked less in the past and to have worked in lower-paving occupations.

Public programs fall short of the needs. The special minimum Social Security benefit for people who have worked all their lives in low-wage industries ($172.50 a month next year for a worker retiring at 65 with 25 years of coverage and $230 for retirees with 30 or more years of coverage) falls below the poverty level as defined by the Social Security Administration, which in 1977 was $242 per person and $303 per couple. Average Social Security benefits ($387 per couple in July, 1977) are only 69 percent of the 1977 Bureau of Labor Statistics modest standard of living for a retired couple ($561.50), the level of decency which the 1971 White House Conference on Aging accepted. The average widow's benefit ($233) is even less adequate.

The federal government began in 1974 to provide Supplemental Security Income (SSI) to aged, blind, and disabled people whose incomes were below a minimum national standard. Unless recipients of SSI live, as do one-fifth of the aged recipients, in the states with substantial supplements of their own—Alaska, California, Colorado (for couples), Connecticut (for individuals), Massachusetts, Nebraska, and Wisconsin (for couples)—or work to supplement their incomes, they continue to live in poverty, with little more than the federal maximum benefit of $178 per person and $267 per couple ($189 and $284 beginning June 30, 1978) in 28 of the states. Only $20 of any Social Security benefit is disregarded by the federal government before SSI is reduced dollar for dollar. Half of those people eligible for SSI do not receive it. The Social Security Administration is spending a quarter of a million dollars to find out why, but whatever the reasons, approximately four million needy aged, blind and disabled people are not getting SSI payments to which they are entitled.

Poverty for the aged in extreme cases means fewer meals or going without heat. Poverty, in general, debilitates. Inadequate food, shelter, clothing, and medical care create frailty. Providing services for the diseased and disabled is necessary as poverty destroys the health of old people.

The need for long-term care can be met by responsible action by federal, state, and local governments, with the assistance of private organizations and individuals. The elimination of poverty can help limit the disability of old age.

The cost of all aging programs total about 5 percent of the Gross National Product although 11 percent of the population is over 65 and a majority of the low-income aged receive all of their retirement income from the government. Even with Medicare old people pay out more for health care than do younger people. In 1975, older people paid $390 in out-of-pocket costs compared to the $128 spent by those under 65. In 1976, these expenses averaged $404, virtually the same amount in real terms as retirees paid out of pocket before Medicare and Medicaid.

Disabled old people tend to have the lowest incomes. Professionals in Oregon, for example, who work with the elderly estimate that 75 percent of the elderly who need long-term care are low income. Women living alone are especially vulnerable because of their longer life expectancies and their inadequate widow's benefits and pensions. A higher percent of poor old people are disabled because they have suffered a lifetime of low income. The injustices of a lifetime are compounded by old age.

Public policy designed to redress the injustices of age means first of all an adequate income. Supplemental Security Income benefit levels should be increased to at least the poverty level. State governments as well as the federal government can raise benefits. The Social Security Amendments of 1977 provided for the adjustment of special minimum benefits for cost-of-living increases and for a study of a special consumer price index for the elderly. The conference committee rejected a Senate provision for semiannual rather than annual cost-of-living increases in Social Security and SSI benefits. Special minimum benefit levels, still far too low, should be raised above the poverty level.

Social Security benefits should be increased as soon as possible to provide substantial replacement of preretirement disposable incomes for workers earning up to the median wage. Social Security replaces on the average 58 percent of the wages of low income workers and 35 percent of the wages of high income workers. The replacement rate should be higher for the lower income workers because their retirement incomes are inadequate and private pension plans tend to be concentrated among workers earning median wages and above.

The nation's income-tested programs such as SSI discourage family care of disabled old people by reducing benefits when old people live in a family. No other policy so discourages family care of the disabled elderly.

Besides raising benefits and eliminating disincentives for family care, an adequate income for America's retirees will mean an extra allowance for disability. The Veterans Administration now has such an allowance for veterans with incomes less than $3,700 or $5,070 with spouse. Because of the large number of veterans of World War II and the Korean War, by 1990 more than half of U.S. males over age 65 years will be veterans, and by 1995 veterans will exceed 60 percent of the total. Extending eligibility for a disability allowance to the rest of the population makes good sense.

All veterans 65 years of age or older within the Veterans Administration's income limits and in need of regular aid and attendance receive $165 a month in addition to their regular pension. A surviving spouse is entitled to $79 per month. Housebound veterans, but not surviving spouses, receive $61 a month in additional payments. A veteran cannot receive aid and attendance and housebound benefits at the same time.

Cash transfers to families that provide shelter and care to a medically and financially dependent aged person is far more cost effective than the sometimes unnecessary extreme of indefinite institutionalization. In Britain, this option has been successfully pursued. Great Britain began in 1971 to pay a constant attendance allowance to those disabled people at home who needed constant attention both day and night from another person. Since 1973, a lower rate of allowance has been payable to disabled people at home who need the constant attention of another person either by day or by night. The Social Security Benefits Act of 1975 authorized another allowance, the invalid care allowance, for those who cannot go out to work because they are caring for a severely disabled relative who is receiving an attendance allowance. This benefit began in 1976–77. Great Britain is one of 50 countries which have adopted attendance allowances under provisions of old-age, survivors, and disability insurance programs in an effort to help provide home care for disabled persons.

Finland's extensive system of pensions include an assistance supplement to pensioners who are blind, who are incapable of moving around without assistance, or who require the help of another person because of illness, disability, or injury. This amount is paid also to any pensioner aged 80 or over. An attendance supplement replaces the assistance supplement for pensioners who require constant attendance and for any pensioner aged 85 or over. Benefits are not paid to pensioners receiving publicly financed institutional care. Most countries pay as an attendance supplement 50 percent of the basic pension for total disability and less for partial disability.

A logical place to begin an attendance allowance is for the oldest people who are most likely to face disability. The Veterans and Survivors Pension Adjustment Act of 1976 provided a 25 percent increase in pension and allowance rates for eligible veterans who are 78 years of age or older. By recognizing the special needs of older veterans, this provision generally benefits veterans of World War I. The Federal Council on Aging is developing a national policy on the frail elderly which would entitle people to certain additional benefits at age 75. Whether the age is 75, 78, or 80 and 85 (as in Finland), Congress should extend assistance where the risk of disability is greatest.

Next to income, health is the most important concern of retirees. Medicare and Medicaid have done much to equalize the availability of services among the elderly regardless of income. A comprehensive universal national health insurance program would finally assure the American people the right to decent health care.

National health insurance should offer substitutes for traditional institutional care for our nation's elderly. The National Council of Senior Citizens' program calls for long-term care including changes in Medicare and Medicaid to fund services which should be included in national health insurance. The council urged:

Liberalize the present restrictions in Medicare for home health care benefits. This includes dropping the term "skilled" from the phrase "skilled nursing care," eliminating the three-day prior hospitalization require-

ment, and combining the number of visits allotted under Parts A and B of Medicare.

Broaden the coverage of home health services and post-hospital home health services in a state's Medicaid program.

Make day care facilities, homemaker and home health aides and out-patient clinics for the elderly available and eligible for federal reimbursement under Medicare and federal-state reimbursement under Medicaid.

Medicare and Medicaid are inadequate solutions to the needs for long-term care. The patient share of Medicare costs increased on Jan. 1, 1978, from $124 to $144 for the first 60 days of hospital care, from $31 to $36 per day for the 69th through 90th day of hospitalization, and from $62 to $72 per day for stays beyond 90 days. Hospitalized Medicare patients will pay a total of nearly $900 million out of their own pockets this year for their share of hospital costs.

Only 50 percent of the doctors are willing to be paid directly by Medicare. Physicians who refuse to accept assignment (payment by Medicare) set their own charges and the patient must make up the difference between 80 percent of Medicare's determination of the usual, customary and reasonable fee and the doctor's fee. In 1976, Medicare beneficiaries were responsible for $562 million in extra physician charges compared with $126 million in 1970.

From one-third to one-half of the population below the poverty level does not receive Medicaid benefits, a program which funds 50 percent of the nation's nursing home care expenditures as well as funding home health care and other types of medical care for low-income people. Fifteen states do not extend medicaid eligibility to all federal SSI recipients. Sixteen states do not cover recipients of optional state supplements: twelve states with coverage have no basic supplemental.

Twenty-one states do not cover the medically needy, people who are not poor enough to qualify for cash assistance but who cannot afford to pay for medical care; most states with coverage have eligibility levels much lower than the poverty level. A recent survey of nine states found only 52 to 65 percent of aged SSI recipients enrolled in Medicaid.

Twenty states in 1975 and 15 states in 1976 curtailed Medicaid benefits, eliminating some services outright and severely restricting others. Cutbacks have come in so-called "optional" services such as prescription drugs, dental services, hearing aids, and eyeglasses and optometric services which are vital to old people who are trying to maintain their independence.

Medicaid has not achieved its objectives of bringing the poor into mainstream medicine and providing them with treatment by the same types of physicians, community hospitals, and other health facilities as other Americans.

The Medicare and Medicaid Anti-Fraud and Abuse Amendments of 1977 are an attempt to rid these programs of exploitation. The amendments increase the penalties for fraud and abuse from misdemeanors to felonies require increased financial and ownership disclosure and uniform reporting by providers, and establish financial incentives for states to establish fraud investigation and prosecution units outside of the existing state Medicaid agencies.

The fraud control units, if properly directed, will assist abused and neglected nursing home patients. An attempt to include a patient bill of rights enforcement mechanism to protect patients in nursing homes and other health care facilities failed on the floor of the House. The act does protect nursing home patients from the commingling of facility and patient funds and from obligatory gifts and supplements to homes.

Employment after retirement should not be a necessity but it should remain as an option. Otherwise, a great national resource may be wasted. Older workers want only the opportunity to work without exploitation. They are hit most severely with problems of long-term unemployment and have the least access to supplemental income and retraining.

Labor force participation among men 65 and older fell from 46 percent in 1950 to 22 percent in 1975. For men of age 55 to 64, the rate dropped from 87 to 76 percent with most of the drop occurring since 1970. The same demographic trends which promise an aging population promise a labor shortage if we achieve and maintain full employment. Older workers should share the benefits of any long-term economic growth.

In a recent study of those who exhausted supplemental federal unemployment insurance, 70 percent were age 45 years and over, and 45 percent were 55 and over. The United States Commission on Civil Rights reported in December 1977, that only 2.7 percent of the enrollees under Title I of the Comprehensive Employment and Training Act in 1976 were age 55 or over; only 5.0 percent of the enrollees under Title II were 55 or over; and only 5.1 percent of enrollees under Title VI were 55 or over.

Similar problems exist in the vocational rehabilitation and adult basic education programs. Thirty-six percent of the disabled population between ages 80 and 64 are 55 or older. Only 10.1 percent of those in vocational rehabilitation programs in 1976 were age 55 to 64. People 65 and over make up only 4 percent of the population participating in adult basic education although illiteracy rates are relatively higher for this age group.

Some steps are now being taken to rid these programs of age discrimination. In 1974, Congress amended the Comprehensive Employment and Training Act (CETA) to require that grants, contracts, and agreements specifically provide that no person with responsibilities under the act will discriminate in the operation of the programs on the basis of age.

The Labor Department has taken administrative steps to ensure that these statutory provisions are meaningfully implemented. The Department of Health, Education, and Welfare will publish new regulations this year to implement Section 303 of the Age Discrimination Act of 1975, which will be beginning in January 1979, prohibiting age discrimination in "any program or activity receiving federal financial assistance."

The Civil Rights Commission's recommendations would go further toward assuring old people a share in a full employment economy declaring, "age should be used as a criterion for eligibility in federally assisted services and benefit programs only when federal legislation contains a specific authorization for doing so."

The Older Americans Act has been one means for employing old people. Title IX of the act funds the employment of people 55 and over as paralegal assistants, home health and home repair aides, friendly visitors, meals-on-wheels workers, senior center aides, and other vital workers in the community The act should be amended to include a middle-aged and older workers training act to be administered by the Department of Labor. Services related to job development, job referral and follow-up should be included among the social service definitions in Title III.

The Title IX Senior Community Services Employment Program should be strengthened and substantially expanded with permanent legislation targeting services to the specific needs of the low-income elderly. Any social service programs for old people should employ qualified persons aged 55 and older. Employment of old people in service to old people is doubly beneficial to the aging population.

One recent study found that only 24 percent of area agencies on aging have explicitly emphasized serving the low-income population; only 32 percent in terms of minorities. The pattern in Washington, D.C., may be typical. Three wards where 27 percent of the city's needy elderly live have no neighborhood programs; but four major elderly programs are located in the city's most affluent ward. Existing service facilities and any new long-term care facilities must be neighborhood facilities with easy access to low-income old people.

The same underrepresentation of old people in employment services exists in social services. Social Services to Individuals and Families, authorized by Title XX of the Social Security Act, services the most mobile and aware among the eligible population although one of the goals of the law is the prevention or reduction of inappropriate institutional care of the disabled. This is a critical shortcoming because Title XX funds exactly the kinds of home help and health-related services, such as homemaker and transportation services, which the disabled elderly need.

Sponsorship of housing projects has been a successful way to distribute services to old people. Retirement housing can provide shelter and essential services under the same roof. Old people often occupy older and substandard housing and many cannot afford adequate shelter because of lower, fixed incomes.

They are much more likely than younger households to occupy housing units built before 1940. As a result, the Department of Housing and Urban Development has been overwhelmed with applications for subsidized, elderly housing under the Section 202 rental loan program for lower income persons. In fiscal 1977 the department could fund less than 15 percent of the 200,000 units for which applications had been filed. Recognizing that housing is the leading expenditure for most elderly people, Congress should expand the highly successful Section 202 housing program.

Pluralism in social services is a part of the larger pluralism—ethnic, cultural, and religious—which the integration of services ignores. Unless social services are neighborhood based, they will be inaccessible. Unless they have ties to ethnic, cultural, and religious institutions, they will be unacceptable. Traditional ties to family, neighborhood, and organization will continue to be the most important social supports for disabled old people.

Income, health, employment, and service can help secure justice for old people, but old people should participate in the determination of public policy to help win that justice.

The Older Americans Act authorizes the establishment of advisory councils, consisting of representatives of the older population as well as the general public, to advise the area agencies on aging on all matters relating to the administration of the plan and operations conducted thereunder.

The advisory councils tend to be dominated by the professioinals. Too few of the elderly consumers who actually are active in these advisory councils represent the views of low-income retirees. Planning, coordination, and advocacy by area agencies on aging cannot substitute for advocacy by retirees themselves.

"Strength through Organization" is the theme stressed by the National Council of Senator Citizens. Retired workers and their retiree clubs need to assert their interests by joining with this organization with its 3,500,000 members in over 3,500 clubs and organizations throughout the country. The council has the strong support of the labor movement.

As the size of the aging population grows the role of retiree organizations can increase. The needs for long-term care, for adequate income, health, employment and service can be moved to the top of the political agenda.●

BAR ASSOCIATION AND GOVERNMENT REGULATION

● Mr. SCHMITT. Mr. President, an article which appeared in the Washington Post on Wednesday, August 9, concerns a report issued by a special commission of the American Bar Association on Government regulation of the economy. The report recommends substantial deregulation of the economy and increased reliance upon the competitive forces of the marketplace. Among the recommendations of the commission is one which encourages Federal agencies, before they complete a major regulatory action, to prepare a regulatory analysis that would be open to comment by the public and review by other agencies. The report recognizes that "congressional and administrative consideration of Government intervention has been undertaken all too often without adequate analysis and evaluation of the potentially adverse economic impact of the various forms of intervention, both by increasing the cost of goods and services and by impeding private initiatives."

It is significant that the American Bar Association has joined the growing number of concerned individuals and organizations around the country who are voicing increased concern with the burden that regulation imposes upon businesses and individuals. Many of their voices will be heard before the Subcommittee on Administrative Practice and Procedure on September 12, 13, and 20, when hearings will be conducted on regulatory reform. One of the bills to be considered, S. 2011, the Regulatory Reduction and Congressional Control Act, which I introduced, contains several provisions which fulfill the recommendations of the ABA commission.

I understand that representatives from the ABA will be invited to participate in these hearings, and I will look forward to their testimony on this important matter at that time.

Mr. President, I ask that the Washington Post article of August 8, to which I refer be printed in full in the RECORD.

The article follows:

BAR GROUP URGES LESS REGULATION

(By Jack Egan)

NEW YORK.—The movement toward government deregulation of business and the economy got a big boost yesterday from the legal profession, in a report issued by a special commission on law and economy of the American Bar Association.

The report—prepared by a panel of lawyers and economists following three years of study—recommended substantial deregulation of most federally supervised areas of the economy and more reliance instead on competitive market mechanisms, supported by tougher antitrust enforcement.

Areas singled out for deregulation include the airline industry, and oil and natural gas prices which are now subject to controversial federal controls. In the latter case, the report recommends use of taxes to combat the problem of "windfall profits."

It also urged that in the areas of safety and environmental regulation, consideration should be given to ending the sole regulatory reliance on prohibitions and standards as a way of getting things done and the use instead of tax incentives, subsidies and other means as complements or alternatives to rigid standards.

A major theme of the study is that "congressional and administrative consideration of government intervention has been undertaken all too often without adequate analysis and evaluation of the potentially adverse economic impact of the various forms of intervention, both by increasing the cost of goods and services and by impeding private initiatives."

By 1977 there were some 85 federal agencies involved in regulating some aspect of U.S. economic or social life, according to the report which notes that more than one-fourth of these were created in the seven-year period from 1969 to 1975.

The cost of federal regulation has meanwhile gone from $2.2 billion in fiscal 1974 to $4.8 billion in fiscal 1979, an increase of 115 percent over five years.

"In short, government by regulation, in pursuit of a variety of economic and social goals, increasingly controls, restrains and limits many of the productive elements of our society," states the 187-page study titled "Federal Regulation: Roads to Reform."

John J. McCloy, chairman of the special commission and a partner in the firm of Milbank, Tweed, Hadley & McCloy, stated that in viewing federal regulation a difficult balance had to be struck.

"We must preserve incentives for growth and increased productivity while at the same time protecting important social values and objectives which totally free market operations cannot always assure," he said.

The study was released at the annual convention of the ABA which is currently taking place in New York. It represents a consensus of the views of the commission but has not been adopted as official ABA policy.

The report, however, does acknowledge the substantial stake lawyers have in the question of federal regulation since they both draft the rules under which the agencies operate and also fight the battles before the regulators.

The main recommendations in the study to speed up and streamline the regulatory process include the following:

Reliance, where feasible, "upon the competitive market as regulator, supported by antitrust laws," instead of intervention by the government into the economy. If there is the need for regulation, first thought should be given to increased disclosure or incentive-based methods "before turning to the classical command and control modes."

Enactment of a new statute to let the President direct certain agencies to take up a "critical" matter before them on an expedited basis, and authority for the President to then modify or reverse these decisions. These "critical" issues would be defined as those the President finds to be of broad national interest and whose achievement may go beyond the narrow goal normally entrusted to the agency in question.

An executive requirement that all federal agencies, before they complete a major regulatory action, should prepare an analysis that would be open to comment by the public and review by other agencies.

Increasing the flexibility of administrative procedures in regulatory agencies, and avoiding time-consuming formal trial-type hearings whenever possible.

Funding by the federal government of increased public participation in regulatory proceedings.

Implementing some kind of "sunset" review of different federal agencies, but on a limited basis that would allow the public's attention to be focused on a few manageable targets for reform at one time.

The conclusions of the commission drew some dissenting opinions from several of the panel members.

Rhoda Karpatkin, executive director of the Consumer Union, objected to the proposals for increasing the authority of the President in regulatory matters, because, she said, "it would politicize agency decision making, when there appears to be a post-Watergate consensus that administrative decisions should be insulated from direct political interference."

Elliot Bredhoff, a Washington labor lawyer, demurred from the commission's preference for regulation through taxes rather than through price controls and entry requirements. He said that under these recommendations "consumers can be substantially harmed by unjustified prices which lead to inflation and windfall profits, and the harm to consumers is not adequately remedied by any tax proposals discussed in the paper."

Copies of the report are available from the ABA's Commission on Law and the Economy, 1800 M St. NW, Washington, D.C. 20036.●

VOTER INITIATIVE AMENDMENT

● Mr. ABOUREZK. Mr. President, I introduced the voter initiative constitutional amendment, Senate Joint Resolution 67, with the expectation that voters across the Nation would support this proposal. The amendment, similar to the provisions which 23 States and the District of Columbia already have, would permit citizens to place a proposed law on the national ballot by a petition of a specified number of registered voters. Such a law would then be adopted or rejected by a majority of the voters at the next Federal election.

Recently, George Gallup's polling organization conducted a nationwide poll which showed that Americans support the voter initiative amendment by a factor of greater than 2 to 1. In the August issue of Reader's Digest, Mr. Gallup reports the results of his poll on voter initiative and five other proposed election reforms. I commend this excellent article to my colleagues and ask that it be printed in the RECORD.

The article follows:

SIX POLITICAL REFORMS MOST AMERICANS WANT

(By George Gallup)

In conducting thousands of surveys on almost every conceivable issue for nearly half a century, I have learned three significant things about our fellow citizens. One is that the judgment of the American people is extraordinarily sound. Another is that the public is almost always ahead of its leaders. The third is that the electorate has become better educated and more sophisticated politically than ever before.

This is why I am so disturbed by the disillusionment Americans have expressed, through our surveys, with the workings of the political system. Too many Americans regard politics as a "dirty business." In a poll last year evaluating honesty and ethics in 20 occupations, U.S. Senators and Congressmen stood 10th and 13th, respectively, on the list. In an earlier poll, two out of three persons interviewed believed that some legislators had won election by employing "unethical and illegal methods" in their campaigns; even today, only one third of those polled approved of the way Congressmen were doing their jobs. Two out of three

American parents would not like to see their children enter politics as their life's work.

Disgust with politics has not, howeve diminished Americans' faith in their country. In the latest Gallup surveys, three citizens out of four give the United States a "highly favorable" rating, with only about 2 percent rating it unfavorably; and 68 percent expressed, in an earlier poll, confidence in the nation's future. But what the surveys also make abundantly clear is that the public wants the political health of the nation improved. Here is what the polls show on six major proposed political reforms:

Reform 1. By 60 percent, with 30 percent opposed and 10 percent undecided, Americans favor a resolution offered by freshman Senators John Danforth (R., Mo.) and Dennis DeConcini (D., Ariz.) that would limit the tenure of representatives in Congress to a maximum of 12 years. That means no more than two six-year terms for Senators and six two-year terms for members of the House.

U.S. Presidents have been limited to two terms since 1951, and a 12-year restriction for U.S. legislators was advocated by Harry S. Truman and Dwight D. Eisenhower. Stated Eisenhower: "Each man so serving would tend to think of his Congressional career as an important and exciting interlude in his life, a period dedicated to the entire public rather than as a way of making a living. The members would probably give more attention to national good and less to their personal political fortunes."

One major advantage of the plan is that it would tend to make ability, rather than length of service, the criterion in filling committee chairmanships. Another is that it would bring in younger men and women, perhaps more in tune with the will of the people than those who have been following the same mental routines for decades. There are those who argue that it might deprive the nation of the services of individuals of extraordinary talent, and government is so complex that years are required for a legislator to familiarize himself with it. But room would also be made for individuals of equal, or greater, talent, who might otherwise never get to Congress.

Reform 2. Sums spent on election campaigns average at least $100,000 for those seeking seats in Congress. A candidate must either be wealthy or look for contributions, which may come from those seeking legislative favors. In a poll last year, 57 percent (32 percent opposed and 11 percent undecided) of Americans advocated that the government provide a fixed amount of money for Congressional election campaigns, and contributions from all other sources be prohibited (the ban to include us of the candidate's personal funds). The additional cost to taxpayers would be an estimated $2 per adult citizen. It could be the bargain of the century.

Would government funding of campaigns encourage a horde of minor, frivolous candidates? Perhaps, but the problem has been dealt with successfully in Great Britain. There, candidates must put up a substantial money deposit, which must be forfeited if they do not draw a least 12.5 percent of the vote.

Reform 3 would end the chaotic system of nominating Presidential candidates in state-by-state primaries or by state and national conventions. Sixty-eight percent of the voters favor (with 21 percent opposed and 11 percent undecided) a nationwide primary, to be held on the same day in all 50 states, in which voters would choose the Presidential candidates for their parties by popular vote.

This proposal has had overwhelming support for nearly a quarter-century. Under the present system, many citizens are denied the opportunity to vote for the candidate of their choice because not all candidates enter all state primaries. And at political conventions the party "pros" often pay little attention to the popular will.

Reform 4. The seemingly interminable Presidential campaigns, which stretch over the better part of a year (from the first primaries in January to the November elections), exhaust the candidates, thoroughly bore the electorate—and end up changing few votes. By a majority of 68 percent to 21 percent(with 11 percent undecided), Americans would like to shorten the campaign period. They favor advancing election day to September, and holding the inauguration in November of the election year to allow an incoming President more time to prepare his recommendations for the opening of Congress in January.

Reform 5. Probably the least popular political institution in America is the Electoral College, with its "unit rule" whereby a candidate who wins a plurality in a state gets all of that state's votes. The public has favored doing away with the Electoral College since the first survey was taken on this issue in 1948. In a 1977 poll, 75 percent approved amending the Constitution to provide direct popular election of the President (14 percent were opposed and 11 percent undecided).
